Minutes of the 16th Governing Body Meeting held on 25-02-2017 at 11.00 AM in the Board Room of Sri Vasavi Engineering College.

Members Present:

1. Sri O.P. Goenka	--	Chairman
2. Sri G. Satyanarayana	--	Member
3. Sri Ch.S.N. Murthy	--	Member
4. Sri Ch.V.V.Subba Rao	--	Member
5. Sri P. Bala Kasaiah	--	Member
6. Sri P.Venkateswara Rao	-	Member
7. Dr. J. Srihari Rao	--	Member
8. Prof. T. Ramesh	--	Member
9. Sri M. Mahesh	--	Member
10. Dr. B. Prabhakara Rao	--	University Nominee
11. Smt. G. Loshma	--	Member
12. Dr. Ch. Rambabu	--	Invitee
13. Sri Ch. Apparao	-	Invitee
14. Dr.G.V.N.S.R. Ratnakara Rao	--	Invitee
15. Dr. B. Brahmaiah	--	Member Secretary

Members requested for absence:

1. Sri V.Rajanna	--	Member
2. Regional Officer, AICTE, SCRO Hyd.	--	AICTE Nominee
3. Sri J. Satyanarayana Murthy	--	Member
4. Dr. V.V.Hanumantha Rao	--	Member

BOG Meeting on 25/02/'17

Minutes of the Meeting

Item No 1: Welcome address

Principal extended a warm welcome to the Chairman and Members.

Item No 2: Approval of the minutes of the 15th meeting held on 12/07/2016.

The minutes of the previous meeting were circulated earlier and also placed on the table. As there were no comments Board approved the same.

Board was also informed about the action taken regarding the revision of Vision & Mission and also about the award of Best All rounder gold medal.

Item No 3: To present the report on the progress of the college since the last meeting.

Progress made on various fronts since the last meeting was presented.

Board appreciated the achievements made by students and faculty.

Progress report is enclosed as Annexure-I

Item No 4: To appraise the status of admission into various courses for the academic year 2016-17.

Student admission status into various courses during the year 2016-17 was presented.

Board noted the very poor admission into some of the M.Tech programs.

Board was informed of the proposal to close down the P.G program in

i) Power Electronics specialization and

ii) Digital Electronics and Communication system specialization.

In view of the continued poor admissions into these programs Board ratified the action of the college in requesting the AICTE to make the sanctioned intake to zero in the above two courses in the next academic year i.e., 2017-18.

Item No 5: Ratification of Faculty and staff appointments made since the last meeting.

Details of teaching & non-teaching staff resigned & relieved and new appointments made since the last meeting were presented.

Board ratified the same.

Item No 6: To discuss the Training & Placements activities.

Activities of the finishing school in providing training to improve the employability skills of the students by internal trainers and external agencies like 'IT Curve' were explained to the board.

On/Off Campus Placement details of 2015-16 batch and 2016-17 batch (till date) were presented branch wise and Company wise.

Board appreciated the placement of two students with Rs. 8.0 lakh package by Teja's Networks (2016-17).

Item No 7: To review the examination results.

Analysis of the results of the examinations held in April 2016 (II Sem of 2015-16) and November 2016 (I Sem of 2016-17) was presented.

Board noted the pass percentages.

Dr. Ramesh suggested that some remedial action like conducting a pre-semester exam and giving additional inputs to identified students may be tried to avoid single subject failures.

Item No 8: To appraise the details of re-admitted candidates and transferred candidates during the academic year 2016-17.

Details of students who were detained earlier and re-admitted during II Sem of 2016-17 in different years and branches were presented.

Board noted.

Item No 9: To appraise the attendance particulars of the students like Condonation and Detention.

Statistics on the number of students who were i)detained and ii) permitted under condonation category during the I Sem of 2016-17 academic year were presented.

Board noted.

Item No 10: To appraise the status of the ongoing construction activity and infra structure facilities.

Board was informed about the completion of the construction and occupation of i) the Class Room Complex to be used by SVEC and NIT-AP and ii) the apartments block to be used as NIT AP Girls Hostel (Temporarily).

Board was also informed about the creation of 2 seminar halls with audio video facilities & internet connectivity.

Board also noted the progress in the construction of Auditorium complex.

Item No 11: To appraise about the status of UGC autonomous application and NBA accreditation application:

Board was informed that the U.G.C had constituted the expert committee for inspection. The date for the visit is to be fixed by the Co-ordinator of the committee. The visit is expected to be in the month of March'17.

Regarding accreditation by NBA, the application process has been initiated. Pre-qualifier has to be uploaded after receiving response from NBA.

Item No 12: To approve the proposed names of experts to be nominated as members on the proposed Academic Council under Autonomy.

Board was apprised about the constitution of Academic Council, which is mandatory for any autonomous institution.

Since the college is likely to become autonomous very soon the proposed names of experts to be nominated as members from academia & industry have been presented.

1. Prof. B.V.S.S.S. Prasad Department of Mechanical Engineering, IITM, Chennai
2. Prof. P.V. Siva Pullaiah, Pro VC, (former Professor of CIVIL Engineering, IISc, Bangalore.) GITAM University Bangalore.
3. Prof. S.R.K. Reddy, Advisor, GEC, Gudlavalleru.
4. Dr. N.S.C. Babu Executive Director, C-DAC, Bangalore.
5. Sri B.V. Raghavaiah Retired Director, CPRI, Bhopal.
6. Sri Lokam Prasad, CEO/Chief Architect, Miracle Software Systems, Vizag

Board approved the above names.

Item No 13: To appraise about the proposals sent for external funding.

Details of the proposals sent by different departments for external funding under various schemes of D S T and AICTE were presented (Seminar/Symposia-3, MODROBS-3, FDP-3, RPS-3, Skill development centre for SC/ST-1 and an Adjunct Professor).

Approval for the two day workshop on "Nano Applications in Civil Engineering" has been received from DST, till now.

Item No 14: To approve the revision of Vision & Mission statements and Goals & Objectives of the College.

As suggested by the Board in the previous meeting, a workshop has been conducted with stake holders on 21-03-2017 to review and revise the Vision and Mission statements.
After thorough discussion, considering the changing scenario in the industry, shift of education system from teacher centric to student centric and the expected graduate attributes, the Vision & Mission statements and Goals and Objectives have been redrafted, so that they are SMART (Simple, Measurable, Achievable, Realistic & Time bound).

The redrafted statements were presented to the board.

Board deliberated upon the statements and suggested slight modifications.

The final version of the statements is given as Annexure – II

Item No 15: Any other item

i) A proposal made by Dr.J Srihari Rao to institute a cash award of Rs. 2000/- in the name of (late) Prof. B.N.Das of I.I.T , Kharagpur, has been presented to the Board.

The award may be called as Prof B.N.Das memorial cash award Rs.2000/- to be awarded to a student of B.Tech every year, who secures highest % of marks in aggregate considering all the common mathematics subjects in the curriculum (M-I, M-II & M-III). In the case of grading system, the person who gets the highest grade in all the three subjects will be eligible. If there is a tie between two or more students the CGPA upto II Semester may be used to decide the awardee.
Board approved the award.

ii) In continuation of the decision to award the Best All Rounder Gold Medal to the outgoing student taken in the previous meeting; the criteria for deciding the Best All Rounder have been presented.
The criteria are given in Annexure III
Meeting concluded with vote of thanks by Principal.

Chairman

BOG Meeting on 25/02/'17

Annexure I

Item No 16:

Progress Report

1. Three important MOUs were singed.
   a. Under an MOU signed with M/S thing Tronics Innovations Pvt. Ltd., Bangalore, an IoT (internet of things) lab is established in the college at a cost of Rs. 1 lakh. Students and the faculty are working on Industry oriented projects. A part of the work was sent for patenting.
   b. Under an MOU signed with IIT Madras and NIT Warangal, BOSSMOOL operating system and data base application software were provided. Students have to solve the assignments given by IIT on this platform. This training program enhances the capabilities of the students for web development using data bases. This MOU is valid for 3 years and the expenditure involved is Rs. 1.8 Lakh.
   c. Under an MOU signed with e-Yantra of IIT Bombay a Robotics & Embedded systems lab is established in the college at a cost of Rs.3 lakh. Under this MOU 4 faculty members were trained as resource persons for offering In-house training to the students and to carry out student projects in the area of Robotics.
2. Internal Quality Assurance Cell (IQAC) has been reconstituted as per the revised guidelines of NAAC.
3. In association with Electronics and ICT academy of NIT Warangal a 6 - day Faculty Development program on Data Science and Big Data Analytics was organized during 20-25 January 2017.
4. 28 guest lecturers were organized by the departments by inviting experts from Industry/Academic institutions for the benefit of the students.
5. Rs. 40 Lakh worth of equipment was added to different laboratories in the departments.
6. Department of Civil Engineering has carried out 23 nos. of testing works and generated a revenue of Rs. 66,695/-
7. A total of 70 faculty attended FDPs/Seminars etc. organized at different places.
8. 20 papers were presented by faculty in Seminars/Conferences and 26 papers were published in Journals.
9. Sri. V.S. Naresh of CSE and Sri. K. Rambabu of MBA were awarded Ph.D degrees by JNTUK and Amaravathi University respectively. Sri. Madhu sudhanaRao Librarian is awarded Ph.D in Library Science by S.V. University.
10. Department of Civil Engineering obtained a grant of Rs. 1 Lakh from SERB/DST for conducting a 2 - day National Workshop on "Nano Applications in Civil Engineering".
11. Institution of Engineers (I) student chapters in Mechanical and EEE Departments were inaugurated. IE(I), IETE & CSI student chapters organized a number of special lectures and other activities on Engineers Day etc.

12. 4 Innovative proposals, 3 from ECE and 1 from CSE prepared by students under the guidance of faculty were selected in the first round (scrutiny) for presentation at the contest "L&T Techgium-2017" organized by Larsen and Tubro Technology services limited at Bangalore. Out of these 4 proposals 1 proposal from ECE, and the 1 from CSE were selected for the final presentation in month of April 2017 (proof of concept - to present in the form of a working model). The winning teams shall be awarded a cash prize and shall be recognized as TECHgium Innovators and special recognition will be made at the grand finale for the mentors.
13. 86 students participated in paper/poster presentations.
14. A total of 400 students participated in various co-curricular/extracurricular activities and about 100 students' participated sports/games activities outside the college.
    55 students won I/II prize in different competitions.
15. 4 students of CSE got scores of 289,298,297and 290 out of 340 in GRE.
16. Mr. D. Srikanth of III year CSE and his team received silver coin for active participation in Miracle Digital Valley Summit at Visakhapatnam during 12-17 December 2016.
17. 9 students of II B.Tech (Mech.) have successfully completed the MOOCs course on "Electrical Vehicle Technology" conducted by I.I.T. Guwahati and passed the examination.

BOG Meeting On 25/02/'17

Annexure II

Item No 17:

Vision

To be a premier technological institute striving for excellence with global perspective and commitment to the Nation.

Mission

- To produce Engineering graduates of professional quality and global perspective through Learner Centric Education.
- To establish linkages with government, industry and Research laboratories to promote R&D activities and to disseminate innovations.
- To create an eco-system in the institute that leads to holistic development and ability for life-long learning.

Quality Policy

Sri Vasavi Engineering College works towards excellence in technical education by providing quality Engineering education with global standards and state of the art infrastructure to develop the institution as a trend – setter molding young minds into technocrats with national commitment.

Prospective Plan (Goals & objectives)

- To obtain U.G.C. Academic Autonomy and to admit 2017-18 batch in Autonomous curriculum.
- To develop laboratories like Robotics, IoT etc to promote research activity in the inter disciplinary areas.
- To attract and ensure retention of talented faculty and staff through the implementation of best practices.
- To be recognized as a research centre by the Affiliating University for pursuing Ph.D. work.
- To convert the premises in to a smart campus.
- To develop infrastructure required to organize national and international seminars and conferences.
- To get industrial accreditations for the college to enhance the on-campus recruitment of graduates by Multinational Companies. (MNCs).
- To obtain 6 year accreditation by N.B.A. before the academic year 2018-19, for all the eligible courses.
- To establish centers of excellence in specific areas in collaboration with Industry/R&D organization through MOUs.

- To generate revenue through enhanced testing & consultancy work/funded R&D projects/offering training programs etc.
- To transfer the benefits of technology to the society, through incubation/skill development centers.
- To get a brand image to the institute by obtaining patents.
- To slowly convert the premises into a residential campus, where majority of the faculty also can stay back to work during extended hours to enhance the R&D output.
- **To transform the college into a centre of excellence in technical education – a Deemed university of international reputation by 2025, the Silver Jubilee Year.**

BOG Meeting On 25/02/'17

Item No.18 **Annexure III**

Criteria for Selecting Best All Rounder

A. **Academic Activity – 65 Marks (max)**
   i. Performance in 7 Semesters -60 marks
   ii. Qualification in GATE/CAT/MAT/GRE/TOEFL etc - 5 marks
   Total - 65 Marks

B. **Co-Curricular Activity- 15 Marks (max)**

Journal publication	-	3 marks per paper
Paper/Poster presentation Outside college	-	2 marks per paper
Dept. Seminar outside the Curriculum	-	3 per seminar
Class representative	-	2 per Sem (Max 2 Semesters)
Professional body member	-	1 per membership

C. **Extra- Curricular Activity – 15 Marks (Max)**
   i. **Outside the College:**

Individual event		**Group/Team Event**
I prize –	4 Marks/event	3 marks/event
II prize-	2 Marks/event	2 marks/event
Participation-	1 Mark/event	1/event

   ii. **Within the College:**

Individual event		**Group event**
I Prize	3/event	2/event
II Prize	1/event	1/event

   iii. **Tech Fest Co-ordinator: 4marks**
   Any other co-ordinator: 2 marks
   Committee member : 1 mark

D. **Selection committee's Assessment: 5 Marks.**
   (Personality/general exposure/Communication skills etc)

Note: The candidate should get at least 5 marks each in B & C parts.

Regarding Academic performance in Part A; the distribution of marks for the academic performance is may be done as follows:

Normalized mark = (Student Marks/CGPA)/ (Department Topper Marks/CGPA) x 60

Board approved the criteria and authorized the Principal to make minor changes if necessary.

SRI VASAVI ENGINEERING COLLEGE
(AUTONOMOUS)
Pedatadepalli, Tadepalligudem – 534 101.

22nd Meeting of Board of Governors (BOG)
Held on 16th Dec, 2022 at 10.30 AM in Board Room

10:00 to 10:30 A.M Campus Visit

Agenda Notes

Item No.1: Welcoming the Chairman and Members of the Board.

Opening remarks by Chairman.

Item No.2: Approval of the minutes of the last meeting held on 11/03/’2020 and appraisal of the action taken.

Copy of the minutes of the 21st Board of Governors meeting held on 11/03/2020 is herewith attached and members are requested to please go through it and make comments/suggestions needed, if any.

The minutes of the meeting is enclosed as **Annexure-I** (Page Nos. 1-3)

Item No.3: To present the report on the progress of the college since the last meeting.

The progress of the college since last meeting is given in **Annexure II**. (Page Nos. 4-13)

Item No.4: To appraise the status of admissions into various programmes for the academic years 2021-22 & 2022-23.

Details admissions made during the years 2021-22 & 2022-23 are given in **Annexure – III** (Page Nos.14-15)

Item No.5: To review the utilization of the Budget for the year 2021-22

Details of budget utilization in the year 2021-22 are given in **Annexure – IV** (Page No.16)

Item No.6: To approve the proposed Budget for the year 2022-23

Details of proposed budget for the year 2022-23 are given in **Annexure – V** (Page No.17)

Item No.7: Approval of the minutes of the Academic Council meetings held on 30-08-2020 (IV Meeting), 07-01-2021 (V Meeting), 05-02-2022 (VI Meeting) and 10-11-2022 (VII Meeting)

Minutes of the Academic Council meetings held on 30the Aug, 2020, 7th Jan, 2021, 5th Feb, 2022 and 10th Nov, 2022 are given in **Annexure – VI**
(Annexure VI is given seperately)

Item No.8: Ratification of Teaching Staff Appointments made since last BoG Meeting

Details of staff appointment (Teaching & Non-Teaching) since last BoG meeting are given in **Annexure VII (Page Nos.18-26)**

Board is requested to approve the appointments of new Teaching and Non-Teaching staff.

Item No.9: Training & Placement statistics for the years 2020-21 and 2021-22

The college is giving best training to the students to make them ready for recruitment drives. The details of total placements in 2020-21 & 2021-22 are as follows

- **Total Number of Companies: 125**
- **Total number of Offers: 1999**
- **Total number of students Placed: =1068**
- **Total number of major training programs Conducted: 29**

Highest Package: 44 LPA – Amazon

S. No.	Roll Number	Name of the Student
1.	18A81A05K9	KOTHA DHANA LAKSHMI

Second Package: 25.22 LPA – SERVICENOW

S. No.	Roll Number	Name of the Student
1.	17A81A05G7	YELLAVULA SRI GANGA SWETHA SRI BHAVANI

Third Highest Package: 20LPA – VMWARE

S. No.	Roll Number	Name of the Student
1.	17A81A0530	NANDURINAGA VENKATA SRI LALITHA
2.	17A81A0549	VANKAYALAKAVYANJANA

Third Highest Package: 20LPA - Wells Fargo

S. No.	Roll Number	Name of the Student
1.	18A81A05C8	SOWMYA BADANA

<u>Next Highest Packages:</u>

- **Next Highest package:** 13 LPA -CAPILLARY TECHNOLOGIES
- **Next Highest package** : 12 LPA - AIRBUS GROUP INDIA PVT. LTD.
- **Next Highest package:** 09 LPA - Berkadia
- **Next Highest package:** 7.02 LPA - TCS DIGITAL
- **Next Highest package:** 7 LPA - WILEY MTHREE
- **Next Highest package:** 6.52 LPA - ZOHO
- **Next Highest package:** 6.5L - ACCENTURE
- **Average Package:** 4 LPA

Item No.10: Examination results for the year 2020-21 & 221-22

Result analysis of the successful completion of B.Tech., MBA & M.Tech. end examinations and eligible no. of students for award of degree for the year 2021 & 2022 are given in **Annexure VIII**. (Page No.27-30)

Item No.11: Information on new courses/increase in intake/reduction in take etc. made in AICTE EoA application for the year 2021-22 & 2022-23

The following changes were made while submitting the application for EoA from AICTE for the year 2021-22.

New Courses:

i. Introduced two new emerging courses: B.Tech. in Artificial Intelligence and Machine Learning and B.Tech. in CSE (Artificial Intelligence) with an intake of 60 in each specialization from the academic year 2021-22

ii. Intake increased for PG Programme MBA from 90 to 120 in the year 2021-22

Change in the Name of the Course(s):

1. M.Tech. in Structural Engineering to M.Tech. Civil (Structural Engineering).
2. M.Tech. in Power Systems Control and Automation Engineering to M.Tech. in Power Electronics and Power Systems.
3. M.Tech. Machine Design to M.Tech. in Thermal Engineering.
4. M.Tech. in VLSI and Embedded Systems to M.Tech. in Embedded Systems and VLSI.
5. M.Tech. in Computer Science & Engineering to M.Tech in Computer Science.

The following changes were made during the year 2022-23.

i) Introduced a new course in Diploma level namely Diploma in Computer Engineering with an intake of 60 from the academic year 2022-23.

ii) Intake increased to 120 from 60 in two under graduate programmes B.Tech. in Artificial Intelligence and Machine Learning & B.Tech. in CSE (Artificial Intelligence) from the academic year 2022-23

Reduction of Intake was applied in the following programmes from 2022-23.

1. M.Tech. in Civil (Structural Engineering) – 18 to 6
2. M.Tech. in Power Electronics and Power Systems – 18 to 6
3. M.Tech. in Thermal Engineering – 18 to 6
4. M.Tech. in Embedded Systems and VLSI – 18 to 6
5. M.Tech. in Computer Science - 18 to 12
6. B.Tech. in Electrical & Electronics Engineering - 120 to 90
7. B.Tech. in Mechanical Engineering – 120 to 90
8. Diploma in Civil Engineering – 60 to 30
9. Diploma in Mechanical Engineering – 120 to 60
10. Diploma in Electrical & Electronics Engineering – 120 to 90

Item No.12: Proposal / Ratification of change of Member in Academic Council

Dr. Srinivas Pinisetty, Asst. Professor in CSE Department of IIT, Bhuvaneswar has been identified for the nomination as a member to College Academic Council in replacement of Late Dr. B.V.S.S.S. Prasad, Professor of Mechanical Engineering , IIT Madras.

Board is requested to approve his name for nomination to Academic Council.

Item No.13: Proposal for the change in HR Policy of the institution with respect to consultancy works

The following proposal was received from Head of the Depts. to change HR Policy rules in respect of honorarium in consultancy work being done by Departments.

Honorarium for Consultancy Work		
S.No.	Existing Policy	Proposed
1	College (60%)	College (50%)
2	Principal (2%)	Principal (2%)
3	HOD (3%)	HOD (6%)
4	Faculty Incharge (25%)	Faculty Incharge (25%)
5	Lab Technician (5%)	Lab Technician (10%)
6	DEO (1%)	DEO (2%)
7	Accounts (2%)	Accounts (2%)
8	Helper (2%)	Helper (3%)
Total	100%	100%

Item No.14: Any other Item with the permission of the chair.

SRI VASAVI ENGINEERING COLLEGE (Autonomous)

Pedatadepalli, Tadepalligudem – 534 101.

First Meeting of Academic Council held on 01/06/2018 at 10:30 A.M in the Conference Hall of Sri Vasavi Engineering College

Members Present:

1.	Dr.G.V..S.N.R.Ratnakar Rao	I/C Principal & Chairman
2.	Dr.P.V.Siva Pullaiah	Member
3.	Dr.S.R.K.Reddy	Member
4.	Dr.N.S.C.Babu	Member
5.	Dr.V.V.Subba Rao	Member
6.	Dr.P.Subba Rao	Member
7.	Dr.R.Sowmeyan, HOD, CE	Member
8.	Dr.Ch.Rambabu, HOD, EEE	Member
9.	Dr.M.V.Ramesh, HOD, ME	Member
10.	Dr.E.Kusuma Kumari, HOD, ECE	Member
11.	Dr.D.Jaya Kumari, HOD, CSE	Member
12.	Sri.N.Rajasekhar, HOD, BS&H	Member
13.	Dr.G.V.Subba Raju, HOD, MBA	Member
14.	Dr.J.Srihari Rao, Director	Member
15.	Dr.V.V.Hanumantha Rao, Section Head, English	Member
16.	Sri.K.N.H.Srinivas, Assoc.Prof., ECE	Member
17.	Dr.P.V.V.Rama Rao, Dean R&D	Member

Members absent

1.	Dr.B.V.S.S.Prasad, Professor, IIT, Madras	Member
2.	Dr.Ch.Satynarayana, Professor, DAP, JNTUK	Member
3.	Sri Prasad Lokam, CEO, Miracle Software Solutions	Member
4.	Sri B.V.Raghavaiah, Director (Retd.), CPRI, Bhopal	Member

1st Academic Council Meeting held on 01/06/'18

Minutes of the Meeting

Item No.1: Welcome address by Principal& Introduction of members.

As the Principal Dr.B.Brahmaiah was on leave, Prof.G.V.S.N.R Ratnakar Rao, Dean Academic & Member Secretary of the Council chaired the meeting in the capacity of In-charge Principal.

He welcomed all the members and introduced the members.

Item No.2: Approval of subject experts from outside parent University to be nominated as members of Boards of Studies in different departments

The constitution of different Boards of Studies along with external members as per the UGC guidelines was presented to the council.

The council approved the names of the subject experts from outside parent University nominated as members of Boards of Studies in different departments.

The approved names are given in Annexure-I

Item No.3: Academic Rules & Regulations for U.G & P.G programs

The rules & regulations for B.Tech/M.Tech & MBA programs were presented. After going through the rules & regulations members made some suggestions. Further, it was resolved to finalize the rules & regulations after taking the suggestions from the members in the Joint meeting of Boards of Studies also.

Item No.4: Any other item with the permission of the Chair

The tentative course structure for the UG, PG programs offered also was presented and it was tentatively approved and was resolved to finalize after further discussion in Boards of Studies.

Chairman

1st Academic Council Meeting on 01/06/2018
Agenda Item no: 02
Annexure-I

Approved List of Subject Experts for Nomination as Members on Boards of Studies

Department: Civil Engineering

S.No.	Name of the Member	Designation
1.	Dr. C.B. Kameswar Rao	Professor, Dept of Civil Engg., NIT Warangal
2.	Dr. M. Kumar	Professor, Dept of Civil Engg., Osmania University College of Engg, Hyderabad

Department: Electrical and Electronics Engineering

S.No.	Name of the Member	Designation
1.	Dr. M. Sydulu	Professor, Department of Electrical and Electronics Engineering, NIT Warangal
2.	Dr. Y. P. Obulesu	Professor, Department of Electrical and Electronics Engineering, VIT, Vellore.

Department: Mechanical Engineering

S.No.	Name of the Member	Designation
1.	Dr. R.V.Chalam	Professor, Department of Mechanical Engineering, NIT Warangal
2.	Dr. A. Krishnaiah	Professor, Department of Mechanical Engineering, Osmania University, Hyderabad

Department : Electronics & Communication Engineering

S.No.	Name of the Member	Designation
1.	Dr.N.V.S.N. Sarma	Professor, Department of Electronics and Communication Engineering, NIT Warangal
2.	Dr. M. Venugopala Rao	Professor, Department of Electronics and Communication Engineering, KL Deemed University, Vijayawada

Department : Computer Science & Engineering

S.No.	Name of the Member	Designation
1.	Dr. R.B.V. Subrahmanyam	Professor, Department of Computer Science and Engineering, NIT Warangal
2.	Dr. S. Pallam Setty	Professor, Department of Computer Science and Systems Engineering, AU College of Engineering, Visakhapatnam

Department: BSH (English)

S.No.	Name of the Member	Designation
1.	Dr. D. Kesava Rao	Professor of English, NIT Warangal
2.	Dr. K. Sree Ramesh	Special Officer, Adikavi Nannayya Univeristy PG Center, Tadepalligudem

Department: BSH (Physics)

S.No.	Name of the Member	Designation
1.	Dr. S.V.S.R. Reddy	Professor, Dept of Physics, NIT Warangal
2.	Dr.P.S.V.Subba Rao	Asst.Prof., Department of Physics Andhra University, Visakhapatnam

Department: BSH (Chemistry)

S.No.	Name of the Member	Designation
1.	Dr. P. Nageswara Rao,	Professor, Dept of Chemistry, NIT Warangal
2.	Dr. G. Rambabu	Asst. Prof., Sri Vidyaniketan Engg. College(A), Tirupathi

Department: BSH (Mathematics)

S.No.	Name of the Member	Designation
1.	Dr. Y.N.Reddy	Professor, Dept of Mathematics, NIT, Warangal
2.	Dr. K.K.M. Sarma	Professor of Mathematics, Andhra University, Visakhapatnam

Department: Management Studies

S.No.	Name of the Member	Address
1.	Dr. B. Amarnath	Professor & Registrar, Rayalaseema University, Kurnool
2.	Dr.J.N.V.Raghu Ram	Associate Professor, Department of Technology Management, VIT, Vellore

Minutes of the 2nd Academic Council meeting on 01/07/2018
Item No: 3
Annexure No: I

Academic Rules and Regulations for B.Tech Programme

(Applicable to the Batches Admitted in 2018 and onwards)

1.0 All the rules and regulations specified hereafter shall be read as a whole for the purpose of interpretation and when any doubt arises, the decision of the Chairman Academic Council of Sri Vasavi Engineering College is final.

As per the norms, the Principal of the college (Autonomous) shall be the Chairman of Academic Council.

2.0 ADMISSIONS:

ELIGIBILITY:

As per the norms of JAHAWARLAL NEHRU TECHNOLOGICAL UNIVERSITY KAKINADA, Kakinada

B.TECH – REGULAR:

For Category – A seats (**Filled by the Convener, AP EAMCET),** a pass in Intermediate/10+2 with a rank in Common Entrance Test, AP EAMCET conducted by APSCHE.

For Category – B seats (**Filled by the College),** a pass (**50% Min aggregate**) in Intermediate/10+2 with or without a rank in AP EAMCET.

B.TECH -LATERAL ENTRY:

Admission under lateral entry is governed by the eligibility norms of JNTUK and Government of Andhra Pradesh.

2.1 ADMISSIONS UNDER SPECIAL CASES:

These may arise in the following situations.

1. When a student gets detained due to academic regulations and re-joins the college to complete the programme in a new regulation.
2. When a student discontinues for some time and re-joins the college to complete the programme in a new regulation.
3. When a student seeks transfer from other colleges to SVEC and intends to pursue B.Tech programme in the eligible branch of study.

These admissions may be permitted by the College Academic Council as per the norms stipulated by the statutory bodies and the Government of Andhra Pradesh from time-to-time.

In all such cases for admission if necessary permissions from the statutory bodies are to be obtained and the programme of study at the college will be governed by the transitory regulations stipulated in 9.10.

An undertaking from the students is to be taken at the time of admission stating that they would abide by the transitory regulations specified by the authorities if there is any change in the regulations.

3.0 DURATION OF THE PROGRAM AND MEDIUM OF INSTRUCTION:

The duration of the B.Tech program is four academic years comprising two semesters in each academic year. **The medium of instruction and examination is English**.

S.No	Activity	Description
1	Number of Semesters in an Academic year.	Two
2	Regular Semester duration in Weeks.	21 Weeks

3.1 Academic Activities Schedule:

1	Instruction	Starts from the date commencement of the semester as specified in the academic calendar.
2	Ist Mid Examinations	During the 9th week from the date of commencement of the semester.
3	2nd Mid Examinations	During the 17th week from the date of commencement of the semester
4	Comprehensive Test	During the 18th week from the date of commencement of the semester
5	Practical Examinations	1 Week
6	End Semester Examinations	2 Weeks

3.2 EVALUATION:

For Theory Courses:

Continuous Internal evaluation (CIE) for 40 marks and Semester End Examinations (SEE) for 60 marks of the student's performance.

For Laboratory course:

40 marks for Continuous Internal Evaluation (CIE) and 60 Marks for the Semester End Examinations (SEE).

4.0 PROGRAMS OF STUDY IN B.TECH:

4.1 The four year B.Tech programme is offered in the following branches of study at present:

S.No	Title of the UG Programme	Program Code
1.	Civil Engineering	CE
2.	Electrical and Electronics Engineering	EEE
3.	Mechanical Engineering	ME
4.	Electronics and Communication Engineering	ECE
5.	Computer Science & Engineering	CSE

4.2 Structure of the programme:

4.2.1 Each B.Tech programme of study shall consist of:

1. General courses in Basic Sciences, Basic Engineering Sciences, Social Sciences & Humanities.
2. Interdisciplinary courses in Engineering to impart the fundamentals of Engineering to the student.
3. Program core courses to impart broad based knowledge needed in the branch of study concerned.
4. Program elective courses from the discipline and open elective courses from interdisciplinary areas to be chosen by the student based on his/her interest and specialization preferred.

5. Laboratory courses
6. Projects, seminars and internships.
7. Every programme of study shall be designed to have 45-50 theory courses and 15-20 laboratory courses and the percentage distribution of the credits among different types of courses is as follows.

Humanities, Social Sciences, Basic Sciences and Engineering Science courses	35-40%
Professional core courses	30-40%
Professional and open elective courses	10-15%
Major project, Seminar, Employability skills and etc.,	10-15%

4.2.2 Contact hours:

Depending on the requirements of the programme, the number of contact hours per week is normally between 25 to 30.

4.2.3 Credits:

Credits are assigned to each course as per the norms as shown below:

Theory Course: 1 hour per week - 1 credit

Laboratory Course: 1 hour per week - 0.5 credit

4.3 Curriculum for programme of study:

1. The curriculum of B.Tech programme in any branch of Engineering is formulated based on the guidelines mentioned in **4.2,** (to be recommended by the Board of Studies concerned and approved by the Academic Council).

2. (After getting approval from the Academic Council, a copy of the curriculum along with rules and regulations for the programme shall be made available to all the students.) The following table shows a typical curriculum frame work for the B.Tech programme.

S.No	Course Area	Typical no of credits for a total of 160 credits

1.	Humanities & Social Sciences	10-15
2.	Basic Sciences	20-25
3.	Engineering Sciences	20-25
4.	Professional Core	45-60
5.	Professional Electives	12-18
6.	Major Project/Seminar, etc.,	10-15
7.	Open Electives	6-12
8.	Mandatory Courses	Non-credit

4.4 Maximum duration permitted to pursue the programme and cancellation of admission:

4.4.1 The maximum duration permitted to successfully complete the four year B.Tech. Programme of study shall be:

1. Eight academic years in sequence from the year of admission for a normal student admitted into the first year of the Programme.
2. Six academic years in sequence from the year of admission for a lateral entry student admitted into the second year of the Programme.

4.4.2 In case, any student fails to meet the applicable conditions for the eligibility of degree in the maximum stipulated period as mentioned in **4.4.1** his/her admission stands cancelled.

5.0 EXAMINATION SYSTEM AND EVALUATION:

5.1. The performance of the students in each semester shall be assessed course wise. All assessments will be done on absolute marks basis. However, for the purpose of reporting the performance of candidate, letter grades and grade points will be awarded. The performance of the student in each theory course is assessed through

1. Mid Semester Examinations
2. Comprehensive tests and
3. End Semester Examinations

For each theory/design and/or drawing course there shall be a Semester End Examination of three hours duration at the end of each semester, except where stated otherwise in the detailed scheme of instruction.

5.2. The distribution of marks between continuous internal evaluation (CIE) and semester end examination (SEE) will be as follows:

Nature of the course	CIE	SEE
Theory Courses	40	60
Drawing	40	60
Practical	40	60
Seminar Presentation/Comprehensive Viva	50	-
Project work Part-A	50	
Project work Part-B	50	150
Mandatory course	40	60

5.3. **Continuous Internal Evaluation (CIE) in Theory and Drawing Courses:**

For theory Courses the distribution for 40 marks under CIE will be as follows:

Two Mid semester examinations - 25 marks each

Comprehensive test - 10 marks

Assessment through

Alternate assessment tool (AAT)

2 times in a Semester - 05 marks each

CIE is computed as follows.

Two Mid Semester Examinations will be conducted, each for 25 marks. In order to encourage the students to appear for both examinations, weighted average of both exams will be taken as follows:

CIE= 0.8 X Best performance in MID exam +0.2 X Next best performance in MID exam $+\frac{(AAT1+AAT2)}{2}+$ Performance in comprehensive test

Comprehensive test in the total syllabus will be conducted at the end of the instruction.

The alternate assessment tool with detailed modality of evaluation for each course shall be specified by the teacher concerned at the beginning of the course with the permission of HOD concerned and the Principal.

The Mid Semester Examination is conducted in the regular mode according to a schedule which will be specified in the academic calendar.

The said examination consists of Part-A and Part-B, Part-A being objective type for 10 marks and Part-B being a written examination for 15 marks.

Engineering Graphics:

The internal evaluation for 40 marks will be done as follows:

1. Each student has to submit 6 drawing assignments - 6 x 5 = 30 marks
2. Two mid examinations each for 10 marks with weighted average as specified above =10 marks

Total- 40 marks

5.4. Semester End Examination Evaluation:

5.4.1 For each theory, design and/or the drawing course there shall be a semester end examination of three hours duration at the end of each semester for 60 marks unless stated otherwise in the detailed scheme of instructions.

The end semester examination is conducted for 60 marks covering the total syllabus.

There will be 6 questions with internal choice (One from each Unit). The student has to answer all the 6 questions which carry a weightage of 10 marks each.

5.4.2 For practical Courses there shall be continuous evaluation during the semester for 40 internal marks and semester end examination for 60 marks. The 40 marks under CIE shall be awarded as follows:

Day to day work -15 marks, Record-10 marks and internal laboratory test (to be conducted towards the end of the semester)-15 marks.

The Semester end examination in practical course shall be conducted by the teacher concerned and an external examiner.

5.4.3 For the seminar, the student shall collect the information on a specified topic and prepare a technical report and has to make an oral presentation showing his understanding over the topic to be evaluated by the Departmental committee consisting of **Head of the**

department, seminar supervisor and a senior faculty member. The seminar report shall be evaluated for 50 marks. There shall be no external examination for seminar.

Project Part-A: The student will make literature survey, identify a problem and prepare a plan for the execution of the proposed project work. Evaluation will be done by the departmental committee consisting of Head of the Department, Project In-charge and a senior faculty member. The evaluation will be done for 50 marks based on the report submitted and a seminar/viva-voce.

P**roject Part-B:** Out of a total of 200 marks for the project work-Part B, 50 marks shall be for Internal Evaluation and 150 marks for the Semester End Examination. The Semester End Examination (Viva – Voce) shall be conducted by a committee consisting of an external examiner, Head of the Department and Supervisor of the Project. The evaluation of project work shall be conducted at the end of VIII semester. The Internal Evaluation shall be on the basis of two seminars given by each student on the topic of his project and evaluated by an internal committee.

5.4.4 A minimum of 21 marks (35%) are to be secured exclusively in the semester end examination of theory/drawing course and a minimum total of 40 marks in SEE and CIE put together (40%) in a theory/drawing course is to be secured in order to be declared as passed in that course and for award of the grade in that course.

6.0 ATTENDANCE REQUIREMENTS:

A student is eligible to write the semester end examinations (SEE) if he/she acquires a minimum of 75% of attendance in aggregate of all the courses of that semester put together.

6.1 Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in a given semester may be granted by the College Academic Committee on medical grounds provided the student has submitted the application for medical leave along with medical certificate from a Registered medical practitioner within three days form reporting to the class work after the expiry of the medical leave.

6.2 A student representing the college in approved extracurricular activities such as sports, games, cultural meets, seminars, workshops and conferences shall be considered as on duty provided he/she has obtained prior written permission from the head of the department concerned and also submitted the certification of participation from the organizer of the event within three days after the completion of the event. However, this period of absence shall be counted as present for the purpose of computation of attendance only.

6.3 A stipulated fee shall be payable towards condonation of shortage of attendance.

6.4 Attendance below 65% in aggregate shall not be condoned under any circumstances.

6.5 Students whose shortage of attendance is not condoned in any semester are not eligible to write their semester end examinations.

6.6 A student who is short of attendance in a semester may seek re-admission into that semester when offered again, within 1 week from the date of the commencement of class work.

6.7 A student will be promoted to the next semester if he satisfies the attendance requirement of the present semester and the credit requirements specified under **7.0.**

6.8 If any candidate fulfills the attendance requirement in the present semester, he shall not be eligible for readmission into the same class.

6.9 A student is permitted to avail the condonation of shortage of attendance as mentioned above for a maximum of three times only during the total duration of the programme.

7.0 CONDITIONS FOR PROMOTION:

Minimum academic requirements:

The following academic requirements have to be satisfied in addition to the attendance requirements mentioned in **item no.6.0.**

7.1 A student is deemed to have satisfied the minimum academic requirements if he/she has earned the credits allotted to each theory/practical/design/drawing/laboratory course/project and secures not less than 35% of marks in the semester end examination and minimum 40% of marks in the sum total of the internal marks and semester end examination marks.

7.2 A student shall be promoted from first year to second year if he/she fulfills the minimum attendance requirement.

7.3 A student shall be promoted from II year to III year if he/she earns 50% of the total credits specified up to and including II year II semester.

7.4 A student shall be promoted from III year to IV year only if he earns 50 % of the credits specified up to and including III year I semester

8.0 GRADING SYSYTEM:

8.1 Based on the student performance during a given semester, a final letter grade will be awarded at the end of the semester for each course. The letter grades and the corresponding grade points are as given in the table.

TABLE: GRADES & GRADE POINTS

Grade	Grade Points	% of marks
S	10	≥ 90
A	9	≥ 80 – < 90
B	8	≥ 70 – < 80
C	7	≥ 60 – < 70
D	6	≥ 50 – < 60
E	5	≥ 40 – < 50
F	0 (Failed)	< 40
	0 (Absent)	—

8.2 A student who earns a minimum of 5 grade points (E grade) in a course is declared to have successfully completed the course, and is deemed to have earned the credits assigned to that course.

However, it should be noted that a pass in any course/term paper/project shall be governed by the rules mentioned in 5.0.

8.3 For Mandatory Courses: The evaluation will be done based on CIE and SEE with weightage as given in 5.2. These courses will not carry any credits. The performance will be graded as pass/fail. The grades obtained in these courses will not affect the grade point average; however, they will appear on the grade sheet.

8.4 Award of Degree

A student shall register and put up minimum attendance in all 160 credits and earn all 160 credits and also should secure a pass in all the mandatory courses to become eligible for the award of the degree.

A student who fails to satisfy the above criteria as indicated in the course structure within eight academic years from the year of his/her admission, shall forfeit his/her seat in B.Tech. programme and his/her admission stands cancelled.

9.0 GRADE POINT AVERAGE:

9.1 Computation of SGPA and CGPA:

The following procedure to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

i. The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e

$$\textbf{SGPA}\ (Si) = \sum(Ci \times Gi) / \sum Ci$$

where Ci is the number of credits of the i^{th} course and Gi is the grade point scored by the student in the i^{th} course.

ii. The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.

$$\textbf{CGPA} = \sum(Ci \times Si) / \sum Ci$$

where Si is the SGPA of the i^{th} semester and Ci is the total number of credits in that semester.

The SGPA and CGPA shall be rounded off to 2 decimal places and reported in the transcripts.

Illustration for Computation of SGPA and CGPA:

Computation of SGPA at the end of 1st Semester

Illustration No.1:

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	9	3 x 9 = 27

Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	S	10	3 x 10 = 30
Course 5	3	D	6	3 x 6 = 18
Course 6	3	C	7	3 x 7 = 21
Course 7	2	A	9	2 x 9 = 18
Course 8	2	C	7	2 x 7 = 14
Total	**22**			**173**

Thus, **SGPA at the end of 1st Semester= 173/22=7.86**

Illustration No.2 (with one failure)

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	9	3 x 9 = 27
Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	S	10	3 x 10 = 30
Course 5	3	F	0	3 x 0 = 00
Course 6	3	C	7	3 x 7 = 21
Course 7	2	A	9	2 x 9 = 18
Course 8	2	C	7	2 x 7 = 14
Total	**22**			**155**

Thus, **SGPA= 155/22=7.04**

Illustration No.2 (a)

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 5	3	D	6	3 x 6 =18
Total Credits of the	**22**			Ci (First Attempt)155 + Ci (subsequent attempt) 18= **173**

Thus, re-calculated **SGPA** after clearing the course**= 173/22=7.86**

Illustration No.3

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)

Course 1	3	A	9	3 x 9 = 27
Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	S	10	3 x 10 =30
Course 5	3	A	9	3 x 9 = 27
Course 6	3	C	7	3 x 7 =21
Course 7	2	A	9	2 x 9 =18
Course 8	2	C	7	2 x 7 =14
Total	**22**			**182**

Performance in Second semester

SGPA of 2nd Semester= 182/22=8.27

Thus, CGPA at the end of II semester: CGPA= $\frac{22*7.86+22*8.27}{44}$ = 8.06

CGPA calculation after Final Semester:

Sem-1	***Sem-2***	***Sem-3***	***Sem-4***	***Sem-5***	***Sem-6***	***Sem-7***	***Sem-8***
Credit : 16 SGPA: 7	Credit: 20 SGPA: 8.5	Credit : 22 SGPA: 9.2	Credit : 22 SGPA: 6.86	Credit : 20 SGPA: 8.18	Credit : 20 SGPA: 7.73	Credit : 20 SGPA: 8.68	Credit : 20 SGPA: 9.4

Thus, overall CGPA= $\mathbf{\frac{16*7+20*8.5+22*9.2+22*6.86+20*8.18+20*7.73+20*8.68+20*9.4}{160} = 8.21}$

9.2 Eligibility for Award of B.Tech. Degree:

A student shall be eligible for award of the B.Tech. degree if he/she fulfils all the following conditions:

1. Registered and successfully completed all the components prescribed in the Programme of study to which he/she is admitted.
2. Obtained CGPA greater than or equal to 5 (Minimum requirements for Pass), Has no dues to the Institute, hostels, Libraries etc., and
3. No disciplinary action is pending against him/her.

9.3 Award of Class:

A candidate who becomes eligible for the award of B.Tech degree shall be placed in one of the following classes based on CGPA.

TABLE: CGPA REQUIRED FOR AWARD OF DEGREE

Distinction	≥7.75*
First Class	≥6.75
Second Class	≥5.75
Pass	≥5.00

*In addition to the required CGPA of 7.75, the student must have necessarily passed all the courses of every semester **in the minimum stipulated period for the programme.**

9.4 Improvement of Class:

A candidate, after becoming eligible for the award of the degree, may reappear for the Semester End Examination in any two (maximum) of the theory courses as and when conducted, for the purpose of improving the aggregate and the class. But this reappearance shall be within a period of one academic year after becoming eligible for the award of the Degree.

However, this facility shall not be availed of by a candidate who has taken the Provisional Certificate. Such candidates shall not be permitted to reappear either for CIE in any course or for Semester End Examination (SEE) in laboratory courses (including project Viva-voce) for the purpose of improvement.

9.5 Supplementary Examination:

In addition to the Regular End Examinations held at the end of each semester, Supplementary End Examinations will be conducted during the Semester break. A Student can appear for any number of supplementary examinations till he clears all courses which he could not clear in the first attempt. However, the maximum stipulated period shall not be relaxed under any circumstances.

9.6 Malpractices:

The Principal shall refer the cases of malpractices in Continuous Internal Evaluation (CIE) and Semester End Examination (SEE) to an Enquiry Committee constituted by him. The committee will submit a report on the malpractice allegedly committed by the student to the Principal.

Rules pertaining to the punishments in the case of Malpractice are given in Annexure-I

9.7 Additional Academic Regulations:

i. Any Attempt to impress upon the teachers, examiners, faculty and staff of examinations, bribing for either marks or attendance will be treated as malpractice.

ii. When a student is absent for final examination, he is treated as to have appeared and obtained zero marks in that component and Grade is awarded accordingly.

iii. When a component of Continuous Internal Evaluation (CIE) or Semester End Examination (SEE) is cancelled as a penalty, he is awarded zero marks in that component.

iv. **Grade Sheet:** A grade sheet (memorandum) will be issued to each student indicating his/her performance in all courses taken in that semester and also indicating the grades and SGPA.

v. **Transcripts**: After successful completion of the total programme of study, a Transcript containing performance of all academic years will be issued as a final record. Candidates shall be permitted to apply for recounting/revaluation within the stipulated period with payment of prescribed fee.

vi. **The Academic Council has to approve and recommend to the JNTUK, Kakinada for the award of a degree to any student.**

9.8 Withholding of Results:

If the Student has not paid the dues, if any, or if any case of indiscipline is pending against him, the result of the student will be withheld and he will not be allowed into the next semester. His degree will be withheld in such cases.

9.9 Transitory Regulations:

For students admitted under special cases (mentioned in 2.1) these transitory regulations will provide the modus operandi.

At the time of such admission, based on the Programme pursued (case by case):

1. Equivalent courses completed by the student are established by the BOS concerned.
2. Marks/Credits are transferred for all such equivalent courses and treated as successfully cleared in the Programme of study prescribed by SVEC.

3. A Programme chart of residual courses not cleared will be derived and a Programme of study with duration specified will be prescribed for pursuit at SVEC.
4. Marks obtained in the previous system if the case be, are converted to grades and CGPA is calculated accordingly.

All other modalities and regulations governing shall be the same as those applicable to the stream of students with whom such a candidate is included into.

Regarding the students who were admitted under JNTU, Kakinada regulations for affiliated colleges:

If they happen to join and study along with their juniors at SVEC, the transitory regulations to be specified by JNTU, Kakinada for such students have to be followed.

10.0 GENERAL:

a) Wherever the words "he", "him", "his", occur in the regulations, they include "she", "her", "hers".
b) The Academic regulations should be read as a whole for the purpose of any interpretation.
c) In case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Chairman of the Academic Council is final.
d) The Academic Council reserves the right to revise, amend, change or nullify the Regulations, Schemes of Examinations and/or Syllabi or any other matter depending on the needs of the students, society and industry.

11.0 B.Tech - LATERAL ENTRY SCHEME:

The B.Tech Degree of Sri Vasavi Engineering College (Autonomous), Pedatadepalli, Tadepalligudem under Jawaharlal Nehru Technological University Kakinada, Kakinada shall be conferred on candidates who are admitted into the second year of the programme and fulfill the requirements for the award of the Degree.

Applicable for the students admitted into II year B. Tech. (LES) from the Academic Year 2019-20 and onwards.

AWARD OF B. Tech. DEGREE – LES

A student will be declared eligible for the award of B. Tech. Degree (LES) if he/she fulfils the following academic regulations:

- Having admitted into the second year of the programme, a student shall be declared eligible for the award of the B. Tech Degree (LES), if he/she pursues a course of study in not less than three academic years and not more than six academic years.
- The candidate shall register for all the courses as specified for the program of study from second year to fourth year. (As per the present curriculum, the candidate shall register for 124 credits and secure all the 124 credits to become eligible for the award of the degree).
- All the other regulations as applicable to B. Tech. 4-year degree course (Regular) will hold good for B. Tech. (Lateral Entry Scheme).

Annexure-I

MALPRACTICES

S.No	Nature of Malpractices/Improper Conduct	Punishment
1 (a)	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination)	Expulsion from the examination hall and cancellation of the performance in that subject only.
(b)	Gives assistance or guidance or receives it from any other candidate orally or by any other body language methods or communicates through cell phones with any candidate or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of the performance in that subject only of all the candidates involved. In case of an outsider, he will be handed over to the police and a case is registered against him.
2.	Has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the subject of the examination (theory or practical) in which the candidate is appearing.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year. The Hall Ticket of the candidate is to be cancelled and sent to the University.

3.	Impersonates any other candidate in connection with the examination	The candidate who has impersonated shall be expelled From examination hall. The candidate is also debarred and forfeits the seat. The performance of the original candidate who has been impersonated, shall be cancelled in all the subjects of the Examination (including practicals and project work) already appeared and shall not be allowed to appear for examinations of the remaining subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the imposter is an outsider, he will be handed over to the police and a case is registered against him.
4.	Smuggles in the Answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
5.	Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.	Cancellation of the performance in the subject.
6.	Refuses to obey the orders of the Chief Superintendent/Assistant – Superintendent / any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the officer-in charge or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the officer-in-charge, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the College campus or engages in any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct	In case of students of the college, they shall be expelled from examination halls and cancellation of their performance in that subject and all other subjects the candidate(s) has (have) already appeared and shall not be permitted to appear for the remaining examinations of the subjects of that semester/year. The candidates also are debarred and forfeit their seats. In case of outsiders, they will be handed over to the police and a police case is registered against them.

	of the examination.	
7.	Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat .
8.	Possess any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat.
9.	If student of the college, who is not a candidate for the particular examination or any person not connected with the college indulges In any malpractice or improper conduct mentioned in clause 6 to 8.	Student of the colleges expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat. Person(s) who do not belong to the College will be handed over to police and, a police case will be registered against them.
10.	Comes in a drunken condition to the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year.
11.	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	Cancellation of the performance in that subject and all other subjects the candidate has appeared including practical examinations and project work of that semester/year examinations.
12.	If any malpractice is detected which is not covered in the above clauses 1 to 11 shall be reported to the University for further action to award suitable punishment	

COURSE STRUCTURE OF FIRST YEAR B.TECH (CE/EEE/ECE)
(For 2018 – 2019 Admitted Batch)

I SEMESTER

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT01	English – I	2	-	-	MNC
2	V18MAT01	Engineering Mathematics – I	3	1	-	4
3	V18CHT01	Engineering Chemistry	3	1	-	4
4	V18CST01	Programming in C for problem solving	3	-	-	3
5	V18MET01	Engineering Graphics	1	-	3	2.5
6	V18ENL01	English Communication Skills Lab – I	-	-	2	MNC
7	V18CSL01	Programming lab in C for problem solving	-	-	3	1.5
8	V18CHL01	Engineering Chemistry Lab	-	-	3	1.5
		Total	12	2	11	16.5

Total Contact Hours: 25 Total Credits: 16.5

II SEMESTER

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT02	English – II	2	-	-	2
2	V18MAT02	Engineering Mathematics – II	3	1	-	4
3	V18PHT01/ V18PHT02	Optics and Waves for CE/ Opto Electronics and Semi Conductors for EEE & ECE	3	1	-	4
4	VI8MET03 VI8MET02 VI8EET02	Engineering Mechanics for CE/ Introduction to Engineering Mechanics for EEE/ Basic Electrical Engineering for ECE	3	1	-	4
5	V18CHT02	Environmental Studies for EEE & ECE	3	-	-	MNC
6	V18ENL02	English Communication Skills Lab – II	-	-	2	1
7	VI8CEL01 V18EEL03 VI8EELO2	Computer aided Civil Engineering Drawing for CE Electrical Engg Workshop for EEE/ Basic Electrical Engineering Lab for ECE	-	-	3	1.5
8	V18PHL01/ V18PHL02	Optics and Waves Lab for CE/ Opto Electronics and Semi Conductors lab for EEE & ECE	-	-	3	1.5
9	VI8MELO1	Engineering and IT Workshop	-	-	3	1.5
		Total	14	3	11	19.5

Total Contact Hours: 28 (for EEE & ECE) Total Contact Hours: 25 (CE) Total Credits: 19.5

I B.Tech I Semester English – I
(Common to all branches)

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT01	English –I	2	-	-	MNC*

(*MNC : Mandatory Non Credit Course)

Course Outcomes

CO-1
Understand human resources and their contribution to the society, listen to and read a text to comprehend, interpret and answer questions, and use prepositions and tenses appropriately.
CO-2
Appraise the problems of transport and the solutions, write the gist of a short-story, know the etymological roots of words, use prefixes and exhibit basic skills in writing.
CO-3
View Solar Energy as a viable alternative source, and read for comprehension, analysis and interpretation and present narratives in writing.
CO-4
Evaluate various alternative sources of energy, spell words appropriately, pronounce them with proper stress, punctuate sentences correctly and narrate instances and stories.
CO-5
Realize the value of our living environment, describe animals, birds, objects, events, processes, etc., write paragraphs coherently and use connectors effectively.
CO-6
Grasp the vital role of training in industrial organizations, use prepositions, take notes, follow the office etiquette and write impressive narrations.

Syllabus

Unit-1
Human Resources: (From 'English for Engineers and Technologists')
Human resources and their contribution to the society
Word Stress, Simple Present Tense and Simple Past Tense
Using Present Continuous Tense
Role-play
Prepositions and Verb forms : Correct usage
Phrases and Clauses
Reading Skills development
Paragraph writing : Cohesion
An Ideal Family: A short story by **Catherine Mansfield**
(From 'Panorama: A Course on Reading')
Vocabulary
Unit-2
Transport : Problems and Solutions (From 'English for Engineers and Technologists')
Etymological roots
Prefixes
Pronunciation
Parts of Speech

Useful expressions
Writing Skills development
Writing Minutes of Meeting
War : A short story by **Luigi Pirandello** (From 'Panorama: A Course on Reading')
Vocabulary

Unit-3

Evaluating Technology (From 'English for Engineers and Technologists')
Writing
Reading Comprehension
The Verger : A short story by **Somerset Maugham**
(From 'Panorama: A Course on Reading')
Vocabulary
Antonyms and abbreviations

Unit-4

Energy: Alternative Sources (From 'English for Engineers and Technologists')
Word Stress
Antonyms
Suffixes
Comprehension
Spelling and Punctuation
Sentence structures
The Scarecrow : A short story by **Satyajit Ray**
(From 'Panorama: A Course on Reading')
Vocabulary

Unit-5

Our Living Environment (From 'English for Engineers and Technologists')
Connectors
Describing an animal/ a bird
Verb forms : practice
Reading Skills development
Writing Skills development
Making notes
A Village Lost to the Nation : A short story by **Krishna Chandra Pujari**
(From 'Panorama: A Course on Reading')
Vocabulary

Unit-6

Industry : Safety and Training (From 'English for Engineers and Technologists')
Taking notes
Prepositions
Reading Skills development
Word formation : Etymological Roots
Writing Skills development
Office Etiquette
Martin Luther King and the African: A short story by **Chinua Achebe**
(From 'Panorama: A Course on Reading') Vocabulary

Books Prescribed: **1. English for Engineers and Technologists**
Orient BlackSwan Pvt Ltd.
2. Panorama : A Course on Reading, Oxford University Press
(Prescribed for I B.Tech students of the JNTUK, Kakinada under R16 Regulation)

Suggested Readings from AICTE

1. Practical English Usage. Michael Swan, OUP. 1995
2. Remedial English Grammar, F.T. Wood. Macmillian, 2007

3. On Writing Well. William Zinsser.Harper Resource Book. 2001
4. Study Writing. Liz Hamp-Lyons and Ben Heasly. Cambridge University Press 2006
5. Communication Skills. Sanjay Kumar and PushpLata. Oxford University Press.2011
6. Exercises in Spoken English. Parts, I-III. CIEFL, Hyderabad Oxford University Press

Books for further reference

1. The Oxford guide to Writing & Speaking – John Seely
2. Technical Communication : Principles and practice – Meenakshi Raman & Sangeetha Sharma, Oxford University Press, New Delhi, 2014.
   (For Gujarat Technological University)
3. Business communication Concepts, Cases and Application – P.D. Chaturvedi and Mukhesh Chaturvedi, Pearson Education, Delhi, 2006.
4. The Students' Companion – Wilfred D. Best (New Edition) – Harper, Collins Publishers, 2012.

** ** **

I B.Tech II Semester

English – II
(Common to All Branches)

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT02	English –II	2	-	-	2

Course Outcomes

CO-1
Understand the real import of education and work of noble men, use nouns, verbs and adjectives appropriately, identify and correct common errors in usage and write official letters.
CO-2
Derive inspiration from real life samples, interpret and speak on them, use synonyms and antonyms of words properly and do E-correspondence with required netiquette.
CO-3
Assimilate and adjust to new cultural environments, write on life-sketches, make the right use of tense and aspect and concord in sentences and plan and develop speech-writing.
CO-4
Imbibe ideas from the lives and works of successful men, use adverbs, develop view-points and topics and write different types of essays.
CO-5
Emulate personality-development inputs, elaborate on inspiring scientists use one-word substitutes, develop précis writing and write for the media.
CO-6
Learn from the paradigm of great contributors, use collocations and write professional and technical reports in standard formats.

Syllabus

Unit-1
The Greatest Resource – Education (From 'English Encounters')
Understanding the author's perspective
Making use of nouns
Vocabulary – deriving nouns from verbs and adjectives
Misplaced modifiers
Synonyms and Antonyms
Identifying common errors
Letter writing : Standard formats for official letters
A.P.J. Abdul Kalam (From 'The Great Indian Scientists')
Synonyms and Anonyms
Unit-2
Jadav Payeng : 'The Forest Man of India'
Vocabulary : deriving adjectives
Synonyms and Antonyms
Identifying common errors in the use of adjectives
E-correspondence with required Netiquette
Cliches
C.V. Raman (From 'The Great Indian Scientists')
Use of Synonyms and Antonyms of words in different contexts
Unit-3
Cultural Shock : Adjustment to New Cultural Environments
(From 'English Encounters')
Building Vocabulary – Verbs and nouns
Synonyms and Antonyms and appropriate usage

Making use of Tense and aspect and subject-verb agreement in sentences
Planning and developing speech-writing
Reading comprehensions
Homi Jahangir Bhabha (From 'The Great Indian Scientists')
Synonyms and Antonyms

Unit-4
Satya Nadella's First Letter to the Employees as CEO of Microsoft
Building Vocabulary – deriving adverbs
Identifying common errors in the use of adverbs
Essay writing : Developing ideas and topics into different types of essays
Redundancies
Jagadish Chandra Bose (From 'The Great Indian Scientists')
Using synonyms and antonyms of words in different contexts
Unit-5
Excerpts from Robin Sharma's 'Who Will Cry When You Die?'
One-word substitutes and usage
Prepositions
Required skills to write for the media
Précis writing
Prafulla Chandra Ray (From 'The Great Indian Scientists')
Using synonyms and antonyms of words in different contexts
Unit-6
The Chief Software Architect (From 'English Encounters')
Building Vocabulary : Collocations and Usage
Identifying common errors
Report writing – Standard formats and required skills
Srinivasa Ramanujan (From 'The Great Indian Scientists')
Using synonyms and antonyms of words in different contexts
Books Prescribed: **1. English Encounters**
A Text Book to Face Challenges in Communication
Maruthi Publications
(Prescribed for I B.Tech students of the JNTUK, Kakinada under R16 Regulation)

Lessons 2,4 and 5 in the above text book have been replaced by the following

1. **Jadav Payeng : The Forest Man of India** by **Shreya Pareek**, 2014
   Net Source: https://www.thebetterindia.com
2. **Satya Nadella's First Letter to the Employees as CEO of Microsoft**
   Net Source: https://news.microsoft.com
3. **Excerpts from Robin Sharma's 'Who Will Cry When You Die?'**
   JAICO Publishing House, Mumbai, 2009

2. The Great Indian Scientists, Cengage

Suggested Readings from AICTE

1. Practical English Usage. Michael Swan, OUP. 1995
2. Remedial English Grammar, F.T. Wood. Macmillian, 2007
3. On Writing Well. William Zinsser.Harper Resource Book. 2001
4. Study Writing. Liz Hamp-Lyons and Ben Heasly. Cambridge University Press 2006
5. Communication Skills. Sanjay Kumar and PushpLata. Oxford University Press.2011
6. Exercises in Spoken English. Parts, I-III. CIEFL, Hyderabad Oxford University Press

Books for further reference

1. The Oxford guide to Writing & Speaking – John Seely

2. Technical Communication : Principles and practice – Meenakshi Raman & Sangeetha Sharma, Oxford University Press, New Delhi, 2014.
(For Gujarat Technological University)
3. Business communication Concepts, Cases and Application – P.D. Chaturvedi and Mukhesh Chaturvedi, Pearson Education, Delhi, 2006.
4. The Students' Companion – Wilfred D. Best (New Edition) – Harper, Collins Publishers, 2012.

I B.Tech I Semester

English Communication Skills Laboratory – I (Common to all branches)

S.No	Course Code	Course Name	L	T	P	C
1	V18ENL01	ECS Lab –I	-	-	2	MNC

Course Outcomes

CO-1
Listen to and make inquiries on phone, thank and respond to thanks in appropriate spoken idiom.
CO-2
Make requests, give permissions and directions in fluent English.
CO-3
Articulate well in the contexts of clarifying, inviting, complaining, congratulating, apolozing, advising, agreeing and disagreeing in conversational mode.
CO-4
Distinguish and pronounce letters and sounds of English phonetically.
CO-5
Practise and pronounce consonants, vowels and diphthongs and consonant clusters.
CO-6
Listen to and understand different accents in English, and pronounce English words and speak sentences with right stress and intonation.

Unit-1
Why Study Spoken English
Making Inquiries on the Phone, Thanking and
Responding to Thanks
Practice Work
Unit-2
Requests, Permissions, and Directions
Practice Work
Unit-3
Clarifying, Inviting, Complaining, Congratulating and
Expressing Sympathy
Apologising, Advising, Suggesting, Agreeing and Disagreeing
Practice Work
Unit-4
Letters and Sounds
Practice Work
Unit-5
The Sounds of English
Practice Work
Unit-6
Pronunciation
Stress and Intonation
Practice Work

Book Prescribed:
Interact : English Lab Manual for Undergraduate Students
Orient BlackSwan
(Prescribed for I B.Tech students of the JNTUK, Kakinada under R16 Regulation)

Books for further reference

1. The Official Cambridge Guide to IELTS, For Academic & General Training, (With DVD-ROM), Student Book with Answers, 2015.
2. English Language Communication Skills, Lab Manuel cum Workbook (with CD), Cengage Learning.

I B.Tech II Semester

English Communication Skills Laboratory – II (Common to all branches)

S.No	Course Code	Course Name	L	T	P	C
1	V18ENL02	ECS Lab –II	-	-	2	1

Course Outcomes

CO-1
Listen to people critically and argue rationally to present a view-point confidently in formal debates.
CO-2
Exhibit team spirit and communicative skill and participate effectively in group discussions.
CO-3
Plan, structure and give presentations in professional manner.
CO-4
Face and perform well in interviews with required etiquette.
CO-5
Compose E-mails in standard formats to communicate clearly and write different types of CV in vogue that befit today's career needs.
CO-6
Make apt use of idiomatic expressions and recognize and correct typical errors that Indian speakers of English make in pronunciation, spelling, vocabulary and grammar.

Syllabus

Unit-1
Presentation Skills
Practice Work
Unit-2
Group Discussions
Practice Work
Unit-3
Debating
Practice Work
Unit-4
Interview Skills
Practice Work
Unit-5
E-mails
Practice Work
Unit-6
Idiomatic Expressions
Common Errors in English
Book Prescribed:
Interact : English Lab Manual for Undergraduate Students
Orient BlackSwan
(Prescribed for I B.Tech students of the JNTUK, Kakinada under R16 Regulation)
Books for further reference

1. The Official Cambridge Guide to IELTS, For Academic & General Training, (With DVD-ROM), Student Book with Answers, 2015.
2. English Language Communication Skills, Lab Manuel cum Workbook (with CD), Cengage Learning.

I B.Tech I & II Semesters **English**

(Common to all branches)

Assignment –I: Each Student is required to select a book (Short Story / Novel / Bio-graphy / Autobiography), read it and submit a report or an essay on it. He/She has to make an oral presentation of the gist of the book in the class before the completion of MID-I Examination. It is mandatory for all the students. It is for Internal Assessment.

Assignment-II : Each Student is required to present a report on a problem faced by individuals or the society with an analysis and possible solutions. He/She has to make an oral presentation of it in the class before the completion of MID-II Examination. It is mandatory for all the students. It is for Internal Assessment.

I B.Tech I Semester **MATHEMATICS-I**
(Common to All Branches)

S.No	Course Code	Course Name	L	T	P	C
1	VI8MAT01	**MATHEMATICS-I**	3	1	-	4

Course Outcomes: At the end of the course student will be able to:

CO1: Apply matrix technique to solve system of linear equation.
CO2: Find Eigenvalues and Eigen vectors
CO3: Solve the ordinary differential equations of first order & first degree
CO4: Solve the linear differential equations of higher order
CO5: Calculate maxima and minima of functions of two variables
CO6: Solve first order partial differential equations.

UNIT I: Linear system of equations:
Rank-Echelon form-Normal form – Solution of linear systems – Gauss elimination – Gauss Jordon- Gauss Jacobi and Gauss Seidal methods.
Applications: Finding the current in electrical Circuits.

UNIT II: Eigen values - Eigen vectors and Cayley-Hamilton theorem:
Eigenvalues - Eigen vectors– Properties – Cayley-Hamilton theorem (without proof) - Inverse and powers of a matrix by using Cayley-Hamilton theorem.

UNIT-III: Differential equations of first order and first degree:
Linear-Bernoulli-Exact-Reducible to exact differential equations.
Applications: Newton's Law of cooling-Law of natural growth and decay-Orthogonal Trajectories.

UNIT IV: Linear differential equations of higher order:
Linear non homogeneous differential equations of higher order with constant coefficients involving RHS term of the type e^{ax}, sin ax, cos ax, polynomials in x, e^{ax} V(x), xV(x)- method of variation of parameters.

UNIT V: Partial differentiation:
Introduction- Homogeneous function-Euler's theorem-total derivative-chain rule-generalized mean value theorem for single variable (without proof)-Taylor's and Maclaurin's series expansion of functions of two variables (without proof)– Functional dependence- Jacobian.
Applications: maxima and minima of functions of two variables without constraints and Lagrange's method (with constraints).

UNIT VI: First order Partial differential equations:
Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions – solutions of first order linear (Lagrange) equation.

Text Books:
1. B.S.Grewal, Higher Engineering Mathematics, 43rd Edition, Khanna Publishers.
2. N.P.Bali, Engineering Mathematics, Lakshmi Publications.

Reference Books:
1. Erwin Kreyszig, Advanced Engineering Mathematics, 10th Edition, Wiley-India
2. Dean G. Duffy, Advanced engineering mathematics with MATLAB, CRC Press
3. Srimanta Pal, Subodh C.Bhunia, Engineering Mathematics, Oxford University Press.
4. Dass H.K., Rajnish Verma. Er., Higher Engineering Mathematics, S. Chand Co. Pvt. Ltd, Delhi.

I B.Tech II SEMESTER

MATHEMATICS-II
(Common to All Branches)

S.No	Course Code	Course Name	L	T	P	C
1	VI8MAT02	**MATHEMATICS-II**	3	1	-	4

Course Outcomes: At the end of the Course student will be able to:
CO1: Estimate approximate root of algebraic and transcendental equations
CO2: Compute interpolating polynomial for the given data
CO3: Solve ordinary differential equations using numerical methods
CO4: Evaluate multiple integrals and improper integrals
CO5: Calculate gradient of a scalar function, divergence and curl of a vector function.
CO6: Apply the knowledge of vector integral concepts to find characteristics of vector fields

UNIT I: Solution of Algebraic and Transcendental Equations:
Introduction- Bisection method – Method of false position – Iteration method – Newton-Raphson method (One variable).

UNIT II: Interpolation:
Introduction- finite differences- forward differences backward differences –central differences – symbolic relations and separation of symbols - differences of a polynomial-Newton's formulae for interpolation - Lagrange's interpolation formula.

UNIT III: Numerical Integration and solution of Ordinary Differential equations:
Trapezoidal rule- Simpson's 1/3rd and 3/8th rule-Solution of ordinary differential equations by Taylor's series- Euler's method - Runge-Kutta method (second and fourth order).

UNIT IV: Multiple Integrals:
Definition of Improper integrals - Double and triple integrals – Change of variables – Change of order of integration.
Applications: Finding areas and volumes.

UNIT V: Vector Differentiation:
Vector differential operator - Gradient- Divergence- Curl - Laplacian and second order operators - Vector identities.

UNIT VI: Vector Integration:
Line integral: Work done – Potential function – Surface and volume integrals - Vector integral theorems: Greens, Stokes and Gauss Divergence theorems (without proof) and related problems.

Text Books:
1. B.S.Grewal, Higher Engineering Mathematics, 43rd Edition, Khanna Publishers.
2. N.P.Bali, Engineering Mathematics, Lakshmi Publications.

Reference Books:
1. Erwin Kreyszig, Advanced Engineering Mathematics, 10th Edition, Wiley-
2. Dean G. Duffy, Advanced engineering mathematics with MATLAB, CRC Press
3. V.Ravindranath and P.Vijayalakshmi, Mathematical Methods, Himalaya Publishing House. India
4. Srimanta Pal, Subodh C.Bhunia, Engineering Mathematics, Oxford University Press.
5. Dass H.K., Rajnish Verma. Er., Higher Engineering Mathematics, S. Chand Co. Pvt. Ltd, Delhi.

OPTICS AND WAVES

(For Civil Engineering & Mechanical Engineering)

S.No	Course Code	Course Name	L	T	P	C
1	V18PHT01	**PHYSICS:** OPTICS AND WAVES	3	1	-	4

A student who successfully fulfills the course requirements will be able to:

1. Correlate the engineering concepts based on fundamental Physical Optics with Coherent source. Furthermore, students will be able to solve problems connected with the operation of optical instruments.
2. Study the sound waves & Use modern physics techniques and tools.
3. Illustrate the fundamental concepts of magnetism and dielectrics.

UNIT-I

INTERFERENCE: Introduction- Principle of Superposition – Coherent Sources – Interference in thin films (reflection geometry) – Newton's rings – construction and working principle of Michelson Interferometer

UNIT-II

DIFFRACTION: Introduction- Fraunhofer diffraction at single slit - double slit and N-slits (qualitative only)-Grating equation – Rayleigh's criterion for resolving power- Resolving power of a grating.

UNIT-III

POLARIZATION: Types of Polarization – Double refraction, Nicol Prism -Quarter wave plate and Half Wave plate.

LASERS: Characteristics– spontaneous emission and Stimulated emission of radiation – Einstein's Transition Probabilities- population inversion– pumping schemes-Ruby laser-He-Ne LASER –Applications of laser

UNIT-IV

ACOUSTICS: Introduction – Types of Acoustics – Sound Absorption – Absorption Coefficient - Reverberation time- Factors Effecting the Reverberation Time - Sabine's Formula- Eyring's Formula – Acoustics of Concert Hall.

UNIT-V

ULTRASONICS: Introduction**-** Ultrasonic Transducers - Piezoelectric and Magnetostriction Transducers – Production of Ultrasonic Waves Using Piezoelectric Effect And Magnetostriction Method- Non-Destructive Testing - Pulse Echo Technique – Scan A, Scan B & Scan C Techniques.

UNIT-VI

MAGNETIC PROPERTIES: Introduction- Origin of Magnetic Moment, Classification of Magnetic Materials – Ferromagnetism- Hysteresis – Soft and Hard Magnetic Materials

DIELECTRIC PROPERTIES: Introduction, types of polarizations- Electronic, Ionic and Orientation polarizations (qualitative only), – Internal field – Clausius- Mossoti Equation-Dielectric in alternative fields (Dielectric loss, Strength and Breakdown.)

Text Books:

1. M. Armugam, Engineering Physics
2. Dr.P.Sreenivasa Rao, Engineering Physics

Reference Books:

1. S. Mani Naidu, Engineering Physics.
2. S.O.Pillai, Solid State Physics.
3. DK Bhattacharya, Engineering Physics.
4. Ajoy Ghatak, Optics.
5. A.J. Dekker, Solid State Physics.

OPTO-ELECTRONICS AND SEMICONDUCTORS
(For CSE, ECE & EEE)

S.No	Course Code	Course Name	L	T	P	C
1	V18PHT02	OPTO-ELECTRONICS AND SEMI CONDUTORS	3	1	-	4

A student who successfully fulfills the course requirements will be able to
1. Expose the students to the basic concepts of Lasers, optical fibers and their properties.
2. Interpret wavelike behavior of matter and how this motivates the need to replace classical mechanics by a wave equation of motion for matter (the Schrödinger equations)
3. Distinguish fundamental physical laws for better understanding of materials and their properties for engineering applications.
4. Apply fundamental principles and processes to operational semiconductor devices and their uses.

UNIT-I LASERS: Introduction – Coherent Sources – Characteristics of Lasers – Spontaneous and Stimulated Emission of Radiation – Einstein's Coefficients – Population Inversion – pumping schemes-Ruby laser-He-Ne LASER –Applications of LASERs.

UNIT-II FIBER OPTICS: Introduction – Basic Principle of Optical Fiber-Advantages of fibres – Acceptance Angle and Acceptance Cone – Numerical Aperture **–** Transmission of Signal Through Step Index and Graded Index Fibers – Basic Optical Fiber Communication Link - Application of Optical Fibers.

UNIT-III INTRODUCTORY QUANTUM MECHANICS: Introduction - Matter Waves – Physical Significance of Wave Function – Schrödinger Time Independent Wave Equation – Application of Schrödinger Wave Equation in One Dimensional Potential Box.

ELECTRON THEORY OF METALS: Assumptions and Failures of Classical Free Electron Theory – Quantum Free Electron Theory - Fermi Level, Fermi Dirac Distribution Function and Sources of Electrical Resistance in Metals.

UNIT-IV BAND THEORY OF SOLIDS: Bloch's Theorem (Qualitative) – Kronig – Penney Model – Formation of Energy Bands in Crystalline Solids – Classification of Crystalline Solids Based on Band Theory - E-K Relation - Effective Mass of an Electron - Concept of Hole.

UNIT-V SEMICONDUCTOR PHYSICS: Introduction - Types of Semiconductors – Energy Band Diagrams, Carrier Concentration in Intrinsic Semiconductors – Expression for Conductivity-Extrinsic semiconductors-Carrier concentrations- Drift and Diffusion Currents – Relevance of Einstein's Equation- Hall Effect and its Applications- Direct and Indirect band gap semiconductors.

UNIT-VI SEMICONDUCTOR DEVICS: Introduction- p-n junction Diode, Zener Diode ,Photo detectors- Photo Diode , Pin Diode ,Construction Working Principle of Solar Cell and Light emitting diode .

Text Books:

1. MN Avadhanulu & PG Kshirsagar , A Text Book of Engineering Physics.
2. DK Bhattacharya, Engineering Physics.

Reference Books:

1. P.Battacharya, Semiconductor Optoelectronic Devices.
2. A Ghatak, Optics
3. S.O.Pillai , Solid State Physics
4. Dr.P. Sreenivasa Rao, Applied Physics
5. John M Senior, Optical Fiber Communications Principles and Practices
6. A.J.Dekkar , Solid State Physics.

Optics & Waves Lab

For ME & CE

S.No	Course Code	Course Name	L	T	P	C
1	V18PHL01	Optics & Waves Lab	-	-	3	1.5

List of Experiments:

(Any eight of the following to be done)

1. Determination of Rigidity modulus of a material – Torsional Pendulum
2. Determination of acceleration due to gravity – Compound Pendulum
3. Verification of laws of vibrations in stretched strings – Sonometer
4. Determination of velocity of sound – Volume Resonator
5. Magnetic field Induction along the axis of current carrying coil – Stewart and Gee's apparatus.
6. Determination of Planck's constant using photocell.
7. Determination of wave length of laser source using diffraction grating .
8. Melde's experiment – Transverse and longitudinal modes.
9. Coupled oscillator - Study two normal modes of coupled oscillator.
10. Determination of radius of curvature of Plano convex lens by forming Newton's rings.

Opto Electronics & Semiconductors Lab

For ECE, EEE & CSE

S.No	Course Code	Course Name	L	T	P	C
1	V18PHL02	Opto Electronics & Semiconductors Lab	-	-	3	1.5

List of Experiments:

(Any eight of the following to be done)

1. Newton's rings – Radius of curvature of Plano – Convex Lens.
2. Determination of wavelength of laser source using diffraction grating.
3. L-C-R Series Resonance Circuit.
4. Study of V/I Characteristics of Semiconductor diode.
5. Study of V/I Characteristics of zener diode.
6. Characteristics of Thermistor – Negative Temperature Coefficient of resistivity.
7. Energy band gap of a Semiconductor p-n junction.
8. Determination of Hall Coefficient and Carrier Concentration - Hall Effect
9. Determination of Planck's constant using photocell.
10. Study the Characteristics of a photo diode.

I Year – I/II Semester **ENGINEERING CHEMISTRY**

(Common to all branches)

S.No	Course Code	Course Name	L	T	P	C
1	V18CHT01	**ENGINEERING CHEMISTRY**	3	1	-	4

Course Outcomes:

At the end of the course, the student should be able to:

CO1: Apply different plastics and rubbers for various engineering applications.

CO2: Assess the quality of fuels and apply the knowledge of fuels for the preservation of natural fuels.

CO3: Understand relevant concepts of Electro Chemistry to apply them in designing electrochemical energy systems.

CO4: Analyse boiler troubles arising due to poor water quality and suggest suitable water treatment methods for different industrial applications.

CO5: Analyse the causes for practical corrosion problems and apply corrosion principles for protection of metallic structures from corrosion.

CO6: Identify the important applications of advanced engineering materials.

UNIT I: HIGH POLYMERS

Polymerisation: Introduction- Mechanism of Free radical addition polymerization – Plastics as engineering materials: advantages and limitations – Thermoplastics and Thermosetting plastics – Compounding and fabrication techniques (Compression, Injection, Transfer and Extrusion) - Preparation, properties and applications of Polythene (HDPE and LDPE), PVC, Bakelite, and Teflon.

Elastomers: Natural rubber – Vulcanization of rubber – Synthetic Rubbers: Preparation, properties and applications of Buna S, Buna N, and Thiokol.

UNIT II: FUEL TECHNOLOGY

Fuels – Characterstics of good fuel – Classification – Calorific value - HCV and LCV – Dulong's formula, Numerical problems – Bomb calorimeter – Numerical problems.

Solid fuels - Coal –– Proximate and ultimate analysis – Significance of the analyses, Numerical problems.

Liquid fuels –Petroleum- Refining – Cracking – Synthetic petrol (Fischer Tropsch and Bergius process) – Knocking - Octane and Cetane ratings – Anti-knocking agents.

Gaseous fuels – Natural gas, LPG and CNG – Biofuels.

UNIT III: ELECTROCHEMICAL CELLS

Single electrode potential – Electrochemical series and its significance - Standard electrodes (Hydrogen, Calomel and, Glass electrodes)– Conductometric titrations (Acid – Base).

Batteries: Primary battery (Dry Cell) – Secondary batteries (Lead acid cell, Ni-Cd cells).

Fuel cells: H_2-O_2 fuel cell, H_2-methanol fuel cell.

UNIT IV: WATER TECHNOLOGY

Hard water - Types of Hardness – Units of hardness - Determination of hardness and alkalinity - Boiler troubles: Priming and foaming, sludge and scale formation, Boiler corrosion, Caustic embrittlement - Softening of hard water: Zeolite process, Lime – Soda process, and Ion exchange process - Water for drinking purposes - Purification – Sterilization and disinfection: Chlorination, Break point chlorination – Desalination - Reverse Osmosis and Electrodialysis.

UNIT V: CORROSION

Definition – Theories of Corrosion (Chemical & Electrochemical) – Types of electrochemical corrosion (Galvanic corrosion, Concentration cell corrosion,Stress corrosion Pitting corrosionand Intergranular corrosion) -

Galvanic series - Factors which influence the rate of corrosion - Protection from corrosion:Metallic coatings (Cathodic and Anodic), Cathodic protection, Protective coatings –Methods of application of coatings on metals (Galvanizing, Tinning, &Electroplating) – Paints.

UNIT VI: CHEMISTRY OF ADVANCED MATERIALS

Nano materials: Introduction – Carbon nanotubes - Types, preparation (Arc discharge, Laser ablation and CVD Method) - Properties and applications of Nano materials.

Liquid crystals: Introduction – Types – Applications.

Biodegradable polymers – Conducting polymers.

Green Chemistry:Principles, Need for green Chemistry.

Text Books:

1. Engineering Chemistry by Jain and Jain; Dhanpat Rai Publications & Co.
2. A Text book of Engineering Chemistry by S. S. Dara; S. Chand & Co Ltd.

Reference Books:

1. Engineering Chemistry of Willey India Pvt. Ltd., Vajiram and others.
2. Engineering Chemistry by PrasanthRath, Cengage Learning.
3. Engineering Chemistry by Shikha Agarwal; Cambridge University Press.
4. B. Sivasankar, Engineering Chemistry, McGraw-Hill.

I Year – I/II Semester **ENGINEERING CHEMISTRY LABORATORY**
(Common to all branches)

S.No	Course Code	Course Name	L	T	P	C
1	V18CHL01	ENGINEERING CHEMISTRY LABORATORY	-	-	3	1.5

Course Outcomes:

At the end of the course, the student will be able to:

CO1: Analyze quantitatively a variety of samples using volumetric methods and instrumental methods.

CO2: Applying volumetric and instrumental methods for the determination of water quality parameters namely Alkalinity, Hardness and pH.

CO3: Prepare polymeric materials and analyse the given coal samples.

List of Experiments:

1. Introduction to chemistry laboratory – Molarity, Normality, Primary, Secondary standard solutions, Volumetric titrations, Quantitative analysis, Qualitative analysis etc.,
2. Trial experiment – Estimation of HCl using standard Na_2CO_3 solution.
3. Estimation of $KMnO_4$ using standard oxalic acid solution.
4. Determination of alkalinity of a sample of water.
5. Determination of total hardness of water using standard EDTA solution.
6. Determination of rate of corrosion of mild steel in acidic environment in the absence and presence of an inhibitor.
7. Estimation of ferrous iron using standard $K_2Cr_2O_7$ solution.
8. Estimation of copper using standard EDTA solution.
9. Estimation of vitamin – C using standard Iodine solution.
10. Estimation of pH of the given sample solution using pH meter.
11. Conductometric titration between strong acid and strong base.
12. Potentiometric titration between strong acid and strong base.
13. Proximate analysis of coal.
14. Preparation of phenol – formaldehyde resin.

Reference Books:

1. Practical Engineering Chemistry by K. Mukkanti, B.S. Publications.
2. Vogel's Quantitative Chemical Analysis – V Edition – Longman.
3. A Text Book on experiments and Calculations Engineering by S.S.Dara, S.Chand& Co Ltd.
4. Chemistry Practical Manual, Lorven Publications.

I Year – I/II Semester **ENVIRONMENTAL STUDIES**
(Common to all branches)

S.No	Course Code	Course Name	L	T	P	C
1	V18CHT02	ENVIRONMENTAL STUDIES	3	0	0	0

Course Outcomes:

At the end of the course, the student should be able to:

CO1: Identify the global environmental challenges and the possible means to combat them.

CO2: Examine the natural resources, their availability for the sustenance of the life and conservation.

CO3: Assess the concepts of the ecosystem and the need for protecting various ecosystems.

CO4: Discuss the biodiversity, threats and conservation practices to protect the biodiversity

CO5: Explain various attributes of the pollution and waste management practices.

CO6: Outline the environmental management and environmental legislations in India.

UNIT I: FUNDAMENTALS OF ENVIRONMENTAL STUDIES

Definition and components of environment, Global Environmental Challenges: Global warming and climate change- Kyoto protocol, Acid rains, Ozone layer depletion -Population explosion and effects.

UNIT II: NATURAL RESOURCES AND ASSOCIATED PROBLEMS

Forest resources: Use and over exploitation - Deforestation: Timber extraction, Mining, dams and other effects on forest and tribal people. Water resources: Use and over utilization of surface and ground water – Floods, drought, conflicts over water - Dams: Benefits and problems. Mineral resources: Use and exploitation - Environmental effects of extracting and using mineral resources. Energy resources: Renewable and Non-renewable energy sources. Land resources: Land degradation, Wasteland reclamation.

UNIT III: ECOSYSTEMS

Concept of an ecosystem - Structure and function of an ecosystem: Producers, consumers and decomposers - Energy flow in the ecosystem – Food chains, food webs and Ecological pyramids. Forest ecosystem, Grassland ecosystem, Desert ecosystem, Aquatic ecosystems -Introduction, types, characteristic features.

UNIT IV: BIODIVERSITY AND ITS CONSERVATION

Definition-Values of biodiversity: Consumptive use, Productive use, Social use. Hot-spots of biodiversity - Threats to biodiversity: Habitat loss, man-wildlife conflicts - Endangered and endemic species of India – Conservation of biodiversity.

UNIT V: ENVIRONMENTAL POLLUTION

Definition, Causes, effects and control measures of Air pollution, Water pollution, Soil pollution, Noise pollution and Nuclear Pollution. Solid Waste Management: Sources, classification, effects and control measures of municipal and industrial solid wastes.

UNIT VI: ENVIRONMENTAL LEGISLATION AND THE MANAGEMENT

Human Rights to a clean environment provided by Constitution. Environmental Protection Act, 1986 - Air (Prevention and Control of Pollution) Act, 1981 - Water(Prevention and Control of Pollution) Act, 1974 -Wildlife (Protection) Act, 1972 -Forest (Conservation) Act, 1980 -Issues involved in enforcement of environmental legislation –Eco-tourism.

Text books:

1. Environment Studies, Fourth Edition, Anubha Kaushik, C P Kaushik, New Age International Publishers.
2. A Textbook of Environmental Studies, Shaashi Chawla, TMH, New Delhi.
3. Fundamentals of Environment Studies, DD Mishra, S Chand & Co Ltd.
4. Textbook of Environmental Science, M. Anji Reddy, B S Publications, Hyderabad.

I YEAR II SEMESTER

COMPUTER AIDED CIVIL ENGINEERING DRAWING

S.No	Course Code	Course Name	L	T	P	C
1	V18CEL01	COMPUTER AIDED CIVIL ENGINEERING DRAWING	0	0	3	1.5

COURSE OUTCOMES:

After completion of the course the student should be able to

- Define AUTOCAD and list the applications
- Classify various AUTOCAD commands
- Explain orthographic projections and draw conventional signs as per IS standards
- Identify view points and view ports
- Utilize AUTOCAD commands to plan the buildings section and elevation
- Discover various 3D modeling concepts

UNIT 1 :- INTRODUCTION TO CAD

- Introduction to software; Definition of CAD; Applications of CAD; Advantages of CAD.
- Study of Basic Commands; generation of points, lines, curves, polygons, dimensioning.
- Edit Commands – edit, zoom, cross hatching, utility commands, construct, insert

UNIT 2:- COMPUTER AIDED MODELING

- Orthographic Projections.
- Draw conventional signs as per I.S Standards, symbols used in civil Engineering drawing

UNIT 3:- VIEW POINTS AND VIEW PORTS

- View Point Coordinates Options like save, restore, delete, joint, single option
- Layout management ; scale setting ; plotting, Import and export

UNIT 4 : - Plans 2-D

- Building Plans
- Section
- Elevation

UNIT 5 :- 3-D Modeling Concepts

- Introduction to 3-D Modeling
- 3-D Coordinate system
- U.C.S
- Wireframe modeling
- Import and export

REFERENCES

- Engineering drawing with AUTOCAD by B.V.R.Gupta, M.Raja Roy
- Engineering drawing with an introduction to AUTOCAD Dhanunjay, Jolhea (Tata Mcgraw- Hill)

Electrical Engineering Workshop
(For EEE)

S.No	Course Code	Course Name	L	T	P	C
1	V18EEL03	Electrical Engineering Workshop	0	0	2	1

Any 12 of the following modules are to be conducted

1. Wiring tools and Accessories
2. Electrical Wiring Joints
3. Lamp Circuits
4. Soldering Practice
5. AC and DC circuits
6. Resistance Measurement
7. Capacitance Measurement
8. Battery voltage measurement
9. Piping and Thread cutting skills
10. Special Lamp Connections
11. Wiring Practice for Power Loads
12. Motor Connections
13. Earthing
14. Testing and repair of Domestic appliances
15. Identification of terminals of DC motors
16. Overhauling of DC Machine
17. Overhauling of AC Machine
18. Practice on Motor winding

Basic Electrical Engineering
(For ECE)

S.No	Course Code	Course Name	L	T	P	C
1	V18EET02	Basic Electrical Engineering	3	1	0	4

Module 1 : DC Circuits

Electrical circuit elements (R, L and C), voltage and current sources, Kirchoff current and voltage laws, analysis of simple circuits with dc excitation. Superposition, Thevenin and Norton Theorems. Time-domain analysis of first-order RL and RC circuits.

Module 2: AC Circuits

Representation of sinusoidal waveforms, peak and rms values, phasor representation, real power, reactive power, apparent power, power factor. Analysis of single-phase ac circuits consisting of R, L, C, RL, RC, RLC combinations (series and parallel), resonance. Threephase balanced circuits, voltage and current relations in star and delta connections.

Module 3: Magnetic Circuits

Basic definitions - Analogy between electric and magnetic circuits -Faradays laws of electromagnetic induction-Types of induced e.m.f.'s- series, parallel magnetic circuits –Concept of Self, Mutual inductances - concept of co-efficient of coupling -Simple problems.

Module 4: DC Machines

Construction and working principle of DC generator–Magnetization characteristics,

Classification of DC motor, applications, speed control of DC motor: field and armature control – three point starter.

Module 5: Transformers

Classifications of transformers, construction and working principle of transformer, EMF equation of transformer, Ideal and Practical transformer, equivalent circuit, losses in transformers, OC and SC test of transformers regulation and efficiency. Auto-transformer

Module 6: AC Machines

Generation of rotating magnetic fields, Construction and working of a three-phase induction motor, Significance of torque-slip characteristic. Loss components and efficiency, starting and speed control of induction motor. Construction and working of synchronous generators

INTRODUCTION TO ENGINEERING MECHANICS
(For EEE)

V18MET02	INTRODUCTION TO ENGINEERING MECHANICS	L	T	P	C
		3	1	0	4

Course Outcomes:
After successful completion of the course, the student will be able to
CO1: Compute the resultant force of a given system of forces **(K3)**
CO2: Calculate Equilibrium of different force systems by using free body diagrams **(K3)**
CO3: Solve the 2D equilibrium problems by considering friction **(K3)**
CO4: Find the Centroid, Center of Gravity and Moment of Inertia for plane figures and bodies **(K3)**
CO5: Illustrate the different types of plane motions of a particle to compute its velocity, acceleration and force. **(K3)**
CO6: Illustrate the concept of Work and Energy (**K3)**

Unit I: Resultant and Equilibrium of 2 D force system: concept of resultant, equivalent force systems, resultant of 2D force systems. Concept of equilibrium, engineering applications like beams, trusses, frames and cables.

Unit II: Resultant and Equilibrium of 3 D force system: resultant of general force system, moment about a point, moment about a line. Equilibrium of 3D force system, applications to concurrent and parallel force system.

Unit III: 2D equilibrium problems considering friction: Applications to simple contact friction, wedges and belt friction. Principle of virtual work: applications to beams and mechanisms with single degree of freedom.

Unit IV: Centroid: Centroid of simple figures (from basic principles) – Centroid of Composite Figures Centre of Gravity: Centre of gravity of simple body (from basic principles), centre of gravity of composite bodies, Pappus theorems. Moment of inertia of plane figures.

Unit V: Kinematics: Rectilinear and Curvilinear motions – Velocity and Acceleration – Motion of Rigid Body – Types and their Analysis in Planar Motion. Kinetics: Analysis as a Particle and Analysis as a Rigid Body in Translation – Central Force Motion – Equations of Plane Motion – Fixed Axis Rotation – Rolling Bodies.

Unit VI: Work – Energy Method: Equations for Translation, Work-Energy Applications to Particle Motion, Connected System-Fixed Axis Rotation and Plane Motion. Impulse momentum method.

Text Books:

1. Engineering Mechanics, Fedinand . L. Singer, Harper – Collins.
2. Engg. Mechanics - S.Timoshenko & D.H.Young., 4th Edn - , Mc Graw Hill publications.
3. Engineering Mechanics by A.K.Tayal , Umesh Publications.

Reference Books:

1. Theory & Problems of engineering mechanics, statics & dynamics – E.W.Nelson, C.L.Best & W.G. McLean, 5th Edn – Schaum's outline series - Mc Graw Hill Publ.
2. Meriam J. L., Kraige L. G., "Engineering Mechanics – Dynamics", Wiley Student Edition,• (Sixth Edition) reprint 2011.
3. Beer F. P. , Johnston E. R., "Vector Mechanics for Engineers Statics and Dynamics", Tata• McGraw Hill Publishing company Ltd., New Delhi (Eighth Edition) reprint 2009
4. Shames Irving H., "Engineering Mechanics", Prentice Hall, New Delhi (Fourth edition)• reprint 2009.

ENGINEERING MECHANICS

(For ME, CE)

V18MET03	ENGINEERING MECHANICS	L	T	P	C
		3	1	0	4

Course Outcomes:

After successful completion of the course, the student will be able to

CO1: Compute the resultant force of a given system of forces **(K3)**

CO2: Calculate the forces in the different types of plane trusses **(K3)**

CO3: Find the Centroid, Center of Gravity and Moment of Inertia for plane figures and bodies **(K3)**

CO4: Illustrate the different types of plane motions of a particle to compute its velocity, acceleration and force. **(K3)**

CO5: Illustrate the concept of Work and Energy (**K3)**

CO6: Apply the principle of Virtual Work to stability of equilibrium of beams and trusses **(K3)**

Unit I: Introduction to Engg. Mechanics – Basic Concepts.

Systems of Forces: Coplanar Concurrent Forces – Resultant – Moment of Force and its Application – Couples and Resultant of Force Systems.

Equilibrium of Systems of Forces: Free Body Diagrams, Equations of Equilibrium of Coplanar Systems for concurrent forces. Lami's Theorem, Graphical method for the equilibrium of coplanar forces, Converse of the law of Triangle of forces, converse of the law of polygon of forces condition of equilibrium.

Unit II: Analysis of Trusses by Method of Joints: Types of Trusses - Assumptions for forces in members of a perfect truss, Force table, Cantilever Trusses, Structures with one end hinged and the other freely supported on rollers carrying horizontal or inclined loads.

Unit III: Centroid: Centroid of simple figures (from basic principles) – Centroid of composite Figures

Centre of Gravity: Centre of gravity of simple body (from basic principles), Pappus theorems.

Area moments of Inertia: Definition – Polar Moment of Inertia, Transfer Theorem, Moments of Inertia of Composite Figures.

Mass Moment of Inertia: Moment of Inertia of Masses, Transfer Formula for Mass Moments of Inertia.

Unit IV: Kinematics: Rectilinear and Curvilinear motions – Velocity and Acceleration – Motion of Rigid Body – Types and their Analysis in Planar Motion.

Kinetics: Analysis as a Particle and Analysis as a Rigid Body in Translation – Central Force Motion – Equations of Plane Motion – Fixed Axis Rotation – Rolling Bodies.

Unit V: Work – Energy Method: Equations for Translation, Work-Energy Applications to Particle Motion, Connected System-Fixed Axis Rotation and Plane Motion. Impulse momentum method.

Unit VI: Principle of Virtual Work: Principle of virtual work, advantages of principle of virtual work, principle of virtual applied to stability of equilibrium. Application of principle of virtual work limited to beams, ladder problems and trusses only.

Text Books:

1. Engg.Mechanics - S.Timoshenko&D.H.Young., 4th Edn - , McGraw Hill publications.
2. Engineering Mechanics by A.K.Tayal , Umesh Publications.
3. Engineering Mechanics, Fedinand . L. Singer, Harper – Collins.

Reference Books:

1. Theory & Problems of engineering mechanics, statics & dynamics – E.W.Nelson, C.L.Best& W.G. McLean, 5th Edn – Schaum's outline series - McGraw Hill Publ.
2. Meriam J. L., Kraige L. G., "Engineering Mechanics – Dynamics", Wiley Student Edition,• (Sixth Edition) reprint 2011.
3. Beer F. P. , Johnston E. R., "Vector Mechanics for Engineers Statics and Dynamics", Tata• McGraw Hill Publishing company Ltd., New Delhi (Eighth Edition) reprint 2009
4. Shames Irving H., "Engineering Mechanics", Prentice Hall, New Delhi (Fourth edition)• reprint 2009.

I B.Tech- I /II Semester **ENGINEERING GRAPHICS**
(Common to all branches)

V18MET01	ENGINEERING GRAPHICS	L	P	C
		1	3	2.5

Course Outcomes:

After successful completion of the course, the student will be able to

CO1: Demonstrate the usage of drawing instruments and sketch conic sections **(K3)**

CO2: Construct different types of scales and special curves **(K5)**

CO3: Draw the projections of the points, lines and planes with reference to the principal planes. **(K2)**

CO4: Develop the projections of solids and its surfaces. **K3)**

CO5: Draw the Isometric projections of solids. **(K2)**

CO6: Convert the isometric view to orthographic view and vice versa. **(K2)**

UNIT1: INTRODUCTION TO ENGINEERING GRAPHICS:

Introduction to Engineering Graphics and its significance, usage of Drawing instruments- Mini Drafter, Calipers, Set square etc..Lettering, Conic sections – Ellipse, Parabola, Hyperbola,

UNIT 2: SPECIAL CURVES & SCALES:

Special Curves – cycloid, epicycloids, hypocycloid, involutes; Scales – Plain, Diagonal and Vernier Scales.

UNIT 3: ORTHOGRAPHIC PROJECTIONS:

Introduction to Orthographic Projections- Projections of Points, Projection of lines inclined to both the planes; Projections of planes- inclined to both the Planes .

UNIT 4: PROJECTIONS OF REGULAR SOLIDS:

Projections of Solids – Prisms, Pyramids, Cones and Cylinders with the axis inclined to one of the planes. Development of surfaces of Right Regular Solids - Prism, Pyramid, Cylinder and Cone.

UNIT 5: ISOMETRIC PROJECTIONS :

Principles of Isometric projection – Isometric Scale, Isometric Views, Conventions; Isometric Views of lines, Planes, Simple solids and compound Solids;

UNIT 6:

Conversion of Isometric Views to Orthographic Views and Vice-versa**.**

Text Books:

1. Engineering Drawing by N.D. Butt, Chariot Publications
2. Engineering Drawing by Agarwal & Agarwal, Tata McGraw Hill Publishers

Reference Books:

1. Engineering Drawing by K.L.Narayana & P. Kannaiah, Scitech Publishers
2. Engineering Graphics for Degree by K.C. John, PHI Publishers
3. Engineering Graphics by PI Varghese, McGrawHill Publishers
4. Engineering Drawing + AutoCad – K Venugopal, V. Prabhu Raja, New Age

V18MEL01	ENGINEERING WORKSHOP & IT WORKSHOP PRACTICE LAB	L	P	C
		0	3	1.5

Engineering Workshop

Course Outcomes:

After successful completion of the course, the student will be able to

CO1: prepare different models in the carpentry trade such as Cross lap joint, Dove tail joint. **(K3)**

CO2: make various basic prototypes in the trade of Tin smithy such as rectangular tray, and open Cylinder **(K3)**

CO3:model various basic prototypes in the trade of fitting such as Straight fit, V- fit. **(K3)**

CO4: prepare different models in the Black smithy such as Round rod to Square, S-Hook.. **(K3)**

CO5: perform various basic House Wiring techniques such as connecting one lamp with one switch, connecting two lamps with one switch, connecting a fluorescent tube, Series wiring, Go down wiring. **(K3)**

CO6: prepare various basic prototypes in the trade of Welding such as Lap joint, Butt joint. **(K3)**

Engineering Workshop

Note: At least two exercises to be done from each trade.

Carpentry

1. T-Lap Joint
2. Cross Lap Joint
3. Dovetail Joint
4. Mortise and Tenon Joint

Tin Smithy

1. Taper Tray
2. Square Box without lid
3. Open Scoop
4. Funnel

Fitting shop

1. V- Fit
2. Square Fit
3. Half Round Fit
4. Dovetail Fit

Black smithy

1. Round rod to Square
2. S-Hook
3. Round Rod to Flat Ring
4. Round Rod to Square headed bolt

House wiring

1. Parallel / Series Connection of three bulbs
2. Stair Case wiring
3. Florescent Lamp Fitting
4. Measurement of Earth Resistance

Welding shop (Arc welding)

1. Butt Joint
2. Lap Joint

		L	P	C
V18MEL01	**IT WORKSHOP LAB**	**0**	**3**	**1.5**

Course Outcomes:

After successful completion of the course, the student will be able to

- Demonstrate Disassemble and Assemble a Personal Computer and its peripherals(K3)
- Practice installation of operating system.(K3)
- Connect peripherals and install required drivers(K4)
- Demonstrate internet connectivity and usage of internet as per his/her requirement.(K3)
- Prepare the Documents for their projects(K3)
- Prepare Slide shows for their presentations (K3)

PC Hardware:

Task 1: Identification of the peripherals of a computer: To prepare a report containing the block diagram of the CPU along with the configuration of each peripheral and its functions. Description of various I/O Devices.

Task 2(Optional) :A practice on disassembling the components of a PC and assembling them to back to working condition.

Task 3: Examples of Operating systems- DOS, Installation of MS windows on a PC

Task 4: Introduction to Memory, types of Storage Devices, I/O Port, Device Drivers, Assemblers, Compilers, Interpreters

Software Troubleshooting (Demonstration): Identification of a problem and fixing the PC for any software issues.

Task 5: Hardware Troubleshooting (Demonstration): Identification of a problem and fixing a defective PC (improper assembly or defective peripherals).

Internet & Networking Infrastructure

Task 6: Demonstrating Importance of Networking, Transmission Media, Networking Devices- Gateway, Routers, Hub, Bridge, NIC, Bluetooth Technology, Wireless Technology, Modem, DSL,ISP.

Task 7: Search Engines & Netiquette: Students are enabled to use search engines for simple search, academic search and any other context based search (Bing, Google etc). Students are acquainted to the principles of micro-blogging, wiki, collaboration using social networks, participating in online technology forums.

Word

Task 8: MS Word Orientation: Accessing, overview of toolbars, saving files, Using help and resources, rulers, formatting ,Drop Cap , Applying Text effects, Using Character Spacing, OLE in Word, using templates, Borders and Colors, Inserting Header and Footer, Using Date and Time option, security features in word, converting documents while saving, , mail merge.

Task 9: Creating project : Abstract Features to be covered:-Formatting Styles, Inserting table, Bullets and Numbering, Changing Text Direction, Cell alignment, Footnote, Hyperlink, Symbols, Spell Check , Track Changes, Images from files and clipart, Drawing toolbar and Word Art, Formatting Images, Textboxes and Paragraphs.

Excel

Task 10: Using spread sheet features of EXCEL including the macros, formulae, pivot tables, graphical representations. **Creating a Scheduler -** Features to be covered:- Gridlines, Format Cells, Summation, auto fill, Formatting Text, ,Charts,

Task 11: Performance Analysis - Features to be covered:- Split cells, freeze panes, group and outline, Sorting, Boolean and logical operators, Conditional formatting.

Power Point

Task 12: Students will be working on basic power point utilities and tools which help them create basic power point presentation. Topic covered during this week includes :- PPT Orientation, Slide Layouts, Inserting Text, Word Art, Formatting Text, Bullets and Numbering, Auto Shapes, Lines and Arrows, Hyperlinks, Inserting – Images, Clip Art, Tables, animation and Charts in PowerPoint.

TEXT BOOK:

Faculty to consolidate the workshop manuals using the following references

1. Computer Fundamentals, Anita Goel, Pearson.

2. Scott Mueller's Upgrading and Repairing PCs, 18/e, Scott. Mueller, QUE, Pearson, 2008.

3. Information Technology Workshop,3e, G Praveen Babu, M V Narayana BS Publications.

4. Comdex Information Technology , Vikas Gupta, dreamtech.

REFERENCE BOOK:

1. Essential Computer and IT Fundamentals for Engineering and Science Students, Dr. N.B. Venkateswarlu.

2. PC Hardware trouble shooting made easy, TMH.

I B.Tech – I/II Semester **Programming in 'C' for problem Solving**

(Common to all branches)

V18CST01	Programming in 'C' for problem Solving	L	P	C
		3	0	3

Course Outcomes:

CO1: Describe various problem solving strategies such as Algorithms and Flowcharts **(K2)**

CO2: Develop various programming constructs using Control Structures. **(K3)**

CO3: Summarize the process of modular programming approach **(K5)**

CO4: Illustrate the usage of String handling functions and pointers **(K3)**

CO5: Construct Programs using Structures and Unions. **(K3)**

CO6: Distinguish between Sequential files and Random access files. **(K4)**

UNIT-I: Problem solving concepts: Problem solving strategies – Top down design, Bottom up design, Algorithms, Flow-charts, Types of Programming Languages, Compiler, Assembler and Linker, Testing and Debugging a program. **Introduction to C Programming:** Overview and importance of C, C Program Structure, Creation and Compilation of C Programs, Identifiers, Variables, Data types, Constants, Declarations.

UNIT-II: Operators: Arithmetic, relational and logical operators, increment and decrement operators, conditional operator, assignment operator, bitwise operators, special operators, expressions, Precedence, Associativity, Order of evaluation, Type conversion, Programming Examples.**Input and output statements:** Input and output functions.

Flow of Control: Conditional statements - If-else, Switch-case constructs, Loops - while, do-while, for.

UNIT-III: Arrays: Single-Dimensional Arrays, multi-Dimensional Arrays, initialization and accessing individual elements. **Functions:** Top down approach of problem solving, standard library functions, user defined functions, parameter passing - call by value, call by reference, return statement, passing arrays as parameters to functions, recursion, command line arguments.

UNIT-IV: Storage Classes: Scope and extent, Storage Classes in a single source file: auto, extern and static, register. **Strings in C**- Concepts, string handling functions. **Understanding pointers:** Accessing the address of a variable, declaring pointer variables, initialization of pointer variables, accessing a variable through its pointer, pointer arithmetic, pointer and arrays, pointers and character strings, array of pointers.

UNIT-V:Structures and Unions: Defining, declaring, initialization, accessing, comparing, operations on individual members, array of structures, structures within structures, self referential structure, structures and functions, pointers and structures, bit fields, Programming Examples.

Dynamic Memory Allocation: Definition, malloc, calloc, realloc, free, dynamic arrays.

UNIT-VI:File Processing: Defining and Opening a file, closing a file, input/output operations on files, error handling during I/O operations, random access to files, Programming Examples.

Preprocessor: Definition, Macro substitution, file inclusion, compiler control directives, Programming Examples.

Text Books:

I B.Tech – I/II Semester **Programming Lab in 'C' for problem Solving**

(Common to all branches)

V18CSL01	Programming Lab in 'C' for problem Solving	L	P	C
		0	3	1.5

Course Outcomes:

CO 1: Demonstrate problem solving techniques using Control Structures. **(K3)**

CO 2: Construct Programmes using the concepts of Arrays, Strings and Pointers. **(K3)**

CO3: Apply the concepts of Functions, Structures and Unions. **(K3)**

CO4: Use various file processing operations to develop real time applications. **(K4)**

LIST OF EXPERIMENTS:

Tutorial 1: Problem solving using computers.
Lab1: Familiarization with programming environment.
Tutorial 2: Variable types and type conversions.
Lab 2: Simple computational problems using arithmetic expressions.
Tutorial 3: Branching and logical expressions.
Lab 3: Problems involving if-then-else structures, switch – case.
Tutorial 4: Loops, while and for loops.
Lab 4: Iterative problems e.g. sum of series.
Tutorial 5: 1D Arrays: searching, sorting.
Lab 5: 1D Array manipulation.
Tutorial 6: 2D arrays.
Lab 6: Matrix problems.
Tutorial 7: Functions, call by value, call by reference, command line arguments.
Lab 7: Simple functions.
Tutorial 8: String handling.
Lab 8: String handling functions.
Tutorial 9: Pointers.
Lab 9: Programming with pointers.
Tutorial 10: Recursion, structure of recursive calls.
Lab 10: Recursive functions.
Tutorial 11: Structures, unions and dynamic memory allocation.
Lab 11: Structures & unions.
Tutorial 12: File handling.
Lab 12: File operations.

Reference Books:

6. Programming in C, Reema Thareja, Oxford.
7. Problem Solving and Program design in C, Hanly J R & Koffman E.B, Pearson Education, 2009.
8. Programming and Problem Solving Using C, ISRD Group, Tata McGraw Hill,2008.

Minutes of the 2nd Academic Council meeting on 01/07/2018
Item No: 7
Annexure No: IV

Academic Rules and Regulations for M.Tech Programme

The M.Tech Degree of Sri Vasavi Engineering College (Autonomous), Pedatadepalli, Tadepalligudem, under Jawaharlal Nehru Technological University Kakinada shall be conferred on candidates who are admitted to the programme and fulfill all the requirements for the award of the Degree.

1.0 ELIGIBILITY FOR ADMISSIONS:

Admission to the above programme shall be made subject to eligibility criteria, qualification and specialization as prescribed from time to time.

Admissions shall be made on the basis of merit/rank obtained by the candidates at the Qualifying Examination/Entrance Test conducted by the University/Government or on the basis of any other order of merit as approved by the University/ Government subject to reservations as laid down by the Govt. from time to time.

1.1 ADMISSIONS UNDER SPECIAL CASES:

These may arise in the following situations.

4. When a student gets detained due to academic regulations and re-joins the college to complete the programme in a new regulation.
5. When a student discontinues for some time and re-joins the college to complete the programme in a new regulation.
6. When a student seeks transfer from other colleges to SVEC and intends to pursue M.Tech programme in the eligible branch of study.

   These admissions may be permitted by the College Academic Council as per the norms stipulated by the statutory bodies and the Government of Andhra Pradesh from time-to-time.

   In all such cases for admission if necessary permissions from the statutory bodies are to be obtained and the programme of study at the college will be governed by the transitory regulations stipulated in **12.0.**

   An under taking from the students is to be taken at the time of admission stating that they would abide by the transitory regulations specified by the authorities if there is any change in the regulations.

2.0 AWARD OF M.Tech DEGREE:

i. A student shall be declared eligible for the award of the M. Tech Degree, if he pursues programme of study in not less than two and not more than four academic years.

ii. The student shall register for all 70 credits and secure all the 70 credits.

iii. The duration of each semester including examinations is 21 weeks.

3.0 SPECIALIZATION:

The following specializations are offered at present for the M. Tech programme

a) M.Tech- Structural Engineering
b) M.Tech- Power System Control & Automation
c) M.Tech- Machine Design
d) M.Tech- VLSI & Embedded Systems
e) M.Tech- Computer Science & Engineering

4.0 ATTENDANCE:

A student is eligible to write the semester end examinations (SEE) if he/she acquires a minimum of 75% of attendance in aggregate of all the courses of that semester put together.

4.1 Condonation of shortage of attendance in aggregate up to 10% (65% and above **but** below 75%) in a given semester may be granted by the College Academic Committee on medical grounds provided the student has submitted the application for medical leave along with medical certificate from a Registered medical practitioner within three days form reporting to the class work after the expiry of the medical leave. However, a student can avail this concession on medical grounds for not more than once during entire duration of the programme.

4.2 A student representing the college in approved extracurricular activities such as sports, games, cultural meets, seminars, workshops and conferences shall be considered as on duty provided he/she has obtained prior written permission from the head of the department concerned and also submitted the certification of participation from the organizer of the event within three days after the completion of the event. However, this period of absence shall be counted as present for the purpose of computation of attendance only.

4.3 A stipulated fee shall be payable towards condonation of shortage of attendance.

4.4 Attendance below 65% in aggregate shall not be condoned under any circumstances.

4.5 Students whose shortage of attendance is not condoned in any semester are not eligible to write their semester end examinations.

4.6 A student who is in short of attendance in a semester may seek re-admission into that semester when offered again, within 1 week from the date of the commencement of class work.

4.7 A student will be promoted to the next semester if he satisfies the attendance requirement of the present semester.

4.8 If any candidate fulfills the attendance requirement in the present semester, he shall not be eligible for readmission into the same class.

5.0 EVALUATION:

The performance of the candidate in each semester shall be evaluated course-wise, with a maximum of 100 marks for theory and 100 marks for practicals, on the basis of Internal Evaluation (IE) and End Semester Examination.

Theory Courses:

i. For the theory courses 60 marks shall be awarded based on the performance in the End Semester Examination and 40 marks shall be awarded based on the Internal Evaluation. The internal evaluation shall be made based on the average of the marks secured in the two Mid Term-Examinations conducted-one in the middle of the Semester and the other immediately after the completion of instruction.

ii. Each Mid-term examination shall be conducted for 30 marks and duration of 120 minutes with 3 questions (without choice), each question for 10 marks.
The balance 10 marks is earmarked for alternate assessment tool like assignments etc.,

Internal Evaluation= Average of two mid examinations (30)+AAT (10)

End Semester Examination shall be conducted for 60 marks.

There will be 5 questions with internal choice covering the entire syllabus. The student has to answer all the questions.

Practical Courses:

For practical course, 60 marks shall be awarded based on the performance in the End Semester Examination (Conducted by External Examiner and Internal Examiner) and

40 marks shall be awarded based on the day-to-day performance and an Internal Test as Internal Evaluation.

Seminar:

There shall be two seminar presentations one in I semester and another in II semester. For seminar, a student under the supervision of a faculty member, shall collect the literature on a topic and critically review the literature and submit it to the department in a report form and shall make an oral presentation before a Committee consisting of Head of the Department, Supervisor and two other senior faculty members of the department. For each Seminar there will be only internal evaluation for 50 marks. A candidate has to secure a minimum of 50% of marks to be declared successful.

MOOCS Courses:

Every student has to register for a MOOCs course in 1st semester itself as approved by the Departmental Committee and complete it on self study basis and submit the certificate of successful completion before the end of 3rd semester.

Comprehensive Viva:

Every Student has to appear for a comprehensive Viva-Voce at the end of III Semester. The performance will be assessed by a committee for 50 marks.

5.1 Minimum Academic requirement:

i. A candidate shall be deemed to have secured the minimum academic requirement in a course if he secures a minimum of 40% of marks in the End semester Examination and a minimum aggregate of 50% of the total marks in the End Semester Examination and Internal Evaluation taken together.

ii. In case the candidate does not secure the minimum academic requirement in any course (as specified in 5.1(i)) he has to reappear for the End Semester Examination in that course.

iii. A candidate shall be given one chance to re-register for each course provided the internal marks secured by a candidate are less than 50% and has failed in the end examination. In such a case, the candidate must re-register for the course(s) and secure the required minimum attendance. The candidate's attendance in the re-registered course(s) shall be calculated separately to decide upon his eligibility for writing the end examination in those course(s). In the event of the student taking another chance, his internal marks and end examination marks obtained in the previous attempt stands cancelled.

iv. For re-registration the candidates have to apply to the Dean Academics by paying the requisite fees and get approval from the College before the start of the Semester in which re-registration is required.

In case the candidate secures less than the required attendance in any re-registered course(s), he shall not be permitted to write the End Examination in that course. He shall again re-register the course when next offered.

6.0 EVALUATION OF PROJECT/DISSERTATION WORK:

The project duration is two semesters. Every candidate shall be required to submit a thesis or dissertation on a topic approved by the Project Review Committee.

i. A Project Review Committee (PRC) shall be constituted with Head of the Department and two other senior faculty members along with project supervisor.

ii. The total project work is evaluated at the end of 4^{th} semester for a total of 100 marks out of which 50 marks are awarded by an internal committee (PRC) and 50 marks are awarded by an external examiner.

6.1 Registration of Project Work:

The work on the project shall be initiated at the beginning of the II year and the duration of the project is two semesters.

A candidate is permitted to register for the project work after satisfying the attendance requirement of all the courses, both theory and practical.

The student has to submit, in consultation with his project supervisor, the title, expected outcomes and plan of action of his project work for approval. The student can initiate the Project work, only after obtaining the approval from the Project Review Committee (PRC).

At a later stage if a candidate wishes to change his supervisor or topic of the project, he can do so with the approval of the Project Review Committee (PRC). However, the Project Review Committee (PRC) shall examine whether or not the change of topic/supervisor leads to a major change of his initial plans of project proposal. If yes, his date of registration for the project work starts from the date of change of Supervisor or topic as the case may be.

6.2 Project Evaluation:

i. A candidate is permitted to submit Project Thesis only after successful completion of all theory and practical courses with the approval of PRC, not earlier than 40 weeks from the date of registration of the project work.

ii. Three copies of the Project Thesis certified by the supervisor shall be submitted to the department.

iii. The thesis shall be adjudicated by an External Examiner approved by the Principal from a panel of 4 Examiners, eminent in the field, submitted by the Department.

iv. If the report of the examiner is not favorable, the candidate shall revise and re-submit the Thesis in the time frame as decided by the PRC. If the report of the examiner is unfavorable again, the thesis shall be summarily rejected. The candidate has to re-register for the project and complete the project within the stipulated time after taking the approval from the competent authority.

v. If the report of the examiner is favorable, Viva-Voce examination shall be conducted by the external examiner who adjudicated the thesis. The Head of the Department shall coordinate and make arrangements for the conduct of Viva-Voce examination.

vi. The total project work is evaluated at the end of 4th semester for a total of 100 marks out of which 50 marks are awarded by the internal committee (PRC) and 50 marks are awarded by the external examiner and the performance is graded as per the grading system given in 7.0.

If the report of the Viva-Voce is unsatisfactory, the candidate shall retake the Viva-Voce examination only after three months. If he fails to get a satisfactory report at the second Viva-Voce examination, the candidate has to re-register for the project and complete the project within the stipulated time after taking the approval from the College.

7.0 GRADING SYSTEM:

Based on the students performance in different courses of a semester **letter grades** will be awarded at the end of the semester for each course. The letter grades and the corresponding **grade points** are as given in the following table.

Grade	Grade Points	% of marks
S	10	≥ 90
A	9	≥ 80 – < 90
B	8	≥ 70 – < 80
C	7	≥ 60 – < 70
D	6	≥ 50 – < 60
F	0 (Failed)	< 50

8.0 GRADE POINT AVERAGE:

Computation of SGPA and CGPA:

The following is the procedure to compute the Semester Grade Point Average (SGPA) for each semester and Cumulative Grade Point Average (CGPA) for all four semesters of the programme:

i. The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e

$$\textbf{SGPA}\ (Si) = \sum(Ci \times Gi) / \sum Ci$$

where Ci is the number of credits of the i^{th} course and Gi is the grade point scored by the student in the i^{th} course.

ii. The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.

$$\textbf{CGPA} = \sum(Ci \times Si) / \sum Ci$$

Where Si is the SGPA of the ith semester and Ci is the total number of credits in that semester.

The SGPA and CGPA shall be rounded off to 2 decimal places and reported in the transcripts.

Illustration for Computation of SGPA and CGPA:

Computation of SGPA at the end of 1st semester

Illustration No.1:

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	9	3 x 9 = 27
Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	S	10	3 x 10 = 30
Course 5	3	D	6	3 x 6 = 18
Course 6	3	C	7	3 x 7 = 21
Course 7	2	A	9	2 x 9 = 18
Total	**20**			**159**

Thus, **SGPA at the end of 1st Semester= 159/20=7.95**

Illustration No.2 (with one failure)

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	9	3 x 9 = 27
Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	S	10	3 x 10 = 30
Course 5	3	F	0	3 x 0 = 00
Course 6	3	C	7	3 x 7 = 21
Course 7	2	A	9	2 x 9 = 18
Total	**20**			**141**

Thus, **SGPA at the end of 1st Semester= 141/20=7.05**

Illustration No.2 (a)

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 5	3	D	6	3 x 6 =18
Total Credits of the Semester	**20**			Ci(First Attempt)141 +Ci (subsequent attempt) 18= **159**

Thus, **SGPA=159/20=7.95**

Illustration No.3

Second Semester performance:

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	9	3 x 9 = 27
Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	Ex	10	3 x 10 =30
Course 5	3	A	9	3 x 9 = 27
Course 6	3	C	7	3 x 7 =21
Course 7	2	A	9	2 x 9 =18
Total	**20**			**168**

Thus, **SGPA of 2nd Semester = 168/20=8.4**

CGPA at the end of 2nd Semester: CGPA= $\frac{20*7.95+20*8.4}{40} = 8.175$

.

Sem-1	*Sem-2*	*Sem-3*	*Sem-4*
Credit : 20 SGPA: 7	Credit: 20 SGPA: 8.5	Credit : 10 SGPA: 9.2	Credit : 20 SGPA: 6.86

CGPA after Final Semester:

Thus, CGPA= $\frac{20*7+20*8.5+10*9.2+20*6.86}{70} = \mathbf{7.70}$

AWARD OF CLASS:

A candidate who becomes eligible for the award of M.Tech degree shall be placed in one of the following classes based on CGPA.

TABLE: CGPA Required for Award of Class

Distinction	**≥ 7.75***
First Class	**≥ 6.75**
Second Class	**≥ 6.0**

*In addition to the required CGPA of 7.75, the student must have necessarily passed all the courses of each semester in the first attempt.

9.0 MALPRACTICES:

The Principal shall refer the cases of malpractices in Continuous Internal Evaluation (CIE) and Semester End Examination (SEE) to an Enquiry Committee constituted by him. The committee will submit a report on the malpractice allegedly committed by the student to the Principal.

Rules pertaining to the punishments in the case of Malpractice are given in Annex-I

10.0 ADDITIONAL ACADEMIC REGULATIONS:

Grade Sheet: A grade sheet (memorandum) will be issued to each student indicating his performance in all courses taken in that semester and also indicating the grades and SGPA.

Transcripts: After successful completion of the total programme of study, a Transcript containing performance of all academic years will be issued as a final record. Candidates shall be permitted to apply for recounting/revaluation within the stipulated period with payment of prescribed fee. The Academic Council has to approve and recommend to the JNTUK, Kakinada for the award of a degree to any student.

11.0 WITHHOLDING OF RESULTS

If the student has not paid the dues, if any, to the **college** or if any case of indiscipline is pending against him, the result of the student will be withheld. His degree will be withheld in such cases.

12.0 TRANSITORY REGULATIONS:

For students admitted under special cases (mentioned in 1.1) these transitory regulations will provide the modus operandi.

At the time of such admission, based on the programme pursued (case by case):

5. Equivalent courses completed by the student are established by the BOS concerned.
6. Marks/Credits are transferred for all such equivalent courses and treated as successfully cleared in the Programme of study prescribed by SVEC.
7. A Programme chart of residual courses not cleared will be derived and a Programme of study with duration specified will be prescribed for pursuit at SVEC.
8. Marks obtained in the previous system if the case be, are converted to grades and CGPA is calculated accordingly.

All other modalities and regulations governing shall be the same as those applicable to the stream of students with whom such a candidate is included into.

Regarding the students who were admitted under JNTU, Kakinada regulations for affiliated colleges:

If they happen to join and study along with their juniors at SVEC, the transitory regulations to be specified by JNTU, Kakinada for such students have to be followed.

13.0 GENERAL:

i. Wherever the words "he", "him", "his", occur in the regulations, they include "she", "her", "hers".
ii. The academic regulation should be read as a whole for the purpose of any interpretation.
iii. In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Chairman of the Academic Council is final.
iv. The College may change or amend the academic regulations or syllabi at any time and the changes or amendments made shall be applicable to all the students with effect from the dates notified by the college.

Annexure-I

MALPRACTICES

S.No	Nature of Malpractices/Improper Conduct	Punishment
1 (a)	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in	Expulsion from the examination hall and cancellation of the performance in that subject only.

	which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination)	
(b)	Gives assistance or guidance or receives it from any other candidate orally or by any other body language methods or communicates through cell phones with any candidate or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of the performance in that subject only of all the candidates involved. In case of an outsider, he will be handed over to the police and a case is registered against him.
2.	Has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the subject of the examination (theory or practical) in which the candidate is appearing.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year. The Hall Ticket of the candidate is to be cancelled and sent to the University.
3.	Impersonates any other candidate in connection with the examination	The candidate who has impersonated shall be expelled From examination hall. The candidate is also debarred and forfeits the seat. The performance of the original candidate who has been impersonated, shall be cancelled in all the subjects of the Examination (including practicals and project work) already appeared and shall not be allowed to appear for examinations of the remaining subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the imposter is an outsider, he will be handed over to the police and a case is registered against him.
4.	Smuggles in the Answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in

		connection with forfeiture of seat.
5.	Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.	Cancellation of the performance in the subject.
6.	Refuses to obey the orders of the Chief Superintendent/Assistant – Superintendent / any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the officer-in charge or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the officer-in-charge, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the College campus or engages in any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.	In case of students of the college, they shall be expelled from examination halls and cancellation of their performance in that subject and all other subjects the candidate(s) has (have) already appeared and shall not be permitted to appear for the remaining examinations of the subjects of that semester/year. The candidates also are debarred and forfeit their seats. In case of outsiders, they will be handed over to the police and a police case is registered against them.
7.	Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat .
8.	Possess any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat.

9.	If student of the college, who is not a candidate for the particular examination or any person not connected with the college indulges In any malpractice or improper conduct mentioned in clause 6 to 8.	Student of the colleges expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat. Person(s) who do not belong to the College will be handed over to police and, a police case will be registered against them.
10.	Comes in a drunken condition to the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year.
11.	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	Cancellation of the performance in that subject and all other subjects the candidate has appeared including practical examinations and project work of that semester/year examinations.
12.	If any malpractice is detected which is not covered in the above clauses 1 to 11 shall be reported to the University for further action to award suitable punishment

COURSE STRUCTURE OF M.TECH (POWER SYSTEM CONTROLL & AUTOMATION)

I SEMESTER

S.No.	Course Code	Course Title	L	T	P	Credits
1	V18PST01	Power System Operation & Control	3	-	-	3
2	V18PST02	Advanced Computer Methods in Power Systems	3	-	-	3
3	V18PST03	Advanced Power System Protection	3	-	-	3
4	V18PST04	Micro Controllers and Application	3	-	-	3
5	V18PST05 V18PST06 V18PST07 V18PST08	Elective – I: 1. Power System Reliability 2. Application of AI Techniques in Power Systems 3. Electrical Distribution Systems 4. Power System Security	3	-	-	3
6	V18PST09 V18PST10 V18PST11 V18PST12	Elective – II: 1. Reactive Power Compensation & Management 2. Power Quality 3. Power System Transients 4. Voltage Stability	3	-	-	3
7	V18PSL01	Power Systems Lab-I	-	-	4	2
8	V18PST41	Seminar-I	-	2	-	2
Total Contact Hours: 24			Total Credits: 22			

II SEMESTER

S.No.	Course Code	Course Title	L	T	P	Credits
1	V18PST13	Modern Control Theory	3	-	-	3
2	V18PST14	Power System Dynamics & Stability	3	-	-	3
3	V18PST15	Solar & Wind Energy	3	-	-	3
4	V18PST16	Real Time Control of Power Systems	3	-	-	3
5	V18PST17 V18PST18 V18PST19 V18PST20	Elective – III: 1. Electrical and Hybrid Vehicles 2. Power System Deregulation 3. Smart Grid 4. High Voltage Engineering	3	-	-	3
6	V18PST21 V18PST22 V18PST23 V18PST24	Elective – IV: 1. Custom Power Devices 2. EHVAC Transmission 3. Demand Side Energy Management 4. HVDC & FACTS	3	-	-	3
7	V18PSL02	Power Systems Lab-II	-	-	4	2
8	V18PST42	Seminar-II	-	2	-	2
Total Contact Hours: 24			Total Credits: 22			

MNC- Mandatory Non-Credit

III SEMESTER

S.No.	Course Code	Course Title	L	T	P	Credits
1	V18PST43	MOOCs	-	-	-	MNC
2	V18PST44	Comprehensive Viva-Voce	-	-	-	2
3	V18PSL05	Project Work	-	-	-	-
Total Credits: 2						

IV SEMESTER

S.No.	Course Code	Course Title	L	T	P	Credits
1	V18PSL05	Project Work Part (Continued)	-	-	-	24
Total Credits: 24						

COURSE STRUCTURE OF M.TECH (MACHINE DESIGN)

I SEMESTER

S.No.	Course Code	Course	L	T	P	C
1	VI8MAT06	Computational Methods in Engineering	3	-	-	3
2	VI8MDT01	Advanced Mechanics of Solids	3	-	-	3
3	VI8MDT02	Advanced Mechanisms	3	-	-	3
4	VI8MDT03	Mechanical Vibrations	3	-	-	3
5	**Elective – I**	VI8MDT04 Design of Automobile Systems VI8MDT05Product Design VI8MDT06 Geometric Modeling VI8MDT07 Non Destructive Evaluation	3	-	-	3
6	**Elective – II**	VI8MDT08 Fracture Mechanics VI8MDT09 Gear Engineering VI8MDT10 Design for Manufacturing & Assembly VI8MDT11 Continuum Mechanics	3	-	-	3
7	VI8MDL01	Machine Dynamics Lab	-	-	4	2
8	VI8MDT41	Seminar – I	-	2	-	2
Total Contact Hours: 24			Total Credits: 22			

II SEMESTER

S.No.	Course Code	Course	L	T	P	C
1	VI8MDT12	Optimization and Reliability	3	-	-	3
2	VI8MDT13	Theory of Plasticity	3	-	-	3
3	VI8MDT14	Finite Element Method	3	-	-	3
4	VI8MDT15	Design with advanced Materials	3	-	-	3
5	**Elective – III**	VI8MDT16 Tribology VI8MDT17 Signal Analysis and Condition Monitoring VI8MDT18 Computational Fluid Dynamics VI8MDT19 Design Synthesis	3	-	-	3
6	**Elective-IV**	VI8MDT20 Pressure Vessel Design VI8MDT21 Mechanics of Composite Materials VI8MDT22 Mechatronics VI8MDT23 Experimental Stress Analysis	3	-	-	3
7	VI8MDL02	Design Practice Lab	-	-	4	2
8	VI8MDT42	Seminar – II	-	2	-	2
Total Contact Hours: 24			Total Credits: 22			

III SEMESTER

S.No.	Course Code	Course	L	T	P	C
1	V18MDT43	MOOCs Course	-	-	-	MNC
1	VI8MDT44	Comprehensive Viva-Voce	-	-	-	2
2	VI8MDL05	Project Work	-	-	-	-
Total Credits: 2						

MNC- Mandatory Non-credit

IV SMESTER

S.No.	Course Code	Course	L	T	P	C
1	VI8MDL05	Project Work (Continued)	-	-	-	24
Total Credits: 24						

COURSE STRUCTURE OF M.TECH (VLSI & EMBEDED SYSTEM)

I SEMESTER

S. No.	Course Code	Course Name	L	T	P	C
1.	V18VLT01	Digital System Design	3	-	-	3
2.	V18VLT02	VLSI Technology And Design	3	-	-	3
3.	V18VLT03	CMOS Analog IC Design	3	-	-	3
4.	V18VLT04	Embedded Systems Design-I	3	-	-	3
5.	 V18VLT05 V18VLT06 V18VLT07 V18VLT08	**ELECTIVE-1** Embedded C Digital Signal Processors &Architectures System On Chip Soft Computing Techniques	3	-	-	3
6.	 V18VLT09 V18VLT10 V18VLT11 V18VLT12	**ELECTIVE -2** Digital Design Through HDL CPLD & FPGA Architecures And Applications Algorithms For VLSI Design –Automation VLSI Signal Processing	3	-	-	3
7.	V18VLL01	VLSI LAB	-	-	4	2
8.	V18VLT41	SEMINAR-I		2	-	2
Total Contact Hours: 24			Total Credits: 22			

II SEMESTER

S. No.	Course Code	Course Name	L	T	P	C
1.	V18VLT13	Design For Testability	3	-	-	3
2.	V18VLT14	CMOS Digital IC Design	3	-	-	3
3.	V18VLT15	Embedded System Design - II	3	-	-	3
4.	V18VLT16	Embedded Real Time Systems	3	-	-	3
5.	 V18VLT17 V18VLT18 V18VLT19 V18VLT20	**ELECTIVE-III** Low Power VLSI CMOS Mixed Signal Circuit Design System Verilog Semiconductor Memory Design And Testing	3	-	-	3
6.	 V18VLT21 V18VLT22 V18VLT23 V18VLT24	**ELECTIVE-IV** Hardware Software Co-Design Embedded Computing Design For Internet Of Things Software for Embedded Systems.	3	-	-	3
7.	V18VLL02	Embedded System Design Lab	-	-	4	2
8.	V18VLT42	SEMINAR-II		2	-	2
Total Contact Hours: 24			Total Credits: 22			

III SEMESTER

S.No	Course Code	Course Name	L	P	C
1	V18VLT43	MOOCs	-	-	MNC
2	V18VLT44	Comprehensive VIVA	-	-	2
3	V18VLL05	Project work	-	-	-
Total Credits: 2					

MNC- Mandatory Non-Credit

IV SEMESTER

S.No	Course Code	Course Name	L	P	C
1	V18VLL05	Project work (Continued)	-	-	24
Total Credits: 24					

COURSE STRUCTURE OF M.TECH (COMPUTER SCIENCE AND ENGINEERING)

I SEMESTER

S.No.	Course Code	Course	L	T	P	C
1	V18CTT01	Object Oriented Software Engineering	3	-	-	3
2	V18CTT02	NOSQL Database	3	-	-	3
3	V18CTT03	Advanced Computer Architecture	3	-	-	3
4	V18CTT04	Advanced Operating Systems	3	-	-	3
5	V18CTT05	Advanced Data Structures and Algorithm Analysis	3	-	-	3
6	V18CTT06	Machine Leaning	3	-	-	3
7	V18CTL01	NOSQL Database Lab	-	-	2	1
8	V18CTL02	Advanced Data Structures and Algorithm Analysis Lab	-	-	2	1
9	V18CTT41	Seminar-I	-	2	-	2
Total Contact Hours: 24			Total Credits: 22			

Total Contact Hours=24

II SEMESTER

S.No.	Course Code	Course	L	T	P	C
1	V18CTT07	Data Science	3	-	-	3
2	V18CTT08	Advanced Web Technologies	3	-	-	3
3	V18CTT09	Cloud Computing	3	-	-	3
4	V18CTT10	Internet of Things	3	-	-	3
5	**Elective-I**		3	-	-	3
	V18CTT11	1) Cyber Security				
	V18CTT12	2) Artificial Intelligence				
	V18CTT13	3) Bioinformatics				
	V18CTT14	4) Wireless Sensor Networks				
6	**Elective-II**		3	-	-	3
	V18CTT15	1) Image Processing				
	V18CTT16	2) Parallel Algorithms				
	V18CTT17	3) Mobile Computing				
	V18CTT18	4) Grid Computing				
7	V18CTL03	Data Science Lab	-	-	2	1
8	V18CTL04	Advanced Web Technologies Lab	-	-	2	1
9	V18CTT42	Seminar-II	-	2	-	2
Total Contact Hours: 24			Total Credits: 22			

Total Contact Hours=24

S.No.	Course Code	Course	L	T	P	C
1	V18CTL05	Project Work (Continued)	-	-	-	24
Total Credits: 24						

SYLLABUS FOR M.TECH (STRUCTURAL ENGINEERING)

I M.Tech- I Semester

Course Code: V18MAT05

L	P	C
3	0	3

ADVANCED MATHEMATICS

Unit – I

Numerical solutions of partial differential equations: Laplace and poisson equations – Representations as a difference equation – 5-point formula – Derivative boundary conditions – Irregular and non – rectangular grids – Matrix patterns, sparseness – ADI method.

Unit – II

Partial differential equations: Bender Schmidt – Crank-Nickelson method –Stability and convergence criteria. Solving wave equation by finite differences-stability of numerical method -wave equation in two space dimensions.

UNIT-III

Applied Statistics: Curve fitting by Method of Least squares (Straight lines, parabola, exponential and power curves). Simple correlation and regression - multiple correlation and regression.

UNIT-IV

Introduction to text of significance – Analysis of variance for one way classification and two way classification - Analysis of variance for regression – Multiple correlation coefficient.

UNIT-V

Linear Programming Problem Formation, Graphical Method, Simplex method, artificial variable method-Big-M method-Two Phase Method.

Non Linear Programming Problem Gradient method, Steepest Ascent Descent Methods.

TEXT BOOKS

1. Solutions of Partial Differential Equations" – Duffy, D.G. CBS Publishers, 1988
2. Introductory Methods of Numerical Analysis – Sastry, S.S. Prentice-Hall, 2nd Edition, 1992
3. Basic Statistics – Agarval, B.L., Wiley 1991, 2nd edition.
4. Operations Research – HamdyA, Taha.Optimization Techniques.-S.S.Rao.

I M.Tech- I Semester
Course Code: V18SET01

L	P	C
3	0	3

THEORY OF ELASTICITY

UNIT-I

Elasticity – Notation for forces and stresses – components of stresses and strains – Hooke's Law - Plane Stress – Plane strain – Differential Equations of equilibrium – Boundary conditions – Compatibility equations - Stress function – Boundary Conditions.

UNIT -II

Two dimensional problems in rectangular co-ordinates – Solution by polynomials – Saint Venant's principle – Determination of displacements – Bending of simple beams – Application of Fourier series for two dimensional problems for gravity loading

UNIT-III

Two dimensional problems in polar co-ordinates - General equations in polar co-ordinates – Stress distribution for problems having symmetrical about an axis - Strain components in polar co-ordinates – Displacements for symmetrical stress distributions - Stresses for plates with circular holes subjected to far field tension – stress concentration factor.

UNIT-IV

Analysis of stress and strain in three dimension - Principal stresses – Stress ellipsoid and stress director surface – Determination of principal stresses - Maximum shear stress – Homogeneous Deformation – General Theorems - Differential equations of equilibrium – Conditions of compatibility – Equations of equilibrium in terms of displacements – Principle of superposition – Uniqueness of solution –Reciprocal theorem.

UNIT-V

Torsion of prismatical bars – Bars with elliptical cross section – Other elementary solution – Membrane analogy – Torsion of rectangular bars – Solution of torsional problems by energy method.

TEXT BOOKS:

1. Theory of Elasticity by Timoshenko & Goodier J.N, published by Mc Graw-Hill, New York (1953), 2nd edition
2. Elasticity: Theory, Applications and Numeric- Martin H. Sadd, published by Elsevier(2004), 3rd edition

REFERENCE BOOKS:

1. Theory of Elasticity by sadhu singh, KHANNA publications (1978), 4th edition. Applied elasticity by C.T. Way, McGraw hill Publications (1963).

I M.Tech- I Semester

Course Code: V18SET02

L	P	C
3	0	3

MATRIX ANALYSIS OF STRUCTURES

UNIT-I

Introduction of matrix methods of analysis – Static and kinematic indeterminacy – Degree of freedom – Structure idealization-stiffness and flexibility methods – Suitability: Element stiffness matrix for truss element, beam element and Torsional element-Element force - displacement equations

UNIT-II

Stiffness method – Element and global stiffness equation – coordinate transformation and global assembly – structure stiffness matrix equation – analysis of simple pin jointed trusses – continuous beams– rigid jointed plane frames

UNIT-III

Stiffness method for Grid elements – development of stiffness matrix – coordinate transformation. Examples of grid problems – tapered and curved beams

UNIT-IV

Additional topics in stiffness methods – discussion of band width – semi band width – static condensation – sub structuring –Loads between joints-Support displacements-inertial and thermal stresses-Beams on elastic foundation by stiffness method.

UNIT-V

Space trusses and frames - Member stiffness for space truss and space frame–Transformation matrix from Local to Global – Analysis of simple trusses, beams and frames

TEXT BOOKS:

1. Matrix analysis of structures- Robert E Sennet- Prentice Hall-Englewood cliffs-New Jercy
2. Advanced structural analysis-Dr. P. Dayaratnam- Tata McGraw hill publishing company limited(2003)

REFERENCES:

1. Analysis of Indeterminate Structural analysis- C K Wang, Mc Graw Hill International Ltd, 5th edition
2. Analysis of tall buildings by force – displacement – Method M. Smolira– Mc. Graw Hill.Inc, (1975)
3. Foundation Analysis and design – J.E. Bowls. Mc. Graw Hill international, 5th edition.
4. Matrix analysis and framed structures by William Weaver, James M. Gere, D Van Nostrand Co, 1980

I M.Tech- I Semester

Course Code: V18SET03

L	P	C
3	0	3

STRUCTURAL DYNAMICS

UNIT-I

Introduction to Structural Dynamics: Fundamental objective of Dynamic analysis – Types of prescribed loadings – methods of Discretization – Formulation of the Equations of Motion.

UNIT-II

Theory of Vibrations: Introduction – Elements of a Vibratory system Degrees of Freedom of continuous systems - Oscillatory motion – Simple Harmonic Motion Free Vibrations of Single Degree of Freedom (SDOF) systems – Undamped and Damped – Critical damping – Logarithmic decrement – Forced vibrations of SDOF systems – Harmonic excitation – Dynamic magnification factor – Band width.

UNIT-III

Single Degree of Freedom System: Formulation and Solution of the equation of Motion – Free vibration response – Response to Harmonic, Periodic, Impulsive and general dynamic loadings – Duhamel integral.

UNIT-IV

Multi Degree of Freedom System: Selection of the Degrees of Freedom Evaluation of Structural Property Matrices – Formulation of the MDOF equations of motion - Undamped free vibrations – Solution of Eigen value problem for natural frequencies and mode shapes – Analysis of dynamic response - Normal coordinates.

UNIT-V

Continuous Systems: Introduction – Flexural vibrations of beams – Elementary case – Equation of motion – Analysis of undamped free vibration of beams in flexure – Natural frequencies and mode shapes of simple beams with different end conditions.

TEXT BOOKS:

1. Dynamics of Structures by R. W.Clough and J. Penzien, Mc Graw Hill Education(1993), 3rd edition
2. Structural Dynamics A K Chopra, Prrentice Hall International Series, 5th edition.

REFERENCES:

1. Structural Dynamics by John M. Bigges, Mc Graw Hill (1964) Structural Analysis by A. Ghali, A.M. Neville and T. G. Brown, newyork Taylor& Francis 2009, 6th edition

I M.Tech- I Semester

Course Code: V18SET04

L	P	C
3	0	3

PRESTRESSED CONCRETE (ELECTIVE-I)

UNIT-I: General principles of Pre-stressing- Pre-tensioning and Post tensioning - Pre tensioning and Post tensioning methods- Different systems of Pre-stressing- Analysis of prestress and Bending stresses– Resultant – stress at a section – pressure line – concept of load balancing – stresses in tendons.

UNIT-II: Losses of Pre-stressing- Loss of Pre-stress in pre-tensioned and post tensioned members due to various causes -Elastic shortening of concrete, shrinkage of concrete, creep of concrete, Relaxation of steel, slip in anchorage, differential shrinkage- bending of members and frictional losses- Long term losses

UNIT-III: Flexural, shear; torsional resistance and design of Prestressed concrete section. Types of flexural failure – code procedures-shear and principal stresses – Prestressed concrete members in torsion – Design of sections for flexure, Axial Tension, Compression and bending, shear, Bond

UNIT-IV: Analysis of continuous beams –Elastic theory- Linear transformation and Concordant tendons- Deflections of pre-stressed concrete beams: Importance of control of deflections- factors influencing deflections-short term deflections of un-cracked member – prediction of long term deflections

UNIT-V: Analysis of end blocks: By Guyon's method and Magnel's method, Anchorage zone stresses- Approximate method of design- anchorage zone reinforcement- transfer of pre stresses- pre tensioned members-Composite sections: Introduction-Analysis for stresses- differential shrinkage- general design considerations

TEXT BOOKS:

1. Prestressed Concrete by N. Krishna Raju, Mc Graw Higher Ed(2012), 5th edition.
2. Prestressed Concrete by S. Ramamrutham, published by Dhanpat Rai Sons, 2nd edition

REFERENCES:

1. Prestressed Concrete structures by P. Dayaratnam., P.sarah, MEDTECH publications, 7th edition.
2. Design of prestressed Concrete by T.Y.Lin and Ned H. Burns, Wiley (1981), 3rd edition,

IS 1343-1980, Indian Standard code for Prestressed concrete.

I M.Tech- I Semester

Course Code: V18SET05

L	P	C
3	0	3

SUB-STRUCTURE DESIGN
(ELECTIVE I)

UNIT-I: Soil Exploration – Importance, Terminology, planning - Geophysical methods. Borings, location, spacing and depth, methods of boring including drilling, stabilization of boreholes, boring records.

UNIT-II: Soil sampling – Methods of sampling -Types of samples and samplers-cleaning of bore holes, preservation, labeling and shipment of samples - Design considerations of open drive samplers.

UNIT-III: Shallow Foundations –Bearing capacity – General bearing capacity equation, Meyerhof's, Hansen's and Vesic's bearing capacity factors - Bearing capacity of stratified soils - Bearing capacity based on penetration resistance- safe bearing capacity and allowable bearing pressure. (Ref: IS -2131 & IS 6403)

UNIT-IV: Types and choice of type. Design considerations including location and depth, Proportioning of shallow foundations- isolated and combined footings and mats - Design procedure for mats. Floating foundation- Fundamentals of beams on Elastic foundations. (Ref: IS -456 & N.B.C. relevant volume).

UNIT-V: Pile foundations-Classification of piles-factors influencing choice-Load -carrying capacity of single piles in clays and sands using static pile formulae- á - â - and λ - methods – Dynamic pile formulae-limitations-Monotonic and cyclic pile load tests – Under reamed piles. Pile groups -Efficiency of pile groups- Different formulae-load carrying capacity of pile groups in clays and sands – settlement of pile groups in clays and sands – Computation of load on each pile in a group.

TEXT BOOKS:

1. Principles of Foundation Engineering by Braja M. Das, 4th edition.
2. Soil Mechanics in Engineering Practice by Terzagi and B.Peck, Willey publications, 3rd edition

REFERENCES:

1. Foundation Design by Wayne C. Teng, John Wiley & Co.,(1962)
2. Foundation Analysis and Design by J.E. Bowles McGraw Hill Pub Co.,3rd edition
3. Analysis and Design of sub structures by Swami Saran, Oxford IBH Pub Ltd, 2nd edition
4. Design Aids in Soil Mechanics and Foundation Engineering by Shanbaga R. Kaniraj,Tata Mc. Graw Hill.(2001), 1st edition.
5. Foundation Design and Construction by MJ Tomlinson and R. Boorman, NJ Prentice hall, 7th edition.
6. A short course in Foundation Engineering by Simmons and Menzes – ELBS (1975), 1st edition.

I M.Tech- I Semester

Course Code: V18SET06

L	P	C
3	0	3

STRUCTURAL OPTMIZATION (ELECTIVE-I)

UNIT-I;

Introduction: Need and scope for optimization – statements of optimization problems- Objective function and its surface design variables- constraints and constraint surface- Classification of optimization problems (various functions continuous, discontinuous and discrete) and function behavior (monotonic and unimodal)

UNIT-II

Classical optimization techniques: Differential calculus method, multi variable optimization by method of constrained variation and Lagrange multipliers (generalized problem) Khun-Tucker conditions of optimality -Fully stressed design and optimality criterion based algorithms- introduction, characteristics of fully stressed design theoretical basis-examples

UNIT-III

Non-Liner programming: Unconstrained minimization- Fibonacci, golden search, Quadratic and cubic interpolation methods for a one dimensional minimization and univariate method, Powel's method, Newton's method and Davidon Fletcher Powell's method for multivariable optimization- Constrained minimization- Cutting plane method- Zoutendjik's method- penalty function methods

UNIT-IV

Linear programming: Definitions and theorems- Simplex method-Duality in Linear programming- Plastic analysis and Minimum weight design and rigid frame

UNIT-V

Introduction to quadratic programming: Geometric programming- and dynamic programming- Design of beams and frames using dynamic programming technique

TEXT BOOKS:

1. Optimization Theory and Applications – S.S. Rao, Wiley Eastern Limited, New Delh
   Optimization Concepts and Application in Engineering- Belegundu A.D. and Chandrupatla T.R,1978.
2. Mathematical Foundations for Design of civil engineering systems by Robert, M. Starkand Robert, L. Nicholls, Mc Graw Hill book company, Newyork (1972)

REFERENCES:

1. Optimum design of structures by Majid. K.I, Newines, Butter Worths London(1974).
2. Optimization Concepts and Applications in engineering by A.D. belagnd and T.R. Chandrupatla, Cambridge University Press, 2nd edition

I M.Tech- I Semester

Course Code: V18SET07

L	P	C
3	0	3

REPAIR AND REHABILITATION OF STRUCTURES

(ELECTIVE-II)

UNIT-I

Materials for repair and rehabilitation -Admixtures- types of admixtures-purposes of using admixtures- chemical composition- Natural admixtures- Fibres- wraps- Glass and Carbon fibre wraps- Steel Plates-Non destructive evaluation: Importance- Concrete behavior under corrosion, disintegrated mechanisms- moisture effects and thermal effects – Visual investigation- Acoustical emission methods- Corrosion activity measurement- chloride content– Depth of carbonation- Impact echo methods- Ultrasound pulse velocity methods- Pull out tests.

UNIT-II

Strengthening and stabilization- Techniques- design considerations-Beam shear capacity strengthening- Shear Transfer strengthening-stress reduction techniques- Column strengthening-flexural strengthening- Connection stabilization and strengthening, Crack stabilization.

UNIT-III

Bonded installation techniques- Externally bonded FRP- Wet layup sheet, bolted plate, near surface mounted FRP, fundamental debonding mechanisms-intermediate crack debonding- CDC debonding- plate end debonding- strengthening of floor ofstructures.

UNIT-IV

Fibre reinforced concrete- Properties of constituent materials- Mix proportions, mixing and casting methods-Mechanical properties of fiber reinforced concrete- applications of fibre reinforced concretes-Light weight concrete- properties of light weight concrete- No fines concrete- design of light weight concrete- Flyash concrete-Introduction-classification of flyash- properties and reaction mechanism of flyash- Properties of flyash concrete in fresh state and hardened state- Durability of flyash concretes.

UNIT-V

High performance concretes- Introduction- Development of high performance concretes-Materials of high performance concretes- Properties of high performance concretes- Self Consolidating concrete-properties- qualifications.

TEXT BOOKS:

1. Concrete technology by Neville and J J Brooks, Pearson publications, 2nd edition
2. Special Structural concrete by Rafat Siddique, Galgotia publications (2000), Newdelhi.

REFERENCES:

1. Concrete repair and maintenance illustrated by Peter H Emmons, R. S. Means company. Inc(1994)
2. Concrete technology by M S Shetty, S. Chand publications (2006).

	3	**0**	**3**

ANALYSIS AND DESIGN OF TALL BUILDINGS
(ELECTIVE-II)

UNIT-I

Design Criteria Philosophy, Materials – Modern concepts – High Performance Concrete, Fibre Reinforced Concrete, Light weight concrete, Self Compacting Concrete

UNIT-II

Gravity Loading – Dead load, Live load, Impact load, Construction load, Sequential loading. Wind Loading – Static and Dynamic Approach, Analytical method, Wind Tunnel Experimental methods. Earthquake Loading – Equivalent lateral Load analysis, Response Spectrum Method, Combination of Loads.

UNIT-III

Behavior of Structural Systems- Factors affecting the growth, height and structural form, Behaviour of Braced frames, Rigid Frames, In-filled frames, Shear walls, Coupled Shear walls, Wall–Frames, Tubular, Outrigger braced, Hybrid systems.

UNIT-IV

Analysis and Design- Modeling for approximate analysis, Accurate analysis and reduction techniques, Analysis of structures as an integral unit, Analysis for member forces, drift and twist. Computerized 3D analysis. Design for differential movement, Creep and Shrinkage effects, Temperature Effects and Fire Resistance.

UNIT-V

Stability Analysis- Overall buckling analysis of frames, wall–frames, Approximate methods, Second order effect of gravity loading, P–Delta Effects, Simultaneous first order and P-Delta analysis, Translational instability, Torsional Instability, Out of plumb effects, Effect of stiffness of members and foundation rotation in stability of structures.

Course Code: V18SET09

L	P	C
3	0	3

PLASTIC ANALYSIS AND DESIGN
(ELECTIVE-II)

UNIT-I

Introduction and basic hypothesis: Concepts of stress and strain – relation of steel Moment curvature relation- basic difference between elastic and plastic analysis with examples- Yield condition, idealizations, collapse criteria- Virtual work in the elastic-plastic state-Evaluation of fully plastic moment and shape factors for the various practical sections.

UNIT-II

Method of Limit Analysis: Introduction to limit analysis of simply supported fixed beams and continuous beams, Effect of partial fixity and end, invariance of collapse loads, basic theorems of limit analysis, rectangular portal frames, gable frames, grids, superposition of mechanisms, drawing statistical bending moment diagrams for checks.

UNIT-III

Limit design Principles: Basic principles, limit design theorems, application of limit design theorems, trial and error method, method of combining mechanisms, plastic moment distribution method, load replacement method, continuous beams and simple frames designs using above principles.

UNIT-IV

Deflection in Plastic beams and frames: Load deflection relations for simply supported beams, deflection of simple pin based and fixed based portal frames, method of computing deflections.

UNIT-V

Minimum weight Design: Introduction to minimum Weight and linear Weight functions- Foulkes theorems and its geometrical analogue and absolute minimum weight design.

REFERENCES:

1. Plastic Methods of Structural analysis by B G Neal, Chapman and Rall publications, 1st edition.
2. Plastic analysis and Design by C E Messennet, M A Seve

Course Code: V18SEL01

L	P	C
0	4	2

ADVANCED STRUCTURAL ENGINEERING LABORATORY

1. Strain measurement - Electrical resistance strain gauges
2. Non destructive testing- Impact Hammer test, UPV test
3. Qualifications tests on Self compaction concrete- L Box test, J Box test, U box test, Slump test
4. Tests on Buckling of columns – Southwell plot
5. Repair and rehabilitation of concrete beams
6. Chemical Analysis of water for suitability in concreting with and without Reinforcement.
7. Chemical Analysis of sand and Aggregate for Suitability in Construction.

NOTE: A minimum of five experiments from the above set have to be conducted.

FINITE ELEMENT METHOD

UNIT-I

Introduction: Review of stiffness method- Principle of Stationary potential energy- Potential energy of an elastic body- Rayleigh-Ritz method of functional approximation - variational approaches -weighted residual methods

UNIT-II

Finite Element formulation of truss element: Stiffness matrix- properties of stiffness matrix – Selection of approximate displacement functions-solution of a plane truss- transformation matrix and stiffness matrix for a 3-D truss- Inclined and skewed supports- Galerkin's method for 1-D truss – Computation of stress in a truss element.

UNIT-III

Finite element formulation of Beam elements: Beam stiffness-assemblage of beam stiffness matrix- Examples of beam analysis for concentrated and distributed loading- Galerkin's method - 2-D Arbitrarily oriented beam element – inclined and skewed supports – rigid plane frame examples

UNIT-IV

Finite element formulation for plane stress, plane strain and axisymmetric problems- Derivation of CST and LST stiffness matrix and equations-treatment of body and surface forces-Finite Element solution for plane stress and axisymmetric problems- comparison of CST and LST elements –convergence of solution- interpretation of stresses

UNIT-V

Iso-parametric Formulation: An isoparametric bar element- plane bilinear isoparametric element – quadratic plane element - shape functions, evaluation of stiffness matrix, consistent nodal load vector - Gauss quadrature- appropriate order of quadrature – element and mesh instabilities – spurious zero energy modes, stress computation- patch test.

EARTHQUAKE RESISTANT DESIGN

UNIT-I

Engineering seismology – rebound theory – plate tectonics – seismic waves - earthquake size and various scales – local site effects – Indian seismicity – seismic zones of India – theory of vibrations – near ground and far ground rotation and their effects.

UNIT-II

Seismic design concepts – EQ load on simple building – load path – floor and roof diaphragms – seismic resistant building architecture – plan configuration – vertical configuration – pounding effects – mass and stiffness irregularities – torsion in structural system- Provision of seismic code (IS 1893 & 13920) – Building system – frames – shear wall – braced frames – layout design of Moment Resisting Frames(MRF) – ductility of MRF – Infill wall – Non- structural elements.

UNIT-III

Calculation of EQ load – 3D modeling of building systems and analysis (theory only) Design and ductile detailing of Beams and columns of frames Concept of strong column weak beams, Design and ductile detailing of shear walls

UNIT-IV

Cyclic loading behavior of RC, steel and pre- stressed concrete elements - modern concepts- Base isolation – Adaptive systems – case studies.

UNIT-V

Retrofitting and restoration of buildings subjected to damage due to earthquakes- effects of earthquakes – factors related to building damages due to earthquake- methods of seismic retrofitting- restoration of buildings

TEXT BOOKS:

1. Pankaj Agarwal and Manish ShriKhande, Earthquake Resistant Design of Structures, Prentice– Hall of India, 2007, New Delhi.
2. Introduction to the Theory of Seismology by Bullen K.E, Great Britain at the University Printing houses, Cambridge University Press 1996, 4th edition.

3	0	3

STABILITY OF STRUCTURES

UNIT-I

Beam columns: Differential equation for beam columns – Beams column with concentrated loads – continuous lateral load – couples – Beam column with built in ends – continuous beams with axial load – application of Trigonometric series – Determination of allowable stresses.

UNIT-II

Elastic buckling of bars : Elastic buckling of straight columns – Effect of shear stress on buckling – Eccentrically and laterally loaded columns –Sway & Non Sway mode - Energy methods – Buckling of a bar on elastic foundation – Buckling of bar with intermediate compressive forces and distributed axial loads – Buckling of bars with change in cross section

– Effect of shear force on critical load – Built up columns

– Effect of Initial curvatue on bars – Buckling of frames – Sway & Non Sway mode.

UNIT-III

In-elastic buckling: Buckling of straight bars – Double modulus theory Tangent modulus theory. Experiments and design formulae:

Experiments on columns – Critical stress diagram – Empirical formulae of design – various end conditions – Design of columns based on buckling. Mathematical Treatment of stability problems: Buckling problem orthogonality relation – Ritz method –Stiffness method and formulation of Geometric stiffness matrix- Applications to simple frames

UNIT-IV

Torsional Buckling: Pure torsion of thin walled bars of open cross section – Non uniform torsion of thin walled bars of open cross section - Torsional buckling – Buckling of Torsion and Flexure.

UNIT-V

Lateral Buckling of simply supported Beams: Beams of rectangular cross section subjected for pure bending, Buckling of I Section subjected to pure bending.

THEORY OF PLATES AND SHELLS

UNIT-I

Derivation of governing differential equation for plate– in plane bending and transverse bending effects- Rectangular plates: Plates under various loading conditions like concentrated, uniformly distributed load and hydrostatic pressure. Navier and Levy's type of solutions for various boundary condition

UNIT-II

Circular plates: Symmetrically loaded, circular plates under various loading conditions, Annular plates.

UNIT-III

Introduction to Shells- Single and double curvature- Equations of Equilibrium of Shells: Derivation of stress resultants, Principles of membrane theory and bending theory.

UNIT-IV

Cylindrical Shells: Derivation of the governing DKJ equation for bending theory, details of Schorer's theory. Application to the analysis and design of short and long shells. Use of ASCE Manual coefficients for the design

UNIT-V

Beam theory of cylindrical shells: Beam and arch action. Design of diaphragms - Geometry analysis and design of elliptic Paraboloid, Conoidal and Hyperbolic Paraboloid shapes by membrane theory.

TEXT BOOKS:

1. Theory of Plates and Shells by S.Timoshenko and Krieger, McGraw-Hill book company, INC, New York, 2nd edition.
2. Analysis of thin concrete plates by K. Chandra Sekhara, New Age International Ltd.

EXPERIMENTAL STRESS ANALYSIS
(ELECTIVE III)

UNIT-I

Introduction and Strain measurement methods – Model & Prototype Dimensional analysis-Factors influencing model design – Scale factors and Model material properties – Methods of model design. Definition of strain and its relation to experimental determinations - properties of strain gauge systems – Mechanical, Optical, Acoustic and Pneumatic types.

UNIT-II

Electrical resistance strain gages: Introduction – gauge construction - strain gauge adhesives - mounting methods – gauge sensitivities and gage factor – performance characteristics of wire and foil strain gauges – environmental effects. Analysis of strain gauge data – the three element rectangular rosette – the delta rosette – correction for transverse sensitivity.

UNIT-III

Non – destructive testing: Introduction – objectives of non destructive testing. Ultrasonic pulse velocity method – Rebound Hammer method (Concrete hammer) – Acoustic Emission- application to assessment of concrete quality.

UNIT-IV

Theory of photo elasticity: Introduction – temporary double refraction - Index ellipsoid and stress ellipsoid – the stress optic law – effects of stressed model in a polariscope for various arrangements - fringe sharpening.

UNIT-V

Two dimensional photo elasticity: Introduction – iso-chromatic fringe patterns – isoclinic fringe patterns – compensation techniques – calibration methods – separation methods – materials for photo- elasticity – properties of photo-elastic materials

.

RELIABILITY ANALYSIS AND DESIGN
(ELECTIVE-III)

UNIT-I

Concepts of Structural Safety: General, Design methods. Basic Statistics: Introduction, Data reduction, Histograms, Sample correlation.

UNIT-II

Probability Theory: Introduction, Random events, Random variables, Functions of random variables, Moments and expectation, Common probability distribution, Extremal distribution.

UNIT-III

Resistance Distributions and Parameters: Introduction, Statistics of properties of concrete, Statistics of properties of steel, Statistics of strength of bricks and mortar, Dimensional variations, Characterization of variables, Allowable stresses based on specified reliability.

UNIT-IV

Probabilistic Analysis of Loads: Gravity loads, Wind load. Basic Structural Reliability: Introduction, Computation of structural reliability. Monte Carlo Study of Structural Safety: General, Monte Carlo method, Applications. Level 2 Reliability Methods: Introduction, Basic variables and failure surface, First-order second-moment methods (FOSM).

UNIT-V

Reliability Based Design: Introduction, Determination of partial safety factors, Safety checking formats, Development of reliability based design criteria, Optimal safety factors, Summary of results of study for Indian standard – RCC design. Reliability of Structural Systems: Preliminary concepts as applied to simple structures.

TEXT BOOKS:

1. “Structural Reliability Analysis and Design” by Ranganatham R, Jaico publications(2005)
2. “Structural Reliability” by Melchers, R.E, published by Wiley (1987), 3rd edition.

ADVANCED CONCRETE TECHNOLOGY

(ELECTIVE-III)

UNIT-I

Durability of concrete and concrete construction: Durability concept, pore structure and transport processes, reinforcement corrosion, fire resistance, frost damage, sulphate attack, alkali silica reaction, delayed ettringite formation, methods of providing durable concrete, short-term tests to assess long-term behavior.

UNIT-II

Mix design: Review of methods and philosophies of IS, BS and ACI methods, mix design for special purposes. Acceptance criteria for compressive strength of concrete

UNIT-III

Special concretes: Lightweight concrete, autoclaved aerated concrete, no-fines concrete, lightweight aggregate concrete and foamed concrete, High strength concrete, refractory concrete, high density and radiation-shielding concrete, polymer concrete, fibre-reinforced concrete, mortars, renders, recycled concrete, Ferro Cement, Self Compacting Concrete.

UNIT-IV

Special processes and technology for particular types of structure: Sprayed concrete, underwater concrete, grouts, grouting and grouted concrete, mass concrete, slip form construction, pumped concrete, concrete for liquid retaining structures, vacuum process, concrete coatings and surface treatments.

UNIT-V

Test methods: Analysis of fresh concrete, Accelerated testing methods, Tests on hardened concrete, Core cutting and testing, partially destructive testing, Non-destructive testing of concrete structure

TEXT BOOKS::

1. Properties of Concrete by A.M.Neville, Longman (1995), 5th edition.
2. Concrete micro-structure, Properties and Materials, P.K.Mehta, J.M.Monteiro, Printice Hall INC & McGraw hill, USA, 4th edition.

INDUSTRIAL STRUCTURES (ELECTIVE –IV)

UNIT-I

Planning and functional requirements- classification of industries and industrial structures- planning for layout- requirements regarding lighting ventilation and fire safety- protection against noise and vibrations.

UNIT-II

Industrial buildings- roofs for industrial buildings (Steel) - design of gantry girder- design of corbels and nibs- machine foundations.

UNIT-III

Design of Folded plates- Design considerations- analysis of folded plates- analysis of multibay folded plates- design of diaphragm beam

UNIT-IV

Power plant structures- Bunkers and silos- chimney and cooling towers-Nuclear containment structures

UNIT-V

Power transmission structures- transmission line towers- tower foundations- testing towers

TEXT BOOKS:

1. Advanced reinforced concrete design, N. Krishnam Raju, CBS publishers Pvt Ltd, 3rd edition.
2. Handbook on machine foundations- P. Srinivasulu and C.V. Vaidyanathan, McGraw-Hill (1976).

BRIDGE ENGINEERING
(ELECTIVE –IV)

UNIT-I

Masonry arch Bridge design details- Rise, radius, and thickness of arch- Arch ring-Dimensioning of sub structures- Abutments pier and end connections.(Ref: IRC- SP-13)

UNIT-II

Super Structure: Slab bridge- Wheel load on slab- effective width method- slabs supported on two edges- cantilever slabs- dispersion length- Design of interior panel of slab- Pigeaud's method- design of longitudinal girders- Guyon-Messonet method- Hendry Jaegar method- Courbon's theory. (Ref: IRC-21), voided slabs, T-Beam bridges.

UNIT-III

Plate girder bridges- Elements of plate girder and their design-web-flange- intermediate stiffener- vertical stiffeners- bearing stiffener-design problem

UNIT-IV

Prestressed Concrete and Composite bridges- Preliminary dimensions-flexural and torsional parameters- Courbon's Theory – Distribution coefficients by exact analysis-design of girder section- maximum and minimum prestressing forces- eccentricity- live load and dead load shear forces- cable zone in girder- check for stresses at various sections- check for diagonal tension- diaphragms and end block design- short term and long term deflections- Composite action of composite brides- shear connectors-composite or transformed section- design problem. (Ref: IRC: Section-VI)

UNIT-V

Sub structure- Abutments- Stability analysis of abutments- piers- loads on piers – Analysis of piers- Design problem(Ref: IRC-13, IRC-21, IRC-78)- Pipe culvert- Flow pattern in pipe culvers- culvert alignment-culvert entrance structure- Hydraulic design and structural design of pipe culverts- reinforcements in pipes .(Ref: IRC: SP-13)

TEXT BOOKS:

1. Design of concrete bridges by Aswini, Vazirani and Ratwani, Khanna publishers (2017).
2. Essentials of bridge engineering- Jhonson Victor D, Oxford IBH publications Pvt Ltd (1980).

EARTH RETAINING STRUCTURES (ELECTIVE –IV)

UNIT-I

Earth pressures – Different types and their coefficients- Classical Theories of Earth pressure – Rankine's and Coulomb's Theories for Active and Passive earth pressure- Computation of Lateral Earth Pressure in Homogeneous and Layered soils- Graphical solutions for Coulomb's Theory in active and passive conditions.

UNIT-II

Retaining walls – different types - Type of Failures of Retaining Walls-Stability requirements – Drainage behind Retaining walls – Provision of Joints – Relief Shells

UNIT-III

Sheet Pile Structures – Types of Sheet piles – Cantilever sheet piles in sands and clays – Anchored sheet piles – Free earth and Fixed earth support methods – Row's moment reduction method – Location of anchors, Forces in anchors.

UNIT-IV

Soil reinforcement – Reinforced earth - Different components – their functions – Mechanics of reinforced earth – Failure modes-Failure theories – Design of Embakments on problematic soils.

UNIT-V

Braced cuts and Cofferdams: Lateral Pressure in Braced cuts – Design of Various Components of a Braced cut – Stability of Braced cuts – Bottom Heave in cuts. – types of cofferdam, suitability, merits and demerits – Design of single – wall cofferdams and their stability aspects

– TVA method and Cummins' methods.

CAD LABORATORY

Analysis and Design using STADD, STRAP, STRUDS, ANSYS

1. Programming for beams subject to different loading (mandatory).
2. Analysis of reinforced concrete multistoried building
3. Analysis of steel transmission line tower
4. Analysis of plane and space truss
5. Analysis of plane and space frame
6. Determination of mode shapes and frequencies of tall buildings using lumped mass (stick model) approximation
7. Wind analysis on tall structure
8. Analysis of pre stressed concrete bridge girder
9. Analysis of Cylindrical shell
10. Modal Analysis of a Cantilever Beam

NOTE: A minimum of eight (including item 1) from the above set have to be conducted.

SYLLABUS FOR M.TECH (POWER SYSTEM CONTROL & AUTOMATION)

I M.TECH-I SEMESTER

Course Code : V18PST01

POWER SYSTEM OPERATION AND CONTROL

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Unit commitment: Introduction, Simple & numeration, Constraints in UCP, UC solutions. Methods-priority list method, Dynamic programming Approach.

UNIT-II

Single area Load Frequency Control: Necessity of keeping frequency constant. Definition of control area, single area control, Block diagram representation of an isolated Power System, Steady State analysis, Dynamic response-Uncontrolled case. Proportional plus Integral control of single area and its block diagram representation, steady state response, load frequency control, Role of AGC. State spare model of an isolated system, pole placement design, optimal control design.

UNIT-III

Two area Load Frequency Control, uncontrolled case and controlled case, tie-line bias control. Optimal two-area LF control-steady state representation, performance Index and optimal parameter adjustment. State space model for a two are system

UNIT-IV

Generation with limited Energy supply, Take-or-pay fuel supply contract, and composite generation production cost function. Solution by gradient search techniques, hard limits and slack variables, Fuel scheduling by linear programming.

UNIT-V

Interchange Evaluation and Power Pools Economy Interchange, Economy interchange Evaluation, Interchange Evaluation with unit commitment, Multiple Interchange contracts. After the-fact production costing, Transmission Losses in transaction Evaluation, other types of Interchange, power pools.

Text Books

1. I.J.Nagrath&D.P.Kothari, “Modern Power System Analysis” Tata McGraw-Hill Publishing Company ltd, 2nd edition.

2. TJE Miller, “Reactive Power Control in Electric Systems”, John Wiley & sons.

I M.TECH-I SEMESTER

Course Code : V18PST02

ADVANCED COMPUTER METHODS IN POWER SYSTEMS

[L : 3; T: 0; P: 0 (3 credits)]

UNIT-I

Network modeling – Single phase and three phase modeling of alternators, transformers and transmission lines, Conditioning of Y Matrix –- Incidence matrix method, Method of successive elimination, Triangular factorization

UNIT-II

Load flow analysis - Newton Raphson method, Fast Decoupled method, AC-DC load flow – Single and three phase methods – Sequential solution techniques and extension to multiple and multi-terminal DC systems.

UNIT-III

Fault Studies -Analysis of balanced and unbalanced three phase faults – fault calculations – Short circuit faults – open circuit faults

UNIT-IV

System optimization - strategy for two generator systems – generalized strategies – effect of transmission losses - Sensitivity of the objective function - Formulation of optimal power flow-solution by Gradient method-Newton's method

UNIT-V

State Estimation – method of least squares – statistics – errors – estimates – test for bad data – structure and formation of Hessian matrix – power system state estimation

Test Books:

1. Grainger, J.J. and Stevenson, W.D. "Power System Analysis" Tata McGraw hill, New Delhi, 2003.
2. G W Stagg and A H El Abiad, "Computer Methods in Power System Analysis", McGraw Hill, 1968

I M.TECH-I SEMESTER
Course Code : V18PST03

ADVANCED POWER SYSTEM PROTECTION

[L: 3; T: 0; P : 0 (3 credits)]

UNIT-I

Static Relays: Advantages of static relays-Basic construction of static relays-Level detectors-Replica impedance –Mixing circuits-General equation for two input phase and amplitude comparators-Duality between amplitude and phase comparators.

Amplitude Comparators: Circulating current type and opposed voltage type- rectifier bridge comparators, Direct and Instantaneous comparators, Static Over Current Relays**,**Differential Relays

UNIT-II

Static Distance Relays: Static impedance-reactance–MHO and angle impedance relay-sampling comparator –realization of reactance and MHO relay using sampling comparator.

Phase Comparators: Coincidence circuit type- block spike phase comparator, techniques to measure the period of coincidence-Integrating type-Rectifier and Vector product type- Phase comparators.

UNIT-III

Multi-Input Comparators: Conic section characteristics-Three input amplitude comparator –Hybrid comparator-switched distance schemes –Poly phase distance schemes- phase fault scheme –three phase scheme – combined and ground fault scheme. POWER SWINGS: Effect of power swings on the performance of distance relays –Power swing analysis-Principle of out of step tripping and blocking relays-effect of line and length and source impedance on distance relays.

UNIT-IV

Microprocessor Based Protective Relays (Block diagram and flowchart approach only)

Over current relays–impedance relays-directional relay-reactance relay .Generalized mathematical expressions for distance relays-measurement of resistance and reactance –MHO and offset MHO relays-Realization of MHO characteristics-Realization of offset MHO characteristics -Basic principle of Digital computer relaying.

UNIT-V

Digital Protection: Application of wavelet protection to power system protection- transmission line protection, transformer protection, synchronous generator protection. Numerical differential protection of generator and transformers.

Text Books

1. Badri Ram and D.N.Vishwakarma, "Power system protection and Switch gear", TMH publication New Delhi 1995.
2. T.S. MadhavaRao, "Power system protection Static relays", TMH 2nd edition 1981

Reference Books

1. Mason, "The Art and Science of protective relaying", Wiley Eastern Ltd
2. C.L. Wadhwa, "Electrical power systems", New Age International (P) Limited

I M.TECH-I SEMESTER

Course Code : V18PST04

MICRO CONTROLLERS AND APPLICATIONS

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

INTRODUCTION TO MICROCONTROLLERS

Overview of 8 bit and 16 bit Microcontrollers, CISC & RISC Processors, Harvard & Von-Neumann architectures, features of 8051 Micro Controller, PIN diagram, architecture, Memory organization, Different modes of operation of timer/counters.

UNIT II

PROGRAMMING OF 8051

Instruction set, Addressing modes, sample programs, introduction to embedded C, simple programs, development tools.

UNIT III

REAL TIME CONTROL: INTERRUPTS

Interrupt handling structure of an MCU – Interrupt Latency and Interrupt deadline – Multiple sources of the interrupts – Non-maskable interrupt sources – Enabling or Disabling of the sources – Polling to determine the Interrupt source and assignment of the priorities among them –Interrupt structure in Intel 8051.

UNIT IV

INTERFACING

LEDs & switches interfacing, keypad interfacing, Seven Segment Display interfacing, ADC & DAC interfacing, 2X16 LCD interfacing, stepper motor interfacing, serial port interfacing, high power devices, simple calculator development.

MICROCONTROLLER BASED INDUSTRIAL APPLICATIONS

Optical motor shaft encoders – Industrial control – Industrial process control system – Prototype MCU based Measuring instruments

UNIT V

PIC MICROCONTROLLERS

Overview and features, architecture of PIC 16C6X/7X, PIC memory organization, PIC 16C6X/7X instructions, addressing modes, I/O ports, Interrupts in PIC 16C61/71, PIC 16C61/71 timers.

UNIT VI

ARM 32 Bit MCUs:

Introduction to 16/32 Bit processors–ARMarchitecture and organization – ARM / Thumb programming model – ARM / Thumb instruction set.

Text Books

1. Kenneth J Ayala, "The 8051Microcontrollers: Architecture, Programming & Applications", Second Edition, Penram International Publishing (India).
2. A.V. Deshmukh, "Microcontrollers (Theory & Applications)", 6th Reprint, TMH, 2007.

Reference Books

2. Mazidi and Mazidi, "The 8051 Microcontroller and Embedded Systems", 4th impression, PHI, 2000.

I M.TECH-I SEMESTER

Course Code : V18PST05

POWER SYSTEM RELIABILITY (ELECTIVE – I)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Basic probability theory – rules for combining probabilities of events – Bernoulli's trials – probability density and distribution functions – binomial- distributions – expected value and standard deviation ofbinomial distribution.

UNIT -II

Network Modelling and Reliability Analysis of Series, Parallel, Series- Parallel networks – complex networks – decomposition method Reliability functions f(t), F(t), R(t), h(t) and their relationship – exponential distributions – Expected value and standard deviation of exponential distribution – Bath tub curve – reliability analysis of series parallel networks using exponential distribution – reliability measures MTTF, MTTR, MTBF.

UNIT –III

Markov chains – concept of stochastic transitional probability Matrix, Evaluation of limiting state Probabilities – Markov processes one component repairable system – time dependent probability evaluation using Laplace transform approach – evaluation of limiting state probabilities using STPM – two component repairable models – Frequency and duration concept – Evaluation of frequency of encountering state, mean cycletime, for one, two component repairable models – evaluation of cumulative probability and cumulative frequency of encountering merged states.

UNIT-IV

Generation system reliability analysis – reliability model of a generation system – recursive relation for unit addition and removal – load modelling – merging of generation load model – evaluation of transition rates for merged state model – cumulative Probability, cumulative frequency of failure evaluation – LOLP, LOLE.

UNIT-V

Composite system reliability analysis decomposition method – distribution system reliability analysis – radial networks – weather effects on transmission lines – Evaluation of load and energy indices.

Text Books

1. R.Billinton, R.N.Allan, "Reliability Evaluation of Engineering System", Plenum Press, New York.
2. R.Billinton, R.N.Allam, "Reliability Evaluation of Power System", Plenum Press, New York
3. Sharies E Ebeling, "An Introduction to Reliability and Maintainability Engineering", TATA McGraw Hill – Edition

Reference Books

2. Syed Ali, "Digital switching systems" system reliability and analysis", McGraw-Hill ,1997.

I M.TECH-I SEMESTER

Course Code : V18PST06

APPLICATION OF AI TECHNIQUES IN POWER SYSTEMS (ELECTIVE – I)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Artificial Neural Networks:

Introduction Models of Neuron Network – Architectures – Knowledge representation – Artificial Intelligence and Neural networks–Learning process – Error correction learning – Hebbian learning – Competitive learning – Boltzman learning –Supervised learning – Unsupervised learning – Reinforcement learning – learning tasks.

UNIT-II

ANN Paradigms:

Multi – layer perceptron using Back propagation Algorithm (BPA) – Self – Organizing Map (SOM) – Radial Basis Function Network – Functional Link Network (FLN) – Hopfield Network.

UNIT-III

Fuzzy Logic:

Introduction – Fuzzy versus crisp – Fuzzy sets – Membership function – Basic Fuzzy set operations – Properties of Fuzzy sets – Fuzzy Cartesian Product – operations on Fuzzy relations – Fuzzy-logic – Fuzzy Quantifiers–Fuzzy Inference – Fuzzy Rule based system–Defuzzification methods.

UNIT-IV

Genetic Algorithms:

Introduction–Encoding – Fitness Function–Reproduction operators–Genetic Modeling – Genetic operators–Cross over – Single site cross over – Two point cross over – Multi point cross over – Uniform cross over – Matrix cross over–Cross over Rate –Inversion & Deletion – Mutation operator–Mutation – Mutation Rate–Bit–wise operators –Generational cycle – convergence of Genetic Algorithm.

UNIT-V

Applications of AI Techniques:

Load forecasting – Load flow studies – Economic load dispatch – Load frequency control – Single area system and two area system – Small Signal Stability (Dynamic stability) Reactive power control – speed control of DC and AC Motors.

Text books:

1. S.Rajasekaran and G.A.V.Pai,"Neural Networks, Fuzzy Logic & Genetic Algorithms", PHI, New Delhi, 2003.
2. Rober J. Schalkoff, "Artificial Neural Networks", Tata McGraw Hill Edition, 2011

Reference Books:

1. S. Rajasekaran and G.A.V. Pai"Neural Networks, Fuzzy Systems And Evolutionary Algorithms : Synthesis And Applications",PHI, New Delhi

I M.TECH-I SEMESTER

Course Code **:** V18PST07

ELECTRICAL DISTRIBUTION SYSTEMS (ELECTIVE – I)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT- I

General : Introduction to Distribution systems, an overview of the role of computers in distribution system planning-Load modeling and characteristics: definition of basic terms like demand factor, utilization factor, load factor, plant factor, diversity factor, coincidence factor, contribution factor and loss factor-Relationship between the load factor and loss factor - Classification of loads (Residential, Commercial, Agricultural and Industrial) and their characteristics.

UNIT-II

Distribution Feeders and Substations

Design consideration of Distribution feeders: Radial and loop types of primary feeders, voltage levels, feeder-loading. Design practice of the secondary distribution system.

Location of Substations: Rating of a Distribution Substation, service area with primary feeders. Benefits derived through optimal location of substations. Distributed Generation placement and modelling.

UNIT -III

System Analysis: Voltage drop and power loss calculations - Derivation for volt-drop and power loss in lines, manual methods of solution for radial networks, three-phase balanced primary lines, non-three-phase primary lines.

UNIT- IV

Protective devices and coordination: Objectives of distribution system protection, types of common faults and procedure for fault calculation. Protective Devices: Principle of operation of fuses, circuit reclosers, line sectionalizer and circuit breakers. Coordination of protective devices General coordination procedure.

UNIT -V

Capacitive compensation for power factor control: Different types of power capacitors, shunt and series capacitors, effect of shunt capacitors (Fixed and Switched) power factor correction, capacitor location. Economic justification. Procedure to determine the best capacitor location. Voltage Control - Equipment for voltage control, effect of series capacitors, effect of AVB/AVR, line drop compensation.

I M.TECH-I SEMESTER
Course Code : V18PST08

POWER SYSTEM SECURITY (ELECTIVE – I)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Short circuit analysis techniques in AC power Systems- Simulation of short circuit and open circuit faults using network theorems- fixed impedance short circuit analysis techniques-time domain short circuit analysis in large scale power systems- analysis of time variation of AC and DC short circuit components.

UNIT-II

Fixed impedance Short circuit analysis of large scale power systems general analysis of balanced, unbalanced and open circuit faults- 3- phase short circuit analysis in large scale power systems, Network equivalents and practical short circuit current assessments in large scale Ac power systems - uncertainties in short circuit current calculations.

UNIT-III

Risk assessment and safety considerations-control and limitation of high short circuit currents-limitation of short circuit currents in power system operation, Types of short circuit fault current limiters and their applications.

UNIT-IV

Power System Security analysis- concept of security- security analysis and monitoring- factors affecting power system security- detection of network problems, contingency analysis for generator and line outages by ILPF method – fast decoupled inverse Lemma-based approach, network sensitivity factors.

UNIT-V

Computer control power systems – need for real time and computer control of power systems-operating states of power system – SCADA implementation considerations – software requirements for implementing above functions.

Reference Books

I M.TECH-I SEMESTER

Course Code : V18PST09

REACTIVE POWER COMPENSATION & MANAGEMENT (ELECTIVE – II)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Load Compensation Objectives and specifications – reactive power characteristics – inductive and capacitive approximate biasing – Load compensator as a voltage regulator – phase balancing and power factor correction of unsymmetrical loads- examples.

UNIT- II

Reactive power compensation in transmission system: Steady state - Uncompensated line – types of compensation – Passive shunt and series and dynamic shunt compensation – examples Transient state - Characteristic time periods – passive shunt compensation – static compensations- series capacitor compensation –compensation using synchronous condensers – examples

UNIT-III

Reactive power coordination: Objective – Mathematical modelling – Operation planning – transmission benefits – Basic concepts of quality of power supply – disturbances- steady –state variations – effects of under voltages – frequency – Harmonics, radio frequency and

Electromagnetic interferences

UNIT-IV

Distribution side Reactive power Management: System losses –loss reduction methods – examples – Reactive power planning – objectives – Economics Planning capacitor placement – retrofitting of capacitor banks User side reactive power management: KVAR requirements for domestic appliances – Purpose of using capacitors – selection of capacitors – deciding factors – types of available capacitor, characteristics and Limitations

UNIT-V

Reactive power management in electric traction systems and are furnaces: Typical layout of traction systems – reactive power control requirements – distribution transformers- Electric arc furnaces – basic operations- furnaces transformer –filter requirements – remedialmeasures –power factor of an arc furnace

Text Books/ Reference Books

I M.TECH-I SEMESTER

Course Code : V18PST10

POWER QUALITY (ELECTIVE – II)

[L: 3; T:0; P: 0 (3 credits)]

UNIT-I: Introduction

Overview of Power Quality - Concern about the Power Quality - General Classes of PowerQuality Problems – Transients -Long-Duration Voltage Variations - Short-Duration VoltageVariations - Voltage Unbalance - Waveform Distortion - Voltage fluctuation - Power FrequencyVariations - Power Quality Terms - Voltage Sags and Interruptions - Sources of Sags andInterruptions – Nonlinear loads.

UNIT-II: Transient Over Voltages

Source of Transient over Voltages - Principles of Over Voltage Protection - Devices for OverVoltage Protection - Utility Capacitor Switching Transients - Utility Lightning Protection – LoadSwitching Transient Problems - Computer Tools for Transient Analysis

UNIT-III: Harmonic Distortion and solutions

Voltage vs. Current Distortion - Harmonics vs. Transients - Power System Quantities underNonsinusoidal Conditions - Harmonic Indices – Sources of harmonics - Locating Sources ofHarmonics – System Response Characteristics - Effects of Harmonic Distortion – Interharmonics-Harmonic Solutions Harmonic Distortion Evaluation - Devices for Controlling HarmonicDistortion - Harmonic Filter Design - Standards on Harmonics

UNIT- IV: Long Duration Voltage Variations

Principles of Regulating the Voltage - Device for Voltage Regulation - Utility Voltage RegulatorApplication - Capacitor for Voltage Regulation - End-user Capacitor Application – RegulatingUtility Voltage with Distributed Resources – Flicker

UNIT-V: Distributed Generation and Power Quality

Resurgence of Distributed Generation - DG Technologies - Interface to the Utility System -Power Quality Issues - Operating Conflicts - DG on Low Voltage Distribution Networks -Interconnection standards - Wiring and Grounding - Typical Wiring and Grounding Problems -Solution to Wiring and grounding Problems

I M.TECH-I SEMESTER
Course Code : V18PST11

POWER SYSTEM TRANSIENTS (ELECTIVE – II)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Basic Concepts and Simple Switching Transients: Switching an RL,RC,RLC circuits

Transients Analysis of Three-Phase power Systems: Symmetrical components in Three-phase Systems, Sequence Components for Unbalanced Network Impedances, the Sequence Networks, analysis of Unsymmetrical Three-Phase Faults-single line-to-Ground Fault, Three phase-to-ground fault.

UNIT -II

Travelling Waves: Velocity of Travelling waves and Characteristic Impedance, Energy Contents of Travelling Waves, Attenuation and Distortion of Electromagnetic Waves, telegraph equations-lossless line, distortion less line, Reflection and Refraction of Travelling Waves, Reflection of Travelling Waves against Transformer-and-Generator windings, the Origin Transient Recovery voltages, bewley-lattice diagram. travelling waves and multi conductor system.

UNIT-III

Switching Transients: Arc interruption in circuit breaker, transient recovery voltage, arc-circuit interaction, interruption of capacitive currents, interruption of inverse currents, interruption of fault current in transmission line and transformers.

UNIT-IV

Power System Transient Recovery Voltages: Characteristics of the Transient Voltage- Short-circuit test duties based on IEC 60056 (1987),ANSI/IEEE Standards, the Harmonization between IEC and ANSI/ IEEE Standards with respect to Short-circuit Test duties, transient recovery voltage for Different types of faults.

UNIT-V

Lightning –Induced Transients: Mechanism of Lightning, wave shape of the lightning current, direct lighting Stroke to transmission line towers, direct lightening stroke to a line, lightning protection scheme. Numerical simulation of electrical transients, The Electromagnetic Transient Program, principles of numerical techniques used in transient simulation.

Text Books

I M.TECH-I SEMESTER

Course Code : V18PST12

VOLTAGE STABILITY (ELECTIVE – II)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Reactive Power flow and voltage stability in power systems: Physical relationship indicating dependency of voltage on reactive power flow - reactive power, transient stability; Q-V curve; definition of voltage stability, voltage collapse and voltage security. Voltage collapse phenomenon, Factors of voltage collapse, effects of voltage collapse, voltage collapse analysis.

UNIT-II

Power system loads: Load characteristics that influence voltage stability such as – Discharge lighting, Induction motor, Air conditioning and heat pumps, Electronic power supplies, Over Headlines and cables.

UNIT-III

Reactive Power compensation: Generation and absorption of reactive power – Reactive power compensators & voltage controllers: - shunt capacitors, synchronous phase modifier – static VAR system – on load tap changing transformer, booster transformers.

UNIT-IV

Voltage stability static indices : Development of voltage collapse index – power flow studies – singular value decomposition – minimum singular value of voltage collapse – condition number as voltage collapse index.

UNIT-V

Voltage stability margins & Improvement of voltage stability: Stability margins, voltage stability margin of uncompensated and compensated power system. Dynamic voltage stability – voltage security, Methods of improving voltage stability and its practical aspects.

Text Books

1. Chakrabarti, D.P.Kothari, A.K. Mukhopadhyay, “Performance operation and control of EHV power transmission Systems”, A H Wheeler Publishing Co Ltd
2. C.W. Taylor, “Power System Voltage Stability”, Mc. Graw Hill, 1994

Reference Books

1. Francis T.S. Yu, “Electric power system dynamics”, Academic Press
2. PrabhaKundur, “Power system stability & control” , Mc. Graw Hill Education.
3. K.R. Padiyar“Power system Dynamics, stability & control”, BS publications.

Course Code : V18PSL01

POWER SYSTEMS LAB-I

[L: 0; T: 0; P: 4 (2 credits)]

Any 10 of the following experiments are to be conducted

1. Formation of Y- Bus by Direct-Inspection Method.
2. Load Flow Solution Using Gauss-Siedel Method
3. Load Flow Solution Using Newton Raphson Method
4. Formation of Z-Bus by Z-bus building algorithm
5. Unsymmetrical Fault analysis using Z-bus
6. Economic Load Dispatch with transmission losses
7. Economic Load Dispatch without transmission losses
8. Transient Stability Analysis Using Point By Point Method
9. Load Frequency Control of Single Area Control& with andwithout controllers.
10. Load Frequency Control of Two AreaControlsystem with andwithout controllers
11. Load Flow Solution Using Fast De-coupled Method.
12. Symmetrical Fault analysis using Z-bus

I M.TECH-II SEMESTER

Course Code : V18PST13

MODERN CONTROL THEORY

[L: 3; T: 0; P: 0 (3 credits)]

UNIT –I

State Variable Analysis: The concept of state – State Equations for Dynamic systems – State diagram---- Linear Continuous time model for physical systems – Existence and Uniqueness of Solutions toContinuous – Time State Equations – Solutions – Linear Time Invariant Continuous – Time State Equations – State transition matrix and it's properties

UNIT – II

State Variable Techniques: General concept of Controllability – General concept of Observability Controllability tests for Continuous &Time Invariant systems - Observability tests for Continuous &Time Invariant systems - Controllability and Observability of state model in Jordan Canonical form - Controllability and Observability Canonical forms of State model – State feedback controller design through pole assignment.

UNIT – III

Non Linear Systems – 1: Introduction – Non Linear Systems – Types of Non – Linarites – Saturation – Dead – Zone – Backlash – Jump Phenomenon etc. - Singular Points – Introduction to Linearization ofnonlinear systems, properties of Non Linear Systems – Describing function – describing function analysis of nonlinear systems- Stability analysis of Non – Linear systems through describing functions.

UNIT – IV

Non Linear Systems – 11: Introduction to phase – plane analysis, Method of Isoclines for Constructing Trajectories, singular points, phase – plane analysis of nonlinear control systems.

UNIT – V

Stability Analysis Stability in the sense of Lyapunov, Lyapunov's stability and Lyapunov's instability theorems – Stability Analysis of the Linear Continuous time invariant systems by Lyapunovsecondmethod – Generation of Lyapunov functions – Variable gradient method – Krasooviski's method.

Text Books

1. M. Gopal, "Modern Control System Theory", New Age International – 1984

2. Ogata. K, "Modern Control Engineering", Prentice Hall – 1997

I M.TECH-II SEMESTER

Course Code : V18PST14

POWER SYSTEM DYNAMICS AND STABILITY

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I: System Dynamics

Synchronous machine model in state space: Synchronous Machine: Basic equations of a synchronous machine, dq0 Transformation and Park's transformation-

Computer representation for excitation and governor system – modeling of loads and induction machines.

UNIT-II: stability

Fundamental Concepts of Stability -Classification of Stability-

Steady state stability – steady state stability limit – Dynamics Stability limit – Dynamic stability analysis – State space representation of synchronous machine connected to infinite bus- time response – Stability by eign value approach.

UNIT-III:Simulation of Transient Stability

Equations of Motion: Swing Equation, calculation of inertia constant- Representation of loads – Alternate cycle solution method – Direct method of solution – Solution

Techniques: Modified Euler method – RungeKutta method – Concept of multi machine stability.

UNIT-IV: Excitation Systems

Excitation System Requirements, Elements of an Excitation System,

Types of Excitation System: Rotating Self-excited Exciter with direct acting Rheostatic type voltage regulator – Rotating main and Pilot Exciters with Indirect Acting Rheostatic Type Voltage Regulator – Rotating Main Exciter, Rotating Amplifier and Static Voltage Regulator – Static excitation scheme – Brushless excitation system - Effect of excitation on power system stability

UNIT-V: Speed Governing systems

Block diagram of speed governing system- Effect of governor action on power system stability- Effect of saturation, saliency & automatic voltage regulators on stability.

Text Books

3. R. Ramanujam, "Power System Dynamics, Analysis and Simulation", PHI Learning, New Delhi, January 2010.

I M.TECH-II SEMESTER

Course Code : V18PST15

SOLAR & WIND ENERGY

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

SOLAR RESOURCES : Solar Energy - Availability - Solar radiation data and measurement - Estimation of average solar radiation - Solar water heater types – Heat balance – Flat plate collector efficiency – Efficiency of heat removal - Thermo siphon flow calculation - Forced circulation calculation - Evacuated collectors - Basics of solar concentrators- Solar Energy Applications - Solar air heaters – Solar Chimney - Crop driers – Passive solar system - Active solar systems - Water desalination – Principle of solar ponds.

.

UNIT-II

SOLAR PHOTOVOLTAICS: The Photo Voltaic effect- p-n junction-different types of photovoltaic cells- PV cell characteristics- Effect of variation of temperature, insolation level & tilt angle on the characteristics- equivalent circuits- temperature effects on conversion efficiency- Fabrication and costs of PV cell.

PV SYSTEMS : Photovoltaic modules- module specifications- bypass diodes-PV arrays and PV systems- cabling, earthing and lightning protection- Battery storage: Lead and Nickel cadmium batteries- Charge regulators-LVD circuit-Voltage and current Source Inverters. Tracking Systems-Maximum power point tracking.

UNIT-III

WIND ENERGY-I: Nature of wind – Characteristics – Variation with height and time – Power in wind – Aerodynamics of Wind turbine – Momentum theory – Basics of aerodynamics – Aero foils and their characteristics– Wind turbine loads – Aerodynamic loads in steady operation – Yawed operation and tower shadow.

UNIT-IV

WIND ENERGY-II: Siting – Rotor selection –Annual energy output – Horizontal axis wind turbine (HAWT) – Vertical axis wind turbine (VAWT) – Rotor design considerations – Number of blades – Solidity - Blade profile – Upwind/Downwind – Yaw system – Tower – Braking system - Synchronous and asynchronous generators and loads – Integration of wind energy converters to electrical networks – Inverters – Control system – Requirement and strategies

UNIT-V

PV&WIND SYSTEM APPLICATIONS: Autonomous system; Grid Linked systems; Remote applications, System sizing; System Performance; Economics and future prospects.

I M.TECH-II SEMESTER

Course Code : V18PST16

REAL TIME CONTROL OF POWER SYSTEMS

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

State Estimation. Operating states of power systems. Different types of State Estimations, Theory of WLS state estimation, sequential and non-sequential methods to process measurements. Bad data observability, Bad data detection, identification and elimination.

UNIT-II

Security and Contingency Evaluation-Security concept, Security Analysis and monitoring, Contingency Analysis for Generator and line outages by iterative linear power flow method, and network sensitivity methods.

UNIT-III

Computer Control of Power Systems-Need for real time and computer control of power systems, SCADA - Supervisory control and Data Acquisition systems implementation considerations, energy control centres. Role of PMU in real time control.

UNIT-IV

Voltage Stability, voltage collapse, and voltage security, relation of voltage stability to rotor angle stability. Voltage stability analysis Introduction to voltage stability analysis `P-V'curves and `Q-V' curves, voltage stability in mature power systems, long-term voltage stability, power flow analysis for voltage stability, voltage stability static indices and Research Areas.

UNIT-V

Application of AI and ANN in Power System: Basic concepts and definitions, algorithms for load flow, short term load forecasting, fault diagnosis and state estimation.

Text Books

1. Allen J. Wood and Bruce F. Wollenberg "Power Generation, Operation & Control" 2nd edition, John Wiley and Sons.

2. I.J. Nagarath& D. P. Kothari , "Modern power system analysis" 4th Edition, TMH

ELECTRIC AND HYBRID VEHICLES (ELECTIVE-III)

[L: 3; T: 0; P: 0 (3 credits)]

Unit-I:

Introduction to Hybrid Electric Vehicles: History of hybrid and electric vehicles, social and environmental importance of hybrid and electric vehicles, impact of modern drive-trains on energy supplies.

Conventional Vehicles: Basics of vehicle performance, vehicle power source characterization & transmission characteristics.

Unit-II:

Hybrid Electric Drive-trains: Basic concept of hybrid traction, introduction to various hybrid drive-train topologies, power flow control in hybrid drive-train topologies, fuel efficiency analysis.

Electric Drive-trains: Basic concept of electric traction, introduction to various electric drive-train topologies, power flow control in electric drive-train topologies, fuel efficiency analysis.

Unit-III:

Electric Propulsion unit: Introduction to electric components used in hybrid and electric vehicles, Configuration and control of DC Motor drives, Configuration and control of Induction Motor drives

Unit-IV:

Energy Storage: Introduction to Energy Storage Requirements in Hybrid and Electric Vehicles, Battery based energy storage and its analysis, Fuel Cell based energy storage and its analysis, Hybridization of different energy storage devices

Unit-V:

Sizing the drive system: Matching the electric machine and the internal combustion engine (ICE), Sizing the propulsion motor, sizing the power electronics, selecting the energy storage technology, Communications, supporting subsystems.

Energy Management Strategies: Introduction to energy management strategies used in hybrid and electric vehicles, classification of different energy management strategies, comparison of different energy management strategies.

Text Books:

1. Iqbal Hussein, "Electric and Hybrid Vehicles, Design Fundamentals", CRC Press, 2003.
2. James Larminie, "Electric Vehicle Technology Explained", John Wiley & Sons, 2003.

I M.TECH-II SEMESTER
Course Code: V18PST18

POWER SYSTEM DEREGULATION (ELECTIVE – III)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Need and conditions for deregulation. Introduction of Market structure, Market Architecture, Spot market, forward markets and settlements. Review of Concepts marginal cost of generation, least-cost operation, incremental cost of generation. Power System Operation ion deregulated environment and Indian Electricity act.

UNIT-II

Electricity sector structures and Ownership /management, the forms of Ownership and management. Different structure model like Monopoly model, Purchasing agency model, wholesale competition model, Retail competition model.

UNIT-III

FRAMEWORK and methods for the analysis of Bilateral and pool markets, LMP based markets, auction models and price formation, price based unit commitment, country practices.

UNIT-IV

Transmission network and market power. Power wheeling transactions and marginal costing, transmission costing. Congestion management methods- market splitting, counter-trading; Effect of congestion on LMPs- country practices

UNIT-V

Ancillary Services and System Security in Deregulation. Classifications and definitions, AS management in various markets- country practices. Technical, economic, & regulatory issues involved in the deregulation of the power industry.

Text Books

1. S. Stoft, "Power System Economics: Designing markets for electricity"
2. J. Wood and B. F. Wollenberg, "Power generation, operation and control",
3. K. Bhattacharya, M.H.J. Bollen and J.E. Daalder, "Operation of restructured power systems"
4. LoiLeiLai, "Power system restructuring & Deregulation", Wiley publications.

Reference Books

1. M. Shahidehpour, H. Yamin and Z. Li, "Market operations in electric power systems- Forecasting, Scheduling, and Risk Management" , A JOHN WILEY & SONS, INC., PUBLICATION
2. S. Kirschen and G. Strbac, "Fundamentals of power system economics", Wiely publications

I M.TECH-II SEMESTER

Course Code : V18PST19

SMART GRID (ELECTIVE – III)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Introduction to Smart Grid: Evolution of Electric Grid, Concept of Smart Grid, Definitions, Need of Smart Grid, Functions of Smart Grid, Opportunities & Barriers of Smart Grid, Difference between conventional & smart grid, Concept of Resilient & Self-Healing Grid, Present development& International policies on Smart Grid. Case study of Smart Grid.

UNIT-II

Smart Grid Technologies: Part 1: Introduction to Smart Meters, Real Time Prizing, Smart Appliances, Automatic Meter Reading (AMR), Outage Management System (OMS), Plug in Hybrid Electric Vehicles (PHEV), Vehicle to Grid, Smart Sensors, Home & Building Automation, Phase Shifting Transformers.

UNIT-III

Smart Grid Technologies: Part 2: Smart Substations, Substation Automation, Feeder Automation. Geographic Information System (GIS), Intelligent Electronic Devices (IED) & their application for monitoring & protection, Smart storage like Battery, SMES, Pumped Hydro, Compressed Air Energy Storage, Wide Area Measurement System (WAMS), Phase Measurement Unit (PMU).

UNIT-IV

Microgrids and Distributed Energy Resources: Concept of micro grid, need & applications of micro grid, formation of microgrid, Issues of interconnection, protection & control of microgrid. Plastic & Organic solar cells, Thin film solar cells, Variable speed wind generators, fuelcells, microturbines, Captive power plants, Integration of renewable energy sources.

UNIT-V

Power Quality Management in Smart Grid: Power Quality & EMC in Smart Grid, Power Quality issues of Grid connected Renewable Energy Sources, Power Quality Conditioners for Smart Grid, Web based Power Quality monitoring, Power Quality Audit.

Information and Communication Technology for Smart Grid: Advanced Metering Infrastructure (AMI), Home Area Network (HAN), Neighborhood Area Network (NAN), Wide Area Network (WAN).

Text Books:

Course Code : V18PST20

HIGH VOLTAGE ENGINEERING (ELECTIVE – III)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Generation of High AC & DC Voltages: Direct Voltages: AC to DC conversion methods electrostatic generators-Cascaded Voltage Multipliers.

Alternating Voltages: Testing transformers-Resonant circuits and their applications, Tesla coil.

UNIT-II

Generation of Impulse Voltages: Impulse voltage specifications-Impulse generations circuits-Operation, construction and design of Impulse generators-Generation of switching and long duration impulses.

Impulse Currents: Generation of High impulse currents and high current pulses.

UNIT-III

Measurement of High AC & DC Voltages: Measurement of High D.C. Voltages: Series resistance meters, voltage dividers and generating voltmeters.

Measurement of High A.C. Voltages: Series impedance meters electrostatic voltmeters potential transformers and CVTS-voltage dividers and their applications.

Measurement of Peak Voltages: Chubb-Fortesque methods.

Measurement of Impulse Voltages &Currents: Voltage dividers and impulse measuring systems Faraday generators

UNIT-IV

High Voltage Testing of Power Apparatus: Need for testing standards– Standards for porcelain/Glass insulators-Classification of porcelain/glass insulator tests – Tests for cap and pin porcelain/Glass insulators.

UNIT-V

High voltage AC testing methods-Power frequency tests-Over voltage tests on insulators, Isolators, Circuit Breakers and power cables

Impulse Testing: Impulse testing of transformers, insulators, Surge diverters, Bushings, cables, circuit breakers.

Text Books

Course Code : V18PST21

CUSTOM POWER DEVICES (ELECTIVE – IV)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT- I

Introduction Custom Power and Custom Power Devices - power quality variations in distribution circuits –Voltage Sags, Swells, and Interruptions - System Faults – Over voltages and Under voltages - Voltage Flicker - Harmonic Distortion - Voltage Notching – Transient Disturbances - Characteristics of Voltage Sags.

UNIT-II

Overview of Custom Power Devices Reactive Power and Harmonic Compensation Devices Compensation Devices for Voltage Sags and Momentary Interruptions - Backup Energy Supply Devices – Battery UPS – Super Conducting Magnetic Energy Storage systems – Flywheel – Voltage Source Converter - Multi-level converters.

UNIT-III

Reactive Power and Harmonic Compensation Devices Var control devices - Static Var Compensator – Topologies - Direct Connected Static Var Compensation for Distribution Systems – Static Series Compensator - Static Shunt Compensator (DSTATCOM) – Interaction with Distribution Equipment and System - Installation Considerations.

UNIT- IV

High-Speed Source Transfer Switches, Solid State Limiting, And Breaking Devices: Source Transfer Switch - Static Source Transfer Switch (SSTS) - Hybrid source transfer switch – High-speed mechanical source transfer switch - Solid state current limiter - Solid state breaker.

UNIT-V

Application of Custom Power Devices in Power Systems P-Q theory – Control of P and Q – Dynamic Voltage Restorer (DVR) – Operation and control – Interline Power Flow Controller (IPFC) – Operation and control – Unified Power Quality Conditioner (UPQC) – Operation and control. Recent custom power devices.

Text Books

EHVAC TRANSMISSION (ELECTIVE – IV)

[L: 3; T: 0; P: 0 (3 credits)]

Unit-1: E.H.V.A.C. Transmission line trends and preliminary aspect standard transmission voltages – Estimation at line and ground parameters - Bundle conductor systems inductance and capacitance of E.H.V. lines – positive, negative and zero sequence impedance.

Unit-2: Electrostatic field and voltage gradients – calculations of electrostatic field of AC lines – effect high electrostatic field on biological organisms and human beings surface voltage gradients and maximum gradients of actual transmission lines

Unit-3: Electrostatic induction in unenergised lines – measurements of field and voltage gradients for three phase single and double circuit lines – unenegised lines. Power Frequency Voltage control and over voltages in EHV lines: No load voltage – charging currents at power frequency - voltage control

Unit 4: shunt and series compensation – static VAR compensation. Corona in E.H.V. lines – Corona loss formulae attention of traveling waves due to Corona – Audio noise due to Corona, its generation, characteristic and limits

Unit 5: Measurements of audio noise radio interference due to Corona RF properties of radio noise – frequency spectrum of RI fields. Design of EHV lines based on steady state and transient limits.

I M.TECH-II SEMESTER

Course Code : V18PST23

DEMAND SIDE ENERGY MANAGEMENT (ELECTIVE – IV)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I

Energy Audit and Energy management information systems: Energy audit: Definitions-Need-concepts-Types of energy audit;

Energy Economics: Introduction-Cost benefit risk analysis-Payback period-Straight line depreciation-Sinking fund depreciation—Reducing balance depreciation-Net present value method-Internal rate of return method.

UNIT-II

Energy Conservation in Electric utilities and Industry: Electrical load management: Energy and load management devices-Conservation strategies; conservation in electric utilities and industry: Introduction- Energy conservation in utilities by improving load factor-Utility voltage regulation-Energy conservation in Industries.

UNIT-III

Energy –efficient electric motors: Energy efficient motors-construction and technical features-performance characteristics; Economics of EEMs and system: life cycle-direct savings and payback analysis-efficiency factor.

UNIT-IV

Electric Lighting: Introduction-Need for an energy management program-Building analysis-Modification of existing systems- Replacement of existing systems-priorities

Illumination requirement: Task lighting requirements-lighting levels system modifications-non illumination modifications-lighting for non-task areas-reflectance-space geometry; System elements: light sources - characteristics of families of lamps-lamp substitution in an existing systems-selection of Higher efficiency lamps for a new system- Luminaries-ballasts-energy conservation in lighting.

UNIT-V

Space Heating, Ventilation, Air-Conditioning (HVAC) and Water Heating: Introduction-Heating of buildings-Transfer of Heat-Space heating methods-Ventilation and air-conditioning-Insulation-Cooling load- Electric water heating systems-Energy conservation methods.

Co-generation and storage: Combined cycle cogeneration-energy storage: pumped hydro schemes-compressed air energy storage (CAES)-storage batteries-superconducting magnetic energy storage (SMES)

I M.TECH-II SEMESTER

Course Code : V18PST22

H.V.D.C AND FACTS (ELECTIVE – IV)

[L: 3; T: 0; P: 0 (3 credits)]

UNIT-I:H.V.DC Transmission: General consideration, Power Handling Capabilities of HVDC lines, static converter configuration. Static Power Converters: 3 pulse, 6 pulse & 12 pulse converters, converter station and terminal equipment communication process, Rectifier and inverter operation

UNIT-II: Control of HVDC converter and systems: constant current, constant extinction angle and constant ignition angle control. Individual phase control and equidistant firing angle control. Harmonics in HVDC systems, Characteristic and uncharacteristic harmonics-troubles due to harmonics-harmonic filters.

UNIT-III: Converter faults and protection in HVDC systems: Converter faults, over current protection- valve group and DC line protection. Over voltage protection of converters.

UNIT-IV: FACTS concepts, importance of controllable parameters, basic types of FACTS controllers**,** Objectives of shunt compensation, midpoint voltage regulation, voltage instability prevention, improvement of transient stability, methods of controllable var generation, variable impedance type static var generators, switching converter type var generators.

UNIT-V: Concept of series capacitive compensation, improvement of transient stability, power oscillation damping, functional requirements. GTO thyristor controlled series capacitor (GSC), thyristor switched series capacitor (TSSC), and thyristor controlled series capacitor (TCSC), control schemes for GSC, TSSC and TCSC.

I M.TECH-II SEMESTER

Course Code : V18PSL02

POWER SYSTEMS LAB-II

[L: 0; T: 0; P: 4 (2 credits)]

Any 10 of the following experiments are to be conducted

1. Determination of Sequence Impedance of an Alternator by direct method.
2. Determination of break down strength of Transformer oil Testing.
3. Measurement of sequence impedance of a three phase transformer by application of sequence voltage.
4. Power angle characteristics of a salient pole Synchronous Machine.
5. Scott connection of transformer.
6. Determination of equivalent circuit of 3-winding Transformer.
7. Measurement of ABCD parameters on transmission line model.
8. Optimal power flow.
9. Reactive power compensation Br minimization of power loss using PSO
10. State estimation of power systems.

I M.TECH – I SEMESTER

VI8MAT06	COMPUTATIONAL METHODS IN ENGINEERING	L	P	C
		3	0	3

Unit – I

Introduction to numerical methods applied to engineering problems: Examples, solving sets of equations – Matrix notation – Determinants and inversion – Iterative methods – Relaxation methods – System of non-linear equations. Least square approximation fitting of non-linear curves by least squares –regression analysis- multiple linear regression, non linear regression -computer programs.

Unit – II

Boundry value problems and charecteristic value problems: Shooting method – Solution through a set of equations – Derivative boundary conditions – Rayleigh – Ritz method – Characteristic value problems.

Unit – III

Transformation Techniques: Continuous fourier series, frequency and time domains, laplace transform, fourier integral and transform, discrete fourier transform (DFT), Fast fourier transform (FFT).

Unit – IV

Numerical solutions of partial differential equations: Laplace's equations – Representations as a difference equation – Iterative methods for Laplace's equations – poisson equation – Examples – Derivative boundary conditions – Irregular and non – rectangular grids – Matrix patterns, sparseness – ADI method – Finite element method.

Unit – V

Partial differential equations: Explicit method – Crank-Nickelson method – Derivative boundary condition – Stability and convergence criteria. Solving wave equation by finite differences-stability of numerical method –method of characteristics-wave equation in two space dimensions-computer programs.

I M.TECH – I SEMESTER

VI8MDT01	ADVANCED MECHANICS OF SOLIDS	L	P	C
		3	0	3

Unit I

Theories of stress and strain, Definition of stress at a point, stress notation, principal stresses, other properties, differential equations of motion of a deformable body, deformation of a deformable body, strain theory, principal strains, strain of a volume element, small displacement theory.

Stress –strain temperature relations: Elastic and non elastic response of a solid, first law of thermodynamics, Hooke's Law, Anisotropic elasticity, Hooke's Law, Isotropic elasticity, initiation of Yield, Yield criteria.

Unit II

Failure criteria: Modes of failure, Failure criteria, Excessive deflections, Yield initiation, fracture, Progressive fracture, (High Cycle fatigue for number of cycles $N > 10^6$, buckling. Application of energy methods: Elastic deflections and statically indeterminate members and structures: Principle of stationary potential energy, Castiglione's theorem on deflections, Castiglione's theorem on deflections for linear load deflection relations, deflections of statically determinate structures.

Unit III

Unsymmetrical bending: Bending stresses in Beams subjected to Nonsymmetrical bending; Deflection of straight beams due to nonsymmetrical bending.

Curved beam theory: Winkler Bach formula for circumferential stress – Limitations – Correction factors –Radial stress in curved beams – closed ring subjected to concentrated and uniform loads-stresses in chain links.

Unit IV

Torsion : Linear elastic solution; Prandtl elastic membrane (Soap-Film) Analogy; Narrow rectangular cross Section ;Hollow thin wall torsion members ,Multiply connected Cross Section.

Unit V

Contact stresses: Introduction; problem of determining contact stresses; Assumptions on which a solution for contact stresses is based; Expressions for principal stresses; Method of computing contact stresses; Deflection of bodies in point contact; Stresses for two bodies in contact over narrow rectangular area (Line contact), Loads normal to area; Stresses for two bodies in line contact, Normal and Tangent to contact area.

Textbooks:

4. 4. Strength of materials by Sadhu singh, kanna publications , 11th edition, 2014

I M.TECH – I SEMESTER

VI8MDT02	ADVANCED MECHANISMS	L	P	C
		3	0	3

Unit – I: Introduction: Elements of Mechanisms; Mobility Criterion for Planar mechanisms and manipulators; Mobility Criterion for spatial mechanisms and manipulators. Spherical mechanisms-spherical trigonometry.

Unit – II: Advanced Kinematics of plane motion- I: The Inflection circle ; Euler – Savary Equation; Analytical and graphical determination of di ; Bobillier's Construction; Collineastion axis; Hartmann's Construction ;Inflection circle for the relative motion of two moving planes; Application of the Inflection circle to kinematic analysis.

Advanced Kinematics of plane motion - II: Polode curvature; Hall's Equation; Polode curvature in the four bar mechanism; coupler motion; relative motion of the output and input links; Determination of the output angular acceleration and its Rate of change; Freudenstein's collineation –axis theorem; Carter –Hall circle; The circling – point curve for the Coupler of of a four bar mechanism.

Unit – III: Introduction to Synthesis-Graphical Methods - I: The Four bar linkage ;Guiding a body through Two distinct positions; Guiding a body through Three distinct positions; The Rotocenter triangle ; Guiding a body through Four distinct positions; Burmester's curve.

Introduction to Synthesis-Graphical Methods - II: Function generation- General discussion; Function generation: Relative –rotocenter method, Overlay's method, Function generation-Velocity – pole method; Path generation: Hrones's and Nelson's motion Atlas, Roberts's theorem.

Unit – IV: Introduction to Synthesis-Analytical Methods: Function Generation: Freudenstien's equation, Precision point approximation, Precision – derivative approximation; Path Generation: Synthesis of Four-bar Mechanisms for specified instantaneous condition; Method of components; Synthesis of Four-bar Mechanisms for prescribed extreme values of the angular velocity of driven link; Method of components.

Unit – V: Manipulator kinematics : D-H transformation matrix ; Direct and Inverse kinematic analysis of Serial manipulators: Articulated, spherical & industrial robot manipulators- PUMA, SCARA,STANFORD ARM, MICROBOT.

Text Books:

1. Jeremy Hirschhorn, Kinematics and Dynamics of plane mechanisms,McGraw-Hill,1962.

I M.TECH – I SEMESTER

VI8MDT03	MECHANICAL VIBRATIONS	L	P	C
		3	0	3

Unit I

Single degree of Freedom systems: Undamped and damped free vibrations: forced vibrations ; coulomb damping; Response to harmonic excitation; rotating unbalance and support excitation, Vibration isolation and transmissibility, Vibrometers, velocity meters & accelerometers.

Unit II

Response to Non Periodic Excitations: unit Impulse, unit step and unit Ramp functions; response to arbitrary excitations, The Convolution Integral; shock spectrum; System response by the Laplace Transformation method.

Unit III

Multi degree freedom systems: Principal modes – undamped and damped free and forced vibrations ; undamped vibration absorbers, Matrix formulation, stiffness and flexibility influence coefficients; Eigen value problem; normal modes and their properties; Free and forced vibration by Modal analysis; Method of matrix inversion; Torsional vibrations of multi – rotor systems and geared systems; Discrete-Time systems.

Unit IV

Numerical Methods: Rayliegh's, stodola's, Matrix iteration, Rayleigh-Ritz Method and Holzer's methods

Unit V

Application of concepts: Free vibration of strings – longitudinal oscillations of bars-transverse vibrations of beams- Torsional vibrations of shafts. Critical speeds without and with damping, secondary critical speed.

Text books:

1. Elements of Vibration Analysis by Meirovitch. 2nd edition Tata Mc Graw Hill
2. Mechanical Vibrations by G.K. Groover. 2009 8th edition

4. Mechanical Vibrations–V.Ram Murthy. Alpha Science International, 2000

I M.TECH – I SEMESTER

VI8MDT04	DESIGN OF AUTOMOBILE SYSTEMS (ELECTIVE-I)	L	P	C
		3	0	3

UNIT I

Conceptual design of automobiles: body shape definition based on aerodynamic structure safety, sub - systems integration considerations, road load analysis, transmission of road loadsto structure.

UNTI II

Detail design of structural elements, load analysis for different vehicles, safety consideration, design for bending, torsion conditions, criteria for toppling, based on cornering loads.

UNIT III

Suspension system integration with vehicle for ride comfort, methods of mounting suspension and power train systems.

UNIT IV

Driver cabin/seat design, design of control systems based on ergonomics, anthropometry, human factors engineering considerations.

UNIT V

Safety aspects of automobiles, devices, energy absorbing systems, crash worthiness, legislation relating to safety, vehicle performance requirements, sub systems packaging and verification of vehicle performance through testing(lab, field testing).

TEXT BOOKS

1. 1 Donald E.Males, Fundamentals of automobile body structure design(R-394), 2011 SAE international
2. W.F.Milliker, D.L.Milliker,Maurice Olly, Chassis design: principles an analysis
3. (R-206) 2002 SAE international

I M.TECH – I SEMESTER

VI8MDT05	PRODUCT DESIGN (ELECTIVE-I)	L	P	C
		3	0	3

UNIT- I

Introduction -Need for IPPD – strategic importance of product development – integration of customer, designer, material supplier and process planner, Competitor and costumer – behavior analysis. Understanding customer – promoting customer understanding – involve customer in development and managing requirements – Organization – process management and improvement – Plan and establish product specification.

UNIT - II

CONCEPT GENERATION AND SELECTION: Task – Structured approaches – Clarification – Search – Externally and internally – explore systematically – reflect on the solutions and process – concept selection – methodology – benefits.

PRODUCT ARCHETECTURE: Implications – Product change – variety – component standardization – product performance – manufacturability.

UNIT - III

PRODUCT DEVELOPMENT MANAGEMENT: Establishing the architecture – creation – clustering – geometric layout development – fundamental and incidental interactions – related system level design issues – secondary systems – architecture of the chunks – creating detailed interface specifications.

INDUSTRIAL DESIGN: Integrate process design – Managing costs – Robust design – Integrating CAE, CAD, CAM tools – simulating product performance and manufacturing processing electronically – Need for industrial design – impact – design process.

UNIT - IV

Investigation of customer needs – conceptualization – refinement – management of the industrial design process – technology driven products – user – driven products – assessing the quality of industrial design.

UNIT - V

DESIGN FOR MANUFACTURING AND PRODUCTY DEVELOPMENT: Definition – Estimation of manufacturing cost – reducing the component costs and assembly costs – Minimize system complexity. Prototype basics – Principles of prototyping – planning for prototypes – Economics analysis – Understanding and representing tasks – baseline project planning – accelerating the project execution.

TEXT BOOKS:

1. Product Design and Development / Kari T. Ulrich and Steven D. Eppinger / McGraw Hill International Edns. 1999.5th edition
2. Concurrent Engg/integrated Product development / Kemnneth Crow / DRM Associates, 26/3, Via Olivera, Palos Verdes, CA 90274(310)377-569, Workshop Book.

I M.TECH – I SEMESTER

VI8MDT06	GEOMETRIC MODELING (ELECTIVE-I)	L	P	C
		3	0	3

Unit - I

Cubic spline –I Definition, Explicit and implicit equations, parametric equations, Algebraic and geometric form of cubic spline, Hermite cubic spline, tangent vectors, parametric space of a curve, blending functions.

Unit - II

Cubic Splines-II:

four point form, reparametrization, truncating and subdividing of curves. Graphic construction and interpretation, composite pc curves.

Bezier Curves: Bernstein basis, equations of Bezier curves, properties, derivatives.

Unit - III

B-Spline Curves: B-Spline basis, equations, knot vectors, properties, and derivatives.

Unit – IV

Surfaces: Bicubic surfaces, Coon's surfaces, Bezier surfaces, B-Spline surfaces, surfaces of revolutions, Sweep surfaces, ruled surfaces, tabulated cylinder, bilinear surfaces, Gaussian curvature.

Unit – V

Solids: Tricubic solid, Algebraic and geometric form.

Solid modeling concepts: Wire frames, Boundary representation, Half space modeling, spatial cell, cell decomposition, classification problem.

TEXT BOOKS:

1. Elements of Computer Graphics by Roger & Adams Tata McGraw Hill. 2nd edition
2. Geometric Modeling by Micheal E. Mortenson, McGraw Hill Publishers, 3rd edition

REFERENCES:

I M.TECH – I SEMESTER

VI8MDT07	NON-DESTRUCTIVE EVALUATION (ELECTIVE-I)	L	P	C
		3	0	3

UNIT – I

General Methods: Flaw Detection Using Dye Penetrants. Magnetic Particle Inspection introduction to electrical impedance, Principles of Eddy Current testing, Flaw detection using eddy currents

UNIT – II

X-Ray Radiography: The Radiographic process, X-Ray and Gamma-ray sources, Geometric Principles, Factors Governing Exposure, Radio graphic screens, Scattered radiation, Arithmetic of exposure, Radiographic image quality and detail visibility, Industrial X-Ray films, Fundamentals of processing techniques, Process control, The processing Room, Special Processing techniques, Paper Radiography, Sensitometric characteristics of x-ray films, Film graininess signal to noise ratio in radiographs, The photographic latent image, Radiation Protection,

UNIT – III

Generation of ultrasonic waves, Horizontal and shear waves, Near field and far field acoustic wave description, Ultrasonic probes- straight beam, direct contact type, Angle beam, Transmission/reflection type, and delay line transducers, acoustic coupling and media, Transmission and pulse echo methods, A-scan, B-scan, C-scan, F-scan and P-scan modes, Flaw sizing in ultrasonic inspection: AVG, Amplitude, Transmission, TOFD, Satellite pulse, Multi-modal transducer, Zonal method using focused beam. Flow location methods, Signal processing in Ultrasonic NDT; Mimics, spurious echos and noise. Ultrasonic flaw evaluation.

UNIT – IV

Holography: Principles and practices of Optical holography, acoustical, microwave, x-ray and electron beam holography techniques.

UNIT – V

Applications: NDT in flaw analysis of Pressure vessels, piping, NDT in Castings, Welded constructions, etc., Case studies.

TEXT BOOKS:

1. Ultrasonic testing by Krautkramer and Krautkramer, 4th edition Springer.
2. Ultrasonic inspection to Training for NDT : E. A. Gingel, Prometheus Press,2006.
3. Metals and alloys, ASTM Standards, Vol 3.01

I M.TECH – I SEMESTER

VI8MDT08	FRACTURE MECHANICS (ELECTIVE-II)	L	P	C
		3	0	3

UNIT-I

Introduction: Prediction of mechanical failure. Macroscopic failure modes; brittle and ductile behavior. Fracture in brittle and ductile materials – characteristics of fracture surfaces; inter-granular and intra-granular failure, cleavage and micro-ductility, growth of fatigue cracks, The ductile/brittle fracture transition temperature for notched and unnotched components. Fracture at elevated temperature.

UNIT-II

Griffiths analysis: Concept of energy release rate, G, and fracture energy, R. Modification for ductile materials, loading conditions. Concept of R curves.

Linear Elastic Fracture Mechanics, (LEFM). Three loading modes and the state of stress ahead of the crack tip, stress concentration factor, stress intensity factor and the material parameter the critical stress intensity factor, crack tip plasticity, effect of thickness on fracture toughness.

UNIT-III

Elastic-Plastic Fracture Mechanics; (EPFM). The definition of alternative

failure prediction parameters, Crack Tip Opening Displacement, and the J integral. Measurement of parameters and examples of use.

UNIT-IV

Fatigue: definition of terms used to describe fatigue cycles, High Cycle Fatigue, Low Cycle Fatigue, mean stress R ratio, strain and load control. S-N curves. Goodmans rule and Miners rule. Micromechanisms of fatigue damage, fatigue limits and initiation and propagation control, leading to a consideration of factors enhancing fatigue resistance. Total life and damage tolerant approaches to life prediction.

UNIT-V

Creep deformation: the evolution of creep damage, primary, secondary and tertiary creep. Micro-mechanisms of creep in materials and the role of diffusion. Ashby creep deformation maps. Stress dependence of creep – power law dependence. Comparison of creep performance under different conditions – extrapolation and the use of Larson-Miller parameters. Creep-fatigue interactions,Examples

TEXT BOOKS

I M.TECH – I SEMESTER

VI8MDT09	GEAR ENGINEERING (PSG Design data Book is allowed) (ELECTIVE-II)	L	P	C
		3	0	3

UNIT – I

Introduction: Principles of gear tooth action, Generation of Cycloid and Involute gears, Involutometry, gear manufacturing processes and inspection, gear tooth failure modes, stresses, selection of right kind of gears.

UNIT – II

Spur Gears, Helical gears, Bevel gears and worm gears, Tooth loads, Principles of Geometry, Design considerations and methodology, Complete design of spur gear teeth considering Lewis beam strength, Buckingham's dynamic load and wear load, Design of gear shaft and bearings.

UNIT –III

Gear trains: Simple, compound and epicyclic gear trains, Ray diagrams, Design of a gear box of an automobile, Design of gear trains from the propeller shafts of airplanes for auxiliary systems.

UNIT – IV

Gear failures

Analysis of gear tooth failures, Nomenclature of gear tooth wear and failure, tooth breakage, pitting, scoring, wear, overloading, gear-casing problems, lubrication failures

UNIT – V

Optimal Gear design: Optimization of gear design parameters, Weight minimization, Constraints in gear train design-space, interference, strength, dynamic considerations, rigidity etc. Compact design of gear trains, multi objective optimization of gear trains. Application of Traditional and non-traditional optimization techniques

TEXT BOOKS:

1. Maleev and Hartman, Machine Design, C.B.S. Publishers, India.6th edition 2015
2. Henry E.Merrit,Gear engineering ,Wheeler publishing,Allahabad,1992.
3. Practical Gear design by Darle W. Dudley,first edition McGraw-Hill book company

I M.TECH – I SEMESTER

VI8MDT10	DESIGN FOR MANUFACTURING AND ASSEMBLY (ELECTIVE-II)	L	P	C
		3	0	3

UNIT - I

Introduction to DFM, DFMA: How Does DFMA Work? Reasons for Not Implementing DFMA, What Are the Advantages of Applying DFMA During Product Design?, Typical DFMA Case Studies, Overall Impact of DFMA on Industry.

Design for Manual Assembly: General Design Guidelines for Manual Assembly, Development of the Systematic DFA Methodology, Assembly Efficiency, Effect of Part Symmetry, Thickness, Weight on Handling Time, Effects of Combinations of Factors, Application of the DFA Methodology.

UNIT - II

Machining processes: Overview of various machining processes-general design rules for machining-dimensional tolerance and surface roughness-Design for machining – ease – redesigning of components for machining ease with suitable examples. General design recommendations for machined parts.

UNIT - III

Metal casting: Appraisal of various casting processes, selection of casting process,-general design considerations for casting-casting tolerance-use of solidification, simulation in casting design-product design rules for sand casting.

Extrusion & Sheet metal work: Design guide lines extruded sections-design principles for punching, blanking, bending, deep drawing-Keeler Goodman forging line diagram – component design for blanking.

UNIT - IV

Metal joining: Appraisal of various welding processes, factors in design of weldments – general design guidelines-pre and post treatment of welds-effects of thermal stresses in weld joints-design of brazed joints. Forging: Design factors for forging – closed die forging design – parting lines of dies – drop forging die design – general design recommendations.

UNIT – V

Design for Assembly Automation: Fundamentals of automated assembly systems, System configurations, parts delivery system at workstations, various escapement and placement devices used in automated assembly systems, Quantitative analysis of Assembly systems, Multi station assembly systems, single station assembly lines.

TEXT BOOKS:

1. Design for manufacture, John cobert, Adisson Wesley. 1995
2. Design for Manufacture and assembly by Boothroyd,3rd edition CRC press
3. Design for manufacture, James Bralla, 2nd edition Mc Graw Hill

I M.TECH – I SEMESTER

VI8MDT11	CONTINUUM MECHANICS (ELECTIVE-II)	L	P	C
		3	0	3

UNIT – I

Tensor calculus:

Tensor calculus, Multi linear forms, Definition of Tensor over including vector spaces, Alternating tensors, determinants, orientation, tensor products, kinematics of deformations and motion, strain analysis, rotation of tensors, calculations of tensors, internal calculations of tensors and integral identities.

UNIT – II

Eulerian and Lagrangian description of a continuous, discrete systems, continua, physical quantities and their derivatives. Rigid body motion, Relation between continuum models and real materials.

UNIT – III

Conservation laws in a continuum: Mass conservation in Lagrangen and Eulerian frames, Conservation of momentum in Lagrangen and Eulerian frames.

UNIT – IV

Conservation in angular momentum in lagrengian form. Conservation of energy in in Lagrangen and Eulerian frames.Strain and decomposition. Finite deformation, infinitesimal displacements

UNIT - V

Material frame indifference, Elastic Materials, Viscous fluids, linear visco-elasticity, case studies for metals and polymers.

		L	P	C
VI8MDL01	**MACHINE DYNAMICS LABORATORY**	**0**	**4**	**2**

EXPERIMENTS:

1. Determination of damped natural frequency of vibration of the vibrating system with different viscous oils.
2. Determination of steady state amplitude of a forced vibratory system.
3. Static balancing using steel balls & Determination of the magnitude and orientation of the balancing mass in dynamic balancing.
4. Field balancing of the thin rotors using vibration pickups.
5. Determination of the magnitude of gyroscopic couple, angular velocity of precession, and representation of vectors.
6. Determination of natural frequency of given structure using FFT analyzer.
7. Diagnosis of a machine using FFT analyzer.
8. Direct kinematic analysis of a robot.
9. Inverse kinematic analysis of a robot.
10. An experiment on friction, wear, pin-on-disc.
11. An experiment on stress intensity factors/fatigue, fracture.
12. Modal analysis of beams and plates.

I M.TECH – II SEMESTER

VI8MDT12	OPTIMIZATION AND RELIABILITY	L	P	C
		3	0	3

UNIT - I

CLASSICAL OPTIMIZATION TECHNIQUES: Single variable optimization with and without constraints, multi – variable optimization without constraints, multi – variable optimization with constraints – method of Lagrange multipliers, Kuhn-Tucker conditions, merits and demerits of classical optimization techniques.

UNIT - II

NUMERICAL METHODS FOR OPTIMIZATION: Nelder Mead's Simplex search method, Gradient of a function, Steepest descent method, Newton's method, Pattern search methods, conjugate method, types of penalty methods for handling constraints, advantages of numerical methods.

UNIT - III

GENETIC ALGORITHM (GA) : Differences and similarities between conventional and evolutionary algorithms, working principle, reproduction, crossover, mutation, termination criteria, different reproduction and crossover operators, GA for constrained optimization, draw backs of GA,

GENETIC PROGRAMMING (GP): Principles of genetic programming, terminal sets, functional sets, differences between GA & GP, random population generation, solving differential equations using GP.

MULTI-OBJECTIVE GA: Pareto's analysis, Non-dominated front, multi – objective GA, Non-dominated sorted GA, convergence criterion, applications of multi-objective problems .

UNIT – IV

APPLICATIONS OF OPTIMIZATION IN DESIGN AND MANUFACTURING SYSTEMS: Some typical applications like optimization of path synthesis of a four-bar mechanism, minimization of weight of a cantilever beam, optimization of springs and gears, general optimization model of a machining process, optimization of arc welding parameters, and general procedure in optimizing machining operations sequence.

UNIT V

RELIABILITY: Concepts of Engineering Statistics, risk and reliability, probabilistic approach to design, reliability theory, design for reliability, numerical problems, hazard analysis.

TEXT BOOKS:

1. Optimization for Engineering Design – Kalyanmoy Deb, PHI Publishers, 2nd edition
2. Engineering Optimization – S.S.Rao, New Age Publishers, 3rd edition
3. Reliability Engineering by L.S.Srinath, 3rd edition.2005, East West publications
4. Multi objective genetic algorithm by Kalyanmoy Deb, 2nd edition PHI Publishers, 2012

2. Optimal design – Jasbir Arora, Mc Graw Hill (International) Publishers, 4th edition 2017
3. An Introduction to Reliability and Maintainability Engineering by CE Ebeling, Waveland Printers Inc.,8th edition 2007
4. Reliability Theory and Practice by I Bazovsky, Dover Publications, 2013

I M.TECH – II SEMESTER

VI8MDT13	THEORY OF PLASTICITY (ELECTIVE-IV)	L	P	C
		3	0	3

UNIT-I

Introduction: Modeling Uniaxial behavior in Plasticity. Index notation, Cartesian tensors.

Yield and failure criteria Stress, stress deviator tensors. Invariants, principal, mean stresses. Elastic strain energy. Mohr's representation of stress in 2 & 3 dimensions. Haigh-Westergaard stress space. Equilibrium equations of a body. Yield criteria: Tresca's, von Mises rules, Drucker-Prager criterion, anisotropic yield criteria.

Strain at point: Cauchy's formulae for strains, principal strains, principal shear strains, derivative strain tensor. Strain-displacement relationships. Linear elastic stress strain relations, Generalized Hooke's law, nonlinear elastic stress strain relations

UNIT – II

Principle of virtual work and its rate forms: Drucker's stability postulate, normality, convexity and uniqueness for an elastic solid. Incremental stress strain relations.

Criteria for loading and unloading: Elastic and plastic strain increment tensors, Plastic potential and flow rule associated with different Yield criteria, Convexity, normality and uniqueness considerations for elastic–plastic materials. Expansion of a thick walled cylinder.

UNIT – III

Incremental stress strain relationships: Prandtl-Reuss material model. J_2 deformation theory, Drucker-Prager material, General Isotropic materials.

Deformation theory of plasticity: Loading surface, Hardening rules. Flow rule and Druckers stability postulate. Concept of effective stress and effective strain, mixed hardening material. Problems.

UNIT – IV

Finite element formulation for an elastic plastic matrix: Numerical algorithms for solving non linear equations, Convergence criteria, Numerical implementations of the elastic plastic incremental constitutive relations

UNIT – V

Bounding surface theory: Uniaxial and multiaxial loading anisotropic material behaviour Theroms of limit analysis: Statically admissible stress field and kinematically admissible velocity field. Upper and lower bound theorms, examples and problems.

TEXT BOOK:

1. Plasticity for structural engineering W.F.Chen s and D.J.Han, J. Ross Publishing, 2007

REFERENCES:

1. Mechanics of Materials –II, Victor E. Saouma.
2. Theory of plasticity, Sadhu Singh Khanna publications

I M.TECH – II SEMESTER

VI8MDT14	FINITE ELEMENT METHOD	L	P	C
		3	0	3

UNIT - I

Formulation Techniques: Methodology, Engineering problems and governing differential equations, finite elements. Variational methods-potential energy method, Raleigh Ritz method, strong and weak forms, Galerkin and weighted residual methods, calculus of variations, Essential and natural boundary conditions.

UNIT – II

One-dimensional elements: Bar, trusses, beams and frames, displacements, stresses and temperature effects.

UNIT – III

Two dimensional problems: CST, LST, four noded and eight nodded rectangular elements, Lagrange basis for triangles and rectangles, serendipity interpolation functions. Axisymmetric Problems: Axisymmetric formulations, Element matrices, boundary conditions. Heat Transfer problems: Conduction and convection, examples: - two-dimensional fin.

UNIT – IV

Isoparametric formulation: Concepts, sub parametric, super parametric elements, numerical integration, Requirements for convergence, h-refinement and p-refinement, complete and incomplete interpolation functions, pascal's triangle, Patch test.

UNIT – V

Finite elements in Structural Analysis: Static and dynamic analysis, eigen value problems, and their solution methods, case studies using commercial finite element packages.

TEXT BOOK:

1. Finite element methods by Chandrubatla & Belagondu.4th edition, 2011

REFERENCES:

I M.TECH – II SEMESTER

VI8MDT15	DESIGN WITH ADVANCED MATERIALS	L	P	C
		3	0	3

Unit – I

Fundamentals of material science: Elasticity in metals, mechanism of plastic deformation, slip twinning, role of dislocations, yield stress, shear strength of perfect and real crystals, strengthening mechanism, work hardening, solid solution, grain boundary strengthening, Poly phase mixture, precipitation, particle, fiber and dispersion strengthening, effect of temperature, strain and strain rate on plastic behavior, super plasticity. Yield criteria: Von mises and Tresca criteria.

Unit – II

Motivation of selection, cost basis and service requirements, selection for mechanical properties, strength, toughness, fatigue, impact and creep, use of material property charts for material selection.

Unit – III

Modern metallic Materials: Dual phase steels, micro alloyed steels, high strength low alloy (HSLA) Steel, maraging steel, intermetalics, Ni and Ti aluminides, super alloys.

Unit – IV

Non metallic materials: Polymeric materials and their molecular structures, production techniques for fibers, foams, adhesives and coatings, structure, properties and applications of engineering polymers. composites; Introduction, reinforcement, types of composite materials, -properties, processing and application of composite materials.

Unit – V

Properties, structure and applications of Smart materials, shape memory alloys, metallic glass, quasi crystal and nano crystalline materials, ceramic materials, ceremets, high temperature materials, refractory materials.

TEXT BOOKS:

1. Mechanical behavior of materials/Thomas H. Courtney/2nd Edition, McGraw-Hill, 2000
2. Mechanical Metallurgy/George E.Dieter/McGraw Hill, 1998
3. Material selction in mechanical design by M.F Ashby. Bott

REFERENCES:

2. Material science and metallurgy by VD Kodgire 2017

I M.TECH – II SEMESTER

VI8MDT16	TRIBOLOGY (ELECTIVE- III)	L	P	C
		3	0	3

UNIT – I

Introduction: Nature of surfaces and contact-Surface topography-friction and wear mechanisms, wear maps, effect of lubricants- methods of fluid film formation.

Lubrication: Choice of lubricants, types of oil, Grease and solid lubricants-additives-lubrication systems and their selection.

UNIT – II

Selection of rolling element bearings: Nominal life, static and dynamic capacity-Equivalent load, probabilities of survival- cubic mean load- bearing mounting details, pre loading of bearings, conditioning monitoring using shock pulse method.

UNIT – III

Hydrostatic Bearings: Thrust bearings – pad coefficients- restriction- optimum film thickness-journal bearings – design procedure –Aerostatic bearings; Thrust bearings and Journal bearings – design procedure.

UNIT – IV

Hydrodynamic bearings: Fundamentals of fluid formation – Reynold's equation; Hydrodynamic journal bearings – Sommerfield number- performance parameters – optimum bearing with maximum load capacity – Friction – Heat generated and Heat dissipated. Hydrodynamic thrust bearings; Raimondi and Boyd solution for hydrodynamic thrust bearings-fixed tilting pads, single and multiple pad bearings-optimum condition with largest minimum film thickness.

UNIT – V

Seals: different type-mechanical seals, lip seals, packed glands, soft piston seals, Mechanical piston rod packing, labyrinth seals and throttling bushes, oil flinger rings and drain grooves – selection of mechanical seals.

Failure of Tribological components: Failure analysis of plain bearings, rolling bearings, gears and seals, wear analysis using soap and Ferrography.

Dry rubbing Bearings: porous metal bearings and oscillatory journal bearings – qualitative approach only.

TEXT BOOKS:

1. Rowe WW& O' Dionoghue,"Hydrostatic and Hybrid bearing design" Butter worths & Co.Publishers Ltd,1983.

I M.TECH – II SEMESTER

VI8MDT17	SIGNAL ANALYSIS AND CONDITION MONITORING (ELECTIVE- III)	L	P	C
		3	0	3

UNIT-I

Introduction, Basic concepts. Fourier analysis. Bandwidth. Signal types. Convolution.

Signal analysis: Filter response time. Detectors. Recorders. Analog analyzer types.

UNIT-II

PRACTICAL ANALYSIS OF STATIONARY SIGNALS: Stepped filter analysis. Swept filter analysis. High speed analysis. Real-time analysis.

UNIT-III

PRACTICAL ANALYSIS OF CONTINUOUS NON-STATIONARY SIGNALS: Choice of window type. Choice of window length. Choice of incremental step. Practical details. Scaling of the results.

UNIT-IV

PRACTICAL ANALYSIS OF TRANSIENTS: Analysis as a periodic signal. Analysis by repeated playback (constant bandwidth). Analysis by repeated playback (variable bandwidth).

UNIT-V

CONDITION MONITORING IN REAL SYSTEMS: Diagnostic tools. Condition monitoring of two stage compressor. Cement mill foundation. I.D. fan. Sugar centrifugal. Cooling tower fan. Air separator. Preheater fan. Field balancing of rotors. ISO standards on vibrations, active, passive hybrid methods of condition monitoring

TEXT BOOK:

1. Mechanical Fault diagnosis and condition monitoring by R. A .Collacott, Chapman and Hall, 1977

REFERENCES:

1. Frequency Analysis by R.B.Randall.3rd edition 2011

I M.TECH – II SEMESTER

VI8MDT18	COMPUTATIONAL FLUID DYNAMICS (ELECTIVE- III)	L	P	C
		3	0	3

UNIT – I

Introduction: Finite difference method, finite volume method, finite element method, governing equations and boundary conditions. Derivation of finite difference equations.

Solution methods: Solution methods of elliptical equations – finite difference formulations, interactive solution methods, direct method with Gaussian elimination.

Parabolic equations-explicit schemes and Von Neumann stability analysis, implicit schemes, alternating direction implicit schemes, approximate factorization, fractional step methods, direct method with tridiagonal matrix algorithm.

UNIT – II

Hyperbolic equations: explicit schemes and Von Neumann stability analysis, implicit schemes, multi step methods, nonlinear problems, second order one-dimensional wave equations.

Burgers equations: Explicit and implicit schemes, Runge-Kutta method.

UNIT – III

Formulations of incompressible viscous flows: Formulations of incompressible viscous flows by finite difference methods, pressure correction methods, vortex methods.

Treatment of compressible flows: potential equation, Eluer equations, Navier-stokes system of equations, flow field-dependent variation methods, boundary conditions, example problems.

UNIT – IV

Finite volume method: Finite volume method via finite difference method, formulations for two and three-dimensional problems.

UNIT – V

Standard variational methods: Linear fluid flow problems, steady state problems, Transient problems.

TEXT BOOK:

1. Computational fluid dynamics, T. J.Chung, Cambridge University press, 2nd edition 2002.

REFERENCE:

1. Text book of fluid dynamics, Frank Chorlton, CBS Publishers &distributors, 1985.

I M.TECH – II SEMESTER

		L	P	C
VI8MDT19	**DESIGN SYNTHESIS (ELECTIVE- III)**	**3**	**0**	**3**

UNIT – I

Design process and methodologies of systematic design conceptual design variants and evaluation; Standardization and its exploitation in design.

UNIT – II

Tolerance from process and function; interchangeability and selective assembly; selection of fits for different design situations, surface finish. Load transmission, load equalization lightweight and rigid constructions.

UNIT – III

Design of cast forged sheet metal parts and welded constructions Machining considerations.

UNIT – IV

Design for assembly and dismantling; Modular constructions erection, operation inspection and maintenance considerations; Ergonomics Design of accuracy; Location pins and registers, Machining in assembly, adjustment, Backlash and Clearance adjustment.

UNIT – V

Problems formulation for design optimization Example illustration the various principles available design variants for some of the common basic functional requirements.

TEXT BOOK:

1. Engineering Design a material and processing approach/ George Dieter/ McGraw Hill international book company 5th edition 2012

I M.TECH – II SEMESTER

VI8MDT20	PRESSURE VESSEL DESIGN (ELECTIVE-IV)	L	P	C
		3	0	3

UNIT – I

Introduction: Materials-shapes of Vessels-stresses in cylindrical, spherical and arbitrary, shaped shells. Cylindrical Vessels subjected to internal pressure, wind load, bending and torque for computation of pressure vessels-conical and tetrahedral vessels.

UNIT – II

Theory of thick cylinders: Shrink fit stresses in built up cylinders-auto frettage of thick cylinders. Thermal stresses in Pressure Vessels.

UNIT – III

Theory of rectangular plates: Pure bending-different edge conditions.

Theory circular plates: Simple supported and clamped ends subjected to concentrated and uniformly distributed loads-stresses from local loads. Design of dome bends, shell connections, flat heads and cone openings.

UNIT – IV

Discontinuity stresses in pressure vessels: Introduction, beam on an elastic foundation, infinitely long beam, semi infinite beam, cylindrical vessel under axially symmetrical loading, extent and significance of load deformations on pressure vessels, discontinuity stresses in vessels, stresses in a bimetallic joints, deformation and stresses in flanges.

UNIT – V

Pressure vessel materials and their environment: Introduction, ductile material tensile tests, structure and strength of steel, Leuder's lines, determination of stress patterns from plastic flow observations, behaviour of steel beyond the yield point, effect of cold work or strain hardening on the physical properties of pressure vessel steels, fracture types in tension, toughness of materials, effect of neutron irradiation of steels, fatigue of metals, fatigue crack growth, fatigue life prediction, cumulative fatigue damage, stress theory of failure of vessels subject to steady state and fatigue conditions.

TEXT BOOKS:

1. Theory and design of modern Pressure Vessels by John F.Harvey, Van nostrand Reihold Company, New York., 1980
2. Pressure Vessel Design and Analysis by Bickell, M.B.Ruizcs.,2009

REFERENCES:

I M.TECH – II SEMESTER

VI8MDT21	MECHANICS OF COMPOSITE MATERIALS (ELECTIVE-IV)	L	P	C
		3	0	3

UNIT-I

Introduction to Composites: Introduction, Classification, matrix materials, reinforced matrix of composites

UNIT-II

Hooke's Law for a Two-Dimensional Angle Lamina, Engineering Constants of an Angle Lamina, Invariant Form of Stiffness and Compliance Matrices for an Angle Lamina Strength Failure Theories of an Angle Lamina : Maximum Stress Failure Theory Strength Ratio, Failure Envelopes,Maximum Strain Failure Theory ,Tsai–Hill Failure Theory, Tsai–Wu Failure Theory, Comparison of Experimental Results with Failure Theories. Hygrothermal Stresses and Strains in a Lamina: Hygrothermal Stress–Strain Relationships for a Unidirectional Lamina, Hygrothermal Stress–Strain Relationships for an Angle Lamina

UNIT-III

Macromechanical Analysis of a Lamina :Introduction ,Definitions: Stress, Strain ,Elastic Moduli, Strain Energy. Hooke's Law for Different Types of Materials, Hooke's Law for a Two-Dimensional Unidirectional Lamina, Plane Stress Assumption, Reduction of Hooke's Law in Three Dimensions to Two Dimensions, Relationship of Compliance and Stiffness Matrix to Engineering Elastic Constants of a Lamina,

UNIT-IV

Micromechanical Analysis of a Lamina :Introduction, Volume and Mass Fractions, Density, and Void Content, Evaluation of the Four Elastic Moduli, Strength of Materials Approach, Semi-Empirical Models ,Elasticity Approach, Elastic Moduli of Lamina with Transversely Isotropic Fibers, Ultimate Strengths of a Unidirectional Lamina, Coefficients of Thermal Expansion, Coefficients of Moisture Expansion

Macromechanical Analysis of Laminates: Introduction, Laminate Code , Stress–Strain Relations for a Laminate, In-Plane and Flexural Modulus of a Laminate, Hygrothermal Effects in a Laminate, Warpage of Laminates, hybrid laminates

UNIT-V

Design of Laminates: Introduction, thin plate theory, specially orthotropic plate, cross and angle ply laminated plates, problems using thin plate theory, Failure Criterion for a Laminate, Design of a Laminated Composites.

TEXT BOOKS:

1. Engineering Mechanics of Composite Materials by Isaac and M Daniel, Oxford University Press, 1994.
2. B. D. Agarwal and L. J. Broutman, Analysis and performance of fibre Composites, Wiley-Interscience, New York, 1980.
3. Mechanics of Composite Materials, Second Edition (Mechanical Engineering), By Autar K. Kaw Publisher, 2nd edition

REFERENCES:

1. R. M. Jones, Mechanics of Composite Materials, Mc Graw Hill Company, New York,1975.

I M.TECH – II SEMESTER

VI8MDT22	MECHATRONICS (ELECTIVE-IV)	L	P	C
		3	0	3

UNIT – I

Introduction: Definition of Mechatronics products, design considerations and trade offs. Overview of Mechtronic products. Intelligent machine Vs Automatic machine economic and social justification.

Actuators and drive systems: Mechanical, Electrical, hydraulic drive systems, Characteristics of mechanical, Electrical, Hydraulic and pneumatic actuators and their limitations.

UNIT – II

Motion Control: Control parameters and system objectives, Mechanical Configurations, Popular control system configurations. S-curve, motor/load inertia matching, design with linear slides.

Motion Control algorithms: Significance of feed forward control loops, shortfalls, fundamentals concepts of adaptive and fuzzy – control. Fuzzy logic compensatory control of transformation and deformation non- linearity's.

UNIT – III

Sensor interfacing: Analog and digital sensors for motion measurement, digital transducers, human-Machine and machine- Machine inter facing devices and strategy.

Architecture of intelligent machines: Introduction to Microprocessor and programmable logic controls and identification of systems. System design classification, motion control aspects in design.

UNIT – IV

Machine vision: Feature and pattern recognition methods, concepts of perception and cognition in decision-making, basics of image processing, binary and grey scale images, sharpening and smoothening of images.

UNIT – V

Micromechatronic Sytems: Micro sensors, micro actuators, smart instrumentation, micro-fabrication methods – lithography, etching, micro-joing.

TEXT BOOKS:

1. "Mechatronics and Measurement systems"by .Michel B.Histand and david G. Alciatore.4th edition
2. Introduction to Mechatronics and Measurement systems, Tata Mc Graw Hill. 3rd edition 2007
3. Control sensors and actuators C.W.desilva, Prentice Hall.CRC Press, 2007

I M.TECH – II SEMESTER

VI8MDT23	EXPERIMENTAL STRESS ANALYSIS	L	P	C
		3	0	3

UNIT – I

Introduction: Stress, strain, Plane stress and plane strain conditions, Compatibility conditions. Problems using plane stress and plane strain conditions, stress functions, mohrs circle for stress strain, Three-dimensional stress strain relations.

UNIT – II

Strain Measurement and Recordings: Various types of strain gauges, Electrical Resistance strain gauges, semiconductor strain gauges, strain gauge circuits. Introduction, static recording and data logging, dynamic recording at very low frequencies, dynamic recording at intermediate frequencies, dynamic recording at high frequencies, dynamic recording at very high frequencies, telemetry systems.

UNIT – III

Photo elasticity: Photo elasticity – Polariscope – Plane and circularly polarized light, Bright and dark field setups, Photo elastic materials – Isochromatic fringes – Isoclinics

Three dimensional Photo elasticity : Introduction, locking in model deformation, materials for three-dimensional photo elasticity, machining cementing and slicing three-dimensional models, slicing the model and interpretation of the resulting fringe patterns, effective stresses, the shear-difference method in three dimensions, applications of the Frozen-stress method, the scattered-light method.

UNIT – IV

Brittle coatings: Introduction, coating stresses, failure theories, brittle coating crack patterns, crack detection, ceramic based brittle coatings, resin based brittle coatings, test procedures for brittle coatings analysis, calibration procedures, analysis of brittle coating data.

Moire Methods: Introduction, mechanism of formation of Moire fringes, the geometrical approach to Moire-Fringe analysis, the displacement field approach to Moire-Fringe analysis, out of plane displacement measurements, out of plane slope measurements, sharpening and multiplication of Moire-Fringes, experimental procedure and techniques.

UNIT – V Birefringent coatings

Introduction, Coating stresses and strains, coating sensitivity, coating materials, application of coatings, effects of coating thickness, Fringe-order determinations in coatings, stress separation methods.

TEXT BOOKS :

1. Theory of Elasticity by Timoshenke and Goodier Jr, 3rd edition, 2010 Mc Graw-Hill
2. Experimental stress analysis by Dally and Riley, , 3rd edition, 1991, Mc Graw-Hill

SYLLABUS FOR M.TECH (VLSI & EMBEDED SYSTEMS)

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT01	DIGITAL SYSTEM DESIGN	3	-	-	3

Course Outcome:
The student will be able to

1. Describe the algorithms for minimization of functions
2. Describe the algorithms for minimization of PLDs.
3. Design large scale digital systems.
4. Discuss the fault model and diagnosis in combinational and sequential circuits.

UNIT-I: Minimization Procedures and CAMP Algorithm

Review on minimization of switching functions using tabular methods, k-map, QM algorithm, CAMP-I algorithm, Phase-I: Determination of Adjacencies, DA, CSC, SSMs and EPCs, CAMPI algorithm, Phase-II: Passport checking, Determination of SPC, CAMP-II algorithm: Determination of solution cube, Cube based operations, determination of selected cubes are wholly within the given switching function or not, Introduction to cube based algorithms.

UNIT-II: PLA Design, PLA Minimization and Folding Algorithms

Introduction to PLDs, basic configurations and advantages of PLDs, PLA-Introduction, Block diagram of PLA, size of PLA, PLA design aspects, PLA minimization algorithm (IISc algorithm), PLA folding algorithm(COMPACT algorithm)-Illustration of algorithms with suitable examples.

UNIT -III: Design of Large Scale Digital Systems

Algorithmic state machine charts-Introduction, Derivation of SM Charts, Realization of SM Chart, control implementation, control unit design, data processor design, ROM design, PAL design aspects, digital system design approaches using CPLDs, FPGAs and ASICs.

UNIT-IV: Fault Diagnosis in Combinational Circuits

Faults classes and models, fault diagnosis and testing, fault detection test, test generation, testing process, obtaining a minimal complete test set, circuit under test methods- Path sensitization method, Boolean difference method, properties of Boolean differences, Kohavi algorithm, faults in PLAs, DFT schemes, built in self-test.

UNIT-V: Fault Diagnosis in Sequential Circuits

Fault detection and location in sequential circuits, circuit test approach, initial state identification, Haming experiments, synchronizing experiments, machine identification, distinguishing experiment, adaptive distinguishing experiments.

TEXT BOOKS:

1. Logic Design Theory-N. N. Biswas, PHI
2. Switching and Finite Automata Theory-Z. Kohavi , 2nd Edition, 2001, TMH
3. Digital system Design using PLDd-Lala

REFERENCE BOOKS:

1. Fundamentals of Logic Design – Charles H. Roth, 5th Ed., Cengage Learning.
2. Digital Systems Testing and Testable Design – MironAbramovici, Melvin A. Breuer and Arthur D. Friedman- John Wiley & Sons Inc.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT02	VLSI TECHNOLOGY AND DESIGN	3	-	-	3

Course Outcome:
The student will be able to

1. Describe the Microelectronics and MOS Technologies
2. Describe various processes in IC Production.
3. Sketch the Layout Design.
4. Discuss the Floor Planning, Architecture Design.

UNIT-I: Review of Microelectronics and Introduction to MOS Technologies:

MOS, CMOS, Bi-CMOS Technology Trends and Projections Electronic design automation concept, ASIC and FPGA design flows, SOC designs, IC fabrication process.

UNIT-II: IC Production Process - I

Crystal Growth and Wafer Preparation: Introduction, Electronic-Grade Silicon, Czochralski Crystal Growing, Silicon Shaping, Process Considerations, Epitaxy: Introduction, Vapour-Phase Epitaxy, Molecular Beam Epitaxy, Silicon on Insulators, Epitaxial Evaluation.

UNIT-III: IC Production Process – II

Lithography: Introduction, Various Lithography techniques: Optical Lithography, Electron Lithography, X-ray Lithography, Ion Lithography. Etching Techniques, Deposition Processes, Ion Implantation, Metallization.

UNIT-IV: Layout Design and Tools:

Transistor Structures, Wires and Vias, Scalable Design Rules, Layout Design Tools.

Subsystem Design and Layout: Some architectural issues, switch logic, gate logic, examples of
structured design (combinational logic), some clocked sequential circuits, other system considerations.

UNIT-V:

Floor Planning: Introduction**,** Floor planning methods, off-chip connections.

Architecture Design: Introduction, Register-Transfer design, high-level synthesis, architectures
for low power, architecture testing.

Chip Design: Introduction and design methodologies.

TEXT BOOKS:

1. S. M. Sze, "VLSI Technology", McGraw-Hill, Second Edition.
2. Essentials of VLSI Circuits and Systems, K. Eshraghian, Douglas A. Pucknell, Sholeh Eshraghian, 2005, PHI Publications.
3. Modern VLSI Design-Wayne Wolf, 3rd Ed., 1997, Pearson Education.

REFERENCE BOOKS:

1. VLSI Design Technologies for Analog and Digital Circuits, Randall L. Geiger, PhillipE. Allen, Noel R. Strader, TMH Publications, 2010.
2. Introduction to VLSI Systems: A Logic, Circuit and System Perspective- Ming-BO Lin,CRC Press, 2011.
3. Principals of CMOS VLSI Design-N.H.E Weste, K. Eshraghian, 2nd Edition, AddisonWesley.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT03	**CMOS ANALOG IC DESIGN**	**3**	**-**	**-**	**3**

Course Outcome:

The student will be able to

1. Describe the concept of MOS device and modeling of MOS drain current for large and small signal anaysis
2. Design and analyze Analog CMOS Sub-Circuits.
3. Distinguish Large signal and small signal analysis of CMOS Amplifiers
4. Describe the CMOS Op-Amps & Applications.

UNIT -I: MOS Devices and Modeling

The MOS Transistor, Passive Components- Capacitor & Resistor, Integrated circuit Layout, CMOS Device Modeling - Simple MOS Large-Signal Model, Other Model Parameters, Small-Signal Model for the MOS Transistor, Computer Simulation Models, Sub-threshold MOS Model.

UNIT -II: Analog CMOS Sub-Circuits

MOS Switch, MOS Diode, MOS Active Resistor, Current Sinks and Sources, Current Mirrors-Cascode current Mirror and Wilson Current Mirror, Current and Voltage References, Band gap Reference.

UNIT -III: CMOS Amplifiers-I

Inverters- Active load inverter, current source inverter, push-pull inverter, Differential Amplifiers- large signal analysis, small signal analysis, design of differential amplifier,

UNIT -IV: CMOS Amplifiers-II

Cascode Amplifiers- Large signal analysis, small signal analysis and frequency response, design of cascade amplifier, Current Amplifiers- single ended input current amplifier, differential input current amplifier, Output Amplifiers- class-a amplifier, source follower, push pull CS amplifier, High Gain Amplifiers Architectures.

UNIT -V: CMOS Op-Amps & Applications

Design of CMOS Op Amps, Compensation of Op Amps, Design of Two-Stage Op Amps,Power-Supply Rejection Ratio of Two-Stage Op Amps, Cascode Op Amps, Measurement Techniques of OP Amp, Characterization of Comparator, Two-Stage comparator design.

TEXT BOOKS:

1. CMOS Analog Circuit Design - Philip E. Allen and Douglas R. Holberg, OxfordUniversity Press, International Second Edition/Indian Edition, 2010.
2. Design of Analog CMOS Integrated Circuits- BehzadRazavi, TMH Edition.

REFERENCE BOOKS:

1. Analog Integrated Circuit Design- David A.Johns, Ken Martin, Wiley Student Edn, 2016.
2. Analysis and Design of Analog Integrated Circuits- Paul R. Gray, Paul J. Hurst, S. Lewisand R. G. Meyer, Wiley India, Fifth Edition, 2010.
3. CMOS: Circuit Design, Layout and Simulation- Baker, Li and Boyce, PHI.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT04	EMBEDDED SYSTEMS DESIGN-I	3	-	-	3

Course Outcome:
The student will be able to

1. Describe the basic concepts of an embedded system and its design
2. Differentiate the hardware and software components required to develop an embedded system
3. Generalize the Embedded System design and development life cycle model and case studies

UNIT-I: Introduction

An Embedded System-Definition, Examples, Current Technologies, Integration in system Design, Embedded system design flow, hardware design concepts, software development, processor in an embedded system and other hardware units, introduction to processor based embedded system design concepts.

UNIT-II: Embedded Hardware

Embedded hardware building blocks, Embedded Processors – ISA architecture models, Internal processor design, processor performance, Board Memory – ROM, RAM, Auxiliary Memory, Memory Management of External Memory, Board Memory and performance. Embedded board Input / output – Serial versus Parallel I/O, interfacing the I/O components, I/O components and performance, Board buses – Bus arbitration and timing, Integrating the Bus with other board components, Bus performance.

UNIT-III: Embedded Software

Device drivers, Device Drivers for interrupt-Handling, Memory device drivers, On-board bus device drivers, Board I/O drivers, Explanation about above drivers with suitable examples, Board support packages, Middleware and Application Software – Middle ware, Middleware examples, Application layer software examples.

UNIT-IV: Embedded System Design, Development, Implementation and Testing

Embedded system design and development lifecycle model, creating an embedded systemarchitecture, introduction to embedded software development process and tools-Host and Targetmachines, linking and locating software, Getting embedded software into the target system,issues in Hardware-Software design and co-design, Implementing the design-The main software utility tool, CAD and the hardware, Translationtools, Debugging tools, testing on host machine, simulators, Laboratory tools, System Boot-Up.

UNIT-V: Embedded System Design-Case Studies

Case studies- Processor design approach of an embedded system, Micro Blaze Processor based Embedded system design on Xilinx platform-NiosII Processor based Embedded system design on Altera platform

TEXT BOOKS:

1. Tammy Noergaard "Embedded Systems Architecture: A Comprehensive Guide for Engineers and Programmers", Elsevier(Singapore) Pvt.Ltd.Publications, 2005.
2. Frank Vahid, Tony D. Givargis, "Embedded system Design: A Unified Hardware/Software Introduction", John Wily & Sons Inc.2002.

REFERENCE BOOKS:

1. Peter Marwedel, "Embedded System Design", Science Publishers, 2007.
2. Arnold S Burger, "Embedded System Design", CMP.
3. Rajkamal, "Embedded Systems: Architecture, Programming and Design", TMH Publications,
4. Second Edition, 2008.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT05	EMBEDDED C (Elective-1)	3	-	-	3

Course Outcome:

The student will be able to

- Describe the basic concepts of programming in embedded system using C.
- Illustrate the 8051 Microcontroller Family
- Develop the methods of Reading Switches
- Develop the structure using Object-oriented programming with C
- Identify the Real-Time Constraints and case studies

UNIT-I: Programming Embedded Systems in C

Introduction, What is an embedded system, Which processor should you use, Which programming language should you use, Which operating system should you use, How do you develop embedded software, Conclusions

Introducing the 8051 Microcontroller Family

Introduction, What's in a name, The external interface of the Standard 8051, Reset requirements, Clock frequency and performance, Memory issues, I/O pins, Timers, Interrupts, Serial interface,
Power consumption, Conclusions

UNIT-II: Reading Switches

Introduction, Basic techniques for reading from port pins, Example: Reading and writing bytes, Example: Reading and writing bits (simple version), Example: Reading and writing bits (generic version), the need for pull-up resistors, Dealing with switch bounce, Example: Reading switch inputs (basic code), Example: Counting goats, Conclusions

UNIT-III: Adding Structure to the Code

Introduction, Object-oriented programming with C, The Project Header (MAIN.H), The Port Header (PORT.H), Example: Restructuring the 'Hello Embedded World' example, Example: Restructuring the goat-counting example, Further examples, Conclusions

UNIT-IV: Meeting Real-Time Constraints

Introduction, Creating 'hardware delays' using Timer 0 and Timer 1, Example: Generating a precise 50 ms delay, Example: Creating a portable hardware delay, Why not use Timer 2?, The need for 'timeout' mechanisms, Creating loop timeouts, Example: Testing loop timeouts, Example: A more reliable switch interface, Creating hardware timeouts, Example: Testing a hardware timeout, Conclusions

UNIT-V: Case Study-Intruder Alarm System

Introduction, The software architecture, Key software components used in this example, running the program, the software, Conclusions

TEXT BOOKS:

1. Embedded C - Michael J. Pont, 2nd Ed., Pearson Education, 2008.

REFERENCE BOOKS:

1. PIC MCU C-An introduction to programming, The Microchip PIC in CCS C – Nigel Gardner.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT06	**DIGITAL SIGNAL PROCESSORS &ARCHITECTURES (Elective-1)**	**3**	**-**	**-**	**3**

Course Outcome:

The student will be able to

1. Apply the FFT algorithm for solving the DFT of a given signal.
2. Describe the computational accuracy.
3. Describe the features and Architectures for Programmable DSP Devices.

UNIT-I: Introduction to Digital Signal Processing: Introduction, a Digital signal processing system, the sampling process, discrete time sequences. Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT), Linear time-invariant systems, Digital filters, Decimation and interpolation.

Computational Accuracy in DSP Implementations: Number formats for signals and coefficients in DSP systems, Dynamic Range and Precision, Sources of error in DSP implementations, A/D Conversion errors, DSP Computational errors, D/A Conversion Errors, Compensating filter.

UNIT-II

Architectures for Programmable DSP Devices Basic Architectural features, DSP Computational Building Blocks, Bus Architecture and Memory, Data Addressing Capabilities, Address Generation UNIT, Programmability and Program Execution, Speed Issues, Features for External interfacing.

UNIT-III

Programmable Digital Signal Processors Commercial Digital signal processing Devices, Data Addressing modes of TMS320C54XX DSPs, Data Addressing modes of TMS320C54XX Processors, Memory space of TMS320C54XX Processors, Program Control, TMS320C54XX Instructions and Programming, On-Chip Peripherals, Interrupts of TMS320C54XX Processors, Pipeline Operation of TMS320C54XX Processors.

UNIT-IV

Analog Devices Family of DSP Devices Analog Devices Family of DSP Devices – ALU and MAC block diagram, Shifter Instruction, Base Architecture of ADSP 2100, ADSP-2181 high performance Processor.

Introduction to Black fin Processor - The Black fin Processor, Introduction to Micro Signal Architecture, Overview of Hardware Processing Units and Register files, Address Arithmetic Unit, Control Unit, Bus Architecture and Memory, Basic Peripherals.

UNIT-V

Interfacing Memory and I/O Peripherals to Programmable DSP Devices Memory space organization, External bus interfacing signals, Memory interface, Parallel I/O interface, Programmed I/O, Interrupts and I/O, Direct memory access (DMA).

TEXT BOOKS:

1. Digital Signal Processing – Avtar Singh and S. Srinivasan, Thomson Publications, 2004.
2. A Practical Approach To Digital Signal Processing-K Padmanabhan, R. Vijayarajeswaran, Ananthi. S, New Age International, 2006/2009
3. Digital Signal Processors, Architecture, Programming and Applications- B. Venkataramani and M. Bhaskar, 2002, TMH

REFERENCE BOOKS:

1. Embedded Signal Processing with the Micro Signal Architecture: Woon-SengGan, Sen M. Kuo, Wiley-IEEE Press, 2007.
2. DSP Processor Fundamentals, Architectures & Features – Lapsleyetal. 2000, S. Chand & Co.
3. Digital Signal Processing Applications Using the ADSP-2100 Family by The Applications Engineering Staff of Analog Devices, DSP Division, Edited by Amy Mar, PHI
4. The Scientist and Engineer’s Guide to Digital Signal Processing by Steven W. Smith, Ph.D., California Technical Publishing, ISBN 0-9660176-3-3, 1997

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT07	SYSTEM ON CHIP (Elective-1)	3	-	-	3

Course Outcome:
The student will be able to

1. Describe SOC System Approach, design and its Architecture.
2. Describe Memory Design for SOC
3. Explain the concepts of bus models and Interconnect Architectures
4. Describe Application Studies and Case Studies

UNIT-I:
Introduction to the System Approach System Architecture, Components of the system, Hardware & Software, Processor Architectures, Memory and Addressing. System level interconnection, An approach for SOC Design, System Architecture and Complexity.

UNIT-II:
Processors Introduction , Processor Selection for SOC, Basic concepts in Processor Architecture, Basic concepts in Processor Micro Architecture, Basic elements in Instruction handling. Buffers: minimizing Pipeline Delays, Branches, More Robust Processors, Vector Processors and Vector Instructions extensions, VLIW Processors, Superscalar Processors.

UNIT-III:
Memory Design for SOC Overview of SOC external memory, Internal Memory, Size, Scratchpads and Cache memory, Cache Organization, Cache data, Write Policies, Strategies for line replacement at miss time, Types of Cache, Split – I, and D – Caches, Multilevel Caches, Virtual to real translation , SOC Memory System, Models of Simple Processor – memory interaction.

UNIT-IV:
Interconnect Customization and Configuration Inter Connect Architectures, Bus: Basic Architectures, SOC Standard Buses, Analytic Bus Models, Using the Bus model, Effects of Bus transactions and contention time. SOC Customization: An overview, Customizing Instruction Processor, Reconfiguration Technologies, Mapping design onto Reconfigurable devices, Instance- Specific design, Customizable Soft Processor, Reconfiguration - overhead analysis and trade-off analysis on reconfigurable Parallelism.

UNIT-V:
Application Studies/Case Studies SOC Design approach, AES algorithms, Design and evaluation, Image compression – JPEG compression. Concepts of IP (Intellectual Property) cores and integration in SOC

TEXT BOOKS:

1. Computer System Design System-on-Chip - Michael J. Flynn and Wayne Luk, Wiely India Pvt. Ltd.
2. ARM System on Chip Architecture – Steve Furber –2nd Ed., 2000, Addison Wesley Professional.

REFERENCE BOOKS:

1. Design of System on a Chip: Devices and Components – Ricardo Reis, 1st Ed., 2004, Springer
2. Co-Verification of Hardware and Software for ARM System on Chip Design (Embedded Technology) – Jason Andrews – Newnes, BK and CDROM.
3. System on Chip Verification – Methodologies and Techniques – PrakashRashinkar, Peter Paterson and Leena Singh L, 2001, Kluwer Academic Publishers.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT08	SOFT COMPUTING TECHNIQUES (Elective-1)	3	-	-	3

Course Outcome:

The student will be able to

1. Describe Artificial Neural Networks, Fuzzy Logic System modeling and control
2. Describe Genetic Algorithm
3. Apply Neural Networks in different areas using MATLAB

UNIT –I: Introduction:

Approaches to intelligent control, Architecture for intelligent control, Symbolic reasoning system, Rule-based systems, the AI approach, Knowledge representation - Expert systems.

UNIT –II: Artificial Neural Networks:

Concept of Artificial Neural Networks and its basic mathematical model, McCulloch-Pitts neuron model, simple perceptron, Adaline and Madaline, Feed-forward Multilayer Perceptron, Learning and Training the neural network, Data Processing: Scaling, Fourier transformation, principal-component analysis and wavelet transformations, Hopfield network, Self-organizing network and Recurrent network, Neural Network based controller.

UNIT –III: Fuzzy Logic System:

Introduction to crisp sets and fuzzy sets, basic fuzzy set operation and approximate reasoning, Introduction to fuzzy logic modeling and control, Fuzzification, inferencing and defuzzification, Fuzzy knowledge and rule bases, Fuzzy modeling and control schemes for nonlinear systems, Self-organizing fuzzy logic control, Fuzzy logic control for nonlinear time delay system.

UNIT –IV: Genetic Algorithm:

Basic concept of Genetic algorithm and detail algorithmic steps, Adjustment of free parameters, Solution of typical control problems using genetic algorithm, Concept on some other search techniques like Tabu search and anD-colony search techniques for solving optimization problems.

UNIT –V: Applications:

GA application to power system optimisation problem, Case studies: Identification and control of linear and nonlinear dynamic systems using MATLAB-Neural Network toolbox, Stability analysis of Neural-Network interconnection systems, Implementation of fuzzy logic controller using MATLAB fuzzy-logic toolbox, Stability analysis of fuzzy control systems.

TEXT BOOKS:

1. Introduction to Artificial Neural Systems - Jacek.M.Zurada, Jaico Publishing House, 1999.
2. Neural Networks and Fuzzy Systems - Kosko, B., Prentice-Hall of India Pvt. Ltd., 1994.

REFERENCE BOOKS:

1. Fuzzy Sets, Uncertainty and Information - Klir G.J. &Folger T.A., Prentice-Hall of India Pvt. Ltd., 1993.
2. Fuzzy Set Theory and Its Applications - Zimmerman H.J. Kluwer Academic Publishers, 1994.
3. Introduction to Fuzzy Control - Driankov, Hellendroon, Narosa Publishers.
4. Artificial Neural Networks - Dr. B. Yagananarayana, 1999, PHI, New Delhi.
5. Elements of Artificial Neural Networks - KishanMehrotra, Chelkuri K. Mohan, Sanjay Ranka, Penram International.
6. Artificial Neural Network –Simon Haykin, 2nd Ed., Pearson Education.
7. Introduction Neural Networks Using MATLAB 6.0 - S.N. Shivanandam, S. Sumati, S. N. Deepa,1/e, TMH, New Delhi.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT09	DIGITAL DESIGN THROUGH HDL (Elective -2)	3	-	-	3

Course Outcome:

The student will be able to

1. Describe the basic concepts of Hardware Description Languages.
2. Develop programs for Combinational and Sequential Logic Circuits HDL
3. Construct the synthesis of Digital Logic Circuit Design
4. Describe Testing of Digital Logic Circuits and CAD Tools

UNIT-I: Digital Logic Design using VHDL

Introduction, designing with VHDL, design entry methods, logic synthesis, entities, architecture, packages and configurations, types of models: dataflow, behavioral, structural, signals vs. variables, generics, data types, concurrent vs. sequential statements, loops and program controls. Digital Logic Design using Verilog HDL Introduction, Verilog Data types and Operators, Binary data manipulation, Combinational and Sequential logic design, Structural Models of Combinational Logic, Logic Simulation, Design Verification and Test Methodology, Propagation Delay, Truth Table models using Verilog.

UNIT-II: Combinational Logic Circuit Design using VHDL

Combinational circuits building blocks: Multiplexers, Decoders, Encoders, Code converters, Arithmetic comparison circuits, VHDL for combinational circuits, Adders-Half Adder, Full Adder, Ripple-Carry Adder, Carry Look-Ahead Adder, Subtraction, Multiplication. Sequential Logic Circuit Design using VHDL Flip-flops, registers & counters, synchronous sequential circuits: Basic design steps, Mealy State model, Design of FSM using CAD tools, Serial Adder Example, State Minimization, Design of Counter using sequential Circuit approach.

UNIT-III: Digital Logic Circuit DesignExamples using Verilog HDL

Behavioral modeling, Data types, Boolean-Equation-Based behavioral models of combinational logics, Propagation delay and continuous assignments, latches and level-sensitive circuits in Verilog, Cyclic behavioral models of flip-flops and latches and Edge detection, comparison of styles for behavioral model; Behavioral model, Multiplexers, Encoders and Decoders, Counters, Shift Registers, Register files, Dataflow models of a linear feedback shift register, Machines with multi cycle operations, ASM and ASMD charts for behavioral modeling, Design examples, Keypad scanner and encoder.

UNIT-IV: Synthesis of Digital Logic Circuit Design:

Introduction to Synthesis, Synthesis of combinational logic, Synthesis of sequential logic with latches and flip-flops, Synthesis of Explicit and Implicit State Machines, Registers and counters.

UNIT-V: Testing of Digital Logic Circuits and CAD Tools :

Testing of logic circuits, fault model, complexity of a test set, path-sensitization, circuits with tree structure, random tests, testing of sequential circuits, built in self test, printed circuit boards, computer aided design tools, synthesis, physical design.

TEXT BOOKS:

1. Stephen Brown &ZvonkoVranesic, “Fundamentals of Digital logic design with VHDL”, Tata McGraw Hill, 2nd edition.
2. Michael D. Ciletti, “Advanced digital design with the Verilog HDL”, Eastern economy edition, PHI.

REFERENCE BOOKS:

1. Stephen Brown &ZvonkoVranesic, “Fundamentals of Digital logic with Verilog design”, Tata McGraw Hill,2nd edition.
2. Bhaskar, “VHDL Primer”,3rd Edition, PHI Publications.
3. Ian Grout, “Digital systems design with FPGAs and CPLDs”, Elsevier Publications.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT10	CPLD & FPGA ARCHITECURES AND APPLICATIONS (Elective -2)	3	-	-	3

Course Outcome:
The student will be able to

1. Describe the Programmable Logic Devices
2. Distinguish the various types of Field Programmable Gate Arrays
3. Apply the typical applications on FPGAs

UNIT-I: Introduction to Programmable Logic Devices

Introduction, Simple Programmable Logic Devices – Read Only Memories, Programmable Logic Arrays, Programmable Array Logic, Programmable Logic Devices/Generic Array Logic; Complex Programmable Logic Devices –Architecture of Xilinx Cool Runner XCR3064XL Organization of FPGAs, FPGA Programming CPLD, CPLD Implementation of a Parallel Adder with Accumulation.

UNIT-II: Field Programmable Gate Arrays

Technologies, Programmable Logic Block Architectures, Programmable Interconnects, Programmable I/O blocks in FPGAs, Dedicated Specialized Components of FPGAs, Applications of FPGAs.

UNIT –III: SRAM Programmable FPGAs:

Introduction, Programming Technology, Device Architecture, The Xilinx XC2000, XC3000 and XC4000 Architectures.

UNIT –IV: Anti-Fuse Programmed FPGAs

Introduction, Programming Technology, Device Architecture, TheActel ACT1, ACT2 and ACT3 Architectures.

UNIT –V: Design Applications

General Design Issues, Counter Examples, A Fast Video Controller, A Fast DMA Controller, Designing Counters with ACT devices, Designing Adders and Accumulators with the ACT Architecture.

TEXT BOOKS:

1. Field Programmable Gate Array Technology - Stephen M. Trimberger, Springer International Edition.

2. Digital Systems Design - Charles H. Roth Jr, LizyKurian John, Cengage Learning.

REFERENCE BOOKS:

1. Field Programmable Gate Arrays - John V. Oldfield, Richard C. Dorf, Wiley India.

2. Digital Design Using Field Programmable Gate Arrays - Pak K. Chan/ SamihaMourad, Pearson Low Price Edition.

3. Digital Systems Design with FPGAs and CPLDs - Ian Grout, Elsevier, Newnes.

4. FPGA based System Design - Wayne Wolf, Prentice Hall Modern Semiconductor Design Series.

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT11	ALGORITHMS FOR VLSI DESIGN –AUTOMATION (Elective-2)	3	-	-	3

Course Outcome:

The student will be able to

- Describe Logic Synthesis
- Discuss VLSI Automation Algorithms
- Identify Placement, Floor Planning & Pin Assignment and Routing techniques

UNIT-I: Logic Synthesis & Verification:

Introduction to combinational logic synthesis, Binary Decision Diagram, Hardware models for High-level synthesis.

UNIT-II: VLSI Automation Algorithms:

Partitioning: Problem formulation, classification of partitioning algorithms, Group migration algorithms, simulated annealing & evolution, other partitioning algorithms.

UNIT-III: Placement, Floor Planning & Pin Assignment:

Problem formulation, simulation base placement algorithms, other placement algorithms, constraint based floor planning, floor planning algorithms for mixed block & cell design. General & channel pin assignment

UNIT-IV: Global Routing:

Problem formulation, classification of global routing algorithms, Maze routing algorithm, line probe algorithm, Steiner Tree based algorithms, ILP based approaches

UNIT-V: Detailed Routing:

problem formulation, classification of routing algorithms, single layer routing algorithms, two layer channel routing algorithms, three layer channel routing algorithms, and switchbox routing algorithms. Over The Cell Routing & Via Minimization: Two layers over the cell routers, constrained & unconstrained via minimization.

REFERENCE BOOKS:

1. NaveedShervani, "Algorithms for VLSI physical design Automation", Kluwer Academic Publisher, Second edition.

2. ChristophnMeinel& Thorsten Theobold, "Algorithm and Data Structures for VLSI Design", KAP, 2002.

3. Rolf Drechsheler : "Evolutionary Algorithm for VLSI", Second edition

4. Trimburger, "Introduction to CAD for VLSI", Kluwer Academic publisher, 2002 .

I M.TECH - I SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT12	VLSI SIGNAL PROCESSING (Elective-2)	3	-	-	3

Course Outcome:

The student will be able to

1. Describe digital signal processing algorithms and processing.
2. Distinguish folding and unfolding algorithms.
3. Explain systolic architectures
4. Explain various convolution algorithms.
5. Describe applications of DSP processor in low power design.

UNIT-I:

Introduction to DSP: Typical DSP algorithms, DSP algorithms benefits, Representation of DSP algorithms.

Pipelining and Parallel Processing: Introduction, Pipelining of FIR Digital filters, Parallel Processing, Pipelining and Parallel Processing for Low Power.

Retiming: Introduction – Definitions and Properties – Solving System of Inequalities – Retiming Techniques.

UNIT-II:

Folding: Introduction -Folding Transform - Register minimization Techniques – Register minimization in folded architectures – folding of multirate systems

Unfolding: Introduction – An Algorithm for Unfolding – Properties of Unfolding – critical Path, Unfolding and Retiming – Applications of Unfolding

UNIT-III:

Systolic Architecture Design: Introduction – Systolic Array Design Methodology – FIR Systolic Arrays – Selection of Scheduling Vector – Matrix Multiplication and 2D Systolic Array Design – Systolic Design for Space Representations contain Delays

UNIT-IV:

Fast Convolution: Introduction – Cook-Toom Algorithm – Winogard algorithm – Iterated Convolution – Cyclic Convolution – Design of Fast Convolution algorithm by Inspection

UNIT-V:

Low Power Design: Scaling Vs Power Consumption –Power Analysis, Power Reduction techniques – Power Estimation Approaches Programmable DSP: Evaluation of Programmable Digital Signal Processors, DSP Processors for Mobile and Wireless Communications, Processors for Multimedia Signal Processing.

TEXT BOOKS:

1. VLSI Digital Signal Processing- System Design and Implementation – Keshab K. Parhi, 1998, Wiley Inter Science.

2. VLSI and Modern Signal Processing – Kung S. Y, H. J. While House, T. Kailath, 1985, Prentice Hall.

REFERENCE BOOKS:

1. Design of Analog – Digital VLSI Circuits for Telecommunications and Signal Processing – Jose E. France, YannisTsividis, 1994, Prentice Hall.

2. VLSI Digital Signal Processing – Medisetti V. K, 1995, IEEE Press (NY), USA

I M.TECH - I SEMESTER

Course Code	Course Name	L	T	P	C
V18VLL01	VLSI LAB	-	-	4	2

PART-A: VLSI Lab (Front-end Environment)

--The students are required to design the logic circuit to perform the followingexperiments using necessary simulator (Xilinx ISE Simulator/ Mentor GraphicsQuesta Simulator) to verify the logical /functional operation and to perform theanalysis with appropriate synthesizer (Xilinx ISE Synthesizer/Mentor GraphicsPrecision RTL) and then verify the implemented logic with different hardwaremodules/kits (CPLD/FPGA kits).

--The students are required to acquire the knowledge in both the Platforms (Xilinxand Mentor graphics) by perform at least Five experiments on each Platform.

List of Experiments:

1. Adder-Substractor.

2. Priority Encoder.

3. LFSR

4. Synchronous RAM.

5. ALU.

6. Up Counter/Down Counter.

7. Fire Detection and Control System using Combinational Logic circuits.

8. Traffic Light Controller using Sequential Logic circuits

9. Pattern Detection using Moore Machine.

10. Finite State Machine (FSM) based logic circuit.

PART-A: VLSI Lab (Back-end Environment)

--The students are required to design and implement the Layout of the following experiments of any Five using CMOS 130nm Technology with Mentor Graphics Tool.

List of Experiments:

1. Inverter Characteristics.

2. Full Adder.

3. RS-Latch, D-Latch and Clock Divider.

4. Synchronous Counter and Asynchronous Counter.

5. Static and Dynamic RAM.

6. ROM

7. Differential Amplifier.

8. Ring Oscillator

9. Digital-to-Analog-Converter.

10. Analog-to-Digital Converter.

Lab Requirements:

Software: Xilinx ISE Suite, Mentor Graphics-Questa Simulator, Mentor Graphics-Precision RTL, Mentor Graphics Back End/Tanner Software tool.

Hardware: Personal Computer with necessary peripherals, configuration and operating Systemand relevant VLSI (CPLD/FPGA) hardware Kits.

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT13	DESIGN FOR TESTABILITY	3	-	-	3

Course Outcome:
The students will be able to
1. Interpret the concepts of modeling digital circuits and simulation.
2. Describe modeling of faults and its testing for SSF.
3. Explain various techniques of testing.

UNIT-I: Modeling:
Modeling digital circuits at logic level, register level and structural level. Levels of modeling.

Logic Simulation: Types of simulation, delay models, element evaluation, hazard detection, gate level event driven simulation.

UNIT-II: Fault Modeling:

Logic fault models, fault detection and redundancy, fault equivalence and fault location. Single stuck and multiple stuck – fault models. Fault simulation applications, general techniques for combinational circuits.

UNIT-III: Testing for Single Stuck Faults (SSF):

Automated test pattern generation (ATPG/ATG) for SSFs in combinational and sequential circuits, functional testing with specific fault models. Vector simulation – ATPG vectors, formats, compaction and compression, selecting ATPG tool.

UNIT-IV: Design for Testability:

Testability trade-offs, techniques. Scan architectures and testing – controllability and observability, generic boundary scan, fully integrated scan, storage cells for scan design. Board level and system level DFT approaches. Boundary scan standards. Compression techniques – different techniques, syndrome test and signature analysis.

UNIT-V: Built-in-Self-Test (BIST):

BIST concepts and test pattern generation, specific BIST architectures – CSBL, BEST, RTS, LOCST, STUMPS, CBIST, RTD, SST, CATS, CSTP, BILBO. Brief ideas on some advanced BIST concepts and design for self-test at board level.

Reference Books

2. Michael L.Bushnell, VishwaniD.Agrawal, Essentials of Electronic Testing, Springer, 2000.
3. Michael D.Ciletti, Modeling, Synthesis, and Rapid Prototyping with the Verilog HDL., Prentice Hall, 1999.

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT14	CMOS DIGITAL IC DESIGN	3	-	-	3

Course Outcome:

The student will be able to

1. Describe the concepts of MOS design.
2. Demonstrate the combinational, sequential and dynamic CMOS logic circuits.
3. Explain various semiconductor memories.

UNIT-I: MOS Design

NMOS & Pseudo NMOS Logic – Inverter, Inverter threshold voltage, Output high voltage, Output Low Voltage, Gain at gate threshold voltage, Transient response, Rise time, Fall time; CMOS logic - Inverter, logic gates.

UNIT-II: Combinational MOS Logic Circuits:

MOS logic circuits with NMOS loads, Primitive CMOS logic gates – NOR & NAND gate, Complex Logic circuits design – Realizing Boolean expressions using NMOS gates and CMOS gates, AOI and OIA gates, CMOS full adder, CMOS transmission gates, Designing with Transmission gates.

UNIT-III: Sequential MOS Logic Circuits

Behaviour of bistable elements, Latch, Clocked latch and flip flop circuits, CMOS D latch and edge triggered flip-flop.

UNIT-IV: Dynamic Logic Circuits

Basic principle, Voltage Bootstrapping, Synchronous dynamic pass transistor circuits, Dynamic CMOS transmission gate logic, High performance Dynamic CMOS circuits – Domino logic, NORA logic.

UNIT-V: Semiconductor Memories

Types, RAM array organization, DRAM – Types, Operation, Leakage currents in DRAM cell and refresh operation, SRAM operation Leakage currents in SRAM cells, Flash Memory- NOR flash and NAND flash.

TEXT BOOKS:

1. Digital Integrated Circuit Design – Ken Martin, Oxford University Press, 2011.

2. CMOS Digital Integrated Circuits Analysis and Design – Sung-Mo Kang, Yusuf Leblebici,

TMH, 3rd Ed., 2011.

REFERENCE BOOKS:

2.Digital Integrated Circuits– A Design Perspective, Jan M. Rabaey, AnanthaChandrakasan,BorivojeNikolic, 2nd Ed., PHI.

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT15	EMBEDDED SYSTEM DESIGN - II	3	-	-	3

Course Outcome:
The student will be able to

1. Describe the ARM architecture and its memory management.
2. Apply instruction set for Arm programming.
3. Develop basic ARM programs using C.
4. Describe the concepts of memory management.

UNIT-I:

ARM Architecture ARM Design Philosophy, Registers, PSR, Pipeline, Interrupts and Vector Table, Architecture Revision, ARM Processor Families. Introduction to ARM Cortex.

UNIT-II:

ARM Programming Model-I Instruction Set: Data Processing Instructions, Branch, Load, Store Instructions, PSR Instructions, Conditional Instructions.

UNIT-III:

ARM Programming Model-II Thumb Instruction Set: Register Usage, Other Branch Instructions, Data Processing Instructions, Single-Register and Multi Register Load-Store Instructions, Stack, Software Interrupt Instructions.

UNIT-IV:

ARM Programming: Simple C Programs using Function Calls, Pointers, Structures, Integer and Floating Point Arithmetic, Assembly Code using Instruction Scheduling, Register Allocation, Conditional Execution and Loops.

UNIT-V:

Memory Management Cache Architecture, Polices, Flushing and Caches, MMU, Page Tables, Translation, Access Permissions, Content Switch.

TEXT BOOKS:

1. ARM Systems Developer's Guides- Designing & Optimizing System Software – Andrew N. Sloss, Dominic Symes, Chris Wright, 2008, Elsevier.

2. ARM System-on-chip Architecture- Stephen Bo Furber - Addison-Wesley, 2000

REFERENCE BOOKS:

1. Embedded Microcomputer Systems, Real Time Interfacing – Jonathan W. Valvano – Brookes / Cole, 1999, Thomas Learning.

I M.TECH - II SEMESTER

Course Code	Course Name	L	T	P	C
V18VLT16	EMBEDDED REAL TIME SYSTEMS	3	-	-	3

Course Outcome:

The student will be able to

1. Describe the concepts of real time operating system.
2. Explain various RTOS and their programming concepts.
3. Express program modeling for case studies.
4. Construct an image for a target board.
5. Describe RT Linux

UNIT-I: Introduction

OS Services, Process Management, Timer Functions, Event Functions, Memory Management, Device, File and IO Systems Management, Interrupt Routines in RTOS Environment and Handling of Interrupt Source Calls, Inter Process communication Functions, Real-Time Operating Systems, Basic Design Using an RTOS, RTOS Task Scheduling Models, Interrupt Latency and Response of the Tasks as Performance Metrics, OS Security Issues.

UNIT-II: RTOS Programming

Basic Functions and Types of RTOS for Embedded Systems, RTOS mCOS-II, RTOS Vx Works,

Programming concepts of above RTOS with relevant Examples, Programming concepts of RTOS Windows CE, RTOS OSEK, RTOS Linux 2.6.x and RTOS RT Linux.

UNIT-III: Program Modeling – Case Studies

Case study of embedded system design and coding for an Automatic Chocolate Vending Machine (ACVM) Using Mucos RTOS, case study of digital camera hardware and software architecture, case study of coding for sending application layer byte streams on a TCP/IP Network Using RTOS Vx Works, Case Study of Embedded System for an Adaptive Cruise Control (ACC) System in Car, Case Study of Embedded System for a Smart Card, Case Study of Embedded System of Mobile Phone Software for Key Inputs.

UNIT-IV: Target Image Creation & Programming in Linux

Off-The-Shelf Operating Systems, Operating System Software, Target Image Creation for Window XP Embedded, Porting RTOS on a Micro Controller based Development Board. Overview and programming concepts of Unix/Linux Programming, Shell Programming, System Programming.

UNIT-V: Programming in RT Linux

Overview of RT Linux, Core RT Linux API, Program to display a message periodically, semaphore management, Mutex, Management, Case Study of Appliance Control by RT Linux System.

TEXT BOOKS:

1. Dr. K.V.K.K. Prasad: “Embedded/Real-Time Systems” Dream Tech Publications, Blackpad book.
2. Rajkamal: “Embedded Systems-Architecture, Programming and Design”, Tata McGraw Hill Publications, Second Edition, 2008.

REFERENCES:

1. Labrosse, “Embedding system building blocks “, CMP publishers.
2. Rob Williams,” Real time Systems Development”, Butterworth Heinemann Publications.

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT17	LOW POWER VLSI (ELECTIVE-III)	3	-	-	3

Course Outcome:
The students will be able to

1. Identify various sources of power consumption
2. Estimate the power consumption sing simulation and probabilistic approaches.
3. Discuss low power design at various levels of abstraction.
4. Discuss clock distribution for low power dissipation.

UNIT-I: Introduction
Need for low power VLSI chips, Sources of power dissipation. Emerging Low power approaches. Dynamic dissipation in CMOS, Transistor sizing & gate oxide thickness, Impact of technology Scaling, Technology & Device innovation.

UNIT-II: Power estimation Simulation Power analysis:
SPICE circuit simulators, gate level logic simulation, capacitive power estimation, static state power, gate level capacitance estimation, architecture level analysis, data correlation analysis in DSP systems. Monte Carlo simulation.

Probabilistic power analysis:
Random logic signals, probability & frequency, probabilistic power analysis techniques, signal entropy.

UNIT-III: Low Power Design Circuit level:
Power consumption in circuits. Flip Flops & Latches design, high capacitance nodes, low power digital cells library

Logic level:

Gate reorganization, signal gating, logic encoding, state machine encoding, pre-computation logic

UNIT-IV: Low power Architecture & Systems:

Power & performance management, switching activity reduction, parallel architecture with voltage reduction, flow graph transformation, low power arithmetic components, low power memory design.

UNIT-V: Low power Clock Distribution:

Power dissipation in clock distribution, single driver Vs distributed buffers, Zero skew Vs tolerable skew, chip & package co design of clock network

Algorithm &architectural level methodologies: Introduction, design flow, Algorithmic level analysis & optimization, Architectural level estimation & synthesis.

TEXTBOOKS:

1. Gary K. Yeap, "Practical Low Power Digital VLSI Design", KAP, 2002
2. Rabaey, Pedram, "Low power design methodologies" Kluwer Academic, 1997

REFERENCES BOOKS:

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT18	CMOS MIXED SIGNAL CIRCUIT DESIGN (ELECTIVE-III)	3	-	-	3

Course Outcome:
The students will be able to

1. Design Mixed signal based circuits starting from basics constraints to advanced constraints.
2. Analyze and design filter architectures using switched capacitor integrator circuits.
3. Design circuits like PLL,A/D and D/A converters.
4. Design over sampling circuits and higher order modulators.

UNIT-I: Switched Capacitor Circuits
Introduction to Switched Capacitor circuits- basic building blocks, Operation and Analysis, Non ideal effects in switched capacitor circuits, Switched capacitor integrators first order filters, Switch sharing, bi quad filters.

UNIT-II: Phased Lock Loop (PLL)
Basic PLL topology, Dynamics of simple PLL, Charge pump PLLs-Lock acquisition, Phase/Frequency detector and charge pump, Basic charge pump PLL, Non-ideal effects in PLLs- PFD/CP non-idealities, Dead zone, Jitter in PLLs; applications.

Unit III: Sampling Circuits
Basic sampling circuits for analog signal sampling, performance metrics of sampling circuits, different types of sampling switches. Sample-and-Hold Architectures- Open-loop & closed-loop architectures, open-loop architecture with miller capacitance, multiplexed-input architectures, recycling architecture, switched capacitor architecture, current-mode architecture.

UNIT-IV: D/A Converters
Nyquist rate D/A converters- Decoder based converters, Binary-Scaled converters, Thermometer-code converters, Hybrid converters.

UNIT-V: A/D Converters
Successive approximation converters, Flash converter, Two-step A/D converters, Interpolating A/D converters, Folding A/D converters, Pipelined A/D converters, Time-interleaved converters.

TEXT BOOKS:

1. Design of Analog CMOS Integrated Circuits- BehzadRazavi, TMH Edition, 2002

2. CMOS Analog Circuit Design - Philip E. Allen and Douglas R. Holberg, Oxford University Press, International Second Edition/Indian Edition, 2010.

3. Analog Integrated Circuit Design- David A. Johns,Ken Martin, Wiley Student Edition,

2016

REFERENCE BOOKS:

1. CMOS Integrated Analog-to- Digital and Digital-to-Analog converters-Rudy Van De Plassche, Kluwer Academic Publishers, 2003

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT19	SYSTEM VERILOG (ELECTIVE-III)	3	-	-	3

Course Outcome:
The students will be able to

1. Describe data types, RTL models and rules in SystemVerilog.
2. Demonstrate user defined, enumerated data types and structures in SystemVerilog.
3. Explain the procedural blocks, FSM and interfaces in SystemVerilog.

UNIT-I: Introduction to SystemVerilog:

SystemVerilog Declaration Spaces: Packages, unit compilation-unit declarations, Declarations in unnamed statement blocks, Simulation time units and precision

SystemVerilog Literal Values and Built-in Data Types

Enhanced literal value assignments, ‘define enhancements, SystemVerilog variables, Using 2-state types in RTL models, Relaxation of type rules, Signed and unsigned modifiers, Static and automatic variables, Deterministic variable initialization, Type casting

UNIT-II: SystemVerilog User-Defined and Enumerated Types

User-defined types, Enumerated types

SystemVerilog Arrays, Structures and Unions Structures, Unions, Arrays, The for each array looping construct, Array querying system functions, The bits “size of” system function, Dynamic arrays, associative arrays, sparse arrays and strings

UNIT-III: SystemVerilog Procedural Blocks, Tasks and Functions

Verilog general purpose always procedural block, SystemVerilog specialized procedural blocks, Enhancements to tasks and functions

UNIT-IV: SystemVerilog Procedural Statements

New operators, Operand enhancements, Enhanced for loops, Bottom testing do...while loop, The for each array looping construct, Enhanced block names, Statement labels, Enhanced case statements, Enhanced if...else decisions

Modeling Finite State Machines with SystemVerilog

Modeling state machines with enumerated types, Using 2-state types in FSM models

UNIT-V: SystemVerilog Interfaces

Interface concepts, Interface declarations, Using interfaces as module ports, Instantiating and connecting interfaces, Referencing signals within an interface, Interface mod ports, Using tasks and functions in interfaces, Using procedural blocks in interfaces, Reconfigurable interfaces, Verification with interfaces

TEXTBOOKS:

1. Sutherland, “Systemverilog for Design”, Springer publications

2. Christian B Spear, “SystemVerilog for Verification: A guide to learning the Testbench language features”, Springer publications, 3 rd edition.

3. VijayaRaghavan, “SystemVerilog Assertions”, Springer publications, 2005

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT20	SEMICONDUCTOR MEMORY DESIGN AND TESTING (Elective-iii)	3	-	-	3

I M.TECH - II SEMESTER

Course Outcome:

The students will be able to

1. Describe concepts of volatile and non volatile memory technologies.
2. Discuss the fault modeling and testing memory devices.
3. Explain the reliability and radiation effects of memory devices.
4. Describe the advanced memory technologies.

UNIT-I: Random Access Memory Technologies

SRAM – SRAM Cell structures, MOS SRAM Architecture, MOS SRAM cell and peripheral circuit operation, Bipolar SRAM technologies, SOI technology, Advanced SRAM architectures and technologies, Application specific SRAMs, DRAM – DRAM technology development, CMOS DRAM, DRAM cell theory and advanced cell structures, BICMOS DRAM, soft error failure in DRAM, Advanced DRAM design and architecture, Application specific DRAM.

UNIT-II: Non-volatile Memories

Masked ROMs, High density ROM, PROM, Bipolar ROM, CMOS PROMS, EPROM, Floating gate EPROM cell, One time programmable EPROM, EEPROM, EEPROM technology and architecture, Non-volatile SRAM, Flash Memories (EPROM or EEPROM), advanced Flash memory architecture.

UNIT-III: Memory Fault Modeling Testing and Memory Design for Testability and Fault Tolerance

RAM fault modeling, Electrical testing, Pseudo Random testing, Megabit DRAM Testing, nonvolatile memory modeling and testing, IDDQ fault modeling and testing, Application specific memory testing, RAM fault modeling, BIST techniques for memory.

UNIT-IV: Semiconductor Memory Reliability and Radiation Effects

General reliability issues RAM failure modes and mechanism, Non-volatile memory reliability, reliability modeling and failure rate prediction, Design for Reliability, Reliability Test Structures, Reliability Screening and qualification, Radiation effects, Single Event Phenomenon (SEP), Radiation Hardening techniques, Radiation Hardening Process and Design Issues, Radiation Hardened Memory characteristics, Radiation Hardness Assurance and Testing, Radiation. Dosimetry, Water Level Radiation Testing and Test structures.

UNIT-V: Advanced Memory Technologies and High-density Memory Packing Technologies

Ferroelectric RAMs (FRAMs), GaAs FRAMs, Analog memories, magneto resistive RAMs (MRAMs), Experimental memory devices, Memory Hybrids and MCMs (2D), Memory Stacks and MCMs (3D), Memory MCM testing and reliability issues, Memory cards, High Density Memory Packaging Future Directions.

TEXT BOOKS:

1. Semiconductor Memories Technology – Ashok K. Sharma, 2002, Wiley.

2. Advanced Semiconductor Memories – Architecture, Design and Applications - Ashok K. Sharma- 2002, Wiley.

3. Modern Semiconductor Devices for Integrated Circuits – Chenming C Hu, 1st Ed., Prentice Hall.

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT21	HARDWARE SOFTWARE CO-DESIGN (Elective-iv)	3	-	-	3

Course Outcome:
The students will be able to

1. Describe co-design architectures, methods and algorithms.
2. Describe prototyping emulation and target architecture using embedded systems.
3. Explain the compilation techniques.
4. Distinguish the various design specifications and verifications.
5. Describe the system level specifications and design using languages.

UNIT-I: Co- Design Issues:
Co- Design Models, Architectures, Languages, A Generic Co-design Methodology.
Co- Synthesis Algorithms Hardware software synthesis algorithms: hardware – software partitioning distributed system co-synthesis.
UNIT-II:
Prototyping and Emulation Prototyping and emulation techniques, prototyping and emulation environments, future developments in emulation and prototyping architecture specialization techniques, system communication infrastructure
Target Architectures Architecture Specialization techniques, System Communication infrastructure, Target Architecture and Application System classes, Architecture for control dominated systems (8051-Architectures for High performance control), Architecture for Data dominated systems (ADSP21060, TMS320C60), Mixed Systems.
UNIT-III:
Compilation Techniques and Tools for Embedded Processor Architectures Modern embedded architectures, embedded software development needs, compilation technologies, practical consideration in a compiler development environment.
UNIT-IV:
Design Specification and Verification Design, co-design, the co-design computational model, concurrency coordinating con current computations, interfacing components, design verification, implementation verification, verification tools, interface verification.
UNIT-V:
Languages for System-Level Specification and Design-I System-level specification, design representation for system level synthesis, system level specification languages.
Languages for System-Level Specification and Design-II
Heterogeneous specifications and multi-language co-simulation, the cosyma system and lycos system.
TEXT BOOKS:
1. Hardware / Software Co- Design Principles and Practice – JorgenStaunstrup, Wayne Wolf – 2009, Springer.
2. Hardware / Software Co- Design - Giovanni De Micheli, MariagiovannaSami, 2002, Kluwer Academic Publishers.
REFERENCE BOOKS:
1. A Practical Introduction to Hardware/Software Co-design -Patrick R.Schaumont - 2010 – Springer Publications.

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT22	EMBEDDED COMPUTING (Elective-iv)	3	-	-	3

Course Outcome:
The students will be able to

1. Apply the concepts of Linux OS and programming
2. Describe the different software development tools and interfacing modules
3. Discuss the networking basics
4. Describe the IA32 instruction set

UNIT – I:
Programming on Linux Platform:
System Calls, Scheduling, Memory Allocation, Timers, Embedded Linux, Root File System, Busy Box. **Operating System Overview**: Processes, Tasks, Threads, Multi-Threading, Semaphore, Message Queue.
UNIT – II:
Introduction to Software Development Tools:
GNU GCC, make, gdb, static and dynamic linking, C libraries, compiler options, code optimization switches, lint, code profiling tools.
UNIT – III:
Interfacing Modules:
Sensor and actuator interface, data transfer and control, GPS, GSM module interfacing with data processing and display, OpenCV for machine vision, Audio signal processing.
UNIT – IV:
Networking Basics:
Sockets, ports, UDP, TCP/IP, client server model, socket programming, 802.11, Bluetooth, ZigBee, SSH, firewalls, network security.
UNIT – V:
IA32 Instruction Set: application binary interface, exception and interrupt handling, interruptlatency, assemblers, assembler directives, macros, simulation and debugging tools.

TEXT BOOKS:
1. Peter Barry and Patrick Crowley, “Modern Embedded Computing”,1st Edition. Elsevier/Morgan Kaufmann, 2012.
2. Linux Application Development - Michael K. Johnson, Erik W. Troan, Adission Wesley, 1998.
3. Assembly Language for x86 Processors by Kip R. Irvine
4. Intel® 64 and IA-32 Architectures Software Developer Manuals

REFERENCE BOOKS

3. W. Richard Stevens, “UNIX Network Programming”, Pearson

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT23	DESIGN FOR INTERNET OF THINGS (Elective-iv)	3	-	-	3

Course Outcome:
The student will be able to

1. Describe M2M and IOT technologies
2. Identify the layers and protocols in IOT
3. Describe various communication technologies used in IOT
4. Demonstrate various hardware components required for IOT applications

UNIT I – INTRODUCTION
Introduction from M2M to IoT, M2M and IoT Technology Fundamentals - Devices and gateways. IoT - An Architectural Overview – Building architecture, Main design principles and needed capabilities.
UNIT II – IOT PROTOCOLS
Functionality of Layers in IoT –Study of protocols - WirelessHART, Z-Wave, 6LoWPAN, RPL, CoAP, MQTT, oneM2M, ETSI M2M.
UNIT III COMMUNICATION TECHNOLOGIES IN IOT
IoT Connectivity – IEEE 802.15.4, WiFi, Bluetooth, Zigbee, Short Range Communications, LPWAN, Cellular Systems, Challenges and Solutions in 5G Era.
UNIT IV SYSTEM HARDWARE AND PROTOTYPING
Sensors, Actuators, Radio Frequency Identification, Wireless Sensor Networks and Participatory Sensing Technology, Prototyping the Embedded Devices for IoTs.
UNIT V – IOT APPLICATIONS
BUILDING IoT Application WITH RASPBERRY PI - Physical device – Raspberry Pi Interfaces – Programming – APIs / Packages – Web services, Real time applications of IoT- Connecting IoT to cloud – Cloud Storage for IoT.**Case Studies** - Smart and Connected Cities, Public Safety.
TEXTBOOKS:
1. Jan Holler, VlasiosTsiatsis, Catherine Mulligan, Stefan Avesand, StamatisKarnouskos, David Boyle, "From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence", 1 st Edition, Academic Press, 2014.

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLT24	SOFTWARE FOR EMBEDDED SYSTEMS (Elective-iv)	3	-	-	3

Course outcomes:

The student will be able to

1. Describe the fundamentals of embedded Programming.
2. Describe the GNU C Programming Tool Chain in Linux.
3. Explain time driven architecture, Serial Interface with a case study.
4. Illustrate the concepts of embedded Java for Web Enabling of systems.

UNIT I EMBEDDED PROGRAMMING

C and Assembly - Programming Style - Declarations and Expressions - Arrays, Qualifiers and Reading Numbers - Decision and Control Statements - Programming Process - More Control Statements - Variable Scope and Functions - C Preprocessor - Advanced Types – Simple Pointers - Debugging and Optimization – In-line Assembly.

UNIT II C PROGRAMMING TOOLCHAIN IN LINUX

C preprocessor - Stages of Compilation - Introduction to GCC - Debugging with GDB – The Make utility - GNU Configure and Build System - GNU Binary utilities - Profiling - using *gprof* - Memory Leak Detection with *valgrind* - Introduction to GNU C Library

UNIT III EMBEDDED C AND EMBEDDED OS

Adding Structure to 'C' Code: Object oriented programming with C, Header files for Project and Port, Examples. Meeting Real-time constraints: Creating hardware delays - Need for timeout mechanism - Creating loop timeouts - Creating hardware timeouts. Creating embedded operating system: Basis of a simple embedded OS, Introduction to sEOS, Using Timer 0 and Timer 1, Portability issue, Alternative system architecture, Important design considerations when using sEOS.

UNIT IV TIME-DRIVEN MULTI-STATE ARCHITECTURE AND HARDWARE

Multi-State systems and function sequences: Implementing multi-state (Timed) system - Implementing a Multi-state (Input/Timed) system. Using the Serial Interface: RS232 - The Basic RS-232 Protocol - Asynchronous data transmission and baud rates - Flow control – Software architecture - Using on-chip UART for RS-232 communication - Memory requirements – The serial menu architecture - Examples. Case study: Intruder alarm system.

UNIT V EMBEDDED JAVA

Introduction to Embedded Java and J2ME – Smart Card basics – Java card technology overview – Java card objects – Java card applets – working with APDUs – Web Technology for Embedded Systems.

TEXTBOOKS:

1. Steve Oualline, 'Practical C Programming 3rd Edition', O'Reilly Media, Inc, 2006.

2. Stephen Kochan, "Programming in C", 3rd Edition, Sams Publishing, 2009.

3. Michael J Pont, "Embedded C", Pearson Education, 2007.

4. Zhiqun Chen, 'Java Card Technology for Smart Cards: Architecture and Programmer's Guide', Addison-Wesley Professional, 2000.

I M.TECH - II SEMESTER

COURSE CODE	COURSE NAME	L	T	P	C
V18VLL02	EMBEDDED SYSTEM DESIGN LAB	-	-	4	2

1. The Students are required to write the programs using C-Language according to the Experiment requirements using RTOS Library Functions and macros ARM-926 developer kits and ARM-Cortex.
2. The following experiments are required to develop the algorithms, flow diagrams, source code and perform the compilation, execution and implement the same using necessary hardware kits for verification. The programs developed for the implementation should be at the level of an embedded system design.
3. The students are required to perform THREE experiments from Part-I and ALL experiments from Part-II and Part-III.

List of Experiments:

Part-I: Experiments using ARM-926 with PERFECT RTOS

1. Register a new command in CLI.

2. Create a new Task.

3. Interrupt handling.

4. Allocate resource using semaphores.

5. Share resource using MUTEX.

6. Reader's Writer's Problem for concurrent Tasks.

Part-II Experiments on ARM-CORTEX processor using any open source RTOS.

(Coo-Cox-Software-Platform)

1. Implement the interfacing of display with the ARM- CORTEX processor.

2. Interface ADC and DAC ports with the Input and Output sensitive devices.

3. Sensor interface with ARM-Cortex processor

Part-III Experiments on Raspberry PI (RPI) & ESP8266

1. RPI interfacing with sensor.

2. Sensor data upload to cloud using RPI.

3. ESP8266 interfacing with sensor.

4. Sensor data upload to cloud using ESP8266.

Lab Requirements:

Software:

1. Eclipse IDE for C and C++ (YAGARTO Eclipse IDE), Perfect RTOS Library, COO-COX Software Platform, YAGARTO TOOLS, and TFTP SERVER.

2. LINUX Environment for the compilation using Eclipse IDE & Java with latest version.

3. Arduino IDE
4. Python

Hardware:

1. The development kits of ARM-926 Developer Kits, ARM-Cortex Boards, Raspberry PI Board and ESP 8266 Board
2. Serial Cables, Network Cables and recommended power supply for the board.
3. Sensors for interfacing.

SYLLABUS FOR M.TECH (COMPUTER SCIENCE AND ENGINEERING)

I M.TECH – I SEMESTER

		L	T	P	C
V18CTT01	**OBJECT ORIENTED SOFTWARE ENGINEERING**	3	0	0	3

Course Outcomes:

After completion of this course the students will be able to:

1. Describe Software development life cycle for Object-Oriented solutions of Real-world problems.
2. Discuss Planning, Estimation and CASE tools.
3. Apply OO concepts along with their applicability contexts.
4. Demonstrate object oriented analysis and design.
5. Describe Implementation, Integration and Maintenance phases.

UNIT I: Introduction to Classical software Engineering: Historical, Economic and Maintenance aspects. Introduction to OO Paradigm. Different phases in structured paradigm and OO Paradigm. Software Process and different life cycle models and corresponding strengths and weaknesses.

UNIT II: Planning and Estimation: Estimation of Duration and Cost, COCOMO components of software. Project Management plan. Planning Object-Oriented Projects. **Tools for step wised refinement:** Cost - Benefit analysis, Introduction to software metrics and CASE tools. Taxonomy and scope of CASE tools.

UNIT III: Modules to objects: Cohesion and Coupling, Data Encapsulation and Information hiding aspects of Objects. Inheritance, Polymorphism and Dynamic Binding aspects. Cohesion and coupling of objects. Reusability, Portability and Interoperability aspects. Introduction to testing, with focus on Utility, Reliability, Robustness, Performance, Correctness.

UNIT IV: Requirement phase: Rapid Prototyping method, Specification phase, Specification Document, Formal methods of developing specification document, Examples of other semi - formal methods of using Finite-State- Machines, Petri nets and E- Language.

Analysis phase: Use case Modeling, Class Modeling, Dynamic Modeling, Testing during OO Analysis.

UNIT V: Design phase: Data oriented design, Object Oriented design, and Formal techniques for detailed design. Challenges in design phase.**IIM Phases:** Implementation, Integration and maintenance phases, OOSE aspects in these phases.

TEXT BOOKS:

1. Object oriented and Classical Software Engineering, **7/e**, Stephen R. Schach, TMH

2. Object oriented and classical software Engineering, Timothy Lethbridge, Robert Laganiere, TMH, **Second Edition**.

REFERENCE BOOKS:

1. Component-based software engineering: 7th international symposium, **CBSE 2004**, Ivica Crnkovic, Springer.

I M.TECH – I SEMESTER

V18CTT02	**NOSQL Database**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

Course Outcomes:

1. After successful completion of the course students should be able to:
2. Define, compare and use the four types of NoSQL Databases (Document-oriented, KeyValue Pairs, Column oriented and Graph).
3. Demonstrate an understanding of the detailed architecture, define objects, load data, query data
4. Performance tune Column-oriented NoSQL databases.
5. Explain the detailed architecture, define objects, load data, query data and performance tune Document oriented NoSQL databases.

UNIT I: Introduction: Overview and History of NoSQL Databases Definition of the Four Types of NoSQL Database, The Value of Relational Databases, Getting at Persistent Data, Concurrency, Integration, Impedance Mismatch, Application and Integration Databases, Attack of the Clusters, The Emergence of NoSQL, Key Points, Comparison of relational databases to new NoSQL stores, MongoDB, Cassandra, HBASE, Neo4j use and deployment, Application, RDBMS approach, Challenges NoSQL approach, Key-Value and Document Data Models, Column-Family Stores, Aggregate-Oriented Databases.

UNIT II: Replication and sharding, MapReduce on databases. Distribution Models, Single Server, Sharding, Master-Slave Replication, Peer-to-Peer Replication, Combining Sharding and Replication.

UNIT III: NoSQL Key/Value databases using MongoDB, Document Databases, What Is a Document Database? Features, Consistency, Transactions, Availability, Query Features, Scaling, Suitable Use Cases, Event Logging, Content Management Systems, Blogging Platforms, Web Analytics or Real-Time Analytics, E-Commerce Applications, When Not to Use, Complex Transactions Spanning Different Operations, Queries against Varying Aggregate Structure.

UNIT IV: Column- oriented NoSQL databases using Apache HBASE, Column-oriented NoSQL databases using Apache Cassandra, Architecture of HBASE, What Is a Column-Family Data Store? Features, Consistency, Transactions, Availability, Query Features, Scaling, Suitable Use Cases, Event Logging, Content Management Systems, Blogging Platforms, Counters, Expiring Usage, When Not to Use

UNIT V: NoSQL Key/Value databases using Riak, Key-Value Databases, What Is a Key-Value Store, KeyValue Store Features, Consistency, Transactions, Query Features, Structure of Data, Scaling, Suitable Use Cases, Storing Session Information, User Profiles, Preferences, Shopping Cart Data, When Not to Use, Relationships among Data, Multi operation Transactions, Query by Data, Operations by Sets, Graph NoSQL databases using Neo4,NoSQL database development tools and programming languages, Graph Databases, What Is a Graph Database? Features, Consistency, Transactions, Availability, Query Features, Scaling, Suitable Use Cases, Connected Data, Routing, Dispatch, and Location-Based Services, Recommendation Engines, When Not to Use

TEXT BOOKS:

1. NoSQL Distilled: A Brief Guide to the Emerging World of Polyglot Persistence , **1st Edition, 2012.** Authors: Sadalage, P. & Fowler, Publication: Pearson Education.
2. The Definitive Guide to MongoDB: A complete guide to dealing with Big Data using MongoDB, 3rd Edition, December, 2015. Authors: Eelco Plegge, David Hows, Peter Membrey, Tim Hawkins, Apress Publishers

REFERENCE BOOKS:

1. Redmond, E. ,Wilson, Perkins: Seven Databases in Seven Weeks: A Guide to Modern Databases and the NoSQL Movement Edition**: 2nd Edition,2018**, O'Reilly Publishers.

I M.TECH – I SEMESTER

V18CTT03	ADVANCED COMPUTER ARCHITECTURE	L	T	P	C
		3	0	0	3

Course Outcomes

After completion of this course, student will be able to:

1. Identify different types of parallel computer models
2. Describe various processor and memory organizations.
3. Explain Pipelining, Multiprocessors and Multicomputers concepts.
4. Explain Multivector, SIMD Computers and Multithreaded, Dataflow Architectures.
5. Illustrate the parallel programming models and instruction level parallelism.

UNIT – I: Parallel computer models: The state of computing, Multiprocessors and Multicomputers, Multivector and SIMD computers. **Program and network properties:** Conditions of parallelism, Program partitioning and scheduling, Program flow mechanisms.

UNIT – II: Processors: Advanced Processor Technology, Superscalar Processors and Vector Processors. **Memory Hierarchy, Cache and Shared Memory:** Memory Hierarchy Technology, Virtual Memory Technology, Cache Memory Organizations, Shared-Memory Organizations.

UNIT – III: Pipelining: Linear Pipeline Processors, Nonlinear Pipeline Processors, Instruction Pipeline Design, Arithmetic Pipeline Design.**Multiprocessors and Multicomputers:** Multiprocessor System Interconnects, Cache Coherence and Synchronization Mechanisms, Message Passing Mechanisms.

UNIT – IV: Multivector and SIMD Computers: Vector Processing Principles, Compound Vector Processing.**Scalable, Multithreaded, Dataflow Architectures:** Latency-Hiding Techniques, Principles of Multithreading.

UNIT – V: Parallel Models, Languages: Parallel Programming Models, Parallel Languages and Compilers.**Instruction Level Parallelism:** Problem Definition, Model of a Typical Processor, Compiler- detected Instruction Level Parallelism, Operand Forwarding, Reorder Buffer, Register Renaming, Tomasulo's Algorithm, Branch Prediction.

TEXT BOOKS:

Advanced Computer Architecture: Parallelism, Scalability, Programmability, Kai Hwang, Naresh Jotwani, **Second Edition**, Tata McGraw Hill Education

REFERENCE BOOKS:

1. Computer Organization and Design, David A. Patterson and John. L. Hennessy, **Fifth Edition**, Morgan Kaufmann Series.
2. Computer Architecture and Organization, John P. Hayes, **Third Edition**, McGraw Hill Education.
3. Computer Architecture and Organization: Design Principles and Applications, B. Govindarajulu, **Second Edition**, McGraw Hill Education.

I M.TECH – I SEMESTER

V18CTT04	ADVANCED OPERATING SYSTEMS	L	T	P	C
		3	0	0	3

Course Outcomes:

After successful completion of this course, the student will be able to:

1. Define, Explain, and Apply Distributed Operating System Concepts: Architectures of Distributed Systems, Distributed Mutual Exclusion, Issues and its Inherent Limitations.
2. Describe the concepts of Distributed Resource Management, Dead lock Detection and Resolution
3. Explain the concepts of Distributed Shared Memory, Distributed Scheduling, Failure Recovery and Fault tolerance
4. Describe the concepts of Cryptography and Data Security in Distributed System
5. Describe Multiprocessor Operating System and Database Operating System: Concepts, Architecture and Design issues

UNIT - I:Architectures of Distributed Systems - System Architecture types - issues in distributed operating systems - communication networks - communication primitives. Theoretical Foundations – inherent limitations of a distributed system - lamp ports logical clocks - vector clocks - casual ordering of messages - global state - cuts of a distributed computation - termination detection. Distributed Mutual Exclusion - introduction - the classification of mutual exclusion and associated algorithms – a comparative performance analysis.

UNIT-II: Distributed Deadlock Detection -Introduction - deadlock handling strategies in distributed systems - issues in deadlock detection and resolution - control organizations for distributed deadlock detection - centralized and distributed deadlock detection algorithms - hierarchical deadlock detection algorithms. Agreement protocols - introduction-the system model, a classification of agreement problems, solutions to the Byzantine agreement problem, applications of agreement algorithms. Distributed resource management: introduction-architecture - mechanism for building distributed file systems - design issues - log structured file systems.

UNIT-III: Distributed shared memory-Architecture- algorithms for implementing DSM - memory coherence and protocols - design issues. Distributed Scheduling - introduction - issues in load distributing - components of a load distributing algorithm - stability - load distributing algorithm – performance comparison - selecting a suitable load sharing algorithm - requirements for load distributing –task migration and associated issues. Failure Recovery and Fault tolerance: introduction- basic concepts - classification of failures - backward and forward error recovery, backward error recovery- recovery in concurrent systems - consistent set of check points - synchronous and asynchronous check pointing and recovery - check pointing for distributed database systems- recovery in replicated distributed databases.

UNIT-IV: Protection and security -preliminaries, the access matrix model and its implementations.- safety in matrix model- advanced models of protection. Data security - cryptography: Model of cryptography, conventional cryptography- modern cryptography, private key cryptography, data encryption standard public key cryptography - multiple encryption - authentication in distributed systems.

UNIT-V: Multiprocessor Operating Systems - basic multiprocessor system architectures - inter connection networks for multiprocessor systems - caching - hypercube architecture. Multiprocessor Operating System - structures of multiprocessor operating system, operating system design issues- threads- process synchronization and scheduling. Database Operating systems :Introduction- requirements of a database operating system Concurrency control : theoretical aspects - introduction, database systems - a concurrency control model of database systems- the problem of concurrency control - serializability theory- distributed database systems, concurrency control algorithms - introduction, basic synchronization primitives, lock based algorithms-timestamp based algorithms, optimistic algorithms - concurrency control algorithms, data replication.

TEXT BOOKS:

1. Mukesh Singhal, Niranjan G.Shivaratri, "Advanced concepts in operating systems: Distributed, Database and multiprocessor operating systems", **TMH, 2001**

REFERENCE BOOKS:

1. Andrew S.Tanenbaum, "Modern operating system", **PHI, 2003**
2. Pradeep K.Sinha, "Distributed operating system-Concepts and design", PHI, 2003.
3. Andrew S.Tanenbaum, "Distributed operating system", Pearson education, 2003.

I M.TECH – I SEMESTER

		L	T	P	C
V18CTT05	**ADVANCED DATA STRUCTURES AND ALGORITHM ANALYSIS**	3	0	0	3

Course Outcomes:

After completion of this course, student will be able to:

1. Build Linear data structures using static and dynamic memory allocation.
2. Construct different types of trees.
3. Implement different types of graph algorithms.
4. Analyze algorithms and to determine correctness and time efficiency of algorithm.
5. Implement dynamic programming for different types of problems.

UNIT – I: Performance analysis, asymptotic notation, performance measurement. Linear Data Structures-Abstract Data Types, Linked list - Single, double and Circular linked list, Skip list. Stacks and Queues implement using Array representation and Linked list representation, Circular Queues, applications of stacks and queues.

UNIT – II: Trees – Introduction to trees, Binary tree, Threaded Binary tree, Binary Search Tree, AVL Trees, Red Black Trees, Splay tree. Multi way trees: B- Trees , B^* Tress, B^+ Trees , prefix B^+ Tress, 2-4 trees, tree traversal techniques, tries.

UNIT – III: Graphs – Introduction to Graphs, Graph representation(array and linked list), Graph traversing algorithms, complexity analysis of BFS and DFS, Spanning trees, Shortest path calculation, topological sort and graph applications.

UNIT – IV: Algorithm analysis – Introduction, Greedy Method and its applications (I/o Knapsack Problem and topological sort). Divide and conquer and its applications (Merge sort and quick sort).

UNIT – V: Dynamic programming and its applications (I/o Knapsack problem and all pairs shortest path), Back Tracking and its applications (I/o Knapsack problem, travelling sales person). Branch and bound and its applications (I/o Knapsack problem, travelling sales person).

TEXT BOOKS:

1. "Data Structures, Algorithms and Applications in C++ ", ,Sartaj Sahni, University Press **Second Edition**.
2. "Data Structures and algorithms in JAVA", Adam Drozdek, Thomson Course Technology, Indian edition, **second edition**.

REFERENCE BOOKS:

1. Data Structures, A Pseudocode Approach, Richard F Gilberg, Behrouz A Forouzan, Cengage **Second Edition**.
2. Data structures and Algorithm Analysis in C, 2nd edition, Mark Allen Weiss, Pearson
3. Classic Data Structures, **2/e**, Debasis, Samanta, PHI, **2009.**

I M.TECH – I SEMESTER

V18CTT06	MACHINE LEARNING	L	T	P	C
		3	0	0	3

Course Outcomes:

After successful completion of this course, the student will be able to:

1. Recognize the characteristics of machine learning that make it useful to real-world Problems.
2. Characterize machine learning algorithms as supervised, semi-supervised, and unsupervised.
3. Have heard of a few machine learning toolboxes.
4. Be able to use support vector machines.
5. Be able to use regularized regression algorithms.

UNIT - I: The ingredients of machine learning, Tasks: the problems that can be solved with machine learning, Models: the output of machine learning, Features, the workhorses of machine learning. Binary classification and related tasks: Classification, Scoring and ranking, Class probability estimation.

UNIT-II: Beyond binary Classification: Handling more than two classes, Regression, Unsupervised and descriptive learning. **Concept learning:** The hypothesis space, Paths through the hypothesis space, Beyond conjunctive concepts.

UNIT-III: Tree models: Decision trees, Ranking and probability estimation trees, Tree learning as variance reduction. **Rule models:** Learning ordered rule lists, Learning unordered rule sets, Descriptive rule learning, First-order rule learning

UNIT-IV: Linear models: The least-squares method, The perceptron: a heuristic learning algorithm for linear classifiers, Support vector machines, obtaining probabilities from linear classifiers, Going beyond linearity with kernel methods. **Distance Based Models:** Introduction, Neighbours and exemplars, Nearest Neighbours classification, Distance Based Clustering, Hierarchical Clustering.

UNIT-V: Probabilistic models: The normal distribution and its geometric interpretations, Probabilistic models for categorical data, Discriminative learning by optimising conditional likelihood Probabilistic models with hidden variables. **Features:** Kinds of feature, Feature transformations, Feature construction and selection. Model ensembles: Bagging and random forests, Boosting

TEXT BOOKS:

1. Machine Learning: The art and science of algorithms that make sense of data, Peter Flach, Cambridge,**2012**.
2. Machine Learning, Tom M. Mitchell, MGH,2017.

REFERENCE BOOKS:

1. UnderstandingMachine Learning: From Theory to Algorithms, Shai Shalev-Shwartz, ShaiBenDavid, Cambridge,**2014**.
2. Machine Learning in Action, Peter Harington, **2012**, Cengage.

I M.TECH – I SEMESTER

		L	T	P	C
V18CTL01	**NOSQL Database Laboratory**	**0**	**0**	**2**	**1**

Course Outcomes

After successful completion of the course students should be able to:

1. Install and run MongoDb
2. Identify differences between relational and NoSQL database systems
3. Execute various operations in Mongo DB
4. Apply Mapreduce for problem solving
5. Know Column oriented databases

LIST OF EXPERIMENTS

1. Introduction to MongoDB and its Installation on Windows & Linux
2. Description of mongo Shell, Create database and show database
3. Commands for MongoDB and To study operations in MongoDB – Insert, Query, Update, Delete and Projection
4. Where Clause equivalent in MongoDB
5. To study operations in MongoDB – AND in MongoDB, OR in MongoDB, Limit Records and Sort Records. To study operations in MongoDB – Indexing, Advanced Indexing, Aggregation and Map Reduce.
6. Practice with 'macdonalds' collection data for document oriented database. Import restaurants collection and apply some queries to get specified output.
7. Simple Querying using simple select(row and column) and Hive functions
8. Advanced querying using table joins, sampling in hive and subqueries
9. Define an external Hive table and review the results
10. Column oriented databases study, queries and practices

I M.TECH – I SEMESTER

V18CTL02	ADVANCED DATA STRUCTURES AND ALGORITHM ANALYSIS LAB	L	T	P	C
		0	0	2	1

Course Outcomes:
After completion of this course, student will be able to:

1. Design and analyze simple linear and non linear data structures
2. Implement ADT for Data Structures
3. Implement algorithms using different types of technique.
4. Strengthen the ability to identify and apply the suitable data structure for the given real world problem

List of Experiments

Implement the following list of experiments using C++:

1. Write a program to implement single linked list, double linked list and circular linked list using ADT.
2. Implement stack and queue using ADT.
3. Implementation of Multitask in a Single Array
4. Implement evolution of expression
5. Implement AVL Trees operations and display the tree elements using any one non recursive traversing technique.
6. Construct a graph and implement BFS and DFS graph traversal techniques.
7. Construct a graph and implement Prims and Krushkals minimum spanning trees.
8. Implement single source and all pair shortest path algorithms.
9. Implement Merge sort and quick sort using divide and conquer technique
10. Implement I/o Knapsack Problem using greedy technique
11. Implement travelling sales person problem using back tracking.
12. Implement any algorithm using Branch and Bound technique.

I M.TECH – II SEMESTER

V18CTT07	DATA SCIENCE	L	T	P	C
		3	0	0	3

Course Outcomes:

After completion of this course, student will be able to:

1. Understand the process of data validation and its role in decision making
2. Understand, create, and modify analytic and exploratory algorithms operating over data. Verify and quantify the validity of hypothesis using data analytics.
3. Know the privacy and data protection legislation and the data scientist professional code and ethics.

UNIT-1: Introduction: What is Data Science? What roles exist in Data Science? Current landscape of perspectives. Define the workflow, tools and approaches data scientists use to analyze data. Define a problem and identify appropriate data sets using the data science workflow. Walkthrough the data science workflow using a case study.

UNIT-II: Statistics Fundamentals: Exploratory Data Analysis and the Data Science Process-analyze datasets using basic summary statistics: mean, median, mode, max, min, quartile, inter-quartile, range, variance, standard deviation and correlation.

UNIT-III: Data Visualization – scatter plots, scatter matrix, line graph, box blots, and histograms. Identify a normal distribution within a dataset using summary statistics and visualization. Causation vs. Correlation. Test a hypothesis within a sample case study. Validate your findings using statistical analysis.

UNIT-IV: Foundations of Data Modeling: Introduction Regression – data modelling and linear regression. Categorical variables versus Continuous variables. Build the linear regression/logistic regression model using a dataset. Fit model – regularization, bias and error metrics. Evaluate model fit using loss functions – MSE (Mean Square Error), RMSE (Root MSE), Mean Absolute Error(MAE). Apply different regression models based on fit and complexity. Evaluate model using metrics such as accuracy/error, Confusion matrix, ROC curve and Cross Validation.

UNIT-V:Dimensionality Reduction – perform dimensionality reduction using topic models such as PCA and SVD. Refine and extract data/information from sample datasets. Introduction to Classification - define classification model, apply k-NN, Naïve Classifier and Decision trees. Build the classification model using a dataset and evaluate.

TEXT BOOKS:

1. The Art of Data Science: A Guide for Anyone Who Works with Data, Roger D. Peng, Elizabeth Matsui, Lean Pub, **2015**.
2. Doing Data Science, Straight Talk from The Frontline, Cathy O'Neil and Rachel Schutt. O'Reilly. **2014**.
3. Data Science for Business: What You Need to Know about Data Mining and Data-analytic Thinking, Foster Provost and Tom Fawcett**. 2013**
4. Elements of Statistical Learning, Trevor Hastie, Robert Tibshirani and Jerome Friedman, Springer, **2009**.

REFERENCE BOOKS:

1. Mining of Massive Datasets, JureLeskovek, AnandRajaraman and Jeffrey Ullman. Cambridge University Press. **2014**.
2. Machine Learning: A Probabilistic Perspective.Kevin P. Murphy, MIT Press, **2013**.
3. Data Mining and Analysis: Fundamental Concepts and Algorithms, Mohammed J. Zaki and Wagner Miera Jr., Cambridge University Press. **2014**.
4. R Programming for Data Science, Roger D. Peng, LeanPub, **2015**.
5. Python for Data Science for Dummies, Luca Massaron and John Paul Mueller, John Wiley and Sons, **2015.**

I M.TECH – II SEMESTER

V18CTT08	Advanced Web Technologies	L	T	P	C
		3	0	0	3

Course Outcomes:

After completion of the course, the student will be able to:

1. Understand the current technologies in Internet world
2. Design interactive web pages using HTML & Style Sheets and design Individual Graphical User Interfaces
3. Acquire knowledge of XML fundamentals and usage of XML technology in electronic data Interchange and creation of desktop applications using swings and beans.
4. Know the fundamentals of client side scripting such as JavaScript and apply it for data validation.
5. Design and develop web based enterprise systems for the enterprises using technologies like JSP with database.
6. Implement client side programming using java script, CSS
7. Learn and implement advanced and current technologies like AJAX, JQuery, PHP, Servlets and JSP
8. Learn to implement web services

UNIT-I

HTML & CSS: Introduction **-** Elements, Tags, Attributes, Heading, Paragraph. Formatting, Link, Image, Table, List, Block, Form, Frame Layout, DHTML, Basic Web Page Development, CSS- Create Class Styles, Create ID Styles ,Span, Colors.HTML5 in brief.

JavaScript : Introduction **-** JavaScript in Web Pages, The Advantages of JavaScript Writing JavaScript into HTML; Building Up JavaScript Syntax; Basic Programming Techniques; Operators and Expressions in JavaScript; JavaScript Programming Constructs; Conditional Checking Functions in JavaScript, Dialog Boxes, Statements, comments, variable, comparison, condition, switch, loop, break. Object – string, array. Function, Errors, Validation. The JavaScript Document Object Model-Introduction (Instance, Hierarchy); The JavaScript Assisted Style Sheets DOM; Understanding Objects in HTML (Properties of HTML objects, Methods of HTML objects); Browser Objects, Handling Events Using JavaScript

UNIT-II

Extensible Markup Language (XML):- Brief Over View of XML – XML Document structure, XML namespaces, Defining structure in XML documents, Reuse of XML schemes, Document navigation and transformation, Tree, Syntax, Elements, Attributes, Validation, and Viewing. XHTML in brief

Installing and Configuring MySQL:- Current and Future Versions of MySQl , How to Get MySQL, Installing MySQL on Windows, Trouble Shooting your Installation, Basic Security Guidelines

UNIT-III

Advanced Dynamic Web Client Side Programming: AJAX-xml Http Request object-AJAX applications-AJAX frame work -java script libraries - JQuery-basics – event handling, DOM,AJAX-effects- jQuery UI Web design Frameworks: Responsive web design-overview on Twitter bootstrap-DoJo- YahooUI-Google web toolkit libraries-Applets-overview on javaFX applets

UNIT-IV

Server Side Programming with PHP: The Building blocks of PHP, Variables, Data Types, Operators and Expressions, Constants. Flow Control Functions in PHP: Switching Flow, Loops, Code Blocks and Browser Output.

Functions: What is function? Calling functions, Defining Functions. Variable Scope, more about arguments working with Arrays and Some Array-Related Functions.

Working with Objects: Creating Objects, Object Instance Working with Strings, Dates and Time: Formatting strings with PHP, Investigating Strings with PHP, Manipulating Strings with PHP, Using Date and Time Functions in PHP

Working with Forms: Creating Forms, Accessing Form Input with User defined Arrays, Combining HTML and PHP code on a single Page, Using Hidden Fields to save state, Redirecting the user, Sending Mail on Form Submission, and Working with File Uploads.

Learning basic SQL Commands: Learning the MySQL Data types, Learning the Table Creation Syntax, Using Insert Command, Using SELECT Command, Using WHERE in your Queries, Selecting from Multiple Tables, Using the UPDATE command to modify records, Using the DELETE Command, Frequently used string functions in MySQL, Using Date and Time Functions in MySQL.

Interacting with MySQL using PHP: MySQL Versus MySQLi Functions, Connecting to MySQL with PHP, Working with MySQL Data.

UNIT-V

Server Side Programming With Servlets and JSP: Web Servers and Servlets: Tomcat web server, Introduction to Servelets: Lifecycle of a Serverlet, JSDK, The Servelet API, The javax.servelet Package, Reading Servelet parameters, Reading Initialization parameters. The javax.servelet HTTP package, Handling Http Request & Responses, Using Cookies-Session Tracking, Security Issues, Introduction to JSP: The Anatomy of a JSP Page. JSP Application Design with MVC , JSP Application Development: Generating Dynamic Content, Using Scripting Elements Implicit JSP Objects, Conditional Processing Sharing Session and Application Data Memory Usage Considerations

TEXT BOOKS:

I M.TECH – II SEMESTER

V18CTT09	CLOUD COMPUTING	L	T	P	C
		3	0	0	3

Course Outcomes are:

After completion of the course the student will be able to

1. Able to understand about Cloud Computing Platforms and Technologies.
2. Students will be aware about Architecture and Open Challenges in Cloud Computing.
3. Students will be able to monitor and manage cloud computing applications.
4. Students will be able to describe the mechanisms needed to harness Cloud Computing in their own respective endeavors.
5. Students will be able to solve case studies related to Cloud Computing.

UNIT-I

Overview of Computing Paradigm: Recent trends in Computing Grid Computing, Cluster Computing, Distributed Computing, Utility Computing, Cloud Computing Evolution of cloud computing Business driver for adopting cloud computing

Introduction to Cloud Computing Cloud Computing (NIST Model) Introduction to Cloud Computing, History of Cloud Computing, Cloud service providers Properties, Characteristics &Disadvantages Pros and Cons of Cloud Computing, Benefits of Cloud Computing, Cloud computing vs. Cluster computing vs. Grid computing Role of Open Standards

UNIT-II

Cloud Computing Architecture Cloud computing stack Comparison with traditional computing architecture (client/server), Services provided at various levels, How Cloud Computing Works, Role of Networks in Cloud computing, protocols used, Role of Web services Service Models (XaaS) Infrastructure as a Service(IaaS) , Platform as a Service(PaaS), Software as a Service(SaaS) Deployment Models Public cloud, Private cloud, Hybrid cloud, Community cloud.

UNIT-III

Infrastructure as a Service(IaaS) Introduction to IaaS IaaS definition, Introduction to virtualization, Different approaches to virtualization, Hypervisors, Machine Image, Virtual Machine(VM) Resource Virtualization Server, Storage, Network Virtual Machine (resource) provisioning and manageability, storage as a service, Data storage in cloud computing(storage as a service) Examples Amazon EC2 Renting, EC2 Compute Unit, Platform and Storage, pricing, customers Eucalyptus

Platform as a Service(PaaS) Introduction to PaaS What is PaaS, Service Oriented Architecture (SOA) Cloud Platform and Management Computation Storage Examples Google App Engine Microsoft Azure

Software as a Service (PaaS) Introduction to SaaS, Web services, Web 2.0, Web OS, Case Study on SaaS

UNIT-IV

Service Management in Cloud Computing Service Level Agreements(SLAs), Billing & Accounting, Comparing Scaling Hardware: Traditional vs. Cloud, Economics of scaling: Benefitting enormously Managing Data Looking at Data, Scalability & Cloud Services Database & Data Stores in Cloud Large Scale Data Processing

UNIT-V

Cloud Security Infrastructure Security Network level security, Host level security, Application level security Data security and Storage Data privacy and security Issues, Jurisdictional issues raised by Data location Identity & Access Management, Access Control, Trust, Reputation, Risk, Authentication in cloud computing, Client access in cloud, Cloud contracting Model, Commercial and business considerations

TEXT BOOKS:

1. Cloud Computing Bible, Barrie Sosinsky, Wiley-India, **2010**
2. Cloud Computing: Principles and Paradigms, Editors: Rajkumar Buyya, James Broberg, Andrzej M. Goscinski, Wile, **2011.**
3. Cloud Computing: Principles, Systems and Applications, Editors: Nikos Antonopoulos, Lee Gillam, Springer, **2012.**
4. Cloud Security: A Comprehensive Guide to Secure Cloud Computing, Ronald L. Krutz, Russell Dean Vines, Wiley-India**, 2010**.
5. Gautam Shroff, "*Enterprise Cloud Computing Technology Architecture Applications*", Cambridge University Press; 1 edition, [ISBN: 978-0521137355**], 2010**.

I M.TECH – II SEMESTER

V18CTT10	INTERNET OF THINGS	L	T	P	C
		3	0	0	3

Course Outcomes:
After completion of this course, student will be able to:

1. Demonstrate knowledge and understanding of the security and ethical issues of the Internet of Things
2. Conceptually identify vulnerabilities, including recent attacks, involving the Internet of Things
3. Develop critical thinking skills
4. Compare and contrast the threat environment based on industry and/or device type

UNIT – I: The Internet of Things: An Overview of Internet of things,Internet of Things Technology, behind IoTs Sources of the IoTs, M2M Communication, Examples OF IoTs, Design Principles For Connected Devices

UNIT – II: Business Models for Business Processes in the Internet of Things ,IoT/M2M systems LAYERS AND designs standardizations ,Modified OSI Stack for the IoT/M2M Systems ,ETSI M2M domains and High-level capabilities ,Communication Technologies, Data Enrichment and Consolidation and Device Management Gateway Ease of designing and affordability

UNIT – III: Design Principles for the Web Connectivity for connected-Devices, Web Communication protocols for Connected Devices, Message Communication protocols for Connected Devices, Web Connectivity for connected-Devices.

UNIT – IV: Internet Connectivity Principles, Internet connectivity, Application Layer Protocols: HTTP, HTTPS, FTP, Telnet.

UNIT – V: Data Acquiring, Organizing and Analytics in IoT/M2M, Applications/Services/Business Processes, IOT/M2M Data Acquiring and Storage, Business Models for Business Processes in the Internet Of Things, Organizing Data, Transactions, Business Processes, Integration and Enterprise Systems.

TEXT BOOKS:

1. Internet of Things: Architecture, Design Principles And Applications, Rajkamal, McGraw Hill Higher Education,**2017**.
2. Internet of Things, A.Bahgya and V.Madisetti, Univesity Press, **2015.**

REFERENCES

1. Designing the Internet of Things, Adrian McEwen and Hakim Cassimally, Wiley,**2013.**
2. Getting Started with the Internet of Things CunoPfister , Oreilly,May 2011.

I M.TECH – II SEMESTER

V18CTT11	CYBER SECURITY (Elective-I)	L	T	P	C
		3	0	0	3

Course Outcomes:
After completion of this course, student will be able to:

1. Understand the broad set of technical, social & political aspects of Cyber Security.
2. Appreciate the vulnerabilities and threats posed by criminals, terrorist and nation states to national infrastructure.
3. Understand the nature of secure software development, operating systems and data base design.
4. Recognized the role security management plays in cyber security defense.
5. Understand the security management methods to maintain security protection.
6. Understand the legal and social issues at play in developing solutions

UNIT-I: Systems Vulnerability Scanning: Overview of vulnerability scanning, Open Port / Service Identification, Banner /Version Check, Traffic Probe, Vulnerability Probe, Vulnerability examples, OpenVAS, Metasploit. Networks Vulnerability Scanning - Netcat, Socat, understanding Port and Services tools - Datapipe, Fpipe, WinRelay, Network Reconnaissance Nmap, THC-Amap and System tools. Network Sniffers and Injection tools – Tcpdump and Windump, Wireshark, Ettercap, Hping Kismet

UNIT – II: Network Defense tools: Firewalls and Packet Filters: Firewall Basics, Packet Filter Vs Firewall, How a Firewall Protects a Network, Packet Characteristic to Filter, Stateless Vs Stateful Firewalls, Network Address Translation (NAT) and Port Forwarding, the basic of Virtual Private Networks, Linux Firewall, Windows Firewall, Snort: Introduction Detection System.

UNIT – III: Web Application Tools: Scanning for web vulnerabilities tools: Nikto, W3af, HTTP utilities - Curl, Open SSL and Stunnel, Application Inspection tools – Zed Attack Proxy, Sqlmap. DVWA, Webgoat, Password Cracking and Brute-Force Tools – John the Ripper, L0htcrack, Pwdump, HTC-Hydra

UNIT – IV:Introduction to Cyber Crime and law: Cyber Crimes, Types of Cybercrime, Hacking, Attack vectors, Cyberspace and Criminal Behavior, Clarification of Terms, Traditional Problems Associated with Computer Crime, Introduction to Incident Response, Digital Forensics, Computer Language, Network Language, Realms of the Cyber world, A Brief History of the Internet, Recognizing and Defining Computer Crime, Contemporary Crimes, Computers as Targets, Contaminants and Destruction of Data, Indian IT ACT 2000.

UNIT – V:Introduction to Cyber Crime Investigation: Firewalls and Packet Filters, password Cracking,Keyloggers and Spyware, Virus and Warms, Trojan and backdoors, Steganography, DOS and DDOS attack, SQL injection, Buffer Overflow, Attack on wireless Networks.

TEXT BOOKS:

1. Anti-Hacker Tool Kit (Indian Edition) by Mike Shema, Publication Mc Graw Hill, **Fourth Edition,2014.**
2. Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives by Nina Godbole and Sunit Belpure, Publication Wiley, **First Edition, 2011.**

REFERENCE BOOKS:

1. The Official CHFI Study Guide for Computer Hacking Forensic Investigator by Dave Kleiman,**First Edition,2007.**
2. CISSP Study Guide**, 6th Edition** by James M. Stewart

I M.TECH – II SEMESTER

V18CTT12	ARTIFICIAL INTELLIGENCE (Elective-I)	L	T	P	C
		3	0	0	3

Course Outcomes:
After completion of the course, the student will be able to:

1. Describe Artificial Intelligence Techniques.
2. Illustrate Knowledge Representation in AI
3. Explain the concepts of planning and learning in AI

UNIT – I: Artificial Intelligence Introduction: The AI Problems, AI Technique, Defining the Problem as a State Space Search, Production Systems, Problem Characteristics, Production System Characteristics, Issues in the Design of Search Programs.

UNIT –II: Heuristic Search Techniques: Generate and Test, Hill Climbing, Best First Approach, Problem Reduction, Constraint Satisfaction, Means-Ends analysis.

UNIT –III: Knowledge Representation using Predicate Logic and Rules: Representing Simple Facts in Logic, Representing Instance and ISA Relationships, Computable Functions and Predicates, Resolution, Natural Deduction, Logic Programming, Forward Versus Backward Reasoning, Matching, Control Knowledge.

UNIT –IV: Planning: The Blocks World Example, Components of a Planning System, Goal Stack Planning, Nonlinear planning using constraint posting, Hierarchical Planning, Reactive Systems.

UNIT –V: Learning: Rote Learning, Learning by taking advice, Learning in problem solving, Learning from examples, Explanation Based Learning, Discovery, Analogy, Formal Learning Theory.

TEXTBOOK:

1. Artificial Intelligence, Elaine Rich, Kevin Knight, Shivashankar B Nair, Third Edition, Tata McGraw Hill Education Private Limited., **2009**

REFERENCES:

1. Artificial intelligence A modern Approach **, 3rd Edition**, Stuart Russel, Peter Norvig, Pearson Education.
2. Artificial Intelligence, A new Synthesis, Nils J Nilsson, Elsevier,**1st Edition, 1997**.

I M.TECH – II SEMESTER

V18CTT13	BIO INFORMATICS (Elective-I)	L	T	P	C
		3	0	0	3

Outcomes:

After completion of the course the student will be able to

1. **Broad Understanding of Biology**: Students will interpret relationships among living things and analyze and solve biological problems, from the molecular to ecosystem level using basic biological concepts, grounded in foundational theories."
2. **Computer Programming**: Students will create computer programs that facilitate bioinformatics.
3. The students will be able to describe the contents and properties of the most important bioinformatics databases, perform text- and sequence-based searches, and analyze and discuss the results in light of molecular biological knowledge
4. The students will be able to explain the major steps in pairwise and multiple sequence alignment, explain the principle for, and execute Pairwise sequence alignment by dynamic programming

UNIT-I: Basic Biology: What is life? The unity and the diversity of living things, Prokaryotes and Eukaryotes, Yeast and People, Evolutionary time and relatedness, Living parts: Tissues, cells, compartments and organelles, Central dogma of molecular biology, Concept of DNA, RNA, Protein and metabolic pathway.

Bio Informatics: Introduction, What is Bioinformatics? Recent challenges in Bioinformatics, Sequencing, Biological sequence/structure, Genome Projects, Pattern recognition an prediction

UNIT-II: Biological databases: Their needs and challenges. Example of different biological databases – sequence, structure, function, micro-array, pathway, etc, Primary sequence databases, Protein Sequence databases, Secondary databases, Protein pattern databases, and Structure classification databases, Genome Information Resources DNA sequence databases, specialized genomic resources

UNIT-III : Sequence Analysis: Importance of DNA analysis, Gene structure and DNA sequences, Features of DNA sequence analysis, EST (Expressed Sequence Tag) searches, Gene hunting, Profile of a cell, EST analysis, Effects of EST data on DNA databases.**Theory and Tools:** - Pairwise alignment – Different local and global search alignment, Heuristic searches (like BLAST) applicable to search against database, Multiple alignment algorithms, Whole genome comparison, Database searching, Alphabets and complexity, Algorithm and programs, Comparing two sequences, sub-sequences, Identity and similarity, The Dotplot, Local and global similarity, different alignment techniques, Dynamic Programming, Pair wise database searching.

UNIT-IV:Walk through the genome: Prediction of regulatory motifs, Operon, Gene, splices site, etc.

Markov models: Hidden Markov models – The evaluation, decoding and estimation problem and the algorithms. Application in sequence analysis

UNIT-V:Molecular phylogeny: maximum Parsimony, distance Matrix and maximum likelihood methods. Concepts of adaptive evolution.**Application of graph theory in Biology**: Biochemical Pathway, Protein-protein interaction network, Regulatory network and their analysis.

TEXT BOOKS:

1. Bioinformatics: Sequence, Structure and Databanks: A Practical Approach (The Practical Approach Series, 236), Des Higgins (Editor), Willie Taylor. **1st edition, October 2000, Oxford University Press. ISBN: 978-0199637904.**
2. Bioinformatics: Sequence and Genome Analysis, David W. Mount. **2nd edition, June2004**, Cold spring harbor laboratory press. ISBN: 978-0879697129
3. Biological Sequence Analysis: Probabilistic Models of Proteins and Nucleic acids, R. Durbin, S.R. Eddy, A. Krogh and G. Mitchison, **1st Edition**.
4. Introduction to Bioinformatics, by T K Attwood & D J Parry-Smith **A**ddison Wesley Longman ,**1999**.
5. Bioinformatics - A Beginner's Guide by Jean-Michel Claveriw, Cerdric Notredame, WILEY dreamlech India Pvt. Ltd, **2nd Edition,2006.**

REFERENCE BOOKS:

1. Introduction to Bioinformatics by Arthur.Lesk OXFORD publishers ,**2014.**
2. Bioinformatics: A Practical Guide to the Analysis of Genes and Proteins, Second Edition, Andreas D. Baxevanis, B. F. Francis Ouellette. **3nd edition, October 2004**, A John Wiley & Sons, Inc., Publication. ISBN: 978-0471478782.

I M.TECH – II SEMESTER

V18CTT14	WIRELESS SENSOR NETWORKS (Elective-I)	L	T	P	C
		3	0	0	3

Course Outcomes:
After successful completion of this course, the student will be able to:

1. Identify the applications and challenges of MANETs
2. Explain Ad-hoc network routing protocols
3. Describe Broadcasting, Multicasting and Geocasting Routing Protocols
4. Describe and Discriminate Wireless LANs, Wireless PANs & Wireless Mesh Networks

UNIT-I: Introduction: Introduction to MANETs, Applications of MANETs, Challenges

UNIT-II: Routing in Ad hoc networks: Topology-Based versus Position Based Approaches, Topology-Based routing Protocols, Position-Based Routing, Other Routing Protocols

UNIT-III: Broadcasting, Multicasting and Geocasting: The Broadcasting Storm, Broadcasting in a MANET, Multicasting, Issues in providing Multicast in a MANET, Geocasting, Geocast Routing Protocols

UNIT-IV: Wireless LANs: Why Wireless LANs, Transmission Techniques, Medium Access Control Protocol Issues, The IEEE 802.11 Standard for Wireless LANs, Enhancement to IEEE 802.1 MAC

UNIT-V: Wireless PANs & Wireless Mesh Networks: Why Wireless PANs, The Bluetooth Technology, Enhancements to Bluetooth, Wireless Mesh Network Architecture, MR Deployment, IGW Deployment, Channel Assignment

TEXT BOOK:

1. Ad hoc and Sensor Networks Theory and Applications, Carlos de Morais Cordeiro, Dharma Prakash Agarwal, Second Edition, World Scientific, **2011**

REFERENCE BOOKS:

1. Adhoc Wireless Networks — Architectures and Protocols, C.Siva Ram Murthy, B.S.Murthy, Pearson Education, **2004**
2. Ad hoc Networking, Charles E.Perkins, Pearson Education, 2001

I M.TECH – II SEMESTER

V18CTT15	IMAGE PROCESSING (Elective-II)	L	T	P	C
		3	0	0	3

Course Outcomes:
After completion of this course, student will be able to:
1. Understand the basics of image processing.
2. Understand 2 D Transformations.
3. Learn the Digital image properties.
4. Acquire the knowledge of mathematical concepts for application on image morphing.
5. Be able to conduct independent study and analysis of image processing problems and techniques.

UNIT-I: Introduction: Applications of Computer Graphics and Image Processing, Fundamentals on Pixel concepts, effect of Aliasing and Jaggles, Advantages of high resolution systems DDA line algorithms: Bresenhams line and circle derivations and algorithms.

UNIT-II: 2-D Transformations: Translations, Scaling, rotation, reflection and shear transformations, Homogeneous coordinates, Composite Transformations- Reflection about an arbitrary line; Windowing and clipping, viewing transformations, Cohen- Sutherland clipping algorithm.

UNIT-III: Digital Image Properties: Metric and topological properties of Digital Images, Histogram, entropy, Visual Perception, Image Quality, Color perceived by humans, Color Spaces, Palette Images, color Constancy Color Images: Pixel brightness transformations, Local Preprocessing, image smoothing, Edge detectors, Robert Operators, Laplace, Prewitt, Sobel, Fri-chen, Canny Edge detection.

UNIT-IV: Mathematical Morphology: Basic Mathematical Concepts, Binary dilation and Erosion, Opening and closing, Gray Scale dilation and erosion, Skeleton, Thinning , Thickening Ultimate erosion, Geodesic transformations, Morphology and reconstruction, Morphological Segmentation.

UNIT-V: Segmentation: Threshold detection methods, Optimal Thresholding, Edge based SegmentationEdge image thresholding, Edge relaxation, Border tracing, Hough Transforms, Region based segmentation: Region Mergingm Region Splitting, Splitting and Merging, Watershed Segmentation. Image Data Compression: Image data Properties, Discrete Image Transformations in data compression, Discrete Cosine and Wavelet Transforms, Types of DWT and merits; Predicative Compression methods, Hierarchical and Progressive Compression methods, Comparison of Compression methods, JPEG- MPEG Image Compression methods.

TEXT BOOKS:

1. Computer Graphics C Version, Donald Hearn, M Paulli Baker, Pearson Education India, **1997, Second Edition** (Unit I and Unit II)
2. Image Processing, Analysis and Machine Vision, Millan Sonka, Vaclov Halvoc, Roger Boyle, Cengage Learning, 3ed, (Unit III, Unit IV, Unit V and Unit VI)

REFERENCE BOOKS:

1. Computer & Machine Vision, Theory, Algorithms, Practicles, E R Davies, Elsevier, **4ed**
2. Digital Image Processing with MATLAB and LABVIEW, Vipul Singh, Elsevier,2012.

I M.TECH – II SEMESTER

V18CTT16	**PARALLEL ALGORITHMS (Elective-II)**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

Course Outcome:

At the end of this course the student be able to

1. Understand the various application areas.
2. Understand the Efficiency of parallel algorithms,
3. Understand parallel sorting network
4. Understand parallel searching algorithm,

UNIT-I: Introduction:

Computational demand in various application areas, advent of parallel processing, terminology-pipelining, Data parallelism and control parallelism-Amdahl's law.

UNIT-II: Scheduling:

Organizational features of Processor Arrays, Multi processors and multi-computers. Mapping and scheduling aspects of algorithms. Mapping into meshes and hyper cubes-Load balancing-List scheduling algorithm Coffman-graham scheduling algorithm for parallel processors.

UNIT-III: Algorithms:

Elementary Parallel algorithms on SIMD and MIMD machines, Analysis of these algorithms. Matrix Multiplication algorithms on SIMD and MIMD models. Fast Fourier Transform algorithms. Implementation on Hyper cube architectures. Solving linear file -system of equations, parallelizing aspects of sequential methods back substitution and Tri diagonal.

UNIT-IV: Sorting:

Parallel sorting methods, Odd-even transposition Sorting on processor arrays, Biotonic, merge sort on shuffle - exchange ID , Array processor,2D-Mesh processor and Hypercube Processor Array. Parallel Quick-sort on Multi processors. Hyper Quick sort on hypercube multi computers. Parallel search operations. Ellis algorithm and Manber and ladner's Algorithms for dictionary operations.

UNIT-V: Searching:

Parallel algorithms for Graph searching, All Pairs shortest paths and inimum cost spanning tree. Parallelization aspects of combinatorial search algorithms with Focus on Branch and Bound Methods and Alpha-beta Search methods.

TEXTBOOKS:

1. Parallel computing theory and practice, Michel J.Quinn,**2002,Second Edition.**

2. Programming Parallel Algorithms, Guy E. Blelloch, Communications of the ACM,**1996**.

I M.TECH – II SEMESTER

V18CTT17	**MOBILE COMPUTING (Elective-II)**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

Course Outcomes:
After completion of this course, student will be able to:
1. Describe the basic concepts and principles in mobile computing.
2. Understand the concept of Wireless LANs, PAN, Mobile Networks, and Sensor Networks.
3. Understand positioning techniques and location based services and applications.
4. Describe the important issues and concerns on security and privacy.

UNIT–I: Introduction to Mobile Communications and Computing: Introduction to cellular concept, Frequency Reuse, Handoff, GSM: Mobile services, System architecture, Radio interface, Protocols, Localization and calling, Handover, Security, and New data services, Introduction to mobile computing, novel applications, limitations, and architecture.

UNIT - II: **Wireless LANs:** Introduction, Advantages and Disadvantages of WLANs, WLAN Topologies, Introduction to Wireless Local Area Network standard IEEE 802.11, Comparison of IEEE 802.11a, b, g and n standards, Wireless PANs, Hiper LAN, Wireless Local Loop

UNIT - III: **Wireless Networking:** Introduction, Various generations of wireless networks, Fixed network transmission hierarchy, Differences in wireless and fixed telephone networks, Traffic routing in wireless networks, WAN link connection technologies, X.25 protocol, Frame Relay, ATM, Virtual private networks, Wireless data services, Common channel signaling, Various networks for connecting to the internet.

UNIT - IV: **Database Issues:** Data management issues, data replication for mobile computers, adaptive clustering for mobile wireless networks, file system, disconnected operations.

UNIT - V: **Data Dissemination:** Communications asymmetry, classification of new data delivery mechanisms, push-based mechanisms, pull-based mechanisms, hybrid mechanisms, selective tuning (indexing) techniques.

TEXT BOOKS:

1. Gottapu Sasibhushana Rao, “Mobile Cellular Communication”, Pearson Education, **First Edition, 2013.**
2. Stojmenovic and Cacute, “Handbook of Wireless Networks and Mobile Computing”, **Wiley, 2002.**

REFERENCE BOOKS:

1. Reza Behravanfar, “Mobile Computing Principles: Designing and Developing Mobile Applications with UML and XML”, ISBN: 0521817331, Cambridge University Press, **October 2004.**
2. Adelstein, Frank, Gupta, Sandeep KS, Richard III, Golden , Schwiebert, Loren, “Fundamentals of Mobile and Pervasive Computing”, ISBN: 0071412379, McGraw-Hill Professional, **2005**.

I M.TECH – II SEMESTER

V18CTT18	GRID COMPUTING (Elective-II)	L	T	P	C
		3	0	0	3

Course Outcomes:

After completion of this course, student will be able to:

1. Understand the need for and evolution of Grids in the context of processor- and data-intensive applications
2. Be familiar with the fundamental components of Grid environments, such as authentication, authorization, resource access, and resource discovery
3. Be able to design and implement Grid computing.
4. Be able to justify the applicability, or non-applicability, of Grid technologies for a specific application.

UNIT - I: **Introduction:** Introduction to Parallel, Distributed Computing, Cluster Computing and Grid Computing, Characterization of Grids, Organizations and their Roles, Grid Computing Road Maps.

UNIT - II: **Architecture:** Architecture of Grid and Grid Computing, Review of Web Services-OGSA-WSRF.

UNIT - III: **Grid Monitoring:** Grid Monitoring Architecture (GMA) - An Overview of Grid Monitoring Systems- GridICE - JAMM -MDS-Network Weather Service-R-GMA-Other Monitoring Systems- Ganglia and GridM **Grid Middleware:** List of globally available Middlewares - Case Studies-Recent version of Globus Toolkit and gLite - Architecture, Components and Features.

UNIT - IV: **Data Management And Grid Portals:** Data Management, Categories and Origins of Structured Data, Data Management Challenges, Architectural Approaches, Collective Data Management Services, Federation Services, Grid Portals, First-Generation Grid Portals, Second Generation Grid Portals.

UNIT - V: **Semantic Grid and Autonomic Computing:** Meta data and Ontology in the Semantic Web, Semantic Web services, Layered structure of the Semantic Grid, Semantic Grid activities, Autonomic Computing **Grid Security and Resource Management:** Grid Security, A Brief Security Primer, PKI-X509 Certificates, Grid Security, Scheduling and Resource Management, Scheduling Paradigms, Working principles of Scheduling, A Review of Condor, SGE, PBS and LSF - Grid Scheduling with QoS.

TEXT BOOKS:

1. Grid Computing, Joshy Joseph and Craig Fellenstein, Pearson Education **2004.**
2. The Grid Core Technologies, Maozhen Li, Mark Baker, John Wiley and Sons, **2005.**

REFERENCE BOOKS:

2. Grid Computing: Making the Global Infrastructure a reality, Fran Berman, Geoffrey Fox, Anthony J.G. Hey, John Wiley and sons, **2003**.

I M.TECH – II SEMESTER

V18CTL03	DATA SCIENCE LAB	L	T	P	C
		0	0	2	1

Course Outcomes:

At the end of the course, the student will be able to:

1. Understand the Concepts of R and Programming.
2. Understand the mathematics from a numerical point of view, including the application of these concepts root-finding, numerical integration and optimization
3. Understand the purpose for random variable and expectations required to understand simulations
4. Implement the Monte carlo and Stochastic Modelling
5. Work effectively in teams on data science projects using R

LIST OF EXPERIMENTS

1. R Environment Setup & R as calculating environment
2. R Basic programming, Input and output
3. Programming with functions & Sophisticated Data structures
4. Better Graphics using Graphics parameters
5. Frames and environments & Object –oriented Programming
6. Numerical Accuracy and program efficiency
7. Probability & Statistics: The law of Total probability
8. Simulation: Monte Carlo Integration – Hit and miss method
9. Data Modelling: Linear and Multiple Regression Models

Case Study

Consider the data set of Ozone levels in United States for the year 2014 and do the following analysis

1. Formulate your questions
2. Read in your data
3. Check the packaging
4. Look at the top and the bottom of your data
5. Check your "n" s
6. Validate with at least one external data source
7. Make a plot
8. Follow up

TEXT BOOKS:

1. Introduction to Scientific Programming and Simulation Using R, Owen Jones, Robert Maillardet and Andrew Robinson, Second Edition, CRC Press, 2014
2. The Art of Data Science: A Guide for Anyone Who Works with Data, Roger D. Peng, Elizabeth Matsui, LeanPub, 2015.
3. Data Science for Business: What You Need to Know about Data Mining and Data - analytic Thinking, Foster Provost and Tom Fawcett. 2013
4. Elements of Statistical Learning, Trevor Hastie, Robert Tibshirani and Jerome Friedman, Springer, 2009.

REFERENCE BOOKS:

1. Mining of Massive Datasets, JureLeskovek, Anand Rajaraman and Jeffrey Ullman, Cambridge University Press. 2014.
2. Machine Learning: A Probabilistic Perspective.Kevin P. Murphy, MIT Press, 2013.
3. Avrim Blum, John Hopcroft and Ravindran Kannan. Foundations of Data Science.
4. Data Mining and Analysis: Fundamental Concepts and Algorithms, Mohammed J. Zaki and Wagner Miera Jr., Cambridge University Press. 2014.
5. R Programming for Data Science, Roger D. Peng, LeanPub, 2015.
6. Python for Data Science for Dummies, Luca Massaron and John Paul Mueller, John Wiley and Sons, 2015.

I M.TECH – II SEMESTER

V18CTL04	ADVANCED WEB TECHNOLOGIES LAB	L	T	P	C
		0	0	2	1

List of Experiments

1. a) A Simple HTML home page provides links to move to other pages like hobbies, educational info, personal info etc.
   b) A HTML program to illustrate the use of frame and frameset tags of HTML.
   c) A HTML Program which use a HTML controls to create a student information form to collect student's information like name, address, phone, email, sex, birth date, hobbies etc.
2. a) Create a webpage which displays "Hello World" with font size 20 pixels, bold format, in "Times New Roman" font and green in colour using inline CSS, embedded CSS and external CSS.
   b) Create a webpage which displays the class time table and apply the following effects on the table:

➔ For the table header apply *blue* as the background colour and *white* for the colour of the text in the table header.
➔ Display *day names* (Mon, Tue etc...) in bold format with the first letter in the day name in uppercase.
➔ Display *lunch* slightly in bigger font other than the remaining text.

   c) Create a webpage to manage personal details like name, class, qualifications, photo, address etc., using tables and other suitable HTML tags. Apply the following style information:

➔ Display the heading of the page in *Times New Roman* font and with 24px size.
➔ Align all the field names like Name, Class, Photo etc to *right* in the table.
➔ Apply *light blue* as background colour for the left side cells in the table which contains field names like Name, Class etc...
➔ Also display your college logo as background image in the top right position of the web page.

   d) Create a web page containing two images, where one image overlaps another image by using the *z-index* CSS property.

1. a) A HTML Program which demonstrates loops like for loop, do while, while in java script.
   b) A HTML Program which demonstrates the use of functions in java script.
   c) A HTML Program which demonstrates various events like onclick, ondbclick, onfocus, onblur, onchange, onmouseover, onmouseover, window event, onload, onunload event.
   d) A HTML Program to create various functions and sub routines to validate the data entered by user in form.
2. a) Create a program to illustrate the concept of associative array in PHP.
   b) Create PHP program to implement the concept of Session management.
   c) Create a PHP program to display student information in webpage. Student's data is stored in My SQL database.
   d) Create a PHP program to insert student information from HTML form. Student's data is stored in My SQL database.

3. a) Create a well-formed XML document.
   b) Create a valid XML document using DTD.
   c) Create a valid XML document using XML Schema.
   d) Create a XML document which contains details of cars and display the same as a table using XSLT.
   e) Write a Java program to parse the XML document containing car details using SAXAPI.

4. a) Create a servlet to display "Hello World" in the browser.
   b) Create a servlet to store email-id as an initialization parameter and print the same email-id by reading the initialization parameter from the web.xml file.
   c) Create a servlet to retrieve name and branch details from a html page and print the same using the servlet.
   e) Create a HTML page which accepts book id, book name and book price and a submit button. When the user clicks the submit button, all the values assigned to the previous text fields must be stored in a session object and the control forwards to another servlet where the values stored in the session are retrieved and displayed.
5. a) Create a JSP page to display "Hello World" in the browser.
   b) Create a JSP page to store email-id as an initialization parameter and print the same email-id by reading the initialization parameter from the web.xml file.
   c) Create a JSP page to retrieve name and branch details from a html page and print the same using a servlet.
   d) Create a HTML page which accepts book id, book name and book price and a submit button. When the user clicks the submit button, all the values assigned to the previous text fields must be stored in a session object and the control forwards to a JSP page where the values stored in the session are retrieved and displayed.
6. Create a HTML page which accepts student regd.no. and prints the results of that student by retrieving the results from the database. Use AJAX to display the "please wait..." while the server is processing the request and print the result of the student when the server returns the result. Server resource can be either servlet or JSP or PHP

Minutes of the 2nd Academic Council meeting on 01/07/2018
Item No: 9
Annexure No: VI

Academic Rules and Regulations for MBA Programme

(Effective for the students admitted into first year from the academic year 2018-2019)

The MBA Degree of Sri Vasavi Engineering College (Autonomous), Pedatadepalli, Tadepalligudem, under Jawaharlal Nehru Technological University Kakinada, Kakinada shall be conferred upon candidates who are admitted to the program and fulfill all the requirements for the award of the Degree.

1.0 ELIGIBILITY FOR ADMISSIONS:

Admission to the above program shall be made subject to eligibility criteria, qualification and specialization as prescribed from time to time. Admissions shall be made on the basis of merit/rank obtained by the candidates at the Qualifying Examination/Entrance Test conducted by the University or on the basis of any other order of merit as approved by the University, subject to reservations as laid down by the Govt. from time to time.

2.1 ADMISSIONS UNDER SPECIAL CASES:

These may arise in the following situations.

7. When a student gets detained due to academic regulations and re-joins the college to complete the programme in a new regulation.
8. When a student discontinues for some time and re-joins the college to complete the programme in a new regulation.
9. When a student seeks transfer from other colleges to SVEC and intends to pursue MBA programme.

   These admissions may be permitted by the College Academic Council as per the norms stipulated by the statutory bodies and the Government of Andhra Pradesh from time-to-time.

   In all such cases for admission if necessary permissions from the statutory bodies are to be obtained and the programme of study at the college will be governed by the transitory regulations stipulated in **11.0.**

   An under taking from the students is to be taken at the time of admission stating that they would abide by the transitory regulations specified by the authorities if there is any change in the regulations.

2.0 AWARD OF MBA DEGREE:

a) A Student shall be declared eligible for the award of MBA degree, if he pursues a course of study and completes it successfully in not less than two academic years and not more than four academic years.

b) A Student, who fails to fulfill all the academic requirements for the award of the degree within FOUR academic years from the year of their admission, shall forfeit his seat in MBA course.

c) The duration of each semester including examinations is 21 weeks.

3.0 ATTENDANCE :

A student is eligible to write the semester end examinations (SEE) if he/she acquires a minimum of 75% of attendance in aggregate of all the courses of that semester put together.

3.1 Condonation of shortage of attendance in aggregate up to 10% (65% and above and below

75%) in a given semester may be granted by the College Academic Committee on medical grounds provided the student has submitted the application for medical leave along with medical certificate from a Registered medical practitioner within three days form reporting to the class work after the expiry of the medical leave. However, a student can avail this concession on medical grounds for not more than once during entire duration of the program.

3.2 A student representing the college in approved extracurricular activities such as sports, games, cultural meets, seminars, workshops and conferences shall be considered as on duty provided he/she has obtained prior written permission from the head of the department concerned and also submitted the certification of participation from the organizer of the event within three days after the completion of the event. However, this period of absence shall be counted as present for the purpose of computation of attendance only.

3.3 A stipulated fee shall be payable towards condonation of shortage of attendance.

3.4 Attendance below 65% in aggregate shall not be condoned under any circumstances.

3.5 Students whose shortage of attendance is not condoned in any semester are not eligible to write their semester end examinations.

3.6 A student who is in short of attendance in a semester may seek re-admission into that semester when offered again, within 1 week from the date of the commencement of class work.

3.7 A student will be promoted to the next semester if he satisfies the attendance requirement of the present semester.

3.8 If any candidate fulfills the attendance requirement in the present semester, he shall not be eligible for readmission into the same class.

4.0 EVALUATION

The performance of the candidate in each semester shall be evaluated course-wise, with a maximum of 100 marks for theory and 100 marks for practicals, on the basis of Internal Evaluation (IE) and End Semester Examination.

4.1 Theory Courses:

iii. For the theory courses 60 marks shall be awarded based on the performance in the End Semester Examination and 40 marks shall be awarded based on the Internal Evaluation. The internal evaluation shall be made based on the average of the marks secured in the two Mid Term-Examinations conducted-one in the middle of the Semester and the other immediately after the completion of instruction.

iv. Each Mid-term examination shall be conducted for 20 marks and duration of 120 minutes with 4 questions (without choice), each question for 5 marks.
The balance 20 marks is earmarked for Mini report (10 marks for preparation of report and 10 marks for presentation in the class room in each course.

Internal Evaluation= Average of two mid examinations (20)+Mini report (20)

End Semester Examination shall be conducted for 60 marks.
There shall be 6 questions of 10 marks each and all questions shall be compulsory.
Each of these questions from 1 to 5 (with internal choice) shall cover each unit of the syllabus. The 6th question shall be a case study without internal choice.

4.2 Practical Courses:

For practical course, 60 marks shall be awarded based on the performance in the End Semester Examination (Conducted by External Examiner and Internal Examiner) and

40 marks shall be awarded based on the day-to-day performance and an Internal Test as Internal Evaluation.

4.3 Special instructions for Business Analytics Course

Related software tools like SPSS, R, MS- Excel etc., shall be used for Business Analytics. For the above course the relative weightage for internal evaluation and end semester examination shall be 40% and 60% respectively. For internal evaluation day to day work shall be evaluated for 20 marks by the course teacher concerned based on the reports/ submission prepared in the class. The remaining 20 marks shall be awarded on the basis of internal evaluation through a written test along with viva with equal weightage. The end semester examination pattern for this course is similar to that of other courses.

4.4 Minimum Academic Requirements:

i. A candidate shall be deemed to have secured the minimum academic requirements in a course if he secures a minimum of 40% of marks in the End Examination and a minimum aggregate of 50% of the total marks in the Semester End Examination and Internal Evaluation taken together.

ii. In case the candidate does not secure the minimum academic requirement in any course (as specified above in 4.4(i)) he has to re appear for the end semester examination in that course.

iii. A Candidate shall be given one chance to re-register for each course provided the internal marks secured by a candidate are less than 50% and he has failed in the end examination. In such a case, candidate must re-register for the course(s) and secure required minimum attendance.

iv. Attendance in the re-registered course(s) has to be calculated separately to become eligible to write the end examination in the re-registered course(s). The attendance in the re-registered course(s) shall be calculated separately to decide his eligibility for writing the end examination in those course(s). In the event of taking another chance, the internal marks and end examination marks obtained in the previous attempt are nullified. At a given time a candidate is permitted to re-register for a maximum of two course(s) in addition to

the subjects of a regular semester.

v. For re-registration the candidate have to apply to the Dean Academics by paying the requisite fees and get approval from the College before the start of the Semester in which re-

registration is required. In case the candidate secures less than the required attendance in any re-registered subject(s), he shall not be permitted to write the End examination in the subject. He shall again re-register the subject when next offered.

vi. A Candidate shall be allowed to submit the project report only after fulfilling the attendance requirement of all the semesters.

vii. Laboratory examination for MBA course must be conducted with two Examiners, one of them being Laboratory Class Teacher and second examiner shall be other than Class Teacher from other college.

viii. Every student has to register for a MOOCs course at the beginning of first semester as approved by the departmental committee and complete it before commencement of the third semester. A student shall submit the certificate of completion to the department. Students those who cannot complete MOOCs course in the stipulated period, they can do mini project during third semester as approved the departmental committee. A student shall submit a report and give a seminar on mini project before departmental committee. The Committee consists of the Head of the Department, the Supervisor of mini project and one senior faculty member from the department.

5.0 EVALUATION OF PROJECT WORK:

5.1 **A Project Review Committee** (PRC) will be constituted with Head of the Department, and two other senior faculty members of the department.

5.2 **Registration of Project work**: A Candidate is permitted to register for the project work after satisfying the attendance requirement up to II semester.

5.3 Every candidate shall work on projects approved by the PRC.

5.4 A student has to undergo practical training for a period of 5 weeks in a Corporate Enterprise (as a part of the project) after the Second Semester. In training period, the candidates should work on a specific problem related to the elective course.

At the end of practical training, the student should submit a certificate obtained from the organization.

The student should prepare a Project Report under the supervision of a guide from the faculty of management of the college. However, the students who prepare Project Report in the area of systems can also work under the guidance of a Faculty member from Computer Science Department.

5.5 The progress of the project work shall be periodically reviewed by PRC. The PRC shall authorize/approve change of guide/topic/title as deemed fit. A student shall submit status report in line with the recommended project calendar as approved by PRC. Three copies of Project dissertation certified by the Project Supervisor shall be submitted to the College.

5.6 The project is evaluated for 100 Marks at the end of IV Semester. A student shall engage a minimum of 2 hours per week in III and IV semester in consolidating the data, report writing, results & analysis, conclusions etc. Evaluation shall comprise of internal and external assessment.

Internal: 40 Marks

External: 60 Marks

Out of a total of 100 Marks for the dissertation 40 Marks shall be for internal evaluation and 60 Marks for the end semester project evaluation and viva voce. The internal evaluation shall be made by the departmental committee on the basis of the two seminars given by the student on the topic of his/her dissertation. The end semester project report evaluation and viva voce shall be adjudicated by one external examiner selected from a panel of 5 examiners outside the college. For this Head of the department shall submit a 5 member panel who are eminent in the field of study.

5.7 An internal departmental committee consisting of HOD, Supervisor and one senior faculty shall monitor the progress of the project work.

5.8 The project evaluation and viva voce examination shall be conducted by a board consisting of External examiner, HOD and Supervisor. A Candidate shall be allowed to take viva voce examination of the project, after fulfilling the attendance requirements.

5.9 The Candidate should secure minimum 40% marks in External assessment of Project Evaluation & viva-voce. If the candidate fails to secure minimum 50% of marks in project internal and End semester project Evaluation & viva-voce together, the candidate should retake the viva-voce examination after three months. If he fails to get minimum marks at the second viva-voce examination, he will not be eligible for the award of the degree, unless the candidate is asked to revise and resubmit. If the candidate fails to secure minimum marks again, the project shall be summarily rejected.

6.0 GRADING SYSTEM:

Based on the student performance during a given semester, a final letter grade will be awarded at the end of the semester for each subject. The letter grades and the corresponding grade points are as given in the Table.

Grade	Grade Points	% of marks
S	10	≥ 90
A	9	≥ 80 – < 90
B	8	≥ 70 – < 80
C	7	≥ 60 – < 70
D	6	≥ 50 – < 60
F	0 (Failed)	< 50

A student who earns a minimum of 6 grade points (D grade) in a course is declared to have successfully completed the course, and is deemed to have earned the credits assigned to that course.

7.0 GRADE POINT AVERAGE:

Computation of SGPA and CGPA:

The following procedure to compute the Semester Grade Point Average (SGPA)and Cumulative Grade Point Average (CGPA):

i. The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e

$$\textbf{SGPA}\ (S_i) = \sum(C_i \times G_i) / \sum C_i$$

where Ci is the number of credits of the i^{th} course and Gi is the grade point scored by the student in the i^{th} course.

ii. The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.

$$\textbf{CGPA} = \sum(C_i \times S_i) / \sum C_i$$

Where Si is the SGPA of the ith semester and Ci is the total number of credits in that semester.

The SGPA and CGPA shall be rounded off to 2 decimal places and reported in the transcripts.

Illustration for Computation of SGPA and CGPA:

Computation of SGPA at the end of 1st semester

Illustration No.1:

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	9	3 x 9 = 27
Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	S	10	3 x 10 = 30
Course 5	3	D	6	3 x 6 = 18
Course 6	3	C	7	3 x 7 = 21
Course 7	2	A	9	2 x 9 = 18
Total	**20**			**159**

Thus, **SGPA at the end of 1st semester= 159/20=7.95**

Illustration No.2 (with one failure)

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	9	3 x 9 = 27
Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	S	10	3 x 10 = 30
Course 5	3	F	0	3 x 0 = 00
Course 6	3	C	7	3 x 7 = 21
Course 7	2	A	9	2 x 9 = 18
Total				**141**

Thus, **SGPA= 141/20=7.05**

Illustration No.2 (a)

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 5	3	D	6	3 x 6 =18
Total Credits of the	**20**			Ci(First Attempt)141 +Ci (subsequent attempt) 18= **159**

Thus, recalculated **SGPA** after clearing the course **=159/20=7.95**

Illustration No.3

Second Semester Performance:

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	9	3 x 9 = 27
Course 2	3	C	7	3 x 7 = 21
Course 3	3	B	8	3 x 8 = 24
Course 4	3	Ex	10	3 x 10 =30
Course 5	3	A	9	3 x 9 = 27
Course 6	3	C	7	3 x 7 =21
Course 7	2	A	9	2 x 9 =18
Total	**20**			**168**

Thus, **SGPA of 2nd semester= 168/20=8.4**

Thus, CGPA at the end of 2nd semester= $\frac{20*x8+20x8.4}{40}$ =328/40=8.2

Sem-1	***Sem-2***	***Sem-3***	***Sem-4***
Credit : 20 SGPA: 7	Credit: 20 SGPA: 8.5	Credit : 20 SGPA: 9.2	Credit : 20 SGPA: 6.86

CGPA after Final Semester:

Thus, CGPA= $\frac{\mathbf{20*7+20*8.5+20*9.2+20*6.86}}{\mathbf{80}} = \mathbf{7.70}$

AWARD OF DEGREE & CLASS:

A candidate who becomes eligible for the award of M.B.A. Degree shall be placed in one of the following Classes based on CGPA.

TABLE: CGPA REQUIRED FOR AWARD OF DEGREE

Distinction with First Class	**≥ 7.75***
First Class	**≥ 6.75**
Second Class	**≥ 6.00**

*In addition to the required CGPA of 7.75, the student must have necessarily passed all the courses of each semester in the first attempt**.**

8.0 MALPRACTICES:

The Principal shall refer the cases of malpractices in Continuous Internal Evaluation (CIE) and/or Semester End Examination (SEE) to an Enquiry Committee constituted by him. The committee will submit a report on the malpractice allegedly committed by the student to the Principal.

Rules pertaining to the punishments in the case of Malpractice are given in Annexure-I

9.0 ADDITIONAL ACADEMIC REGULATIONS:

Grade Sheet: A grade sheet (memorandum) will be issued to each student indicating his performance in all courses taken in that semester and also indicating the grades and SGPA.

Transcripts: After successful completion of the total program of study, a Transcript containing performance of all academic years will be issued as a final record. Candidates shall be permitted to apply for recounting/revaluation within the stipulated period with payment of prescribed fee.

The Academic Council has to approve and recommend to the JNTUK, Kakinada for the award of a degree to any student.

10.0 WITHHOLDING OF RESULTS:

If the candidate has not paid any dues to the college or if any case of indiscipline is pending

against him, the result of the candidate will be withheld.

The issue of degree is liable to be withheld in such cases.

11.0 TRANSITORY REGULATIONS:

For students admitted under special cases (mentioned in 1.1) these transitory regulations will provide the modus operandi.

At the time of such admission, based on the Programme pursued (case by case):

1. Equivalent courses completed by the student are established by the BOS concerned.

2. Marks/Credits are transferred for all such equivalent courses and treated as successfully cleared in the Programme of study prescribed by SVEC.
3. A Programme chart of residual courses not cleared will be derived and a Programme of study with duration specified will be prescribed for pursuit at SVEC.
4. Marks obtained in the previous system if the case be, are converted to grades and CGPA is calculated accordingly.

All other modalities and regulations governing shall be the same as those applicable to the stream of students with whom such a candidate is included into.

Regarding the students who were admitted under JNTU, Kakinada regulations for affiliated colleges:

If they happen to join and study along with their juniors at SVEC, the transitory regulations to be specified by JNTU, Kakinada for such students have to be followed.

12.0 GENERAL :

1. Wherever the words "he", "him", "his", occur in the regulations, they include "she", "her", "hers".
2. The academic regulation should be read as a whole for the purpose of any interpretation.
3. In case of any doubt or ambiguity in the interpretation of the above rules the decision of the Chairman of the Academic Council is final.
4. The College may change or amend the academic regulations or syllabi at any time and the changes or amendments made shall be applicable to all the students with effect from the dates notified by the college.

Annexure-I

MALPRACTICES

S.No	Nature of Malpractices/Improper Conduct	Punishment
1 (a)	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is	Expulsion from the examination hall and cancellation of the performance in that subject only.

	appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination)

L-LECTURE HOURS, P-PRACTICAL HOURS, C-CREDITS, I-INTERNAL MARKS, E-EXTERNAL MARKS, TM-TOTAL MARKS, MNC: Mandatory Non credit course

Single Specialization:

The Specialization papers will be offered in the areas of Marketing, Finance, and Human Resource Management (HRM). The students should choose any **one** of the listed Specialization areas in the beginning of the third semester of MBA. Specialization will be offered subject to a minimum of 20 students.

Semester-III

Specialization I: Marketing

S.No.	Course Code	Course
1.	V18MBT17	Consumer Behavior
2.	V18MBT18	Retail Management
3.	V18MBT19	Integrated Marketing Communication
4.	V18MBT20	Product & Brand Management

Specialization II: Finance

S.No.	Course Code	Course
1.	V18MBT21	Security Analysis & Portfolio Management
2.	V18MBT22	Advance Management Accounting
3.	V18MBT23	Financial Markets & Services
4.	V18MBT24	Banking & Insurance Management

Specialization III: HRM

S.No.	Course Code	Course
1.	V18MBT25	Human Resource Planning & Development
2.	V18MBT26	Compensation and Reward Management
3.	V18MBT27	Performance Management
4.	V18MBT28	Strategic Human Resource Management

Semester-IV

Specialization I: Marketing

S.No.	Course Code	Course
1.	V18MBT31	Services Marketing
2.	V18MBT32	Sales and Distribution Management
3.	V18MBT33	Digital & Social media Marketing
4.	V18MBT34	International Marketing Management

Specialization II: Finance

S.No.	Course Code	Course
1.	V18MBT35	Financial Derivatives
2.	V18MBT36	Project Appraisal and Finance
3.	V18MBT37	Business Taxation & Planning
4.	V18MBT38	International Financial Management

Specialization III: HRM

S.No.	Course Code	Course
1.	V18MBT39	Organizational Change & Development
2.	V18MBT40	Management of Industrial Relations
3.	V18MBT41	Labour Welfare & Legislations
4.	V18MBT42	International HRM

SYLLABUS FOR MBA PROGRAMME

I MBA- I SEMESTER
Course Code: V18MBT01

MANAGEMENT PROCESS & ORGANIZATIONAL BEHAVIOR

L	T	P	C
4	0	0	4

Course Outcomes:

1. Understand the fundamentals of management and develop holistic perspective towards an organization.
2. Use the models of decision making and controlling in an organizational context.
3. Understand various dimensions of individual behavior.
4. Identify the dynamics of group and also emerge as a good team member.
5. Emerge as a leader who can understand the culture of an organization.

Unit-I:
Role of Management – Concept – Significance – Functions – Principles of Management - Patterns of Management: Scientific – Behavioral – Systems – Contingency

Unit-II:
Decision Making and Controlling – Process – Techniques. Planning – Process – Problems- Making it Effective. Controlling - System of Controlling – Controlling Techniques – Making Controlling Effective.

Unit-III:
Organizational Behavior – Introduction to OB – Organizing Process – Departmentation Types – Making Organizing Effective - Understanding Individual Behavior – Perception – Learning – Personality Types – Johor window- Transactional Analysis

Unit-IV:
Group Dynamics and Motivation – Benefits of Groups – Types of Groups – Group Formation and Development, Motivation – Concept of Motivation - Motivational Theories of Maslow, Herzberg, David Mc Clelland, and Porter and Lawler

Unit-V:
Leadership and Organizational Culture and Climate: Leadership – Traits Theory – Managerial Grid – Transactional vs. Transformational Leadership – Qualities of good Leader, Change Management – Conflict Management.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

I MBA- I SEMESTER
Course Code: V18MBT02

MANAGERIAL ECONOMICS

L	T	P	C
4	0	0	4

Course Outcomes:

1. Apply the concepts of Managerial economics in managerial decision making.
2. Understand the relationship between Price, demand & supply and determine changes in market equilibrium.
3. Explain the relationship between inputs and productivity using various production functions and their applicability in real world business.
4. Develop various cost structures and determine the relationship between costs and output in short and long run.
5. Determine the profit maximizing price and output in various competitive markets in short and long run.

UNIT 1:

Introduction to Managerial Economics: Definition, Nature and Scope, Relationship with other areas in Economics, The role of managerial economist. Concept of opportunity cost, Incremental concept, time perspective, Risk & uncertainty.

UNIT 2:

Demand Analysis: Elasticity of demand, types and significance of Elasticity of Demand - Measurement of price Elasticity of Demand – law of Supply, Elasticity of Supply -Need for Demand forecasting, forecasting techniques.

UNIT 3:

Production Analysis: Production function, Marginal Rate of Technical Substitution, Production function with one/two variables, Cobb-Douglas Production Function, Returns to Scale and Laws of returns.

UNIT 4:

Cost and Revenue Analysis: Cost concepts, determinants of cost, cost – output relationship in the short run and long run – Modern development in cost theory –Envelop shaped long run curve- Total, Average and Marginal cost and revenue curves– Cost - Volume – Profit analysis

UNIT 5:

Market Structure and Pricing practices: Features and Types of different Markets – Price- Output determination in Perfect competition, Monopoly, Monopolistic competition and Oligopoly both in the long run and short run. Pricing methods in practice –- Managerial Theories of a firm. .

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

ACCOUNTING FOR MANAGERS

L	T	P	C
4	0	0	4

Course Outcomes:

1. Understand Nature, objectives and principles of financial accounting,
2. Able to prepare the financial statements of organization.
3. Apply various tools to analysis the financial position of the organization.
4. Understood the fundamental concepts of cost accounting which help the organization in decision making.
5. Aware of contemporary practices in the area of financial accounting.

Unit-I:
Introduction to Financial Accounting: Definition – Scope – Nature – Objectives – Users of Accounting Information – Accounting Principles: Concepts and Conventions – Accounting Standards. **Branches of Accounting:** Financial Accounting – Cost Accounting – Management Accounting.

Unit-II:
Accounting Cycle & Preparation of Financial Statements: Book keeping, **Double Entry System, Classification of Accounts – Journal – ledger and Trial Balance preparation**. Capital and Revenue Expenditure. **Preparation** of Final Accounts: Trading, profit and loss account and Balance Sheet – Methods of Depreciation.

Unit-III:
Financial Statement Analysis: Comparative - Common size, Trend Analysis, Ratio Analysis – Funds Flow Analysis (simple problems) – Cash Flow Statements (simple problems)

Unit-IV:
Cost Accounting for Managerial Decisions: Meaning of Cost, Costing, cost accounting, Classification of Costs, Elements of Cost and Preparation of Cost Sheet. Marginal Costing: Break Even Analysis

Unit–V:
Contemporary Developments in Accounting: Window Dressing, Methods of Window dressing, **Ethical issues in preparation of accounts.** Human Resource Accounting – Social Accounting - Responsibility Accounting – Reporting to Management (Theory)- Forensic Accounting and Audit.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

Course Code: V18MBT06

QUANTITATIVE TECHNIQUES FOR BUSINESS DECISIONS

	L	T	P	C
Course Outcomes:	4	0	0	4

1. Obtain basic knowledge of statistics, probability and probability distributions.
2. Understand decisions making process and familiar with various supporting tools for decision making.
3. Able to formulate Linear Programming models for various managerial problems.
4. Can optimally utilize resources using Transportation, Assignment models. Formulate strategies using Game theory.
5. Understand project management techniques using PERT and CPM.

UNIT 1:
Basic Measures of Central Tendency – Measures of Dispersion –Simple Correlation and Regression analysis - Concept of Probability- Probability Rules – Joint and Marginal Probability – Baye'sTheorem- Probability Distributions- Binomial, Poisson, Normal and Probability Distributions.

UNIT 2:
Introduction to Operations Research. Decision Theory: Steps involved in Decision Making, different environments in which decisions are made, Criteria for Decision Making, Decision making under uncertainty, Decision making under conditions of Risk-Utility as a decision criterion, Decision trees, Graphic displays of the decision making process.

UNIT 3:
Linear Programming: Formation of mathematical modeling, Graphical method, the Simplex Method; Justification, interpretation of Significance of All Elements in the Simplex Tableau, Artificial variable techniques.

UNIT 4:
Transportation, Assignment Models & Game theory: Definition and application of the transportation model, solution of the transportation problem, the Assignment Model, Traveling Salesman Problem. Game Theory: Introduction – Two Person Zero-Sum Games, Pure Strategies, Games with Saddle Point, Mixed strategies, Rules of Dominance, Solution Methods of Games without Saddle point – Algebraic, matrix and arithmetic methods.

UNIT 5:
Network Analysis: PERT & CPM.- Drawing networks – identifying critical path – probability of completing the project within given time- project crashing –optimum cost and optimum duration..

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

I MBA- I SEMESTER
Course Code: V18MBL01

INFORMATION TECHNOLOGY LAB (100% LAB)

L	T	P	C
4	0	6	3

Course Outcomes:

1. Able to prepare various office reports using MS-Office, run queries using SQL.
2. Compute various financial calculations using MS-Excel.
3. Calculate and apply statistical functions using MS-Excel.
4. Understand the concept flow diagrams, TQM methodologies.

UNIT 1:

Introduction of various software used for business: Significance in the current business environments - Introduction of software MS Office, SQL.

UNIT 2:

Financial modeling: Present value of cash flows, Valuations, Financial ratio analysis, Forecasting, Trend analysis of data, Random input generations

UNIT 3:

Statistics for Management - correlation and regression analysis data presentation techniques. Spread sheet showing the monthly payments with changing interest rate over a period of loan. (Using excel)

UNIT 4:

Data Collection and analyzing techniques: Charts, Flow diagrams TQM methodologies

FINANCIAL MANAGEMENT

L	T	P	C
4	0	0	4

Course Outcomes:

1. Understood the fundamental concepts of financial Management
2. Able to construct optimal capital structure by identification of financial sources and evaluating cost of capital.
3. Evaluating long term investment projects by applying capital budgeting techniques.
4. Get through knowledge of working capital, cash, inventory and receivables management
5. Aware of various forms of corporate restructuring and Merger & Acquisition trends.

UNIT 1:
Financial Management: Concept - Nature and Scope - Evolution of financial Management objectives of financial Management - Profit maximization- Wealth maximization and EPS maximization – Major decisions of financial manager Challenges of Financial manager in contemporary scenario, Agency problem, - Risk-Return - trade off.

UNIT 2:
Financing Decision: Sources of finance - financial instruments - Concept and financial effects of leverage – Preparation Capital Structure decision - EBIT – EPS analysis. Cost of Capital: The concept – Average vs. Marginal Cost of Capital. Measurement of Cost of Capital – Component Costs and weighted Average Cost.

UNIT 3:
Investment and Dividend Decision: Investment decision process- Concept and Techniques of Time Value of money - Capital budgeting decisions: Developing Cash Flow Data - Evaluation Techniques-Traditional and DCF methods - NPV vs. IRR, PI- Risk Analysis in capital budgeting: Measurement of Risk. Risk Adjusted Discount Rate – Sensitivity analysis - Decision Tree Approach. Dividend Decision: Major forms of dividends - The theoretical backdrop– relevant, irrelevant theories of dividend. .

UNIT-4:
Working Capital Management: Concepts and characteristics of working capital. Factors determining the working capital - Estimating working capital requirements - Working capital policy - Management of current assets like Cash, Receivables and Inventory.

UNIT-5:
Corporate Restructuring: Mergers and Acquisitions, Types of Mergers, Evaluation of Merger Proposal, Take-over, Amalgamation, Leverage buy-out, Management buy-out, Merger and Acquisition trends in India.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

I MBA- II SEMESTER
Course Code: V18MBT08

HUMAN RESOURCE MANAGEMENT

L	T	P	C
4	0	0	4

Course Outcomes:

1. Understand the fundamentals of HRM with a global perspective.
2. Calculate the type and number of personnel required to the organization in future by considering the demand and supply of manpower.
3. Learn various methods to assess the performance of employees.
4. Design compensation system that conforms to the legal framework.
5. Learn the functionality of trade unions and also have ability to balance between work and life.

UNIT 1:
HRM: Significance - Definition and Functions – evolution of HRM- Principles - Ethical Aspects of HRM- - HR policies, Strategies to increase firm performance - Role and position of HR department – aligning HR strategy with organizational strategy - HRM at global perspective challenges – cross-cultural problems – emerging trends in HRM.

UNIT 2:
Investment perspectives of HRM: HR Planning – Demand and Supply forecasting- Recruitment and Selection- Sources of recruitment - Tests and Interview Techniques – Training and Development – Methods and techniques – Training evaluation - retention - Job Analysis –job description and specifications - Management development - HRD concepts.

UNIT 3:
Performance Evaluation: Importance – Methods – Traditional and Modern methods – Latest trends in performance appraisal - Career Development and Counseling- Compensation, Concepts and Principles- Influencing Factors- Current Trends in Compensation- Methods of Payments - compensation mechanisms at international level.

UNIT 4:
Wage and Salary Administration: Concept- Wage Structure- Wage and Salary Policies- Legal Frame Work- Determinants of Payment of Wages- Wage Differentials - Job design and Evaluation- - Incentive Payment Systems. Welfare management: Nature and concepts – statutory and non-statutory welfare measures – incentive mechanisms-Fringe Benefits-ESOPs

UNIT 5:
Managing Industrial Relations: Trade Unions - Employee Participation Schemes-Collective Bargaining– Grievances and disputes resolution mechanisms – Safety at work – nature and importance – work hazards – safety mechanisms- Quality of Work Life (QWL).

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

I MBA- II SEMESTER
Course Code: V18MBT09

MARKETING MANAGEMENT

	L	T	P	C
Course Outcomes:	4	0	0	4

1. Know the concepts and constituents of Market and Marketing.
2. Understand marketing mix elements
3. Understand the process of develop pricing strategies.
4. Learn various marketing communication tools and techniques
5. Obtain the information on changing paradigm of marketing.

UNIT 1:
Introduction to Marketing: Concept of Market and Marketing – Philosophies of Marketing – Marketing Planning Process-Creation of Customer Value and Satisfaction.

UNIT 2:
Marketing MIX : Elements of marketing Mix - Product: Classification of Products - New Product Development - Product Life Cycle- BCG Matrix - Market Segmentation, Targeting and positioning strategies.

UNIT 3:
Pricing Strategy: Objectives of Pricing - Methods of Pricing - Selecting the Final price - Adopting price - Initiating the price cuts - Imitating price increases - Responding to Competitor's price changes.

UNIT 4:
Marketing Communication: Communication Process – Communication Mix – Managing Advertising Sales Promotion - Public relations and Direct Marketing - Sales force - Objectives of Sales force - Structure and Size - Sales force Compensation.

UNIT 5:
Branding and New Horizons of Marketing: Brand and Branding – Creation of Brand - Brand Identity – Brand positioning and equity. Online Marketing – Green Marketing – Neuro Marketing – Guerilla Marketing – Experiential Marketing – Internal Marketing.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

I MBA- II SEMESTER
Course Code: V18MBT10

PRODUCTION & OPERATIONS MANAGEMENT

L	T	P	C
4	0	0	4

Course Outcomes:

1) Understand the evolution and fundamental concepts of production and operations management
2) Familiar with production planning and control strategies.
3) Learn concepts of Waste Management, Quality Assurance, Quality Circles and application of various Statistical Quality Control techniques.
4) Understand basic concepts of Quality Improvement tools like six sigma, ISO 9000-2000 clauses and coverage and factors effecting Productivity.
5) Gain knowledge on stores management and Inventory Control techniques.

UNIT 1:
Introduction: Overview & Definition of Production and Operations Management- Nature and Scope of Production and Operations Management-Historical Evolution –Role & responsibilities of the production manager - Types of Manufacturing Processes.
UNIT 2:
Production Planning and Control: Stages in PPC – Gantt – PPC in Mass, Batch, and Job Order Manufacturing- Aggregate planning and Master Scheduling, MRP, CRP. Maintenance management & Industrial Safety. Plant Location & Layout Planning- Factors influencing location - types of layouts. Capacity Planning – Optimal Production Strategies: Scheduling and Sequencing of Operations. Work Design: Method Study and Work Measurement – Work Sampling.
UNIT 3:
Managing of Work Environment: –Automation --Technology Management – Waste Management. Quality Assurance and Quality Circles – Statistical Quality Control –Control Charts for Variables- Average, Range and Control charts for Attributes. Acceptance Sampling Plans.
UNIT 4:
Quality Improvement: Basic concepts of quality, dimensions of quality, Juran's quality trilogy, Deming's 14 principles, Quality improvement and cost reduction, ISO 9000-2000 clauses & coverage. Six Sigma, Productivity –factors affecting productivity, measurement & improvements in productivity - new product development and design - stages & techniques. Total Productive Maintenance (TPM).
UNIT 5:
Stores Management: Purchase functions and Procedure - Objectives of Stores Management – Requirements for efficient-Management of Stores – safety stock- Different Systems of Inventory Control -Inventory control techniques- EOQ, ABC, VED and FNSD analysis- JIT, VMI
Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

I MBA- II SEMESTER

Course Code: V18MBT11

BUSINESS RESEARCH & STATSTICAL ANALYSIS

L	T	P	C
4	0	0	4

Course Outcomes:

1. Understand the concept of research, research process in detail
2. Understand various scaling techniques and research report preparation process.
3. Apply various statistical tools to test hypothesis.
4. Familiar with Bivariate and Multivariate analysis concepts.
5. Use SPSS for Hypothesis testing.

UNIT 1:

Introduction : Nature and Importance of research, The role of business research, Research process, types of research, Defining Research Problem. Research Design –Types of Research design-Sampling and Sampling Design – Sampling Methods –Probability and Non probability sampling. Discussion on primary data and secondary data, tools and techniques of collecting data. Methods of collecting data- Designing of Questionnaire.

UNIT 2:

Measurement and Scaling – Nominal Scale – Ordinal Scale –Interval Scale – Ratio Scale – Guttman Scale – Likert Scale – Schematic Differential Scale. Editing – Coding – Classification of Data – Tables and Graphic Presentation – Preparation and Presentation of Research Report

UNIT 3:

Data Analysis: Formulation of hypothesis-types of hypothesis- Type I and Type II errors, Hypothesis testing procedure, parametric tests -t distribution, Z test,

UNIT 4:

F test and ANOVA - one way and two ways test- Chi Square test- Goodness of fit- Independence- Bivariate and Multivariate analysis concepts.

UNIT 5:

Automated Data Analysis: SPSS Applications – Tabulation and Cross Tabulation of Data: Univariate, Bivariate Data Analysis and Tests of Hypothesis.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

I MBA- II SEMESTER
Course Code: V18MBT12

LEGAL ENVIRONMENT FOR BUSINESS

L	T	P	C
4	0	0	4

Course Outcomes:

1. Understand the classification and essentials of valid contract under the Indian contract act-1872
2. Student will get awareness about the sale and agreement to sale and also on the rights of a consumer to protect himself in the unfair trade practice
3. Understand contract of agency in detail and also the issue of various negotiable instruments and their consequences.
4. Understand the concepts of partnership according to the Indian Partnership Act 1932(types, registration, partnership deed, dissolution of partnership)
5. Aware the legal aspect at various stages of functioning of a company complying with Companies Act 2013.

UNIT 1:
Importance of Commercial Law: The Indian Contracts Act, 1872 – Nature of the Act and Classification of Contracts – Essentials of a Valid Contract – Offer and Acceptance – Capacity – Consideration –Free Consent – Legality of Object –Performance of a Contract – Discharge of a Contract – Breach of a Contract and Remedies.
UNIT 2
Sales of Goods Act: Distinction between Sales and Agreement to Sell – Conditions and Warranties – Performance of Contract of Sale –Transfer of Ownership – Rights of an Unpaid Seller. Consumer Protection Act, 1986: Consumer Right –Machinery for Redressal of Consumer Grievances.- Information Technology Act 2000.
UNIT 3:
Contract of Agency: Kinds of Agents –Creation of Agency- Duties and Rights of Principal and Agents- Principal's Liability for the Acts of the Agent-Liability of Agent –Termination of Agency. Negotiable Instruments Act, 1881- Kinds of a Negotiable Instruments and endorsement- Presentation and discharge of Negotiable Instrument.
UNIT 4:
Indian Partnership Act, 1932: Meaning and Essentials of Partnership- Registration – Types of Partnership- Duties and Rights of Partners – Dissolution of Partnership.
UNIT 5
Company Act 2013: Nature and Types of Companies – Formation – Memorandum of Association-Articles of Association –Kinds of Shares –Duties of Directors-Winding up.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

BUSINESS ETHICS & CORPORATE GOVERNANCE

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

1. Understand the importance of ethics and ethical practices at work place
2. Know various factors influencing Business ethics in India. Also get understanding of various scams.
3. Understand the ethical practices in functional areas such as Marketing, Hrm & Finance.
4. Understand the overview of corporate governance in India.
5. Gain knowledge in various governance issues related to Directors and Auditors.

UNIT 1:
Importance of Business Ethics: Values and Ethics- Business Ethics and Law – Ethics in Work Place – Ethical Decision Making- Theories of Business Ethics – Management and Ethics- Indian Ethical Traditions.
UNIT 2:
Impact of Globalization on Indian Business Ethics: Reasons for Unethical Practices among Indian companies – Development of Indian Capital Markets – Various studies on Ethical Attitudes of Managers Major Indian Scams.
UNIT 3:
Ethics in Marketing, HRM and Finance: Product safety and Pricing-Ethical responsibility in Product-Advertising and Target Marketing Ethics of sales, advertising and product placement and Consumer Autonomy. Ethics in HRM & Finance – HR related ethical issues - Institutional Culture – Frauds in Banks - Measures against Bank Frauds – Frauds in Insurance sector.
UNIT 4:
Corporate Governance: An overview – Theory and Practice of Governance- Indian model of Governance-Good Corporate Governance – Land marks in emergence of Governance OECD Principles – Sarbanes-Oxley Act 2002- SEBI Initiatives.
UNIT 5:
Corporate Governance Indian Scenario: Role of Government in Ensuring Corporate Governance – Governance issues relating to Board of Directors – Duties and responsibilities of Auditors – Governance under limited competition – Role of Media – Corporate Governance in Developing and Transiting Economies.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

SRI VASAVI ENGINEERING COLLEGE (Autonomous)

Pedatadepalli, Tadepalligudem – 534 101.

Third Meeting of the Academic Council was held on **02/06/2019 at 10:30 A.M**. in the Conference Hall of Sri Vasavi Engineering College.

Members Present:

1.	Dr.Guduru VNSR Ratnakara Rao	Principal & Chairman
2.	Prof. R. Srinivasa Rao,DE, JNTUK	Member
3.	Prof.P.Siva Pullaiah, Pro-Vice Chancellor, GITAM	Member
4.	Prof.B.V.S.S.S. Prasad, IIT Madras	Member
5.	Prof.S.R.K.Reddy, Gudlavelleru Engg.College	Member
6.	Sri B.V.Raghavaiah, Director (Retd.), CPRI, Bhopal	Member
7.	Dr. N.S.C. Babu, Executive Director, SETS	Member
8.	Dr.D.Sudha Rani, HOD, EEE	Member
9.	Dr.M.V.Ramesh, HOD, ME	Member
10.	Dr.E.Kusuma Kumari, HOD, ECE	Member
11.	Dr.D.Jaya Kumari, HOD, CSE	Member
12.	Dr.G.V.Subba Raju, HOD, MBA	Member
13.	Sri.N.Rajasekhar, HOD, BS&H	Member
14.	Dr.J.Srihari Rao, Director	Member
15.	Dr.V.V.Hanumantha Rao, Section Head, English	Member
16.	Sri P.Sita Rama Raju, Section Head, Physics	Member
17.	Sri J.Chandra Rao, Section Head, Chemistry	Member
18.	Sri.K.N.H.Srinivas, Assoc.Prof., ECE	Member
19.	Dr.Rama Rao P.V.V., Dean R&D	Member
20.	Sri.G.Radha Krishnan, HOD I/c, CE	Invited Member
21.	Sri V. Kiran Kumar, COE	Invited Member
22.	Dr. T. Sujani, Head Training	Invited Member
23.	Dr.Ch.Rambabu, Dean (SA)	Member Secretary

Members absent

1.	Dr. V.V. Subba Rao, Registrar JNTUK	Member
2.	Dr. A. Mallikarjuna Prasad, DAP JNTUK	Member
3.	Sri Lokam Prasad, CEO, Miracle Software Systems	Member

Minutes of the Third Academic Council Meeting held on 02/06/2019

Venue: Conference Hall

Item No.1: Welcome address by Principal& Introduction of members.

Principal Prof. Guduru VNSR Ratnakara Rao welcomed the members and chaired the meeting.

Item No.2: To approve Action taken report on the minutes of the previous meeting held on 01.07.2018.

The Council approved and the same is given in Annexure-I **(Page No.3)**

Item No.3: To approve of the minutes of the meeting of BOS of various departments:

a. Minutes of the 2nd meeting of the BOS of Mathematics (dated: 13.04.2019). [Details are given in Annexure-II **(Page No.9)]**
b. Minutes of the 2nd meeting of the BOS of **E**lectronics & **C**ommunication **E**ngineering **(ECE)** (dated: 13.04.2019). [Details are given in Annexure-III **(Page No.12)]**
c. Minutes of the 2nd meeting of the BOS of MBA (dated: 16.04.2019). [Details are given in Annexure-IV **(Page No.44)]**
d. Minutes of the 2nd meeting of the BOS of English (dated: 19.04.2019). [Details are given in Annexure-V **(Page No.106)]**
e. Minutes of the 2nd meeting of the BOS of **C**ivil **E**ngineering (**CE**) (dated: 20.04.2019). [Details are given in Annexure-VI **(Page No.116)]**
f. Minutes of the 2nd meeting of the BOS of **E**lectrical & **E**lectronics **E**ngineering (**EEE**) (dated: 20.04.2019). [Details are given in Annexure-VII **(Page No.149)]**
g. Minutes of the 2nd meeting of the BOS of **C**omputer **S**cience & **E**ngineering (**CSE**) (dated: 20.04.2019). [Details are given in Annexure-VIII **(Page No.172)]**
h. Minutes of the 2nd meeting of the BOS of **M**echanical **E**ngineering (**ME**) (dated: 21.04.2019). [Details are given in Annexure-IX **(Page No.219)]**

The Council approved minutes of the meeting of BOS of various departments.

Item No.4: Any other item with the permission of the Chair

i) The proposed B.Tech, MBA III & IV Semester Academic Calendar was also presented and it was approved by the council. [Details are given in Annexure-X **(Page No.250)]**

ii) Conditions for Promotion of Lateral Entry Students [Details are given in Annexure-XI **(Page No.253)]**

Annexure-I

Minutes of the Second Academic Council Meeting held on 01/07/2018

Item No.1: Welcome address by Principal& Introduction of members.

Principal Dr.Guduru.V.N.S.R Ratnakara Rao welcomed the members and chaired the meeting.

Item No.2: Approval of the minutes of the previous meeting

Minutes of the 1st meeting which were already circulated to members are approved.

Item No.3: To approve the Rules & Regulations to the award of degree

Detailed rules and regulations for the award of B.Tech degrees offered by Sri Vasavi Engineering College (Autonomous) were presented. After deliberations with minor changes the rules and regulations are approved. These are applicable for the batch of students admitted in Academic Year 2018-19 and onwards.

Item No.4: To approve the common course structure for different branches of B.Tech program.

The common course structures for different branches during the I and II semesters of the B.Tech programme are presented.

Item No.5: To approve the syllabi for different courses offered in I and II semester of B.Tech Programme.

Syllabus for different courses along with course outcomes, number of contact hours, number of credits and the prescribed textbooks as recommended by BOS concerned are presented.

Item No.6: To approve the course structures of II, III & IV years of different B.Tech programmes.

Tentative course structures for II, III & IV years of B.Tech programmes are presented.

These will be approved after further discussion in the next meeting.

Item No.7: To approve the rules and regulations pertaining to the award of M.Tech degrees offered by the college

The regulations pertaining to the M.Tech programme are presented.

Item No.8: To approve the course structure and syllabi for M.Tech programme offered by the college

Detailed course structures along with syllabi as recommended by BOS concerned for the different M.Tech programmes offered by the college namely

i. M.Tech (Structural Engineering)
ii. M.Tech (Power System Control and Automation)
iii. M.Tech (Machine Design)
iv. M.Tech (VLSI & Embedded Systems)
v. M.Tech (Computer Science &Engineering)

are presented.

Item No.9: To approve the Rules and Regulations pertaining to the award of MBA programme offered by the college

Council resolved that the regulations will be at far with those for M.Tech programme except for minor difference in arriving at the internal marks for the theory courses and in project evaluation.

Item No.10: To approve the course structure and syllabi for the MBA programme

Detailed course structure along with syllabi as recommended by BOS concerned is presented.

Item No.11: Any other item

The tentative academic schedule for the 1st year of B.Tech programme under autonomy is presented.

Meeting concluded with vote of thanks by the Member Secretary.

The Academic Rules & Regulations approved by the council were followed for the academic Year 2018-19.

- **Details of Academic Calendar:**

S.No	Content	B.Tech	M.Tech	MBA
1.	Commencement of Class work for I Sem	03/08/2018	13/08/2018	13/08/2018
2.	End of Class work for I Sem	29/11/2018	18/12/2018	06/12/2018

Annexure-II

Minutes of the meeting, BOS Mathematics (Held on 13.04.2019)

Item No-1: Introducing the members of BOS by Chairman.

The chairman of BOS extended a formal welcome and introduced the members.

Item No.2: Syllabi for the courses offered in MBA III and IV Semesters.

The detailed syllabi for the courses Employability Skills-III (Aptitude) & Employability Skills-IV (Aptitude) along with prescribed text books have been presented. With minor changes, the syllabi for the courses mentioned above have been approved. The approved syllabi for the courses are given in Appendix-BSH(M)-01.

Item No.3: Review of the Syllabi for the A.Y. 2018-19, I & II Semester of B.Tech & M.Tech Programme

No changes were suggested.

Proposed Syllabus

Year/Sem	**MBA III Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation Year	2019-2020	2	-	-	MNC*	**V18MAT07**
Name of the Course	Employability Skills – III (Aptitude-1)					

(*MNC : Mandatory Non Credit Course)

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Investigate different types of logics. (K4)
2. Classify Ages and solve problems on Averages. (K2)
3. Identify accurate direction, find out angles between hands of the clock and find a day in a particular Calendar. (K3)
4. Improve problem solving skills through the concepts of Percentages, Profit &loss, and Partnership. (K3)
5. Summarize appropriate methods of logical thinking on "Ratio and Proportion"(K4)

Unit-1 SET THEORY & ANALYTICAL REASONING. Definition and concept of Venn Diagram – its applications. statements – Affirmations,

Unit-2 AVERAGES &PROBLEMS ON AGES Problems on ages with different logics. Averages and its various Interpretations, Definition and Properties, Applications of average in different cases such as Allegations – Methods of solving equations.

Unit-3 CLOCK, CALENDER & DIRECTIONS Deriving the formula to find the angle between hands for the given time, finding the time if the angle is known. History of calendar-Define year, leap year, Finding the day for the given date, Formula and method to find the day for the given date in easy way. Usage of directions north, south, east, west, Problems related to directions north, south, east, west.

Unit-4 PERCENTAGES, PROFIT AND LOSS, PARTNERSHIP Problems on percentages-Converting fractions into percentages and vice versa, Understanding of cost price, selling price, marked price, discount, percentage of profit, percentage of loss, percentage of discount, Introduction of partnership, Sleeping partner concept and problems

Unit-5 RATIO & PROPORTION Introducing the concept of ratio in three different methods, a method to compute and compare two ratios – The effect of increase or decrease of a quantity on the ratio – The meaning of proportion and Problems related to Ratio and Proportion.

TEXT BOOK:

Work book -1 on Aptitude Prepared by Training & Placement cell, Sri Vasavi Engineering College.

R.S. Agarwal – Sultan Chand Publications

Proposed Syllabus

Year/Sem	**MBA IV Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation Year	2019-2020	2	-	-	MNC*	**V18MAT08**
Name of the Course	Employability Skills – IV (Aptitude-2)					

(*MNC : Mandatory Non Credit Course)

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Determine various methods of Simple and compound Interest. (K5)
2. Improve problem solving skills through the concepts of "Time & Work"(K3)
3. Find the relationship among Time, Speed and Distance. (K3)
4. RelateNumbers and Letters and solvedifferent problems on Number system. (K1)
5. Analyze and solve the problems on Data Analysis. (K4)

Unit-1 SIMPLE AND COMPOUND INTEREST Definition of Simple and Compound Interest. Formulas of Applications – Difference between Simple and Compound interest – Rate of Increase or Decrease Population

Unit-2 TIME AND WORK Men Days Relation for completion of work – Capability Ratio among Men, Women and Children – Application of time in Pipes and Cistern. Work Progress in positive and negative effects.

Unit-3 TIME & DISTENCE Relation among Time Speed and Distance – Concepts of Relative speed and Average Speed – Ideas about Boats and Streams.

Unit-4 NUMBER SYSTEM AND RANKING Problems of how to find the next number in the series, Finding the missing number and related sums, , Sums related to Classification, Sums related to letter series, Relation between number series and letter series and find the Ranking.

Unit-5 DATA ANALYSIS & INTERPRETATION. Mastering the art of analyzing the data of different forms – Understanding qualitative and quantitative research.

Annexure-III

Minutes of the meeting, BOS of Electronics & Communication Engineering

(Held on 13.04.2019)

The ECE Department Board of Studies (BOS) meeting was conducted on 13.4.2019 at 10.30 A.M. at ECE Seminar hall. The following external members attended the meeting along with internal faculty members.. The ECE HOD, Dr E. Kusuma Kumari, BOS Chairman headed the meeting.

Details of members attended:

S.No	Name of the BOS Member	Nominee	Address
1.	Dr.E.Kusuma Kumari	Chair person	Professor & Head, ECE, SVEC
2.	Prof.I.Santhi Prabha	University Nominee	Prof.in ECE Dept., University College of Engg.,JNTUK, Kakinada
3.	Prof. M. Venugopala Rao	Subject Expert	Prof., ECE Dept., K.L.University, Vijayawada.
4.	Sri. Sunkavalli Siva Kumar	Alumni Nominee	Sr.Engineer,Qualcomm,Bangalore.
5.	Dr. P. Kishore Kumar	Invited Member	Asst.Professor, HOD, ECE,NIT, A.P
6.	All Faculty Members in Dept.	Members	ECE Dept., SVEC

The following are the key points discussed in the meeting.

Key Discussions:

- **Item No.1: Review of the B. Tech ECE Course Structure**

- The Chairman and BOS members reviewed the course structure of B. Tech ECE and suggested modifications in the structure.
- Members suggested to combine Analog Communication(V18ECT07) in IV sem and Digital communication(V18ECT11) in V Sem courses as a single course as Analog & Digital Communication Course (V18ECT07)
- Members suggested to include Advanced communication course (V18ECT16) in the VI Semester.
- Members suggested to combine the lab courses Analog Comm. Lab (V18ECL05) & Digital Communications Lab (V18ECL07) as a Communications Lab (V18ECL05) and to be included in IV Semester.
- In 5th Semester theory course Digital Communication (V18ECT11) & Digital Comm. Lab Course (V18ECL07) are replaced with Digital Signal Processing

(V18ECT11) & Lab Courses (V18ECL07)

- Members suggested to include lab Course Mini Project using IOT(V18ECL12) and Theory Course Artificial Intelligence (V18ECT24) as program Elective Course in the course structure
- English BOS has renamed the titles of mandatory Courses Employability Skills I (V18ENT03) & Employability Skills II (V18ENT04) to Professional Communication Skills I (V18ENT03) & Professional Communication Skills II (V18ENT04) respectively in the III & IV Semesters of Course structure.
- It was decided that the mandatory Course Constitution of India (V18ENT11) to be included instead of Indian Traditional Knowledge (V18ENT07) in the III Semester of Course structure.
- The approved course structure for the Academic Year 2019-20 was given in **Appendix-ECE-01**

➢ **Item No.2: Suggest syllabi for proposed III and IV Semester course structure for the Academic year 2019- 2020**

- The approved syllabi for courses offered in III &IV Semesters are given in **Appendix-ECE-02**
  - For EEE & CSE Programmes, the following courses and Syllabus are approved and it was given in **Appendix-ECE-03**

S.No.	Programme	SEM	Course Code	Course Name
1	EEE	III	V18ECT05	Analog Electronics
2	EEE	III	V18ECL03	Analog Electronics Lab
3	CSE	III	V18ECT06	Digital Electronics
4	CSE	III	V18ECL04	Digital Electronics Lab

➢ **Item No 3: Approval for Course Structure For New Programme Electronics & Communication Technology**

- The Institution has filed an application with approved authorities for grant of New Programme Electronics & Communication Technology (ECT) for the academic year 2019-20.
- In this connection it is decided to follow the prescribed course structure of ECE I Semester & II Semester for the academic year 2019-20 for the new Programme ECT. Details are given in **Appendix-ECE-04.** Finally, the chairman thanked to all the BOS members and faculty. The meeting ended at 4.30 P.M

Appendix-ECE-01

III - SEMESTER

Course : Electronic Devices And Circuits

Code : V18ECT01

L	T	P	C
3	1	-	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Explain the basic concepts of semiconductor physics and explain the formation of p-n Junction. **[K2]**
2. Discuss special semiconductor diodes. **[K2]**
3. Construct and working principle of rectifiers with and without filters with relevant expressions and necessary comparisons **[K3]**
4. Describe the construction, principle of operation of transistors, BJT and FET with their V-I characteristics in different configurations. **[K2]**
5. Explain the need of transistor biasing, various biasing techniques for BJT and FET and stabilization concepts with necessary expressions. **[K2]**
6. Analyze small signal low frequency transistor amplifier circuits using BJT and FET in different configurations. **[K4]**

Syllabus:

UNIT-I:Semi Conductor Physics & Junction diode characteristics: Review of semiconductor physics, continuity equation, law of junction, p-n junction diode, current components in PN junction Diode, derivation of diode equation, V-I Characteristics, Diode resistance, Diode capacitance, energy band diagram of PN junction Diode.

UNIT- II: Special Semiconductor Diodes: Zener Diode, Breakdown mechanisms, Zener diode applications, LED, LCD, LDR, Photo diode, Photo transistor, Varactor diode, Tunnel Diode, DIAC, TRIAC, SCR, UJT, Construction, operation and characteristics of all the diodes are required to be considered.

UNIT- III: Rectifiers and Filters: Basic Rectifier setup**,** half wave rectifier, full wave rectifier, bridge rectifier, derivations of characteristics of rectifiers, rectifier circuits-operation, input and output waveforms, Filters, Inductor filter, Capacitor filter, L-section filter, π-section filter multiple L section and π-section filter, derivation for ripple factor in each case.

UNIT- IV: Transistor Characteristics: BJT: Junction transistor, transistor current components, transistor equation, transistor configurations, transistor as an amplifier, characteristics of transistor in Common Base, Common Emitter and Common Collector configurations, punch through/ reach through, typical transistor junction voltage values.

FET: FET types, construction, operation, characteristics, parameters, MOSFET-types, construction, operation, characteristics, comparison between JFET and MOSFET.

UNIT- V: Transistor Biasing and Thermal Stabilization: Need for biasing, operating point, load line analysis, BJT biasing- methods, basic stability, fixed bias, collector to base bias, self bias, Stabilization against variations in VBE, Ic, and β, Stability factors, (S, S', S''), Bias compensation, Thermal runaway, Thermal stability. FET Biasing.

UNIT- VI: Small Signal Low Frequency Transistor Amplifier Models:

BJT: Two port network, Transistor hybrid model, determination of h-parameters, conversion of h-parameters, Generalized analysis of transistor amplifier model using h-parameters, Analysis of CB, CE and CC amplifiers using exact and approximate analysis, Comparison of transistor amplifiers. Generalized analysis of FET amplifier small signal model, analysis of CS amplifier.

2. Electronic Devices and Circuits-Salivahanan, Kumar, Vallavaraj, Tata Mc-Graw Hill, Second Edition

3. Electronic Devices and Circuits – Bell, Oxford

4. Electronic Devices and Circuits-A.P Godse,U.A.Bakshi , Technical publications

Course: Digital System Design
Code:V18ECT02

L	T	P	C
3	-	-	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Explain the various types of number systems and their conversions, codes and logic Gates.(K_2)
2. Apply the minimization techniques to simplify the hardware requirements of digital circuits. (K_3)
3. Develop basic digital circuits with combinational logic using IEEE Standard 1076 Hardware Description Language (VHDL). (K_3)
4. Develop basic digital circuits with sequential logic using IEEE Standard 1076 Hardware Description Language (VHDL). (K_3)
5. Apply the knowledge of flip flops to construct different finite state machines (K_3)
6. Explain the concepts of different programmable logic devices. (K_2)

UNIT – I: NUMBER SYSTEMS & CODES

i) Representation of numbers of different radix, conversion from one radix to another radix, r-1's and r's complements of signed members, problem solving.
ii) 4 bit codes, BCD, Excess-3, 2421, 84-2-1 code etc.,
iii) Basic logic operations -NOT, OR, AND, Universal building blocks, EX-OR, EX-NOR - Gates, Standard SOP and POS forms, Gray code, error detection and correction codes, NAND-NAND and NOR-NOR realizations.

UNIT – II: MINIMIZATION TECHNIQUES

Boolean theorems, principle of complementation & duality, De-Morgan theorems, minimization of logic functions using Boolean theorems, minimization of switching functions using K-Map up to 4 variables, tabular minimization, problem solving (code-converters using K-Map etc..).

COMBINATIONAL LOGIC CIRCUITS DESIGN - I

Design of half adder, full adder, half subtractor, full subtractor, 4-bit adder-subtractor circuit, BCD adder circuit, Look-a-head adder circuit.

UNIT – III: COMBINATIONAL LOGIC CIRCUITS DESIGN -II

Design of decoder, encoder, priority encoder, multiplexer and demultiplexer, 4-bit digital comparator, Higher order multiplexing and demultiplexing, Realization of Boolean functions using decoders and multiplexers, Modeling of combinational logic circuits using VHDL.

UNIT – IV: SEQUENTIAL CIRCUITS-I

Classification of sequential circuits, basic flip-flops, truth tables and excitation tables, Conversion from one flip-flop to another flip-flop.
Design of registers: shift register, bi-directional shift register and universal shift register. Design of ripple counters, design of synchronous counters, Johnson counter, ring counter. Modeling of sequential circuits using VHDL

UNIT – V: SEQUENTIAL CIRCUITS-II

Finite state machine, Analysis of clocked sequential circuits, state diagrams, state tables, reduction of state tables and state assignment, design procedures. Realization of circuits using various flip-flops. Mealy to Moore conversion and vice-versa.

UNIT-VI: INTRODUCTION TO PLDs

PROM, PAL, PLA-Basics structures, merits & demerits, comparison, realization of Boolean functions and programming tables using PROM, PAL, PLA.

TEXT BOOKS:

Course : Signals & Systems
Code : V18ECT03

L	T	P	C
3	1	-	4

Prerequisite: Fundamentals of Electrical Circuits, Linear Algebra and Differential Equations, Ordinary Differential Equations.

<u>COURSE OUTCOMES:</u>

After successful completion of the course, the student will be able to:

CO1: Apply the knowledge of linear algebra to vector space& analogy, orthogonality and basic signals.K3

CO2: Classify systems based on their properties and determine the response of LTI system using convolution K2

CO3: Analyze the spectral characteristics of continuous-time signals and systems using Fourier analysis K4

CO4: Apply sampling theorem concept to convert continuous time signals to discrete time signal and reconstruct.K3

CO5: Apply Laplace transform and inverse Laplace transform to analyze continuous time signals and systems with respect to ROC.K3

CO6: Apply Z transform to analyze discrete time signals and systems with respect to ROC.K3

UNIT-I

BASIC SIGNALS: Introduction to signal and system, Classification of Signals, Elementary signals, Signal properties and operations, Orthogonal signal space, Signal approximation using orthogonal functions.

UNIT-II

LINEAR-TIME INVARIANT SYSTEMS: Properties of Systems, Continuous-Time LTI Systems: The Convolution Integral; Properties of Linear Time-Invariant Systems; Causal LTI Systems Described by Differential and Difference Equations.

UNIT III

FOURIER SERIES REPRESENTATION OF PERIODIC SIGNALS: Trigonometric and Exponential fourier series, Fourier Series Representation of Continuous-Time Periodic Signals(Sinusoidal, triangular and square); Convergence of the Fourier Series.

Fourier Transforms: Representation of Aperiodic Signals; The Continuous-Time Fourier Transform; The Fourier Transform for Periodic Signals; Properties of Continuous-Time Fourier Transform.

UNIT-IV

Representation of a Continuous-Time Signal by its Samples; The Sampling Theorem; Reconstruction of a Signal From its Samples; The Effect of Under Sampling; Aliasing; Discrete-Time Processing of ContinuousTime Signals; Sampling of Discrete-Time Signals.

UNIT-V

Laplace Transforms: The Laplace transform; The Region of Convergence for Laplace Transforms; The Inverse Laplace Transform; Properties of the Laplace Transform; Laplace Transform Pairs; Analysis and Characterization of LTI Systems Using the Laplace Transform.

UNIT-VI

Z-Transforms: The Region of Convergence for the Z-Transform; Properties of the Z-Transform; Z-Transform Pairs; Analysis and Characterization of LTI Systems using Z-Transforms.

Course : Network Theory
Code : V18ECT04

L	T	P	C
3	-	-	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Solve the electrical network using mesh and nodal analysis (K3)
2. Apply network theorems to analyze the Electric circuits.(K3)
3. Explain RLC transient circuits and Filters (K2)
4. Describe the steady state analysis of RLC circuits (K2)
5. Analyze the resonance circuits (K4)
6. Solve the two port network parameters (K3)

UNIT – I

Introduction to Electrical Circuits : Network elements classification, Electric charge and current, Electric energy and potential, Resistance parameter – series and parallel combination, Inductance parameter – series and parallel combination, Capacitance parameter – series and parallel combination. Energy sources: Ideal, Non-ideal, Independent and dependent sources, Source transformation, Kirchoff's laws, Mesh analysis and Nodal analysis problem solving with resistances only including dependent sources.

Unit-II

Network theorems: Thevinin's, Norton's, Milliman's, Reciprocity, Compensation, Substitution, Superposition, Max Power Transfer, - problem solving using dependent sources also.

UNIT – III

Transients: Definition of time constants, R-L circuit, R-C circuit with DC excitation, Evaluating initial conditions procedure, problem solving using R-L-C elements with DC excitation. Solutions using Laplace transform method.

UNIT – IV

Steady State Analysis of A.C Circuits: Response to sinusoidal excitation - pure resistance, pure inductance, pure capacitance, impedance concept, phase angle, series R-L, R-C, R-L-C circuits problem solving. Complex impedance and phasor notation for R-L, R-C, R-L-C problem solving using mesh and nodal analysis, problem solving.

UNIT – V

Resonance: Introduction, Definition of Q, Series resonance, Bandwidth of series resonance, Parallel resonance, Condition for maximum impedance, current in anti resonance, Bandwidth of parallel resonance, anti resonance at all frequencies.

UNIT – VI

Two-port networks: Relationship of two port networks, Z-parameters, Y-parameters, Transmission parameters, h-parameters, Relationship between parameter sets, Parallel connection of two port networks, Cascade connection of two port networks, series connection of two port networks, problem solving.

TEXT BOOKS:

1. Electric Circuit Analysis by Hayt and Kimmarle, TMH Eigth Edition ,2012.
2. Network Analysis by Van-Valkenberg.

REFERENCES:

1. Circuit Theory (Analysis and Synthesis) By ABHIJIT Chakrabarti 7th Revised Edition,Dhanpat Rai &Co.
2. Basic Circuit Analysis by DR Cunninghan, Jaico Publishers.
3. Network Analysis and Filter Design by Chadha, Umesh Publications.
4. Circuits & Network Analysis & Synthesis - A.Sudhakar & Shyam Mohan S.Pillai Tata McGraw Hill, 2nd Edition, 1994.

Course : Managerial Economics and Financial Analysis
Code : V18MBT51

L	T	P	C
3	-	-	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Understand the basic concepts of managerial economics, demand, and elasticity of demand and methods of demand forecasting. **[K2]**

CO2: Estimate the production function with one, two and infinite variables. Understand various cost concepts and calculating breakeven point **[K2]**

CO3: Understand and showing a price output determination in different types of market structures and knowing various pricing methods **[K2]**

CO4: Understand various forms of business organizations **[K2]**

CO5: Prepare financial statements and its analysis. **[K3]**

CO6: Appraise the projects by using various capital budgeting methods **[K4]**

UNIT-I Introduction to Managerial Economics and demand Analysis: Definition of Managerial Economics –Scope of Managerial Economics and its relationship with other subjects – Concept of Demand, Types of Demand, Determinants of Demand- Demand schedule, Demand curve, Law of Demand and its limitations- Elasticity of Demand, Types of Elasticity of Demand and Measurement- Demand forecasting and Methods of forecasting..

UNIT – II Production and Cost Analyses: Concept of Production function- Cobb-Douglas Production function- Law of Variable proportions-Isoquants and Isocosts and choice of least cost factor combination-Concepts of Returns to scale and Economies of scale-Different cost concepts: opportunity costs, explicit and implicit costs- Fixed costs, Variable Costs and Total cost –Cost–Volume-Profit analysis-Determination of Breakeven point(simple problems)Managerial significance and limitations of Breakeven point.

UNIT – III Introduction to Markets, & Pricing Policies: Market Structures: Perfect Competition, Monopoly, Monopolistic competition and Oligopoly – Features – Price and Output Determination – Methods of Pricing: Average cost pricing, Limit Pricing, Market Skimming Pricing, Internet Pricing, Flat Rate Pricing, Usage sensitive pricing and Priority Pricing.

UNIT – IV Types of Business Organization and Business Cycles: Features and Evaluation of Sole Trader, Partnership, Joint Stock Company – State/Public Enterprises and their forms – Business Cycles : Meaning and Features – Phases of Business Cycle.

UNIT – V Introduction to Accounting & Financing Analysis: Introduction to Double Entry Systems – Preparation of Financial Statements-Analysis and Interpretation of Financial Statements-Ratio Analysis

UNIT – VI Capital and Capital Budgeting: Capital Budgeting: Meaning of Capital-Capitalization-Meaning of Capital Budgeting-Time value of money- Methods of appraising Project profitability: Traditional Methods and modern methods (simple problems)

Course: Electronic Devices and Circuits Lab
Code : V18ECL01

L	T	P	C
-	-	2	1

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO-1 : Identify, Test and describe the specifications of various components. **[K2]**
CO-2: Find the unknown Frequency using Cathode Ray Oscilloscope. **[K1]**
CO-3: Interpret the Characteristics of various semiconductor devices. **[K2]**
CO-4: Sketch the Regulation Characteristics of Zener Diode. **[K3]**
CO-5: Examine the Performance of Rectifiers with and without Filters. **[K3]**
CO-6 : Sketch the Frequency Response of Amplifiers and Compute Bandwidth. **[K3]**

Electronic Workshop Practice:

1. Identification, Specifications, and Testing of R, L, C Components (Colour Codes), Potentiometers, Coils, Gang Condensers, Relays, Bread Boards.
2. Identification, Specifications and Testing of active devices like Diodes, BJTs, JFETs, LEDs, UJT.
3. Study and operation of Ammeters, Voltmeters, Transformers, Analog and Digital Multimeter, Function Generator, Regulated Power Supply and CRO..

List of Experiments:

1. P-N Junction Diode Characteristics
   Part A: Germanium Diode (Forward bias only)
   Part B: Silicon Diode (Forward & Reverse bias)
2. Rectifiers (without and with c-filter)
   Part A: Half-wave Rectifier
   Part B: Full-wave Rectifier
3. Zener Diode Characteristics
   Part A: V-I Characteristics
   Part B: Zener Diode as Voltage Regulator
4. BJT Characteristics (CB Configuration)
   Part A: Input Characteristics
   Part B: Output Characteristics
5. BJT Characteristics (CE Configuration)
   Part A: Input Characteristics
   Part B: Output Characteristics
6. FET Characteristics (CS Configuration)
   Part A: Drain Characteristics
   Part B: Transfer Characteristics
7. UJT Characteristics
8. BJT-CE Amplifier
9. Emitter Follower-CC Amplifier
10. FET-CS Amplifier

Course : Digital System Design Lab
Code : V18ECL02

L	T	P	C
-	-	2	1

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Examine the logic behavior of various IC gates.(K_3)
2. Construct and test combination logic circuits. (K_3)
3. Construct and test synchronous Asynchronous sequential circuits. (K_3)
4. Develop and Simulate Combinational logic circuit and validate its functionality using VHDL on Xilinx Software Package. (K_3)
5. Develop and Simulate Sequential logic circuit and validate its functionality using VHDL on Xilinx Software Package. (K_3)

LIST OF EXPERIMENTS

Part A: USING HARDWARE (Minimum of 5 Experiments to be done)

1. Verification of Basic Logic Gates and implementing all individual gates with Universal Gates.
2. Construct Half Adder and Full Adder using Half Adder and verify the truth table.
3. Design a Combinational Logic circuit for 3X8 Decoder and verify the truth table.
4. Design a Combinational Logic circuit for 4x1 MUX, 1X4 De-MUX and verify the truth table.
5. Verification of truth tables of the basic Flip- Flops with Synchronous and Asynchronous modes.
6. Design a Decade Counter and verify the truth table.

Part B: USING XILINX Tool (Minimum of 5 Experiments to be done)

Note: The students are required to design and draw the internal logical structure of the following Digital Circuits and to develop VHDL/Verilog HDL Source code, perform simulation using relevant simulator and analyze the obtained simulation results using necessary synthesizer.

1. Design of Full Adder using 3 modeling systems.
2. 8 to 3 Encoder (with and without parity).
3. 4- Bit comparator-IC 7485.
4. Flip-Flops (D/SR/JK Flip-Flops).
5. 4 bit binary up/down counter-IC74193.
6. Shift registers-IC 7495.

IV SEMESTER

Course : Analog & Digital Communications

Code : V18ECT07

L	T	P	C
3	1	-	4

Pre requisites: Signals and systems, Mathematics.

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Explain the spectral characteristics, generation and detection techniques of Amplitude modulation techniques (K2)
2. Explain the spectral characteristics, generation and detection techniques of angle modulation techniques (K2)
3. Illustrate different types of noise and predict its effect on analog communication Systems.(K3)
4. Describe the generation and detection methods of various digital modulation schemes.(K2)
5. Analyze Optimal Reception of Digital Signal and explain various multiple access techniques.(K4)
6. Describe the concepts of error control coding (K2).

UNITI

Analog Modulation: Need for modulation, Frequency Division Multiplexing, **Linear Modulation Techniques** - AM, DSB-SC, SSB, VSB - Time domain and frequency domain description, single tone modulation, power relations - Generation & Detection.Applications, AMTransmitters, AM Receivers - Super-heterodyne receiver, IF, AGC.

UNIT II

Angle Modulation: Phase and Frequency Modulation, Narrow band and Wide band FM, Carsons rule, Indirect and direct method of FM generation, Detection of FM, Applications, Phase locked loop, Comparison of FM and AM. FMTransmitters, FM Receivers.

UNIT III

Noise in Analog Communication system: Noise in DSB &SSB system, Noise in AM system, Noise in Angle Modulation system,Pre-emphasis and de-emphasis.

Pulse Modulation: Time Division Multiplexing,PAM, PWM, PPM-Generation and Detection.

UNIT IV

Digital Modulation Systems: Pulse Modulation: Baseband signals. Sampling process; Quantization Process; Quantization Noise; Pulse-Code Modulation; Noise Considerations in PCM Systems; Differential Pulse-Code Modulation, Delta modulation, adaptive delta modulation, Amplitude, phase and frequency shift keying schemes (ASK, PSK, FSK), M-array modulation schemes.

UNIT V

Optimal Reception of Digital Signal: Matched filter receivers, optimum receiver - bandwidth consideration and probability of error calculations for these schemes.

Multiple Access Techniques: TDMA, FDMA and CDMA

UNIT VI

Information theory and Error control Coding: Measure of information – Entropy, Information rate– Source coding theorem – Channel capacity – Shannon-Hartley law – Shannon's limit-Error, control Codes – Linear codes, Cyclic codes, Convolution Coding.

Course: Analog Circuits
Code: V18ECT08

L	T	P	C
3	1	-	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Construct wave shaping circuits for various applications
2. Analyze transistor amplifier circuits at low and high frequencies.
3. Explain the operation of Feedback and Power amplifiers
4. Explain the operation of sinusoidal and non sinusoidal oscillators
5. Construct circuits for different applications using ICs.
6. Explain the operation of Active filters and Data Converters

Unit I

Wave shaping circuits: Response of high pass and low pass RC circuits to step, pulse inputs. High pass RC circuit as differentiator, low pass RC circuit as integrator. Series and shunt clippers, clipping at two independent levels, Positive and Negative Clampers.

Unit II

Transistor at High frequencies: Hybrid π CE transistor model, CE short circuit current gain, Current gain with resistive load, Gain bandwidth product.

Multistage amplifiers: Low frequency analysis of cascade and cascode amplifiers.

Unit III

Feedback and Power amplifiers: Voltage series, current series, voltage shunt, current shunt feedback amplifiers, effect of negative feedback. Various classes of operation (Class A, B, AB, C), power efficiency calculations.

Unit IV

Oscillators: Oscillators: Basic concept, Barkhausen criterion, RC oscillators (phase shift, Wien bridge), LC oscillators (Hartley, Colpitts) Non-sinusoidal oscillators: Bistable, Monostable and Astable Multivibrators.

Unit V

Integrated Circuits and applications: Op-amp Block Diagram, Ideal Op-amp, Equivalent Circuit, Power supplies, Ideal voltage transfer curve, open loop op-amp configurations. Inverting and non-inverting amplifiers, summing, scaling, averaging amplifier, integrator and differentiator, 555 timer functional block diagram, Astable and Monostable multivibrators.

Unit VI

Active filters and Data Converters: First order Low pass, high pass, band pass and band stop filters, All pass filter design guidelines. Weighted resistor DAC, R-2R ladder DAC. Dual slope ADC, Successive approximation ADC, flash ADC.

Text Books:

1. Integrated Electronics- J. Millman and C.C. Halkias, TMH
2. Electronic Devices and Circuits- Salivahanan, N.Suresh Kumar, A. Vallavaraj, TMH
3. Pulse, Digital and Switching Waveforms - J. Millman and H. Taub, TMH
4. Pulse and Digital Circuits – A. Anand Kumar, PHI
5. Linear Integrated Circuits – D. Roy Choudhury, 4th edition, New Age International (p) Ltd.

6. Op-Amps & Linear Integrated Circuits - Ramakanth A. Gayakwad,3rd edition, PHI.

3. Pulse & Digital Circuits-BN Yoga Narasimhan, 2000,Sri Maruthi Publishers, Bangalore.
4. Operational Amplifiers & Linear Integrated Circuits –Sanjay Sharma ;SK Kataria &Sons;2nd Edition,2010

Course: Probability Theory & Stochastic Processes
Code : V18ECT09

L	T	P	C
3	1	-	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Explain basic concepts of probability theory through Sets and Relative Frequency **[K2]**
2. Explain the concept of a random variable, functions based on random variable like distribution and density functions **[K2]**
3. Compute the expected value, moments on one random variable **[K3]**
4. Illustrate the concepts of joint distribution & density functions on multiple random variables and their transformations with examples **[K3]**
5. Compute the statistical characteristics of stochastic processes like auto correlation & cross correlation functions. **[K3]**
6. Calculate the power density spectrum and cross power- density spectrum of signals **[K3]**

UNIT I: PROBABILITY : Probability introduced through Sets and Relative Frequency: Experiments and Sample Spaces, Discrete and Continuous Sample Spaces, Events, Probability Definitions and Axioms, Mathematical Model of Experiments, Probability as a Relative Frequency, Joint Probability, Conditional Probability, Total Probability, Bayes' Theorem, Independent Events

UNIT II: **THE RANDOM VARIABLE**: Definition of a random variable, Discrete, continuous and mixed random Variables. Distribution & density functions and its properties of a random variable. Binomial, Poisson, Uniform, Gaussian, Exponential and Rayleigh random variables. Conditional distribution and density functions and its properties.

UNIT III: OPERATION ON ONE RANDOM VARIABLE – EXPECTATIONS : Introduction, expected value of a random variable, function of a random variable, moments about the origin, central moments, variance, characteristic function, moment generating function, transformations of a random variable: Monotonic transformations for a continuous random variable

UNIT IV: MULTIPLE RANDOM VARIABLES : Vector random variables, joint distribution function, properties of joint distribution, marginal distribution functions, conditional distribution and density, statistical independence, sum of two random variables, sum of several random variables, central limit theorem: unequal distribution, equal distributions.

OPERATIONS ON MULTIPLE RANDOM VARIABLES: Joint moments about the origin, joint central moments, joint characteristic functions, jointly Gaussian random variables: two random variables case, N-random variables case

UNIT V: RANDOM PROCESSES – TEMPORAL CHARACTERISTICS: The random process concept, classification of processes, deterministic and nondeterministic processes, distribution and density functions, concept of Stationarity and statistical independence. First-order stationary processes, second-order and wide-sense Stationarity, nth-order and strict-sense Stationarity, time averages and Ergodicity, autocorrelation function and its properties, cross-correlation function and its properties, covariance functions

UNIT VI: RANDOM PROCESSES – SPECTRAL CHARACTERISTICS: The power density spectrum: properties, relationship between power density spectrum and autocorrelation function, the cross-power density spectrum, properties, relationship between cross-power density spectrum and cross-correlation function.

TEXT BOOKS:

1. Probability, Random Variables & Random Signal Principles, Peyton Z. Peebles, TMH, 4th Edition, 2001.
2. Probability, Random Variables and Stochastic Processes, Athanasios Papoulis and S.Unnikrishna Pillai, PHI, 4th Edition, 2002.
3. Probability Theory and Stochastic Processes, Y. Mallikarjuna Reddy, 4th Edition, Universities Press,

REFERENCE BOOKS:

1. Probability Theory and Stochastic Processes – B. Prabhakara Rao, BS Publications
2. Probability and Random Processes with Applications to Signal Processing, Henry Stark and John W. Woods, Pearson Education, 3rd Edition.
3. Schaum's Outline of Probability, Random Variables, and Random Processes.
4. An Introduction to Random Signals and Communication Theory, B.P. Lathi, International Textbook, 1968.
5. Random Process – Ludeman , John Wiley
6. Probability Theory and Random Processes, P. Ramesh Babu, McGrawHill, 2015.

L	T	P	C
3	1	-	4

Course: Electro Magnetic Waves & Transmission Lines
Code : V18ECT10
COURSE OUTCOMES:
After successful completion of the course, the student will be able to:
1. Use Various laws of static electric field to determine E. (K3)
2. Use Various laws of magneto static field to determine H and Apply Maxwell's equations to analyze the time varying behavior of EM waves (K3)
3. Compute the Propagation Characteristics of the EM Waves in different mediums. (K3)
4. Calculate Brewster angle, critical angle and total internal reflection. (K3)
5. Compute Primary and Secondary constants for a given transmission line(K3)
6. Calculate reflection coefficient, VSWR etc. using smith chart(K3)

UNIT I: Review of Co-ordinate Systems, **Electrostatics:** Coulomb's Law, Electric Field Intensity Electric Flux Density, Gauss Law and Applications, Electric Potential, Maxwell's Two Equations for Electrostatic Fields, Energy Density, Illustrative Problems. Convection and Conduction Currents, Dielectric Constant, Continuity Equation, Relaxation Time, Poisson's and Laplace's Equations; Types of Capacitance Illustrative Problems.

UNIT II: Magneto Statics : Biot-Savart Law, Ampere's Circuital Law and Applications, Magnetic Flux Density, Maxwell's Two Equations for Magneto static Fields, Magnetic Scalar and Vector Potentials, Ampere's Force Law, Inductances and Magnetic Energy. Illustrative Problems.

Maxwell's Equations (Time Varying Fields): Faraday's Law and Transformer emf, Inconsistency of Ampere's Law and Displacement Current Density, Maxwell's Equations in Different Final Forms and Word Statements. Introduction to Boundary conditions. Illustrative Problems.

UNIT III: EM Wave Characteristics - I: Wave Equations for Conducting and Perfect Dielectric Media, Uniform Plane Waves – Definition, All Relations between E & H. Sinusoidal Variations. Wave Propagation in Lossless and Conducting Media. Wave Propagation in Good Conductors and Good Dielectrics. Polarization. Illustrative Problems.

UNIT IV: EM Wave Characteristics – II: Reflection and Refraction of Plane Waves – Normal and Oblique Incidences, for Perfect Dielectrics, Brewster Angle, Critical Angle and Total Internal Reflection, Surface Impedance. Poynting Theorem – Applications, Illustrative Problems.

UNIT V: Transmission Lines - I : Types, Parameters, Transmission Line Equations, Primary & Secondary Constants, Expressions for Characteristic Impedance, Propagation Constant, Phase and Group Velocities, Infinite Line Concepts, Lossless line. Condition for Distortionless Line. Illustrative Problems.

UNIT VI: Transmission Lines – II : Input Impedance Relations, SC and OC Lines, Reflection Coefficient, VSWR. UHF Lines as Circuit Elements; $\lambda/4$, $\lambda/2$, $\lambda/8$ Lines – Impedance Transformations. Smith Chart – Configuration and Applications, Single Stub Matching. Illustrative Problems.

TEXT BOOKS:

1. Elements of Electromagnetic – Matthew N.O. Sadiku, Oxford Univ. Press, 3rd ed., 2001.
2. Electromagnetic Waves and Radiating Systems – E.C. Jordan and K.G. Balmain, PHI, 2nd Edition, 2000.
3. Electromagnetic field theory and Transmission Lines – G.SasibhusanaRao,Wiley India Pvt.L

REFERENCES:

Course: Analog Circuits Lab
Code: V18ECL06

L	T	P	C
-	-	2	1

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO 1- Construct circuit for linear wave shaping circuits. **[K3]**

CO 2- Construct feedback amplifiers and obtain their characteristics **[K3]**

CO 3- Construct different RC and LC oscillators using BJT based on the frequency range. **[K3]**

CO 4- Construct circuit and analyze different multivibrator circuits. [**K4]**

CO 5- Construct circuits for verifying linear and nonlinear applications using IC 741 op-amp and IC 555 timer [**K3]**

CO 6- Sketch the Frequency Response Characteristics of Active filters **[K3]**

Minimum Ten Experiments to be conducted:

1. Linear wave shaping
2. Non Linear wave shaping
3. Voltage-Series Feedback Amplifier
4. Class B Push-Pull Power Amplifier
5. RC Phase Shift/Wien Bridge Oscillator
6. Hartley/Colpitt's Oscillator
7. B istable Multi vibrator.
8. Summing, Scaling, Averaging amplifiers using IC 741.
9. Integrator and Differentiator Circuits using IC 741.
10. A stable Multi vibrator using IC 555.
11. Active Filters – LPF, HPF (first order)
12. 4 bit Digital to Analog Converter

Course: Communications Lab
Code : V18ECL05

L	T	P	C
-	-	2	1

COURSE OUTCOMES:
After successful completion of the course, the student will be able to:

CO-1- Demonstrate the operation of various pulse modulation and demodulation techniques. **[K3]**

CO-2 -Construct the pre-emphasis and de-emphasis circuits and verify its frequency response. **[K3]**

CO-3 -Demonstrate the spectrum analysis of modulated signal using spectrum analyzer, operation of AGC and PLL **[K3]**

CO-4- Understand the Time division multiplexing and Demultiplexing, Pulse digital modulation techniques, such as PCM, DPCM, and DM, Companding theorem **[K2]**

CO-5- Understand generation and detection of digital modulation techniques, such as ASK, PSK, FSK and DPSK. **[K2]**

CO-6- Verify the Source encoding and decoding (Huffman Coding) technique and channel encoding and decoding techniques. **[K3]**

List of Experiments (Twelve experiments to be done)

A. Analog Communications
   1. Amplitude Modulation - Mod. & Demod.
   2. AM - DSB SC - Mod. & Demod.
   3. Spectrum Analysis of Modulated signal using Spectrum Analyser
   4. Pre-emphasis & De-emphasis
   5. Frequency Modulation - Mod. & Demod, PLL.
   6. Sampling Theorem - Pulse Amplitude Modulation - Mod. & Demod.
   7. PWM , PPM - Mod. & Demod.

B. Digital Communications
   1. Pulse code modulation, Differential pulse code modulation.
   2. Delta modulation, Companding.
   3. ASK, FSK, PSK.
   4. Differential phase shift keying.
   5. Source Encoder and Decoder
   6. Channel coding-
      i. Linear Block Code-Encoder and Decoder
      ii. Binary Cyclic Code – Encoder and Decoder
      iii. Convolution Code – Encoder and Decoder

III SEMESTER
Course : Digital Electronics
Code : V18ECT06
Branch: III Semester CSE

L	T	P	C
3	-	-	3

COURSE OUTCOMES:
After successful completion of the course, the student will be able to:

1. Illustrate the conversion of a number from one number system to another. **[K3]**
2. Classify Boolean theorems & simplify the Boolean functions using the Boolean properties. **[K2]**
3. Use K-map as a tool to simplify and design logic circuits **[K3]**
4. Construct different combinational Logic circuits like MUX, Decoders, Encoders etc. **[K3]**
5. Demonstrate the basic flip-flops in terms of truth table & excitation table **[K2]**
6. Apply the concepts of flip-flops in the designing of different sequential circuits like registers, counters, etc. **[K3]**

UNIT1: Number systems& Binary codes:
Number systems: Number Systems, Radix conversions, complement of numbers. Binary codes: Binary codes, Weighted and non-Weighted codes, BCD code, gray code, excess 3 codes.

UNIT -II: Concept of Boolean algebra:
Basic Theorems and Properties of Boolean algebra, Boolean Functions, Canonical and Standard Forms, Minterms and Maxterms, Logic gates: NOT, OR, AND, NOR, NAND, XOR, XNOR - Universal gates.

UNIT- III: Gate level Minimization:
Map Method, Two-Variable K-Map, Three-Variable K-Map, Four Variable K-Maps. Products of Sum Simplification, Sum of Products Simplification, Don't – Care Conditions, NAND and NOR Implementation.

UNIT- IV:Combinational Logic:
Introduction, Analysis Procedure, Design Procedure, Binary Adder–Subtractor, Decimal Adder, Decoders, Encoders, Multiplexers.

UNIT V: **Sequential Logic Circuits**:
Introduction –Latches and Flip flops: Basic Flip flop circuit, RS, D, JK and T Flip-flops – Triggering of Flip flops: Master Slave Flip flop, edge triggered flip flop – Conversion of one type of Flip flop to another.

UNIT -VI: Registers and Counters:

Registers and Counters: Shift Register, Universal Shift Register, Applications of Registers, Asynchronous counter, Synchronous counter, Mod-N Counter, binary up/down counter, Ring counter, Johnson counter.

Memories: Introduction to ROM, PROM, EPROM.

TEXT BOOKS:

1. Digital Design, 5/e, M.Morris Mano, Michael D Ciletti, PEA.
2. Fundamentals of Logic Design, 5/e, Roth, Cengage.

REFERENCE BOOKS:

1. Digital Logic and Computer Design, M.Morris Mano, PEA.
2. Digital Logic Design, Leach, Malvino, Saha, TMH.
3. Modern Digital Electronics, R.P. Jain, TMH

L	T	P	C
-	-	2	1

Course : Digital Electronics Lab
Code : V18ECL04
Branch: III Semester CSE

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Apply the Boolean algebra to design digital logic circuits. **[K3]**

CO2: Analyse the behaviour of different combinational logic circuits. **[K4]**

CO3: Analyse the behaviour of different sequential logic circuits **[K4]**

CO4: Construct and troubleshoot simple combinational and sequential circuits **[K3]**

List of Experiments

Minimum Ten Experiments to be conducted:

Study of Integrated Circuits, Bread board& Power supplies.

1) Verification of Basic LogicGates
2) Verification of Universal Gates, Special Gates.
3) Verify the De-Morganlaws using CMOS IC's
4) Design a Gray code encoder & Decoder using IC 7486
5) Construct a Half Adder using IC's and verify the truth table.
6) Construct a Half Subtractor using IC's and verify the truth table.
7) Verify the truthtableof IC 74138(3x8 Decoder)
8) Verify the truthtable of IC 74153(4x1 MUX).
9) Verify the D Flip- Flop Using IC7474 with PRESET, CLEAR asynchronous Inputs.
10) Verify JK Flip- Flop & T Flip-Flop Using IC7476 with PRESET, CLEAR asynchronous Inputs.
11) Verify Decade counter using IC7490.
12) Design 4-bit right Shift Register using D-Flip-Flop and verify the truthtable.

Course : Analog Electronics
Code : V18ECT05
Branch: III Semester EEE

L	T	P	C
3	-	-	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO 1: Explain the working principle of diode and Construct Diode rectifier circuits with and without filters. **[K2]**

CO 2: Sketch V-I characteristics of BJT and FET in different configurations. **[K3]**

CO 3: Explain the operation of Feedback Amplifiers and oscillators. **[K2]**

CO 4: Construct wave shaping circuits for various applications **[K3]**

CO 5: Construct circuits for different applications using ICs. **[K3]**

CO 6: Explain the operation of Data Converters using IC 741 OP-AMP. **[K2]**

UNIT-I: Junction diode characteristics and diode Applications: p-n junction diode, current components in PN junction Diode, derivation of diode equation, V-I Characteristics, Diode resistance, Diode capacitance. Zener Diode, Breakdown mechanisms Basic Rectifier setup**,** half wave rectifier, full wave rectifier, bridge rectifier, derivations of characteristics of rectifiers, rectifier circuits-operation, input and output waveforms, Filters, Inductor filter, Capacitor filter, L-section filter, π-section filter-, derivation for ripple factor in each case.

UNIT- II: Transistor Characteristics: BJT: Junction transistor, transistor current components, transistor equation, transistor configurations, transistor as an amplifier, and characteristics of transistor in Common Base, Common Emitter and Common Collector configurations, punch through/ reach through, typical transistor junction voltage values.

FET: FET types, construction, operation, characteristics, parameters, MOSFET-types, construction, operation, characteristics, comparison between JFET and MOSFET.

UNIT- III Feedback amplifiers and Oscillators: Voltage series, current series, voltage shunt, current shunt feedback amplifiers, effect of negative feedback. Oscillators: Basic concept, Barkhausen criterion, RC oscillators (phase shift, Wien bridge), LC oscillators (Hartley, Colpitts)

UNIT- IV Wave shaping circuits: Response of high pass and low pass RC circuits to step, pulse inputs. High pass RC circuit as differentiator, low pass RC circuit as integrator. Series and shunt clippers, clipping at two independent levels, Positive and Negative Clampers. Introduction to multivibrators: Bistable, Monostable and Astable Multivibrators.

UNIT- V Integrated Circuits and applications: Op-amp Block Diagram, Ideal Op-amp, Equivalent Circuit, Power supplies, Ideal voltage transfer curve, open loop op-amp configurations. Inverting and non-inverting amplifiers, summing, scaling, averaging amplifier, integrator and differentiator, 555 timer functional block diagram, Astable and Monostable multivibrators.

UNIT- VI Data Converters: Weighted resistor DAC, R-2R ladder DAC. Flash Type ADC, Counter type ADC, Successive approximation ADC, Dual slope ADC,. Specifications of DAC&ADC.

Text Books:

1. Integrated Electronics- J. Millman and C.C. Halkias, TMH
2. Electronic Devices and Circuits- Salivahanan, N.Suresh Kumar, A. Vallavaraj, TMH
3. Pulse, Digital and Switching Waveforms - J. Millman and H. Taub, TMH
4. Linear Integrated Circuits – D. Roy Choudhury, 4th edition, New Age International (p) Ltd.
5. Op-Amps & Linear Integrated Circuits - Ramakanth A. Gayakwad,3rd edition, PHI.

-	-	2	1

Course: Analog Electronics Lab
Code : V18ECL03
Branch: III Semester EEE

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO-1: Interpret the Characteristics of various semiconductor devices. **[K2]**

CO-2: Examine the Performance of Rectifiers with and without Filters. **[K3]**

CO 3: Construct circuit for linear wave shaping circuits. **[K3]**

CO 4**:** Construct different RC and LC oscillators using BJT based on the frequency
range. **[K3]**

CO 5**-** Construct circuits for verifying linear and nonlinear applications using IC 741op-amp and IC 555 timer [**K3]**

CO 6**-** Verify the Characteristics of 4 bit Digital to Analog Converter **[K3]**

List of Experiments:

1. P-N Junction Diode Characteristics
   Part A: Germanium Diode (Forward bias only)
   Part B: Silicon Diode (Forward & Reverse bias)
2. Rectifiers (without and with c-filter)
   Part A: Half-wave Rectifier
   Part B: Full-wave Rectifier
3. Zener Diode Characteristics
   Part A: V-I Characteristics
   Part B: Zener Diode as Voltage Regulator

4 BJT Characteristics (CE Configuration)
   Part A: Input Characteristics
   Part B: Output Characteristics

5 FET Characteristics (CS Configuration)
   Part A: Drain Characteristics
   Part B: Transfer Characteristics.

6 Linear wave shaping

7 Non Linear wave shaping

8 RC Phase Shift/Wien Bridge Oscillator

9 Hartley/Colpitt's Oscillator

10 Integrator and Differentiator Circuits using IC 741

11 A stable Multi vibrator using IC 555

12 4 bit Digital to Analog Converter

Annexure-IV

Minutes of the meeting, BOS of MBA (Held on 16.04.2019)

The chairman of the BOS extended a formal welcome and introduced the members.

The following are the members of BOS of Management Studies (MBA)

S.No	Name of the member	Designation	
1	Dr.G.V.Subba Raju	Professor & HOD; DMS Sri Vasavi Engg.College	Chairman BOS
2	Prof. B. Amarnath	Professor & Registrar, Rayalaseema University, Kurnool	Council Nominee
3	Dr.J.N.V.Raghu Ram	Associate Professor, Department of Technology Management, VIT, Vellore	Council Nominee
4	Sri. P.S. Varma	D G M, Coromandel International Limited, Kakinada	Industry expert
5	Prof. D. Surya Chandra Rao	Professor Department of Management Studies, Krishna University, Director, RGVKT, Nuzvid. Machilipatnam	University Nominee
Department of Management Studies, Sri Vasavi Engineering College members			
6	V.Kiran Kumar	Associate Professor	Member
7	Dr. S. Krishna Murthy Naidu	Associate Professor	Member
8	Dr.RSRK Kiran Kumar	Associate Professor	Member
9	D.Satyanarayana	Sr. Asst.Professor	Member
10	D. Naveen Kumar	Asst. Professor	Member
11	R.V.Rajasekhar	Asst. Professor	Member
12	V. Saranya	Asst. Professor	Member

13	U. Bhargava	Asst. Professor	Member
14	Dr.R.S.V.Rama Swathi	Asst. Professor	Member
15	E. Suresh	Asst. Professor	Member
16	Dr. K.Rambabu	Asst. Professor	Member
17	K.V.Malleswari	Asst. Professor	Member

Item 1: Syllabi approval for MBA 3rd and 4th Semester Courses for the academic year 2019-20.

The Chairman of BOS proposed the syllabi for MBA 3rd and 4th Semester for the academic year 2019-20. After considering the suggestion made by all BOS members, the courses syllabi for MBA (Autonomous) programme has been approved. The approved syllabi copies are enclosed as **Appendix-MBA-01**

Item 2: Syllabi approval for Managerial Economics and Financial Analysis for the Academic year 2019-20.

The syllabus for Managerial Economics and Financial Analysis for the academic year 2019-20 has been approved by BOS members. The approved syllabi copy is enclosed as **Appendix-MBA-02**

Item 3: Review of MBA 1st Semester (2018-19 (Autonomous)) Admitted batch results.

MBA 1st Semester results of 2018-19 (Autonomous) admitted batch are presented by the Chairman.

End Semester examination results

No. Students registered	No. of students passed	Pass percentage
58	43	74.14%

All BOS members have expressed their satisfaction on the pass percentage and performance of students in examinations.

Item 4: Any other academic item

The course codes of Employability Skills III (Aptitude-1), Employability Skills IV (Aptitude-2) changed as V18MAT07 and V18MAT08 respectively. This courses syllabus is approved by BOS in Mathematics.

L-LECTURE HOURS, P-PRACTICAL HOURS, C-CREDITS, I-INTERNAL MARKS, E-EXTERNAL MARKS, TM-TOTAL MARKS,MNC-

MNC: Mandatory Non credit course

Single Specialization:

The Specialization papers will be offered in the areas of Marketing, Finance, and Human Resource Management (HRM). The students should choose any **one** of the listed Specialization areas in the beginning of the third semester of MBA. Specialization will be offered subject to a minimum of 20 students.

Semester-III

Specialization I: Marketing

S.No.	*Course Code*	*Course*
1	V18MBT17	Consumer Behavior
2	V18MBT18	Retail Management
3	V18MBT19	Integrated Marketing Communication
4	V18MBT20	Product & Brand Management

Specialization II: Finance

S.No.	*Course Code*	*Course*
1	V18MBT21	Security Analysis & Portfolio Management
2	V18MBT22	Advance Management Accounting
3	V18MBT23	Financial Markets & Services
4	V18MBT24	Banking & Insurance Management

Specialization III: HRM

S.No.	*Course Code*	*Course*
1	V18MBT25	Human Resource Planning & Development
2	V18MBT26	Compensation and Reward Management
3	V18MBT27	Performance Management
4	V18MBT28	Strategic Human Resource Management

Semester-IV

Specialization I: Marketing

S.No.	*Course Code*	*Course*
5	V18MBT31	Services Marketing
6	V18MBT32	Sales and Distribution Management
7	V18MBT33	Digital & Social media Marketing
8	V18MBT34	International Marketing Management

Specialization II: Finance

S.No.	*Course Code*	*Course*
5	V18MBT35	Financial Derivatives
6	V18MBT36	Project Appraisal and Finance
7	V18MBT37	Business Taxation & Planning
8	V18MBT38	International Financial Management

Specialization III: HRM

S.No.	*Course Code*	*Course*
5	V18MBT39	Organizational Change & Development
6	V18MBT40	Management of Industrial Relations
7	V18MBT41	Labour Welfare & Legislations
8	V18MBT42	International HRM

V18MBT14: BUSINESS POLICY & CORPORATE STRATEGY

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Understand the concept of business policy and strategic management in detail

CO2: To get familiarity with various tools for appraising an organization's external environment.

CO3: Analyze various strategies formulated at corporate, business and functional levels.

CO4: To understand strategy implementation procedure in detail.

CO5: Evaluate the performance of strategies designed and applied at various levels of a business.

UNIT 1

Introduction: The concept and evolution of Business Policy- Vision, Misssion and Objectives- Difference between business policy and strategic management. Corporate governance- concept, issues, models, evolution and significance. Introduction to Strategic Management-Concept importance of strategic Management, Strategy & Competitive Advantage, Strategy Planning & Decisions, strategic Management Process.

UNIT 2

Environmental Scanning and leadership: External Environment Appraisal using PESTEL, Competitor Analysis using Porter's 5-Forces model, Environmental Threat and Opportunity Profile (ETOP), Porter Value chain Analysis, Scanning Functional Resources and Capabilities for building Organization Capability Profile (OCP), SWOT Analysis. Key strategic leadership actions.

UNIT 3

Strategy Formulation: Strategic alternatives at corporate level: concept of grand strategies, Strategic choice models - Strickland's Grand Strategy Selection Matrix, Model of Grand Strategy Clusters, BCG, GE Nine Cell Matrix Strategic alternatives at business level: Michael Porter's Generic competitive strategies, Formulation of strategy at corporate, business and functional levels. Red Ocean and Blue Ocean Strategies

UNIT 4

Strategy Implementation: Developing short-term objectives and policies, functional tactics, and rewards, Structural Implementation: an overview of Structural Considerations Behavioral Implementation: an overview of: Leadership and Corporate Culture Mc Kinsey 7-S Framework.

UNIT 5

Strategy Evaluation and control – Establishing strategic controls - Measuring performance – appropriate measures- Role of the strategist – using qualitative and quantitative benchmarking to evaluate performance - strategic information systems – problems in measuring performance – Strategic surveillance -strategic audit Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT15: ENTREPRENEURSHIP DEVELOPMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Understand the foundations of Entrepreneurship and its importance.

CO2: Develop viable business ideas and understand entrepreneurial eco system.

CO3: Develop new projects and preparation of detailed project report.

CO4: Understand the importance of MSME's in the economic development of a nation.

CO5: Identify various sources of Entrepreneurial support organizations.

UNIT 1

Entrepreneurship: Importance and growth - Characteristics and Qualities of Entrepreneur- Role of Entrepreneurship, Ethics and Social Responsibilities. Women Entrepreneurship: Role & Importance, Problems of Women Entrepreneurs, Opportunities for women entrepreneurs – corporate entrepreneurship – mobility of entrepreneur – entrepreneurial motivation.

UNIT2

Innovation: Sources of business idea-Idea generation- Ideal validation- idea screening process- market sizing techniques- innovation and creativity for aspiring entrepreneurs- incubation- startup eco system

UNIT 3

Planning and Evaluation of Projects: Growth of Firm – Project identification and selection - Factors inducing growth- - Project Feasibility Study – Elements of a project report- preparation of DPR. Post Planning of Project-Project Planning and Control.

UNIT 4

Small and Micro Enterprises: Importance, definitions – policies and their support to MSMEs - growth and growth strategies – registration process of MSME- MSMED Act 2006.

UNIT 5

Institutional Support to Entrepreneur and MSMEs: Role of Government - Role of SIDBI, NIESBUD, SISI, DIC,NSIC, TCOs, role of DST in technology entrepreneurship- Financial Institutions-Commercial Banks, Entrepreneurial Development Institutes.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT16: E-BUSINESS

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Understand the foundations and importance of E-commerce.

CO2: Analyze the impact of e-commerce on business models and strategy.

CO3: Apply the systems used in e-business in real life situations.

CO4: Discriminate the impact of e-Commerce on Business to Consumer, Business-to-Business and Intra-organizational levels.

CO5: Create a new online business with profound knowledge on launching process.

Unit 1:

Introduction to e-Business and e-Commerce: Define the e-Commerce and e-Business, Define e- Commerce- Types of transactions. Define e-Business Models. Internet Marketing and e-Tailing.Elements of e-Business Models. Explain the benefits and limitations of e-Commerce.

Unit 2:

E-Marketplaces: Structures, Mechanisms, Economics, and Impacts: Define e-Marketplace and Describe their Functions. E-Business models of companies like amazon, flipkart, alibaba, foodpanda, etc. e-Marketplace types and their features. Describe the various types of e-auctions and list their characteristics.

Unit 3:

E-Business Applications, e-Procurement and e-Payment Systems: Integration and e-Business suits, ERP, e-SCM, CRM, e-Procurement definition, processes, methods and benefits, e-Payment, Discuss the categories and users of smart cards, Describe payment methods in B2B EC.

Unit 4:

The Impact of e-Business on Different Fields and Industries: e-Tourism, Employment and Job Market Online, Online Real Estate, Online Publishing and e-Books, e-Banking and Personal Finance Online, On-Demand Delivery Systems and E-Grocers, Online Delivery of Digital Products, Entertainment, and Media

Unit 5:

Launching a Successful Online Business and EC Projects- Requirements for starting an online business from different perspectives- Funding options available to start up businesses. -Processes associated with managing Web site development -Techniques of search engine optimization. Evaluate Web sites on design criteria.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT17: CONSUMER BEHAVIOR

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Analyze and determine the behavior of consumer.
2. Describe consumer perception and attitude.
3. Understand the factors influencing consumer behavior.
4. Know the importance of communication on consumer behavior
5. Able to identify the roots of consumerism.

UNIT-1

Introduction to Consumer Behavior:

Understanding consumers and market segments. Evolution of concept of consumer behavior, consumer analysis and business strategy. Models of Buyer Behavior, Howard Model, Howard- Sheth Model, EKB Model, Webster and Wind Model and Sheth Industrial Buyer Behavior Model

UNIT-2

Psychological Foundations of Consumer Behavior:

Consumer Motivation, Perception, Personality and Behavior, Learning and Behavior Modification, Information Processing, Memory Organization and Function, Attitude Formation and Attitude Change.

UNIT-3

Consumer Behavioral **Influences:**

Social and Cultural Environment Economic, Demographic, Cross Cultural and Socio–Cultural Influences, Social Stratification, Reference Groups and Family, Personal influence

UNIT-4

Communication and Consumer Behavior:

Components of communications process, designing persuasive communication and Diffusion of Innovations. Consumer Decision Processes High and Low Involvement, Pre-purchase Processes, Post Purchase processes, Consumption and evaluation, Brand Loyalty and Repeat Purchase Behavior

UNIT-5

Consumerism:

The roots of consumerism, consumer safety, consumer information, Environmental concerns, consumer privacy, legislative responses to consumerism and marketer responses to consumer issues

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT18: RETAIL MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Understand the basic structure of Retail business in India.
2. Gain Knowledge in designing Retail strategies.
3. Interpret the importance of location in making a retail business successful.
4. Apply basic operations in retail business in real life environment.
5. Examine the technical and financial aspects of retail business besides report preparation.

UNIT 1

Basics of Retailing: Retail and Retailing, Functions of Retailers, Types of Retailers, Benefits of a self service store, Evolution of Modern Retail, Understanding Barcoding, Multi-channel Retailing, Product assortment.

UNIT 2

Retail Strategies : Building sustainable competitive advantage, Strategic Retail planning process, Merchandising principles, Smart Pricing, Purchasing staples and branded FMCG items, Manpower planning and scheduling, Circle of Retail life

UNIT 3

Retail Location: Types, Location advantages, Finding the right place, core catchment area, Getting the right layout, Strategic profit model.

UNIT 4

Store operations : Inventory Management, Plan-O-Gram, Store manager routine and checklist, The cashier process, Cash management at Till, Billing process, Managing pilferage, Customer relationship management, periodic stock taking, Day-to-day security and loss prevention.

UNIT 5

Retail Monetary actions: Costs of running a supermarket, Key performance Indicators, Category Management, Retail automation, MIS and business reports, Licenses and permissions required.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT19: INTEGRATED MARKETING COMMUNICATION

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. To familiarize the students with concepts and practices in marketing communication.
2. To learn various communication tools and its effectiveness in contemporary times.
3. Draw a lesson from that knowledge for better integration of various marketing communication tools.
4. Understand the procedure for designing an integrated marketing communication programme.
5. Bring out creative ideas for effective marketing communication

Unit I:

An Introduction to Integrated Marketing Communication (IMC): Meaning and role of IMC in Marketing process, one voice communication V/s IMC. Introduction to IMC tools – Advertising, sales promotion, publicity, public relations, and event sponsorship; The role of advertising agencies and other marketing organizations providing marketing services and perspective on consumer behaviour.

Unit II:

Understanding communication process: Source, Message and channel factors, Communication response hierarchy- AIDA model, Hierarchy of effect model, Innovation adoption model, information processing model, The standard learning Hierarchy, Attribution Hierarchy, and low involvement hierarchy Consumer involvement- The Elaboration Likelihood (ELM) model, The Foote, Cone and Belding (FCB) Model.

Unit III:

Planning for Marketing Communication (Marcom): Establishing marcom Objectives and Budgeting for Promotional Programmes-Setting communication objectives, Sales as marcom objective, DAGMAR approach for setting ad objectives. Budgeting for marcom-Factors influencing budget, Theoritical approach to budgeting viz. Marginal analysis and Sales response curve, Method to determine marcom budget.

Unit IV:

Developing the Integrated Marketing Communication Programme: Planning and development of creative marcom. Creative strategies in advertising, sales promotion, publicity, event sponsorships etc. Creative strategy in implementation and evaluation of marcom- Types of appeals and execution styles. Media planning and selection decisions- steps involved and information needed for media planning.

Unit V:

Measuring Effectiveness and control of Promotional Programmes: Meaning and importance of measuring communication effectiveness, The testing process, measuring the effectiveness of other promotional tools and IMC. The ethical, social, and legal aspects of advertising and promotion-, Social Communication Different legislative and self regulatory codes controlling advertising and promotions in India viz. advertising councils code, print media codes, broadcasting media codes and regulations governing sales promotion, packaging, direct marketing and internet marketing

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

7. Foundations of Advertising Theory & Practice

V18MBT20: PRODUCT & BRAND MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES

At the end of the course students would be able to:

1: Understand the basic product structure and its components for market place.

2: Match the needs of the consumers in developing a new product.

3: Rephrase the concept of Brand and its applicability in the current market conditions.

4: Apply the concept of branding in real life market situations.

5: Understand core brand mantras for successful launch of a product.

UNIT 1

Introduction to Product: Product, Levels of a Product, Classification of products, Major Product decisions, Product Life Cycle, Product mix decisions, Consumer Adoption process.

UNIT 2

Product Development: New Product Development Process, Ideation, Concept development, Concept testing, Commercialization, Standard Test markets, controlled test markets and Simulated test markets, Managing New product development.

UNIT 3

Introduction to Branding: Concept of Brand and Branding, Brand Equity, Brand equity models, Building strong brands, Brand positioning, Brand Sponsorships.

UNIT 4

Brand Development: Functions of Brand to Consumer, Role of Brand in the product success, Brand development strategies, Brand Management Process, Brand Associations.

UNIT 5

Brand Value: Definition, Core Brand values, Branding and Ethics, Brand Mantras, Internal Branding, Brand Value chain model, Brand Imitations.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT21: SECURITY ANALYSIS & PORTFOLIO MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Understand the environment of share markets and trading system is stock exchanges.
2. Find the relationship between risk and return. Value the equities and bonds
3. Learn about fundamental, technical and efficient market approaches.
4. Identify portfolio selection through different portfolio theories.
5. Apply various tools to analyse the performance of mutual funds.

Unit-I: Concept of Investment Education: Investment Vs Speculation, Investment alternatives - Investment Process – Trading System in Stock Exchanges –Market Indices. Calculation of SENSEX and NIFTY - Return and Risk – Meaning and Measurement of Security Returns. Meaning and Types of Security Risks: Systematic Vs Non-systematic Risk - Measurement of Risk. (Problems)

Unit-II: Equity and Bond Valuation Models: – Equity Shares valuation-Cash flow valuation-Asset Valuation-Dividend-discount model; concept of Bond. Zero coupon bond, YTM, YTC. Bond valuation (Simple Problems)

Unit-III: Investment Analysis: Fundamental Analysis – Economy, Industry and Company Analysis, Technical Analysis – Dow Theory – Elliot Wave Theory – Trends and Trend Reversals - Efficient Market Theory –Hypothesis- Forms of Market Efficiency.

Unit-IV: Portfolio Analysis and Selection: Elements of Portfolio Management, Portfolio Models – Markowitz Model, Efficient Frontier and Selection of Optimal Portfolio. Sharpe Single Index Model (SIM) and Capital Asset Pricing Model (CAPM).

Unit-V: Portfolio Evaluation of Mutual funds: Concept and Objectives, Functions and Classification of Mutual Funds- SEBI- Guidelines for Mutual Funds, Performance Evaluation of Portfolios; Sharpe- Jenson – Fama Models for Evaluation of Mutual funds (Problems).

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT22: ADVANCED MANAGEMENT ACCOUNTING

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Understand the nature, objectives and importance of advanced management accounting
2. Find optimum pricing, product-mix make or buy decisions through marginal costing.
3. Learn about standard costing and variance analysis
4. Prepare different types of budgets
5. Aware of contemporary practices in the area of advanced management accounting

Unit – 1: Introduction: Scope, objectives, importance and limitations of Employment of Management Accounting — Role, duties and responsibilities of Management Accountant. Essentials of reporting of management accounting.

Unit - 2: Marginal Costing: Significance of marginal costing. Cost volume profit-BEP analysis – Decision Situations-Sales Volume Decisions – Pricing and Special Order Pricing – Make / Buy Decisions – Product Mix Decisions-– Plant Shutdown Decision Profit Planning – planning of level of activity – Key factor – Foreign market offers.

Unit - 3: Standard Costing: Standard Costing and Absorption costing – Establishment of cost standards. Variance analysis: Material Variances – Labour Variances – Overhead Variances - Sales Variances

Unit- 4: Budgetary Control: – Objectives and advantages of Budgetary control. Types of various budgets. Preparation of Budgets – Purchase, Production, Sales and Cash Budget- Flexible Budget – Master Budget – Zero Based Budgeting.

Unit – 5: Contemporary issues in Management Accounting: Value analysis-Activity based costing-Social cost benefit analysis-Kaizen costing-Throughput costing-Target costing-Learning curve.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT23: FINANCIAL MARKETS & SERVICES

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Understand the structure of Indian financial system
2. Get awareness on the financial services and function of merchant banker.
3. Understand the function of Venture capital and lease financing
4. Describe the functions of various NBFCs
5. Understand the functions of security deposits and stock broking houses

Unit I: Indian Financial System , Financial Markets: Structure of Financial System – role of Financial System in Economic Development – Financial Markets :Capital Markets – Money Markets – Primary Market and Secondary Market – Role of SEBI – Secondary Market Operations – Regulation – Functions of Stock Exchanges – Listing – Formalities – Financial Services Sector- Problems and Reforms.

Unit –II: Financial Services: Concept , Scope of Financial Services – Regulatory Frame Work of Financial Services – Growth of Financial Services in India – Merchant Banking – Meaning-Types – Responsibilities of Merchant Bankers – Role of Merchant Bankers in Issue Management – Regulation of Merchant Banking in India.

Unit III: Venture Capital and Leasing: – Growth of Venture Capital in India – Financing Pattern under Venture Capital – Legal Aspects and Guidelines for Venture Capital, Leasing – types of Leases – Evaluation of Leasing Option Vs. Borrowing.

Unit IV: NBFCs: Credit Rating – Meaning, Functions – Debt Rating System of CRISIL, ICRA and CARE. Factoring, Forfeiting and Bill Discounting – Types of Factoring Arrangements – Factoring in the Indian Context;

Unit V: Stock Broking and Security Depository: Concept of Stock Broking, Evolution of stock broking business, functions of stock broking firm- Regulatory guidelines of SEBI on stock broking business- Debt Securitization – Concept and Application – De-mat Services-need and Operations-role of NSDL and CSDL.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT24: BANKING & INSURANCE MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Interpret the basic institutional and practical knowledge of Banking and Insurance
2. Apply the practical knowledge of bank credit system and non-performing assets in real scenario.
3. Ability to recognize the new innovations and regulations in the banking sector
4. Ability to interpret the types of insurance and its importance.
5. Understand the concept of general insurance and its practical applicability.

UNIT 1

Introduction to Banking: Meaning of a Bank and Customer- Bank and customer Relationship - Role of commercial banks in Economic Development - Evolution of Banking in India – origin, nationalization, reforms and Financial Inclusion in India - Financial statement analysis of banks: CAMEL Approach, Key Performance indicators- Sources of Bank Funds.

UNIT 2

Uses of Bank Funds: Features of Bank Credit - types of lending - assessment of credit worthiness of a prospective borrower - management of credit process - different types of loans and their features - Non Performing Assets: - gross and net concept of NPAs, causes, implications & recovery of NPAs.

UNIT 3

Regulation and Innovations in Banking System: Regulation of Bank Capital: The need to regulate Bank Capital - Concept of Regulatory Capital, Basel Accords I,II and III. - Banking Innovations - Core Banking Solution - Retail Banking - Products & Services: Plastic Money - National Electronic Funds Transfer - ATM - Mobile Phone Banking - Net Banking- Banc-assurance.

UNIT 4

Introduction to Insurance: Evolution of insurance business in India-Insurance as a Risk Management Tool- Principles of Insurance - Characteristics of Insurance contract - Functions of Insurers - Concept of Reinsurance, uses and advantages - Marketing channels: Agents & brokers –professionalism, remuneration, responsibilities, classification - an overview of IRDA.

UNIT 5

Life Insurance and General Insurance: The concept of Life Insurance - types of Life Insurance contracts - Tax treatment of Life Insurance- Life Insurance Products- Classification of Life Insurance - The Actuarial Science- Provisions of Life Insurance contracts - Special Life Insurance forms – General Insurance: **Health Insurance, Travel Insurance, Motor Insurance – Marine Insurance-** Micro Insurance in India.

V18MBT25: HUMAN RESOURCE PLANNING AND DEVELOPMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Understand the concept of HR Planning

CO2: Explain various factors influence demand and supply of manpower

CO3: Describe various models of learning

CO4: Assess training needs of employees

CO5: Evaluate various training methods

UNIT-I

Concept of HRP: Definition, need and importance of HRP-Process-Objectives of HRP- skill inventory-Macro Level manpower Planning and Labour market Analysis - Organisational Human Resource Planning; Work Force Flow mapping - Age and Grade Distribution mapping.

UNIT-II

Demand and supply forecasting: Human Resource demand and supply forecasting- Qualitative and Quantitative techniques of HR Demand forecasting; Redeployment and Exit Strategies. Succession planning- meaning and process-competency mapping.

UNIT-III

Instructional Technology for HRD: Learning and HRD; Models and Curriculum; Principles of Learning; Group and Individual Learning; Transactional Analysis; Assessment Centre; Behaviour Modelling and Self Directed Learning; Evaluating the HRD.

UNIT – 4

Human Resource Training and Development: Concept and Importance; Assessing Training Needs; Designing and Evaluating T&D Programmes; Role, Responsibilities and challenges to Training Managers.

UNIT – 5

Training Methods: Training with in Industry (TWI): On the Job & Off the Job Training; Management Development: Lecture Method; Role Play; In-basket Exercise; Simulation; Vestibule Training; Management Games; Case Study; Programmed Instruction; Team Development; Sensitivity Training; Globalization challenges and Strategies of Training Program, Review on T&D Programmes in India.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT26: COMPENSATION AND REWARD MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Describe the meaning and concept of wage and salary administration

CO2: Explain various methods of calculating worth of a job

CO3: State the various theories of wage and salary

CO4: Analyze the role of a compensation in controlling the labour cost

CO5: Evaluate compensation structure and design efficient compensation package

UNIT 1

Compensation: concept and definition – objectives of compensation program – factors influencing compensation –Role of compensation and Reward in Modern organizations- Compensation as a Retention strategy- aligning compensation strategy with business strategy – concept of reward - non-financial compensation system-Reward management process - Managing Compensation: Designing a compensation system – internal and external equity– pay determinants

UNIT 2

Job evaluation and Compensation Structure: Introduction to Principles and Procedures of job evaluation programs-Introduction to basic job evaluation methods-Types of compensation system, compensation surveys- Incentive payments and its objectives.

UNIT 3

Wage and Salary administration: Nature and Purpose, Wage surveys-Administration of wage and salary-Principles-Components of wages-Theory of wages-Wage differentials-Importance- Wage differentials in India-Executive compensation plans-Legal frame work for wage and salary administration.

UNIT 4

Control systems for labour costs: Introduction-Direct and Indirect labour, Role of various departments-The personnel department-Industrial engineering department-Types of worker- Payroll department-Process and steps for preparation of payroll-Compensation surveys-Profit sharing.

UNIT 5

Pay Structure and Tax Planning: Introduction- Compensation Structures-Performance based and Pay based structures-Designing pay structures-comparison in evaluation of different types of pay structures-Significance of factors affecting-Tax Planning –Concept of Tax planning-Role of tax planning in compensation benefits-Tax efficient compensation package-Fixation of tax liability salary restructuring.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT27: PERFORMANCE MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Describe the relationship between performance management and other disciplines

of HRM

CO2: Explain various approaches of performance management planning

CO3: Discuss various methods of design and implementation of performance management Systems.

CO4: Analyze the role of a compensation in controlling the labor cost

CO5: Evaluate compensation structure and design efficient compensation package

Unit-1

Introduction: Definition–concerns-scope-Historical developments in performance management-Over view of performance management-Process for managing performance- Importance –Linkage of PM to other HR processes-Performance Audit.

Unit-2

Performance Management Planning: Introduction-Need-Importance-Approaches-The Planning Process—Planning Individual Performance- Strategic Planning –Linkages to strategic planning-Barriers to performance planning-Competency Mapping-steps-Methods.

Unit-3

Management System: objectives – Functions- Phases of Performance Management System- Competency based Performance Management Systems- Reward based Performance Management Systems- HR Challenges- Appraisal for recognition and reward-Methods of Appraising- Appraisal system design-Implementing the Appraisal System

Unit-4

Performance Monitoring and Counselling: Supervision- Objectives and Principles of Monitoring- Monitoring Process- Periodic reviews- Problem solving-engendering trust- Role efficiency- Coaching- Counselling and Monitoring-Concepts and Skills

Unit-5

Performance management skills – Operational change through performance management. High Performing Teams: Building and leading High performing teams – team oriented organizations – developing and leading high performing teams- Role of Leadership

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT28: STRATEGIC HUMAN RESOURCE MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Understand the theoretical perspectives and various approaches to Strategic HRM

CO2: Describe various strategic HR Planning process

CO3: Explain strategic HR implementation process

CO4: Explain strategic HR Development

CO5: Evaluate various strategic HR strategies

UNIT-1

Human Resource Strategy: Introduction to Strategic Human Resource Management - Evaluation objectives and Importance of Human Resources Strategy- Strategic fit – A conceptual framework -Human Resources contribution to strategy - Theoretical Perspectives on SHRM approaches - Linking business strategies to HR strategies.

UNIT-2

Strategic Human Resource Planning: Objectives, benefits, levels of strategic planning- Activities related to strategic HR Planning-Basic overview of various strategicplanning models-Strategic HR Planning model-Components of the strategic plan.

UNIT-3

Strategy Implementation: Strategy implementation as a social issue-The role of Human Resource-Work force utilization and employment practices-Resourcing and Retention strategies-Reward and Performance management strategies.

UNIT-4

Strategic Human Resource Development: Concept of Strategic Planning for HRD- Levels in Strategic HRD planning-Training and Development Strategies-HRD effectiveness- employee engagement- Green HRM

UNIT-5

Human Resource Evaluation: Approaches to evaluation, Evaluation Strategic contributions of Traditional Areas - Evaluating Strategic Contribution of Emerging Areas-HR as a Profit centre and HR outsourcing strategy.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT29: LOGISTICS & SUPPLY CHAIN MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Understand the importance of logistics management.

CO2: Get familiarity with various cost concepts in measuring logistics performance.

CO3: Understand the relationship between logistics and supply chain management.

CO4: Identify the need for coordination in LSCM.

CO5: Understand global logistics management.

UNIT-I:

Logistics and Competitive strategy: Competitive advantage – Gaining Competitive advantage through logistics-Integrated supply chains– Competitive performance - Models in Logistics Management - Logistics to Supply Chain Management – Focus areas in Supply Chain Management.- Customer service and retention- Basic service capability Value added services

UNIT 2:

Measuring logistics costs and performance: The concept of Total Cost analysis – Principles of logistics costing – Logistics and the bottom-line – Impact of Logistics on shareholder value - customer profitability analysis –direct product profitability – cost drivers and activity-based costing.

UNIT 3:

Logistics and Supply chain relationships: Benchmarking the logistics process and SCM operations –Mapping the supply chain processes – Supplier and distributor benchmarking – setting benchmarking priorities –identifying logistics performance indicators –Channel structure
– Economics of distribution –channel relationships –logistics service alliances.

UNIT 4:

Sourcing, Transporting and Pricing Products: sourcing decisions and transportation in supply chain – infrastructure suppliers of transport services – transportation economics and pricing – documentation - pricing and revenue management Lack of coordination and Bullwhip Effect - Impact of lack of coordination. - CRM –Internal supply chain management - .

UNIT 5:

Managing global Logistic: Logistics in a global economy – views of global logistics- global operating levels – interlinked global economy – Global strategy – Global purchasing – Global logistics – Channels in Global logistics –Global alliances.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT30: BUSINESS ANALYTICS

L	T	P	C
3	0	4	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Demonstrate the need of Business Analytics in today's business world.
2. Illustrate the phases of business analytics life cycle.
3. Demonstrate various Big Data technologies for business analytics.
4. Illustrating the use of R programming for business analytics.
5. Creating data sets using R programming and analyzing business data for decision making..

Unit– I: Introduction to Business Analytics –Competing on Analytics – The New Science of Winning Business Analytics – The Paradigm Shift from Data to Insight and from Business Intelligence to Business Analytics – Descriptive - Predictive and Prescriptive.

Unit–II: The Business Analytics Cycle Information summary about Books – Tools –Blogs- Resources –Groups – communities –Videos –Useful links- Sources of Data –Database Architecture and Data Gathering Process-Types of Data- Overview of an online survey/research project**.**

Unit-III: Introduction to Big Data – Structuring of Big Data –Elements of Big Data- Business Applications of Big Data –Handling Big Data Technologies –Data Mining and Text Mining.

Unit–IV: Creating R data sets – Reading raw data files (Column input/formatted input)- Assigning variable attributes – Changing variable attributes – Reading MS spread sheets in R**.** **(Including Practical)**

Unit–V: Reading R data sets and creating variables –Reading Delimited Raw Data Files –Using Excel for Data Management –Purpose of the Database- Relational Databases Entities – Relationships and Attributes –Specify Keys – Primary and Foreign –Create Relationships among Tables –Refinement and Normalization – Microsoft Access and R. **(Including Practical)**

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT31: SERVICES MARKETING

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Understand the nature and importance of services in an economy.
2. Understand the need for CRM in services.
3. To get familiarity on service product and strategy.
4. To understand distribution mechanism for services
5. To analyze the importance of service quality.

Unit I: Importance of services marketing; Service characteristics and Marketing challenges; Reasons for growth of services sector; Services sector in the Indian economy.

Unit II: Customer Relationship Marketing: Relationship Marketing, the nature of services consumption, understanding customer needs and expectations, strategic response to the intangibility of service performance.

Unit III: Services product management (Basic service package, CVH, service flower, new service development, service life cycle); Services branding and positioning; physical evidence; Pricing of services.

Unit IV: Service Distribution strategies; internal marketing; External marketing; Interactive marketing (Service encounter, Management of moments of truth, Interaction process design and efficiency).

Unit V: Service quality management (Gap model, SERVQUAL); Total quality services marketing; Services failures and recovery strategies (Case Studies are Compulsory)

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

Suggested Books:

1. K.Rama Mohana Rao: Services Marketing, Pearson, 2 Ed. New Delhi.
2. Valeri Zeithmal, Mary Jo Binter,Dwayne D Gremler and Ajay Pandit: Services Marketing, Tata McGraw Hill, New Delhi.

V18MBT32: SALES AND DISTRIBUTION MANAGEMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Understand the basic concept of Sales and distribution management.
2. Apply personal selling techniques to promote a product.
3. Apply various concepts of sales force management.
4. Understand various issues related to distribution channels.
5. Understand the functionality of logistics and supply chain concepts.

UNIT1:

Definition of Sales Management-nature and scope of sales Management –Modern trends in Sales Management -Role and responsibilities of Sales Managers -Organization of Sales Department-Different types of Sales Organizations

UNIT2:

Personal Selling –Objectives – Approaches to Personal Selling –Process of Personal Selling- Organization Design and Staffing, Sales Planning, Time and Territory Management

UNIT3:

Managing sales Force - Recruitment –Selection and Training of salesmen-Salesmen's Compensation Plans - Evaluation of Salesmen's performance –Sales Control Research

UNIT4:

Marketing Channels- Structure and Functions-Channel Design –Selecting Channel Members –Motivating Channel Members –Selection and Recruitment of Channel Partners- Channel Conflicts –Reasons –Managing Channel Conflicts

UNIT5:

Distribution Management -–Retailing –Wholesaling - Supply Chain Management-Managing Logistics-Physical Distribution Management –Transportation and Traffic Management –Warehousing and Storage

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT36: PROJECT APPRAISAL AND FINANCE

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

1. Understand the nature, importance, various types of projects and project life cycle.
2. Know the different kinds of feasibility studies like market, technical, managerial etc.
3. Evaluating project appraisals by applying capital budgeting techniques.
4. Estimation of project scheduling using PERT and CPM
5. Identify the project related risks and remedial measures.

Unit I: Basics of Project Management –Concept–need-objectives-Characteristics of project - Project environment – Types of Projects – Project life cycle-phases – Project selection – Causes of delay in Project commissioning– Remedies to avoid overruns.

Unit II–Feasibility study: Project analysis-Feasibility studies and reports – Stages of Project feasibility study – Components for project feasibility studies. Market feasibility -Market survey – Technical feasibility-Managerial Feasibility-Legal Aspects of Project Management.

Unit III: Financial Appraisal – Criteria and Investment strategies – Capital Investment - Risk analysis – Cost and financial feasibility – Cost of project and means of financing –Estimation of cash flows – Appraisal Techniques (Non DCF and DCF)-Cost-Benefit Ratio-Financial evaluation under Uncertainty – Tax benefits.(Problems)

Unit IV: Project Scheduling: Network analysis- Development of Programme Evaluation & Review Technique (PERT) – Benefits of PERT – Assumptions in PERT modelling Construction of PERT (Project duration and valuation, slack and critical activities, critical path interpretation) – Critical Path –Method (CPM) (Problems)

Unit V:–Project Risk Management*:* Introduction to Risk, Risk Management, Role of Risk Management in Overall Project Management, Process of Risk Management in project management, Reducing Risks. Abandonment analysis - Social Cost Benefit Analysis (SCBA) National and International importance of projects.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT39: ORGANIZATIONAL CHANGE & DEVELOPMENT

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Recall the nature and importance of change in organizations

CO2: Represent various changes through mapping and diagramming

CO3: Describe nature, importance and interventions of OD

CO4: State the changes in labour management in India

CO5: analyse the need for teams and harness team work in organizations

UNIT 1

Basics of Change Management: Meaning, nature and Types of Change – change programmes – change levers – change as transformation – change as turnaround – value based change.

UNIT 2

Mapping change: The role of diagramming in system investigation – A review of basic flow diagramming techniques –systems relationships – systems diagramming and mapping, influence charts, multiple cause diagrams- a multidisciplinary approach - Learning organization: The relevance of a learning organization - strategies to build a learning organization.

UNIT 3

Organization Development (OD): Meaning, Nature and scope of OD - Dynamics of planned change – Person-focused and role-focused OD interventions –Planning OD Strategy – OD interventions in Indian Organizations – Challenges to OD Practitioners.

UNIT 4

Negotiated Change: Change in the labour - management relations in the post-liberalized India – collective bargaining strategy to the challenges of Globalization and the restructuring of enterprises in India - Changes in the legal frame work of collective bargaining -social security.

UNIT 5

Team Building: Nature and Importance of Teams – Team Vs Groups – Types of teams – Characteristics of Virtual teams – Team building life cycle – Team building skills – Virtual team - High performance teams – self managing teams – Building team relationships – empowered teams – leadership on teams – Managing cross –cultural diversity in teams – Group think as a decision making process – effective decision making techniques for teams and groups.

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

V18MBT42: INTERNATIONAL HRM

L	T	P	C
4	0	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Describe global HR perspective

CO2: Explain problems involved in international assignments

CO3: Discuss the relevance of Cross Culture Communication in global context

CO4: Evaluate the worth of a overseas assignment

CO5: Evaluate Global Strategic Advantages through HRD

UNIT 1

Introduction: A Global HR Perspective in New Economy-Challenges of Globalization -Implications of Managing People and Leveraging Human Resource-- Conflicts - Strategic Role of International HRM – Global HR Planning – Staffing policy – Training and development – performance appraisal –International Labour relations – Industrial democracy.

UNIT 2

Managing International Assignments: Significance – Selection methods - Positioning Expatriate – Repatriate – factors of consideration - Strategies - International assignments for Women – gender issues.

UNIT 3

Cross Culture Management: Importance – Concepts and issues – theories-considerations - Problems – Skill building methods – Cross Culture Communication and Negotiation – Cross Culture Teams.

UNIT 4

Compensation Management: Importance – Concepts- Trends - Issues – Methods – Factors of Consideration – Models – incentive methods – global compensation implications on Indian systems - Performance Management.

UNIT 5

Global Strategic Advantages through HRD: Measures for creating global HRD Climate – Strategic Frame Work of HRD and Challenges - Globalization and Quality of Working Life and Productivity – Challenges in Creation of New Jobs through Globalization- New Corporate Culture

Relevant cases have to be discussed in each unit and in examination case is compulsory from any unit.

Appendix-MBA-02

Course: MANAGERIAL ECONOMICS AND FINANCIAL ANALYSIS
Code : V18MBT51

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Understand the basic concepts of managerial economics, demand, and elasticity of demand and methods of demand forecasting.

CO2: Interpret the production function with one, two and infinite variables. Understanding various cost concepts and calculating breakeven point

CO3: Identify price output determination in different types of market structures and knowing various pricing methods

CO4: Understand various forms of business organizations

CO5: Prepare financial statements and its analysis.

CO6: Appraise the projects by using various capital budgeting methods

UNIT-I

Introduction to Managerial Economics and demand Analysis: Definition of Managerial Economics –Scope of Managerial Economics and its relationship with other subjects – Concept of Demand, Types of Demand, Determinants of Demand- Demand schedule, Demand curve, Law of Demand and its limitations- Elasticity of Demand, Types of Elasticity of Demand and Measurement- Demand forecasting and Methods of forecasting..

UNIT – II

Production and Cost Analyses: Concept of Production function- Cobb-Douglas Production function- Law of Variable proportions-Isoquants and Isocosts and choice of least cost factor combination-Concepts of Returns to scale and Economies of scale-Different cost concepts: opportunity costs, explicit and implicit costs- Fixed costs, Variable Costs and Total cost –Cost–Volume-Profit analysis-Determination of Breakeven point(simple problems)Managerial significance and limitations of Breakeven point.

UNIT – III

Introduction to Markets, & Pricing Policies: Market Structures: Perfect Competition, Monopoly, Monopolistic competition and Oligopoly – Features – Price and Output Determination – Methods of Pricing: Average cost pricing, Limit Pricing, Market Skimming Pricing, Internet Pricing, Flat Rate Pricing, Usage sensitive pricing and Priority Pricing.

UNIT – IV

Types of Business Organization and Business Cycles: Features and Evaluation of Sole Trader, Partnership, Joint Stock Company – State/Public Enterprises and their forms – Business Cycles : Meaning and Features – Phases of Business Cycle.

UNIT – V

Introduction to Accounting & Financing Analysis: Introduction to Double Entry Systems – Preparation of Financial Statements-Analysis and Interpretation of Financial Statements-Ratio Analysis

UNIT – VI

Capital and Capital Budgeting: Capital Budgeting: Meaning of Capital-Capitalization-Meaning of Capital Budgeting-Time value of money- Methods of appraising Project profitability: Traditional Methods and modern methods (simple problems)

Minutes of the meeting, BOS of English (Held on 19.04.2019)

Minutes of the Second Meeting of Board of Studies of English held on 19/04/2019 at Srinivasa Ramanujan Hall of Learning (E-block) in the Department of BS&H.

Agenda Item No: 1

To discuss and review the continuation of the syllabi of English-I, English-II, ECS Lab-I & ECS Lab-II for I & II Semesters of B.Tech for the Academic Year 2019-2020.

Resolution: No changes were recommended.

Agenda Item No: 2

To discuss and finalize the syllabi of Professional Communication Skills-I & Professional Communication Skills-II for III & IV Semesters of B.Tech for the Academic Year 2019-2020.

Resolution: The Mandatory Non-credit Courses (MNCs), viz., Employability Skills-I (V18ENT03) & Employability Skills-II (V18ENT04) have been replaced by **Professional Communication Skills-I (V18ENT03)** and **Professional Communication Skills–II (V18ENT04)** respectively and the syllabi have been approved and is given in Appendix-BSH-English-01.

Agenda Item No: 3

To discuss and finalize the syllabus of 'Constitution of India' for the III Semester of B.Tech in the department of ECE & the IV Semester of the departments of CSE & ME for the Academic Year 2019-2020.

Resolution: The syllabus of the Mandatory Non-credit Course (MNC) **Constitution of India (V18ENT11)** has been discussed and approved and is given in Appendix-BSH-English-02.

Agenda Item No: 4

To discuss and finalize the syllabus of 'Professional Ethics and Human Values' for the III Semester of B.Tech in the department of EEE for the Academic Year 2019-2020

Resolution: The syllabus of the Mandatory Non-credit Course (MNC) **Professional Ethics and Human Values (V18ENT12)** has been discussed and approved and is given in Appendix-BSH-English-03.

B.Tech III Semester

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT03	**Professional Communication Skills - I**	3	-	-	MNC

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Summarize one's introduction in an appropriate manner, exhibit grammatical competence through correction of sentences, analyze noun and pronoun dispositions and develop pre-reading strategies to improve comprehension skills.[K5]

CO2: Distinguish singular and plural in different contexts and display knowledge through accurate usage of sentences, build conversations which befit the situations, comprehend the passages well and use different kinds of idioms. [K4]

CO3: Classify various kinds of adjectives and adverbs, learn natural occurrence of paired words of native speakers, infer the referential and inferential aspects of the passages and make use of idioms while narrating personal experiences. [K4]

CO4: Judge and assess the behavior of people in day to day life using kinesics and proxemics that disclose their disposition and be aware of their personal traits that promote good relations. (K2)

CO5: Articulate their goals and have a constructive plan of executing them properly and become adept in oral presentations as well as poster presentations that enhance their professional skills. (K3)

CO6: Evaluate various happenings by thinking out of the box and display their latent talent; and reduce the stress levels by applying various stress management techniques. (K4)

UNIT – I

SELF-INTRODUCTION: Basic information - Academic and personal - interests– strengths and weaknesses – goal.

ERROR ANALYSIS: Nouns & Pronouns – Singular & Plural – Kinds of Nouns & Pronouns- Collective Nouns - Personal and Reflexive Pronouns.

READING COMPREHENSION: Reading as a skill – quick reading - analyzing – answering **IDIOMS & PHRASES**: Colloquial expressions– formal and informal expressions.

UNIT – II

ERROR ANALYSIS: Concord – Subject – Verb agreement.

ROLE PLAY: Day to day situations - practical approach – real life experiences.

READING COMPREHENSION: Skimming – scanning - summarizing – problem solving.

IDIOMS & PHRASES: Enriching written and spoken English – use and usage.

UNIT – III

ERROR ANALYSIS: Adjectives – Adverbs – role of modifiers – place of Adjectives– Adverbs of frequency.

COLLOCATIONS: Natural combination of words – closely affiliated with each other.

READING COMPREHENSION: At a glance – close reading – understanding – answering

IDIOMS & PHRASES: Communicative - expressive – competent.

UNIT –IV

INTER AND INTRA PERSONAL SKILLS: Leading, Coaching, Interviewing, Managing, Persuading - Self awareness, Self confidence, Good Attitude.

BODY LANGUAGE: Basics of proxemics and kinesics.

UNIT -V

PRESENTATION SKILLS: Importance of Presentation skills, Structuring our presentations, Ways to improve our presentation skills, Tips for effective presentations.– oral – Power point – poster.

GOAL SETTING: Short-term – long-term – aim – target – vision – How to set SMART goals.

UNIT - VI

LATERAL THINKING: What is creativity, Fundamental approaches to smart thinking, Characteristics of a creative person, Convergent and Divergent thinking.

STRESS MANAGEMENT: Meaning of Stress, Types of Stress, Symptoms of stress, Short term and long term stress, how can people manage stress.

B.Tech IV Semester

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT04	**Professional Communication Skills - II**	3	-	-	MNC

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Correlate individual words in a sentence, use new vocabulary and focus on the error analysis of prepositions and conjunctions. [K4]

CO2: Distinguish and acquire knowledge of using words of same category in a sentence and learn new words that promote communicative finesse. [K5]

CO3: Find errors in sentences where the modifiers are misplaced and put them at the appropriate place, use hit pair words and send an email that is concise and lucid[K5]

CO 4: Interpret the importance of Attire and Etiquette in societal context and manage their time. (K2)

CO5: Discover the team-working abilities among themselves and display their leadership qualities. (K3)

CO6: Identify various elements of emotional balance that have positive impact on work-life-balance. (K2)

UNIT – I

ERROR ANALYSIS: Prepositions - kinds of prepositions –appropriate use – conjunctions: sub-ordinating & co-ordinating.

VOCABULARY: Etymology **–** roots – suffixes – prefixes and one word substitutes.

SENTENCE IMPROVEMENT: Better choice – error-free sentences – effective – syntax**.**

UNIT – II

ERROR ANALYSIS: Parallel grammatical forms – same grammatical structures.

VOCABULARY: Words that describe personalities – faiths – professions – medical specialistsand Word Clusters.

EXPANSION OF PROVERBS: Meaning – interpretation – explanation**.**

UNIT – III

ERROR ANALYSIS: Dangling modifiers – misplacement of modifiers – arrangement.

VOCABULARY: Antonyms and Synonymsand Foreign expressions.

EMAIL WRITING: Format – method of exchanging – technicalities.

UNIT- IV

ATTIRE & ETIQUETTE: Formal – informal- professional – social Attires, Meaning of Etiquette, Need for etiquette, Types of Etiquette.

TIME - MANAGEMENT: Value of time – Setting priorities – effective use of time – ABCD analysis, Pareto Principle, Eisenhower Method.

UNIT -V

TEAM WORK – Benefits of working with a team – Team Dynamics **.**

LEADERSHIP QUALITIES: Leadership Styles, Characteristics of a Good Leader, Big 5 Personality traits, Myths about leadership qualities.

UNIT -VI

EMOTIONAL INTELLIGENCE: What is EI – Daniel Goleman model of EI, Qualities of an Emotionally Intelligent Person - Emotional balance – feelings – thoughts – motivation.

WORK – LIFE - BALANCE: Personal life – professional life – cause of work-life imbalances, consequences of work-life imbalance, Role of gender and family – improving work life balance.

14. Winning at Interviews : Thorpe, Edgar and Showick Thorpe
15. Swami Vivekananda and "Personality Development" published by RK Math.

B.Tech ECE (III Sem), CSE & ME (IV Sem)

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT11	**Constitution of India**	2	-	-	MNC

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Summarize the evolution and historical importance of the Indian Constitution from 1858 to 1947. [K2]

CO2: Explain various stages in the composition of the Indian Constitution. [K2]

CO3: Develop awareness about their primary rights and duties & build up their civic sense. [K3]

CO4: Comprehend the distribution of powers between the center and states. (K4)

CO5: Summarize and sketch the specific roles of heads of Nation and the functioning of legislative bodies. (K2)

CO6: Explain the role of local self-government in strengthening democracy. (K1)

Syllabus

Unit-I

Historical Perspective of the Indian Constitution – A brief discussion of various Acts i.e from 1858 to 1947 passed by the British Government.

Unit–II

Constitution of India

a) Preparation of Indian constitution by Constituent Assembly of India.
b) Preamble or Philosophy of the Indian Constitution.
c) Salient features of the Indian constitution.

Unit-III

a) Fundamental Rights - their importance & Limitations
b) Fundamental Duties and their importance
c) Directive principles of the state policy and their implementation

Unit-IV

Indian Federalism

a) Distribution of powers between Union and State Governments
b) Legislative, Executive and Financial relations between Union and State Governments

Unit-V

Parliamentary form of Government in India

1. Union Executive

a) President of India- Powers and functions
b) Vice-President - Powers and functions
c) Prime Minister and Council of Minister - Powers and functions

2. Union Legislature

a) Rajya Sabha – Powers and Functions
b) Lok Sabha- Powers and Functions

c) Amending Procedure- Important Constitutional Amendments – 42^{nd}, 44 Constitutional Amendment Acts.

d) **Judiciary** – Supreme court of India - Powers and Functions

Unit-VI

Local Self–government in India 73^{rd} & 74^{th} Constitutional Amendment Acts

Reference Books:

1. D D Basu-Introduction to the Constitution of India – 18^{th} Edition. Prentice – Hall of India Private Ltd-New Delhi-1998
2. Granville Austin (1972) the Indian Constitution, Cornerstone of a Nation, Oxford university Press, New Delhi
3. Madhavkhosla (2012) the Indian Constitution, Oxford University Press, New Delhi
1. 4.Granville Austin (1999) Working a Democratic Constitution; A History of the Indian Experience, Oxford University Press, New Delhi
4. Zoya Hasan, Sridharan E and Sudharshan R (Eds) 2002 India's living Constitution, Permanent black, New Delhi
5. BaxiUpendra (1980) the Indian Supreme Court and Politics, Eastern Book Co, Lucknow.

B.Tech (EEE) III Semester

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT12	Professional Ethics & Human Values	4	-	-	MNC

COURSE OUTCOMES:
After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C212.1	Understand and assimilate human values to grow as responsible human beings with proper personality.	K2
C212.2	Understand different ethical theories	K2
C212.3	Interpret engineering as social experiment	K2
C212.4	Explain Engineers' responsibilities towards Safety and Risk	K2
C212.5	Understand ethical conduct and discharge their professional duties	K2
C212.6	Understand ethics in view of globalization	K2

Module 1: Human Values
Morals, Values and Ethics, Integrity, Trustworthiness, Work Ethics, Service Learning, Civic Virtue, Respect for others, Living Peacefully, Caring, Sharing, Honesty, Courage, Value Time, Co-operation, Commitment, Empathy, Self-confidence, Spirituality, Character, Discrimination.
Module 2: Engineering Ethics
Need of Engineering Ethics, Senses of Engineering Ethics, Variety of moral issues, Types of Inquiry, Moral dilemma, Moral Autonomy, Moral development (theories), Kohlberg's Theory, Gilligan's Theory, Profession and Professionalism, Self Interest, Theories about right action (Ethical theories), Uses of Ethical Theories, Utilitarian theory, Learning from the Past, Self-interest, Customs, Religion, Self-respect.
Module 3: Engineering as Social Experiment
Experimental Nature of Engineering, Comparison with Standard Experiments, Engineer as responsible experimenters, Codes of ethics industrial standards.
Module 4: Engineers' Responsibilities towards Safety and Risk
Definitions of Safety and Risk, Types of Risks, Risk analysis, Scenario Analysis, Failure mode and effect analysis, Fault-tree Analysis, Assessment of Risk , Assessment of safety, Safe Exit, Risk-Benefit Analysis.
Module 5: Engineers' Duties and Rights
Confidentiality, Types of Confidential Information, Conflict of Interests, Occupational Crimes, Industrial Espionage, Price Fixing, Whistle Blowing,

Collegiality, Loyalty, Collective Bargaining,Concept of Duty, Professional Duties, Human Rights, Employee Rights.

Module 6: Global Issues

Globalization, MNCs, Environmental Ethics, Computer Ethics, Weapon development, Business Ethics, Media Ethics, Research Ethics, Intellectual Property Rights.

Text Books

1. Professional Ethics by R. Subramaniam – Oxford Publications, New Delhi
2. Professional Ethics and Human Values by Prof. R.Naagarazan

Reference Books

1. Professional Ethics and Human Values by Prof.D.R.Kiran-Tata McGraw-Hill - 2013
2. Engineering Ethics & Human Values by M.Govindarajan, S.Natarajan and V.S.SenthilKumar-PHI Learning Pvt. Ltd – 2009.

Annexure-VI

Minutes of the meeting, BOS of Civil Engineering (Held on 20.04.2019)

1. **Introducing members of Board of Studies**

   The Chairman, BOS has extended a formal welcome and introduced the members.

2. **Review of the minutes of the previous meeting.**

   Reviewed the minutes of the previous meeting and suggested the following

Modifications in III Semester Course Structure

1. V18CET02, Building Planning and Construction Management is removed from III Semester.
2. V18MAT04 Probability and Statistics is taken in place of V18CET03 Transform & Discrete Mathematics.
3. V18CET04 is renamed as Strength of Materials-I instead of Introduction to Solid Mechanics.
4. V18CET36 Building Materials Planning and Construction is included in place of V18CET05 Effective Technical Communication.
5. V18CET10 Introduction to Fluid Mechanics is placed in III Semester instead of IV Semester and credits also enhanced from 3 to 4.
6. V18MBT51 Managerial Economics & Financial Analysis is included in IV Sem instead of III Sem.

Modifications in IV Semester

1. V18CET13 Strength of Materials-II is taken in place of V18CET07 Energy Science & Engineering.
2. V18CET14 Hydraulic Engineering is included in place of V18CET10 Introduction to Fluid Mechanics.
3. V18MBT51 Managerial Economics & Financial Analysis is included in place of V18MBT12 Organizational Behavior.
4. V18CET14 Hydraulic Engineering is included in IV sem instead of V sem.

Modifications in VI Semester

1. V18CET37 Building Estimation and construction management is included in place of V18CET20 “Engineering Economics, Estimation and costing.
2. The Revised course structure for the academic year 2019-20 is enclosed in **Appendix-CE-01**
3. **Review of the syllabi approved for the Academic Year 2018-19.**
   Reviewed the syllabi of the Academic Year 2018-19 It is suggested that in Mathematics Transform & Discrete Mathematics may also be included. However it will be taken up in the next Academic year.
4. **Suggest modifications for the existing course structure**
   All ready mentioned in item 2

5. **Approval of syllabi for proposed courses for the academic year 2019-2020.**
6. Approved the syllabi for proposed courses for the academic year 2019-20 and enclosed in **Appendix-CE-02**

Appendix-CE-01

COURSE STRUCTURE OF SECOND YEAR B.TECH (CIVIL)
(For 2018 – 2019 Admitted Batch)

III SEMESTER

III SEMESTER- SYLLABUS

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	3	1	0	4	V18CET04
Name of the Course	STRENGTH OF MATERIALS-I					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Understand the basic materials behavior under the influence of different external loading conditions and the support conditions
- Draw the diagrams indicating the variation of the key performance features like bending moment and shear forces
- Understand bending concepts and calculation of section modulus and for determination of stresses developed in the beams and torsion.
- Assess stresses across section of the thin and thick cylinders to arrive at optimum sections to withstand the internal pressure using Lame's equation.

SYLLABUS:

UNIT – I:

Simple Stresses ,Strains and Strain Energy: Elasticity and plasticity –Types of stresses and strains – Hooke's law – stress – strain diagram for mild steel – Workingstress – Factor of safety – Lateral strain, Poisson's ratio and volumetric strain – Elasticmoduli and the relationship between them – Bars of varying section – composite bars –Temperature stresses.

Strain Energy – Resilience – Gradual, sudden, impact and shock loadings – simple applications.

UNIT – II:

Shear Force and Bending Moment: Definition of beam – Types of beams –Concept of shear force and bending moment – S.F and B.M diagrams for cantilever, simply supported and overhanging beams subjected to point loads, uniformly distributed loads, uniformly varying loads and combination of these loads – Point of contra flexure – Relation between S.F., B.M and rate of loading at a section of a beam

UNIT – III:

Flexural Stresses: Theory of simple bending – Assumptions – Derivation of bending equation: $M/I = f/y = E/R$, Neutral axis – Determination bending stresses – section modulus of rectangular and circular sections (Solid and Hollow), I, T, Angle and Channel sections – Design of simple beam sections.

UNIT –IV:

Shear Stresses: Derivation of formula – Shear stress distribution across various beam sections like rectangular, circular, triangular, I, T angle sections, built up beams, shear centre.

UNIT – V:

Torsion- Derivation of torsion equation and its assumptions. Applications of the equation of the hollow and solid circular shafts, torsional rigidity, combined torsion and bending of circular shafts, principal stress and maximum shear stresses under combined loading of bending and torsion. Analysis of closed-coiled –helical springs

UNIT – VI:

Thin and Thick Cylinders: Thin cylindrical shells – Derivation of formula for longitudinal and circumferential stresses – hoop, longitudinal and Volumetric strains – changes in diameter, and volume of thin cylinders – Thin spherical shells.

Thick Cylinders: Introduction Lame's theory for thick cylinders – Derivation of Lame's formulae – distribution of hoop and radial stresses across thickness – design of thick cylinders – compound cylinders – Necessary difference of radii for shrinkage – Thick spherical shells.

TEXT BOOKS:

1. Mechanics of Materials- R. C. Hibbler, Pearson; 10 edition (January 15, 2016)
2. Strength of materials -S. S. Bhavakatti, Vikas Publishing House; Fourth edition (2013)
3. Strength of Materials -R. K. Rajput, S. Chand Publishing (6th Edition) (2015)
4. Strength of Materials -R.K Bansal,Laxmi Publications; Sixth edition (2018)

REFERENCES:

1. Fundamentals of Solid Mechanics M.L. Gambhir, PHI Learning Pvt. Ltd., New Delhi. (1 December 2009)
2. Introduction to Strength of Material by U.C. Jindal,Pearson Education; Second edition (28 September 2017)
3. Strength of materials by R. Subramanian, Oxford university press, New Delhi, third edition (15 June 2016)

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	3	1	0	4	V18CET36
Name of the Course	BUILDING MATERIALS, PLANNING AND CONSTRUCTION					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Identify different building materials and their importance in building construction.
- Differentiate brick masonry, stone masonry construction
- Use of lime and cement in various constructions.
- Describe the importance of building components and finishing's.
- Understand building by-laws, ventilation and lightening requirements

UNIT – I:

Stones, Bricks and Tiles: Building stones – classifications and quarrying – properties –structural requirements and dressing. Bricks – Composition of Brick earth – manufacture and structural requirements, Fly ash, Ceramics, Timber, Aluminum, Glass, Paints and Plastics: Wood - structure – types and properties– seasoning – defects; alternate materials for Timber–GI/ fibre – reinforced glass bricks, steel & aluminum, Plastics.

UNIT – II:

Cement & Admixtures: Ingredients of cement – manufacture – Chemical composition – Hydration - field & lab tests. Admixtures – mineral & chemical admixtures – uses.

Lime: Various ingredients of lime – Constituents of lime stone – classification of lime – various methods of manufacture of lime

UNIT – III:

Mortars: Lime and Cement Mortars.

Masonry: Brick masonry – types – bonds; Stone masonry – types; Composite masonry – Brick- stone composite; Concrete, Reinforced brick. Cavity and partition walls.

Finishing's: Plastering, Pointing, Painting, Claddings – Types – Tiles – ACP.

UNIT-IV:

Aggregates: Classification of aggregate – Coarse and fine aggregates- particle shape and texture – Bond and Strength of aggregate – Specific gravity – Bulk Density, porosity and absorption – Moisture content of Aggregate- Bulking of sand – Sieve analysis.

Miscellaneous materials: Bitumen and asphaltic materials, structural steel and other metals, geo textiles, carbon composites including properties and uses.

UNIT V:

Building Byelaws and Regulations: Introduction- terminology- objectives of building byelaws- floor area ratio- floor space index- principles under laying building bye laws- classification of buildings- open space requirements – built up area limitations- height of buildings– lightening and ventilation requirements.

Residential buildings: Minimum standards for various parts of buildings requirements of different rooms and their grouping- characteristics of various types of residential buildings, relationship between plan, elevation, Climate influence on Orientation of Buildings.

UNIT – VI:

Building Components: Lintels, Arches, walls, vaults – stair cases – types of floors, types of roofs – flat, curved, trussed. Foundations – types; Damp Proof Course; Joinery – doors – windows – materials – types.

Form work: Types: Requirements – Standards – Scaffolding – Design;
Shoring, Underpinning.

TEXT BOOKS:

1. Building Materials and Construction – Arora & Bindra, Dhanpat Roy Publications. 2010,5th edition.
2. Building Materials, M. L. Gambhir, Tata McGraw Hill Publishing Co. Ltd. New Delhi. 2014,

5. Construction Technology – Vol – I & II by R. Chubby, Longman UK.1987, 2nd edition.
6. Alternate Building Materials and Technology, Jagadish, Venkatarama Reddy and others; New Age Publications.2017 ,2nd edition.

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	3	1	0	4	V18CET10
Name of the Course	INTRODUCTION TO FLUID MECHANICS					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Understand the physical properties of fluids and their influences on fluid motion
- Calculate the forces acting on plane and curved surfaces and solve fluid flow problems in kinematics.
- Solve a variety of problems in fluid dynamics
- Solve various pipe flow problems
- Solve various laminar flow problems
- Assess fluid flow through pipes using different devices

UNIT I:

INTRODUCTION : Dimensions and units – Physical properties of fluid specific gravity, viscosity, surface tension, vapor pressure and their influences on fluid motion, pressure at a point, Pascal's law, hydrostatic law, atmospheric, gauge and vacuum pressure, measurement of pressure. Pressure gauges, Manometers: Differential and Micro Manometers.

UNIT – II:

`HYDROSTATICS: Hydrostatic forces on submerged plane, Horizontal, Vertical, inclined and curved surfaces – Center of pressure, derivations and problems.

UNIT – III:

FLUID KINEMATICS: Description of fluid flow, Stream line, path line and streak lines and stream tube. Classification of flows: Steady, unsteady, uniform, non-uniform, laminar, turbulent, rotational and irrotational flows, Equation of continuity for one, two, three dimensional flows, stream and velocity potential functions.

UNIT – IV:

FLUID DYNAMICS: Surface and body forces – Euler's and Bernoulli's equations for flow along a stream line for 3-D flow, Momentum principle, Momentum equation and its application – forces on pipe bend.

UNIT – V:

CLOSED CONDUIT FLOW: Laws of Fluid friction – Darcy's equation, Minor losses – pipes in series – pipes in parallel, Total energy line and hydraulic gradient line, Pipe network problems, Variation of friction factor with Reynold's number, Moody's Chart.

UNIT – VI:

MEASUREMENT OF FLOW: Pitot tube, Venturi meter and Orifice meter, classification of orifices, small orifice and large orifice, flow over rectangular, triangular and trapezoidal and Stepped notches, Broad crested weirs.

TEXT BOOKS:

1. Hydraulics and Fluid Mechanics including Hydraulic Machines by Dr. P.N. Modi and Dr. S.N. Seth, Standard Book house, Rajsons Pvt. Ltd., 21st Edition, 2017

2. A textbookof Fluid Mechanics and Hydraulic Machines by Dr. R.K. Bansal, Laxmi Publications (P) Ltd., New Delhi, 10th Edition, 2018

REFERENCES:

2. Fluid Mechanics by A.K. Mohanty, Prentice Hall of India Pvt. Ltd., New Delhi, 2nd Edition, 1994.
3. Fluid Mechanics and Hydraulic Machines by K. Subramanya, Mc Graw Hill Education, 1st Edition, 2010.

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	2	0	0	2	V18CET35
Name of the Course	PRINCIPLES OF ENVIRONMENTAL SCIENCE & ENGINEERING					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of the course, the student will be able to

- Outline the global environmental challenges and environmental legislations.
- Interpret various natural resources and associated problems.
- Discuss various attributes of environmental pollution.
- Interpret quality of water.
- Operate sewage water treatment plants.
- Illustrate various solid waste management practices.

UNIT I: FUNDAMENTALS OF ENVIRONMENTAL STUDIES AND ACTS

Definition and components of environment, Global Environmental Challenges: Global warming and climate change, Acid rains, Ozone layer depletion - Population explosion and effects.

Environmental Protection Act, 1986 - Air (Prevention and Control of Pollution) Act, 1981 – Water (Prevention and Control of Pollution) Act, 1974 -Wildlife (Protection) Act, 1972 - Forest (Conservation) Act.

UNIT II: NATURAL RESOURCES AND ASSOCIATED PROBLEMS

Forest resources: Use and over exploitation - Deforestation: Timber extraction, Mining, dams and other effects on forest and tribal people. Water resources: Use and over utilization of surface and ground water – Floods, drought, conflicts over water - Dams: Benefits and problems. Effects of extracting and using mineral resources. Energy resources: Renewable and Non-renewable energy sources. Land resources: Land degradation, Wasteland reclamation.

UNIT III: ENVIRONMENTAL POLLUTION

Definition, Causes, effects and control measures of Air pollution, Water pollution, Soil pollution, Noise pollution and Nuclear Pollution.

UNIT IV: WATER QUALITY AND DESIGN OF WATER TREATMENT UNITS

Impurities in water -Water borne diseases – Protected water supply – Water quality and testing – Drinking water standards- Layout and general outline of water treatment units – Sedimentation – principles – Design factors – Coagulation, flocculation, clarifier design – Coagulants – Feeding arrangements.

Filtration – Theory – Working of slow and rapid gravity filters – Multimedia filters – Design of filters – Troubles in operation, comparison of filters – Disinfection – Theory of chlorination, chlorine demand, other disinfection practices- Desalination processes.

UNIT V: SEWAGE QUALITY AND DESIGN OF SEWAGE TREATMENT UNITS

Conservancy and water carriage systems– Characteristics of sewage– BOD – COD equations. Dilution –Self purification of rivers - Layout and general outline of various units in a waste water treatment plant.

Primary treatment - Design of screens – Grit chambers – Skimming tanks – Sedimentation tanks – Principles of design – Biological treatment – Trickling filters – Standard and high rate.

UNIT –VI: SOLID WASTE MANAGEMENT

Municipal Solid Wastes: Characteristics-Generation- collection- Methods of collection-Equipment types of vehicles-Man power requirement-Collection routes.

Need for Transfer operations-Transfer Stations-Selection of location of transfer station-Transport means and methods - Engineered systems for solid waste management - Recycle energy recovery treatment and disposal.

TEXT BOOKS:

1. Principles of environmental science and engineering by P. Venugopala Rao by Prentice Hall India Learning Private Limited, 1St Edition edition (2006), new Delhi.
2. Principles of environmental sciences by Jan J. Boersea and Lucas reijnders , Springer; 2010 edition (May 27, 2010).
3. Environment Studies by Anubha Kaushik, C P Kaushik, New Age International Private Limited; Five edition (1 August 2018).
4. A Textbook of Environmental Studies, Shaashi Chawla, Tata McGraw Hill Education Private Limited (26 April 2012), New Delhi.
5. Fundamentals of Environment Studies, DD Mishra S Chand & Company (1 December 2010).
6. Water supply engineering byS.K.Garg Khanna publishers(2017),33 rd edition.
7. Sewage disposal and air pollution by S.K.Garg, Khanna publishers(2017),39th edition
8. Water supply engineering by B.C .punmia,Ashok Kumar jain and Arun K jain, Laxmi Publications (December 1, 2005) ,2nd edition.
9. Management of municipal solid waste by T.N.Ramachandra, The Energy and Resources Institute, TERI (1 December 2009).
10. Solid waste management by K. Sasi kumar,S.G. Krishna, Prentice Hall India Learning Private Limited (2009)

Year/Sem	III & IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	3	1	-	4	V18MAT04
Name of the Course	PROBABILITY AND STATISTICS					
Branches	CIVIL, EEE, ME & CSE					

Pre requisites: Probability, Conditional Probability, Baye's theorem on probability

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Find measures of central tendency and dispersion for real data sets.

CO2: Find parameters of given function

CO3: Apply probability distribution to real time problems

CO4: Plot a best fit curve to an experimental data and find the correlation and regression

CO5: Create good estimators to various parameters

CO6: Apply the principles of Statistical Inference to practical problems

Unit-I: Basic Statistics

Measures of Central Tendency: Mean, Median, Mode

Measures of Dispersion: Variance, Standard deviation, Skewness and Kurtosis

Unit-II: Basic Probability

Random Variables: Discrete and continuous - Probability function – density and distribution function, Expectation of a Random Variable, Moments, Chebychev's Inequality (Without proof).

Unit-III: Probability Distributions

Probability distributions: Binomial, Poisson and Normal - Evaluation of statistical parameters: Mean, Variance and their properties, Introduction to Exponential, Gamma and Weibull distributions.

Unit-IV: Bivariate Distributions

Curve fitting by the method of Least squares- Fitting of straight line, parabola and exponential curves, Simple Correlation and Regression – Rank correlation.

Unit-V: Sampling Distributionand Estimation

Introduction –Sampling distribution of means with known and unknown standard deviation

Estimation: Criteria of a good estimator, point and interval estimators for means and proportions

Unit-VI: Tests of Hypothesis

Introduction-Type-I, Type-II Errors, Maximum Error, one–tail, two-tail tests,Test of significance: Large sample test for single proportion, difference of proportions, single mean, difference of means.

Test of significance: Small sample test for single mean, difference of means and test of ratio of variances (F-Test) - Chi-square test for goodness of fit and independence of attributes.

Text Books:

1. V. Ramana, A text Book of Engineering Mathematics, Tata Mc Graw Hill.
2. Miller & Freund's, Probability & Statistics for Engineers – Eighth Edition, Richard. A. Johnson

References Books:

1. S. Ross, "A First Course in Probability", Pearson Education India, 2002.
2. Dr.T.S.R.Murthy, Probability and Statistics for Engineers, BS Publications.
3. T. Veerarajan, "Engineering Mathematics", Tata McGraw-Hill, New Delhi, 2010.

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	3	1	0	4	V18EET01
Name of the Course	BASIC ELECTRICAL AND ELECTRONICS ENGINEERING					
Branches	CIVIL, CSE&ME					

Module 1 : DC Circuits

Electrical circuit elements (R, L and C), Kirchoff's current and voltage laws, analysis of simple circuits with dc excitation. Superposition, Maximum Power Transfer, Thevenin and Norton Theorems.

Module 2: AC Circuits

Representation of sinusoidal waveforms, peak and RMS values, phasor representation, real power, reactive power, apparent power, power factor. Analysis of single-phase ac circuits consisting of R, L, C, RL, RC, RLC combinations (series and parallel), resonance.

Module 3: DC Machines

Introduction-Working principle of DC generator–Magnetization characteristics of D.C. Shunt generator –Types of DC motors– applications – three point starter.

Transformers-Classification, working principle of ideal and practical transformer, losses in transformers, regulation and efficiency, OC& SC test on single phase transformer.

Module 4: AC Machines

Construction and working of a three-phase induction motor, torque-slip characteristics. Loss components and efficiency, starting and speed control of induction motor.Construction and Principle of operation of synchronous generators.

Module 5: Semiconductor Devices and Rectifiers

Introduction– Classification – PN junction diode characteristics a) Forward bias b) Reverse bias - Diode acts as a switch - Half-wave and Full-wave rectifiers – Concepts of ripple factor, voltage regulation and efficiency - Simple problems.

Module 6: Transistors

Types of Transistors - Transistor acts as an amplifier - CB, CE and CC configurations and characteristics- feedback amplifier.

5. S. K. Sahdev, “Fundamentals of Electrical Engineering & Electronics”, DhanpatRai& Company, 2001

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	0	0	3	1.5	V18CEL02
Name of the Course	MATERIAL TESTING LAB					
Branch	CIVIL					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Identify the engineering properties of materials in the laboratory
- Assess torsion test to determine elastic constants
- Assess spring test to determine elastic constants
- Assess flexural test to determine elastic constants
- Determine hardness of metals
- Determine Impact strength of metals

List of Experiments

1. Tension test on Steel bar
2. Bending test on (Steel / Wood) Cantilever beam.
3. Bending test on simple support beam.
4. Torsion test
5. Hardness test
6. Spring test
7. Compression test on wood or concrete
8. Impact test
9. Shear test
10. Verification of Maxwell's Reciprocal theorem on beams.
11. Continuous beam – deflection test.

List of Major Equipment:

1. UTM for conducting tension test on rods
2. Steel beam for flexure test
3. Wooden beam for flexure test
4. Torsion testing machine
5. Brinnell's / Rock well's hardness testing machine
6. Setup for spring tests
7. Compression testing machine
8. Izod Impact machine
9. Shear testing machine
10. Beam setup for Maxwell's theorem verification.
11. Continuous beam setup

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	0	0	2	1	V18EEL01
Name of the Course	BASIC ELECTRICAL AND ELECTRONICS ENGINEERING LAB					
Branches	CIVIL, CSE & ME					

Any 10 of the following experiments are to be conducted

1. Verification of Superposition Theorem.
2. Experimental determination of Thevenin's and Norton's equivalent circuits and verification by direct test.
3. Verification of maximum power transfer theorem.
4. Series and Parallel Resonance – Timing, Resonant frequency, Bandwidth and Q-factor determination for RLC network.
5. Magnetization characteristics of D.C. Shunt generator. Determination of critical field resistance and speed.
6. Speed control of D.C. Shunt motor by Armature & flux control methods
7. Brake test on DC shunt motor. Determination of performance characteristics.
8. OC & SC tests on Single-phase transformer (Predetermination of efficiency and regulation at given power factors and determination of equivalent circuit).
9. Brake test on 3-phase Induction motor (performance characteristics).
10. PN junction diode characteristics a) Forward bias b) Reverse bias (Cut in voltage and resistance calculations)
11. Transistor CE characteristics (Input and output)
12. Half wave rectifier with and without filters.
13. Full wave rectifier with and without filters.
14. CE amplifiers.

IV SEMESTER- SYLLABUS

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	3	0	0	3	V18CET13
Name of the Course	STRENGTH OF MATERIALS – II					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Understand the basic concepts of Principal stresses developed in a member when it is subjected to stresses along different axes and design the sections.
- Asses stresses in different engineering applications like shafts, springs, columns and struts subjected to different loading conditions
- Assess forces in different types of trusses used in Construction.

UNIT I

Principal stresses and strains: Introduction – Stresses on an inclined section of a bar under axial loading – compound stresses – Normal and tangential stresses on an inclined plane for biaxial stresses – Two perpendicular normal stresses accompanied by a state of simple shear – mohr'scircle of stresses – Principal stresses and strains – Analytical and graphical solutions.

Theories of failures: Various Theories of failures such as Maximum Principal stress theory –Maximum Principal strain theory – Maximum shear stress theory – Maximum strain energy theory –Maximum shear strain energy theory.

UNIT II

Deflection of Beams: Bending into a circular arc – slope, deflection and radius of curvature – Differential equation for the elastic line of a beam – Double integration and Macaulay's methods – Determination of slope and deflection for cantilever and simply supported beams subjected to point loads, - U.D.L. Uniformly varying load. Mohr's theorems – Moment area method – application to simple cases including overhanging beams.

UNIT III

Columns and Struts: Introduction – Types of columns – Short, medium and long columns –Axially loaded compression members – Crushing load – Euler‟s theorem for long columns –assumptions – derivation of Euler‟s critical load formulae for various end conditions – Equivalent length of a column – Slenderness ratio –Euler‟s critical stress – Limitations of Euler‟s theory – Rankine– Gordon formula – Long columns subjected to effentric loading – Secant formula –Empirical formulae – Straight line formula – Prof. Perry‟s formula.

UNIT – IV

Direct and Bending stresses: Stresses under the combined action of directloading and B.M. Core of a section – determination of stresses in the case of chimneys,retaining walls and dams – conditions for stability – stresses due to direct loading and B.M.about both axis.

UNIT V

Unsymetrical bending: Introduction – Centroidal principal axes of section – Graphical method for locating principal axes – Moments of inertia referred to any set of rectangular axes – Stresses in beams subjected to unsymmetrical bending – Principal axes – Resolution of bending moment into two rectangular axes through the centroid - Location of neutral axis – Deflection of beams under unsymmetrical bending.

UNIT – VI

Analysis of pin-jointed plane frames: Determination of Forces in members ofplane pin-jointed perfect trusses by (i) tension co efficient method (ii) method of sections. Analysisof various types of cantilever and simply supported trusses by tension co efficient method, method of sections.

TEXT BOOKS:

3. Strength of materials by R. Subramanian, Oxford university press, New Delhi, third edition (15 June 2016)

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	2	0	0	2	V18CET08
Name of the Course	ENGINEERING GEOLOGY					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Relate the features of geological agents.
- Review the types of minerals and rocks
- Interpret hazard zonation with reference to secondary structures
- Review the landslides and their resulting subsidence.
- Assess the ground conditions using geophysical explorations
- Examine the engineering geological conditions of the strata and its suitability to major projects like Dams, Tunnels and Reservoirs etc.

UNIT-I

Introduction: Branches of geology, Importance of geology in Civil engineering with case studies.

Physical Geology: Geological processes, Weathering, Erosion and Civil engineering importance of weathering and Erosion

UNIT- II

Mineralogy: Definition of mineral, Importance of study of minerals, Significance of different physical properties in mineral identification, Study of physical properties, Structure and chemical composition of common rock forming and economic minerals viz. Feldspar, Quartz, Olivine, Augite, Hornblende, Muscovite, Biotite, Asbestos, Apatite , Kyanite, Garnet, Beryl, Talc, Calcite, Dolomite, Pyrite, Hematite, Magnetite, Galena, Graphite, Magnesite, Bauxite and Clay minerals

Petrology: Introduction, Civil Engineering importance of petrology, Definition of Rock, Rock cycle, Geological Classification of rocks Igneous Rocks: Forms, Structures and textures of igneous rocks, Megascopic description and civil engineering uses of Granite, Basalt, Dolerite, Pegmatite and Charnockite

Sedimentary Rocks: Formation, Structures and textures of sedimentary rocks, Megascopic description and civil engineering uses of Laterite, Conglomerate, Sand stone, Lime stone and Shale

Metamorphic Rocks: Types of metamorphism, Structures and textures of metamorphic rocks, Megascopic Description and Civil engineering uses of Gneiss, Schist, Quartzite, Marble and Slate

UNIT-III

Structural Geology: Introduction, Out crop, Strike and dip, Causes for development of secondary structures, Classification of Structures associated with Folds, Faults, Joints, Unconformities and their Civil engineering importance

UNIT- IV

Earthquakes: Classification and causes, Intensity and magnitude and their measuring scales, Effects of earthquakes, Seismic belts, Civil Engineering considerations in seismic areas, Seismic zones of India

Land Slides: Classification, Causes and effects, Preventive measures of landslides

Ground water: Introduction, Classification of rocks based on porosity and permeability, Types of aquifers, Effects of groundwater over draft

UNIT- V

Geophysics: Importance of Geophysical methods, Classification, Principles of Geophysical study by Gravity method, Magnetic method, Electrical methods, Seismic methods, Radiometric method and Electrical resistivity, Seismic refraction methods

UNIT- VI

Dams: Types of Dams, Geological considerations for the selection of dam sites, Stages of investigation, Case histories of few dam failures, Geology of few Indian dam sites

Tunnels: Purpose of Tunneling, Geological considerations for tunneling, Effects of tunneling, Over break, Geology of some tunnel sites

TEXTBOOKS:

1. A text Book of Engineering Geology by N. Chenna Kesavulu, Macmillan India Ltd., Delhi, second edition, 2009.
2. Principles of Engineering Geology by K M Bangar, Standard Publishers and Distributers, 2009.
3. Principles of Engineering Geology- K Gokhale, B. S. Publication, Revised Edition, 2010.

REFERENCE BOOKS:

1. Fundamentals of Engineering Geology, F.G.Bell, published by Butterworth-Heinemann, 1983.

3. Engineering Geology for Civil Engineers by D. Venkata Reddy, Oxford & IBM Publishing Company Pvt. Ltd., New Delhi, second edition, 2017.
4. Engineering and General Geology by Parbin Singh, Published by S. K. Kataria & Sons, New Delhi, 2013.
5. Engineering Geology and Rock Mechanics by Dr B.P.Varma, Khanna Publishers, Delhi, 1998.

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	3	1	0	4	V18CET09
Name of the Course	CONCRETE TECHNOLOGY					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Understand the basic concepts of concrete.
- Realize the importance of quality of concrete.
- Familiarize the basic ingredients of concrete and their role in the production of concrete and its behavior in the field.
- Test the fresh concrete properties and the hardened concrete properties.
- Evaluate the ingredients of concrete through lab test results and design the concrete mix by BIS method.
- Familiarize the basic concepts of special concrete and their production and applications and understand the behavior of concrete in various environments.

UNIT I:

Introduction of Concrete, Cements and Admixtures: Portland cement – Chemical composition – Hydration, Setting of cement, Fineness of cement, Structure of hydrated cement–Test for physical properties – Different grades of cements (opc-33,opc-43,opc-53) – Admixtures – Mineral and chemical admixtures – accelerators, retarders, air entrainers, plasticizers, super plasticizers, fly ash and silica fume.

Aggregates: Classification of aggregate – Particle shape & texture – Bond, strength & other mechanical properties of aggregates – Specific gravity, Bulk density, porosity, adsorption & moisture content of aggregate – Bulking of sand –Soundness of aggregate – Alkali aggregate reaction – Thermal properties – Sieve analysis –Fineness modulus – Grading curves – Grading of fine & coarse Aggregates – Gap graded and well graded aggregate as per relevant IS code – Maximum aggregate size - Quality of mixing water.

UNIT – II:

Fresh Concrete: Steps in Manufacture of Concrete–proportion, mixing, placing, compaction, finishing, curing – including various types in each stage. Properties of fresh concrete-Workability – Factors affecting workability – Measurement of workability by different tests, Setting times of concrete, Effect of time and temperature on workability – Segregation & bleeding – Mixing and vibration of concrete.

UNIT – III:

Hardened Concrete: Water / Cement ratio – Abram's Law – Gel space ratio – Nature of strength of concrete –Maturity concept – Strength in tension & compression – Factors affecting strength – Relation between compression &

tensile strength – Curing, Testing of Hardened Concrete: Compression tests – Tension tests – Flexure tests –Split tension tests – Non-destructive testing methods – codal provisions for NDT.

UNIT – IV:

Elasticity, Creep & Shrinkage, Modulus of elasticity, Dynamic modulus of elasticity, Poisson's ratio, Creep of concrete, Factors influencing creep, Relation between creep & time, Nature of creep, Effects of creep – Shrinkage – types of shrinkage, Factors affecting shrinkage.

UNIT – V:

Mix Design: Factors in the choice of mix proportions – Durability of concrete – Quality Control of concrete – Statistical methods – Acceptance criteria – Concepts proportioning of concrete mixes by BIS method of mix design.

UNIT – VI:

Special Concretes: Ready mixed concrete, Shotcrete, Light weight aggregate concrete, Cellular concrete, No-fines concrete, High density concrete, Fibre reinforced concrete, Different types of fibres, Factors affecting properties of Fibre reinforced concrete, Polymer concrete, Types of Polymer concrete, Properties of polymer concrete, High performance concrete –Self consolidating concrete, SIFCON, self healing concrete.

Text Books:

1. Concrete Technology, M. S. Shetty. – S. Chand & Company
2. Concrete Technology, A. R. Santha Kumar, Oxford University Press, New Delhi

References:

1. Properties of Concrete, A. M. Neville – PEARSON – 4th edition
2. Concrete Technology, M.L. Gambhir. – Tata Mc. Graw Hill Publishers, New Delhi

Codal Provisions:

1. IS 269:1989 – Ordinary Portland Cement, grade 33
2. IS 4031:1988 – methods of physical tests for hydraulic cement.
3. IS 383:1970 – Specification for coarse and fine aggregate from natural sources for concrete.
4. IS 456:2000 Code of practice for plain and reinforced concrete.
5. IS 10262:2009 – Guideline for concrete mix proportioning.
6. SP 16:1980 Design aids for reinforced concrete to IS 456:1978

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	3	1	0	4	V18CET14
Name of the Course	HYDRAULIC ENGINEERING					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Solve uniform open channel flow problems
- Solve Non-uniform open channel flow problems
- Apply the principles of dimensional analysis and similitude in hydraulic model Testing
- Estimate the impact of jet on plane and curved surfaces using momentum Principle.
- Develop performance characteristics of turbines using velocity triangles
- Calculate work done and efficiency of centrifugal and reciprocating pumps

UNIT – I:

OPEN CHANNEL FLOW: Types of flows, Type of channels, Velocity distribution, energy and momentum correction factors, Chezy's, Manning's and Bazin formulae for uniform flow, Most Economical sections.

Critical flow: Specific energy-critical depth – computation of critical depth – critical, sub-critical and super critical flows.

UNIT II:

NON UNIFORM FLOW: Dynamic equation for G.V.F., Mild, Critical, Steep, horizontal and adverse slopes, surface profiles, direct step method, Rapidly varied flow, hydraulic jump, energy dissipation.

UNIT – III:

HYDRAULIC SIMILITUDE: Dimensional analysis - Rayleigh's method and Buckingham's pi theorem, study of Hydraulic models – Geometric, kinematic and dynamic similarities, dimensionless numbers, model laws, scale effect.

UNIT – IV:

MOMENTUM PRINCIPLES: Hydrodynamic force of jets on stationary and moving flat, inclined and curved vanes, jet striking centrally and at tip, velocity triangles at inlet and outlet, expressions for work done and efficiency, Angular momentum principle.

UNIT – V:

BASICS OF HYDRAULIC MACHINERY: Layout of hydropower installation, Heads and efficiencies, classification of turbines.

HYDRAULIC TURBINES: Pelton wheel, Francis turbine, Kaplan turbine - working, proportions, velocity diagram, work done and efficiency, hydraulic design, draft tube – theory and function efficiency, Governing of turbines, surge tanks, unit and specific turbines, unit speed, unit quantity, unit power, specific speed, performance characteristics, geometric similarity, cavitation.

UNIT – VI:

CENTRIFUGAL PUMPS: Pump installation details, classification, work done, manometric head, minimum starting speed, losses and efficiencies, specific speed, multistage pumps, pumps in parallel, performance of pumps, characteristic curves, NPSH, Cavitation.

RECIPROCATING PUMPS: Introduction, classification of reciprocating pumps, main components of reciprocating pumps, working of a reciprocating pumps, discharge through pumps, indicator diagram, work done by reciprocating pumps, slip of reciprocating pumps.

TEXT BOOKS:

1. A textbook of Fluid Mechanics and Hydraulic Machines by Dr. R.K. Bansal, Laxmi Publications (P) Ltd., New Delhi, 10th Edition, 2018
2. Hydraulics and Fluid Mechanics including Hydraulic Machines by Dr. P.N. Modi and Dr. S.N. Seth, Standard Book house, Rajsons Pvt. Ltd., 21st Edition, 2017
3. A text book of Fluid mechanics and Hydraulic machines by Er. R. K. Rajput, S. Chand & company, 6th Edition, 2016

REFERENCES:

1. Flow in Open Channels by K. Subramanya, Mc Graw Hill Education, 4th Edition, 2015.
2. Fluid Mechanics and Hydraulic Machines by K. Subramanya, Mc Graw Hill Education, 1st Edition, 2010.

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	2	1	0	3	V18CET11
Name of the Course	SURVEYING AND GEOMATICS					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Demonstrate the basic surveying skills
- Use various surveying instruments.
- Perform different methods of surveying
- Compute various data required for various methods of surveying.
- Integrate the knowledge on surveying to the new frontiers of science like Global positioning System, Remote sensing

UNIT– I:

Introduction: Definition-Uses of surveying- overview of plane surveying (chain, Compass and plane table), Objectives, Principles and classifications – Errors in survey Measurements

UNIT – II:

Compass survey and traversing: Electronic distance measurements (EDM)-principles of electro optical EDM-Errors and corrections to linear measurements-Compass survey-Meridians, Azimuths and Bearings, declination, computation of angle. Traversing-Purpose-types of traverse-traverse computation-traverse adjustments-Introduction omitted measurements

UNIT–III:

Leveling, Contouring and Curves::Concept and Terminology, Leveling Instrument and their Temporary and permanent adjustments- method of leveling. Characteristics and Uses of contours- methods of conducting contour surveys.Types of curves, design and setting out – simple and compound curves

UNIT – IV:

Theodolite, Description, principles-uses and adjustments – temporary and permanent, measurement of horizontal and vertical angles. Principles of Electronic Theodolite – Introduction to Trigonometrically leveling,.

Tachometric Surveying: Stadia and tangential methods of Tacheometry. Distance and-Elevation formulae for Staff vertical position

UNIT–V:

Computation of Areas and Volumes: Area from field notes, computation ofareas along irregular boundaries and area consisting of regular boundaries. Embankments and cutting for a level section and two level sections with and without transverse slopes, determination of the capacity of reservoir, volume of barrow pits.

UNIT–VI: Introduction to Geo matic, Total Station and Global positioning system, Electromagnetic spectrum, Visual image interpretation, Digital image processing.

Text Books:

1. Surveying, Vol No.1, 2 &3, B. C. Punmia, Ashok Kumar Jain and Arun Kumar Jain –
2. Laxmi Publications Ltd, New Delhi,seventeenth edition (2016)
3. 2 Text book of Surveying, S.K. Duggal (Vol No. 1&2), Tata McGraw Hill Publishing
4. Co. Ltd. New Delhi.Fourth edition (1 July 2017)
5. Text book of Surveying, Arora (Vol No. 1&2), STANDARD BOOK HOUSE SINCE 1960; Edition: Year-2015 edition (2015)
6. Anji Reddy, M., Remote sensing and geographical information system,BS Publications/BSP Books (2012)

Reference Books:

1. Text book of Surveying, C. Venkataramaiah, universities Press (India) Pvt. Ltd. (12 January 2011)
2. Surveying and levelling, R. Subramanian, Oxford University Press; 2 edition (30 June 2012)

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	0	0	3	1.5	V18CEL03
Name of the Course	CONCRETE TECHNOLOGY LAB					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Find some properties of cement by consistency, fineness, setting times, specific gravity, soundness and compressive strength.
- Determine the workability of cement concrete by compaction factor, slump and Vee – Bee tests.
- Determine properties of self-compacting concrete by Slump cone, V funnel, L Box
- Determine the specific gravity of coarse aggregate and fine aggregate by Sieve analysis.
- Determine the flakiness and elongation index of coarse aggregates.
- Determine the bulking of sand.
- Understand the non-destructive testing procedures on concrete

I. Tests on Cement

1. Normal Consistency and fineness of cement.
2. Initial setting time and final setting time of cement.
3. Specific gravity of cement
4. Soundness of cement.
5. Compressive strength of cement.

II. Tests on Aggregate

1. Sieve Analysis and gradation chairs
2. Bulking of sand.
3. Bulk and compact densities of fine and coarse aggregates

III. Tests on Fresh Concrete

1. Slump test
2. Compact factor test
3. Vee-bee Test
4. Flow Table Test

Tests on Self Compacting Concrete

1. Slump cone
2. V funnel
3. L Box

IV. Tests on hardened concrete

1. Compression test on cubes & Cylinders
2. Flexure test
3. Splitting Tensile Test
4. Modulus of Elasticity

V. Non Destructive tests of concrete

1. Rebound hammer
2. Ultrasound pulse Velocity (UPV)

Text Books:

1. Concrete Technology, M. S. Shetty. – S. Chand & Company

References:

2. IS 650:1991 –Standards and testing
3. IS 383:1970- Specification for coarse & fine aggregate
4. IS 2386 (Part III) 1963- Methods of test for aggregate for specific gravity, density, voids, absorption & bulking
5. IS 516:1959- Specification for compressive strength, Flexural strength
6. IS 5816:1999-Method of test for splitting tensile strength of concrete.
7. IS 13311(Part 1):1992 Methods of non-destructive testing of concrete: Part 1 Ultrasonic pulse velocity.
8. IS 13311(Part 2):1992 Methods of non-destructive testing of concrete: Part 2 Rebound hammer.
9. IS 6461(Part 7):1973 Glossary of terms relating to cement concrete: Part 7 Mixing, laying, compaction, curing and other construction aspects.

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	0	0	3	1.5	V18CEL04
Name of the Course	SURVEYING LAB					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Use different Survey instruments to collect filed data
- Calculate distances, levels and angles from collected data
- Transfer points on ground to drawing sheet
- Interpret survey data to compute areas and volumes by using different methods
- Prepare profile of land from the collected survey data

List of experiments

1. Survey by chain survey of road profile with offsets in case of road widening.
2. Finding the area of the given boundary using compass (Closed Traverse)
3. Plane table survey; finding the area of a given boundary by the method of Radiation
4. Plane table survey; finding the area of a given boundary by the method of intersection.
5. Fly leveling : Height of the instrument method (differential leveling)
6. Fly leveling: Rise and Fall method.
7. Theodolite Survey: Determining the Horizontal and Vertical Angles by the method of repetition method.
8. Theodolite Survey: Finding the distance between two inaccessible points.
9. One Exercise on Curve setting.
10. One Exercise on contours.
11. Determination of area using total station
12. Determination distance between two inaccessible points.
13. Introduction to GPS.

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation Year	2018-2019	0	0	3	1.5	V18CEL05
Name of the Course	FLUID MECHANICS AND HYDRAULIC MACHINERY LAB					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Show the verification of Bernoulli's equation
- Find the discharge through an orifice and mouth piece by using constant head and variable head methods.
- Calculate coefficient of discharge for Venturimeter and Orificemeter
- Find loss of head due to friction and minor losses in pipes
- Calculate the force exerted by the jet on the vanes.
- Calculate efficiency and sketch performance curves for turbines and pumps.

List of Experiments

1. Verification of Bernoulli's equation.
2. Calibration of Venturimeter and Orifice meter
3. Determination of Coefficient of discharge for a small orifice by a constant head method.
4. Determination of Coefficient of discharge for an external mouth piece by variable head method.
5. Characterization of laminar and turbulent flows by Reynold's apparatus.
6. Calibration of contracted Rectangular Notch and /or Triangular Notch
7. Determination of Coefficient of loss of head in a sudden contraction and friction factor.
8. Impact of jet on vanes
9. Study of Hydraulic jump.
10. Performance studies on Pelton wheel turbine
11. Performance studies on Francis turbine/Kaplan turbine.
12. Performance studies on single stage centrifugal pump.
13. Performance studies on reciprocating pump.

List of Equipment:

1. Venturimeter setup.
2. Orifice meter setup.
3. Small orifice setup.
4. External mouthpiece setup.
5. Reynold's apparatus
6. Rectangular and Triangular notch setups.
7. Friction factor test setup.
8. Bernoulli's theorem setup.
9. Impact of jets.
10. Hydraulic jump test setup.
11. Pelton wheel and Francis turbines.
12. Centrifugal and Reciprocating pumps.

Regulation Year	2018-2019	0	0	2	1	V18CEL06
Name of the Course	ENGINEERING GEOLOGY LAB					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- Understand the importance of geology in civil engineering
- Identify the geological process of any region to carry civil engineering works
- Evaluate the formation and properties of minerals, rocks and soil
- Develop the ability to prepare geological maps and sections to interpret site conditions

LIST OF EXPERIMENTS

1. Physical properties of minerals and their megascopic identification
2. Rock forming minerals: Quartz group, Feldspar group, Garnet group, Mica group, Talc, Chlorite, Olivine, Kyanite, Asbestos, Tourmelene, Calcite, Gypsum etc.
3. Ore forming minerals: Magnetite, Hematite, Pyrite, Pyralusite, Graphite, Chromite etc.
4. Megascopic description and identification of rocks
5. Igneous rocks: Granite, Pegmatite, Gabbro, Dolerite, Syenite, Granite Poryphery, Basalt, etc.
6. Sedimentary rocks: Sand stone, Ferrugineous sand stone, Lime stone, Shale, Laterite, Conglamorate, etc.
7. Metamorphic rocks: Biotite, Granite Gneiss, Slate, Muscovite & Biotiteschist, Marble, Khondalite, etc.
8. Interpretation and drawing of sections for geological maps showing tilted beds, faults, unconformities etc.
9. Simple Structural Geology problems
10. Bore hole data
11. Strength of the rock using laboratory tests
12. Field work to identify Minerals and Rocks, Geomorphology and Structural Geology

Annexure-VII

Minutes of the meeting, BOS of Electrical and Electronics Engineering
(Held on 20.04.2019)

Item No. 1: Chairperson welcomed all the BOS members.

Item No. 2: Review of course structure of III & IV semesters for UG (B.Tech-EEE) Programme of Academic Year 2019-20.

- Reviewed the course structure of III & IV semesters for UG (B.Tech-EEE) Programme for the Academic Year 2019-20 and following modifications havebeen done.

  III Semester

  1. Thermal and Hydro Prime Movers (THPM) Theory (Course Code:V18MET12) and Laboratory (Course Code:V18MEL06) courses are replaced with **Data Structures & Algorithms Lab (**Course Code:**V18CSL31)**.
  2. Professional Ethics course (Course Code:V18ENT07) is renamed as **Professional Ethics and Human Values (**Course Code: **V18ENT12)**.
  3. English BOS has renamed the titles of mandatory Courses Employability Skills-I (Course Code: V18ENT03) to Professional Communication Skills-I (Course Code:**V18ENT03**)

  IV Semester

  1. Power Systems – I Course (Course Code: V18EET08)**and** Power Systems – II (Course Code: V18EET10) are merged and titled as **Electrical Power Generation and Transmission (**Course Code: **V18EET10).**
  2. Electrical Circuits Laboratory course (Course Code: V18EEL02) and Electrical Measurements Laboratory (Course Code: V18EEL04) are merged and titled as **Electrical Circuits & Measurements Laboratory (**Course Code: **V18EEL04).**
  3. **Python Programming Laboratory (**Course Code: **V18CSL33)** is introduced.
  4. Electrical Safety Awareness course(Course Code: V18EET56) title is modified as **Electrical Safety & IE Rules (**Course Code: **V18EET11).**
  5. English BOS has renamed the titles of mandatory Courses Employability Skills-II (Course Code: V18ENT04) to Professional Communication Skills-II (Course Code: **V18ENT04**)

  The details of the course structure for UG (B.Tech) Programme (EEE) are given in Appendix-EEE-01

Item No. 3: Propose syllabi for the courses offered in III and IV semesters of B.Tech programme of Academic Year 2019-20.

The approved syllabi for the courses offered in III and IV semesters of B.Tech programme of Academic Year 2019-20 is attached in Appendix-EEE-02

Item No. 4: Result Analysis of the courses offered in I semester.

Reviewed and apprised the results of the courses offered by EEE Department in I semester.

Results are given in Appendix-EEE-03

Appendix-EEE-01

PROPOSED COURSE STRUCTURE FOR UG-B.TECH PROGRAMME (EEE)
III & IV SEMESTERS UNDER AUTONOMY

III Semester						
S.No	**Course Code**	**Course Name**	**L**	**T**	**P**	**Credits**
1.	V18EET03	Electrical Circuit Analysis - I	3	1	-	4
2.	V18ECT05	Analog Electronics	3	-	-	3
3.	V18EET04	Electrical Machines – I	3	1	-	4
4.	V18EET05	Electro Magnetic Fields	3	1	-	4
5.	V18EET06	Electrical and Electronic Measurements	3	-	-	3
6.	V18CSL31	Data Structures & Algorithms Lab	-	-	6	3
7.	V18ECL03	Analog Electronics Laboratory	-	-	2	1
8.	V18ENT12	Professional Ethics & Human Values	2	-	-	MNC
9.	V18ENT03	Professional Communication Skills– I	3	-	-	MNC
		Total Contact Hours	**29**			**22**
IV Semester						
S.No.	**Course Code**	**Course Name**	**L**	**T**	**P**	**Credits**
1.	V18EET07	Electrical Circuit Analysis -II	3	1	-	4
2.	V18EET08	Digital Electronics	3	-	-	3
3.	V18EET09	Electrical Machines – II	3	1	-	4
4.	V18MAT04	Probability &Statistics	3	1	-	4
5.	V18EET10	Electrical Power Generation and Transmission	3	-	-	3
6.	V18EEL04	Electrical Circuits & Measurements Laboratory	-	-	2	1
7.	V18EEL05	Electrical Machines Laboratory - I	-	-	2	1
8.	V18CSL33	Python Programming Lab	-	-	2	1
9.	V18EET11	Electrical Safety & IE Rules	2	-	-	MNC
10.	V18ENT04	Professional Communication Skills– II	3	-	-	MNC
		Total Contact Hours	**29**			**21**

Internship/Industrial Training – Enrolment of Internship/Industrial Training will be initiated at the end of IV Semester.

Appendix-EEE-02

SYLLABI FOR THE COURSES OFFERED FOR UG B.TECH (EEE) PROGRAMME IN III & IV SEMESTERS

Programme: B. Tech - Electrical & Electronics Engineering **Semester: III**

Course Code: V18EET03

Course Name: Electrical Circuit Analysis – I **[L : 3; T:1; P : 0 (4 credits)]**

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C201.1	Apply various network reduction techniques for solving electrical circuits.	K3
C201.2	Apply the principles of magnetism for solving different kind of magnetic circuits with and without dot conventions.	K3
C201.3	Calculate different parameters of single phase alternating quantities.	K3
C201.4	Determine various parameters in series and parallel resonant circuits.	K3
C201.5	Apply the network theorems for solving electrical circuits.	K3
C201.6	Calculate two-port network parameters for any type of electrical networks	K3

Unit-I: Introduction to Electrical Circuits

Classification of network elements, electric charge and current, electric energy and potential, Resistance parameter – Ohm's Law - series and parallel combination; Inductance parameter – series and parallel combination; Capacitance parameter – series and parallel combination; Energy Sources - Ideal, Non-Ideal, Independent and Dependent sources; Kirchhoff's laws; Source transformation; Y-Δ and Δ-Y transformation; Mesh analysis and Nodal analysis - problem solving for the network consisting of independent and dependent sources.

Unit-II: Magnetic Circuits

Basic definitions of MMF, Flux and Reluctance; Analogy between electrical and magnetic circuits; Analysis of series, parallel and composite magnetic circuits; Faraday's laws of electromagnetic induction; Concepts of self-inductance, mutual inductance and coefficient of coupling; Concept of Dot Convention and coupled coils.

Unit-III: Single Phase A.C Systems

Definitions of basic terms associated with periodic functions: Time period, Angular velocity and frequency, RMS value, Average value, Form factor and peak factor - numerical problems**;** Concept of phase angle and phase difference – Waveforms and phasor diagrams for lagging, leading networks; complex and polar forms of representations, steady state analysis of series and parallel combinations of R, L and C circuits; Power Factor and its significance; Concepts of Real, Reactive, Apparent and Complex Powers; Waveforms of instantaneous voltage, current and power; Power triangle.

Unit-IV: Analysis of AC Networks & Resonance

Extension of node and mesh analysis to AC networks; Numerical problems on sinusoidal steady state analysis; Concept of Resonance **-** Series and parallel resonance, Bandwidth of series and parallel resonance, Quasi factor, Selectivity; Numerical problems; Introduction to locus diagrams.

Unit-V: Network Theorems (DC & AC Excitations)

Superposition, Thevenin’s, Norton’s, Milliman’s, Reciprocity, Compensation, Maximum Power Transfer, Tellegen’s theorems; problem solving for the network consisting of independent and dependent sources.Concept of Duality and Dual networks.

Unit-VI: Two-Port networks

Basic Definitions; Z-parameters; Y-parameters; Transmission line (ABCD) parameters; h-parameters; Relationship between parameter sets; Series, Parallel and Cascade connections of two port networks; problem solving for the network consisting of independent and dependent sources.

Text Books:

1. Engineering Circuit Analysis by William Hayt and Jack E.Kemmerley, McGraw Hill Company,6 th edition
2. Network Analysis by Van Valkenburg, Prentice-Hall of India Private Ltd
3. Circuit Theory (Analysis and Synthesis) by A.Chakrabarthi, DhanpatRai& Co.

Reference Books:

1. Fundamentals of Electrical Circuits by Charles K.Alexander and Mathew N.O.Sadiku, McGraw Hill Education (India)
2. Network Analysis by C.L.Wadhwa, New Age International Publishers.
3. Electric Circuits– (Schaum’s outlines) by MahmoodNahvi& Joseph Edminister, Adapted byKumaRao,5th Edition – McGraw Hill.
4. Electrical Circuit Analysis by Sudhakar A. &ShyammohanS.Palli, McGraw Hill Publication
5. Introductory Circuit Analysis by Robert L Boylestad, Pearson Publications

Programme: B. Tech - Electrical & Electronics Engineering **Semester: III**
Course Code: V18EET04
Course Name: Electrical Machines – I **[L: 3; T:1; P : 0 (4 credits)]**

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C203.1	Understand the basic fundamentals of electromechanical energy conversion and various DC machines	K2
C203.2	Predict and mitigate the ill-effects of armature reaction and improve commutation in dc machines	K3
C203.3	Understand the torque production mechanism and control the speed of dc motors	K2
C203.4	Analyze the performance of single phase transformers	K4
C203.5	Calculate the regulation, losses and efficiency of single phase transformers	K3
C203.6	Understand the parallel transforms, control voltages with tap changing methods and achieve three phase to two phase transformation	K2

Unit-I: Introduction to DC machines

Principles of electromechanical energy conversion; Construction and principle of operation of DC machine; EMF equation of DC generator; Classification of DC machines based on excitation; Magnetization Characteristics of DC shunt generator.

Unit-II: Performance of D.C. Machines

Torque and back-emf equations of dc motor; Armature Reaction and Commutation; Characteristics of separately-excited, shunt, series and compound motors; losses and efficiency of a DC machine; Applications of DC motors

Unit-III: Starting, Speed Control and Testing of D.C. Machines

Necessity of Starter - Working of 3-Point and 4-Point Starters; Speed Control of DC shunt motor by armature voltage and field flux control; Testing of DC machines - Brake Test, Swinburne’s method, Hopkinson’s Test, Retardation Test; Simple Numerical Problems.

Unit-IV: Single-phase Transformers

Types, Constructional details, Principle of operation, EMF Equation of a 1-Φ Transformer; Transformer operation on No-Load and On-Load for lagging, leading and unity power factors loads and their phasor diagrams; Transformer equivalent circuit; Transformer Regulation, Losses and efficiency; effect of variation of supply frequency and voltage on losses; All day efficiency.

Unit-V: Testing of Single-phase Transformers

O.C. and S.C. tests; Sumpner’s test; Separation of losses of a 1-Φ transformer; Parallel operation with equal voltage ratios; Auto Transformer - equivalent circuit, comparison with two winding transformers.

Unit-VI:-III-Phase Transformers

Poly-phase connections, Y/Y, Y/Δ, Δ/Y, Δ/Δ and open-Δ; Scott Connection; Three winding Transformer: Determination of Z_p, Z_s and Z_t; Off-load and On-load tap changers.

Text Books

1. Electrical Machines by P.S. Bhimbra, Khanna Publishers.
2. Theory & Performance of Electrical Machines by J.B.Guptha. S.K.Kataria& Sons.

Reference Books

1. Electrical Machines by D. P.Kothari, I .J .Nagarth, McGrawHill Publications, 4th edition
2. Electrical Machines by R.K.Rajput, Lakshmi publications, 5th edition.
3. Electrical Machinery by AbijithChakrabarthi and SudhiptaDebnath, McGraw Hill Education2015
4. Electrical Machinery Fundamentals by Stephen J Chapman, McGraw Hill education 2010
5. Electric Machines by MulukutlaS.Sarma & Mukeshk.Pathak, CENGAGE Learning.
6. Electric Machinery by A.E.Fitzgerald, Charles kingsley,StephenD.Umans, TMH

Programme: B. Tech - Electrical & Electronics Engineering Semester: III
Course Code : V18EET05
Course Name : Electro Magnetic Fields [L : 3; T:1; P : 0 (4 credits)]

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C204.1	Compute the electric field and potential due to different configurations of static charges and electric dipole.	K3
C204.2	Calculate the capacitance of various configurations and understand the concept of conduction and convection current densities.	K3
C204.3	Apply the Biot-Savart's law for finding MFI for different cables and develop the Maxwell's second equation.	K3
C204.4	Compute MFI for different cables by applying Ampere's circuital law and develop the Maxwell's third equation.	K3
C204.5	Determine the magnetic forces, torque produced by currents in magnetic fields, self-inductance of solenoid and toroid.	K3
C204.6	Calculate the induced E.M.F's and understand the concept of fileds varying with time.	K3

Unit-I: Electrostatics

Electrostatic Fields; Coulomb's Law; Electric Field Intensity (EFI) - EFI due to a line and a surface charges; Work done in moving a point charge in an electrostatic field; Electric Potential - Properties of potential function, Potential gradient; Guass's law; Maxwell's first law, div(D)=ρ_v; Laplace's and Poison's equations; Electric dipole - Potential and EFI due to an electric dipole, Torque on an Electric dipole placed in an electric field.

Unit-II: Conductors, Dielectrics and Capacitance

Conductors & Dielectrics: Conductors - Behavior of conductors in an electric field; Insulators - Polarization; Electric boundary conditions;

Capacitance: Capacitance of parallel plates, spherical and coaxial cables with composite dielectrics; Energy density in a static electric field; Current density - Conduction and Convection current densities; Ohm's law in point form, Equation of continuity.

Unit-III: Magneto Statics-I

Introduction to static magnetic fields; Biot-Savart's law; Magnetic Field Intensity (MFI) - MFI due to a straight current carrying filament, circular, square and solenoidal current carrying wires; Maxwell's second Equation, div(B)=0.

Unit-IV: Magneto Statics-II

Ampere's circuital law - MFI due to an infinite sheet of current, long filament current carrying conductor, circular, rectangular and square loops; Point form of Ampere's circuital law; Maxwell's third equation, Curl (H)=J.

Unit-V: Forces in Magnetic fields and Inductance

Magnetic force; Behavior of charges moving in magnetic field; Lorentz force equation; Force on a current carrying element placed in a magnetic field; Force on a straight and a long current carrying conductor placed in a magnetic field; Force between two straight long and parallel current carrying conductors; Magnetic dipole - a differential current loop as a magnetic dipole, Torque on a current loop placed in a magnetic field; Inductance: Basic expressions for self and mutual inductances, self-inductance of a solenoid and toroid.

Unit-VI: Time Varying Fields

Introduction; Integral and point forms of faraday's laws of electromagnetic induction; statically and dynamically induced EMFs; Maxwell's fourth equation, Curl (E) = $-\partial B/\partial t$; Modification of Maxwell's equations for time varying fields; Simple problems.

Text Books

1. Engineering Electromagnetics by William H. Hayt& John. A. Buck Mc. Graw-Hill Companies, 7th Editon.2006.
2. Electromagnetic Fields by R MeenaKumari, R Subhasri, New Age International, 2008.
3. Elements of Electromagnetics by Matthew N.O. Sadiku, Oxford University Press, 4th edition.

Reference Books

1. Introduction to Electro Dynamics by D J Griffiths, Prentice-Hall of India Pvt. Ltd, 2nd edition
2. Electromagnetic Field Theory by Yaduvir Singh, Pearson.
3. Fundamentals of Engineering Electromagnetics by Sunil Bhooshan, Oxford higher education.

Programme: B. Tech - Electrical & Electronics Engineering Semester: III
Course Code: V18EET06
Course Name: Electrical and Electronic Measurements

[L : 3; T:1; P : 0 (4 credits)]

COURSE OUTCOMES:
After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C205.1	Identify the proper instrument for measurement of AC or DC voltage and current	K2
C205.2	Choose thesuitable instrument for the measurement of power and energy.	K3
C205.3	Understand the operation of potentiometer.	K2
C205.4	Compute the electrical parameters by using appropriate bridge.	K3
C205.5	Calculate different magnetic parameters by using magnetic instruments and illustrate the instrument transformers.	K3
C205.6	Understand the operation of various digital instruments.	K2

Unit-I: Electromechanical Indicating Instruments

Classification of measuring instruments; Construction and principle of operation of PMMC Galvanometer, MI instruments; Extension of instrument ranges using shunts, multipliers; Numerical Problems.

Unit-II: Power and Energy Measurement

Single phase dynamometer wattmeter (LPF and UPF), expression for deflecting and control torques; Type of P.F. Meters; Single phase induction type energy meter, Driving and braking torques, errors and compensations, testing by phantom loading using R.S.S. meter; Numerical Problems.

Unit-III: Potentiometers

Principle and operation of D.C. Crompton's potentiometer and their applications; Types of AC Potentiometers and their Applications.

Unit-IV: Measurement of Parameters

I. Measurement of Resistance: wheat stone's bridge and its Sensitivity; Ohm meter; Kelvin's double bridge; Loss of charge method; Earth resistance measurement by fall of potential method and megger.
II. Measurement of inductance & Q-Factor: Maxwell's bridge; Hay's bridge; Anderson's bridge.
III. Measurement of capacitance and loss angle: Desauty's Bridge; Schering Bridge.

Unit-V: Magnetic Measurements & Instrument Transformers

Magnetic Measurements: Constructional details of Flux meter; Determination of B–H Loop: Methods of reversals and Step-by-Step method; Core loss measurements by Maxwell's and Campbell's Bridges.

Instrument Transformers: Ratio and Phase angle errors (Derivation & Phasor Diagram) and their applications in the extension of instrument ranges.

Unit-VI: Electronic Instruments

Introduction; Digital Voltmeters (DVM); Ramp type DVM; Integrating type DVM; Successive-approximation DVM; Digital frequency meter, Digital Tachometer; Measurement of phase difference & Frequency by using lissajous patterns in CRO; Electronic Multi meter.

Text Books:

1. A course in Electrical& Electronic Measurement and Instrumentation by A.K.Sawhney, DhapatRai& Co.
2. Electronic Instruments by H.S. Kalsi, Tata Mc-Graw hill.

Reference Books:

1. Electrical and Electronic Measurements and instrumentation by R.K.Rajput, S.Chand.
2. Digital Instrumentation by A.J. Bouwens, Tata Mc-Graw hill.
3. Modern Electronic instrumentation & Measuring instruments by A.D. Heltric& W.C. Copper, Wheeler Publication.
4. Instrument transducers by H.K.P. Neubert, Oxford University press.
5. Electrical Measurements by Forest K. Harris, John Wiley and Sons.

Programme: B. Tech - Electrical & Electronics Engineering   Semester: IV

Course Code: V18EET07

Course Name: Electrical Circuit Analysis –II   **[L : 3; T:1; P : 0 (4 credits)]**

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C210.1	Compute electrical parameters for 3-phase balanced systems	K3
C210.2	Determine electrical parameters for 3-phase unbalanced systems	K3
C210.3	Analyse circuit parameters under transient conditions	K3
C210.4	Apply Foster and Cauer methods for Network Synthesis	K3
C210.5	Apply Fourier Series and Transforms for analysing electrical circuits	K3
C210.6	Understand the concept of filters	K3

Unit-I: Balanced Three phase circuits

Advantages of three phase over single phase system; Generation of three phase voltages; Inter connection of three phase windings: Star and delta connection, Phase sequence, Relation between line and phase voltages and currents in balanced systems; Balanced Star connected load supplied from: Balanced 3-phase 4-wire system, balanced 3-phase 3-wire system; Balanced delta connected load supplied from: Balanced 3-phase 3-wire system, measurement of active and reactive power in balanced 3-phase systems.

Unit-II: Unbalanced Three phase circuits

Unbalanced Star connected load supplied from: Balanced 3-phase 4-wire system, balanced 3-phase 3-wire system; Unbalanced delta connected load supplied from: Balanced 3-phase 3-wire system; Analysis of 3-phase unbalanced circuits: Loop method, Star-Delta transformation technique; Measurement of three phase power using two wattmeter method.

Unit-III: Transient analysis in DC and AC Circuits

Initial Conditions; Analysis of R-L, R-C and R-L-C circuits with DC and AC excitations using differential equations and Laplace transforms; Numerical Problems.

Unit-IV: Network Synthesis

Concept of Stability; Hurwitz Polynomials: Properties, Procedure of Testing; Positive real function; Basic synthesis procedure; LC immittance functions; RC impedance and RL admittance functions; RL impedance and RC admittance functions by using Foster and Cauer methods.

Unit-V: Fourier Analysis and Transforms

Fourier Theorem; Trigonometric form and exponential form of Fourier series; Conditions of symmetry; Line spectra and phase angle spectra; Analysis of electrical circuits to non- sinusoidal periodic waveforms.

Fourier integrals and Fourier transforms: Properties of Fourier transforms and application to electrical circuits.

Unit-VI: Passive Filters and Attenuators

Classification and general relations in filters, Constant K low pass, high pass and band pass filters, m-derived low pass, high pass and band pass filters, Attenuators symmetrical and asymmetrical.

Text Books:

1. Engineering Circuit Analysis by William Hayt and Jack E.Kemmerley, McGraw Hill Company,6th edition
2. Network Analysis byVan Valkenburg, Prentice-Hall of India Private Ltd
3. Circuit Theory (Analysis and Synthesis) by A.Chakrabarthi, DhanpatRai& Co.

Reference Books:

1. Network Theory by N.C. Jagan, C. Lakshminarayana, Anshan Publications
2. Network Theory-Analysis and Synthesis by SmarajitGhosh, PHI Publishers
3. Fundamentals of Electrical Circuits by Charles K.Alexander and Mathew N.O.Sadiku, McGraw Hill Education (India)
4. Network Analysis by C.L.Wadhwa, New Age International Publishers.
5. Electric Circuits– (Schaum's outlines) by MahmoodNahvi& Joseph Edminister, Adapted byKumaRao, 5th Edition – McGraw Hill.
6. Electrical Circuit Analysis by Sudhakar A. &ShyammohanS.Palli, McGraw Hill Publication
7. Introductory Circuit Analysis by Robert L Boylestad, Pearson Publications

Programme: B. Tech - Electrical & Electronics Engineering **Semester: IV**

Course Code: V18EET08

Course Name: Digital Electronics **[L : 3; T:1; P : 0 (4 credits)]**

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C211.1	Understand various number systems, conversation from one radix to another radix.	K2
C211.2	Solve the boolean functions using K-map and tabular minimization	K3
C211.3	Construct the combinational logic circuits	K3
C211.4	Apply PLD's for realization of Boolean	K3
C211.5	Develop the sequential logic circuits such as flip flops, counters and registers.	K3
C211.6	Analyse clocked sequential circuits, finite state machines, Meelay to Moore conversion and vice-versa.	K4

Unit-I: Review of Number Systems & Codes:

i) Representation of numbers of different radix, conversation from one radix to another radix, r-1's compliments and r's compliments of signed members, problem solving.

ii) 4 bit codes, BCD, Excess-3, 2421, 84-2-1 9's compliment code etc.,

iii) Logic operations and error detection & correction codes; Basic logic operations - NOT, OR, AND, Universal building blocks, EX-OR, EX-NOR - Gates, Standard SOP and POS, Forms, Gray code, error detection, error correction codes (parity checking, even parity, odd parity, Hamming code) NAND-NAND and NOR-NOR realizations.

Unit-II: Minimization Techniques:

Boolean theorems, principle of complementation & duality, De-morgan theorems, minimization of logic functions using Boolean theorems, minimization of switching functions using K-Map up to 6 variables, tabular minimization, problem solving (code converters using K-Map etc..).

Unit-III: Combinational Logic Circuits Design:

Design of Half adder, full adder, half subtractor, full subtractor, applications of full adders, 4-bit binary subtractor, adder-subtractor circuit, BCD adder circuit, Excess 3 adder circuit, look-a-head adder circuit, Design of decoder, demultiplexer, 7 segment decoder, higher order demultiplexing, encoder, multiplexer, higher order multiplexing, realization of Boolean functions using decoders and multiplexers, priority encoder, 4-bit digital comparator.

Unit-IV: Introduction of PLD'S:

PROM, PAL, PLA-Basics structures, realization of Boolean function with PLDs, merits & demerits of PROM, PAL, PLA comparison, realization of Boolean functions using PROM, PAL, PLA, programming tables of PROM, PAL, PLA.

Unit-V: Sequential Circuits I:

Classification of sequential circuits (synchronous and asynchronous); basic flip-flops, truth tables and excitation tables (nand RS latch, nor RS latch, RS flip-flop, JK flip-flop, T flip-flop, D flip-flop with reset and clear terminals). Conversion from one flip-flop to flip-flop. Design of ripple counters, design of synchronous counters, Johnson counter, ring counter. Design of registers - Buffer register, control buffer register, shift register, bi-directional shift register, universal shift register.

Unit-VI: Sequential Circuits II:

Finite state machine; Analysis of clocked sequential circuits, state diagrams, state tables, reduction of state tables and state assignment, design procedures.Realization of circuits using various flip-flops.Meelay to Moore conversion and vice-versa.

Text Books:

1. Digital Design – Morris Mano, PHI, 4th Edition, 2008.
2. Switching & Finite Automata theory – ZviKohavi, TMH, 3rd Edition, 2011.

Reference Books:

1. Introduction to Switching Theory and Logic Design by Frederick J. Hill , Gerald R., PetersonMc-Graw Hill TMH edition.
2. Switching Theory and Logic Design by A. Anand Kumar, PHI, 3rd Edition.
3. Fundamentals of Logic Design by Charles H. Roth Jr, Jaico Publishers.
4. Microelectronics by Milliman, MH edition.

Programme: B. Tech - Electrical & Electronics Engineering Semester: IV
Course Code: V18EET09
Course Name: Electrical Machines – II **[L : 3; T:1; P : 0 (4 credits)]**

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C212.1	Explain the operation and performance of three phase induction motor	K3
C212.2	Analyze the torque-speed relation, performance of induction motor andinduction generator	K4
C212.3	Explain the torque production mechanism and starting of single phase induction motors	K3
C212.4	Analyze the performance of synchronous generators by determining its voltage regulation.	K4
C212.5	Examinethe parallel operation and control of real and reactive powers for synchronousgenerators.	K3
C212.6	Understand the operation, performance, starting and power factor corrections of synchronousmotors and Mathematical Analysis of power developed, hunting and its suppression	K4

Unit-I: 3-phase Induction Motors

Construction details of cage and wound rotor machines; Production of rotating magnetic field; Principle of operation; Rotor EMF, Rotor frequency, Rotor Current and p.f. at standstill and during running conditions; Rotor power input; rotor copper losses; Mechanical power developed and their interrelationship; Equivalent circuit; Phasor diagram.

Unit-II: Characteristics, starting and testing methods of Induction Motors

Torque equation; expressions for maximum torque and starting torque; torque-slip characteristics; double cage and deep bar rotors construction; crawling and cogging; speed control of induction motor with V/f method; no-load and blocked rotor tests (construction of circle diagram for predetermination of performance parameters); methods of starting, soft starters; induction generator operation (Qualitative treatment only).

Unit-III: Single Phase Motors

Constructional features and its equivalent circuit; Problem of starting – Double revolving field theory; Starting methods; shaded pole motors; AC Series motor.

Unit-IV: Alternators

Constructional features of non–salient and salient pole type alternator; Armature windings – Distributed and concentrated windings; Distribution, Pitch and Winding factors; E.M.F equation; Improvements of waveform and armature reaction; Voltage regulation by synchronous impedance method, MMF method and Potier triangle method; Phasor diagrams; Two reaction analysis of salient pole machine and phasor diagram.

Unit-V: Parallel Operation of Alternators

Parallel operation with infinite bus and other alternators; Synchronizing power; Load sharing; Control of real and reactive powers; Numerical problems.

Unit-VI: Synchronous Motors

Principle and theory of operation of Synchronous Motor;Phasor diagram; Starting torque; Variation of current and power factor with excitation; Synchronous condenser; Mathematical Analysis for power developed; Hunting and its suppression; Methods of starting.

Text Books

1. Electrical Machines by P.S. Bhimbra, Khanna Publishers
2. Theory & Performance of Electrical Machines by J.B.Guptha. S.K.Kataria& Sons

Reference Books

1. Electrical Machines by D. P.Kothari, I .J .Nagarth,McGrawHill Publications, 4th edition
2. Electrical Machines by R.K.Rajput, Lakshmi publications, 5th edition.
3. Electrical Machinery by AbijithChakrabarthi and SudhiptaDebnath,McGraw Hill education 2015
4. Electrical Machinery Fundamentals by Stephen J Chapman McGraw Hill education 2010
5. Electric Machines by MulukutlaS.Sarma&Mukeshk.Pathak, CENGAGE Learning.
6. Electric Machinery by A.E.Fitzgerald, Charleskingsley,StephenD.Umans, TMH

Programme: B. Tech - Electrical & Electronics Engineering Semester: IV

Course Code: V18EET10

Course Name: Electrical Power Generation & Transmission

[L:3; T:1; P:0 (4 credits)]

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C214.1	Understand the working of conventional power generating stations	K2
C214.2	Choose the proper turbine for a particular power generating station	K3
C214.3	Calculate the performances parameters of various load and insulation resistance and power factor of the cables.	K3
C214.4	Compute the resistance, inductance and capacitance of transmission lines	K3
C214.5	Determine the various transmission line parameters	K3
C214.6	Understand different effects occurred and calculate the corona loss, sag and tension in transmission lines	K3

Unit-I: Conventional Power generating Stations

General layout of a thermal power plant and its Components-General layout of Nuclear power plant -Nuclear fission and Chain Reaction –General Lay out of Hydel power plant and Description of its main components

Unit-II: Turbines

Steam Turbines: Schematic layout of steam power plant, Classification of Steam Turbines-Impulse Turbine and Reaction Turbine- Compounding in Turbines-Velocity Diagrams for simple Impulse and Reaction Turbines- Work done & efficiency

Unit-III: Economic Aspects of Power Generation, Tariffs and Cables

Load curve, load duration and integrated load duration curves, discussion on economic aspects: connected load, maximum demand, and demand factor. Different Tariff methods.

Construction of cables, Types of Cables, Calculation of insulation resistance and power factor of the cable.

Unit-IV: Transmission Line Parameters

Conductor materials: Types of conductors – Calculation of resistance for solid conductors – Calculation of inductance for single phase– Single and double circuit lines–Concept of GMR and GMD–Symmetrical and asymmetrical conductor configuration with and without transposition–Bundled conductors-Numerical Problems–Calculation of capacitance for 2 wire– Effect of ground on capacitance – Capacitance calculations for symmetrical and asymmetrical for single phase–Numerical Problems

Unit-V: Modeling of Transmission Lines

Classification of Transmission Lines: Short, medium and their model representations –Nominal-T–Nominal-Pie and A, B, C, D Constants for symmetrical and Asymmetrical Networks— Evaluation of A,B,C,D Constants–, regulation and efficiency-Numerical problems-Surge Impedance –Surge Impedance loading-Wavelengths and Velocity of Propagation.

Unit-VI: Sag and Tension Calculations and Overhead Line Insulators

Skin and Proximity effects – Ferranti effect – Charging Current –Shunt Compensation –Corona – Description of the phenomenon–Factors affecting corona- Sag and Tension calculations with equal and unequal heights of towers–Effect of Wind and Ice on weight of Conductor–Numerical Problems

Text Books

1. Generation, Distribution and Utilization of Electric Energy by C.L.Wadhawa, New age International (P) Limited, Publishers
2. Thermal Engineering by Rajput, Lakshmi publications
3. Electrical Power Systems by C.L.Wadhwa, 6th Edition, New Age International Publishers.

Reference Books

1. Text Book on Power System Engineering by M.L.Soni, P.V.Gupta, U.S.Bhatnagar and Chakrabarti, DhanpatRai& Co. Pvt. Ltd
2. A Course in Power Systems by J. B. Gupta, S K Kataria& Sons Publishers.
3. Principles of Power Systems by V.K Mehta and Rohit Mehta, S. Chand Publishers.
4. Electrical Power Systems by P.S.R. Murthy, B.S.Publications.

Programme:B. Tech - Electrical & Electronics Engineering **Semester: IV**
Course Code:V18EEL04
Course Name: Electrical Circuits & Measurements Laboratory

[L:0;T:0;P:2(1credits)]

COURSE OUTCOMES:
After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C215.1	Compute response in the electrical circuits using various Network theorems and determine two port network parameters	K3
C215.2	Sketch Locus Diagrams of RL and RC Series Circuits	K3
C215.3	Find parameters of the circuit under resonance conditions	K3
C215.4	Analyse the measuring parameters of Anderson & Schering bridge.	K3
C215.5	Calibrate voltmeters, ammeters, single phase energy meters	K3
C215.6	Apply various methods to calculate 3phase power and choke coil parameters	K3

Any 5 experiments from each cycle are to be conducted

Cycle I:
1. Verification of Thevenin's and Norton's Theorems
2. Verification of Superposition and Reciprocity Theorem
3. Verification of Compensation and Millmann's Theorems.
4. Verification of Maximum Power Transfer Theorem.
5. Locus Diagrams of RL and RC Series Circuits.
6. Time Response of first order RC and second order RLC Networks.
7. Series and Parallel Resonance
8. Determination of Z, Y, Transmission and hybrid parameters.

Cycle II:
1. Calibration and Testing of single phase energy Meter
2. Calibration of PMMC ammeter and voltmeter using Crompton D.C. Potentiometer
3. Calibration of AC voltmeter and measurement of choke parameters using AC Potentiometer in polar form.
4. Calibration of dynamometer and LPF wattmeter by using phantom and direct loading.
5. Capacitance and Inductance Measurement using Schering Bridge and Anderson bridge.
6. Measurement of 3 phase power with single watt meter and using two C.Ts
7. Measurement of choke coil Parameters by using 3 Voltmeter and 3 Ammeter method.

Programme: B. Tech - Electrical & Electronics Engineering Semester: IV
Course Code: V18EEL05
Course Name: Electrical Machines Laboratory – I

[L :0; T:0; P : 2 (1 credits)]

COURSE OUTCOMES:
After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C216.1	Apply and Deduce the principles of Electrical Machines through laboratory experimental work	K3
C216.2	Connect the circuit to perform experiments and measure the required parameters	K3
C216.3	Analyse the observed data & come to a conclusion	
C216.4	Organize reports based on performed experiments with effective demonstration of diagrams and characteristics /graph	K4
C216.5	Demonstrate the performance of Electrical Machines.	K4
C216.6	Troubleshoot the operation of Electrical machines.	K3

Any 10 of the following experiments are to be conducted

1. Magnetization characteristics of DC shunt generator: Determination of critical field resistance and critical speed.
2. Brake test on DC shunt motor. Determination of performance curves.
3. Hopkinson's test on DC shunt machines. Predetermination of efficiency.
4. Swinburne's test and Predetermination of efficiencies as Generator and Motor.
5. Speed control of DC shunt motor by Field and armature Control.
6. Retardation test on DC shunt motor. Determination of losses at rated speed.
7. Separation of losses in DC shunts motor.
8. OC & SC test on single phase transformer.
9. Sumner's test on single phase transformers.
10. Scott connection of transformers.
11. Parallel operation of Single phase Transformers.
12. Separation of core losses of a single phase transformer.
13. Heat run test on a bank of 3 Nos. of single phase Delta connected transformers.

Programme B. Tech - Electrical & Electronics Engineering Semester: IV
Course Code: V18EET56
Course Name: Electrical Safety & IE Rules **[L : 2; T:0; P : 0 (MNC)]**

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
C218.1	Understand the types of electrical hazards and its impact on human body	K2
C218.2	Identify various electrical safety equipment required in power industries.	K2
C218.3	Explain different types of safety methods needed for safe operation of power system	K2
C218.4	Demonstrate the electrical accident rescue techniques and required first aid	K3
C218.5	Understand the departmental procedure for obtaining service connection	K2
C218.6	Describe various IE rules in Indian Electricity Act	K2

Unit-I: Hazards of Electricity

Introduction**,** Hazard Analysis**,** Shock**,** Arc**,** Blast**,** Affected Body Parts**,** Summary Of Causes—Injury And Death**,** Protective Strategies**.**

Unit-II: Electrical Safety Equipment

Introduction**,** General Inspection and Testing Requirements for Electrical Safety Equipment**,** Flash And Thermal Protection**,** Head and Eye Protection**,** Rubber Insulating Equipment**,** Hot Sticks**,** Insulated Tools**,** Barriers And SignsSafety Tags, Locks, and Locking Devices , The Electrician's Safety Kit

Unit-III: Safety Procedures and Methods

Introduction**,** The Six-Step Safety Method**,** Job Briefings**,** Energized Or De-Energized?**,** Safe Switching Of Power Systems**,** Energy Control Programs**,** Lockout-Tagout**,** Placement Of Safety Grounds**,** Barriers And Warning Signs**,** Tools And Test Equipment**,** The One-Minute Safety Audit.

Unit-IV: Accident Prevention, Rescue, and First Aid

Accident Prevention, Individual Responsibility, Installation Safety, First Aid ,Resuscitation (Artificial Respiration), Heart-Lung Resuscitation, Rescue Techniques, General Rescue Procedures, Accident Investigation

Unit-V: Departmental Procedures and Tests

Departmental procedure for obtaining service connection, Insulation resistance and Earth resistance, testing of electrical installation, Insulation resistance between conductor and earth, load survey.

Unit-VI: REC and Indian Electricity Act

Introduction, Rural Electrification, Indian Electricity Rules, National Electrical Code.

Textbooks:

1. Electrical Saftey hand book byJohn Cadick, Mary Capelli-Schellpfeffer, Dennis K. Neitzel, 3rd edition, McGraw-Hill Publications.

References:

1. Indian Electricity Act 2003
2. The Indian Electricity Rules, 1956

3. A Study Guide on Electrical SafetyHazards Awareness by EFCOG Electrical Safety Improvement Project.

Annexure-VIII

Minutes of the meeting, BOS of Computer Science Engineering (Held on 20.04.2019)

Item No. 1: Introducing members of BOS by Chairperson.

The Chairperson BOS extended a formal welcome and introduced the members.

Item No. 2: Review of the syllabus approved for the Academic Year 2018-19(B.Tech)

(i) As per the discussions by the BOS members, no changes were suggested in the Syllabus.

Item No: 3: Suggest modification for the existing Course Structure (B.Tech).

i) The courses namely **Employability Skills-I (V18ENT03) and Employability Skills-II (V18ENT04)** were renamed by BOS of English as **Professional Communication Skills – I (V18ENT03) and Professional Communication Skills –II (V18ENT04)**.

ii) A new **MNC course** by name **Technical Skills-I (**V18CST60**) & Technical Skills-II (**V18CST61**)** were suggested by the committee to be offered in the III Sem & IV Sem respectively.

iii) The Course Structure & Syllabus for these four courses are placed in **Appendix-CSE-01.**

Item No: 4: Change of course (II SEM) in the Approved course structure (M.Tech)

To provide advanced courses the committee recommended **Deep Learning (V18CTT19)** Course in place of **Artificial Intelligence (V18CTT12)** in Elective-I. The revised Course Structure is proposed in **Appendix-CSE-02**.

Item No.5: Syllabi for the proposed courses offered in III and IV semesters of B.Tech Programme for the Academic Year 2019-20 & M.Tech(CSE) II Sem.

(i) The proposed Syllabi is given in **Appendix-CSE-03**.

(ii) Syllabus is approved for the courses offered to EEE & ECE Programmes, is given in **Appendix-CSE-04.**

S.No.	Programme	SEM	Course Code	Course Name
1	EEE	III	V18CSL31	Data Structures & Algorithms Lab
2	EEE	IV	V18CSL33	Python Programming Lab
3	ECE	IV	V18CSL32	Object-OrientedProgrammingThrough Java Lab

iii) **M.Tech , Deep Learning (V18CTT19)** Course Syllabus is proposed in **Appendix-CSE-05.**

Item No.6: Any other item with the permission of chair

We are awaiting for the approval of new Programme Computer Science & Technology (CST) for the A.Y 2019-20. As suggested by the BOS, it has been decided to adopt the same Syllabi & Course Structure of I & II SEM CSE for CST also. Details are given in **Appendix CSE-06**

Appendix-CSE-01

III Sem	PROBABILITY AND STATISTICS	Course Code: VI8MAT04	L	T	P
			3	1	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Find measures of central tendency and dispersion for real data sets.

CO2: Find parameters of given function

CO3: Apply probability distribution to real time problems

CO4: Plot a best fit curve to an experimental data and find the correlation and regression

CO5: Create good estimators to various parameters

CO6: Apply the principles of Statistical Inference to practical problems

Unit-I: Basic Statistics

Measures of Central Tendency: Mean, Median, Mode

Measures of Dispersion: Variance, Standard deviation, Skewness and Kurtosis

Unit-II: Basic Probability

Random Variables: Discrete and continuous - Probability function – density and distribution function, Expectation of a Random Variable, Moments, Chebychev's Inequality (Without proof).

Unit-III: Probability Distributions

Probability distributions: Binomial, Poisson and Normal - Evaluation of statistical parameters: Mean, Variance and their properties, Introduction to Exponential, Gamma and Weibull distributions.

Unit-IV: Bivariate Distributions

Curve fitting by the method of Least squares- Fitting of straight line, parabola and exponential curves, Simple Correlation and Regression – Rank correlation.

Unit-V: Sampling Distribution and Estimation

Introduction **–**Sampling distribution of means with known and unknown standard deviation

Estimation: Criteria of a good estimator, point and interval estimators for means and proportions

Unit-VI: Tests of Hypothesis

Introduction-Type-I, Type-II Errors, Maximum Error, one–tail, two-tail tests,Test of significance: Large sample test for single proportion, difference of proportions, single mean, difference of means.

Test of significance: Small sample test for single mean, difference of means and test of ratio of variances (F-Test) - Chi-square test for goodness of fit and independence of attributes.

Text Books:

1. **B. V. Ramana**, A text Book of Engineering Mathematics, Tata McGraw Hill.

2. **Miller & Freund's**, Probability & Statistics for Engineers – Eighth Edition,Richard. A. Johnson

References Books:

1. **S. Ross,** “A First Course in Probability”, Pearson Education India, 2002.
2. **Dr.T.S.R.Murthy**, Probability and Statistics for Engineers, BS Publications.
3. **T. Veerarajan**, “Engineering Mathematics”, Tata McGraw-Hill, New Delhi, 2010.

III Sem	DIGITAL ELECTRONICS	Course Code: VI8ECT06	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Illustrate the conversion of a number from one number system to another .

CO2: Classify Boolean theorems & simplify the Boolean functions using the Boolean properties.

CO3: Use K-map as a tool to simplify and design logic circuits

CO4: Construct different combinational Logic circuits like MUX, Decoders, Encoders etc.

CO5: Demonstrate the basic flip-flops in terms of truth table & excitation table

CO6: Apply the concepts of flip-flops in the designing of different sequential circuits like registers, counters, etc.

UNIT I: Number systems & Binary codes:

Number systems: Number Systems, Radix conversions, complement of numbers. Binary codes: Binary codes, Weighted and non-Weighted codes, BCD code, gray code, excess 3 codes.

UNIT -II: Concept of Boolean algebra:

Basic Theorems and Properties of Boolean algebra, Boolean Functions, Canonical and Standard Forms, Minterms and Maxterms, Logic gates: NOT, OR, AND, NOR, NAND, XOR, XNOR - Universal gates.

UNIT- III: Gate level Minimization:

Map Method, Two-Variable K-Map, Three-Variable K-Map, Four Variable K-Maps. Products of Sum Simplification, Sum of Products Simplification, Don't – Care Conditions, NAND and NOR Implementation.

UNIT- IV: Combinational Logic:

Introduction, Analysis Procedure, Design Procedure, Binary Adder–Subtractor, Decimal Adder, Decoders, Encoders, Multiplexers.

UNIT V: **Sequential Logic Circuits**:

Introduction –Latches and Flip flops: Basic Flip flop circuit, RS, D, JK and T Flip-flops – Triggering of Flip flops: Master Slave Flip flop, edge triggered flip flop – Conversion of one type of Flip flop to another.

UNIT -VI: Registers and Counters:

Registers and Counters: Shift Register, Universal Shift Register, Applications of Registers, Asynchronous counter, Synchronous counter, Mod-N Counter, binary up/down counter, Ring counter, Johnson counter.

Memories: Introduction to ROM, PROM, EPROM.

TEXT BOOKS:

1. Digital Design, 5/e, M.Morris Mano, Michael D Ciletti, PEA.
2. Fundamentals of Logic Design, 5/e, Roth, Cengage.

REFERENCE BOOKS:

1. Digital Logic and Computer Design, M.Morris Mano, PEA.
2. Digital Logic Design, Leach, Malvino, Saha, TMH.
3. Modern Digital Electronics, R.P. Jain, TMH.

III Sem	DATA STRUCTURES AND ALGORITHMS	Course Code: **V18CST02**	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Explain Sorting and Searching techniques. [K2]
CO2: Demonstrate Singly Linked List and Double Linked List. [K3]
CO3: Interpret the basic operations on Stacks and Queues. [K3]
CO4: Demonstrate Binary Tree and Binary Search Tree [K3]
CO5: Compare Binary trees and Self-Balanced trees with appropriate examples. [K4]
CO6: Illustrate various graph algorithms.. [K3]

UNIT I: Algorithm Notations - performance analysis: Space complexity, time complexity – Asymptotic notation: Big O, Omega and Theta.

Sorting: Bubble Sort, Insertion Sort, Selection Sort, Quick Sort, Merge Sort, Radix Sort. **Searching**: Linear Search, Binary Search. Introduction to Hashing.

UNIT II: Types of Data Structures – Linear data structures and non-linear data structures. Representation of arrays - polynomial representation, addition of two polynomials, sparse representation, transpose of sparse matrix.

Single linked list: Representation of node, operations on single linked list, reverses the linked list,

Double linked list: operations like insert delete and display. Circular linked List.

UNIT III: Stacks Definition, array representation, linked list representation, Towers of hanoi, infix to postfix conversion, expression evolution, Multistack.

Queues definition, Array representation, linked list representation, operations on queues, Applications of Queues, Circular Queue.

UNIT IV: Trees: Introduction, Terminology, Representation of Trees.

Binary Trees: Properties of Binary Tress, Binary Tree Representation, operations, Tree Traversals – recursive, non-recursive.Binary Search Tree and its operations.

UNIT – V: Self-Balanced Trees - **AVL trees:** Definition, Representation of an AVL Tree, Height of AVL tree, AVL element searching, insert and delete element from AVL tree.

Priority Queues: Heaps Definition, types of heaps, properties and its operations.

UNIT – VI: Graphs: Graph Definition, properties, Graph Representation, Elementary Graph Operations. Graph Traversal techniques: Depth First Search, Breadth First Search.Spanning Trees: Kruskal's Algorithm, Prims Algorithm. Single source shortest Paths and all pair shortest path algorithm.

Text Books:

1. Data Structures, algorithms and applications in C++, SartajSahni, Universities press, Second Edition.

2. Fundamentals of Data Structures in C++, Ellis Horowitz, SartajSahni and Dinesh Mehta, 2nd Edition, Universities Press (India) Pvt. Ltd.

Reference Books:

1. An Introduction to Data Structures with Application, Jean-Paul Tremblay , Paul Sorenson, Second Edition.
2. Fundamentals of Data Structures and algorithms by C V Sastry, Rakesh Nayak, Ch. Raja Ramesh, IK Publications, new Delhi.
3. Data structures using C and C++, Langsam, Augenstein and Tanenbaum, PHI.
4. Problem solving with C++, The OOP, Fourth edition, W.Savitch, Pearson education.

III Sem	DISCRETE MATHEMATICS	Course Code: V18CST03	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Demonstrate the concepts associated with propositions and mathematical logic. **[K3]**

CO2: Demonstrate the basic concepts associated with relations, functions and their applications. **[K3]**

CO3: Illustrate algebraic structures and their applications in computer science. **[K3]**

CO4: Apply techniques of graphs for real-time problems **[K3]**

CO5: Demonstrate the concepts of trees in various real time problems. **[K3]**

CO6: Solve recurrence relations using various methods and problems based on combinatory. **[K3]**

UNIT-I Mathematical Logic: Statements and Notation , Connectives, Truth tables, Tautologies, Equivalence of formulas, Tautological Implications, Normal forms, Theory of inference for Statement Calculus, Indirect Method of Proof. Predicate calculus- Predicates, quantifiers, universe of discourse.

UNIT-II Set Theory and Relations: Basic concepts, Operations on Sets, Principle of Inclusion and Exclusion, Relations, Properties of Binary Relations in a set, Relation Matrix and Digraph, Equivalence, Partial Ordering Relations, Hasse Diagrams, Lattice and its Properties , Functions, Bijective Functions, Composition of Functions.

UNIT-III Algebraic Structures: Algebraic Systems and examples, Properties of Binary operations, Semi Groups, Monoids, Homomorphism of Semi groups and Monoids, Groups, Abelian Group, Subgroups.

UNIT-IV Graph Theory-I: Basic Concepts of graph, Representing graphs, Sub graphs, Isomorphic graphs, Paths and Circuits,Eulerian and Hamiltonian Graphs,Planar graphs, Graph Colouring , Chromatic Number.

UNIT-V Number Theory: Properties of integers, Division Theorem, The Greatest Common Divisor, Euclidean Algorithm, Least Common Multiple, Testing for Prime Numbers, The Fundamental Theorem of Arithmetic, Modular Arithmetic (Fermat's Theorem and Euler 's Theorem)

UNIT-VI Combinatorics and Recurrence Relations:

Combinatories: Basics of counting, permutations, combinations, inclusion-exclusion, pigeonhole principle.

Recurrence relations: Solving homogeneous and non-homogeneous recurrence relation by method of substituation, characteristic roots and generating function.

Text Books:

1. 1. Discrete Mathematical Structures with Applications to Computer Science, J. P. Tremblay and P. Manohar, 1st Edition, Tata McGraw Hill.
2. Discrete Mathematics and its Applications with Combinatorics and Graph Theory, K. H.Rosen, 7th Edition, Tata McGraw Hill..
3. Discrete Mathematics for Computer Scientists and Mathematicians, J. L. Mott, A. Kandel, T.P. Baker, 2nd Edition, Prentice Hall of India.

Reference Books:

1. Elements of Discrete Mathematics -A Computer Oriented Approach, C. L. Liu and D. P. Mohapatra,
2. 3rdEdition, Tata McGraw Hill.
3. 2.Discrete Mathematics with Combinatorics and Graph Theory, Santha, 1st Edition Cengage Learning.

III Sem	OBJECT ORIENTED PROGRAMMING FOR PROBLEM SOLVING	Course Code: V18CST04	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Differentiate Procedural Oriented Programming and Object Oriented Programming. **[K2]**

CO2: Develop object oriented programs onclasses and objects. **[K3]**

CO3: Demonstrate various object-oriented concepts like Constructors, Destructors & Operator-Overloading. **[K3]**

CO4: Apply various Object Oriented features like Inheritance and Polymorphism to solve various computing Problems. **[K3]**

CO5: Develop programs to handle Exceptions & Files. **[K3]**

CO6: Describe Generic Programming. **[K3]**

UNIT I: Introduction to Object-Oriented Programming: Introduction to Object-Oriented Programming – Programming Paradigms, Features of Object Oriented Programming,Data Types, Variables, Constants, Operators ,Decision Statements &Control Structures, Arrays, Namespace, Default Arguments, Constant Arguments, Inputting Default Arguments, Reference Arguments.

UNIT II: Classes and Objects: Introduction to Classes and Objects: Defining Classes & Objects, Access specifiers, Scope Resolution Operator, Static Member variables, Static Member Functions, Array of Objects**.** Inline Functions, Overloading Member Functions, Objects as Function Arguments, Friend Functions, Friend Class, Local Class, Empty Class, Nested Classes, Return by Reference.

UNIT III: Object Initialization, Cleanup and Operator Overloading: Introduction to Constructors, Characteristics, Constructor with Default Arguments, Parameterized Constructors, Overloading Constructors, Copy Constructor, Dynamic Constructors and Destructors, Anonymous Objects .Introduction to operator Overloading, Rules for Overloading Operators, Overloading Unary & Binary Operators, this keyword, Constraint on Increment and Decrement Operators, Overloading with Friend Functions, Type Conversions.

UNIT IV: Inheritance and Polymorphism: Base class and Derived class, Single Inheritance, Multiple Inheritance, Multilevel Inheritance, Hierarchical Inheritance, Hybrid Inheritance, Virtual Base Classes, and Constructor in Derived Classes. qualifier classes and inheritance, Significance of Virtual Functions, Early Vs Late Binding, Pure Virtual Functions, Virtual Destructor.

UNIT V: Exception Handling and File Handling: Principles of Exception Handling, Keywords, Exception Handling Mechanism, Multiple Catch Statements, Catching Multiple Exceptions, Re-throwing Exception.File Opening Modes, File Stream Classes, I/O manipulators, Classes for File Handling, Sequential Access Files, Random Access Files, Error Handling Functions.

UNIT-VI: Generic Programming with Templates: Need for Templates,Class Templates, Function Templates,overloading Template Functions. Introduction to Standard Template Library, Sequential Containers & Associative Containers.

Text Books

1. Programming in C++, Ashok N Kamthane, 2nd Edition, Pearson.
2. C++ How to Program, Paul J. Deitel, Harvey Deitel, 6th edition, PHI publication.

References Books

1. Object Oriented Programming C++, Joyce Farrell, Cengage.
2. Mastering C++, Venugopal, Raj Kumar, Ravi Kumar, TMH.
3. The Complete Reference C++, HerbertSchildt, 4th Edition, Mcgraw Hill.
4. 4.Object Oriented Programming With C++, R. Subburaj, Vikas Publishing House.

III Sem	DIGITAL ELECTRONICS LAB	Course Code:V18ECL04	L	T	P
			0	0	2

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Apply the Boolean algebra to design digital logic circuits.

CO2: Analyse the behaviour of different combinational logic circuits.

CO3: Analyse the behaviour of different sequential logic circuits

CO4: Construct and troubleshoot simple combinational and sequential circuits

List of Experiments: *Conduct any TEN experiments*

Study of Integrated Circuits, Bread board& Power supplies

1) Verification of Basic Logic Gates
2) Verification of Universal Gates, Special Gates.
3) Verify the De-Morgan laws using CMOS IC's
4) Design a Gray code encoder & Decoder using IC 7486
5) Construct a Half Adder using IC's and verify the truth table.
6) Construct a Half Subtract or using IC's and verify the truth table.
7) Verify the truth tableof IC 74138(3x8 Decoder)
8) Verify the truth table of IC 74153(4x1 MUX).
9) Verify the D Flip- Flop Using IC7474 with PRESET, CLEAR asynchronous Inputs.
10) Verify JK Flip- Flop & T Flip-Flop Using IC7476 with PRESET, CLEAR asynchronous Inputs.
11) Verify Decade counter using IC7490.
12) Design 4-bit right Shift Register using D-Flip-Flop and verify the truth table.

Add-on Experiments

1) Verify the read and write operations for the IC74189.
2) Design the Mod-6 counter usingIC74XX

Equipment Required:

1. IC TrainerKits
2. Electronic chips of allgates
3. PowerSupplies
4. Bread boards

III Sem	DATA STRUCTURES AND ALGORITHMS LAB	Course Code: V18CSL02	L	T	P
			0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Construct programs on Sorting and searching Techniques. **[K3]**

CO2: Illustrate various operations on Singly Linked List. **[K3]**

CO3: Construct programs on Double Linked List. **[K3]**

CO4: Develop programs on Stacks, Queues and their Applications. **[K3]**

CO5: Implement various operations on Binary Search Tree. **[K3]**

CO6: Implement various shortest path algorithms. **[K3]**

List of Experiments

1. Programs to implement the following sorting techniques
   (a) Selection sort (b) Quick sort (c) Merge sort
2. Programs to implement the following searching methods
   (a) Linear search (b) Binary search.
3. A Program to Implement hash table and its operations.(Note: Use at least one collision resolution technique)
4. A Program to implement addition of two polynomials. (using arrays).
5. A Program to implement single linked list and its operations. (create, insert, delete, display)
6. A Program to implement double linked list and its operations.
7. A Program to implement stack operations using arrays.
8. A Program to convert infix expression to postfix expression.
9. A Program to implement queue operations using single linked list.
10. A Program to implement circular queue using arrays.
11. A Program to implement Binary search Tree and its operations.
12. A Program to implement AVL trees and its operations.
13. A Program to implement Heap sort.
14. A Program to implement graph traversal algorithms (BFS & DFS).
15. A Program to implement minimum spanning tree algorithms (Prims &Krushkal)
16. A Program to implement single source shortest path algorithm.

Text books:

1. Data Structures, algorithms and applications in C++, SartajSahni, Universities press, Second Edition.
2. Fundamentals of Data Structures in C++, Ellis Horowitz, SartajSahni and Dinesh Mehta, 2nd Edition, Universities Press (India) Pvt. Ltd.

Reference Books:

1. An Introduction to Data Structures with Application, Jean-Paul Tremblay , Paul Sorenson, Second Edition.
2. Fundamentals of Data Structures and algorithms by C V Sastry, Rakesh Nayak, Ch. Raja Ramesh, IK Publications, new Delhi.
3. Data structures using C and C++, Langsam, Augenstein and Tanenbaum, PHI.
4. Problem solving with C++, The OOP, Fourth edition, W.Savitch, Pearson education.

III Sem	OBJECT ORIENTED PROGRAMMING FOR PROBLEM SOLVING LAB	Course Code: V18CSL03	L	T	P
			0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Develop Programs on Classes and Objects. **[K3]**
CO2: Demonstrate Constructors and destructors. **[K3]**
CO3: Demonstrate Operator-Overloading. **[K3]**
CO4: Implement Inheritance and Polymorphism. **[K3]**
CO5: Develop programs to handle Exceptions & Files. **[K3]**
CO6: Illustrate Generic Programming. **[K3]**

]

List of experiments:

1. Programs illustrating Various Control Structures.
2. Programs illustrating the use of following concepts.
   (a) Default Arguments b) Constant Arguments c) Reference Arguments
3. Programs illustrating the use of following concepts:
   a) Classes & Objects b) Inline functions
   c) Static Member functions d) Overloading of Member Functions
4. Programs illustrating the use of following concepts.
   a) Objects as Function Arguments b)Friend Functions , Friend class
   c) Local class d) Empty Class& Nested Classes
5. Programs illustrating the use of following concepts.
   a) Default constructor b) Constructor with arguments c) Copy constructor
6. Programs to illustrate the Overloading of various operators.
   a) Binary b) Unary c) new d) delete
7. Programs illustrating the various forms of Inheritance.
   a) Single b) Multilevel c) Hierarchical d) Hybrid
8. Program illustrating the use of Virtual Functions &Virtual Base class.
9. Programs illustrating how Exceptions are handled.
   a) Division-by-zero b) Overflow in an array
10. Programs illustrating file handling operations:
    a) Copying text files b) Displaying the contents of the file
11. Programs illustrating Class template and Overloading Function Template.
12. Programs illustrating Sequential Containers & Associative Containers.

Text Books

1. Programming in C++, Ashok N Kamthane, 2nd Edition, Pearson.
2. C++ How to Program, Paul J. Deitel, Harvey Deitel, 6th edition, PHI publication.

			L	T	P
III Sem	**Professional Communication Skills - I**	Course Code: **V18ENT03**	3	0	0

Syllabus Details

1. *Course Outcomes: After successful completion of the Course, the student will be able to:*

CO1: Summarize one's introduction in an appropriate manner, exhibit grammatical competence through correction of sentences, analyze noun and pronoun dispositions and develop pre-reading strategies to improve comprehension skills.[K5]

CO2: Distinguish singular and plural in different contexts and display knowledge through accurate usage of sentences, build conversations which befit the situations, comprehendthe passages well and, use different kinds of idioms. [K4]

CO3: Classify various kinds of adjectives and adverbs, learn natural occurrence of paired words of native speakers, infer the referential and inferential aspects of the passages and make use of idioms while narrating personal experiences. [K4]

CO4: Judge and assess the behaviour of people in day to day life using kinesics and proxemics that disclose their disposition and be aware of their personal traits that promote good relations. (K2)

CO5: Articulate their goals and have a constructive plan of executing them properly and become adept in oral presentations as well as poster presentations that enhance their professional skills. (K3)

CO6: Evaluate various happenings by thinking out of the box and display their latent talent. They can also reduce the stress levels by applying various stress management techniques. (K4)

2. Syllabus

UNIT – I

SELF-INTRODUCTION: Basic information - Academic and personal - interests– strengths and weaknesses – goal.

ERROR ANALYSIS: Nouns & Pronouns – Singular & Plural – Kinds of Nouns & Pronouns- Collective Nouns - Personal and Reflexive Pronouns.

READING COMPREHENSION: Reading as a skill – quick reading - analyzing – answering **IDIOMS& PHRASES**: Colloquial expressions– formal and informal expressions.

UNIT – II

ERROR ANALYSIS: Concord – Subject – Verb agreement.

ROLE PLAY: Day to day situations - practical approach – real life experiences. **READING COMPREHENSION:** Skimming – scanning - summarizing – problem solving.

IDIOMS & PHRASES: Enriching written and spoken English – use and usage.

UNIT – III

ERROR ANALYSIS: Adjectives – Adverbs – role of modifiers – place of Adjectives– Adverbs of frequency.

COLLOCATIONS: Natural combination of words – closely affiliated with each other.

READING COMPREHENSION: At a glance – close reading – understanding – answering

IDIOMS & PHRASES: Communicative - expressive – competent.

UNIT -IV

INTER AND INTRA PERSONAL SKILLS: Leading, Coaching, Interviewing, Managing, Persuading - Self awareness, Self confidence, Good Attitude.

BODY LANGUAGE: Basics of proxemics and kinesics.

UNIT -V

PRESENTATION SKILLS: Importance of Presentation skills, Structuring our presentations, Ways to improve our presentation skills, Tips for effective presentations.– oral – Power point – poster.

GOAL SETTING: Short-term – long-term – aim – target – vision – How to set SMART goals.

UNIT - VI

LATERAL THINKING: What is creativity, Fundamental approaches to smart thinking, Characteristics of a creative person, Convergent and Divergent thinking.

STRESS MANAGEMENT: Meaning of Stress, Types of Stress, Symptoms of stress, Short term and long term stress, how can people manage stress.

3. Reference:

1.Essential English Grammar - Raymond Murphy

2. Advanced English Grammar – D.S. Paul

3.Word Power Made Easy – Norman Lewis

4.English collocations in use - Michael McCarthy

5. Word Power Made Handy - ShaliniVarma

6.Barron's GRE - Barron's

7. Current English Grammar & Usage – R.P Sinha

8.Think & Grow Rich - NapoleaonHill

9.Soft Skills for Everyone - Butterfield, Jeff,

10. Soft Skills - Chauhan, G.S. and Sangeeta Sharma

11. Theories of Personality - Hall, Calvin S

12. Corporate Conversations - Holtz, Shel

13. Communication Skills - Kumar, Sanajy and PushpLata

14. Winning at Interviews - Thorpe, Edgar and Showick Thorpe

15. Swami Vivekananda and "Personality Development" published by RK Math.

III Sem	**Technical Skills - I**	Course Code:	L	T	P
		V18CST60	0	0	4

Syllabus Details

Module-1: Problem Solving using C-I

Course Outcomes: After successful completion of the Course, the student will be able to:

CO1 : Build programs using Variables and Operators.(K3)

CO2 : Identify and resolve compilation errors for conditional statements.(K3)

CO3 : Develop problems using looping constructs.(K3)

CO4 : Model the problems using functions.(K3).

CO5 : Develop problems using Arrays (K3).

CO6 : Make use of Strings to solve the given problem(K3)

Syllabus

1. **I/O Statements, Operators and Expressions**
2. **Problem Solving Using Conditional Statements**
3. **Looping Constructs**
4. **Functions**
5. **2-D Arrays**
6. **Strings**

Text Books:

1. Let us C: Yesvanth Kanetkar, BPB Publications, 16th Edition
2. Working With C, Yashavant P. Kanetkar, BPB Publications
3. Test Your C Skills, Yashavant P. Kanetkar, BPB Publications

IV Sem	COMPUTER ORGANIZATION	Course Code: V18CST05	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

- **CO1:** Illustrate Basic structure of Computers, Instruction types and their addressing modes. **[K2]**
- **CO2:** Describe the different modes of Input / Output transfer. **[K2]**
- **CO3:** Illustrate different types of Memory. **[K2]**
- **CO4:** Describe the different types of Control Unit techniques. **[K2]**
- **CO5:** Illustrate the Fixed point and Floating point arithmetic operations of ALU. **[K2]**
- **CO6:** Explain the concept of Pipelining. **[K2]**

UNIT-I: Introduction:

Functional Units, Basic Operational Concepts, Bus Structures.

Instruction Sequencing and Addressing Modes: Instructions and Instruction Sequencing, Addressing modes, Basic Input/Output Operations.

UNIT-II: Input/Output Organization:

Accessing Input/Output devices, Interrupts- Interrupt Hardware, Enabling and Disabling Interrupts, Handling Multiple Devices, Direct Memory Access, Buses-Synchronous and Asynchronous.

UNIT-III: Memory Organization:

Memory Hierarchy, Main Memory, Auxiliary Memory, Associative memory, Cache Memory. **(Morris Mano)**

UNIT-IV: Processing Unit:

Fundamental Concepts, Execution of a Complete Instruction, Multiple-Bus Organization, Hardwired Control, Micro programmed Control-Microinstructions, Micro program Sequencing.

UNIT-V: Arithmetic Logic Unit:

Introduction, Addition and Subtraction, Multiplication Algorithms, Division Algorithms, Floating-Point Arithmetic Operations. **(Morris Mano)**

UNIT-VI: Pipelining:

Basic Concepts, Data Hazards, Instruction Hazards, Datapath and Control Considerations.

Text Books:

1. Computer Organization, Carl Hamacher, ZvonkoVranesic, SafwatZaky, 5th Edition, McGraw Hill Education.
2. Computer System Architecture, M. Morris Mano, 3rd Edition, Pearson Education.

Reference Books:

1. Computer Organization and Architecture, William Stallings, 10th Edition, Pearson Education.

2. Computer Architecture and Organization, John P. Hayes, 3rd Edition, McGraw Hill Education.

IV Sem	SOFTWARE ENGINEERING	Course Code: **V18CST06**	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Demonstrate Software Process Models. **[K3]**

CO2: Illustrate Requirement Engineering Process. **[K3]**

CO3: Discuss Software architecture and Design. **[K2]**

CO4: Apply Coding principles and Testing techniques **[K3]**

CO5: Discuss Software Estimation and Maintenance. **[K2]**

CO6: Describe Quality Management and Metrics. **[K2]**

UNIT-I: The nature of Software: Defining Software, Software application Domains, Legacy software. Software engineering, the software process, software Myths.

Software development process models: Waterfall model, Prototyping, Iterative development, Unified process, Extreme programming and agile process. Merits and Demerits of Software Process Models.

UNIT-II: Software Requirements: Functional and non-functional requirements, User requirements, System requirements, Interface specification, the Software requirements document

Requirements engineering process: Feasibility studies, Requirements elicitation and analysis, Requirements validation, Requirements management.

UNIT-III: Software Architecture: Role of software architecture, Architecture views, components and connector view, architecture styles for C & C view, documenting architecture design, evaluating architectures.

Design: Design concepts, Function-oriented design, Object oriented design, Detailed design.

UNIT-IV: Coding and Testing: Programming principles and guidelines, incrementally developing code, managing evolving code. Testing concepts, testing process, Black-box testing, White-box testing.

Risk management: Reactive vs. Proactive Risk strategies, Software risks, Risk identification, Risk projection, Risk refinement, RMMM Plan.

UNIT-V: Software Project estimation: Decomposition techniques, Empirical Estimation Models.

Software Maintenance: Maintenance Process, Reverse Engineering, Reengineering, Configuration Management

UNIT-VI: Metrics for Process and Products: Software Measurement, Metrics for software quality.

Quality Management: Quality concepts, Software quality assurance, Software Reviews, Formal technical reviews, Statistical Software quality Assurance, Software reliability, SEI-CMM Model, Six Sigma and ISO 9000 quality standards.

Text Books:

1. Software Engineering, A practitioner's Approach- Roger S.Pressman, 7th Edition, McGrawHill International Edition.
2. Software Engineering- Ian Sommerville, 9th Edition, Pearson education.
3. Software Engineering, A Precise approach, PankajJalote, Wiley

Reference Books:

1. CMMI and Six Sigma: Partners in Process Improvement , Jeannine M. Siviy, M. Lynn Penn, Robert W. Stoddard, 1st edition, Addison Wesley;
2. Software Engineering principles and practice, W S Jawadekar, 3rdEdition,TMH

IV Sem	FORMAL LANGUAGES AND AUTOMATA THEORY	Course Code: **V18CST07**	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Construct DFA, NFA and Є-NFA. [**K3**]
CO2: Produce Regular expressions, Regular Grammars. [**K3**]
CO3: Construct Context Free Grammars, Context Free Languages.[**K3**]
CO4: Construct Pushdown Automata and its equivalence with CFG.[**K3**]
CO5: Construct Turing machine. [**K3**]
CO6: Discuss Decidability Theory. [**K2**]

UNIT-I: Alphabet, Strings, Language, Finite Automaton Definition, Transition Systems, Acceptance of Strings by Finite Automata, DFA, Design of DFA, NFA, Design of NFA, Equivalence between NFA and DFA, Finite Automata with ϵ-Transition, Equivalence between NFA and ϵ-NFA, Minimization of Finite Automata, Equivalence between two Finite Automata, Moore and Mealy machines and their equivalences, Applications of Finite Automata.

UNIT-II: REGULAR EXPRESSIONS: Regular expressions, Identity rules, Equivalence between two Regular Expressions, Equivalence between Regular Expressions and Finite Automata, Pumping lemma, Closure properties of regular sets(proofs not required),Regular Sets and Regular grammars, Equivalence between Regular grammar and FA, Regular Expressions and Regular Grammar.

UNIT-III: CONTEXT FREE GRAMMARS: Formal Languages, Grammars, Classification of Grammars, Chomsky Hierarchy, Context free Grammars, Derivation of string, Left Most Derivations, Right Most Derivations, parse trees, Ambiguity in Context-Free Grammars, Simplification of Context Free Grammars, Normal Forms-Chomsky Normal Form (CNF), Greibach Normal Form (GNF),Pumping Lemma, Closure Properties, Applications of Context Free Languages.

UNIT-IV: PUSHDOWN AUTOMATA: Definitions, Instantaneous descriptions, Languages of a PDA, Equivalence of Pushdown automata and CFG's, Deterministic pushdown automata: Definition DPDA, Regular Languages and DPDA , DPDA and context free languages.

UNIT-V: TURING MACHINE: Definition, Model, Representation of Turing Machines: Instantaneous Description, Transition Tables and Transition Diagrams, Language Acceptance of a Turing Machine, Design of Turing Machine (TM) , Types of TM's (Proofs not required).

UNIT-VI: Recursive languages, Recursive Enumerable Language, Closure Properties of Recursive languages & Recursive Enumerable, Universal Turing Machine. Decidable and Un-decidable Languages, Halting Problem of Turing Machines, Post Correspondence Problem, Modified Post's Correspondence Problem.

Text Books:

1. Introduction to Automata Theory, Languages and Computation, J.E.Hopcroft, R.MotwaniandJ.D.Ullman, 3rdEdition, Pearson, 2008.
2. Theory of Computer Science-Automata ,Languages and Computation, K.L.P.Mishra and N.Chandrasekharan, 3rdEdition,PHI, 2007.
3. Peter Linz, “An Introduction to Formal Language and Automata”, ThirdEdition, Narosa Publishers, New Delhi, 2002

Reference Books:

1. 1.Introduction to Automata Theory, Formal Languages and Computation, ShyamalenduKandar, Pearson, 2013.
2. Theory of Computation, V.Kulkarni, Oxford UniversityPress, 2013.
3. Theory of Automata, Languages and Computation, RajendraKumar, McGraw Hill, 2014.
4. Formal Language and Automata Theory, K.V.N.Sunitha and N.Kalyani, Pearson, 2015.
5. John C Martin, “Introduction to Languages and the Theory of Computation”, Third Edition, Tata McGraw Hill Publishing Company, New
6. Delhi, 2007
7. Kamala Krithivasan and Rama. R, “Introduction to Formal Languages, Automata Theory and Computation”, Pearson Education 2009.

IV Sem	JAVA PROGRAMMING	Course Code: **V18CST08**	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Describe Java Virtual Machine and Type casting. [**K2**]

CO2: Demonstrate Concepts like Constructors, Arrays, Nested Classes and Command Line Arguments. [**K3**]

CO3: Implement Concepts of Inheritance and Exception Handling [**K3**]

CO4: Develop programs on Multi-Threading and Files [**K3**]

CO5: Demonstrate Applet Programming and AWT Components. [**K3**]

CO6: Describe Event Handling and Swings. [**K3**]

UNIT-I: Introduction to Java: Introduction to Object Oriented Paradigm, Concepts of OOP, Applications of OOP, History of Java, Java Features, JVM, Program Structure. Variables, Primitive Data Types, Constants, Operators, Expressions, Precedence rules and Associativity, Primitive type conversion and Casting, Control Structures.

UNIT-II: Classes and Objects: Classes and objects, Class declaration, Creating objects, Methods, Constructors and Constructor Overloading, Importance of Static Keyword and Examples, this Keyword, Arrays, Command Line Arguments, Nested Classes.

UNIT-III: Inheritance and Exception Handling: Inheritance, super Keyword, final Keyword, Method Overriding and Abstract Class. Interfaces, Creating Packages, Using Packages, Importance of Class path. Exception Handling, Importance of try, catch, throw, throws and finally Block.

UNIT-IV: Multithreading and Files: Introduction, Thread Lifecycle, Creation of Threads, Thread Priorities, Thread Synchronization, Communication between Threads. Reading Data from Files and Writing Data to Files, Random Access Files.

UNIT-V: Applet Programming and AWT: Applet Class, Applet Lifecycle, Applet Programs. Introduction to AWT, Components and Containers, Button, Label, Checkbox, Radio Buttons, List Boxes, Layouts, Menu and Scrollbar.

UNIT-VI: Event Handling and Swings: Event Handling : Event Delegation Model, Sources of Events, Event Listeners, Adapter Classes, InnerClasses. Introduction to Swings.

Text Books:

1. Java Proramming, E.Balagurusamy, 4thEdition , TMH.
2. The complete Reference Java, 8thEdition, Herbert Schildt, TMH.
3. Introduction to java programming ,Y Daniel Liang, 7thEdition, Pearson.

Reference books:

1. Core Java: An Integrated Approach , R Nageswara Rao, 7th Edition, Dream Tech
2. Head First Java , Kathy Sierra and Bert Bates, 2nd Edition O’reilly

IV Sem	PYTHON PROGRAMMING	Course Code: **V18CST09**	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Illustrate basic concepts of Python Programming. **[K2]**
CO2: Describe control structures in python. **[K2]**
CO3: Demonstrate functions and packages. **[K3]**
CO4: Construct python programs using structured data types. **[K3]**
CO5: Compare TextFiles and Binary Files. **[K4]**
CO6: Apply OOPs concepts to Develop Test cases. **[K3]**

UNIT-I: Introduction to Python, Data Types & Operators: Basics of python programming: Features of python – History of Python - The Future of Python installation and execution - Data types – Identifiers - variables – type conversions- Literal Constants – Numbers – Strings. I/O statements. Operators and expressions, operator precedence – expression evaluation.

UNIT-II: Control Structures: Decision Control statements: conditional (if), alternative (if-else), chained conditional (if-elif-else);

Iteration: while loop, for loop, nested for loop, range function, break, continue and pass statements.

UNIT-III: Functions :Functions & modules : Introduction - Function Declaration &Definition - Function Call – Variable Scope and Lifetime - The return statement- More on Defining Functions - Lambda Functions or Anonymous Functions - Documentation Strings- Modules – Packages.

UNIT-IV: Structured Data Types: Lists: list operations, list slices, list methods, cloning lists, list parameters. **Tuples**: tuple assignment, tuple as return value. **Set:** Set Creation, Set Operations. **Dictionaries**: Creation, operations; comprehension, operations on strings.

UNIT-V: Files & Exception Handling: Introduction - Types of files - Text files - reading and writing files; Errors and exceptions handling.

UNIT-VI: OOPS concepts and Testing Basics: Classes, Methods, Constructor, Inheritance, Overriding Methods, Data hiding, GUI programming with TKINTER.

Text Books:

1. "Python Programming using problem solving Approach" ReemaThareja, Oxford University Press – 2017.
2. Python with Machine Learning by A.Krishna Mohan, Karunakar & T.Murali Mohan by S. Chand Publisher-2018.

Reference Books:

1. Allen B. Downey, "Think Python: How to Think Like a Computer Scientist", 2nd edition, Updated for Python 3, Shroff /O'Reilly Publishers, 2016 .

2. Guido van Rossum and Fred L. Drake Jr, ―An Introduction to Python – Revised and updated for Python 3.2, Network Theory Ltd., 2011.
3. John V Guttag, ―Introduction to Computation and Programming Using Python", Revised and expanded Edition, MIT Press , 2013
4. Robert Sedgewick, Kevin Wayne, Robert Dondero, ―Introduction to Programming in Python:

IV Sem	Managerial Economics and Financial Analysis	Course Code: V18MBET51	L	T	P
			3	0	0

Syllabus Details

Course Outcomes: After successful completion of the Course, the student will be able to:

CO1: Understand the basic concepts of managerial economics, demand, and elasticity of demand and methods of demand forecasting. **[K2]**

CO2: Estimate the production function with one, two and infinite variables. Understanding various cost concepts and calculating breakeven point **[K2]**

CO3: Understand and showing a price output determination in different types of market structures and knowing various pricing methods **[K2]**

CO4: Understanding various forms of business organizations **[K2].**
CO5: Prepare the financial statements and its analysis **[K3].**

CO6: Appraise the projects by using various capital budgeting methods **[K4].**

UNIT-I: Introduction to Managerial Economics and demand Analysis: Definition of Managerial Economics –Scope of Managerial Economics and its relationship with other subjects – Concept of Demand, Types of Demand, Determinants of Demand- Demand schedule, Demand curve, Law of Demand and its limitations- Elasticity of Demand, Types of Elasticity of Demand and Measurement- Demand forecasting and Methods of forecasting..

UNIT–II: Production and Cost Analyses: Concept of Production function- Cobb-Douglas Production function- Law of Variable proportions-Isoquants and Isocosts and choice of least cost factor combination-Concepts of Returns to scale and Economies of scale- Different cost concepts: opportunity costs, explicit and implicit costs- Fixed costs, Variable Costs and Total cost –Cost–Volume-Profit analysis- Determination of Breakeven point(simple problems)Managerial significance and limitations of Breakeven point.

UNIT–III: Introduction to Markets, & Pricing Policies: Market Structures: Perfect Competition, Monopoly, Monopolistic competition and Oligopoly – Features – Price and Output Determination – Methods of Pricing: Average cost pricing, Limit Pricing, Market Skimming Pricing, Internet Pricing, Flat Rate Pricing, Usage sensitive pricing and Priority Pricing.

UNIT–IV: Types of Business Organization and Business Cycles:

Features and Evaluation of Sole Trader, Partnership, Joint Stock Company

– State/Public Enterprises and their forms – Business Cycles : Meaning and Features – Phases of Business Cycle.

UNIT–V: Introduction to Accounting & Financing Analysis: Introduction to Double Entry Systems – Preparation of Financial Statements-Analysis and Interpretation of Financial Statements-Ratio Analysis

UNIT–VI: Capital and Capital Budgeting: Capital Budgeting: Meaning of Capital-Capitalization-Meaning of Capital Budgeting-Time value of money- Methods of appraising Project profitability: Traditional Methods and modern methods (simple problems)

TEXT BOOKS

Dr. N. AppaRao, Dr. P. Vijay Kumar: 'Managerial Economics and Financial Analysis', Cengage Publications, New Delhi – 2011

IV Sem	JAVA PROGRAMMING LAB	Course Code: **V18CSL04**	L	T	P
			0	0	3

COURSE OUTCOMES:
After successful completion of the course, the student will be able to:

CO1: Develop Programs to handle on Classes and Objects **[K3]**
CO2: Demonstrate Constructors and Arrays. **[K3]**
CO3: Demonstrate Inheritance and Exception Handling. **[K3]**
CO4: Implement programs on Multi-Threading. **[K3]**
CO5: Illustrate File Handling Mechanisms. **[K3]**
CO6: Demonstrate GUI Programming using Applets and Swings. **[K3]**

List of Experiment

1. Programs illustrating Control Structures and Type Conversions in java.
2. Programs illustrating the use of following concepts:
   a) Classes & Objects b) Usage of static c) Constructors
3. Programs illustrating the use of following concepts.
   a) Arrays b) Nested Classes c) Command Line Arguments
4. Programs illustrating the use of following concepts.
   a) Inheritance b) Usage of super c)Method Overriding
5. Programs to illustrate the Overloading of various operators.
   a) Usage of final b) Abstract class c) Interfaces
6. Programs illustrating the various concepts like.
   a) Packages b) Exception Handling
7. Programs illustrating how Multi-Threading implemented.
   a) Multiple Threads on Single Object b) Thread Deadlock
8. Programs illustrating Thread Communication.
9. Programs illustrating reading from and writing to files.
   a) Sequential Files b) Random Access Files
10. Programs illustrating GUI using Applets & AWT Components.
11. Programs to illustrate Event Handling using Listener Interfaces.
12. Programs illustrating GUI using Swings.

Text books:

1. The complete Reference Java, 8^{th} Edition, Herbert Schildt, TMH.
2. Introduction to java programming, Y Daniel Liang, 7^{th} Edition, Pearson.

IV Sem	PYTHON PROGRAMMING LAB	Course Code: **V18CSL05**	L	T	P
			0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Demonstrate Basic Python Programs **[K3]**
CO2: Construct control structures in python **[K3]**
CO3: Demonstrate functions and packages. **[K3]**
CO4: Construct python programs using structured data types. **[K3]**
CO5: Demonstrate Text Files and exception handling. **[K3]**
CO6: Test Rock – paper – Scissors game. **[K4]**

Exercise 1 - Basics

a) A sample Python Script using command prompt, Python Command Line andIDLE
b) A program to purposefully raise an Indentation Error and correct it

Exercise 2 - Operations

a) A program to compute distance between two points taking input from the user (Pythagorean Theorem)
b) A program on add.py that takes 2 numbers as command line arguments and prints its sum.

Exercise - 3 Control Flow

a) A Program to implement for checking whether the given number is a even number or not.
b) A program to construct reverse the digits of a given number and add it to the original, If the sum is not a palindrome repeat this procedure.
c) A program using a while loop that asks the user for a number, and prints a countdown from that number to zero.

Exercise 4 - Control Flow – Continued

a) A program to construct the following pattern, using a nested for loop.

```
*
* *
* * *
* * * *
* * * * *
* * * *
* * *
* *
*
```

b) By considering the terms in the Fibonacci sequence whose values do not exceed four million,find the sum of the even-valued terms.

Exercise - 5 – Problem Solving using Functions

a) Find mean, median, mode for the given set of numbers passed as arguments to a function
b) Develop a function nearly_equal to test whether two strings are nearly equal. Two strings a and b are nearly equal when a can be generated by a single mutation on b.
c) Develop a Recursive Function to find the Factorial of a given number.
d) Develop function to compute gcd, lcm of two numbers. Each function shouldn't exceed one line.

Exercise - 6 Structured Data types

a) a program to count the number of strings where the string length is 2 or more and the first and last character are same from a given list of strings.
b) a program to develop unzip a list of tuples into individual lists and convert them into dictionary.

Exercise – 7 Structured Data types Continued

a) A program to count the numbers of characters in the string and store them in a dictionary data structure
b) A program to use split and join methods in the string and trace a birthday with a dictionary data structure.

Exercise - 8– Modules

a) Install packages requests, flask and explore themusing (pip)
b) A program to implement a script that imports requests and fetch content from the page. Eg. (Wiki)
c) Develop a simple script that serves a simple HTTPResponse and a simple HTML Page

Exercise - 9 Files

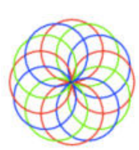
a) A program to count frequency of characters in a given file. Can you use character frequency to tell whether the given file is a Python program file, C program file or a text file?
b) A program to compute the number of characters, words and lines in a file.

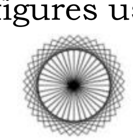
Exercise - 10 OOP

a) Class variables and instance variable and illustration of self variable
i) Robot
ii) ATM Machine

Exercise - 11 GUI, Graphics

1. Develop a GUI for an Expression
2. A program to implement the following figures using turtle





Case Study: Implement Rock – paper – Scissors game using TKINTER.

Text Books:

1. "Python Programming using problem solving Approach" ReemaThareja, Oxford University Press – 2017.

2. Python with Machine Learning by A.Krishna Mohan, Karunakar & T.Murali Mohan by S. Chand Publisher-2018.

IV Sem	**Constitution of India**	Course Code: **V18ENT11**	L	T	P
			2	0	0

Syllabus Details

1. **Course Outcomes: At the end of the Course student will be able to:**

CO1: Summarize the evolution and historical importance of Indian constitution from 1858 to 1947. [K2]

CO2: Explain various stages in the composition of Indian Constitution. [K2]

CO3: Develop awareness about their primary rights and duties & build up their civic sense. [K3]

CO4: Comprehend the distribution of powers between the center and states. (K4)

CO5: Summarize and sketch the specific roles of heads of Nation and the functioning of legislative bodies. (K2)

CO6: Explain the role of local self-government in strengthening democracy. (K1)

Constitution of India – Basic features and fundamental principles

The Constitution of India is the supreme law of India. Parliament of India cannot make any law which violates the Fundamental Rights enumerated under the Part III of the Constitution. The Parliament of India has been empowered to amend the Constitution under Article 368, however, it cannot use this power to change the "basic structure" of the constitution, which has been ruled and explained by the Supreme Court of India in its historical judgments. The Constitution of India reflects the idea of "Constitutionalism" – a modern and progressive concept historically developed by the thinkers of "liberalism" – an ideology which has been recognized as one of the most popular political ideology and result of historical struggles against arbitrary use of sovereign power by state. The historic revolutions in France, England, America and particularly European Renaissance and Reformation movement have resulted into progressive legal reforms in the form of "constitutionalism" in many countries. The Constitution of India was made by borrowing models and principles from many countries including United Kingdom and America.

The Constitution of India is not only a legal document but it also reflects social, political and economic perspectives of the Indian Society. It reflects India's legacy of "diversity". It has been said that Indian constitution reflects ideals of its freedom movement, however, few critics have argued that it does not truly incorporate ourown ancient legal heritage and cultural values. No law can be "static" and therefore the Constitution of India has also been amended more than one hundred times. These amendments reflect political, social and economic developments since the year 1950. The Indian judiciary and particularly the Supreme Court of India has played an historic role as the guardian of people. It has been protecting not only basic ideals of the Constitution but also strengthened the same through progressive interpretations of the text of the Constitution. The judicial activism of the Supreme Court of India and its historic contributions has been recognized throughout the world and it gradually made it "as one of the strongest court in the world".

Course content

1. Meaning of the constitution law and constitutionalism
2. Historical perspective of the Constitution of India
3. Salient features and characteristics of the Constitution ofIndia
4. Scheme of the fundamental rights
5. The scheme of the Fundamental Duties and its legalstatus
6. The Directive Principles of State Policy – Its importance andimplementation
7. Federal structure and distribution of legislative and financial powers between the Union and the States
8. Parliamentary Form of Government in India – The constitution powers and

status of the President of India

9. Amendment of the Constitutional Powers and Procedure

10. The historical perspectives of the constitutional amendments inIndia

11. Emergency Provisions : National Emergency, President Rule, Financial Emergency

12. Local Self Government – Constitutional Scheme in India

13. Scheme of the Fundamental Right to Equality

14. Scheme of the Fundamental Right to certain Freedom under Article19

15. Scope of the Right to Life and Personal Liberty under Article21

Unit-I: Historical Perspective of the Indian Constitution – A brief discussion of various Acts i.e from 1858 to 1947 passed by the British Government.

Unit–II: Constitution of India

a) Preparation of Indian constitution by Constituent Assembly of India.

b) Preamble or Philosophy of the Indian Constitution.

c) Salient features of the Indian constitution.

Unit-III:

a) Fundamental Rights - their importance& Limitations

b) Fundamental Duties and their importance

c) Directive principles of the state policy and their implementation

Unit-IV: Indian Federalism

a) Distribution of powers between Union and State Governments

b) Legislative, Executive and Financial relations between Union and State Governments

Unit-V: Parliamentary form of Government in India

1.Union Executive

a) President of India- Powers and functions

b) Vice-President - Powers and functions

c) Prime Minister and Council of Minister - Powers and functions

2. Union Legislature

a) RajyaSabha – Powers and Functions

b) LokSabha- Powers and Functions

c) Amending Procedure- Important Constitutional Amendments – 42nd, 44 Constitutional Amendment Acts.

3. **Judiciary** – Supreme court of India - Powers and Functions

Unit-VI: Local Self–government in India 73rd & 74th Constitutional Amendments Acts

Reference Books:

1. D DBasu-Introduction to the constitution of India – 18th Edition. Prentice – Hall of India Private Ltd-New Delhi-1998

2. Granville Austin (1972) the Indian Constitution, Cornerstone of a Nation Oxford university Press, New Delhi

3. Madhavkhosla (2012) the Indian Constitution, oxford university press, New Delhi

4.Granville Austin (1999) Working a Democratic Constitution; A History of the Indian Experience, Oxford University Press, New Delhi

5.ZoyaHasan, Sridharan E and Sudharshan R (Eds) 2002 India's living Constitution, Permanent black, New Delhi

6.BaxiUpendra (1980) the Indian Supreme Court and Politics Eastern book co, Lucknow

			L	T	P
IV Sem	**Professional Communication Skills - II**	Course Code: V18ENT04	3	0	0

Syllabus Details

1. Course Outcomes: At the end of the Course student will be able to:

CO1: Correlate individual words into one whole sentence using new vocabulary and focus on the error analysis of prepositions and conjunctions. ***[K4]***

CO2: Distinguish and acquire knowledge of using words of same category in a sentence and learn new words that promote communicative finesse. **[K5]**

CO3: Find errors in sentences where the modifiers are misplaced and put them at the appropriate place, use hit pair words and send an email that is concise and lucid **[K5]**

CO4: Interpret the importance of Attire and Etiquette in societal context and manage their time. [**K2]**

CO5: Discover the team working abilities among themselves and display their leadership qualities. **[K3]**

CO6: Identify various elements of emotional balance that have positive impact on work-life-balance. **[K2]**

2. Syllabus

UNIT – I

ERROR ANALYSIS: Prepositions - kinds of prepositions –appropriate use - conjunctions –sub- ordinating– co-ordinating.

VOCABULARY: Etymology **–** roots – suffixes – prefixesand one word substitutes.

SENTENCE IMPROVEMENT: Better choice – error-free sentences – effective – syntax.

UNIT – II

ERROR ANALYSIS: Parallel grammatical forms – same grammatical structures.

VOCABULARY: Words that describe personalities – faiths – professions – medical specialists and Word Clusters.

EXPANSION OF PROVERBS: Meaning – interpretation – explanation.

UNIT – III

ERROR ANALYSIS: Dangling modifiers – misplacement of modifiers – arrangement.

VOCABULARY: Antonyms and Synonymsand Foreign expressions.

EMAIL WRITING: Format – method of exchanging – technicalities.

UNIT- IV

ATTIRE & ETIQUETTE: Formal – informal- professional – social Attires, Meaning of Etiquette, Need for etiquette, Types of Etiquette.

TIME - MANAGEMENT: Value of time – Setting priorities – effective use of time – ABCD analysis, Pareto Principle, Eisenhower Method.

UNIT -V

TEAM WORK – Benefits of working with a team – Team Dynamics . LEADERSHIP QUALITIES: Leadership Styles, Characteristics of a Good Leader, Big 5 Personality traits, Myths about leadership qualities.

UNIT -VI

EMOTIONAL INTELLIGENCE: What is EI – Daniel Goleman model of EI, Qualities of an Emotionally Intelligent Person - Emotional balance – feelings – thoughts – motivation.

WORK – LIFE - BALANCE: Personal life – professional life – cause of work-life imbalances, consequences of work-life imbalance, Role of gender and family – improving work life balance.

3.Reference:

1. Essential English Grammar - Raymond Murphy
2. Advanced English Grammar – D.S. Paul
3. Word Power Made Easy – Norman Lewis
4. English collocations in use - Michael McCarthy
5. Word Power Made Handy - ShaliniVarma
6. Barron's GRE - Barron's
7. Current English Grammar & Usage – R.P Sinha
8. Think & Grow Rich - Napoleaon Hill
9. Soft Skills for Everyone - Butterfield, Jeff,
10. Soft Skills - Chauhan, G.S. and

Sangeeta Sharma

11. Theories of Personality - Hall, Calvin S

12. Corporate Conversations - Holtz, Shel

13. . Communication Skills - Kumar, Sanajy and PushpLata

14. Winning at Interviews - Thorpe, Edgar and Showick Thorpe

15. Swami Vivekananda and "Personality Development" published by RK Math.

IV Sem	**Technical Skills-II**	Course Code: **V18CST61**	L	T	P
			0	0	4

Syllabus Details

Module-II: Problem Solving using C-II

1. Course Outcomes: After successful completion of the course, the student will be able to:

CO1 : Develop programs using Pointers. **[K3]**

CO2 : Develop problems using functions. **[K3]**

CO3 : Solve problems using recursions. **[K3]**

CO4 : Construct programs using File Handling. **[K3].**

CO5 : Develop programs using Structures and Unions **[K3].**

CO6 : Make use of command line arguments and preprocessors to solve the given problems(K3)

Syllabus

1. Pointers
2. **Functions and Pointers**
3. **Recursion**
4. **File Handling**
5. **Structures and Union**
6. **Enum, Preprocessors, Command Line Arguments**

Text Books:

1. Let us C: Yesvanth Kanetkar, BPB Publications, 16th Edition
2. Working With C, Yashavant P. Kanetkar, BPB Publications
3. Test Your C Skills, Yashavant P. Kanetkar, BPB Publications
4. Understanding Pointers in C, Yashavant P. Kanetkar, BPB Publications.

Appendix-CSE-05

II Sem	**Deep Learning**	Course Code: V18CTT19	L	T	P
			3	0	0

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Explain the concept of Neural Networks [**K2]**

CO2: Explain about Feed forward Networks [**K2]**

CO3: Explain the fundamentals of Deep Neural Networks [**K2]**

CO4: Explain about Recurrent Neural Networks [**K2]**

CO5: Explain Convolution Neural Networks [**K2]**

Unit I-Basics: Biological Neuron, Idea of computational units, McCulloch–Pitts unit and Thresholding logic, Linear Perceptron, Perceptron Learning Algorithm, Linear separability. Convergence theorem for Perceptron Learning Algorithm.

Unit-II Feed for ward Networks: Multilayer Perceptron, Gradient Descent, Back propagation, Empirical Risk Minimization, regularization, auto encoders.

Unit-III Deep Neural Networks: Difficulty of training deep neural networks, Greedy layer wise training. **Better Training of Neural Networks:** Newer optimization methods for neural networks : Ad grad, ad a delta, rms prop, adam, NAG.

Unit-IV Recurrent Neural Networks: Back propagation through time, Long Short Term Memory, Gated Recurrent Units, Bidirectional LSTMs, Bidirectional RNNs

Unit-V Convolution Neural Networks: LeNet, AlexNet. **Generative models:** Restrictive Boltzmann Machines (RBMs),

Annexure-IX

Minutes of the meeting, BOS of Mechanical Engineering (Held on 21.04.2019)

Item No.1: Chairman welcomed all the BOS members and introduced to all the BOS-internal members.

Item No.2: Suggest modifications for the existing course structure.

- Course named Computer aided Engineering Drawing Practice (CAEDP) (course code. V18MEL04) is removed.
- Condition monitoring & Machine Learning (course code.V18MET44) and Entrepreneurship (Course code.V18MET45) are included under the group of Open Elective –III in VII semester.
- Few courses suggested during previous meeting are rearranged as mentioned follows:

S.No.	Code	Name of the Course	Planned	Revised plan
1	V18MET06	Theory of Machines-1	III Sem	IV Sem
2	V18MET09	Materials Engineering	IV Sem	III Sem
3	V18MET10	Metrology	IV Sem	VI Sem
4	V18MEL06	Metrology &Instrumentation & Control Systems lab	IV Sem	VI Sem
5	V18MET14	Manufacturing Processes	V Sem	IV Sem
6	V18MEL09	Heat Transfer lab	V Sem	VI Sem
7	V18MET17	Metal Cutting & Machine Tools	VI Sem	V Sem
8	V18MEL10	Thermal Engineering lab	VI Sem	V Sem
9	V18MEL11	Manufacturing Processes lab	VI Sem	IV Sem

- The revised course structure offered is attached in **Appendix-ME-01**.
- The courses Employability skills-I (course code.V18ENT03) & Employability skills - II (course code.V18ENT04) offered by BOS of English have been renamed as Professional Communication Skills-I (course code.V18ENT03) & Professional Communication Skills – II (course code.V18ENT04) in III and IV semesters respectively.
- The course code of Constitution of India V18ENT07 offered by BOS of English has been changed to V18ENT11 in IV semester.
- The approved courses syllabi for Professional Communication Skills – I (course code.V18ENT03) & Professional Communication Skills – II (course code.V18ENT04) is attached in **Appendix-ME-02**.

Item No. 2: Propose syllabi for the courses offered in III and IV semesters of B.Tech programme of Academic Year 2019-20.

- The approved syllabi for the courses is attached in **Appendix-ME-03**

Item No. 3: Review of the syllabi approved for the Academic Year 2018-19, I & II semester for B.Tech & M.Tech programme.

- No changes were suggested.

Syllabus for the Regulation Year 2019-2020 (Common to all Branches)

Professional Communication Skills - I

B.Tech III Semester

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT03	**Professional Communication Skills - I**	3	-	-	MNC

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Summarize one's introduction in an appropriate manner, exhibit grammatical competence through correction of sentences, analyze noun and pronoun dispositions and develop pre-reading strategies to improve comprehension skills.[K5]

CO2: Distinguish singular and plural in different contexts and display knowledge through accurate usage of sentences, build conversations which befit the situations, comprehendthe passages well and, use different kinds of idioms. [K4]

CO3: Classify various kinds of adjectives and adverbs, learn natural occurrence of paired words of native speakers, infer the referential and inferential aspects of the passages and make use of idioms while narrating personal experiences. [K4]

CO4: Judge and assess the behaviour of people in day to day life using kinesics and proxemics that disclose their disposition and be aware of their personal traits that promote good relations. (K2)

CO5: Articulate their goals and have a constructive plan of executing them properly and become adept in oral presentations as well as poster presentations that enhance their professional skills. (K3)

CO6: Evaluate various happenings by thinking out of the box and display their latent talent. They can also reduce the stress levels by applying various stress management techniques. (K4)

UNIT – I

SELF-INTRODUCTION: Basic information- Academic and personal - interests– strengths and weaknesses – goal.

ERROR ANALYSIS: Nouns & Pronouns – Singular & Plural – Kinds of Nouns & Pronouns- Collective Nouns - Personal and Reflexive Pronouns.

READING COMPREHENSION: Reading as a skill – quick reading - analyzing – answering **IDIOMS& PHRASES**: Colloquial expressions– formal and informal expressions.

UNIT – II

ERROR ANALYSIS: Concord – Subject – Verb agreement.

ROLE PLAY: Day to day situations - practical approach – real life experiences.

READING COMPREHENSION: Skimming – scanning - summarizing – problem solving.

IDIOMS & PHRASES: Enriching written and spoken English – use and usage.

UNIT – III

ERROR ANALYSIS: Adjectives – Adverbs – role of modifiers – place of Adjectives– Adverbs of frequency.

COLLOCATIONS: Natural combination of words – closely affiliated with each other.

READING COMPREHENSION: At a glance – close reading – understanding – answering

IDIOMS & PHRASES: Communicative - expressive – competent.

UNIT -IV

INTER AND INTRA PERSONAL SKILLS: Leading, Coaching, Interviewing, Managing, Persuading - Self awareness, Self confidence, Good Attitude.

BODY LANGUAGE: Basics of proxemics and kinesics.

UNIT -V

PRESENTATION SKILLS: Importance of Presentation skills, Structuring our presentations, Ways to improve our presentation skills, Tips for effective presentations.– oral – Power point – poster.

GOAL SETTING: Short-term – long-term – aim – target – vision – How to set SMART goals.

UNIT - VI

LATERAL THINKING: What is creativity, Fundamental approaches to smart thinking, Characteristics of a creative person, Convergent and Divergent thinking.

STRESS MANAGEMENT: Meaning of Stress, Types of Stress, Symptoms of stress, Short term and long term stress, how can people manage stress.

Syllabus for the Regulation Year 2019-2020
Constitution of India
B.Tech ECE (III Sem), CSE & ME (IV Sem)

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT11	**Constitution of India**	2	-	-	MNC

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

CO1: Summarize the evolution and historical importance of Indian constitution from 1858 to 1947. **[K2]**

CO2: Explain various stages in the composition of Indian Constitution. **[K2]**

CO3: Develop awareness about their primary rights and duties & build up their civic sense. **[K3]**

CO4: Comprehend the distribution of powers between the center and states. **[K4]**

CO5: Summarize and sketch the specific roles of heads of Nation and the functioning of legislative bodies. **[K2]**

CO6: Explain the role of local self-government in strengthening democracy. **[K1]**

Unit-I

Historical Perspective of the Indian Constitution – A brief discussion of various Acts i.e from 1858 to 1947 passed by the British Government.

Unit–II

Constitution of India

d) Preparation of Indian constitution by Constituent Assembly of India.
e) Preamble or Philosophy of the Indian Constitution.
f) Salient features of the Indian constitution.

Unit-III

d) Fundamental Rights - their importance& Limitations
e) Fundamental Duties and their importance
f) Directive principles of the state policy and their implementation

Unit-IV

Indian Federalism

c) Distribution of powers between Union and State Governments
d) Legislative, Executive and Financial relations between Union and State Governments

Unit-V

Parliamentary form of Government in India

1. **Union Executive**
   d) President of India- Powers and functions
   e) Vice-President - Powers and functions
   f) Prime Minister and Council of Minister - Powers and functions
2. **Union Legislature**
   e) Rajya Sabha – Powers and Functions
   f) Lok Sabha- Powers and Functions

g) Amending Procedure- Important Constitutional Amendments – 42nd, 44 Constitutional Amendment Acts.

3. Judiciary – Supreme court of India - Powers and Functions

Unit-VI

Local Self–government in India 73rd & 74th Constitutional Amendments Acts

Reference Books:

V18MET04	THERMODYNAMICS	L	T	P	C
		3	1	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Describe the basic terms related to work and heat	K2
CO2	Explain first law of thermodynamics and internal energy.	K2
CO3	Apply the second law of thermodynamics to basic thermal systems.	K3
CO4	Explain the concept of entropy.	K2
CO5	Illustrate various thermodynamic cycles.	K2
CO6	Discuss about pure substance.	K2

UNIT – I

Thermodynamic System, boundary, Surrounding, control volume, Universe, Concept of Continuum, Thermodynamic Equilibrium, State, Property, Process, Cycle – Reversibility – Quasi – static Process, Irreversible Process, Causes of Irreversibility – Energy in State Work and Heat, Point and Path function. Zeroth law of thermodynamics.

UNIT – II

First law of thermodynamics: Joule's experiments-First law of thermodynamics-systems and steady flow systems- Specific heats at constant volume and pressure -Enthalpy- First law applied to flow systems- Systems undergoing a cycle and change of state- First law applied to steady flow processes-various non-flow processes-Properties of end states- Heat transfer and work transfer- Change in internal energy-throttling and free expansion.

UNIT – III

Second law of thermodynamics-Limitations of the First Law – Thermal Reservoir, Heat Engine, Heat pump, Parameters of performance, Second Law of Thermodynamics, Kelvin-Planck and Clausius Statements and their Equivalence / Corollaries, PMM of Second kind, Carnot's principle, Carnot cycle and its specialties, Clasius theorem Clausius Inequality.

UNIT – IV

Entropy, Principle of Entropy Increase, availability and irreversibility–Third Law of Thermodynamics

T-ds relations, Helmholtz and Gibbs functions, Gibbs relations, Maxwell relations

UNIT – V

Thermodynamic Cycles: Carnot vapor cycle, ideal Rankine cycle, Rankine reheat cycle, air-standard Otto cycle, air-standard Diesel cycle, air-standard Brayton cycle, vapor-compression refrigeration cycle.

UNIT – VI

Pure Substances: P-V-T- surfaces, T-S and h-s diagrams, Mollier Charts, Phase Transformations, Triple point at critical state properties during change of phase, Dryness Fraction.

Text Books:

1. Engineering Thermodynamics, PK Nag 5th Edn, TMH,2014
2. Thermodynamics. An engineering Approach with student resources DVD Y.A. Cengel & M.A. Boles, 7th Edn-McGrawHill,2014
3. Internal Combustion Engine –V Ganeshan.4th edition, TMH, 2016

References:

V18MET05	FLUID MECHANICS AND FLUID MACHINES	L	T	P	C
		3	0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Understand the basic concepts of fluid properties and to determine hydrodynamic forces on submerged bodies.	K3
CO2	Apply the flow field phenomena and the basic governing equations in solving fluid flow problems.	K3
CO3	Calculate the various losses occurring when the fluid flowing in closed conduit and measure the discharge by different apparatus.	K3
CO4	Understand the concept of boundary layer theory and to find out major and minor losses.	K3
CO5	Determine the forces in the operation of jets and turbines and to determine efficiencies of turbines.	K3
CO6	Interpret the operation of pumps and hydraulic systems and to find efficiencies of pumps.	K3

UNIT 1

Fluid Statics :Dimensions and units-Physical properties of fluids-Density, Specific gravity, Viscosity, Surface tension, Vapour pressure, Capillarity, Bulk modulus. Pressure types-Atmospheric, absolute, gauge and vacuum pressure. Measurement of pressure - Piezometer, different types of manometers.

UNIT 2

Fluid Kinematics: stream line, path line and steak line. Classification of flows-steady &un steady, uniform & non uniform, laminar & turbulent, rotational & irrotational flows-equation of continuity for one dimensional flow and three dimensional flow. Equation of continuity in differential form.

UNIT 3

Fluid Dynamics: Bernoulli's equation along a stream line, Momentum equation, application of momentum equation on pipe bend. Measurement of flow- Pitot tube, Venturimeter, Orifice meter, Turbine flow meter.

UNIT 4

Closed Conduit Flow: Reynolds experiments, Darcy-Weisbatch equation, Major and minor losses, Hydraulic gradient line, Total energy line, Pipes in series and parallel.

Boundary layer concepts: Definition, Development along a thin flat plate, Thicknesses (Momentum, Energy, Displacement-No derivations), separation, methods of controlling separation, stream lined and bluff bodies.

UNIT 5

Basics of turbomachinery: Determination of hydrodynamic force of jet on stationary and moving flat, inclined, curved vanes (jet striking at tip and centre), velocity diagrams, work done and efficiency, flow over radial vanes, series of vanes.

Turbines:

Classification of turbines, Pelton wheel, Francis turbine, Kaplan turbine- Working principles, working proportions, work done, efficiencies. Draft tube-types, functions and efficiency.

Unit and specific quantities, governing, Cavitation, Water hammer, Surge tank.

UNIT 6:

Pumps :

Centrifugal pumps: Classification, working, work done, heads, efficiencies, losses. Specific speed, pumps in series and parallel.

Reciprocating pumps: Classification, working, work done, slip, indicator diagrams, Effect of acceleration and friction on work done.

TEXT BOOKS:

1. Hydraulics And Fluid Mechanics Including Hydraulics Machines (In Si Units)– Modi & Seth,20th edition, Standard publishers, 2015.
2. Fluid mechanics and Hydraulic machines – R.K. Bansal,1st edition, Lakshmi Publications,2011

REFERENCES:

1. Fluid Mechanics And Fluid Power Engineering, D.S Kumar, 9th edition, , S.K Kataria publishers, 2016
2. Fluid Mechanics and Hydraulics by Jack.B. Evett –,3rd edition, TMH, 2004
3. Fluid Mechanics – Yunus A.Cengel & John.M.Cimbala,2nd edition, TMH publications, 2013

V18MET09	MATERIALS ENGINEERING	L	T	P	C
		3	0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Explain the types of bonds in solids and crystallization of metals.	K2
CO2	Construct phase diagrams for the study of alloys and phase transformation reactions.	K2
CO3	Distinguish Cast Irons and Steels.	K2
CO4	Identify suitable heat treatment process to achieve desired properties of metals and alloys.	K2
CO5	Discriminate different non ferrous metals and their alloys	K2
CO6	Illustrate the properties and applications of composites and ceramic materials and understand the concepts of powder metallurgy.	K2

Unit 1

Structure of Metals: Properties of metals, Types of Bonds in Solids, Crystal geometry - Space Lattices, Unit cells, Crystal Structure, Miller indices. Imperfections in crystals- Line defects, Point defects, Surface defects. Crystallization of metals, grain, grain boundaries and their properties.

Constitution of alloys: Necessity of alloying, types of solid solutions, Hume Rotherys rules.

Unit 2

Equilibrium Diagrams: Experimental methods of construction of equilibrium diagrams, phase rule, Isomorphous alloy systems, Lever rule, eutectic systems, peritectic reaction. Transformations in the solid state – allotropy, eutectoid, peritectoid reactions, relationship between equilibrium diagrams and properties of alloys. Study of important binary phase diagrams of Cu-Ni, Al-si, and Fe-Fe3C.

Unit 3

Production of Iron & Steels: Working principle of Blast Furnace, Cupola furnace, Open hearth furnace , Electric arc furnace and Induction furnace.

Cast irons and alloy steels: Types of Cast irons- White, Grey, Malleable and Nodular Cast Irons, Properties and application of cast irons, Effect of alloying elements on structure and properties of steels , Properties and uses of Silicon and Hadfield Manganese steels, High speed steels and Stainless steel.

Unit 4

Heat treatment of Ferrous and Non Ferrous alloys: Types of heat treatment processes, Annealing, normalizing, hardening, TTT diagrams, tempering, hardenability, surface - hardening methods, Age hardening treatment.

Unit 5

Non-ferrous metals and alloys: Properties and uses of important non-ferrous metals like Cu, Al, Pb, Sn, Zn. Study of important non-ferrous alloys: Brass & Bronzes, Bearing alloys, Al alloys & Ti alloys.

Unit 6

Composite materials and Ceramics: Classification of composites, methods of manufacturing of composites – stir casting method, hand layup process, filament winding process.

Properties and applications of crystalline ceramics, glasses, cermets, abrasive materials and nano-materials

Powder metallurgy: Introduction, steps in powder metallurgy.

TEXT BOOKS:

1. Introduction to Physical Metallurgy/ Sidney H. Avner/ 2nd edition ,McGraw Hill Education (India) Private Limited/2016
2. Materials Science and Engineering/ William D Callister (Adapted by R. Balasubramaniam) /Wiley Inida (P) Ltd/ 2007
3. Material Science and Metallurgy/ Dr. V.D.Kodgire/40th edition, Everest Publishing House/2017

REFERENCE BOOKS

1. Materials Science and Engineering/ V. Raghavan /(5th Edition) Prentice-Hall of India Pvt. Ltd/2004.
2. Essential of Materials science and engineering /Donald R.Askeland/ 2nd edition Thomson/2014
3. Engineering mechanics of Composite Materials/Isaac M.Daniel, Ori Ishai/ 5th edition/Oxford Publications/2015.

V18MEL02	MACHINE DRAWING	L	T	P	C
		0	0	3	1.5

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Describe the drawing and develop ability to represent any matter/symbol with the help of picture in CAD.	K2
CO2	Develop primary knowledge on machine drawings and the representation of tolerance on dimensions.	K3
CO3	Show the hidden objects by sectional views of different machine parts and their geometry representation.	K3
CO4	Identify the different joining methods to assemble the machine parts .	K3
CO5	Develop skill to produce assembly drawings from detailed drawings of machines parts.	K3
CO6	Construct press tools and their assemblies in 3-D.	K3

PART-A

Sectional views : Orthographic projection of different types of composite bodies. Sectional views, Full sectional, half sectional views of simple machine parts, Screwed fastenings – nomenclature of threads, conventional representation of threads, Hexagonal and square headed bolts and nuts, Various types of machine screws and set screws, Foundation bolts.

Keys, Shaft couplings, Riveted joints, Bearings Sunk key, saddle key, feather key, sleeve coupling, flanged coupling, lap and but riveted joints and plummer block,Lock nuts, Cotter joints

PART-B

AutoCAD Mechanical Desktop, draw, modify, dimension tool bars, annotations, Layers,ISI conventions in drawing, representation of Materials, machine parts, welded joints, riveted joints, methods of indicating notes on drawings. Sketcher, part modeling, assembly, drafting commands in CATIA.

Assembly drawings in 2D using AUTOCAD: Stuffing box, steam engine connecting rod, Eccentric, single tool post, Lathe tail stock, machine vice, knuckle joint and Screw jack.

Assembly drawings in 3D Using CATIA: Foot step bearing, square tool post, piercing and blanking tool, V-bending tool and box jig.

TEXT BOOKS:

1. Machine drawing _ K.L. Narayana, P. Kannaiah& K.Venkata reddy, 1st edition, Radiant, 2016
2. Tool Engineering & Design _ G.R. Nagpal/Khanna publishers, 1st edition, Khanna Publishers,2009
3. Machine Drawing with Auto CAD- Pohit and Ghosh, 1st edition, Pearso, 2017

REFERENCES:

1. Machine Drawing by Nagpal,1st edition, khanna publishers, 2009
2. Machine drawing, Ajeet Singh, 2nd edition, TMH, 2016
3. Machine drawing with autocad, Pohit; Goutam, 1st edition, Pearson, 2017.

V18MEL03	FLUID MECHANICS AND FLUID MACHINES LAB	L	T	P	C
		0	0	3	1.5

COURSE OUTCOMES:
After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Employ the basic principles of Fluid mechanics to assess discharge with different devices and different losses in a pipe line.	K3
CO2	Calculate the performance parameters of Reciprocating and Centrifugal pumps.	K3
CO3	Calculate the performance parameters of different types of turbines.	K3

1. Determination of friction factor for the given pipe line.
2. Determination of loss of head due to sudden contraction.
3. Determination of force exerted by a jet on a vane.
4. Calibration of Venturimeter.
5. Calibration of Orificemeter.
6. Calibration of Turbine flow meter.
7. Determination of performance parameters of Reciprocating pump.
8. Determination of performance parameters of Single stage Centrifugal pump.
9. Determination of performance parameters of Multi stage Centrifugal pump.
10. Determination of performance parameters of Pelton wheel.
11. Determination of performance parameters of Francis Turbine.
12. Determination of performance parameters of Kaplan Turbine.

ADD ON EXPERIMENTS:

1. Determination of loss of head due to sudden expansion.
2. Verification of Bernoulli’s theorem.

REFERENCES:

1. Fluid Mechanics and Fluid Machines lab – College lab manual.
2. Hydraulics And Fluid Mechanics Including Hydraulics Machines (In Si Units) – Modi & Seth,20th edition, Standard publishers, 2015.

V18MET07	APPLIED THERMODYNAMICS	L	T	P	C
		3	0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Illustrate the working of various IC engines.	K2
CO2	Classify the working of various steam boilers, mountings, accessories and draught systems.	K2
CO3	Demonstrate about steam nozzles	K2
CO4	Calculate the performance of steam turbines	K3
CO5	compute the performance of steam condensers	K3
CO6	Illustrate the performance parameters of gas turbines	K3

UNIT – I

I. C. ENGINES : Classification, Working principles, Valve and Port Timing Diagrams, Engine systems, Fuel, Carburettor, Fuel Injection System, Ignition, Cooling and Lubrication, principle of wankle engine.

UNIT – II

Steam boilers

Classification, working principles of L.P & H.P boilers with sketches & applications, mountings and accessories, working principles, boiler horse power, Process Steam, equivalent evaporation, efficiency and heat balance, draught, classification- natural and artificial draught.

UNIT – III

Steam Nozzles:

Type of nozzles- Applications - Flow through nozzles- Condition for maximum discharge- Nozzle Efficiency- Super saturated flow in nozzles, Wilson's line.

UNIT – IV

Steam Turbines: Classification, Applications, impulse turbine, mechanical details, velocity diagram, effect of friction, power developed, axial thrust, blade or diagram efficiency, condition for maximum efficiency, velocity compounding, pressure compounding and velocity & pressure Compounding, combined velocity diagram for a velocity compounded impulse turbine.

Reaction Turbine: Applications , Mechanical details, principle of operation, thermodynamic analysis of a stage, degree of reaction, velocity diagram, Parson's reaction turbine, condition for maximum efficiency.

UNIT – V

Steam Condensers:

Classification of condensers- Jet, Evaporative and surface condensers-Applications - Vacuum and its Measurement- Vacuum efficiency- Sources of air leakage in condensers- Condenser Efficiency- Daltons law of partial pressures- Determination of mass of cooling water.

UNIT – VI

Gas Turbines: Applications, Simple gas turbine plant, ideal cycle, essential components, parameters of performance, actual cycle, regeneration, inter cooling and reheating, closed and open cycles, merits and demerits.

Text Books:

1. Engineering Thermodynamics, PK Nag 4th Edn, TMH.
2. Thermodynamics. An engineering Approach with student resources/ DVD. Y.A. Cengel & M.A. Boles/ 8th Edn-McGrawHill/2016
3. Gas Turbines / V Ganesan/3rd edition, TMH/2016

References:

1. Thermal Engineering/ R.K.Rajput/4th edition/ Laxmi Publications/2010
2. Applied Thermodynamics-II / R. Yadav./6th edition, Central Publishing House/2016
3. Gas turbines and Propulsive Systems/1st edition, Dhanpat Rai/2014
4. Tables of the properties of steam and other vapours and temperature-Entropy table by Cecil H Peabody by Forgotten books
5. Steam tables by C.P Kodandaraman – New age International

V18MET08	MECHANICS OF SOLIDS	L	T	P	C
		3	1	0	4

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Explain concept of stress and strain of composite bars.	K2
CO2	Find the shear force and bending moment in a beams.	K3
CO3	Calculate flexural and shear stresses in a beam and understand applications of various springs.	K3
CO4	Estimate the principal stresses in structural members.	K3
CO5	Determine the torsional rigidity of shaft and buckling load capacity of columns.	K3
CO6	Estimate the hoop and longitudinal stress and strains in thin and thick cylinders.	K3

UNIT-I Simple stresses & Strains:

Definitions of stress and strain – types of stresses and strains – Elasticity – Hooke's law – Stress – Strain diagram for Mild steel – working stress- factor of safety- Lateral strain – Poisson's ratio and volumetric strain – Elastic Modulii and the relationship between elastic constants – Bars of varying section – composite bars – temperature stresses.

Strain Energy

Definition – Resilience – Strain Energy due to gradually applied; suddenly applied and impact loads – simple applications.

UNIT-II Shear Force & Bending Moment Diagrams:

Definition of beam – Types of beams – concept of SF and BM – SF &BM diagrams for cantilever, Simple support and overhanging beams subjected point loads, Uniform distributed load(UDL), Uniformly varying loads– point of contra flexure – Relationship between S.F, BM and rate of loading.

UNIT-III Flexural Stresses:

Theory of simple Bending – Assumptions–Derivation of Bending equation - Neutral axis – Determination of bending stresses – section modulus of rectangular, Circular sections (Solid and Hollow), I and T channel sections.

Mechanical Springs: Introduction , classification , Applications **,** Stresses and deflections of helical springs – extension -compression springs .

UNIT-IV Principal Stresses and Strains:

Introduction-stresses on an inclined section of a bar under axial loading- compound stresses-Normal and tangential stresses on an inclined plane for biaxial stresses-Two perpendicular normal stresses –representation of stress on Mohrs circle diagram, Introduction to theories of Failure.

UNIT-V

TORSION: Introduction**-** Derivation of torsion equation and its assumptions. Applications of the equation of the hollow and solid circular shafts, torsional rigidity. Combined torsion and bending of circular shafts.

COLUMNS: Buckling and Stability, Columns with Pinned ends, Columns with other support Conditions, Limitations of Euler's Formula, Rankine'sFormula.

UNIT-VI

THIN CYLINDERS: Thin seamless cylindrical shells – Derivation of formula for longitudinal and circumferential stresses – hoop, longitudinal and Volumetric strains – changes in dia, and volume of thin cylinders – Riveted boiler shells – Thin spherical shells.

THICK CYLINDERS: –lame's equation – cylinders subjected to inside & outside pressures –compound cylinders.

Text Books:

1. Solid Mechanics, by Popov/PHI publications 2nd edition /2017
2. Mechanics of Materials/Gere and Timoshenko,/ TMH 4th edition /2010
3. Strength of materials/ S.Ramamrutham/Dhanpat rai publishers 1st edition /2016

Reference Books:

1. Strength of materials/ R.K.Bansal/ Laxmi Publications 5th edition /2017
2. Introduction to Solid Mechanics / Irving H Shames/ 4th edition PEARSON /2014
3. Strength of materials /Young,D.H. Timoshenko, Stephen/CBS publishers /2002

V18MET06	THEORY OF MACHINES-I	L	T	P	C
		3	0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Explain the inversion of the four bar, slider crank and double slider chains.	K2
CO2	Determine the velocities and accelerations in mechanisms by graphical method.	K3
CO3	Explain the working of copying mechanism, straight line motion mechanisms, steering gears and Hooke's joint.	K2
CO4	Draw the cam profiles for given follower motions.	K3
CO5	Compare tooth profiles for gears and compute performance characteristics.	K2
CO6	Describe gear trains and compute the velocity ratio and torque in gear trains and calculate various parameters related to belts.	K3

UNIT-I

Mechanisms :

Introduction, terminology, definitions and assumptions, planar, spherical and spatial mechanisms, mobility, classification of mechanisms, kinematic inversion, inversions of four bar chain, slider crank chain and double slider chain, Grashoff's law, mechanical advantage.

UNIT-II

Velocity Analysis :

Introduction, Absolute and relative motions, Vectors, Addition and subtraction of vectors, Motion of a link, Four-link mechanism, Velocity diagrams, Angular velocity of links, Velocity of rubbing, Slider-crank mechanism, crank and slotted lever mechanism. Instantaneous center, Kennedy's theorem, Locating I-centers, Angular velocity ratio theorem.

Acceleration Analysis:

Introduction -Acceleration, four-link mechanism, Acceleration of intermediate and offset points, Slider-crank mechanism, Coriolis component, Crank and slotted lever mechanism using graphical method, Klein's Construction.

UNIT-III

Lower Pairs: Pantograph, Exact straight line mechanism condition, Peaucellier, Hart Scott-

Russel mechanisms. Approximate straight line mechanisms, Grasshopper, Watt, Chebyshev, Robert mechanisms. Steering gears-condition for correct steering, Davis, Ackerman steering gears, Hooke's joint-velocity ratio, angular acceleration of driven shaft, double Hooke's joint.

UNIT-IV

Cams: Types of cams and followers, types of follower motion, velocity and acceleration diagrams, profile of cams.

UNIT-V

Gears: Classification of gears, spur gears- terminology, fundamental law of toothed gearing, involute and cycloidal profile, Path of contact ,arc of contact, contact ratio, minimum number of teeth, interference and methods of avoiding interference, rubbing velocity.

UNIT-VI

Gear Trains: Introduction – Types – Simple – compound and reverted gear trains – Epicyclic gear train.

Belt drives: Belt and rope drives, open and crossed belt drives, velocity ratio, slip, material for belts and ropes, crowning of pulleys, ratio of friction tensions, power transmitted, centrifugal effect on belts, maximum power transmitted by a belt, initial tension.

Text Books:

1. Theory of Machines' Rattan SS, Tata McGraw Hill Education Publishers, 4th Edition 2015.
2. Theory of Machines / Beven Thomos / CBS publication, 3rd edition /2005

References:

1. Theory of Machines / R.K.Bansal/ Laxmi Publications 5th edition /2016
2. Mechanisms of Machines, V Ramamurthy, Narosa publishing House, Reprint ,2019
3. Theory of Machines by R S KHURMI, S CHAND Publications, 1st Edition, 2011.
4. Theory of Machines and Mechanisms, Ballaney P, Khanna publications,1st Edition,2011.

V18MET14	MANUFACTURING PROCESSES	L	T	P	C
		3	0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Understand fundamentals of casting-patterns and its materials, Gating System	K3
CO2	Choose the elements of casting and introduce other casting processes	K3
CO3	Distinguish various arc and solid state welding processes and select a suitable process based on the application and requirements	K3
CO4	Understand the principles of advanced welding processes and their applications, welding defects and its testing methods	K3
CO5	Establish the knowledge on Hot working and Cold Working Process	K3
CO6	Understanding of various bulk forming processes, sheet metal forming and processing of plastics.	K3

Unit I:

Casting - Steps involved in making a casting – Advantage of casting and its applications.

Patterns and Pattern making – Types of patterns – Materials used for patterns, pattern allowances and their construction

Principles of Gating_ Gating ratio and design of Gating systems

Unit II:

Melting and solidification:

Methods of melting -- Crucible melting and cupola operation, steel making processes.

Solidification of casting – Concept – Solidification of pure metal and alloys, short & long freezing range alloys.

Risers – Types function and design, casting design considerations,

Special casting processes -- 1) Centrifugal 2) Die 3) Investment.

Unit III:

Welding: Classification of welding process types of welds and welded joints and their characteristics, design of welded joints --Gas welding, ARC welding, Forge welding, resistance welding, Thermit welding and Plasma (Air and water) welding.

Unit IV:

Special welding processes

Inert Gas welding - TIG & MIG, welding, Friction welding, Induction welding, Explosive welding, Laser welding, Soldering & Brazing. Heat affected zones in welding; welding defects – causes and remedies – destructive non-destructive testing of welds.

Cutting of metals: Oxy – Acetylene Gas cutting, water plasma. Cutting of ferrous, non-ferrous metals.

Unit V:

Hot & cold working: strain hardening, recovery, recrystallization and grain growth, Comparison of properties of Cold and Hot worked parts

Rolling fundamentals – Theory of rolling, types of Rolling mills and products.

Extrusion of metals: Basic extrusion process and its characteristics. Hot extrusion and cold extrusion - Forward extrusion and backward extrusion – Impact extrusion Hydrostatic extrusion.

Drawing – Wire drawing and Tube drawing

Unit VI:

Bulk forming processes: Principles of forging – Tools and dies – Types Forging – Smith forging, Drop Forging – Roll forging – Forging hammers: Rotary forging – forging defects.

Sheet metal forming: Stretch Forming, Deep Drawing, Coining, Spinning, Blanking And Piercing – Bending And Forming, Stamping Spring Back And Remedies - Types Of Presses And Press Tools

Processing of plastics: Types of Plastics, Properties, applications and their Processing methods & Equipment (blow &injection moulding)

Text Books:

1. Manufacturing Engineering and Technology/ Kalpakjian, Serope;Steven, Schmid R./Pearson, 1st Edition 2013.
2. Manufacturing Technology / P.N. Rao/ Tata McGraw Hill, 4th Edition 2016.

References:

1. Production Technology / R.K. Jain /Khanna publishers,17th edition 2004.
2. Principles of Metal Castings / Richard W Heine and Roenthal. McGraw Hill Education, 2nd Edition 2017.
3. Welding Process and technology /Dr. Paramar / Khanna Publishers,3rd Edition.
4. Production Technology /Sarma P C / S.Chand Publications,4th Edition 2014.

V18MET11	INSTRUCTIONMENTATION AND CONTROL SYSTEMS	L	T	P	C
		3	0	0	3

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Discuss about the basic concepts of Linear measuring Instruments	K2
CO2	Explain various types of Temperature and Pressure measuring Instruments	K2
CO3	Understand the working of flow, Speed, Acceleration and Vibration measuring devices	K2
CO4	Illustrate various types of Strain measuring Instruments	K2
CO5	Explain the Humidity, Force, Torque, and Power measuring Instruments	K2
CO6	Describe various types of control system and its Elements	K2

UNIT – I

Basic principles of measurement – Generalized configuration, Dynamic performance characteristics – sources of error and elimination methods.

Displacement Measurement: Principle and construction of various transducers – piezo electric, inductive, capacitance, resistance, ionization and photo electric transducers, calibration procedures.

UNIT – II

Temperature Measurement : Thermometry , scales of temperature, electrical resistance – thermister – thermocouple – pyrometers.

Pressure Measurement : Working of Various instruments - dead weight pressure gauge , bourdon pressure gauges, bellows – diaphragm gauges.

Low pressure measurement – Thermal conductivity gauges – Ionization pressure gauges, Mcleod pressure gauge.

UNIT – III

Level Measurement : Working of Various instruments – Capacitative, Ultrasonic, Magnetic, Cryogenic fuel level indicators – bubler level indicators.

Flow Measurement- Rotameter, Magnetic, Ultrasonic, hot – wire anemometer, Laser Doppler Anemometer (LDA).

Speed Measurement : Types of Mechanical tachometers, electrical tachometers, stroboscope and noncontact type of tachometer

UNIT – IV

Acceleration And Vibration Measurement: Principles of seismic instruments – Vibrometer and Accelerometer

Strain Measurements: Various types of strain measuring instruments – electrical strain gauge – gauge factor – use of resistance strain gauge for measuring bending compressive and tensile strains , strain gauge rosettes.

UNIT – V

Introduction to Elements Of Control Systems : classification, Elements of control systems, concept of open loop and closed loop systems, Examples and application of open loop and closed loop systems, Feed-Back Characteristics.

UNIT – VI

Control Systems Components: Servomechanisms- Transfer Function of DC Servo motor and AC Servo motor,working principle of stepper motor, applications (position, temperature and speed control systems with block diagrams).

Microprocessor and Microcontrollers : Introcution,basic concepts and various types controllers

Text Books:

1. Measurement Systems: Applications & design / D.S Kumar/ Metropolitan/1st/2015
2. Mechanical Measurements / BeckWith, Marangoni,Linehard/ Pearson/6th/2018

References:

1. Measurement systems: Application and design/Doeblin Earnest. O. Adaptation/ TMH/6th edition,
   2018
2. A course in mechanical measurements and Instrumentation and control/

5. Mechanical and Industrial Measurements / R.K. Jain/ Khanna Publishers/2008

V18MEL05	Mechanics of Solids & Materials Engineering Lab	L	T	P	C
		0	0	3	1.5

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Assess the Mechanical properties of different metals.	K3
CO2	Examine the microstructures of different ferrous and non ferrous metals.	K3
CO3	Identify the effect of heat treatment and cooling rates on the properties of steels.	K4

NOTE: Any 6 experiments from each section A and B.

(A) MECHNICS OF SOLIDS LAB:

1. Direct tension test
2. Bending test on
a) Simply supported beam
b) Cantilever beam
3. Torsion test
4. Hardness test
a) Brinells hardness test
b) Rockwell hardness test
5. Test on springs
6. Compression test on cube
7. Impact test
8. Punch shear test

(B) METALLURGY LAB:

1. Preparation and study of the Micro Structure of pure metals like Iron, Cu and Al.
2. Preparation and study of the Microstructure of Mild steels, Medium carbon steels, high – C steels.
3. Study of the Micro Structures of Cast Irons.
4. Study of the Micro Structures of Non-Ferrous alloys – Brass and Bronze.
5. Study of the Micro structures of Heat treated steels.
6. Hardenability of steels by Jominy End Quench Test.
7. To find out the hardness of various treated and untreated steels.

References:

1. Strength of materials, S.S.Bhavikatti Vikas Publications, 4th edition, 2013.
2. Material Science and Metallurgy, Dr. V.D.Kodagire, Everest Publishing House, 40 th Edition, 2017.

V18MEL11	MANUFACTURING PROCESSES LAB	L	T	P	C
		0	0	3	1.5

COURSE OUTCOMES:

After successful completion of the course, the student will be able to:

		Knowledge Level
CO1	Design and Make a pattern.	3
CO2	Test the properties of sand and prepare a casting.	3
CO3	Perform Arc welding, Spot welding, TIG, MIG welding and Plasma Arc Cutting operations	3
CO4	Perform blanking, piercing, Drawing and bending operations.	3
CO5	Operate injection and blow moulding machines to manufacture plastic components	3

METAL CASTING:

Pattern Design and pattern making using wood turning lathe
Sand properties testing for Compression strength and permeability.
Mould preparation, melting and casting.

WELDING:

ARC Welding Lap, Butt & T- Joint
Spot Welding –Lap &Butt Joint
TIG Welding -Butt Joint
MIG Welding- Butt Joint
Plasma Arc Cutting

METAL FORMING:

Blanking & Piercing operation by using Progressive Die
Bending and Drawing operation

PROCESSING OF PLASTICS

Injection Molding
Blow Molding

Members Present:

1.	Dr. Guduru VNSR Ratnakara Rao	Principal & Chairman
2.	Prof. R. Srinivasa Rao, DAP, JNTUK	Member
3.	Prof L Sumalatha, DE,JNTUK	Member
4.	Prof V.V. Subba Rao, Principal, UCE, JNTUK Narasaraopeta	Member
5.	Prof.P.Siva Pullaiah, Pro-Vice Chancellor, GITAM	Member
6.	Prof.B.V.S.S.S. Prasad, IIT Madras	Member
7.	Prof.S.R.K.Reddy, Gudlavelleru Engg.College	Member
8.	Sri B.V.Raghavaiah, Director (Retd.), CPRI, Bhopal	Member
9.	Dr. N.S.C. Babu, Executive Director, SETS	Member
10.	Dr.D.Sudha Rani, HOD, EEE	Member
11.	Dr.M.V.Ramesh, HOD, ME	Member
12.	Dr.E.Kusuma Kumari, HOD, ECE	Member
13.	Dr.D.Jaya Kumari, HOD, CSE	Member
14.	Dr.G.V.Subba Raju, HOD, MBA	Member
15.	Sri.N.Rajasekhar, HOD, BS&H	Member
16.	Dr. T. Sujani, Head Training	Member
17.	Sri P.Sita Rama Raju, Section Head, Physics	Member
18.	Sri A Vamsi Subbarayan Section Head, Chemistry	Member
19.	Sri.K.N.H.Srinivas, Assoc.Prof., ECE	Member
20.	Dr. G.Radha Krishnan, HOD I/c, CE	Member
21.	Sri S Amjed Ali, Section Head, Mathematics	Invited Member
22.	Sri P N V GopalaKrishna, Head Placements	Invited Member

23.	Sri Ch V S R GopalaKrishna , DCE	Invited Member
24.	Sri Ch Apparao, Director Technical	Invited Member
25.	Dr.Ch.Rambabu, Dean (SA)	Member Secretary

Members Absent

1.	Dr.J.Srihari Rao, Director	Member
2.	Sri Lokam Prasad, CEO,Miracle Software Systems	Member

Pedatadepalli, **TADEPALLIGUDEM – 534 101.** W.G.Dist.**(A.P)**

Fourth Meeting of Academic Council

Minutes of the Fourth Academic Council Meeting held on 30/08/2020.

Item No.1: Welcome address by Principal& Introduction of members.

Principal **Prof. Guduru VNSR Ratnakara Rao** welcomed the members and chaired the meeting.

Item No.2: Review of institute progress for the Academic Year 2019-2020.[Details aregiven in Annexure-I **(Page No. 06**)]

The council reviewed the progress of the institute for the academic year 2019-2020 and appreciated.

Item No.3: Action taken report on the minutes of the previous meeting (held on02.06.2019).

The council approved the action taken report presented in Annexure-II **(Page No. 08)**

Item No.4: Approval of the minutes of the meeting of BOS ofVariousdepartments:

a. Minutes of the 3rdmeeting of the BOS of Electrical and Electronics Engineering (dated: 30.05.2020). [Details are given in Annexure-III **(Page No.13)**]
b. Minutes of the 3rd meeting of the BOS of Computer Science & Engineering (CSE) (dated: 31.05.2020). [Details are given in Annexure-IV **(Page No. 60)**]
c. Minutes of the 3rd meeting of the BOS of Mechanical Engineering (ME) (dated: 03.06.2020). [Details are given in Annexure-V **(Page No.113)**]
d. Minutes of the 3rd meeting of the BOS of MBA (dated: 04.06.2020). [Details are given in Annexure-VI **(Page No152)**]
e. Minutes of the 3rd meeting of the BOS of Electronics & Communication Engineering (ECE) (dated: 10.06.2020). [Details are given in Annexure-VII **(Page No. 158)**]
f. Minutes of the 3rd meeting of the BOS of Civil Engineering (CE) (dated: 29.06.2020). [Details are given in Annexure-VIII **(Page No.204)**]
g. Minutes of the 3rd meeting of the BOS of Combined Mathematics &English (dated: 01.08.2020). [Details are given in Annexure-IX **(Page No. 246)**]

The council approved the minutes of the meeting of BOS of Various Departments.

Item No.5: Amendments to **UG V18** Academic Regulations

The proposed amendments are approved by the council. Given in **Annexure-X** **(Page No. 254)**

Item No.6: Approval of Honor's/ Minor degree in Data Science

The proposed Academic regulations for Honor's/ Minor degree in Data Science are approved by the council. Given in **Annexure-XI** **(Page No 255)**

Item No.7: Amendments to **MBA V18** Academic Regulations

The proposed amendments are approved by the council. Given **Annexure-XII** **(Page No. 258)**

Item No.8: Any other item with the permission of the Chair

a. Presented Result Analysis for the Academic Year 2019-2020given in **Annexure XIII (Page No. 259)**
b. Proposed Academic Calendar B.Tech V Sem (A.Y 2020-2021) 2018 Admitted batch given in **Annexure XIV (Page No. 264)**
c. Proposed Academic Calendar B.Tech III Sem (A.Y 2020-2021) 2019 Admitted batch given in **Annexure XV (Page No. 265)**
d. Proposed Academic Calendar MBA III Sem (A.Y 2020-2021) 2020 Admitted batch given in **Annexure XVI (Page No. 266)**
e. Proposed Internal Evaluation for A.Y 2019-2020 given in **Annexure-XVII (Page No.267)**

The council

1) Reviewed result analysis
2) Approved the academic calendars for 2020-21 academic year and modifications in Internal Evaluation for A.Y 2019-2020

The meeting concluded with vote of thanks by the Member Secretary.

Annexure-I

Progress Report for the Academic Year 2019-2020

1. One of our student Mahalakshmi Vardineedi bearing roll number 16A81A05N5 got placed in Amazon with Rs. 18.00 LPA package.
2. Two Major Research Projects worth Rs.01.08 Crores were sanctioned by Department of Science & Technology, Govt. of India, New Delhi under SEED Scheme. One Project worth Rs.76.00 lakhs to EEE Dept. and 2nd Project worth Rs.32.00 lakhs to ECE Department.
3. Ministry of MSME, Govt. of India approved our institution as MSME Host Institute/Business Incubator in the month of November 2019 and a total of 19 business ideas were submitted to MSME by our students in the first phase and 5 business Ideas in the second phase. Outside Entrepreneurs submitted 5 Ideas.
4. JNTUK, Kakinada recognized the Departments of CSE & ME as Research centre for 2 years from 2019-20.
5. Mrs. G. Loshma, Department of CSE was awarded Ph.D by JNTUH, Hyderabad, Mr. G. Radhakrishnan, Department of Civil Engineering was awarded Ph.D by JNTUK, Kakinada. Mr O Sri Nagesh was awarded Ph.D by Lingayya's University.
6. A total of 42 faculty members have registered with NPTEL for 37 various courses and successfully certified.
7. A total of 105 faculty from various departments attended FDPs, Workshops upto march 2020.
8. 13 Guest Lectures were arranged for the benefit of students.
9. 25 FDPs were conducted by all the departments upto March 2020.
10. Students from various departments visited nine different industries as a part of Industrial Visit.

14. 4 Patent publications and two chapters are published by faculty members.
15. Under the aegis of SPDP Centre (Sponsored by AICTE), a 15 hour (One hour per day) certification program on "Basic Interactive Skills", Internet of Things and AI & ML were conducted for SC, ST students of our College.
16. 247 students are placed in 30 Companies so far.
17. Submitted AICTE online application for the Extension of Approval with reduction in intake in MBA from 120 to 90 and Diploma in Civil Engineering from 120 to 60 w.e.f. from the academic year 2020-21.

18. Our college NSS UNIT organized a blood donation camp on 12/02/2020 in association with Red Cross Organization and donated 30 units of blood. Sahaya (Social Service)in the department of CSE has done 5 social service activities.
19. A total of 26 Social Service Activities were organized by our NSS UNIT.
20. University Innovation Fellowship was awarded to 4 students in 2020 by Stanford University.
21. An MOU is signed with SRKR, Bhimavaram to associate with their AICTE Magadarshan Scheme.
22. Submitted 12 proposals to AICTE under AQIS Scheme in Dec’ 2019/ Jan’ 2020.Recently got the approval for 2 week Faculty Deveropment Programme (FDP) under AQIS 2019-20 during the financial Year 202O-2021 to ECE Department and Approval for MODROPS to CSE Department.
23. Submitted 3 proposals DST-SEED-TIDE Scheme
24. Physical Education Department has conducted Intra Hostel Sports & Games meet in which more than 450 students have actively participated. 12 students are now the members of the JNTUK University Teams in various games & sports.
25. One day workshop on ‘Gender Sensitization – Equal Opportunities’ was conducted on the occasion of International Women’s Day on 8th March, 2020 with students & staff.
26. Institute ranked 54th in ARIIA-2020 announced on 18th August 2020.

Annexure-II

Minutes of the Third Academic Council Meeting held on 02/06/2019

Item No.1: Welcome address by Principal& Introduction of members.

Principal, Prof. Guduru VNSR Ratnakara Rao welcomed the members and chaired the meeting.

Item No.2: To approve Action taken report on the minutes of the previous meeting held on 01.07.2018.

The Council approved.

Item No.3: To approve of the minutes of the meeting of BOS of various departments.

The council approved minutes of BOS of various departments.

Item No.4: Any other item with the permission of the Chair

i) The proposed B.Tech, MBA III & IV Semester Academic Calendar was also presented and it was approved by the council.

Few modifications are done in the approved academic calendars of B Tech for the academic year 2019-2020 are given as follows

Approved Academic Calendars (2019-2020):

B.TECH III SEM			
Description	**From**	**To**	**Weeks**
Commencement of Class Work	10.06.2019		
I Unit of Instructions	10.06.2019	03.08.2019	8 Weeks
I Mid Examination	05.08.2019	10.08.2019	1 Week

II Mid Examination	29-04-2020	09-05-2020	11 Days
End Examinations	11-05-2020	26-05-2020	2 Weeks

M Tech I Semester			
Description	**From**	**To**	**Weeks**
Commencement of Class Work	25.09.2019		
I Unit of Instructions	25.09.2019	20.11.2019	8 Weeks
I Mid Examinations	21.11.2019	27.11.2019	1 Week
II Unit of Instructions	28.11.2019	23.01.2020	8 Weeks
II Mid Examinations	24.01.2020	30.01.2020	1 Week
Preparation & Practical’s	31.01.2020	06.02.2019	1 Week
End Examinations	07.02.2020	19.02.2020	2 Weeks
II Semester			
I Unit of Instructions	20.02.2020	16.04.2020	8 Weeks
I Mid Examinations	17.04.2020	23.04.2020	1 Week

II Unit of Instructions	24.04.2020	19.06.2020	8 Weeks
II Mid Examinations	20.06.2020	26.06.2020	1 Week
Preparation & Practical	29.06.2020	04.07.2020	1 Week
End Examinations	06.07.2020	17.07.2020	2 Weeks

M.Tech-III SEM			
Description	**From**	**To**	**Weeks**
Commencement of M.Tech III sem	22.07.2019		
Project Work Registration	22.07.2019	27.07.2019	1Week
Project Work Registration Approved by PRC	29.07.2019	03.08.2019	1Week
Project Work	05.08.2019	09.11.2019	10Weeks
First Review by PRC	11.11.2019	16.11.2019	1Week
Comprehensive Viva Voce	18.11.2019	23.11.2019	1Week
Submission of MOOCs Certificate	25.11.2019	30.11.2019	1Week
M.Tech-IV SEM			
Description	**From**	**To**	**Weeks**
Commencement of M.Tech IV sem	02.12.2019		
Project Work	02.12.2019	08.02.2020	10Weeks
Second Review by PRC	10.02.2020	15.02.2020	1Week
Project Work	17.02.2020	25.04.2020	10Weeks
Third Review by PRC	27.04.2020	02.05.2020	1Week
Project Work Thesis and Dissertation	04.05.2020	30.05.2020	4Weeks
Thesis Submission and Final Review by PRC	01.06.2020	06.06.2020	1Week
Project Viva Voce Exam	08.06.2020	03.07.2020	

Annexure-III

SRI VASAVI ENGINEERING COLLEGE
(AUTONOMOUS)
(Sponsored by Sri Vasavi Educational Society)
(Approved by AICTE, New Delhi &Recognized by UGC under section 2(f) & 12(B))
(Permanently affiliated to JNTUK, Kakinada, Accredited by NAAC with 'A' Grade)
Pedatadepalli, **TADEPALLIGUDEM–534 101.**W.G.Dist**. (A.P)**

Department of Electrical & Electronics Engineering (Accredited by NBA)

Date: 25-06-2020

The third meeting of Board of Studies in Department of Electrical and Electronics Engineering is held at 11.30 AM on 30-05-2020 though online mode using gotomeeting tool (Meeting ID: 661-077-229).

The following members are attended the meeting.

S.No.	Name	Designation	Role
1.	Dr. Sudha Rani Donepudi	Associate Professor, Head, Dept. of EEE, SVEC, Pedatadepalli.	Chairperson
2.	Dr. R. SrinivasaRao	Professor, Dept. of EEE, UCEK, JNTUK, Kakinada	Subject Expert Nominated By V.C.
3.	Dr. M. Sydulu	Professor, Dept. of EE, NITW, Warangal	Subject Expert Nominated By A.C.
4.	Dr. Y.P. Obulesu	Professor, School of EE, VIT, Vellore	Subject Expert Nominated By A.C.
5.	Er. B.N.V.R.C. Suresh Kumar	Retired AGM, PGCI, Hyderabad	Industry Expert Nominated By A.C
6.	Er. Ch. Vinay Kumar	Assistant Engineer, EHT Lines, APTRANSCO, Eluru.	Alumni
7.	Dr. Ch. Rambabu	Professor	Member
8.	Dr. P.V.V. Rama Rao	Professor	Member
9.	U. Chandra Rao	Sr. Asst. Professor	Member
10.	N. Sri Harish	Asst. Professor	Member

11.	Ch. V.S.R. Gopala Krishna	Sr. Asst. Professor	Member
12.	P.S.V.N. Sudhakar	Asst. Professor	Member
13.	V. Rama Narayana	Asst. Professor	Member
14.	K. Venkata Reddy	Asst. Professor	Member
15.	Mr. V.S. Aditya	Asst. Professor	Member

The following are the minutes of the meeting

Item No. 1: Welcome note by the Chairperson BOS

The HOD extended a formal welcome and introduced the members.

Item No. 2: Review of course structure for V & VI semesters of B. Tech under V18 Regulation.

Reviewed the course structure of V & VI semesters for UG (B.Tech-EEE) Programme of V18 Regulation and the following modifications have been done.

V Semester

- **Power System Protection**course (Course Code:V18EET11) is renamed as **Switchgear & Protection** (Course Code:V18EET12)
- **Renewable Energy Systems** course (Course Code:V18EET20) is move to Professional Elective-I in VI Semester and the same is replaced with **Power System Analysis** (Course Code:V18EET14)
- **Intellectual Property Rights & Patents** course is removed from MNC.
- Employability Skills– III is renamed as **Professional Communication Skills – III** (Course Code: V18ENT05)

VI Semester

- **JAVA Programming** course is move to open elective course offered by BoS of CSE and same is replaced with **Electrical Drives**(Course Code:V18EET17)
- **Power System Analysis** course is moved to V Semester and the same is replaced with **Professional Elective-II**
- **JAVA Programming Laboratory** course is replaced with **Electrical Simulation Laboratory**(Course Code:V18EEL09)
- **Technical Seminar**(V18EES01) is moved to VII Semester
- **Courses approved in Professional Elective I:**
    - Utilization of Electrical Energy
    - Advanced Control Systems
    - Renewable Energy Systems
    - Advanced Power Electronics

- **Courses approved in Professional Elective II:**
    - HVAC & HVDC Transmission
    - Programmable Logic Controllers &its Applications
    - Electrical Energy Conservation, Management & Auditing
    - Special Electrical Machines
- Employability Skills – IV is renamed as **Professional Communication Skills – IV** (Course Code: V18ENT06)

The details of the course structure for V & VI semesters of UG (B.Tech) Programme (EEE) are given in Annexure-EEE-I

Item No. 3: Approval of syllabi for the courses offered in V & VI semesters B. Tech under V18 Regulation.

Approved the syllabi for the courses offered in V & VI semesters B. Tech under V18 Regulation.

The syllabi for the courses offered in V and VI semesters of B.Tech Programme of under V18 Regulation is attached in Annexure-EEE-II.

Item No. 4: Approval of list of courses offering under Open Elective- I in VI semester B. Tech under V18 Regulation for all other branches and the approval of their detailed syllabi.

Approved the list of courses and syllabi for the courses offered as Open Elective in VI semester B. Tech for all other branches under V18 Regulation and the details are given in Annexure-EEE-III.

Item No. 5: Approval for offering minor degree in DATA SCIENCE offered by Department of Computer Science and Engineering for B. Tech Electrical and Electronics Engineering students under V18 Regulation

Approved to offer the minor degree in DATA SCIENCE for B. Tech Electrical and Electronics Engineering students under V18 Regulation.

Dr. Sudha Rani Donepudi

(BOS Chairperson)

Annexure-EEE-I

Course Structure Approved in BOS Meetings

Course Structure of Electrical and Electronics Engineering - V18 Regulation

V Semester						
S.No.	**Course Code**	**Name of the Course**	**L**	**T**	**P**	**Credits**
1.	V18EET12	Switchgear & Protection	3	-	-	3
2.	V18EET13	Power Electronics	3	1	-	4
3.	V18EET14	Power System Analysis	3	1	-	4
4.	V18EET15	Control Systems	3	1	-	4
5.	V18EET16	Signals and Systems	3	1	-	4
6.	V18MBT51	Managerial Economics and Financial Analysis	3	-	-	3
7.	V18EEL06	Electrical Machines Laboratory - II	-	-	2	1
8.	V18EEL07	Control Systems Laboratory	-	-	2	1
9.	V18ENT05	Professional Communication Skills– III	3	-	-	MNC
		Total Contact Hours(29)	**21**	**4**	**4**	**24**

Certification Course – Enrolment of Certification Course will be initiated during V Semester.

VI Semester						
S.No.	**Course Code**	**Name of the Course**	**L**	**T**	**P**	**Credits**
1.	V18EET17	Electrical Drives	3	1	-	4
2.	V18ECT23	Microprocessors & Microcontrollers	3	1	-	4
3.	V18EET18 V18EET19 V18EET20 V18EET21	Professional Elective - I ➢ Utilization of Electrical Energy ➢ Advanced Control Systems ➢ Renewable Energy Systems ➢ Advanced Power Electronics	3		-	3
4.	V18EET22 V18EET23 V18EET24 V18EET25	Professional Elective – II ➢ HVAC & HVDC Transmission ➢ Programmable Logic Controllers &its Applications ➢ Electrical Energy Conservation, Management & Auditing ➢ Special Electrical Machines	3	-	-	3
5.		Open Elective – I	3	-	-	3
6.	V18EEL08	Power Electronics Laboratory	-	-	2	1
7.	V18EEL09	Electrical Simulation Laboratory	-	-	2	1
8.	V18ECL10	Microprocessors & Microcontrollers Laboratory	-	-	2	1
9.	V18ENT06	Professional Communication Skills– IV	3	-	-	MNC

		Total Contact Hours(26)	**18**	**2**	**6**	**20**

Annexure-EEE-II

Syllabi for the courses offered in V & VI semesters B. Tech under V18 Regulation.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: V**

Course Code : V18EET12

Course Name : Switchgear & Protection **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C301.1	Understand the arc interruption phenomenon in circuit breakers of oil, air, vacuum, SF6 gas type.	(K2)
C301.2	Extract the constructional features and working of different types of electromagnetic relays	(K2)
C301.3	Use suitable relay for different types of protection	(K3)
C301.4	Relate protective schemes of generators and transformers against different faults	(K3)
C301.5	Apply suitable protective scheme for the protection of feeders & bus bars	(K3)
C301.6	Illustrate the operation of static & digital relays and the concept of grounding	(K2)

UNIT–I:CIRCUIT BREAKERS

Miniature Circuit Breaker(MCB)– Elementary principles of arc interruption– Restriking Voltage and Recovery voltages– Restriking phenomenon - RRRV– Average and Max. RRRV– Current chopping and Resistance switching– Introduction to oil circuit breakers– Description and operation of Air Blast– Vacuum and SF6 circuit breakers– CB ratings and specifications– Concept of Auto reclosing.

UNIT–II:ELECTROMAGNETIC PROTECTION

Relay connection – Balanced beam type attracted armature relay - induction disc and induction cup relays–Torque equation - Relays classification–Instantaneous– DMT and IDMT types.

UNIT-III: APPLICATIONS OF RELAYS

Over current and under voltage relays– Directional relays– Differential relays and percentage differential relays– Universal torque equation– Distance relays: Impedance– Reactance– Mho and offset mho relays– Characteristics of distance relays and comparison.

UNIT–IV:

GENERATOR PROTECTION

Protection of generators against stator faults– Rotor faults and abnormal conditions– restricted earth fault and inter turn fault protection– Numerical examples.

TRANSFORMER PROTECTION

Percentage differential protection– Design of CT's ratio– Buchholz relay protection–Numerical examples.

UNIT–V:FEEDER AND BUS BAR PROTECTION

Protection of lines: Over current Protection schemes – PSM,TMS - Numerical examples - Carrier current and three zone distance relay using impedance relays–Protection of bus bars by using Differential protection.

UNIT–VI:

STATIC AND DIGITAL RELAYS

Static relays: Static relay components– Static over current relays– Static distance relay– Micro Processor based digital relays.

NEUTRAL GROUNDING

Effects of ungrounded neutral on system performance– Methods of neutral grounding: Solid–resistance–Reactance–Arcing grounds and grounding Practices.

TEXT BOOKS:

1. Power System Protection and Switchgear by Badari Ram and D.N Viswakarma, TMH Publications, 2007
2. Power System Protection and Switchgear by B. Ravindranath, M. Chander, New Age International, 1977
3. Power system protection- Static Relays with microprocessor applications by T. S. Madhava Rao, TMH, 2017

REFERENCE BOOKS:

1. Fundamentals of Power System Protection by Paithankar and S. R. Bhide., PHI, 2003.
2. Art & Science of Protective Relaying – by C R Mason, Wiley Eastern Ltd, 1956.
3. Protection and Switch Gear by Bhavesh Bhalja, R.P. Maheshwari, Nilesh G.Chothani, Oxford University Press, 2013

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: V**

Course Code : V18EET13

Course Name : Power Electronics **[L : 3; T:1; P : 0 (4 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C302.1	Sketch the characteristics of various power semiconductor devices and Illustrate various firing circuits for SCR.	(K3)
C302.2	Operate various 1-phase AC-DC Controlled rectifiers for R and RL Loads and compare their performances.	(K3)
C302.3	Operate various 3-phase AC-DC Controlled rectifiers for R and RL Loads and compare their performances.	(K3)
C302.4	Understand the operation of various DC-DC Converters.	(K2)
C302.5	Explain the working of AC-AC Regulators and Estimate their output voltages.	(K3)
C302.6	Understand the operation of various DC-AC Converters for R & RL Loads.	(K2)

UNIT–I:POWER SEMICONDUCTOR DEVICES

Thyristors–Silicon Controlled Rectifiers (SCR's) –Characteristics of Power MOSFET and Power IGBT– Basic theory of operation of SCR–Static characteristics– Turn on and turn off methods–Dynamic characteristics of SCR– Snubber circuit design– Triggering circuits for SCR (R & RC).

UNIT–II:AC-DC SINGLE-PHASE CONVERTERS

1-phase half wave controlled rectifiers for R load and RL load with and without freewheeling diode;1-phase full wave controlled rectifiers: Center tapped and bridge configurations for R load and RL load with and without freewheeling diode under continuous and discontinuous conduction modes; Effect of source inductance in 1-phase fully controlled bridge rectifier with continuous conduction.

UNIT–III:AC-DC 3-PHASE CONVERTERS

3-phase half wave controlled rectifier with R and RL loads; 3-phase semi controlled rectifier with R and RL loads; 3-phase fully controlled rectifier with R and RL loads.

UNIT–IV:DC–DC CONVERTERS

Analysis of Buck, Boost and Buck-Boost converters in Continuous Conduction Mode (CCM) and Discontinuous Conduction Modes (DCM) – Output voltage equations using volt- sec balance in CCM & DCM output voltage ripple & inductor current, ripple for CCM only – Principle operation of forward and fly back converters in CCM.

UNIT – V:AC – AC REGULATORS

Static V-I characteristics of TRIAC and modes of operation; 1-phase AC-AC regulator: Phase angle control and integrated cycle control with R and RL loads for continuous and discontinuous conduction modes; 3-Phase AC-AC regulators with R load only; Transformer tap changing using antiparallel Thyristors.

UNIT – VI:DC–AC CONVERTERS

1-phase half and full bridge inverters with R and RL loads; 3-phase square wave inverters: 120 degree conduction and 180 degree conduction modes of operation; PWM inverters: Quasi-square wave, pulse width modulation, Sinusoidal pulse width modulation, Prevention of shoot through fault in Voltage Source Inverter (VSI); Current Source Inverter (CSI): Introduction to Auto Sequential Commutated Current Source Inverter (ASCCSI)

TEXT BOOKS:

1. Power Electronics: Circuits, Devices and Applications – by M. H. Rashid, Prentice Hall of India, 2nd edition, 1998
2. Power Electronics – by P.S. Bhimbra, Khanna Publishers, 2014
3. Power Electronics: Essentials & Applications by L. Umanand, Wiley, Pvt. Limited, India, 2009

REFERENCE BOOKS:

1. Elements of Power Electronics–Philip T. Krein, Oxford, 2015.
2. Power Electronics by M. D. Singh, Tata McGraw Hill India, 2006
3. Thyristorised Power Controllers – by G. K. Dubey, S. R. Doradla, A. Joshi and R. M. K.Sinha, New Age International (P) Limited Publishers, 1996.
4. Power Electronics handbook by Muhammad H.Rashid, Elsevier, 2018.
5. Power Electronics: converters, applications & design -by Nedmohan, Tore M. Undeland, Robbins by Wiley India Pvt. Ltd., 2018
6. Power Converter Circuits -by William Shepherd, Li zhang, CRC Taylor & Francis Group, 2017

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: V**

Course Code : V18EET14

Course Name : Power System Analysis **[L : 3; T:1; P : 0 (4 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C303.1	Compute Y_{BUS} matrix for a power system network	(K3)
C303.2	Find the load flow solution of a power system network using load flow methods	(K3)
C303.3	Develop the Z_{BUS} for a power system network	(K3)
C303.4	Calculate the fault currents for symmetrical faults	(K3)
C303.5	Compute the sequence components of currents for unbalanced power system network	(K3)
C303.6	Understand the concepts of power system stability	(K2)

UNIT –I:PER UNIT REPRESENTATION & TOPOLOGY

Per Unit Quantities–Single line diagram– Impedance diagram of a power system–Graph theory definition – Formation of element node incidence and bus incidence matrices – Primitive network representation – Formation of Y_{BUS} matrix by singular transformation and direct inspection methods.

UNIT –II: POWER FLOW STUDIES

Necessity of power flow studies – Derivation of static power flow equations – Power flow solution using Gauss-Seidel Method – Newton Raphson Method (Rectangular and polar coordinates form) –Decoupled and Fast Decoupled methods – Algorithmic approach – Problems on 3–bus system only.

UNIT –III:Z_{BUS} FORMULATION

Formation of Z_{BUS}: Partial network– Algorithm for the Modification of Z_{BUS} Matrix for addition element for the following cases: Addition of element from a new bus to reference– Addition of element from a new bus to an old bus– Addition of element between an old bus to reference and Addition of element between two old busses (Derivations and Numerical Problems).– Modification of Z_{BUS} for the changes in network (Problems).

UNIT – IV:SYMMETRICAL FAULT ANALYSIS

Transients on a Transmission line-Short circuit of synchronous machine(on no-load) - 3– Phase short circuit currents and reactances of synchronous machine–Short circuit MVA calculations -Series reactors – selection of reactors.

UNIT –V:SYMMETRICAL COMPONENTS & FAULT ANALYSIS

Definition of symmetrical components - symmetrical components of unbalanced three phase systems – Power in symmetrical components – Sequence impedances – Synchronous generator – Transmission line and transformers – Sequence networks –Various types of faults LG– LL– LLG and LLL on unloaded alternator–unsymmetrical faults on power system.

UNIT – VI:POWER SYSTEM STABILITY ANALYSIS

Elementary concepts of Steady state– Dynamic and Transient Stabilities– Description of Steady State Stability Power Limit–Transfer Reactance–Synchronizing Power Coefficient – Power Angle Curve and Determination of Steady State Stability –Derivation of Swing Equation–Determination of Transient Stability by Equal Area Criterion–Applications of Equal Area Criterion–Methods to improve steady state and transient stability.

TEXT BOOKS:

1. Power System Analysis by Grainger and Stevenson, Tata McGraw Hill, 1994.
2. Modern Power system Analysis – by I. J. Nagrath& D. P. Kothari: Tata McGraw–Hill Publishing Company, 2nd edition,2011.

REFERENCE BOOKS:

1. Power System Analysis – by A.R.Bergen, Prentice Hall, Inc, 1999.
2. Power System Analysis by HadiSaadat – TMH Edition, 2002.
3. Power System Analysis by B.R.Gupta, Wheeler Publications, 1998.
4. Power System Analysis and Design by J.Duncan Glover, M.S.Sarma, T.J.Overbye –Cengage Learning publications, 2017.

Programme : **B. Tech - Electrical & Electronics Engineering,** **Semester: V**

Electronics & Communication Engineering&

Electronics & Communication Technology

Course Code : V18EET15

Course Name : Control Systems **[L : 3; T:1; P : 0 (4 credits)]**

Course Outcomes

After successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C304.1	Determine the mathematical modelling of physical systems	(K3)
C304.2	Calculation of Time Domain Specification of first and second order systems and understand the effect of Controllers	(K3)
C304.3	Investigate the stability of closed loop systems using Routh's stability criterion and root locus method.	(K3)
C304.4	Find the stability of control systems using frequency response approaches.	(K3)
C304.5	Discuss the basic aspects of design and compensation of linear control systems using bode plot.	(K3)
C304.6	Analyze physical systems using state space approach.	(K4)

UNIT – I:MATHEMATICAL MODELING OF CONTROL SYSTEMS

Classification of control systems, Open Loop and closed loop control systems and their differences, Feed-Back Characteristics, transfer function of linear system, Differential equations of electrical networks, Translational and Rotational mechanical systems, Transfer Function of DC Servo motor - AC Servo motor- Synchro, transmitter and receiver - Block diagram algebra – Representation by Signal flow graph - Reduction using Mason's gain formula.

UNIT-II:TIME RESPONSE ANALYSIS

Standard test signals - Time response of first and second order systems - Time domain specifications - Steady state errors and error constants – Effects of various controllers

UNIT – III:STABILITY AND ROOT LOCUS TECHNIQUE

The concept of stability – Routh's stability criterion –limitations of Routh's stability –Root locus concept - construction of root loci (Simple problems)

UNIT–IV:FREQUENCY RESPONSE ANALYSIS

Introduction to Frequency domain specifications-Bode diagrams- transfer function from the Bode Diagram-Phase margin and Gain margin-Stability Analysis from Bode Plots, Polar Plots, Nyquist Stability criterion.

UNIT–V:CLASSICAL CONTROL DESIGN TECHNIQUES

Lag, Lead, Lag-Lead compensators, design of compensators – using Bode plots.

UNIT–VI:STATE SPACE ANALYSIS OF LTI SYSTEMS

Concepts of state, state variables and state model, state space representation of transfer function, Diagonalization-Solving the time invariant state equations- State Transition Matrix and it's Properties – Concepts of Controllability and Observability.

TEXT BOOKS:

1. Control Systems principles and design, M. Gopal, Tata McGraw Hill education Pvt Ltd., 4th Edition, 2014.
2. Automatic control systems, Benjamin C. Kuo, Prentice Hall of India,2ndEdition, 2014.

REFERENCE BOOKS:

1. Modern Control Engineering, Kotsuhiko Ogata, Prentice Hall of India, 2002.
2. Control Systems, ManikDhanesh N, Cengage Publications, 2012.
3. Control Systems Engineering, I.J.Nagarath and M.Gopal, Newage International Publications, 5th Edition, 2007.
4. Control Systems Engineering, S.Palani, Tata McGraw Hill Publications, 2009.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: V**

Course Code : V18EET16

Course Name : Signals and Systems **[L : 3; T:1; P : 0 (4 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C305.1	Understand and estimate various types of signals and systems.	(K2)
C305.2	Understand the basic principles of Sampling Theorem.	(K2)
C305.3	Understand the characteristics of LTI and LTV Systems and Determine the Transfer Function of LTI.	(K3)
C305.4	Understand the concepts of Cross-Correlation and Auto-Correlation of Functions	(K2)
C305.5	Differentiate Laplace Transform, Fourier Transform and apply the concept of Laplace Transform to certain signals using waveform synthesis.	(K4)
C305.6	Distinguish Laplace Transform, Fourier Transform and Z-Transforms by understanding the principles and properties of Z-Transform and its Inverse Transform.	(K4)

UNIT- I:INTRODUCTION

Definition of Signals and Systems, Classification of Signals, Classification of Systems, Operations on signals: time-shifting, time-scaling, amplitude-shifting, amplitude-scaling. Problems on classification and characteristics of Signals and Systems. Complex exponential and sinusoidal signals, Singularity functions and related functions: impulse function, step function signum function and ramp function. Analogy between vectors and signals, orthogonal signal space, Signal approximation using orthogonal functions, Mean square error, closed or complete set of orthogonal functions, Orthogonality in complex functions.

UNIT –II:SAMPLING THEOREM

Graphical and analytical proof for Band Limited Signals, impulse sampling, Natural and Flat top Sampling, Reconstruction of signal from its samples, effect of under sampling – Aliasing, Introduction to Band Pass sampling.

UNIT-III:ANALYSIS OF LINEAR SYSTEMS

Linear system, impulse response, Response of a linear system, Linear time invariant (LTI) system, Linear time variant (LTV) system, Concept of convolution in time domain and frequency domain, Graphical representation of convolution, Transfer function of a LTI system. Filter characteristics of linear systems. Distortion less transmission through a system, Signal bandwidth, system bandwidth, Ideal LPF, HPF and BPF characteristics, Causality and Poly-Wiener criterion for physical realization, relationship between bandwidth and rise time.

UNIT-IV:CROSS-CORRELATION AND AUTO-CORRELATION OF FUNCTIONS

Properties of correlation function, Energy density spectrum, Parseval's theorem, Power density spectrum, Relation between auto correlation function and energy/power spectral density function. Relation between convolution and correlation, Detection of periodic signals in the presence of noise by correlation, Extraction of signal from noise by filtering.

UNIT –V:LAPLACE TRANSFORMS

Review of Laplace transforms, Partial fraction expansion, Inverse Laplace transform, Concept of region of convergence (ROC) for Laplace transforms, constraints on ROC for various classes of signals, Properties of L.T's, Relation between L.T's, and F.T. of a signal. Laplace transform of certain signals using waveform synthesis.

UNIT –VI:Z–TRANSFORMS

Fundamental difference between continuous-time and discrete-time signals, discrete time signal representation using complex exponential and sinusoidal components, Periodicity of discrete time using complex exponential signal, Concept of Z- Transform of a discrete sequence. Distinction between Laplace, Fourier and Z transforms. Region of convergence in Z-Transform, constraints on ROC for various classes of signals, Inverse Z-transform, properties of Z-transforms.

TEXT BOOKS:

1. Signals, Systems & Communications - B.P. Lathi, BS Publications, 2003.
2. Signals and Systems - A.V. Oppenheim, A.S. Willsky and S.H. Nawab, PHI, 2nd Edn, 1996.
3. Signals & Systems- Narayan Iyer and K Satya Prasad, Cenage Publications, 1996.

REFERENCE BOOKS:

1. Signals & Systems - Simon Haykin and Van Veen, Wiley, 2nd Edition, 2017.
2. Principles of Linear Systems and Signals – BP Lathi, Oxford University Press, 2015
3. Signals and Systems – K Raja Rajeswari, B VisweswaraRao, PHI, 2009
4. Fundamentals of Signals and Systems- Michel J. Robert, MGH International Edition, 2008.
5. Signals and Systems – T K Rawat , Oxford University press, 2011

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: V**

Course Code : V18MBT51

Course Name : Managerial Economics and Financial Analysis **[L : 3; T:0; P : 0 (3 credits)]**

(Already Approved by BOS of MBA)

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C306.1	Understand the basic concepts of managerial economics, demand, and elasticity of demand and methods of demand forecasting.	(K2)
C306.2	Estimate the production function with one, two and infinite variables. Understand various cost concepts and calculating breakeven point	(K2)
C306.3	Understand and showing a price output determination in different types of market structures and knowing various pricing methods	(K2)
C306.4	Understand various forms of business organizations	(K2)
C306.5	Prepare financial statements and its analysis.	(K3)
C306.6	Appraise the projects by using various capital budgeting methods	(K4)

UNIT-I:INTRODUCTION TO MANAGERIAL ECONOMICS AND DEMAND ANALYSIS:

Definition of Managerial Economics -Scope of Managerial Economics and its relationship with other subjects - Concept of Demand, Types of Demand, Determinants of Demand, Demand schedule, Demand curve, Law of Demand and its limitations- Elasticity of Demand, Types of Elasticity of Demand and Measurement- Demand forecasting and Methods of forecasting.

UNIT-II: **PRODUCTION AND COST ANALYSES**

Concept of Production function- Cobb Douglas Production function- Law of Variable proportions-Isoquants and Isocosts and choice of least cost factor combination-Concepts of Returns to scale and Economies of scale-Different cost concepts: opportunity costs, explicit and implicit costs- Fixed costs, Variable Costs and Total Cost-Cost-Volume-Profit analysis Determination of Breakeven point(simple problems)Managerial significance and limitations of Breakeven point.

UNIT-III: INTRODUCTION TO MARKETS, & PRICING POLICIES

Market Structures: Perfect Competition, Monopoly, Monopolistic competition and Oligopoly - Features - Price and Output Determination- Methods of Pricing: Average cost pricing, Limit Pricing, Market Skimming Pricing, Internet Pricing, Flat Rate Pricing, Usage sensitive pricing and Priority Pricing.

UNIT-IV:TYPES OF BUSINESS ORGANIZATION AND BUSINESS CYCLES

Features and Evaluation of Sole Trader, Partnership, Joint Stock Company ñ State/Public Enterprises and their forms - Business Cycles : Meaning and Features - Phases of Business Cycle.

UNIT-V:INTRODUCTION TO ACCOUNTING & FINANCING ANALYSIS

Introduction to Double Entry Systems- Preparation of Financial Statements-Analysis and Interpretation of Financial Statements-Ratio Analysis

UNIT-VI: **CAPITAL AND CAPITAL BUDGETING**

Capital Budgeting: Meaning of Capital Capitalization-Meaning of Capital Budgeting-Time value of money- Methods of appraising Project profitability: Traditional Methods and modern methods (simple problems)

TEXT BOOKS:

1. Managerial Economics and Financial Analysis by Dr. N. Appa Rao, Dr. P. Vijay Kumar, Cengage Publications, New Delhi ñ 2011
2. Managerial Economics and Financial Analysis by Dr. A. R. Aryasri, TMH 2011
3. Managerial Economics and Financial Analysis, Prof. J.V. Prabhakararao, Prof. P. Venkatarao, Ravindra Publication.

REFERENCE BOOKS:

1. Managerial Economics & Financial Analysis by Dr. B. Kuberudu and Dr. T. V. Ramana, Himalaya Publishing House, 2014.
2. Managerial Economics by V. Maheswari, Sultan Chand 2014.
3. Managerial Economics by Suma Damodaran, Oxford 2011.
4. Managerial Economics by Vanitha Agarwal, Pearson Publications 2011.
5. Financial Accounting for Managers by Sanjay Dhameja, Pearson.
6. Financial Accounting by Maheswari, Vikas Publications.
7. Managerial Economics and Financial Analysis by S. A. Siddiqui & A. S. Siddiqui, New Age International Publishers, 2012.
8. Indian Economy by Ramesh Singh, 7th Edn, TMH2015.
9. A Text Book of Microeconomic Theory by Pankaj Tandon, Sage Publishers, 2015.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: V**

Course Code : V18EEL06

Course Name : Electrical Machines Laboratory - II **[L : 0; T:0; P : 2 (1 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C307.1	Pre-determine the performance parameters of 3-phase induction motor by conducting no-load and blocked rotor tests.	(K3)
C307.2	Sketch the performance characteristics of 3-phase induction motor by conducting brake test.	(K3)
C307.3	Pre-determine the performance parameters of cylindrical pole synchronous machine by conducting OC and SC tests.	(K3)
C307.4	Determine the direct and quadrature axis reactances by conducting slip test.	(K3)
C307.5	Determine V and inverted V curves through synchronization of synchronous machine to mains.	(K3)
C307.6	Calculate the equivalent circuit parameters of a 1-phase transformer by conducting OC and SC Tests.	(K3)

The following experiments are required to be conducted as compulsory experiments:

1. Brake test on three phase Induction Motor
2. No–load & Blocked rotor tests on three phase Squirrel Cage Induction motor
3. Load test on three phase slip ring induction motor
4. No–load & Blocked rotor tests on three phase Slip Ring Induction motor
5. Regulation of a three –phase alternator by synchronous impedance &m.m.f. Methods
6. Regulation of three–phase alternator by Potier triangle method
7. V and Inverted V curves of a three—phase synchronous motor.
8. Determination of Xd and Xq of a salient pole synchronous machine
9. Equivalent circuit of single phase induction motor

10. Speed control of induction motor by V/f method.

11. Determination of efficiency of three phase alternator by loading with three phase induction motor.

12. Power factor improvement of single phase induction motor by using capacitors and load test on single phase induction motor.

13. Heat run test on a bank of 3 Nos. of single phase Delta connected transformers.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: V**

Course Code : V18EEL07

Course Name : **Control Systems Laboratory** **[L : 0; T:0; P : 2 (1 credits)]**

Course Outcomes
After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C308.1	Find time response of given control system model.	(K3)
C308.2	Analyze the performance and working of Magnetic amplifier, D.C. servo motors, A.C. Servo motors and synchronous motors.	(K4)
C308.3	Analyze PID controllers for given control system model.	(K4)
C308.4	Analyze lead, lag and lead-lag systems in control system	(K4)
C308.5	Determine the transfer function of D.C. motor and D.C Generator.	(K4)
C308.6	Examine the control of temperature using PID controller.	(K3)

Any 10 of the following experiments are to be conducted:

1. Time response of Second order system

2. Characteristics of Synchros

3. Programmable logic controller – characteristics of stepper motor

4. Effect of feedback on DC servo motor

5. Effect of P, PD, PI, PID Controller on a second order systems

6. Lag and lead compensation – Magnitude and phase plot

7. DC position control system

8. Transfer function of DC motor

9. Temperature controller using PID

10. Characteristics of magnetic amplifiers

11. Characteristics of AC servo motor

12. Characteristics of DC servo motor

13. Potentiometer as an error detector

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EET17

Course Name : Electrical Drives **[L : 3; T:1; P : 0 (4 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C311.1	Understand the fundamentals concept about an electric drive and different electric braking methods	(K2)
C311.2	Operate Chopper fed DC motor drives in various quadrants	(K4)
C311.3	Understand the closed loop operation of chopper fed dc motor drives	(K2)
C311.4	Compute the change in speed of three phase induction motor using solid state converters	(K3)
C311.5	Illustrate the speed control of induction motor using scalar control methods	(K3)
C311.6	Analyze the speed control of induction motor using rotor resistance control and various slip power recovery schemes	(K4)

UNIT-I: DC MOTOR CHARACTERISTICS

Review of emf and torque equations of DC machine, review of torque-speed characteristics of separately excited dc motor, change in torque-speed curve with armature voltage, example load torque-speed characteristics, operating point, armature voltage control for varying motor speed, flux weakening for high speed operation.

UNIT-II: CHOPPER FED DC DRIVES

Review of dc chopper and duty ratio control, chopper fed dc motor for speed control, steady state operation of a chopper fed drive, armature current waveform and ripple calculation. Single-quadrant, two-quadrant and four-quadrant choppers fed dc drive; steady-state operation of multi-quadrant chopper fed dc drives, regenerative braking.

UNIT-III: CLOSED-LOOP CONTROL OF DC DRIVES

Control structure of DC drive, inner current loop and outer speed loop, dynamic model of dc motor – dynamic equations and transfer functions, modeling of chopper as gain with switching delay, plant transfer function, for controller design, current controller specification and design, speed controller specification and design.

UNIT-IV: INDUCTION MOTOR CHARACTERISTICS

Review of induction motor equivalent circuit and torque-speed characteristic, variation of torque- speed curve with (i) applied voltage, (ii) applied frequency and (iii) applied voltage and frequency, typical torque-speed curves of fan and pump loads, operating point, constant flux operation, flux weakening operation.

UNIT-V: SCALAR CONTROL OR CONSTANT V/F CONTROL OF INDUCTION MOTOR

Review of three-phase voltage source inverter, generation of three-phase PWM signals, sinusoidal modulation, space vector theory, conventional space vector modulation; constant V/f control of induction motor, steady-state performance analysis based on equivalent circuit, speed drop with loading, slip regulation.

UNIT-VI: CONTROL OF SLIP RING INDUCTION MOTOR

Impact of rotor resistance of the induction motor torque-speed curve, operation of slip-ring induction motor with external rotor resistance, starting torque, power electronic based rotor side control of slip ring motor, slip power recovery.

TEXT BOOKS

1. Power Semiconductor Controlled Drives by G. K. Dubey, Prentice Hall, 1989.
2. Electric Motor Drives: Modeling, Analysis and Control by R. Krishnan, Prentice Hall, 2001.

REFERENCE BOOKS

1. Fundamentals of Electrical Drives by G. K. Dubey, CRC Press, 2002.
2. Control of Electric Drives by W. Leonhard, Springer Science & Business Media, 2001.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EET18

Course Name : Utilization of Electrical Energy **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C311.1	Choose a suitable motor for electric drives and industrial applications	(K3)
C311.2	Identify appropriate heating techniques for different applications	(K3)
C311.3	Identify appropriate welding techniques for different applications	(K3)
C311.4	Recognise lightning system for particular inputs and constraints in view	(K2)
C311.5	Determine the speed-time characteristics of traction motors	(K3)
C311.6	Estimate energy consumption levels at various modes of operation	(K3)

UNIT – I: SELECTION OF MOTORS

Choice of motor, type of electric drives, starting and running characteristics – Speed control – Temperature rise – Applications of electric drives – Types of industrial loads – Continuous, Intermittent and variable loads – Load equalization.

UNIT – II: ELECTRIC HEATING

Advantages and methods of electric heating–Resistance heating, induction heating and dielectric heating – Arc furnaces – Direct and indirect arc furnaces.

UNIT – III: ELECTRIC WELDING

Classification - Resistance welding and types - Arc welding and types – Electric welding equipment–Comparison between AC and DC Welding

UNIT – IV: ILLUMINATION

Basic terms used in illumination – Laws of illumination – MHCP and MSCP - Polar curves – Sources of light: Working of Filament lamps, Arc lamps and Discharge lamps.

Basic principles of light control – Types of lighting schemes – Street, Flood and LED lighting – Lumen or flux method of lighting calculation – Numerical Examples.

UNIT – V: ELECTRIC TRACTION – I

Review of existing electric traction systems in India – System of electric traction and track electrification– Special features of traction motor – Mechanics of train movement – Speed-time curves for different services – Trapezoidal and quadrilateral speed time curves – High speed transportation trains.

UNIT – VI: ELECTRIC TRACTION – II

Calculations of tractive effort– power –Specific energy consumption for given run–Effect of varying acceleration and braking retardation–Adhesive weight and braking, retardation adhesive weight and coefficient of adhesion–Modern traction motors.

TEXT BOOKS:

1. Utilization of Electric Energy by E. Openshaw Taylor, SI Edition, Orient Longman, 1971.
2. Art and Science of Utilization of Electrical Energy by H. Partab, DhanpatRai& Sons, 2006.

REFERENCE BOOKS:

1. Utilization of Electrical Power including Electric drives and Electric traction – by N. V. Suryanarayana, New Age International (P) Limited, Publishers, 1996.
2. Generation, Distribution and Utilization of electrical Energy – by C.L. Wadhwa, New Age International (P) Limited, Publishers, 1997.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EET19

Course Name : Advanced Control Systems **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C311.1	Understand the concepts of State Space Analysis	(K2)
C311.2	Find the concepts of Controllability, Observability and development of pole placement techniques	(K3)
C311.3	Demonstrate the non-linear systems behaviour by Phase Plane and describing function analysis	(K3)
C311.4	Compute the stability of linear and non-linear systems by Lypunov's Method	(K3)
C311.5	Illustrate the principle of Calculus of Variation, Optimality and its Applicants	(K3)
C311.6	Develop the Linear quadratic Regulator (LQR) and Optimal regulator design by using Lypunov's Method	(K3)

UNIT – I: STATE SPACE ANALYSIS

Introduction to State Space Analysis, State Space Representation using physical, phase and Canonical variables.

UNIT – II: CONTROLLABILITY, OBSERVABILITY AND DESIGN OF POLE PLACEMENT

Tests for controllability and observability for continuous time systems – Time varying case – Minimum energy control – Time invariant case – Principle of duality – Controllability and observability form Jordan canonical form and other canonical forms – Effect of state feedback on controllability and observability – Design of state feedback control through pole placement.

UNIT – III: DESCRIBING FUNCTION ANALYSIS

Introduction to nonlinear systems, Types of nonlinearities, describing functions, Introduction to phase–plane analysis.

UNIT–IV: STABILITY ANALYSIS

Stability in the sense of Lyapunov – Lyapunov's stability and Lypanov's instability theorems – Direct method of Lyapunov for the linear and nonlinear continuous time autonomous systems.

UNIT–V: CALCULUS OF VARIATIONS

Minimization of functional of single function – Constrained minimization – Minimum principle – Control variable inequality constraints – Control and state variable inequality constraints – Euler lagrangine equation.

UNIT –VI: OPTIMAL CONTROL

Linear Quadratic Optimal Regulator (LQR) problem formulation – Optimal regulator design by parameter adjustment (Lyapunov method) – Optimal regulator design by Continuous Time Algebraic Riccatti equation (CARE) - Optimal controller design using LQG framework.

TEXT BOOKS:

1. Modern Control Engineering – by K. Ogata, Prentice Hall of India, 3rd edition, 1998.
2. Automatic Control Systems by B.C. Kuo, Prentice Hall Publication, 9th edition, 2014.

REFERENCE BOOKS:

1. Modern Control System Theory – by M. Gopal, New Age International Publishers, 2nd edition,1996.
2. Control Systems Engineering by I.J. Nagarath and M.Gopal, New Age International (P) Ltd, 6th edition, 2018.
3. Digital Control and State Variable Methods – by M. Gopal, Tata McGraw–Hill Companies, 4th Edition, 2017.
4. Systems and Control by Stainslaw H. Zak , Oxford Press, 1st Edition, 2003.
5. Optimal control theory: an Introduction by Donald E.Kirk by Dover publications,1st Edition, 2004.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EET20

Course Name : Renewable Energy Systems **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C311.1	Understand the solar radiation and calculate geometric angle	(K3)
C311.2	Understand the working of solar thermal collectors	(K2)
C311.3	Understand the working of solar photo voltaic systems and develop the maximum power point techniques	(K3)
C311.4	Understand the wind energy conversion systems ,Betz coefficient and tip speed ratio	(K2)
C311.5	Understand the basic principle and working of hydro and tidal systems.	(K2)
C311.6	Understand the basic principle and working of, biomass, fuel cell and geothermal systems.	(K2)

UNIT–I: FUNDAMENTALS OF ENERGY SYSTEMS AND SOLAR ENERGY ENERGY CONSERVATION PRINCIPLE

Energy scenario (world and India) – various forms of renewable energy - Solar radiation: Outside earth's atmosphere – Earth surface – Analysis of solar radiation data – Geometry – Radiation on tilted surfaces – Numerical problems.

UNIT–II: SOLAR THERMAL SYSTEMS

Liquid flat plate collectors: Performance analysis –Transmissivity– Absorptivity product collector efficiency factor – Collector heat removal factor – Numerical problems. Introduction to solar air heaters – Concentrating collectors, solar pond and solar still – solar thermal plants.

UNIT–III: SOLAR PHOTOVOLTAIC SYSTEMS

Solar photovoltaic cell, module, array – construction – Efficiency of solar cells – Developing technologies – Cell I-V characteristics – Equivalent circuit of solar cell – Series resistance – Shunt resistance – Applications and systems – Balance of system components - System design: storage sizing – PV system sizing – Maximum power point techniques: Perturb and observe (P&O) technique – Hill climbing technique.

UNIT–IV: WIND ENERGY

Sources of wind energy - Wind patterns – Types of turbines –Horizontal axis and vertical axis machines - Kinetic energy of wind – Betz coefficient – Tip–speed ratio – Efficiency – Power output of wind turbine – Selection of generator(synchronous, induction) – Maximum power point tracking – wind farms – Power generation for utility grids.

UNIT–V: HYDRO AND TIDAL POWER SYSTEMS

Basic working principle – Classification of hydro systems: Large, small, micro – measurement of head and flow – Energy equation – Types of turbines – Numerical problems. Tidal power – Basics – Kinetic energy equation – Turbines for tidal power - Numerical problems – Wave power – Basics – Kinetic energy equation – Wave power devices – Linear generators.

UNIT–VI: BIOMASS, FUEL CELLS AND GEOTHERMAL SYSTEMS BIOMASS ENERGY

Fuel classification – Pyrolysis – Direct combustion of heat – Different digesters and sizing. Fuel cell: Classification of fuel for fuel cells – Fuel cell voltage– Efficiency – V-I characteristics. Geothermal: Classification – Dry rock and hot acquifer – Energy analysis – Geothermal based electric power generation

TEXT BOOKS:

1. Solar Energy: Principles of Thermal Collection and Storage, S. P. Sukhatme and J. K. Nayak, TMH, New Delhi, 3rd Edition, 2013.
2. Renewable Energy Resources, John Twidell and Tony Weir, Taylor and Francis - second edition,2013.

REFERENCE BOOKS:

1. Energy Science: Principles, Technologies and Impacts, John Andrews and Nick Jelly, Oxford University Press, 2nd edition, 2013.
2. Renewable Energy- Edited by Godfrey Boyle-oxford university.press,3rd edition,2013.
3. Handbook of renewable technology Ahmed and Zobaa, Ramesh C Bansal, World scientific, Singapore, 2011.
4. Renewable Energy Technologies /Ramesh & Kumar /Narosa.
5. Renewable energy technologies – A practical guide for beginners – Chetong Singh Solanki, PHI, 2008.
6. Non conventional energy source –B.H.khan- TMH-2nd edition, 2017.

7. **Programme** : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EET21

Course Name : Advanced Power Electronics **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C309.1	Analyze and design power converter configurations for specific applications	(K3)
C309.2	Design power electronic converters to improve power quality	(K3)
C309.3	Analyze and design resonant converters	(K3)
C309.4	Develop power converter models under steady state and small signal conditions	(K3)
C309.5	Determine duty cycle and transfer functions for buck, boost and buck-boost converters	(K3)
C309.6	Synthesize and design magnetic components for power converters	(K4)

UNIT-I: DC-DC CONVERTERS

Non-isolated DC-DC converters: buck, boost, buck-boost, CUK converters under continuous and discontinuous conduction operation - Isolated DC-DC converters: forward, fly-back, push-pull, half-bridge and full-bridge converters - Relationship between I/P and O/P voltages – design of filter inductor and capacitors.

UNIT-II: FRONT-END (AC-DC) CONVERTERS

Conventional methods of power factor improvements: Semi converter, extinction angle control, symmetrical angle control – active front-end converters-Single phase: Boost, voltage doubler and PWM rectifiers –voltage and current controlled three-phase PWM rectifiers

UNIT-III: RESONANT CONVERTERS

Introduction, Basic resonant circuit concepts, Classification - Load resonant converters, resonant switch converters, Zero voltage switching clamped voltage converters, Resonant DC link inverters High frequency link integral half cycle converters, Phase modulated resonant converters, Dual active bridge converters, High gain converters.

UNIT-IV: MODELLING OF DC-DC CONVERTERS

Basic ac modelling approach, State space averaging, Circuit averaging and averaged switch modelling, Canonical circuit modelling, Converter transfer functions for buck, boost and buck-boost topologies.

UNIT-V: CURRENT MODE CONTROL

Introduction, types, advantages and disadvantages, Slope compensation, Determination of duty cycle and transfer functions for buck, boost and buck-boost converters.

UNIT-VI: DESIGN OF POWER CONVERTERS COMPONENTS

Design of magnetic components - design of transformer, design of inductor and current transformer - Selection of filter capacitors, Selection of ratings for devices, input filter design, Thermal design.

TEXT BOOKS:

1. Power Electronics-Circuits, Devices & Applications by M.H. Rashid, Pearson, 4thedition, 2013.
2. Power Electronics: Converters, Applications & Design by N. Mohan, T.M. Undeland, W.P. Robbins, J.Wiley & Sons, 3rd Edition, 2003.
3. Power Electronics by Daniel W. Hart, McGraw-Hill, 2011.

REFERENCES BOOKS:

1. Switching Power Supply Design by Abraham I. Pressman, Keith Billings & Taylor Morey, McGraw Hill International, 3rd Edition, 2009.
2. Fundamentals of Power Electronics by R.W. Erickson and Dragan Maksimonic, Springer, 2nd Edition, 2001.
3. Power Electronics: Essentials and Applications by Umanand.L, John Wiley India, 1st Edition, 2009.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EET22

Course Name : HVAC & HVDC Transmission **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C312.1	Calculate electrical parameters of EHVAC lines	(K3)
C312.2	Compute corona loss , radio interference and excitation function	(K3)
C312.3	Understand the phenomena of HVDC transmission systems	(K2)
C312.4	Choose suitable converter configuration for HVDC converters and system control	(K4)
C312.5	Understand the requirements of reactive power control in HVDC systems	(K2)
C312.6	Calculate various parameters required for designing filters	(K3)

UNIT – I: INTRODUCTION OF EHV AC TRANSMISSION

Necessity of EHV AC transmission – Advantages and problems – Power handling capacity and line losses – Mechanical considerations – Resistance of conductors –Electrostatics – Field of sphere gap – Field of line charges and properties – Charge ~ potential relations for multi–conductors – Surface voltage gradient on conductors – Bundle spacing and bundle radius – Examples – Distribution of voltage gradient on sub conductors of bundle – Examples.

UNIT – II: CORONA EFFECTS

Power loss and audible noise (AN) – Corona loss formulae – Charge voltage diagram – Generation – Characteristics – Limits and measurements of AN – Relation between 1–phase and 3–phase AN levels – Examples – Radio interference (RI) – Corona pulses generation – Properties and limits – Frequency spectrum – Modes of propagation – Excitation function – Measurement of RI, RIV and excitation functions – Examples.

UNIT – III: BASIC CONCEPTS OF DC TRANSMISSION ECONOMICS & TERMINAL EQUIPMENT OF HVDC TRANSMISSION SYSTEMS

Types of HVDC Links – Apparatus required for HVDC Systems – Comparison of AC &DC transmission – Application of DC Transmission System – Planning & Modern trends in DC transmission.

UNIT – IV: ANALYSIS OF HVDC CONVERTERS AND SYSTEM CONTROL

Choice of Converter configuration – Analysis of Graetz – Characteristics of 6 Pulse & 12 Pulse converters – Cases of two 3 phase converters in Star – Star mode and their performance – Principal of DC Link Control – Converters Control Characteristics – Firing angle control – Current and extinction angle control – Effect of source inductance on the system – Starting and stopping of DC link – Power Control.

UNIT–V: REACTIVE POWER CONTROL IN HVDC

Reactive Power Requirements in steady state – Conventional control strategies –Alternate control strategies sources of reactive power – AC Filters – Shunt capacitors – Synchronous condensers.

UNIT – VI: HARMONICS AND FILTERS

Generation of Harmonics – Characteristics harmonics – Calculation of AC Harmonics – Non–Characteristics harmonics – Adverse effects of harmonics – Calculation of voltage & current harmonics – Effect of Pulse number on harmonics. Types of AC filters, Design of Single tuned filters – Design of High pass filters.

TEXT BOOKS:

1. HVDC Power Transmission Systems: Technology and system Interactions – by K.R.Padiyar, New Age International (P) Limited and Publishers, 2nd Edition, 2005.

2. Direct Current Transmission – by E.W.Kimbark, John Wiley & Sons, Volume1, 1971.

3. EHVAC Transmission Engineering by R. D. Begamudre, New Age International (P) Ltd, 3rd Edition, 2006.

REFERENCE BOOKS:

1. EHVAC and HVDC Transmission Engineering and Practice – S.Rao, Khanna Publishers, 3rd Edition, 1993.

2. Power Transmission by Direct Current – by E.Uhlmann, B.S.Publications, 2004.

3. HVDC Transmission – J. Arrillaga, IET Publishers, 1998.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EET23

Course Name : Programmable Logic Controllers andits Applications **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C312.1	Understand working of PLC, I/O Modules of PLC and PLC Ladder design	(K2)
C312.2	Understand different types of devices to which PLC Input and Output modules are connected	(K2)
C312.3	Apply of PLC timers and counters for the control of Industrial process	(K3)
C312.4	Illustrate the program control instructions	(K3)
C312.5	Demonstrate the Data Manipulation, Arithmetic, Logical and Sequential Instructions of PLC's	(K3)
C312.6	Development of different Applications using PLC's	(K3)

UNIT I: INTRODUCTION

PLC Basics: PLC system, I/O modules and interfacing, CPU processor, programming equipment, programming formats, construction of PLC ladder diagrams, devices connected to I/O modules.

UNIT II: PLC PROGRAMMING

PLC Programming: Input instructions, outputs, operational procedures, programming examples using contacts and coils. Digital logic gates, programming in the Boolean algebra system, conversion examples. Ladder diagrams and sequence listings, ladder diagram construction.

UNIT III: PROGRAMMABLE TIMERS AND COUNTERS

Timer instructions – On delay time instruction – Off delay timer instruction – Retentive timer – Counter instructions – Up counter – Down counter - Cascading counters - Incremental encoder – Counter applications – Combining counter and timer functions.

UNIT IV: PROGRAM CONTROL INSTRUCTIONS

Master control reset instruction – Jump instructions and sub routines – Immediate input and output instructions.

UNIT V: OTHER INSTRUCTIONS

Data manipulation – Data transfer operation – Data compare instruction – Data manipulation programs – Numerical data I/O interfaces – Math instructions – Addition, subtraction, multiplication & division instruction – Sequential instructions – Sequence programs – Shift registers – Word shift registers.

UNIT VI: APPLICATIONS

Control of water level indicator – Alarm monitor - Conveyor motor control – Parking garage – Ladder diagram for process control – PID controller.

TEXT BOOKS:

1. Programmable logic controllers by Frank D. Petruzella- McGraw Hill – 3rd Edition, 2014.
2. Programmable Logic Controllers – Principle and Applications by John W. Webb and Ronald A. Reiss, Fifth Edition, PHI, 1999.

REFERENCE BOOKS:

1. Programmable Logic Controllers – Programming Method and Applications by JR. Hackworth and F.D Hackworth Jr. – Pearson, 2004.
2. Introduction to Programmable Logic Controllers- Gary Dunning- Cengage Learning, 3rd Edition, 2005.
3. Programmable Logic Controllers –W. Bolton-Elsevier publisher, 6th Edition, 2015.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**
Course Code : V18EET24
Course Name : Electrical Energy Conservation, Management & Auditing **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C312.1	Describe the concepts and procedures for Energy Audit & Management	(K2)
C312.2	Understand the necessity of Energy efficient lighting systems	(K2)
C312.3	Understand the operation of Energy instruments and their use in energy audit	(K2)
C312.4	Explain Energy Conservation measures in HVAC system	(K2)
C312.5	Understand various economic aspects of Energy systems	(K2)
C312.6	Apply life cycle costing analysis for various system or organizations	(K3)

UNIT–I: BASIC PRINCIPLES OF ENERGY AUDIT AND MANAGEMENT ENERGY AUDIT

Definitions – Concept – Types of audit – Energy index – Cost index – Pie charts –Sankey diagrams – Load profiles – Energy conservation schemes and energy saving potential – Numerical problems – Principles of energy management – Initiating, planning, controlling, promoting, monitoring, reporting – Energy manager – Qualities and functions – Language – Questionnaire – Check list for top management.

UNIT–II: LIGHTING MODIFICATION OF EXISTING SYSTEMS – REPLACEMENT OF EXISTING SYSTEMS – PRIORITIES:

Definition of terms and units – Luminous efficiency – Polar curve – Calculation of illumination level – Illumination of inclined surface to beam – Luminance or brightness – Types of lamps – Types of lighting – Electric lighting fittings (luminaries) – Flood lighting – White light LED and conducting Polymers – Energy conservation measures.

UNIT–III: POWER FACTOR AND ENERGY INSTRUMENTS

Power factor – Methods of improvement – Location of capacitors – Power factor with non linear loads – Effect of harmonics on Power factor – Numerical problems. Energy Instruments – Watt–hour meter – Data loggers – Thermocouples – Pyrometers – Lux meters – Tong testers – Power analyzer.

UNIT–IV: SPACE HEATING AND VENTILATION

Ventilation – Air–Conditioning (HVAC) and Water Heating: Introduction – Heating of buildings – Transfer of Heat– Space heating methods – Ventilation and air–conditioning – Insulation–Cooling load – Electric water heating systems – Energy conservation methods.

UNIT–V ECONOMIC ASPECTS AND FINANCIAL ANALYSIS

Understanding energy cost - Economics Analysis – Depreciation Methods – Time value of money – Rate of return – Present worth method – Replacement analysis – Life cycle costing analysis – Energy efficient motors (basic concepts) – Economics of energy efficient motors and systems.

UNIT–VI: COMPUTATION OF ECONOMIC ASPECTS

Need of investment, appraisal and criteria - Calculation of simple payback period–Return on investment – Net present value – Internal rate of return – numerical examples – Power factor correction – Lighting – Applications of life cycle costing analysis – Return on investment – Numerical examples.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EET25

Course Name : Special Electrical Machines **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C312.1	Describe the operation and characteristics of permanent magnet dc motor	(K2)
C312.2	Understand the operation and control of stepper motors	(K2)
C312.3	Understand the operation and control of switched reluctance motor	(K2)
C312.4	Describe the operation and characteristics of brush less dc motor	(K2)
C312.5	Distinguish between square wave and sine wave brush less dc motor	(K3)
C312.6	Understand the construction and operation of linear induction motors	(K2)

UNIT I: PERMANENT MAGNET MATERIALS AND PMDC MOTORS

Introduction-classification of permanent magnet materials used in electrical machines-minor hysteresis loop and recoil line-Stator frames of conventional dc machines-Development of electronically commutated dc motor from conventional dc motor-Permanent-magnet materials and characteristics-B-H loop and demagnetization characteristics-Temperature effects: reversible and irreversible losses-high temperature effects-reversible losses-Irreversible losses recoverable by magnetization-Mechanical properties, handling and magnetization-Application of permanent magnets in motors-power density-operating temperature range-severity of operation duty.

UNIT II: STEPPER MOTORS

Classification of stepper motors – Hybrid and Variable Reluctance Motor (VRM) - Construction and principle of hybrid type synchronous stepper motor – Different configuration for switching the phase windings control circuits for stepper motors – Open loop and closed loop control of 2-phase hybrid stepping motor. Construction and principle of operation of Variable Reluctance Motor (VRM) – Single stack and multiple stack – Open loop control of 3- phase VR Stepper Motor- Applications.

UNIT III: SWITCHED RELUCTANCE MOTORS

Construction – Comparison of conventional and switched reluctance motors – Design of stator and rotor pole arcs – Torque producing principle and torque expression – Different converter configurations for SRM – Drive and power circuits for SRM – Position sensing of rotor – Applications of SRM.

UNIT IV: SQUARE WAVE PERMANENT MAGNET BRUSHLESS DC MOTOR

Types of constructions – Surface mounted and interior type permanent magnet – Principle of operation of BLDC motor. Torque and EMF equations – Torque speed characteristics – Performance and efficiency- Square wave brushless motors with 1200 and 1800 magnetic areas commutation.

UNIT V: SINE WAVE PERMANENT MAGNET BRUSHLESS MOTOR

Torque and EMF equations – Phasor Diagram – Circle diagram – Torque/speed characteristics – Comparison between square wave and sine wave permanent magnet motors - Applications.

UNIT VI: LINEAR INDUCTION MOTORS (LIM)

Construction– principle of operation–Double sided LIM from rotating type Induction Motor – Schematic of LIM drive for traction – Development of one sided LIM with back iron- equivalent circuit of LIM.

TEXT BOOKS:

1. Brushless Permanent Magnet and Reluctance Motor Drives,T.J.E. Miller ,1989, Oxford University press.
2. Special Electrical Machines, K. Venkataratnam, University press, 2009, New Delhi.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EEL08

Course Name : Power Electronics Laboratory **[L : 0; T:0; P : 2 (1 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C313.1	Sketch the characteristics of various power electronics devices and analyse the firing circuits	(K4)
C313.2	Analyze the performance of 1-phase and 3-phase full converter and 1-phase dual converter for resistive and inductive loads	(K4)
C313.3	Experiment the single phase AC voltage controller and cyclo converter with resistive and inductive loads.	(K4)
C313.4	Operate the DC-DC buck converter and boost converter	(K3)
C313.5	Analyze the performance of the single phase bridge inverter	(K4)
C313.6	Analyze the performance of the PWM inverter	(K4)

Any 10 of the Following Experiments are to be conducted

1. Study of Characteristics of Thyristor, MOSFET & IGBT.
2. Design and development of a firing circuit for Thyristor.
3. Design and development of gate drive circuits for IGBT.
4. Single -Phase Half controlled converter with R and RL load
5. Single -Phase fully controlled bridge converter with R and RL loads
6. Single -Phase AC Voltage Regulator with R and RL Loads
7. Single -Phase square wave bridge inverter with R and RL Loads
8. Three- Phase fully controlled converter with RL–load.
9. Design and verification of voltages gain of Boost converter in Continuous Conduction Mode(CCM) and Discontinuous Conduction Mode(DCM).
10. Design and verification of voltages ripple in buck converter in CCM operation.
11. Single -phase PWM inverter with sine and triangle PWM techniques.
12. 3-phase AC-AC voltage regulator with R-load.

Programme : **B. Tech - Electrical & Electronics Engineering** **Semester: VI**

Course Code : V18EEL09

Course Name : Electrical Simulation Laboratory **[L : 0; T:0; P : 2 (1 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
C314.1	Simulate integrator circuit, differentiator circuit	(K3)
C314.2	Simulate Boost converter, Buck converter, full convertor and PWM inverter	(K3)
C314.3	Simulate transmission line by incorporating line, load and transformer models	(K3)
C314.4	Plot of Bode plots, root locus and nyquist plots	(K3)
C314.5	Perform transient analysis of RLC circuit	(K3)
C314.6	Perform transient analysis of single machine connected to infinite bus(SMIB)	(K4)

Any 10 of the Following Experiments are to be conducted

1. Simulation of transient response of RLC circuits a. Response to pulse input b. Response to step input c. Response to sinusoidal input
2. Analysis of three phase circuit representing the generator transmission line and load. Plot three phase currents & neutral current .
3. Simulation of single–phase full converter using RLE loads and single phase AC voltage controller using RL loads
4. Plotting of Bode plots, root locus and nyquist plots for the transfer functions of systems up to 5th order
5. Simulation of Boost and Buck converters.
6. Integrator & Differentiator circuits using op–amp.
7. Simulation of D.C separately excited motor using transfer function approach.
8. Modelling of transformer and simulation of lossy transmission line.
9. Simulation of single phase inverter with PWM control.
10. Simulation of three phase full converter using MOSFET and IGBTs.
11. Transient analysis of single machine connected to infinite bus(SMIB).

REFERENCE BOOKS:

1. Simulation of Power Electronic Circuit by M.B.Patil, V. Ramanarayan, V.T.Ranganathan Narosha,2009.

Annexure-EEE-III

List courses offered under Open Elective -I in VI semester under V18 Regulation for all other branches:

S.No.	Course Code	Name of the Course
1.	V18EEOE1	Energy Audit & Conservation
2.	V18EEOE2	Electrical Measuring Instruments
3.	V18EEOE3	Industrial Safety

Syllabi for the Courses offering under Open Elective - I

Programme: B. Tech - (ECE, CSE, ME, CE, ECT & CST) **Semester: VI**

Course Code : V18EEOE1

Course Name : Energy Audit & Conservation **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Describe the concepts and procedures for Energy Audit	(K2)
CO2	Explain the necessity of Energy efficient lighting systems	(K2)
CO3	Discuss the role of Energy instruments in Energy Audit	(K2)
CO4	Describe the impact of harmonics on electrical systems	(K2)
CO5	Discuss various space heating methods	(K2)
CO6	Explain the necessary steps to take for energy conservation	(K2)

UNIT–I: BASIC OF ENERGY AUDIT

Energy audit – Definitions – Concept – Types of audit-Preliminary audit -Main audit– Energy index – Cost index – Pie charts –Sankey diagrams – Load profiles –– Numerical problems.

UNIT–II: LIGHTING

Definition of terms and units– Polar curve – Types of lamps - construction and working of-Incandescent lamp-Compact Florescent Lamp-sodium vapour lamp-Neon vapour lamp-LED -advantages and disadvantages – Types of lighting –Types of luminaries –- Replacement of existing lighting systems.

UNIT–III:ENERGY INSTRUMENTS

Energy Instruments – construction and working of -Watt–hour meter – Data loggers – Thermocouples – Pyrometers – Lux meters – Tong testers – Power analyzer-advantages and disadvantages

UNIT–IV:POWER FACTOR AND HARMONICS

Power factor – Methods of improvement – Location of capacitors – Power factor with non-linear loads – harmonics-Sources of harmonics- Effect of harmonics.

UNIT–V: **HEAT VENTILATION AND AIR CONDITIONING (HVAC)**

Introduction –Transfer of Heat–Space heating methods – Water heating systems -Ventilation – Air Conditioner-construction and working principle–Cooling load

UNIT–VI: ENERGY CONSERVATION AND ENERGY POLICY

Energy conservation schemes and energy saving potential-Energy conservation in Domestics Buildings- Energy conservation in commercial Buildings –comparison of Standard motors and Energy efficient motors–Energy policy-Energy Policy of an Industry(case study)

Text Books:

1. Energy management by W.R. Murphy & G. Mckay Butter worth, Elsevier publications. 2012.
2. Electric Energy Utilization and Conservation by S C Tripathy, Tata McGraw hill publishing company Ltd. New Delhi, 1991.

Reference Books:

1. Hand Book of Energy Audit by Sonal Desai- Tata McGraw hill, 2015.
2. Energy efficient electric motors by John .C. Andreas, Marcel Dekker Inc Ltd–2nd edition, 1995.

Programme : **B. Tech - (ECE, CSE, ME, CE, ECT & CST)** **Semester: VI**

Course Code : V18EEOE2

Course Name : Electrical Measuring Instruments **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	choose right type of instrument for measurement of voltage and current for ac and dc.	(K3)
CO2	choose right type of instrument for measurement of power and energy – able to calibrate energy meter by suitable method	(K3)
CO3	calibrate ammeter and potentiometer.	(K3)
CO4	select suitable bridge for measurement of electrical parameters	(K3)
CO5	use the ballistic galvanometer and flux meter for magnetic measuring instruments	(K3)
CO6	measure frequency and phase difference between signals using CRO. Able to use digital instruments in electrical measurements.	(K4)

UNIT–I: MEASURING INSTRUMENTS
Classification – Deflecting, control and damping torques – Ammeters and Voltmeters – PMMC, moving iron type, dynamometer and electrostatic instruments – Expression for the deflecting torque and control torque – Errors and compensations– Extension of range using shunts and series resistance – Numerical problems.

UNIT –II: MEASUREMENT OF POWER AND ENERGY
Single phase and three phase dynamometer wattmeter – LPF and UPF – Expression for deflecting and control torques - Single phase induction type energy meter – Driving and braking torques – errors and compensations – Three phase induction type energy meter.

UNIT – III: POTENTIOMETERS
Principle and operation of D.C. Crompton's potentiometer – Standardization – Measurement of unknown Resistance, Current and Voltage.AC Potentiometers: polar and coordinate types – Applications.

UNIT – IV: MEASUREMENTS OF PARAMETERS
Method of measuring low, medium and high resistance – Sensitivity of Wheat stone's bridge – Kelvin's double bridge for measuring low resistance– Megger– Measurement of earth resistance – Measurement of inductance and Quality Factor by Anderson's bridge–Measurement of capacitance and loss angle bySchering Bridge.

UNIT – V: MAGNETIC MEASUREMENTS

Ballistic galvanometer – Equation of motion – Flux meter – Constructional details–Determination of B–H Loop methods of reversals six point method – AC testing – Iron loss of bar samples– Core loss measurements by bridges and potentiometers.

UNIT – VI: DIGITAL METERS

Digital Voltmeters: Successive approximation type – Measurement of phase difference and Frequency using lissajious patterns in CRO–Digital multimeter –Digital Tachometer.

TEXT BOOKS:

1. Electrical & Electronic Measurement & Instruments by A. K. Sawhney DhanpatRai& Co. Publications, 2013.
2. Modern Electronic Instrumentation and Measurement Techniques – A. D. Helfrick and W.D. Cooper, PHI, 5th Edition, 2002.
3. Electrical Measurements and measuring Instruments – by E.W. Golding and F. C. Widdis, fifth Edition, Wheeler Publishing, 2011.

REFERENCE BOOKS:

1. Electrical and Electronic Measurements and instrumentation by R. K. Rajput, S. Chand, 2007.
2. Electrical Measurements – by Buckingham and Price, Prentice – Hall, 1988.
3. Electrical Measurements by Forest K. Harris. John Wiley and Sons,1952.
4. Electrical Measurements: Fundamentals, Concepts, Applications – by Reissland, M.U, New Age International (P) Limited, Publishers, 1967.

Programme : **B. Tech - (ECE, CSE, ME, CE, ECT & CST)** **Semester: VI**

Course Code : V18EEOE3

Course Name : Industrial Safety **[L : 3; T:0; P : 0 (3 credits)]**

Course Outcomes

After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand the overview of industrial safety	(K2)
CO2	Understand the importance and role of industrial safety	(K2)
CO3	Understand the industrial safety training methods	(K2)
CO4	Explain the role of management in industrial safety	(K2)
CO5	Choose proper design of electrical systems in order to control the Physical Hazards	(K2)
CO6	Describe the safety legalization	(K2)

UNIT-1: INTRODUCTION TO INDUSTRIAL SAFETY

Concept of Safety, Goals of safety engineering, Need for safety engineering, definitions of Accident, injury, unsafe actions & conditions. Responsibility of Safety - Society, Govt., Management, Duties of safety officer. Safety Committee -Membership, Functions & Scope of Safety committee.

UNIT -II: SAFETY AND HEALTH MANAGEMENT

Occupational Health Hazards, Promoting Safety, Safety and Health training, Stress and Safety. Ergonomics - Introduction, Definition, Objectives, Advantages. Ergonomics Hazards, Importance of Industrial safety, role of safety department.

UNIT -III : SAFETY AWARENESS & TRAINING

Training for Safety: Assessment of needs. Design & development of training programme. Training methods and strategies. Human behaviour and safety: Human factors contributing to accidents.

UNIT -IV : SAFETY ASSESSMENT AND CONTROL

Safety Management: Role of management in Industrial Safety. Safety Management- Principles & Practices. Safety Organization: Role of safety committee and its formation, Safety awareness programme: motivation, education and training, Appraisal of plant safety and measurement of safety performance, Total loss control concept, Introduction to productivity, Quality, Reliability, and Safety (PQRS) theory.

UNIT -V : INDUSTRIAL SAFETY AND CONTROL

Control of Physical Hazards: Purpose of lighting. Advantages of good illumination. Lighting and safety. Lighting and the work. Control of Chemical Hazards Hazardous properties of chemicals and appreciation of information provided in Material safety data sheets. Classification of dangerous materials with pictorial symbols, common hazard and common precautions for each class Control of Electrical Hazards Dangers from electricity. Safe limits of amperages, Voltages Safe distance from lines. Capacity and protection of conductors, Joints and connections, Means of cutting of power overload and short circuit protection. Factors contributing towards fire. Chemistry of fire. Classification of fires. Common causes of industrial fires.

UNIT -VI : SAFETY LEGALISATION

Legal Provisions regarding safety, Accident prevention &Compensation to affected employees as under Factories Act-1948, Factories Act(Amendment)1987, The Workmen CompensationAct-1923, ESI Act, Public Liabilities Insurance Act-1991,Fatal Accident Act.

TEXT BOOKS

1. Industrial Safety, Health and Environment Management Systems by R.K.Jain and Sunil S.Rao, Khanna Publishers, New Delhi, 2006.
2. Safety Management by Grimaldi and Simonds, AITBS Publishers, New Delhi, 2001.
3. Industrial Safety -National Safety Council of India, 2000.

REFERENCE BOOKS

1. Loss of prevention in Process Industries , Vol. 1 and 2 by Frank P. Lees, Butterworth-Heinemann Ltd., London, 1991.
2. Handbook of Occupational Safety and Health by Slote.L, John Willey and Sons, New York,1987.

SRI VASAVI ENGINEERING COLLEGE (AUTONOMOUS)

(Sponsored by Sri Vasavi Educational Society)

(Approved by AICTE, New Delhi & Permanently affiliated to JNTUK, Kakinada)

(Accredited by NAAC with 'A' Grade ,Recognized by UGC under section 2(f) & 12(B))

Pedatadepalli, **TADEPALLIGUDEM – 534 101.** W.G.Dist**. (A.P)**

Department of Computer Science & Engineering (Accredited by NBA)

Dt: 01.06.2020

The third meeting of Board of Studies in Department of Computer Science and Engineering is held at 11.30 AM on 31-05-2020 through online mode using GoToMeeting App (Access Code: 309-899-781).

The following members attended the meeting:

S.No.	Name of the Member	Designation	Role
1.	Dr. D Jaya Kumari	Professor, HoD-CSE, SVEC	Chairperson
2.	Dr. Krishna Mohan Ankala	Professor, UCEK, Kakinada	University Nominee
3.	Dr. R.B.V. Subramaanyam	Professor, Department of CSE, NIT Warangal	Academic Expert
4.	Prof. S. PallamSetty	Department of CS&SE, AU College of Engineering, Visakhapatnam	Academic Expert
5.	Sri. Srinivasa Raju Vuppalapati	Senior Consultant,MSR IT Services LLP,Hitech City, Hyderabad.	Industry Expert
6.	Mr.EEdala Rambabu	microfocus, Bangolore	Alumni
7.	Dr. V. Venkateswara Rao	Professor	Member
8.	Dr. G Loshma	Associate Professor	Member
9.	Ch. Raja Ramesh	Associate Professor	Member
10.	Dr. V.S.Naresh	Associate Professor	Member
11.	Dr. S.P.Malarvizhi	Associate Professor	Member
12.	Dr Veeraraghavan J	Associate Professor	Member
13.	Dr. K. Shirin Bhanu	Associate Professor	Member
14.	Dr. O. Sri Nagesh	Assistant Professor	Member
15.	Leelavathi Arepalli	Sr. Assistant Professor	Member
16.	D. Anjani Suputri Devi	Sr. Assistant Professor	Member
17.	G Sriram Ganesh	Assistant Professor	Member

The following are the Minutes of the Meeting

Item No.1: Welcome note by the Chairman BOS.

The HOD extended a formal welcome and introduced the members.

Item No.2: Review & Approval of the Course Structure for V and VI SEM -B.Tech (CSE) Programme under V18 Regulation.

Reviewed the Course Structure of V & VI semesters for B.Tech (CSE) Programme of V18 Regulation and following changes were made:

- **In SEM-V:**
  -The courses in Electives were rearranged as per the Threads (Electives) indicated in AICTE Model Curriculum.

  -The Courses approved in **Professional Elective-I** are:

  - Advanced Computer Architecture
  - Advanced Data Structures
  - Artificial Intelligence
  - Computer Graphics

- **In SEM-VI:**
  - Advanced Java and Web Technologies (**Course Code: V18CST20) is replaced with** Data Mining (**Course Code:V18CST20).**

  - Advanced Java and Web Technologies Lab (**Course Code: V18CSL09) is replaced with Data Mining Lab (Course Code:V18CSL09).**

  - Seminar (**Course Code: V18CSMPS) is replaced with** Mini Project (**Course Code: V18CSMPS)**

  - The Courses approved in **Professional Elective-II** are:

  - Software Testing Methodologies
  - Principles of Programming Languages
  - Machine Learning
  - Image Processing

  - The approved Course Structure of V and VI SEM is given in **Annexure-CSE-I.**

Item No.3: Approval of Syllabi for the proposed courses offered in V and VI semesters of B.Tech(CSE) Programme under V18 Regulation.

- Approved the syllabi for the courses offered in V & VI semesters B.Tech(CSE) under V18 Regulation. The approved Syllabus is given in **Annexure-CSE-II (a).**

- For B.Tech(ECE) Programme, the following courses are offered in V and VI SEM .

S.No.	SEM	Course Code	Course Name
1	V	V18CST81	Introduction to Data Structures
		V18CSL34	Data Structures Lab
2	VI	V18CST11	Computer Networks

		V18CSL35	Computer Networks Lab

- For B.Tech (MECH) Programme, the following course offered in V SEM

Course Code	**Course Name**
V18CSL05	Python Programming Lab

- The approved Syllabus for B.Tech(ECE) and B.Tech(MECH) was given in **Annexure-CSE-II(b).**

Item No. 4: Approval of the Open Elective courses and their Syllabi offered in VI semester under V18 Regulation for all other branches.

- Approved the list of Open Elective courses and syllabi offered in VI Semester**,** details are given in **Annexure-CSE-III.**

Item No. 5: Review & Approval of Course Structure and Syllabus for the proposed courses offered in III and IV Semesters of B.Tech(CST) Programme under V18 Regulation.

- The BOS Members suggested and approved the III & IV SEM B.Tech(CSE) Course Structure and Syllabus for B.Tech (CST) Programme also.

- The approved Course Structure is given in **Annexure-CSE-IV.**

Item No.6: Seeking approval from Academic Council towards introduction of B.Tech(Hons/Minor) in line with the guidelines prescribed by AICTE.

- The BOS Members approved the **B.Tech(Hons) Data ScienceCourse** for CSE, CST, ECE & ECT, **B.Tech(Minor) Data ScienceCourse** for CE, ME & EEE,Approved course structure and Syllabus is given in **Annexure-V.**

Dr.D Jaya Kumari

Chairperson of BOS

Annexure-CSE-I

Approved Course Structure in 3rd BOS Meeting (V18 Regulation)

Annexure-CSE-II (a)

Approved Syllabi for the courses offered in V & VI semesters B. Tech(CSE) under V18 Regulation

V Sem	Database Management Systems	Course Code:V18CST10	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate Database Systems, various Data Models and Database Architecture. (K2)

CO2: Apply ER Modeling to Design Relational Databases for Real Time Applications. (K3)

CO3: Apply SQL Constructs to Perform Database Operations. (K3)

CO4: Apply Normalization Techniques to Refine Schema. (K3)

CO5: Explain Transaction Management and Concurrency Control. (K2)

CO6: Experiment with various database indexing techniques. (K3)

UNIT-I: An Overview of Database Systems: Managing Data, File Systems verses DBMS, Advantages of DBMS, Data Independence. **Database System Architecture:** Three Levels of Architecture, External Level, Conceptual Level, Internal Level, Structure of DBMS, The Database Management Systems and Client/Server Architecture.

UNIT-II: Database Design: The E/R Models, Database Design and Er Diagrams, Entities, Attributes, Entity Sets, Relationships and Relationship Sets, Conceptual Design with ER Models. **Relational Model:** Integrity Constraints Over Relations, Key Constraints ,Foreign Key Constraints, General Constraints, Relational Algebra- Selection and Projection, Set Operation, Renaming, Joins, Division, Relational Calculus- Tuple Relational Calculus, Domain Relational Calculus.

UNIT-III: SQL Queries, Constraints and Triggers: The Form of Basic SQL Query, Union, Intersect, Except, Nested Queries, Aggregate Operators, Null Values, Complex Integrity Constraints in SQL, Triggers and Active Database.

UNIT-IV: Schema Refinement (Normalization): Purpose of Normalization or Schema Refinement, Concept of Functional Dependency, Normal Forms based on Functional Dependency (1NF, 2NF and 3NF), Concept of Surrogate Key, Boyce-Codd Normal Form (BCNF), Lossless Join and Dependency Preserving Decomposition, Fourth Normal Form(4NF).

UNIT-V:Transaction Management: Transaction, Properties of Transactions, Transaction Log, and Transaction Management with SQL Commit, Rollback and Savepoint. Concurrency Control: Concurrency Control for Lost Updates, Uncommitted Data, Inconsistent Retrievals and the Scheduler. **Concurrency Control with Locking Methods :** Lock Granularity, Lock Types, Two Phase Locking for Ensuring Serializability, Deadlocks, Concurrency Control with Time Stamp Ordering, Transaction Recovery.

UNIT-VI: Storage and Indexing: Overview of Storages and Indexing, Data on External Storage, File Organization and Indexing, Clustered Indexing, Primary and Secondary Indexes, Index Data Structures, Hash based Indexing, Tree based Indexing, Comparison of File Organization

TEXT BOOKS:

1. Introduction to Databse Systems, CJ Date,8th Edition, Pearson Education.
2. Data base Management Systems, Raghurama Krishnan, Johannes Gehrke, 3rd Edition TATA McGraw Hill.

REFERENCE BOOKS:

1. Data base Systems design, Implementation, and Management, Peter Rob & Carlos Coronel 7th Edition, Course Technology.

2. Fundamentals of Database Systems, ElmasriNavrate , 7th Edition, Pearson Education.
3. Database Systems - The Complete Book, H G Molina, J D Ullman, J Widom, 2nd Edition, Pearson.

V Sem	**Computer Networks**	Course Code: V18CST11	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Discuss fundamentals of network concepts and Reference Models.(K2)

CO2: Discuss Communication media and switching techniques.(K2)

CO3: Demonstrate Error control and protocols.(K3)

CO4: Apply Routing algorithms and congestion control algorithms.(K3)

CO5: Discuss Transport layer services and protocols. (K2)

CO6: Describe Application layer protocols.(K2)

UNIT-I: Introduction: Reference models: The OSI Reference Model- the TCP/IP Reference Model, Examples of Networks: Novell Networks, Arpanet, Internet, Network Topologies WAN, LAN, MAN.

UNIT– II: Physical Layer: Transmission Media, Multiplexing: FDM, WDM and TDM- LAN Technologies, introduction to switching: Circuit Switched Networks, Datagram Networks, and Virtual Circuit Networks.

UNIT–III: Data link layer: Design issues, Framing, Flow control, error control, error detection and correction, CRC, Checksum: idea, one's complement internet checksum, MAC: ALOHA, CSMA. Elementary Data Link Layer protocols: simplex protocol, Simplex stop and wait, Simplex protocol for Noisy Channel. Sliding window protocol: One bit, Go back N, Selective repeat-Stop and wait protocol, HDLC, point to point protocol (PPP).Piggybacking.

UNIT-IV : Network Layer : Network layer design issues- Algorithm shortest path routing, Flooding, Hierarchical routing, Broad cast, Multi cast Routing algorithms-Congestion control and algorithms, Internet Protocol (IP) Addresses, Subnet masking

UNIT–V :Transport Layer: Services, Primitives and sockets, Elements of transport protocols, Internet Transport protocols(TCP,UDP,RPC,RTTP/RTP,RTCP) Segment headers, Primitives, Control, Congestion control, Quality of Service, QoS improving techniques: Leaky Bucket and Token Bucket algorithm.

UNIT–VI: Application layer: DNS, SMTP, POP,FTP HTTP Presentation formatting. Network security: Introduction to Cryptography, Authentication, Basics of Public key and private key cryptography, digital signatures and certificates firewalls and wireless security.

TEXT BOOKS:

1. Computer Networks — Andrew S Tanenbaum, 4th Edition. Pearson Education/PHI
2. Data Communications and Networks – Behrouz A. Forouzan.Third Edition TMH

2. Understanding communications and Networks, 3rd Edition, W.A. Shay, Thomson

V Sem	Operating Systems	Course Code: V18CST12	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Describe Operating System Services and System Calls (K2).

CO2: Illustrate Process Management Concepts and CPU Scheduling Algorithms (K3).

CO3: Demonstrate Process Synchronization primitives (K3).

CO4: Demonstrate Deadlock Prevention, Avoidance and Detection methods (K3).

CO5: Illustrate Memory Management Techniques and Page Replacement Algorithms (K3).

CO6: Describe File System Concepts and Mass Storage Structures (K2) .

UNIT-I:Introduction: Operating-System Structure, Operating-System Services, User and Operating-System Interface, System Calls, Types of System Calls.

UNIT-II:Process Management: Process Concept, Process Scheduling, Operations on Processes, Interprocess Communication. **Threads:** Overview, Multithreading Models. **CPU Scheduling:** Basic Concepts, Scheduling Criteria, Scheduling Algorithms

UNIT-III : Process Synchronization: The Critical-Section Problem, Peterson's Solution, Synchronization Hardware, Mutex Locks, Semaphores, Classic Problems of Synchronization, Monitors

UNIT-IV:Deadlocks: System Model, Deadlock Characterization, Methods for Handling Deadlocks, Deadlock Prevention, Deadlock Avoidance, Deadlock Detection, Recovery from Deadlock

UNIT-V:Memory ManagementMain Memory: Swapping, Contiguous Memory Allocation, Segmentation, Paging, Structure of the Page Table

Virtual Memory: Introduction, Demand Paging, Page Replacement, Allocation of Frames, Thrashing

UNIT-VI:Storage Management: Overview of Mass-Storage Structure, Disk Scheduling, File Concept, Access Methods, Directory and Disk Structure, File-System Mounting, File Allocation Methods

Text Book:

1. Operating System Concepts, AbrahamSilberschatz, ,Peter Baer Galvin,Greg Gagne, 9th Edition, John Wiley and Sons Inc., 2012

Reference Books:

1. Operating Systems – Internals and Design Principles, William Stallings, 7th Edition, Prentice Hall, 2012
2. Modern Operating Systems, Andrew S. Tanenbaum, Third Edition, Addison Wesley,2007

V Sem	Design and Analysis of Algorithms	Course Code: V18CST13	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Describe asymptotic notation and basic concepts of algorithms (K2).

CO2: Apply divide and conquer paradigm to solve various problems (K3).

CO3: Use greedy technique to solve various problems (K3).

CO4: Apply dynamic programming technique to various problems (K3).

CO5: Employ backtracking technique to various problems (K3).

CO6: Apply branch and bound technique to various problems (K3).

UNIT-I: Introduction: What is an Algorithm, Algorithm Specification-Pseudo code Conventions Recursive Algorithm, Performance Analysis-Space Complexity, Time Complexity, Amortized Complexity, Amortized Complexity, Asymptotic Notation, Practical Complexities, Performance Measurement.

UNIT-II: Divide and Conquer: General Method, Defective Chessboard, Binary Search, Finding the Maximum and Minimum, Merge Sort, Quick Sort-Performance Measurement, Randomized Sorting Algorithms.

UNIT-III: The Greedy Method: The General Method, Knapsack Problem, Job Sequencing with Deadlines, Minimum-cost Spanning Trees-Prim's Algorithm, Kruskal's Algorithms, An Optimal Randomized Algorithm, Optimal Merge Patterns, Single Source Shortest Paths.

UNIT-IV: Dynamic Programming: All Pairs Shortest Paths, Single Source Shortest paths General Weights, Explain Optimal Binary Search Trees, String Edition, 0/1 Knapsack, Reliability Design.

UNIT-V: Backtracking: The General Method, The 8-Queens Problem, Sum of Subsets, Graph Coloring, Hamiltonian Cycles.

UNIT-VI: Branch and Bound: The Method-Least cost (LC) Search, The 15-Puzzle: an Example, Control Abstraction for LC-Search, Bounding, FIFO Branch-and-Bound, LC Branch and Bound, 0/1 Knapsack Problem-LC Branch-and Bound Solution, FIFO Branch-and-Bound Solution, Traveling Salesperson.

TEXT BOOKS:

1. Fundamentals of computer algorithms E. Horowitz S. Sahni, University Press

REFERENCE BOOKS:

1. Introduction to Algorithms Thomas H. Cormen, PHI Learning.

2. The Design and Analysis of Computer Algorithms, Alfred V. Aho, John E. Hopcroft, JeffreyD.Ullman.
3. Algorithm Design, Jon Kleinberg, Pearson.

V Sem	Unix programming	Course Code: V18CST14	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Illustrate the UNIX basics and the working of the built in commands in Unix (K2).

CO2: Demonstrate the file system and change the permissions associated with files (K2).

CO3: Develop basic programs using shell script (K3).

CO4: Demonstrate the grep family and data transforming programs sed, and awk (K2).

CO5: Construct programs for process system calls (K3).

CO6: Explain the concept of signals and its system call (K2).

UNIT-I : Introduction to UNIX: The UNIX Operating System, A brief history of UNIX, The UNIX Architecture, Basic features of UNIX. General Purpose Utilities- cal, date, man, echo, bc, clear, passwd, who, whoami,unameDirectory Handling Commands: pwd, cd, mkdir, rmdir. File Handling Utilities - cat, touch, cp, ls, rm, mv, nl, pg,tar,wc Displaying Commands: more,head,tail, simple filters and commands: cmp, comm., ulink, diff, head, tail, find, cut, paste,sort, uniq, tr, finger. Disk Utilities– du, df, mount, umount.Process Utilities–ps, kill. Networking Utilities– ping, telnet, rlogin, ftp.

UNIT-II : THE FILE SYSTEM : Types of Files, Directories and Files, UNIX File System, Absolute and relative pathnames, File Attributes and Permissions ,The File Command -knowing the File Type, Chmod Command- Changing File Permissions, Chown Command-Changing the Owner of a File, Chgrp Command- Changing the Group of a File. Vi editor-editing with vi, moving the cursor, editing, copying and moving text, pattern searching.

UNIT-III : Introduction to Shell Programming : Shell Variables-The Export Command-The Profile File a Script Run During Starting-The First Shell Script-The read Command-Positional parameters-The $? Variable knowing the exit Status-More about the Set Command-The Exit Command-Branching Control Structures-Loop Control Structures-The Continue and Break Statement-The Expr Command: Performing Integer Arithmetic-Real Arithmetic in Shell Programs-The here Document(<<)-I/O Redirection, The Sleep Command-Debugging Scripts-The Script Command-The Eval Command-The Exec Command. Command Line Structure - Met characters.

UNIT-IV : Regular Expressions:grep, egrep, fgrep, Sed- line addressing, context addressing, text editing,substitution.

Programming with awk: syntax of awk programming statement, structure of awk script, variables ,records fields, and special variables, patterns, operators ,simple input files, awk programming- simple awk programming, awk control structures, looping, functions in awk.

UNIT-V: Unix process: What is a process, process structure, process identifiers, starting new process, waiting for a process, zombie process, system call interface for process management - fork, vfork, exit, wait, waitpid, exec system call.

UNIT : VI Signals : Signal functions, unreliable signals, interrupted system calls, kill and raise functions, alarm, pause functions, abort, sleep functions

Text Books:

1. Introduction to Unix and shell programming, M G venkateshmurthy, Pearson education
2. Advanced programming in the unix environment, W. Richard Stevens, 3rd Edition, Pearson education

REFERENCES

1. Unix and shell Programming, B.A. Forouzan& R.F. Giberg, ,Thomson, First Edition, NewDelhi, 2003.

V Sem	Advanced Computer Architecture (Elective-I)	Course Code: V18CST15	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Describe the basics of quantitative design and analysis (K2).

CO2: Illustrate memory hierarchy schemes (K2).

CO3: Illustrate concepts of Instruction-Level Parallelism (K2).

CO4: Explain concepts of Data-Level Parallelism (K2).

CO5: Explain concepts of Thread-Level Parallelism (K2).

CO6: Describe architectural aspects of Warehouse-Scale Computers (K2).

UNIT-I : Fundamentals of Quantitative Design and Analysis: Classes of Computers, Defining Computer Architecture, Designing the Organization and Hardware to Meet Goals and Functional Requirements, Quantitative Principles of Computer Design

UNIT-II : Memory Hierarchy Design: Basics of Memory Hierarchies, Advanced Optimizations of Cache Performance, Memory Technology and Optimizations, Virtual Memory and Virtual Machines.

UNIT-III : Instruction-Level Parallelism: Concepts and Challenges, Basic Compiler Techniques, Reducing Branch Costs with Advanced Branch Prediction, Overcoming Data Hazards with Dynamic Scheduling, Tomasulo’s Approach, Hardware-Based Speculation, Multiple Issue and Static Scheduling

UNIT-IV : Data-Level Parallelism: Vector Architecture, VMIPS, Vector Processors, SIMD Instruction Set Extensions for Multimedia

UNIT-V : Thread-Level Parallelism: Introduction, Centralized Shared-Memory Architectures- Multiprocessor Cache Coherence, Basic Schemes for Enforcing Coherence, Snooping Coherence Protocols

UNIT-VI : Warehouse-Scale Computers: Introduction, Programming Models and Workloads for Warehouse-Scale Computers, Computer Architecture of Warehouse-Scale Computers

TEXT BOOK:

1. Computer Architecture: A Quantitative Approach, John L. Hennessy, David A. Patterson, 5th Edition, Morgan Kaufmann, Elsevier.

REFERENCE BOOKS:

1. Advanced Computer Architectures: A Design Space Approach, D Sima, T Fountain, P Karsuk, 1st Edition, Pearson
2. Advanced Computer Architecture, K Hwang, N Jotwani, 2nd Edition, McGraw-Hill

			L	T	P	C
V Sem	**Advanced Data Structures (Elective-I)**	Course Code: V18CST16	3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Explain external sorting method (K2).

CO2: Discuss pattern matching Algorithms (K2).

CO3: Illustrate various hash functions with appropriate examples (K3).

CO4: Illustrate various priority queues with appropriate examples (K3).

CO5: Construct self balanced tree with appropriate examples (K3).

CO6: Discuss Multiway search trees(K2).

UNIT-I: SORTING: Introduction - External Sorting- K-way Merging - Buffer Handling for parallel Operation- Run Generation- Optimal Merging of Runs.

UNIT-II: STRING MATCHING ALGORITHMS: The Navi String matching algorithms – The Robin-Krap algorithm – String Matching algorithm using finite automata – The Knuth Morris Pratt algorithm.

UNIT-III: SKIP LIST AND HASHING: Dictionaries – ADT- Linear List representation - Skip List representation: Ideal case – Insertion and Deletion –Assigning levels – The struct skip node – The class skip list – complexity of skipList methods. Hash Table Representation: Ideal hashing – Hash functions and tables -Linear probing- Hashing with Chains

UNIT-IV: PRIORITY QUEUES (HEAPS) : Definition and Applications – ADT – Linear lists – Heaps : Definition – Max heap and Min heap operations, Applications – Heap Sort – Huffman Codes.

UNIT-V: EFFICIENT BINARY SEARCH TREES : Introduction to AVL Trees- Red-Black Trees- Definition- Representation of a Red- Black Tree- Searching a Red-Black Tree- Inserting into a Red Black Tree- Deletion from a Red-Black Tree- Joining Red-Black Trees, Splitting a Red-Black tree – Splay Trees – Introduction – operation – Amortized complexity.

UNIT-VI: MULTIWAY SEARCH TREES : ISAM - M-Way Search Trees, Definition and Properties- Searching an M-Way Search Tree, B-Trees, Definition and Properties- search Elements in a B-tree- Insertion into B-Tree- Deletion from a B-Tree- Node Structure.

TEXT BOOKS:

1. Data Structures, Algorithms and Applications in C++; SartajSahni; UniverstiyPress ; Second Edition.

2. Introduction to Algorithms By Thomas H Cormen, Charless E leiserson, Ronald L Rivest and Cliford Stein PHI publication Third Edition (UNIT – II)

REFERENCES:

1. Data Structures, a Pseudocode Approach, Richard F Gilberg, BehrouzA Forouzan, Cengage.

2. An Introduction to Data Structures with applications By Jean Paul Trembly and Paul G Sorenson Tata McGraw Hill Second Edition
3. Fundamentals of Data Structures and algorithms by C V Sastry, Rakesh Nayak, Ch. Raja Ramesh, IK Publications, new Delhi.

V Sem	Artificial Intelligence (Elective-I)	Course Code: V18CST17	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Illustrate the concept of intelligent systems and current trends in AI. (K2)

CO2: Apply Problem solving, Problem reduction and Game Playing techniques in AI. (K3)

CO3: Illustrate the Logic concepts in AI. (K2)

CO4: Explain the Knowledge representation techniques in AI. (K2)

CO5: Describe Expert systems and their applications. (K2)

CO6: Illustrate Uncertainty Measures. (K2)

UNIT-I: Introduction to Artificial Intelligence: Introduction, history, intelligent systems, foundations of AI, applications, tic-tac-toe game playing, current trends in AI

UNIT-II: Problem solving: State-space Search and Control Strategies: Introduction, General Problem Solving, Characteristics of problem, Exhaustive searches, Heuristic search techniques, Iterative deepening a*, constraint satisfaction

Problem reduction and game playing: Introduction, problem reduction, game playing, alpha beta pruning, two-player perfect information games

UNIT-III:Logic concepts: Introduction, Propositional Calculus, Proportional Logic, Natural Deduction system, Axiomatic system, Semantic tableau system in proportional logic, Resolution Refutation in Propositional logic, Predicate Logic

UNIT-IV: Knowledge representation: Introduction, approaches to Knowledge representation, Knowledge representation using Semantic Networks, Extended Semantic Networks for KR, Knowledge representation using Frames

UNIT-V: Expert Systems and Applications: Introduction phases in building Expert Systems, Expert System versus Traditional Systems, Rule-based Expert Systems, Blackboard systems, Truth maintenance systems, applications of Expert Systems.

UNIT-VI: Uncertainty measure: Probability theory- Introduction, Probability Theory, Bayesian Belief networks, Certainty Factor Theory, Dempster-Shafer theory

Text Book:

1. Artificial Intelligence, Saroj Kaushik, 1st Edition, Cengage Learning.

Reference Books:

1. Artificial Intelligence, Elaine Rich, Kevin Knight, Shivashankar B Nair, 3rd Edition, Tata McGraw Hill Education Private Limited., 2009

2. Artificial Intelligence- A modern Approach, 3rd Edition, Stuart Russel, Peter Norvig, Pearson Education.

V Sem	**Computer Graphics (Elective-I)**	Course Code: V18CST18	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Understand the applications of computer graphics and learn basic algorithms (K2).
CO2: Analyze the concepts of 2D graphics along with transformation techniques (K3).
CO3: Understand 2D Views of objects and clipping algorithms (K2).
CO4: Illustrate 3D graphics and will get an idea about projections views of objects (K2).
CO5: Determine different visible surface detection methods (K2).
CO6: Understand different animation sequences and Color Models (K2).

UNIT I:Introduction: Application of Computer Graphics, raster scan systems, random scan systems, raster scan display processors. Output Primitives : Points and lines, line drawing algorithms(Bresenham's and DDA Line derivations and algorithms), mid-point circle and ellipse algorithms.

UNIT II: Filled area primitives: Boundary-fill and flood-fill algorithms. **2-D geometrical transforms:** Translation, scaling, rotation, reflection and shear transformations, and homogeneous coordinates, composite transforms.

UNIT III:2-D viewing: The viewing pipeline, viewing coordinate reference frame, window to view-port coordinate transformation, viewing functions, Cohen-Sutherland, Sutherland –Hodgeman polygon clipping algorithm.

UNIT IV:3-D Geometric transformations: Translation, rotation, scaling, reflection and shear transformations, composite transformations. 3D Viewing pipeline, clipping, projections (Parallel and Perspective). **3-D object representation:** Polygon surfaces, quadric surfaces, spline representation, Bezier curve and B-Spline curves.

Unit V:Visible surface detection methods: Classification, back-face detection, depth-buffer, scan-line, BSPtree methods, area sub-division.

Unit VI:Computer animation: Design of animation sequence, general computer animation functions, raster animation, computer animation languages. **Color Models** – RGB, YIQ, CMY, HSV.

TEXT BOOKS:

1. Computer Graphics C version, Donald Hearn, M.Pauline Baker, Pearson

2. Computer Graphics, Schaum's outlines", Zhigand xiang,Roy Plastock, 2nd Edition,Tata Mc-Graw Hill Edition.

3. Principles of Computer Graphics, S. Govil-Pai, 1st Edition, Springer International Edtion,2005.

REFERENCE BOOKS:

1. Computer Graphics Principles & practice, 2/e, Foley, VanDam, Feiner, Hughes, Pearson

2. Computer Graphics, Peter, Shirley, CENGAGE

3. Principles of Interactive Computer Graphics, Neuman , Sproul, TMH.

.

V Sem	Data Base Management System Lab	Course Code:V18CSL06	L	T	P	C
			0	0	3	1.5

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Build SQL Queries and Constraints (K3).

CO2: Experiment with various Database Indexing Techniques.(K3).

CO3: Construct PL/SQL Cursors and Exceptions (K3).

CO4: Develop application programs using PL/SQL (K3).

CO5: Develop PL/SQL Functions, Procedures, Packages (K3).

CO6: Apply projections and aggregation on collection of MongoDB database (K3).

List of Experiments

Part-A

1. Queries to facilitate acquaintance of Built-In Functions, String Functions, Numeric Functions, Date Functions and Conversion Functions.

2. Queries using operators in SQL

3. Queries to Retrieve and Change Data: Select, Insert, Delete, and Update

4. Queries using Group By, Order By, and Having Clauses

5. Queries on Controlling Data: Commit, Rollback, and Save point

6. Queries to Build Report in SQL *PLUS

7. Queries for Creating, Dropping, and Altering Tables, Views, and Constraints

8. Queries on Joins and Correlated Sub-Queries

9. Queries on Working with Index, Sequence, Synonym, Controlling Access, and Locking Rows for Update, Creating Password and Security features PL/SQL.

10. Write a PL/SQL Code using Basic Variable, Anchored Declarations, and Usage of Assignment Operation.

11. Write a PL/SQL Code Bind and Substitution Variables. Printing in PL/SQL

12. Write a PL/SQL block using SQL and Control Structures in PL/SQL

13. Write a PL/SQL Code using Cursors, Exceptions and Composite Data Types

14. Write a PL/SQL Code using Procedures, Functions, and Packages FORMS

Part-B

1. Install and start MongoDB

2. Create and drop database and collection

3. Insert,update ,delete,query document

4. Projection, limiting records, sorting records and aggregation in MongoDB

TEXT BOOKS:

1. Oracle Database 11g The Complete Reference by Oracle Press, Kevin Loney
2. Database Systems Using Oracle, Nilesh Shah, 2nd Edition ,PHI.
3. Introduction to SQL, Rick F Vander Lans, 4th Edition, Pearson Education.

REFERENCE BOOKS:

1. Introduction to SQL, Rick F. Vander Lans, 4th Edition, Pearson education.
2. Oracle PL/SQL Interactive Workbook, B. Rosenzweig and E. Silvestrova,2nd Edition, Pearson education.
3. SQL & PL/SQL for Oracle 10 g, Black Book, Dr. P. S. Deshpande, Dream Tech.

V Sem	Operating System and Unix Lab	Course Code: V18CSL07	L	T	P	C
			0	0	3	1.5

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Illustrate CPU scheduling algorithms (K3)

CO2: Apply Bankers Algorithm for Deadlock Avoidance and Deadlock Prevention (K3)

CO3: Use Page replacement algorithms for memory management (K3)

CO4: Demonstrate the basic knowledge of Linux commands and file handling utilities by using Linux shell environment. (K3)

CO5: Experiment with the concept of shell scripting programs. (K3)

CO 6: Illustrate the process of how the parent and child relationships (K3)

List of Experiments:

Part-A: OS Lab

1. Simulate the following CPU scheduling algorithms:
   a) FCFS b) SJF c) Round Robin d) Priority
2. Implement : fork (), wait (), exec() and exit () system calls
3. Simulate Producer and Consumer problem using Semaphores
4. Simulate Bankers Algorithm for Dead Lock Avoidance
5. Simulate Bankers Algorithm for Dead Lock Prevention
6. Simulate the following page replacement algorithms:
   a) FIFO b) LRU c) LFU
7. Simulate the following File allocation strategies:
   a) Sequenced b) Indexed c) Linked

Part-A: UNIX Lab

8. **Study of Unix Commands:** General Purpose Utilities, Directory Handling Commands, File Handling Utilities, Displaying Commands, Filters, Disk Utilities
9. Shell Script to list all of the directory files in a directory.
10. Shell Script to find the factorial of a given number
11. Shell Script to generate a Multiplication table.
12. Shell Script to Perform arithmetic operations
13. Implement an AWK script to count the number of lines in a file that do not contain vowels
14. Design an awk script to find the number of characters, words and lines in a file?
15. Design a C program to create a child process and allow the parent to display “parent” and the child to display “child” on the screen
16. Demonstration of GDB tool to understand process programme.
17. Design a C program to create a Zombie Process.
18. Design a C program that illustrates how an orphan is created.

Reference Books:

4. M G venkateshmurthy Introduction to Unix and shell programming Pearson education
5. W. Richard Stevens, Advanced programming in the unix environment, 3rd EditionPearson education.

V Sem	Technical Skills-III	Course Code: V18CST62	L	T	P	C
			0	0	4	MNC

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Apply fundamental data structures like List, Stack to solve real work problems in linear time i.e. O(n). (K3)

CO2: Make use of advanced data structures like queue, to solve complex problems in linear time , logarithmic time i.e. O(n) or O(nlogn).(K3)

CO3: Develop programs to solve problems by with the help of searching and sorting techniques. (K3)

CO4: Analyze linked list by comparing with Array List and develop programs to solve optimization Problems. (K4)

CO5: Experiment with types of Linked List to solve complex combinatorial problems. (K3)

CO6: Develop programs to solve complex problems by using combination of stack, Queue and List. (K3)

Data Structures

1. Problem solving using ArrayList
2. Problem solving using LinkedList
3. Problem solving using Stack
4. Problem solving using Queue
5. Problem solving using Searching
6. Problem solving using Sorting

TEXT BOOKS:

1. Introduction to Algorithms, Second Edition, Thomas H. Cormen Charles E. Leiserson.
2. Data Structures and Algorithms Made Easy: Narasimha Karumanchi .
3. The Algorithm Design Manual, Springer series, Steven Skiena.

VI Sem	Compiler Design	Course Code: V18CST19	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Describe the compilation process and lexical analyzer (K2)
CO2: Construct top down parsing Techniques (K3)
CO3: Construct bottom up parsing techniques (K3)
CO4: Construct syntax directed translation (K3)
CO5: Produce intermediate code generation process and run time environments (K3)
CO6: Explain the code generation process. (K2)

UNIT-I: Introduction: Language Processors, the Structure of a Compiler. **Lexical Analysis:** The Role of the Lexical Analyzer, Specification of Tokens, Recognition of Tokens and the Lexical-Analyzer Generator Lex.

UNIT-II: Syntax Analysis: Definition of CFG, Lexical Versus Syntactic Analysis, Writing a Grammar- Elimination of Left Recursion, Left Factoring. **Top Down Parsing:** Recursive Descent Parsing, First and Follow, LL(1) Grammars, Non recursive Predictive Parsing, Error Recovery in Predictive Parsing.

UNIT-III: Bottom-Up Parsing: Bottom Up Parser Classification, Reductions, Handle Pruning, Shift-Reducing, Conflicts During Shift Reduce Parsing. Introduction to LR Parsing: Difference between LR and LL Parsers, Why LR Parsers?, Items and the LR(0) automaton, The LR-Parsing Algorithm, Constructing SLR Parsing Tables

UNIT-IV: More powerful LR parsers: construction of CLR (1), LALR Parsing tables, Comparison of all Bottom Up approaches. Semantic Analysis: Syntax Directed Definitions, Evaluation Orders for SDD's, Applications of SDT.

UNIT-V: Intermediate Code Generation: Variants of Syntax Trees, Three-Address Code, Control Flow, Back-patching. Run-Time Environments: Storage Organization, Stack Allocation of Space, Heap Management.

UNIT-VI: Code Generation: Basic Blocks and Flow Graphs, Optimization of Basic Blocks, Peephole Optimization, Register Allocation and Assignment. **Machine-Independent optimizations:** The Principal Sources of Optimizations, Introduction to Data-Flow Analysis.

.TEXT BOOKS:

1. Compilers, Principles Techniques and Tools- Alfred V Aho, Monica S Lam, Ravi Sethi, Jeffrey D. Ullman,2nded, Pearson,2007

REFERENCE BOOKS:

1. Principles of compiler design, V. Raghavan, 2nd ed, TMH, 2011
2. Compiler Design, K. Muneeswaran, Oxford

VI Sem	**Data Mining**	Course Code:	L	T	P	C
		V18CST20	3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Explain the concept of Data Mining and its functionalities (K2)

CO2: Discuss various Data Preprocessing Techniques (K3)

CO3: Demonstrate Association Analysis Techniques (K3)

CO4: Illustrate various Classification Techniques (K3)

CO5: Demonstrate Alternative techniques for Classification (K3)

CO6: Use different Clustering techniques to cluster data (K3)

UNIT-I : Introduction: Need for Data Mining, Knowledge Discovery from Data, Kinds of Data mined, Kinds of Patterns mined, Technologies used, Kinds of Applications targeted, Major Issues in Data Mining, Data Objects and Attribute Types, Basic Statistical Descriptions of Data, Measuring Data Similarity and Dissimilarity

UNIT-II: Data Preprocessing: Overview of Data Preprocessing, Data Cleaning, Data Integration, Data Reduction, Data Transformation and Data Discretization

UNIT-III: Mining Frequent Patterns, Associations, and Correlations: Basic Concepts, Frequent Itemset Mining Methods- Apriori Algorithm: Finding Frequent Itemsets by Confined Candidate Generation, Generating Association Rules from Frequent Itemsets, Improving the Efficiency of Apriori, Pattern-Growth Approach for Mining Frequent Itemsets

UNIT-IV: Classification: Basic Concepts, Decision Tree Induction, Attribute Selection Measures, Tree Pruning

UNIT-V: Bayes Classification Methods: Bayes' Theorem, Naive Bayesian Classification. **Bayesian Belief Networks:** Concepts and Mechanisms, Training Bayesian Belief Networks

UNIT-VI: Cluster Analysis: Basic Concepts and Methods, Partitioning Methods, Hierarchical Methods, Density Based Method-DBSCAN

ext Books:

1. Data Mining Concepts and Techniques, Jiawei Han, Micheline Kamber, Jian Pei,3rd Edition, Morgan Kaufmann Publishers

Reference Books:

1. Introduction to Data Mining, Pang-Ning Tan, Michael Steinbach, Vipin Kumar, 1st Edition, Pearson Education.
2. Data Mining and Analysis,Mohammed J Zaki, Wagner Meira JR, 1st Edition ,Cambridge University Press.

VI Sem	**Object Oriented Analysis and Design Through UML**	Course Code: V18CST21	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Discuss importance of modeling. [K2]

CO2: Describe classes and relationships. [K2]

CO3: Develop class diagrams and object diagrams. [K3]

CO4: Develop Interaction, Use case and Activity Diagrams. [K3]

CO5: Illustrate advanced behavioral modeling. [K3]

CO6: Develop component and deployment diagrams.[K3]

UNIT-I: Introduction to UML: Importance of modeling - Principles of modeling - Object oriented modeling - Conceptual model of the UML – Architecture - Software Development Life Cycle.

UNIT-II: Advanced Structural Modeling: Classes – Relationships - Common Mechanisms and diagrams - Advanced classes - Advanced relationships – Interfaces - Types and Roles – Packages.

UNIT-III: Class & Object Diagrams: Terms, concepts - Modeling techniques for Class Diagrams - Modeling techniques for Object Diagrams.

UNIT-IV: Basic Behavioral Modeling-I: Interactions - Interaction diagrams. **Basic Behavioral Modeling-II:** Use cases - Use case Diagrams - Activity Diagrams.

UNIT-V: Advanced Behavioral Modeling: Events and signals - State machines - Processes and Threads - Time and space - State chart diagrams.

UNIT-VI: Architectural Modeling: Component- Deployment - Component diagrams - Deployment diagrams.

TEXT BOOK:

1. The Unified Modeling Language User Guide, Grady Booch, James Rumbaugh, Ivar Jacobson, Pearson Education.

REFERENCE BOOKS:

1. UML 2 Toolkit, Hans-Erik Eriksson, Magnus Penker, Brian Lyons, David Fado, WILEY-Dreamtech India Pvt. Ltd.
2. Fundamentals of Object Oriented Design in UML, Meilir Page-Jones, Pearson Education.
3. Modeling Software Systems Using UML2, Pascal Roques, WILEY-Dreamtech IndiaPvt. Ltd.

VI Sem	**Cryptography and Network Security**	Course Code: V18CST22	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1:Describe the fundamentals of networks security, security architecture, threats and vulnerabilities (K2)
CO2: Discuss the mathematical support for both symmetric and asymmetric key cryptography (K2)
CO3: Discuss the concept of developing encryption and decryption algorithms (K2)
CO4: Illustrate various techniques of encryption and message authentication functions (K3)
CO5: Apply various Key management and Distribution techniques and its importance (K3)
CO6: Discuss the Need of Transport level and Email security algorithms (K2)

UNIT-I: Computer Security concepts, security services, and Active vs. Passive attacks, Security mechanisms, OSI Security Architecture, A Model for Network security, Classical Encryption Techniques, Substitution ciphers, Transposition ciphers.

UNIT-II: Introduction to Number Theory, Fermat's and Euler's Theorem, the Chinese Remainder Theorem, Euclidean Algorithm, and Modular Arithmetic.

UNIT-III: Block Ciphers, Data Encryption Standard (DES), Block Cipher Design Principles, Advanced Encryption Standard (AES), Simplified AES, Multiple Encryption and Triple DES, Pseudorandom Number Generators, Pseudorandom Number Generation Using a Block Cipher, Stream Ciphers, RC4.

UNIT-IV: RSA, Diffie-HellmanKeyExchange, Elliptic Curve Cryptography, Message Authentication Code-Message Authentication Functions, Requirements, and Security, HMAC, Hash functions, Secure Hash algorithm,SHA-512.

UNIT-V: Digital Signatures, Digital Signature Standards, Authentication Protocols, Kerberos, Key Management and Distribution, X.509 Digital Certificate, NIST Digital Signature Algorithm.

UNIT-VI: Transport Level Security: Web Security Considerations, Secure Socket Layer, Transport Layer Security.Electronic mail security: Pretty Good Privacy (PGP),S/MIME.

TEXT BOOKS:

1. "Cryptography and Network Security, Principles and Practices", William Stallings Pearson Education, Sixth Edition.
2. "Network Security Essentials (Applications and Standards)", William Stallings, Pearson Education Fourth Edition.
3. Cryptographyand NetworkSecurity,BehrouzAForouzan,Debdeep Mukhopadhyay,(3e) McGrawHill.

REFERENCE BOOKS:

1. "Network Security – PrivateCommunication in a Public World" Charlie Kaufman, Radia Perlman and Mike Speciner , Pearson/PHI.

			L	T	P	C
VI Sem	**Software Testing Methodologies (Elective-II)**	Course Code: V18CST23	3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Describe Software testing objectives and methodology. (K2)

CO2: Apply various Software testing techniques. (K3)

CO3: Discuss Static testing techniques for software testing. (K2)

CO4: Differentiate software testing and debugging process. (K2)

CO5: Construct test cases by understanding test suite management. (K3)

CO6: Explain modern software testing tools to support software testing. (K2)

UNIT-I: Introduction to Software Testing: Evolution of software Testing, Myths and Facts, Goals of software Testing, Definitions of Testing, Model for Software Testing, Software Testing Terminology, Software Testing Life Cycle.

UNIT-II: Verification and Validation: Verification & Validation Activities, Verification, Verification of Requirements, Verification of High level and low level designs, How to verify code, Validation. **Dynamic Testing I:** Black Box testing techniques: Boundary Value Analysis, Equivalence Class Testing, Decision Table based Testing,

UNIT-III: Dynamic Testing II: White-Box Testing: Need of White-Box Testing, Logic coverage criteria, Basis path testing, Loop testing. **Static Testing:** Inspections, Structured Walkthroughs, Technical reviews.

UNIT-IV: Regression Testing: Progressive Vs Regressive Testing, Regression testability, Objectives of regression testing, When is Regression Testing done? Regression Testing Types, Regression testing techniques. **Debugging:** Debugging process, Techniques, correcting bugs.

UNIT-V: Efficient Test Suite Management: Why does a Test Suite grow, minimizing the Test suite and its benefits, Test suite prioritization, Types of Test case prioritization, Prioritization techniques, measuring the effectiveness of a prioritized Test Suite.

UNIT-VI: Software Quality Management: Software quality concept, Quality control and Quality Assurance, Software Quality metrics. **Automation and Testing Tools:** Need for automation, categorization of Testing tools, selection of testing tools, Overview of some commercial testing tools.

.TEXT BOOKS:

1. Software Testing, Principles and Practices, Naresh Chauhan, 9th Edition, Oxford Publisher.

REFERENCE BOOKS:

1. Software testing techniques - Boris Beizer, 2nd Edition, Dreamtech publisher..
2. Foundations of Software testing, Aditya P Mathur, 2nd ed, Pearson.
3. Software Testing- Yogesh Singh, CAMBRIDGE.

VI Sem	**Principles of Programming Languages (Elective-II)**	Course Code: V18CST24	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Describe Syntax and Semantics of Programming Languages (K2).

CO2: Illustrate Data, Data Types and basic statements of Programming Languages (K3).

CO3: Explain various sub programming Issues (K2).

CO4: Construct programs using Object Oriented, Concurrency and Event Handling (K3).

CO5: Distinguish Programming Languages, schemes and ML (K2).

CO6: Describe Logic Programming Languages (K2).

UNIT I: SYNTAX AND SEMANTICS: Reasons for studying Programming Languages, Programming Domains, Evolution of programming languages, describing syntax, context free grammars, attribute grammars, describing semantics, lexical analysis, parsing, recursive – decent bottom – up parsing.

UNIT II: DATA TYPES AND BASIC STATEMENTS: Introduction, primitive data types, strings, array types, associative arrays, record types, tuple types , union types, pointers and references, Arithmetic expressions, overloaded operators, type conversions, relational and Boolean expressions, assignment statements , mixed mode assignments, control structures – selection, iterations, branching, guarded Statements.

UNIT III: SUBPROGRAMS AND IMPLEMENTATIONS: Subprograms, design issues, local referencing, parameter passing, overloaded methods, generic methods, design issues for functions, semantics of call and return, implementing simple subprograms, stack and dynamic local variables, nested subprograms, blocks, dynamic scoping.

UNIT IV: OBJECT- ORIENTED PROGRAMMING,EVENT HANDLING: Object Model – Classes, Visibility and Information Hiding, Inheritance, Polymorphism, Abstract Classes, Event Handling- Mouse Clicks, Mouse Motion, Buttons, Labels, Text areas, Combo boxes, Examples.

UNIT V: FUNCTIONAL PROGRAMMING LANGUAGES: Introduction to lambda calculus, fundamentals of functional programming languages, Programming with Scheme, – Programming with ML.

UNIT VI: LOGIC PROGRAMMING LANGUAGES: Introduction to logic and Horn Clauses, logic programming – Programming in Prolog, Prolog Examples-Solving Word Puzzles, Eight Queens Problem.

TEXT BOOKS

1. Concepts of Programming Languages, Robert W. Sebesta ,Tenth Edition, Addison Wesley, 2012.
2. Programming Languages, Principles & Paradigms, 2ed, Allen B Tucker, Robert E Noonan, TMH

REFERENCES

1. The Scheme programming language, R. Kent Dybvig, Fourth Edition, MIT Press, 2009.
2. Elements of ML programming, Jeffrey D. Ullman, Second Edition, Prentice Hall, 1998.
3. The craft of Prolog, Richard A. O'Keefe MIT Press, 2009.

VI Sem	**Machine Learning (Elective-II)**	Course Code: V18CST25	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate basics of Machine Learning.(K2)

CO2: Explain Various Classification Techniques.(K2)

CO3: Explain Tree Based Learning and Ensemble Learning (K2)

CO4: Demonstrate Neural Networks and Multi Layer Perceptrons. (K2)

CO5: Explain Multi Layer Perceptrons and Back Propagation (K2).

CO6: Demonstrate Dimensionality Reduction Techniques (K2).

Unit-I: Introduction:Learning: Machine Learning, Types Of Machine Learning, Supervised Learning, Regression, Classification, The Machine Learning Process. Some Terminology: Weight Space, The Curse Of Dimensionality. Knowing What You Know: Testing Machine Learning Algorithms, Over fitting, Training, Testing, And Validation Sets. Some Basic Statistics: Averages Variance And Covariance, The Bias-Variance Tradeoff.

UNIT II: Classification: The General Problem, Logistic Regression, K-Nearest Neighbor Classifiers, Support Vector Machines. Assessing Performance Of Classifiers: The Confusion Matrix, Accuracy, 0/1 Loss, Sensitivity And Specificity, The Receiver Operator Characteristic (Roc) Curve. Unbalanced Datasets Measurement: Precision, Recall And F1 Score.

UNIT-III: Ensemble Learning : Boosting, Adaboost, Stumping, Bagging , Subbagging, Random Forests.

UNIT-IV: Neural Networks: The Brain And The Neuron, Hebb's Rule, Mcculloch And Pitts Neurons, Limitations Of The Mcculloch And Pitts Neuron Model, Neural Networks, The Perceptron, The Learning Rate, The Bias Input The Perceptron Learning Algorithm, An Example Of Perceptron Learning: Logic Functions Implementation, Linear Separability, Linear Regression, Linear Regression Examples

UNIT-V: The Multi Layer Perceptron(MLP): Going Forwards, Going Backwards(Back Propagation of Errors), The MLP in practice, Examples of using the MLP: Classification and Regression, Deriving Back-Propagation.

UNIT-VI: Dimensionality Reduction: Linear Discriminant Analysis (LDA), Principal Components Analysis (PCA), Relation With The Multi-Layer Perceptron, Kernel PCA, Factor Analysis, Independent Components Analysis (ICA) Locally Linear Embedding.

TEXT BOOKS:

1. Machine Learning: An Algorithmic Approach.Stephen Marsland, 2nd Edition, CRC Press.

2. A First Course in Machine Learning; Volume in Machine Learning and Pattern Recognition Series – CRC-Taylor & Francis-Chapman & Hall Rogers S., Girolami M., (2011).

REFERENCE BOOKS:

1. Machine Learning: The art and Science of Algorithms that Make sense of Data. Peter Flach, Cambridge, First Edition, 2012.

<tr><td rowspan="2">VI Sem</td><td rowspan="2">Image Processing (Elective-II)</td><td rowspan="2">Course Code: V18CST26</td><td>L</td><td>T</td><td>P</td><td>C</td></tr>
<tr><td>3</td><td>0</td><td>0</td><td>3</td></tr>
</table>

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Illustrate the different Transforms Techniques & their use in Image Processing applications (K3).

CO2: Demonstrate Spatial & frequency domain filtering (like smoothing & sharpening operations) on Images (K3).

CO3: Describe Restoration operations/techniques on Images (K2).

CO4: Demonstrate the Image compression Techniques and multi-resolution processing on Images (K3).

CO5: Illustrate Morphological operations on Images & Image segmentation (K3).

CO6: Illustrate the different color Image Processing Techniques on Images (K3).

UNIT-I : Introduction: Introduction to Image Processing, Fundamental steps in digital image processing, components of an image processing system, image sensing and acquisition, image sampling and quantization, some basic relationships between pixels, an introduction to the mathematical tools used in digital image processing. **Image Transforms:** Need for image transforms, Discrete Fourier transform (DFT) of one variable, Extension to functions of two variables, some properties of the 2-D Discrete Fourier transform, Importance of Phase, Walsh Transform. Hadamard transform, Haar Transform, Slant transform, Discrete Cosine transform.

UNIT-II: Intensity Transformations and Spatial Filtering: Background, Some basic intensity transformation functions, histogram processing, fundamentals of spatial filtering, smoothing spatial filters, sharpening spatial filters. **Filtering in the Frequency Domain:** Preliminary concepts, The Basics of filtering in the frequency domain, image smoothing using frequency domain filters, Image Sharpening using frequency domain filters, Selective filtering.

UNIT-III: Image Restoration and Reconstruction: A model of the image degradation / Restoration process, Noise models, restoration in the presence of noise only-Spatial Filtering, Periodic Noise Reduction by frequency domain filtering, Linear, Position –Invariant Degradations, Estimating the degradation function, Inverse filtering, Minimum mean square error (Wiener) filtering, constrained least squares filtering ,geometric mean filter .

UNIT-IV: Image compression: Fundamentals, Basic compression methods: Huffman coding, Arithmetic coding, LZW coding, Run-Length coding, Bit-Plane coding. **Wavelets and Multiresolution Processing:** Image pyramids, subband coding, Multiresolution expansions, wavelet transforms in one dimensions & two dimensions, Wavelet coding.

UNIT-V: Image segmentation: Fundamentals, point, line, edge detection, thresholding, region –based segmentation. **Morphological Image Processing:** Preliminaries, Erosion and dilation, opening and closing, basic morphological algorithms for boundary extraction, thinning, gray-scale morphology.

UNIT-VI: Color image processing: color fundamentals, color models, pseudo color image processing, basics of full color image processing, color transformations, smoothing and sharpening. Image segmentation based on color, noise in color images, color image compression.

TEXT BOOKS:

1. Digital Image Processing, R. C. Gonzalez and R. E. Woods, 3rd edition, Prentice Hall, 2008.

2. Digital Image Processing, Jayaraman, S. Esakkirajan, and T. Veerakumar, Tata McGraw-Hill Education, 2011.

REFERENCE BOOKS:

1. Fundamentals of Digital Image Processing, Anil K.Jain, Prentice Hall of India, 9th Edition, Indian Reprint, 2002.

2. Digital Image Processing and Analysis, B.Chanda, D.Dutta Majumder, PHI, 2009.

VI Sem	**Object Oriented Analysis and Design Through UML Lab**	Course Code: V18CSL08	L	T	P	C
			0	0	3	1.5

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Develop OOAD and UML concepts to identify Classes, Use Cases and their relationships (K3).

CO2: Develop Class diagrams (K3).

CO3: Develop Use case diagrams (K3).

CO4: Construct Interaction diagrams (K3).

CO5: Develop State chart, Activity diagrams (K3).

CO6: Develop Component and Deployment diagrams (K3).

List of Experiments

1. raw basic class diagrams to identify and describe key concepts like classes, and their relationships.
2. Draw one or more Use Case diagrams for capturing and representing requirements of the system. Use case diagrams must include template showing description and steps of the Use Case for various scenarios.
3. Draw sequence diagrams OR communication diagrams with advanced notation for system to show objects and their message exchanges.
4. Draw activity diagrams to display either business flows or like flow charts.
5. Develop State chart diagrams.
6. Draw component diagrams assuming that build the system reusing existing components along with a few new ones.
7. Draw deployment diagrams to model the runtime architecture of system.
8. Design Case study on Library Management System
9. Design Case Study on Hospital Management System
10. Case study-Railway Reservation System
11. Design Case study on Library Management System using C4 Model.

TEXT BOOKS:

1. The Unified Modeling Language User Guide, Grady Booch, James Rumbaugh, Ivar Jacobson, Pearson Education.

REFERENCE BOOKS:

1. UML 2 Toolkit, Hans-Erik Eriksson, Magnus Penker, Brian Lyons, David Fado, WILEY-Dreamtech India Pvt. Ltd.
2. Fundamentals of Object Oriented Design in UML, Meilir Page-Jones, Pearson Education.
3. Modeling Software Systems Using UML2, Pascal Roques, WILEY- Dreamtech India Pvt. Ltd.
4. (https://c4model.com/)

VI Sem	**Data Mining Lab**	Course Code:V18CSL09	L	T	P	C
			0	0	3	1.5

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate Data Preprocessing techniques.(K3)

CO2: Demonstrate Association Rule Mining techniques.(K3)

CO3: Demonstrate Classification techniques. (K3)

CO4: Demonstrate the Clustering techniques. (K3)

List of Experiments (Using Weka Tool):

1. Demonstrate Data Preprocessing on predefined Weka dataset labor.arff
2. Create a student.arff dataset and Demonstrate Data Preprocessing on it
3. Demonstrate Association rule process on predefined Weka dataset contactlenses.arff using apriori algorithm.
4. Create an employee.arff dataset and demonstrate Association rule process on it using apriori algorithm
5. Demonstrate Classification process on student.arff dataset using j48 algorithm
6. Create a customer.arff dataset and demonstrate Classification process on it using j48 algorithm
7. Demonstrate Classification process on employee.arff dataset using id3 algorithm
8. Demonstrate Classification process on employee.arff dataset using Naïve Bayes algorithm
9. Demonstrate Clustering process on predefined Weka dataset iris.arff using simple k-means algorithm.
10. Demonstrate Clustering process on dataset student.arff using simple k- means algorithm.

Reference Books:

1. Data Mining: Practical Machine Learning Tools and Techniques, Ian H. Witten, Eibe Frank, Mark A. Hall, 3rd Edition, Morgan Kaufmann Publishers
2. Data Mining Concepts and Techniques, Jiawei Han, Micheline Kamber, Jian Pei, 3rd Edition, Morgan Kaufmann Publishers
3. Introduction to Data Mining, Pang-Ning Tan, Michael Steinbach, Vipin Kumar, 1st Edition, Pearson Education Inc.

VI Sem	Technical Skills-IV	Course Code: V18CST63	L	T	P	C
			0	0	4	MNC

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate java fundamentals to solve real world computational problems. (K2)

CO2: Illustrate object orientated concepts in solving problems with reusability feature. (K2)

CO3: Apply collections on java to solve complex problems in linear time. (K3)

CO4: Make use of StringBuffer and StringBuilder to solve problems in linear and logarithmic time. (K3)

CO5: Experiment with Object Oriented concepts toreduce complexity of problems.(K3)

CO6: Develop programs to solve robust programs by using Exception Handling. (K3)

Java Programming

1. Problem solving using Control Statements
2. Problem solving using Arrays
3. Problem solving using Strings ,StringBuffer, StringBuilder
4. Problem solving using OOP Concepts
5. Problem solving using Inheritance
6. Problem solving using Polymorphism
7. Problem solving Collections (includes all)
8. Problem solving using Exception Handling

TEXT BOOKS:

1. Thinking on Java - O'Reilly.
2. Java Complete Reference.
3. Effective Java. Third Edition. Joshua Bloch

Annexure – CSE-II(b)

Approved Syllabi for the courses offered in V & VI semesters B. Tech(ECE) under V18 Regulation

V Sem	Introduction to Data Structures	Course Code: V18CST81	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Explain Sorting and searching techniques. (k2)
CO2: Demonstrate algorithm notations. (K2)
CO3: Develop Singly Linked Lists, Double Linked List. **(K3)**
CO4: Interpret the Basic Concepts in Data Structures, Stacks and Queues **(K3)**
CO5: Develop Binary trees and BST **(K3)**
CO6: Develop various graph algorithms. **(K3)**
Unit I: Sorting: Bubble sort, Insertion sort, selection sort, quick sort, merge sort, heap sort, radix sort. Searching: linear search, binary search. Introduction to hashing, hash functions.

Unit II: Introduction to data structures – Basic terminology, classification of data structures, operation on data structures, ADT. **Arrays**: Representation of arrays - polynomial representation, addition of two polynomials, sparse representation, transpose of sparse matrix. (**Refer Reference Text book 1**)

Unit III: Linked list: Introduction, **single linked list** Representation of node, operations on single linked list, reverses the linked list. **Double linked list**: operations (insert delete and display). **Circular linked List** and its operations (create and display single circular linked list).

Unit IV: Stacks introduction, array representation, operations, linked list representation, operation on linked stacks, infix to postfix conversion, evolution of arithmetic expression. **Queues** Introduction, Array representation, operations linked list representation, linked queue operations, circular queues.

Unit V: Trees: Introduction, Terminology, Representation of Trees, types of trees, **Binary Trees:** Properties of Binary Tress, creating a binary tree from general tree, Tree Traversals. **Binary Search Tree:** introduction, creation, insertion, delete, display and search operations.

Unit VI: Graphs: introduction, Terminology, directed graphs, Graph Representation, **Graph Traversal techniques**: Depth First Search, Breadth First Search. **Spanning Trees**: Krushkal's Algorithm, Prim's algorithm.

TEXT BOOKS:

1. Data Structures using C by Reema Thareja, Second Edition, oxford publications.

2. Data Structures, algorithms and applications in C++, Sartaj Sahni, Universities press, Second Edition.

REFERENCE BOOKS:

1. Fundamentals of Data Structures and algorithms by C V Sastry, Rakesh Nayak, Ch. Raja Ramesh, Distributed by Wiley publications, new Delhi.
2. Fundamentals of Data Structures in C++, Ellis Horowitz, Sartaj Sahni and Dinesh Mehta, 2nd Edition, Universities Press (India) Pvt. Ltd.
3. An Introduction to Data Structures with Application, Jean-Paul Tremblay , Paul Sorenson, Second Edition.
4. Data structures using C and C++, Langsam, Augenstein and Tanenbaum, PHI.

5. Problem solving with C++, The OOP, Fourth edition, W.Savitch, Pearson education.

V Sem	**Data Structures and Algorithms Lab**	Course Code: V18CSL34	L	T	P	C
			0	0	3	1.5

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: ConstructSorting and searching methods. (K3)
CO2: Construct hash table (K3)
CO3: Implement programs using Singly Linked Lists, Double Linked List. (K3)
CO4: Construct Stacks, Queues and Applications. (K3)
CO5: Construct Binary search tree (K3)
CO6: Implement various graph Traversal algorithm. (K3)

List of Experiments

1. Implement the following sorting techniques
   (a)Selection sort (b) Quick sort (c) Merge sort
2. Implement the following searching methods
   (a)Linear search (b) Binary search.
3. Implement hash table and its operations.(Note: Use at least one collision resolution technique)
4. Implement addition of two polynomials. (Using arrays).
5. Implement single linked list and its operations. (create, insert, delete, display, reverse list)
6. Implement double linked list and its operations.
7. Implement stack operations using arrays.
8. Implement queue operations using arrays.
9. Develop a Program to convert infix expression to postfix expression.
10. Develop a Program to implement Binary search Tree and its operations.
11. Implement Depth First Search for traverse a given graph.
12. Implement Breadth First Search for traverse a given graph.

TEXT BOOKS:

1. Data Structures, algorithms and applications in C++, Sartaj Sahni, Universities press, Second Edition.
2. Fundamentals of Data Structures in C++, Ellis Horowitz, Sartaj Sahni and Dinesh Mehta, 2nd Edition, Universities Press (India) Pvt. Ltd.

REFERENCE BOOKS:

1. An Introduction to Data Structures with Application, Jean-Paul Tremblay , Paul Sorenson, Second Edition.
2. Fundamentals of Data Structures and algorithms by C V Sastry, Rakesh Nayak, Ch. Raja Ramesh, IK Publications, new Delhi.
3. Data structures using C and C++, Langsam, Augenstein and Tanenbaum, PHI.
4. Problem solving with C++, The OOP, Fourth edition, W.Savitch, Pearson education.

VI Sem	Computer Networks	Course Code: V18CST11	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Discuss fundamentals of network concepts and Reference Models.(K2)

CO2: Discuss Communication media and switching techniques.(K2)

CO3: Demonstrate Error control and protocols.(K3)

CO4: Apply Routing algorithms and congestion control algorithms.(K3)

CO5: Discuss Transport layer services and protocols. (K2)

CO6: Describe Application layer protocols.(K2)

UNIT-I: Introduction: Reference models: The OSI Reference Model- the TCP/IP Reference Model, Examples of Networks: Novell Networks, Arpanet, Internet, Network Topologies WAN, LAN, MAN.

UNIT– II: Physical Layer: Transmission Media, Multiplexing: FDM, WDM and TDM- LAN Technologies, introduction to switching: Circuit Switched Networks, Datagram Networks, and Virtual Circuit Networks.

UNIT–III: Data link layer: Design issues, Framing, Flow control, error control, error detection and correction, CRC, Checksum: idea, one's complement internet checksum, MAC: ALOHA, CSMA. Elementary Data Link Layer protocols: simplex protocol, Simplex stop and wait, Simplex protocol for Noisy Channel. Sliding window protocol: One bit, Go back N, Selective repeat-Stop and wait protocol, HDLC, point to point protocol (PPP).Piggybacking.

UNIT-IV : Network Layer : Network layer design issues- Algorithm shortest path routing, Flooding, Hierarchical routing, Broad cast, Multi cast Routing algorithms-Congestion control and algorithms, Internet Protocol (IP) Addresses, Subnet masking

UNIT–V :Transport Layer: Services, Primitives and sockets, Elements of transport protocols, Internet Transport protocols(TCP,UDP,RPC,RTTP/RTP,RTCP) Segment headers, Primitives, Control, Congestion control, Quality of Service, QoS improving techniques: Leaky Bucket and Token Bucket algorithm.

UNIT–VI: Application Layer: DNS, SMTP, POP,FTP HTTP Presentation formatting. Network security: Introduction to Cryptography, Authentication, Basics of Public key and private key cryptography, digital signatures and certificates firewalls and wireless security.

TEXT BOOKS:

1. Computer Networks — Andrew S Tanenbaum, 4th Edition. Pearson Education/PHI

2. Data Communications and Networks – Behrouz A. Forouzan.Third Edition TMH

REFERENCES:

2. Understanding communications and Networks, 3rd Edition, W.A. Shay, Thomson

VI Sem	**Computer Networks Lab**	Course Code: V18CSL35	L	T	P	C
			0	0	3	1.5

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Implement Error detection techniques **[K3]**

CO2: Implement Routing Algorithms **[K3]**

CO3: Implement Congestion Algorithms [K3]

CO4:Implement Sliding Window Algorithms. **[K3]**

CO5: Implement socket programming **[K3]**

List of Experiments:

From 1-4 simulation and 5-11 implement using C/C++/Java/Python

1. Study of basic network commands and Network configuration commands.
2. Implementation of Bit Stuffing
3. Implementation of Character Stuffing
4. Implementation of Dijkstra's algorithm
5. Implementation Distance vector algorithm
6. Construct Detecting error using CRC-CCITT
7. Implementation of stop and wait protocol
8. Implementation of Congestion control using leaky bucket algorithms
9. Implementation using Socket TCP both client and server programs.
10. Implementation using Socket UDP both client and server programs

TEXT BOOKS:

1. Computer Networks — Andrew S Tanenbaum, 4th Edition. Pearson Education/PHI
2. Data Communications and Networks – Behrouz A. Forouzan.Third Edition TMH

REFERENCES:

1. An Engineering Approach to Computer Networks-S.Keshav, 2nd Edition, Pearson Education
2. Understanding communications and Networks, 3rd Edition, W.A. Shay, Thomson

V Sem	**Python Programming Lab**	Course Code: V18CSL05	L	T	P
			0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate Basic Python Programs (K3)

CO2: Constructcontrol structures in python (K3)

CO3: Demonstrate functions and packages. (K3)

CO4: Construct python programs using structured data types. (K3)

CO5: Demonstrate TextFiles (K3)

Syllabus

Basics of python programming: Features of python – History of Python - The Future of Python installation and execution - Data types – Identifiers - variables – type conversions- Literal Constants – Numbers – Strings. I/O statements. Operators and expressions, operator precedence – expression evaluation.

Exercise 1 - Basics

a) A sample Python Script using command prompt, Python Command Line and IDLE

b) A program to purposefully raise an Indentation Error and correct it

Exercise 2 - Operations

a) A program to compute distance between two points taking input from the user (Pythagorean Theorem)

b) A program on add.py that takes 2 numbers as command line arguments and prints its sum.

Decision Control statements: conditional (if), alternative (if-else), chained conditional (if-elif-else); **Iteration:** while loop, for loop, nested for loop, range function, break, continue and pass statements.

Exercise - 3 Control Flow

a) A Program to implement for checking whether the given number is a even number or not.

b) A program to construct reverse the digits of a given number and add it to the original, If the sum is not a palindrome repeat this procedure.

c) A program using a while loop that asks the user for a number, and prints a countdown from that number to zero.

Exercise 4 - Control Flow – Continued

a) A program to construct the following pattern, using a nested for loop.

```
*
* *
* * *
* * * *
* * * * *
* * * *
* * *
* *
*
```

b) By considering the terms in the Fibonacci sequence whose values do not exceed four million, find the sum of the even-valued terms.

Functions and modules : Introduction - Function Definition - Function Call – argument types- Scope and Lifetime - The return statement - More on Defining Functions - Lambda Functions or Anonymous Functions.

Exercise - 5 – Problem Solving using Functions

a) Find mean, median, mode for the given set of numbers passed as arguments to a function

b) Develop a function nearly_equal to test whether two strings are nearly equal. Two strings a and b are nearly equal when a can be generated by a single mutation on b.

c) Develop a Recursive Function to find the Factorial of a given number .

d) Develop function to compute gcd, lcm of two numbers. Each function shouldn't exceed one line.

Lists: list operations, list slices, list methods, mutability, cloning lists, list parameters. **Tuples**: tuple assignment, tuple as return value. **Set:** Set Creation, Set Operations. **Dictionaries**: Creation, operations; comprehension, operations on strings.

Exercise - 6 Structured Data types

a) a program to count the number of strings where the string length is 2 or more and the first and last character are same from a given list of strings.

b) a program to develop unzip a list of tuples into individual lists and convert them into dictionary.

Exercise – 7 Structured Data types Continued

a) A program to count the numbers of characters in the string and store them in a dictionary data structure

b) a program to use split and join methods in the string and trace a birthday with a dictionary data structure.

Documentation Strings- Modules – Packages

Exercise - 8– Modules

a) Install packages requests, flask and explore them using (pip)

b) A program to implement a script that imports requests and fetch content from the page. Eg. (Wiki)

c) Develop a simple script that serves a simple HTTP Response and a simple HTML Page

Introduction - Types of files - Text files - reading and writing files

Exercise - 9 Files

a) a program to count frequency of characters in a given file. Can you use character frequency to tell whether the given file is a Python program file, C program file or a text file?

b) a program to compute the number of characters, words and lines in a file.

Classes, Methods, Constructor, Inheritance, Overriding Methods, Data hiding

Exercise - 10 OOP

a) Class variables and instance variable and illustration of self variable

i) Robot

ii) ATM Machine

Annexure-CSE-III

<tr><td rowspan="2">VI Sem</td><td rowspan="2">Database Management Systems</td><td rowspan="2">Course Code:V18CSTOE01</td><td>L</td><td>T</td><td>P</td><td>C</td></tr>
<tr><td>3</td><td>0</td><td>0</td><td>3</td></tr>
</table>

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate Database Systems, various Data Models and Database Architecture. (K2)

CO2: Apply ER Modeling to Design Relational Databases for Real Time Applications. (K3)

CO3: Apply SQL Constructs to Perform Database Operations. (K3)

CO4: Apply Normalization Techniques to Refine Schema. (K3)

CO5: Explain Transaction Management and Concurrency Control. (K2)

CO6: Experiment with various database indexing techniques. (K3)

UNIT-I: An Overview of Database Systems: Managing Data, File Systems verses DBMS, Advantages of DBMS, Data Independence. **Database System Architecture:** Three Levels of Architecture, External Level, Conceptual Level, Internal Level, Structure of DBMS, The Database Management Systems and Client/Server Architecture.

UNIT-II: Database Design: The E/R Models, Database Design and Er Diagrams, Entities, Attributes, Entity Sets, Relationships and Relationship Sets, Conceptual Design with ER Models. **Relational Model:** Integrity Constraints Over Relations, Key Constraints ,Foreign Key Constraints, General Constraints, Relational Algebra- Selection and Projection, Set Operation, Renaming, Joins, Division, Relational Calculus- Tuple Relational Calculus, Domain Relational Calculus.

UNIT-III: SQL Queries, Constraints and Triggers: The Form of Basic SQL Query, Union, Intersect, Except, Nested Queries, Aggregate Operators, Null Values, Complex Integrity Constraints in SQL, Triggers and Active Database.

UNIT-IV: Schema Refinement (Normalization): Purpose of Normalization or Schema Refinement, Concept of Functional Dependency, Normal Forms based on Functional Dependency (1NF, 2NF and 3NF), Concept of Surrogate Key, Boyce-Codd Normal Form (BCNF), Lossless Join and Dependency Preserving Decomposition, Fourth Normal Form(4NF).

UNIT-V:Transaction Management: Transaction, Properties of Transactions, Transaction Log, and Transaction Management with SQL Commit, Rollback and Savepoint. Concurrency Control: Concurrency Control for Lost Updates, Uncommitted Data, Inconsistent Retrievals and the Scheduler. **Concurrency Control with Locking Methods :** Lock Granularity, Lock Types, Two Phase Locking for Ensuring Serializability, Deadlocks, Concurrency Control with Time Stamp Ordering, Transaction Recovery.

UNIT-VI: Storage and Indexing: Overview of Storages and Indexing, Data on External Storage, File Organization and Indexing, Clustered Indexing, Primary and Secondary Indexes, Index Data Structures, Hash based Indexing, Tree based Indexing, Comparison of File Organization.

TEXT BOOKS:

1. Introduction to Databse Systems, CJ Date,8th Edition, Pearson Education.
2. Data base Management Systems, Raghurama Krishnan, Johannes Gehrke, 3rd Edition TATA McGraw Hill.

REFERENCE BOOKS:

1. Data base Systems design, Implementation, and Management, Peter Rob & Carlos Coronel 7th Edition, Course Technology.
2. Fundamentals of Database Systems, ElmasriNavrate , 7th Edition, Pearson Education.
3. Database Systems - The Complete Book, H G Molina, J D Ullman, J Widom, 2nd Edition, Pearson.

VI Sem	SOFTWARE ENGINEERING	Course Code: V18CSTOE02	L	T	P
			3	0	0

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate Software Process Models. (K3)
CO2: Illustrate Requirement Engineering Process. (K3)
CO3: Discuss Software architecture and Design. (K2)
CO4: Apply Coding principles and Testing techniques. (K3)
CO5: Discuss Software Estimation and Maintenance. (K2)
CO6: Describe Quality Management and Metrics. (K2)

UNIT-I: The Nature of Software: Defining Software, Software application Domains, Legacy software, Software engineering, Software Myths. **Software Process:** Process and project, Component software process, Software development process models: Waterfall model, Prototyping, Iterative development, Unified process, Time boxing model, Extreme programming and agile process. Merits and Demerits of Software Process Models.

UNIT-II: Software Requirements: Functional and non-functional requirements, User requirements, System requirements, Interface specification, the Software requirements document.**Requirements engineering process:** Feasibility studies, Requirements elicitation and analysis, Requirements validation, Requirements management.

UNIT-III : Software Architecture: Role of software architecture, Architecture views, components and connector view, architecture styles for C & C view, documenting architecture design, evaluating architectures. **Design:** Design concepts, Function-oriented design, Object oriented design, Detailed design.

UNIT-IV: Coding and Testing: Programming principles and guidelines, incrementally developing code, managing evolving code. Testing concepts, Testing process, Black-box testing, White-box testing.

Risk management: Reactive vs. Proactive Risk strategies, Software risks, Risk identification, Risk projection, Risk refinement, RMMM Plan.

UNIT-V: Software Project estimation: Decomposition techniques, Empirical Estimation Models. **Software Maintenance:** Maintenance Process, Maintenance Models, Reverse Engineering, Reengineering, Configuration Management

UNIT-VI: Metrics for Process and Products: Software Measurement, Metrics for software quality.

Quality Management: Quality concepts, Software quality assurance, Software Reviews, Formal technical reviews, Statistical Software quality Assurance, Software reliability, SEI-CMM Model, Six Sigma and ISO 9000 quality standards.

Text Books:

1. Software Engineering, A practitioner's Approach- Roger S. Pressman, 7th Edition, McGrawHill International Edition.

2. Software Engineering- Ian Sommerville, 9th Edition, Pearson education.

Reference Books:

1. Software Engineering, A Precise approach, PankajJalote, Wiley

2. Software Engineering principles and practice, W S Jawadekar, 3rdEdition,TMH.

VI Sem	PYTHON PROGRAMMING	Course Code: V18CSTOE03	L	T	P
			3	0	0

Syllabus Details

Course Outcomes:After Successful completion of the Course, the student will be able to:

CO1: Illustrate basic concepts of Python Programming (K2)
CO2: Describe control structures in python (K2)
CO3: Demonstrate functions and packages. (K3)
CO4: Construct python programs using structured data types. (k3)
CO5: Compare TextFiles and Binary Files (K4)
CO6: Apply OOPs concepts to Develop Test cases (K3)

UNIT-I: INTRODUCTION TO PYTHON, DATA TYPES & OPERATORS :Basics of python programming: Features of python – History of Python - The Future of Python installation and execution - Data types – Identifiers - variables – type conversions- Literal Constants – Numbers – Strings. I/O statements. Operators and expressions, operator precedence – expression evaluation.
UNIT-II: Control Structures: Decision Control statements: conditional (if), alternative (if-else), chained conditional (if-elif-else); **Iteration:** while loop, for loop, nested for loop, range function, break, continue and pass statements.
UNIT-III Functions: Functions and modules: Introduction - Function Declaration &Definition - Function Call – Variable Scope and Lifetime -The return statement-More on Defining Functions - Lambda Functions or Anonymous Functions - Documentation Strings- Modules – Packages.
UNIT-IV Structured Data Types: Lists: list operations, list slices, list methods, cloning lists, list parameters. **Tuples**: tuple assignment, tuple as return value. **Set:** Set Creation, Set Operations. **Dictionaries**: Creation, operations; comprehension, operations on strings.
UNIT-V Files & Exception Handling: Introduction - Types of files - Text files - reading and writing files; Errors and exceptions handling.
UNIT-VI OOPS concepts and Testing Basics: Classes, Methods, Constructor, Inheritance, Overriding Methods, Data hiding, GUI programming with TKINTER.

Text Books:

1. "Python Programming using problem solving Approach" ReemaThareja, Oxford University Press – 2017.
2. Python with Machine Learning by "A.Krishna Mohan, Karunakar & T.Murali Mohan" by S. Chand Publisher

Reference Books:

1. Think Python: How to Think Like a Computer Scientist'',Allen B. Downey, 2nd edition, Updated for Python 3, Shroff /O'Reilly Publishers, 2016 (http://greenteapress.com/wp/think- python/)
2. An Introduction to Python – Revised and updated for Python 3.2, Guido van Rossum and Fred L. Drake Jr Network Theory Ltd., 2011.
3. Introduction to Computation and Programming Using Python'',John V Guttag ,Revised and expanded Edition, MIT Press , 2013
4. Introduction to Programming in Python, Robert Sedgewick, Kevin Wayne, Robert Dondero, 1st Edition Pearson -2016

B.Tech(Hons/Minor) -Data Science course structure and Syllabus

List of NPTEL based courses recommended for

B.Tech(Hons/Monor) in Data Science

S.No.	Course Code	Course	NPTEL Course ID	NPTEL Relevant Course*	Course Duration (Weeks)	Credits
1	V18CSH01	Introduction to Data Science	106106212	Python for Data Science	4	2
2	V18CSH02	Artificial Intelligence	106106126	Artificial Intelligence Search Methods for Problem Solving	12	4
3	V18CSH03	Machine Learning	106106139	Introduction to Machine Learning	12	4
4	V18CSH04	Deep Learning	106105215	Deep Learning	12	4
5	V18CSMPH	Mini Project	-	-	-	4

***Will be updated in every semester as per the courses offered by NPTEL.**

The institution is offering honors/Minor degree in **"Data Science"** under V18 regulation. The rules and regulations, eligibility, evaluation process is as follows:

Rules &Regulations:

- A student will be eligible to get Under Graduate degree with Honors, if he/she completes additional 18-20 credits.
- A student can register after satisfying the eligibility criteria.
- The main objective of Honors degree is to provide additional learning opportunities for academically motivated students and it is an optional feature of the B. Tech. Programme.

Eligibility:

- Students should have a CGPA of 8.0 or above till III SEM and without any backlogs
- Students aspiring for Honors degree must register in V semester only.
- Student may register for mini project from V semester onwards and complete the same before VIII semester.

Course Details:

- In order to earn a Honors degree in his/her discipline, a student has to earn 18-20 extra credits (Four advanced courses – 14 credits and mini project - 4 credits in the concerned branch of Engineering).
- He/she can study equivalent NPTEL courses available in SWAYAM portal ie. https://swayam.gov.in/with prior approval from the department.
- The complete details are mention in **(Appendix-I)**
- The mini project shall be evaluated by the committee, which consists of Head of the department, Course Incharge and senior faculty of the department.
- The credits will be awarded for each course only after submission of required documents as Proof of Completion (NPTEL).

Syllabi for the courses offered in B. Tech(Hons.) – Data Science Course under V18 Regulation

Course Code: V18CSH01	**Introduction to Data Science**	L	T	P	C
		3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate the data science workflow. (K2)

CO2: Make use of Exploratory Data Analysis and the Data Science Process. (K3)

CO3: Experiment with Ndarray manipulation using NumPy library. (K3)

CO4: Apply various operations on paneled data. (K3)

CO5: Build visualizations on data using matlplotlib and seaborn libraries. (K3)

CO6: Build regression and classification models. (K3)

UNIT-I: Introduction: Introduction to Data Science, Roles exist in Data Science, Data science workflow, Tools and approaches data scientists use to analyze data. Define a problem and identify appropriate data sets using the data science workflow.

UNIT-II: Statistics Fundamentals: Exploratory Data Analysis and the Data Science Process, Analyze datasets using basic summary statistics: mean, median, mode, max, min, quartile, Inter quartile range, variance, standard deviation and correlation.

UNIT-III: The Numpy Library: NumPy installation, Ndarray, Basic operations, Indexing, Slicing, Iterating an array, Conditions and Boolean arrays, Shape manipulation and Array manipulation, Copies or Views of objects, Vectorization, Broadcasting, Structured arrays, Reading and Writing array data on files.

UNIT-IV: The Pandas Library: Installation, Introduction to pandas data structures – The series, The DataFrame, The index Objects. Other functionalities on indexes, Operation between data structures, Function application and mapping, Sorting and Ranking, "Not a number" data, Hierarchical indexing and leveling.

UNIT-V: Data Visualization using matplotlib and seaborn: Scatter plots, Scatter matrix, Line graph, Box blots, and Histograms. Identify a normal distribution within a dataset using summary statistics and visualization. Causation vs. Correlation. Test a hypothesis with a sample case study, Validate your findings using statistical analysis.

UNIT-VI: Foundations of Data Modeling: Introduction Regression – Categorical variables versus Continuous variables, linear regression, Build the linear regression model using a dataset and evaluate. Introduction to Classification - define classification model, apply k-NN and Decision trees. Build the classification model using a dataset and evaluate.

TEXT BOOKS:

1. The Art of Data Science, A Guide for Anyone Who Works with Data Roger D.Peng and Elizabeth Matsui.
2. Python Data Analytics, Fabio Nelli, Second edition, Apress
3. Data Science for Business, Foster Provost, Tom Fawcett, O'reilly

REFERENCE BOOKS:

1. Mining of Massive Datasets, JureLeskovek, AnandRajaraman and Jeffrey Ullman. Cambridge University Press. 2014.
2. Machine Learning: A Probabilistic Perspective.Kevin P. Murphy, MIT Press, 2013.
3. Python for Data Science for Dummies, Luca Massaron and John Paul Mueller, John Wiley and Sons, 2015

Course Code: V18CSH02	**Artificial Intelligence**	L	T	P	C
		3	0	0	3

.

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Illustrate the concept of intelligent systems and current trends in AI. (K2)

CO2: Apply Problem solving, Problem reduction and Game Playing techniques in AI. (K3)

CO3: Illustrate the Logic concepts in AI. (K2)

CO4: Explain the Knowledge representation techniques in AI. (K2)

CO5: Describe Expert systems and their applications. (K2)

CO6: Illustrate Uncertainty Measures. (K2)

UNIT-I: Introduction to Artificial Intelligence: Introduction, history, intelligent systems, foundations of AI, applications, tic-tac-toe game playing, current trends in AI

UNIT-II: Problem solving: State-space Search and Control Strategies: Introduction, General Problem Solving, Characteristics of problem, Exhaustive searches, Heuristic search techniques, Iterative deepening a*, constraint satisfaction

Problem reduction and game playing: Introduction, problem reduction, game playing, alpha beta pruning, two-player perfect information games

UNIT-III:Logic concepts: Introduction, Propositional Calculus, Proportional Logic, Natural Deduction system, Axiomatic system, Semantic tableau system in proportional logic, Resolution Refutation in Propositional logic, Predicate Logic

UNIT-IV: Knowledge representation: Introduction, approaches to Knowledge representation, Knowledge representation using Semantic Networks, Extended Semantic Networks for KR, Knowledge representation using Frames

UNIT-V: Expert Systems and Applications: Introduction phases in building Expert Systems, Expert System versus Traditional Systems, Rule-based Expert Systems, Blackboard systems, Truth maintenance systems, applications of Expert Systems.

UNIT-VI: Uncertainty measure: Probability theory- Introduction, Probability Theory, Bayesian Belief networks, Certainty Factor Theory, Dempster-Shafer theory

Text Book:

2. Artificial Intelligence, Saroj Kaushik, 1st Edition, Cengage Learning.

Reference Books:

3. Artificial Intelligence, Elaine Rich, Kevin Knight, Shivashankar B Nair, 3rd Edition, Tata McGraw Hill Education Private Limited., 2009
4. Artificial Intelligence- A modern Approach, 3rd Edition, Stuart Russel, Peter Norvig, Pearson Education.

Course Code: V18CSH03	**Machine Learning**	L	T	P	C
		3	0	0	3

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate basics of Machine Learning.(K2)

CO2: Explain Various Classification Techniques.(K2)

CO3: Explain Tree Based Learning and Ensemble Learning (K2)

CO4: Demonstrate Neural Networks and Multi Layer Perceptrons. (K2)

CO5: Explain Multi Layer Perceptrons and Back Propagation (K2).

CO6: Demonstrate Dimensionality Reduction Techniques (K2).

Unit-I: Introduction:Learning: Machine Learning, Types Of Machine Learning, Supervised Learning, Regression, Classification, The Machine Learning Process. Some Terminology: Weight Space, The Curse Of Dimensionality. Knowing What You Know: Testing Machine Learning Algorithms, Over fitting, Training, Testing, And Validation Sets. Some Basic Statistics: Averages Variance And Covariance, The Bias-Variance Tradeoff.

UNIT II: Classification: The General Problem, Logistic Regression, K-Nearest Neighbor Classifiers, Support Vector Machines. Assessing Performance Of Classifiers: The Confusion Matrix, Accuracy, 0/1 Loss, Sensitivity And Specificity, The Receiver Operator Characteristic (Roc) Curve. Unbalanced Datasets Measurement: Precision, Recall And F1 Score.

UNIT-III: Ensemble Learning : Boosting, Adaboost, Stumping, Bagging , Subbagging, Random Forests.

UNIT-IV: Neural Networks: The Brain And The Neuron, Hebb's Rule, Mcculloch And Pitts Neurons, Limitations Of The Mcculloch And Pitts Neuron Model, Neural Networks, The Perceptron, The Learning Rate, The Bias Input The Perceptron Learning Algorithm, An Example Of Perceptron Learning: Logic Functions Implementation, Linear Separability, Linear Regression, Linear Regression Examples

UNIT-V: The Multi Layer Perceptron(MLP):Going Forwards, Going Backwards(Back Propagation of Errors), The MLP in practice, Examples of using the MLP: Classification and Regression, Deriving Back-Propagation.

UNIT-VI: Dimensionality Reduction: Linear Discriminant Analysis (LDA), Principal Components Analysis (PCA), Relation With The Multi-Layer Perceptron, Kernel PCA, Factor Analysis, Independent Components Analysis (ICA) Locally Linear Embedding.

TEXT BOOKS:

1. Machine Learning: An Algorithmic Approach.Stephen Marsland, 2nd Edition, CRC Press.
2. A First Course in Machine Learning; Volume in Machine Learning and Pattern Recognition Series – CRC-Taylor & Francis-Chapman & Hall Rogers S., Girolami M., (2011).

REFERENCE BOOKS:

1. Machine Learning: The art and Science of Algorithms that Make sense of Data. Peter Flach, Cambridge, First Edition, 2012.
2. Machine Learning: Tom Mitchel, McGraw Hill Learning, 1997

Course Code: V18CSH04	**Deep Learning**	L	T	P	C
		3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Describe the mathematical foundation of neural network. (K2)

CO2: Describe the machine learning basics. (K2)

CO3: Discuss the overfitting problem and ways to overcome it. (K2)

CO4: Discuss various optimization techniques. (K2)

CO5: Develop a convolutional neural network model. (K3)

CO6: Develop RNN and LSTM models. (K3)

UNIT-I: Linear Algebra: Scalars, Vectors, Matrices and Tensors, Matrix operations, types of matrices, Norms, Eigen decomposition, Singular Value Decomposition, Principal Components Analysis. Probability and Information Theory: Random Variables, Probability Distributions, Marginal Probability, Conditional Probability, Expectation, Variance and Covariance, Bayes' Rule, Information Theory. Numerical Computation: Overflow and Underflow, Gradient-Based Optimization, Constrained Optimization, Linear Least Squares.

UNIT –II: Machine Learning: Basics, Hyper parameters and Validation Sets, Estimators, Bias and Variance, Maximum Likelihood, Bayesian Statistics, Supervised and Unsupervised Learning, Stochastic Gradient Descent, Challenges Motivating Deep Learning. Deep Feed forward Networks: Learning XOR, Gradient-Based Learning, Hidden Units, Architecture Design, Back-Propagation and other Differentiation Algorithms.

UNIT-III: Regularization for Deep Learning: Parameter Norm Penalties, Norm Penalties as Constrained Optimization, Regularization and Under-Constrained Problems, Dataset Augmentation, Noise Robustness, Semi-Supervised Learning, Multi-Task Learning, Early Stopping, Parameter Tying and Parameter Sharing, Sparse Representations, Bagging and Other Ensemble Methods, Dropout, Adversarial Training, Tangent Distance, Tangent Prop and Manifold Tangent Classifier.

UNIT-IV: Optimization for Training Deep Models: Pure Optimization, Challenges in Neural Network Optimization, Basic Algorithms, Parameter Initialization Strategies, Algorithms with Adaptive Learning Rates, Approximate Second-Order Methods, Optimization Strategies and Meta-Algorithms.

UNIT-V: Convolutional Networks: The Convolution Operation, Pooling, Convolution, Basic Convolution Functions, Structured Outputs, Data Types, Efficient Convolution Algorithms, Random or Unsupervised Features, Basis for Convolutional Networks.

UNIT-VI: Sequence Modeling: Recurrent and Recursive Nets: Unfolding Computational Graphs, Recurrent Neural Networks, Bidirectional RNNs, Encoder-Decoder Sequence-to-Sequence Architectures, Deep Recurrent Networks, Recursive Neural Networks, Echo State Networks, LSTM, Gated RNNs, Optimization for Long-Term Dependencies, Auto encoders, Deep Generative Models.

1. TEXT BOOKS:

1. Ian Goodfellow, YoshuaBengio, Aaron Courville, “Deep Learning”, MIT Press, First Edition, 2016.

2. Josh Patterson and Adam Gibson, “Deep learning: A practitioner's approach”, O'Reilly Media, First Edition, 2017.

2. REFERENCE BOOKS:

1. Fundamentals of Deep Learning, Designing next-generation machine intelligencealgorithms, Nikhil Buduma, O’Reilly, Shroff Publishers, First Edition, 2019.

2. Deep learning Cook Book, Practical recipes to get started Quickly, DouweOsinga, O’Reilly, Shroff Publishers, 2019.

Department of Mechanical Engineering

Date:03-06-2020

Third meeting of BOS in Mechanical Engineering department along with external members is held on 03/06/2020 at 10.00 AM in online mode through GoTo meeting app in view of COVID-19 pandemic.

The following members are present.

S. No	Name of the BOS Members
1.	Dr.N.MohanaRao, Professor, JNTUK,Kakinada
2.	Dr. R.V. Chalam, Professor,NIT,Warangal
3.	Dr. A. Krishnaiah, Professor, Osmania University, Hyderabad
4.	Sri S.S. SubramanyaSastry, Director Projects,Renprotech Solutions Pvt. Ltd., Bangalore.
5.	Sri A.Sai Krishna, Alumni,Maruthi design and engg. Pvt.ltd ,Bangalore
6.	Dr. G.V.N.S.R. RatnakaraRao, Professor &Principal, SVEC
7.	Dr. M.V. Ramesh, Chairman & HOD, SVEC
8.	All the BOS internal members

Minutes of meeting

Chairman welcomed all the BOS members and introduced to all the BOS-internal members.

Item No. 1: Review of course structure for V & VI semesters of B. Tech under V18 Regulations.

- Lab course named Python Programming Lab (course code. V18CSL05) was included in V semester.
- Theory of Machines Lab (V18MEL08) is shifted from V semester to VI semester,
- The MNC Course Essence of Indian Traditional Knowledge **(**V18ENT08) was replaced with Intellectual Property Rights and Patents (V18MET46) in V semester.
- The credits of Operations Research (V18MET21) and that of Elective in VII semester are reduced from 4 to 3 credits.
- The approved revised course structure is attached in **Annexure-ME-I.**

Item No. 2: Approval of syllabi for the courses offered in V & VI semesters B. Tech under V18 Regulation.

- The approved syllabi for the courses are attached in **Annexure-ME-II.**

Item No. 3: Approval of list of courses offering under Open Elective- I in VI semester B. Tech under V18 Regulation for all other branches and the approval of their detailed syllabi.

- Introduction to Robotics theory course (V18MEOE3) was included in Open Elective-I of VI semester.
- The course codes of Open Elective-1, Basic Mechanical Engineering V18MET39 & Green Engineering Systems V18MET40 have been changed to V18MEOE1 & V18MEOE2.
- The approved courses and their syllabi is attached in **Annexure-ME-III.**

Item No. 4: Approval for offering minor degree in DATA SCIENCE offered by Department of Computer Science and Engineering for B. Tech Mechanical Engineering students under V18 Regulation.

- Approved by the BOS members.

Dr. M.V. Ramesh

Chairman , BOS

V Semester

V18MET13	HEAT TRANSFER	L	T	P	C
		3	1	0	4

Note: Heat transfer data books are allowed
Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Illustrate the basic modes of heat transfer, basic laws of heat transfer and to develop solution for one dimensional steady state heat conduction problems.	K3
CO2	Interpret the heat transfer through extended surfaces, to find solution for one dimensional extended surfaces and unsteady state heat conduction problems.	K3
CO3	Illustrate convective heat transfer and to apply Dimensional analysis concept to convective heat transfer.	K3
CO4	Apply empirical correlations for forced and free convection to compute values for the convection heat transfer coefficient.	K3
CO5	Apply empirical correlations for phase change process to calculate values for the convection heat transfer coefficient and to Illustrate Heat Exchangers.	K3
CO6	Employ the principles of radiation heat transfer, to find the shape factor and heat transfer rate through radiation.	K3

UNIT-I

Introduction: Different Modes of Heat Transfer, Governing Laws of Heat Transfer, Applications of Heat Transfer.

Conduction heat transfer:

General Heat Conduction Equation: Derivation of the equation in (i) Cartesian, (ii) Polar and (iii) Spherical Co-ordinate Systems.

Steady-state one-dimensional heat conduction in Cartesian System: Steady-state one-dimensional heat conduction problems (i) with and without heat generation and (ii) with and without variable thermal conductivity, Thermal Resistances in Series and in Parallel and Numerical Problems.

Steady-state radial heat conduction in Polar and spherical Systems: Steady-state one-dimensional heat conduction problems (i) with and without heat generation and (ii) with and without varying thermal conductivity, Thermal Resistances in Series and Numerical Problems.

Critical Thickness of Insulation: Concept, Derivation and Numerical Problems.

UNIT – II

Extended Surfaces (Fins): Classification, Applications, Straight Rectangular Fins - long fin, fin with insulated tip and short fin, Temperature Distribution and Heat Transfer Calculations, Fin Efficiency and Effectiveness and Numerical Problems.

One dimensional Transient (Unsteady-state) conduction heat transfer: Definition, Systems with negligible internal resistance, Numerical Problems, Heisler and Grober charts: Solutions to various one-dimensional problems using the charts, Numerical problems.

UNIT – III

Convective heat transfer: Classification of convective heat transfer, dimensional analysis – application of Buckingham Pi Theorem for forced and free convection, Significance of non-dimensional numbers, concepts of continuity, momentum and Energy Equations, boundary layer theory.

UNIT –IV

Forced convection:

External flows: Concepts about hydrodynamic and thermal boundary layer and use of empirical correlations for convective heat transfer over flat plates, cylinders, spheres and Numerical Problems.

Internal flows: Concepts about hydrodynamic and thermal boundary layer – division of internal flow based on this –use of empirical relations for horizontal pipe flow, annulus flow and Numerical Problems.

Free convection: Development of hydrodynamic and thermal boundary layer along a vertical plate – useof empirical relations for vertical plates, vertical tubes, horizontal tubes and Numerical Problems.

UNIT V

Heat transfer with phase change:

Boiling: Definition, types, regimes of Pool boiling - Numerical Problems on nucleate boiling, critical heat flux and film boiling using empirical correlations.

Condensation: Definition, Film wise and drop wise condensation, Numerical Problems on film condensation over vertical and horizontal cylinders using empirical correlations.

Heat Exchangers: Definition, Classification, LMTD method, Effectiveness - NTU method, overall heat transfer coefficient, fouling factor and Numerical Problems.

Chart Solution Procedures for solving Heat Exchanger problems: Correction Factor Charts and Effectiveness-NTU Charts and Numerical Problems.

UNIT VI

Radiation heat transfer: Fundamental principles - Gray, White, Opaque, Transparent and Black bodies, Emissivity, Planck's distribution law, Wien's displacement law, Kirchoff's law, Lambert's cosine law and the Stefan-Boltzmann law, Irradiation, total and monochromatic quantities, concepts of shape factor, heat exchange between two black bodies, heat exchange between grey bodies, radiation shields, electrical analogy for radiation networks and Numerical problems.

TEXT BOOKS:

1. Heat Transfer, JP HOLMAN, Tata McGraw HillPublications, Special Indian edition.
2. Heat Transfer, P.K.Nag, Tata McGraw Hill Publications.
3. Fundamentals of Engineering Heat and Mass Transfer, R.C.Sachdeva, New Age International Publications.

REFERENCES:

1. Heat and Mass Transfer, Cengel, McGraw Hill Publications.
2. Heat and Mass Transfer /Arora and Domkundwar/Dhanpatrai& sons
3. Principles of Heat Transfer, Frank Kreith, R. M. Manglik& M. S. Bohn, Cengage learning publishers.
4. Heat and Mass Transfer /D.S.Kumar / S.K.Kataria& Sons
5. Heat and mass transfer, R.K. Rajput, S. Chand Publications, Revised edition

V18MET37	INTERNAL COMBUSTION ENGINES (ELECTIVE-I)	L	T	P	C
		3	0	0	3

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Understand the affects of various losses that occur in the actual engine operation and the working principles of I.C.Engines.	K2
CO2	Illustrate the function of fuel supply and ignition systems.	K2
CO3	Understand the function and necessity of lubrication, cooling and governing systems.	K2
CO4	Interpret the combustion phenomena in S.I. and C.I. Engines and effect of various engine operating parameters on it.	K3
CO5	Calculate the performance parameters of I.C.Engines.	K3
CO6	Assess the emission parameters and alternate fuels used in I.C.Engines.	K3

UNIT I

Air standard and actual cycles:

Comparison of cycles, Time Loss Factor, Heat Loss Factor, Exhaust Blow down, Loss due to gas exchange process, Loss due to Rubbing Friction.

Basics of IC Engines:

Classification, Nomenclature of engine , working principles of two stroke and four stroke S.I. and C.I.Engines, comparison, Valve timing and port timing diagrams, Scavenging of two stroke engines.

UNIT II

Elements of Fuel supply system and Ignition system in IC Engines:

Requirements of fuel supply system, components and working of simple and modern carburettor, Simple carburetor limitations, components and working of electronic fuel Injection system, types of diesel injection system, requirements of ignition system, types of ignition systems.

UNIT III

Sub Systems of IC Engines:

Supercharger, methods of supercharging, supercharging limits, Turbochargers, methods of turbocharging, effect of engine variables on engine friction, types of lubrication systems, Introduction to engine cooling, types of cooling system, governing of IC engine.

UNIT IV

Combustion in IC Engines:

Combustion in S.I. Engine and C.I. Engines: Normal Combustion and abnormal combustion, Stages of combustion in S.I. Engine, Types of Abnormal combustion, Pre-ignition and knocking , Fuel requirements, fuel rating, Anti knock additives, . Detonation and its Control. Stages of combustion in C.I. Engines, Delay period, Factors influencing delay period, Diesel knock, Control of diesel knock, types of combustion chamber, Fuel requirements and fuel rating.

UNIT-V

Measurement, Testing and Performance of IC Engines:

Engine performance Parameters, Measurement of engine power , determination of IP,BP, FP, IMEP, BMEP, various efficiencies, engine performance characteristics and affecting variables, preparation of the Heat balance sheet.

UNIT VI

Emissions from IC Engines:

Sources of SI and CI engine emissions. Harmful effects. Emissions measurement methods. Methods for controlling emissions in SI and CI engine. catalytic converters, exhaust gas recirculation, EURO/ Bharat Stage emission norms.

Alternate Fuels For IC Engines: Need for use of alternate fuels. Use of alcohol fuels. Biodiesel. Biogas and Hydrogen in engines.

TEXT BOOKS:

1. Internal Combustion Engines, Ganesan,V., Tata McGraw Hill Publishing Company.
2. A Course in Internal Combustion Engines, Mathur, M.L. and Sharma, R.P., Dhanpat Rai and Sons.
3. I.C. Engines Fundamentals, Heywood J.McGraw Hill publications.

REFERENCE BOOKS:

1. Thermal Engineering, R.K.Rajput, Lakshmi Publications.
2. Heat engines, Vasandani, Kmar Publications.
3.Thermal Engineering, PL Ballany, Khanna Publications.

V18MET38	NANO TECHNOLOGY (ELECTIVE-I)	L	T	P	C
		3	0	0	3

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Understand the essential concepts used in nanotechnology	K2
CO2	Identify the various nanomaterials properties	K2
CO3	Describe the syntheses and fabrication methods	K2
CO4	Expand the various characterization Techniques	K2
CO5	Examine the Carbon nano technology and applications	K3
CO6	Use of the various applications of Nano technology	K3

UNIT-I :
INTRODUCTION: History of nano science, definition of nano meter, nano materials, nano technology. Classification of nanomaterials. Crystal symmetries, crystal directions, crystal planes. Band structure.

UNIT-II :
PROPERTIES OF MATERIALS: Mechanical properties, electrical properties, dielectric properties, thermal properties, magnetic properties, opto electronic properties. Effect of size reduction on properties, electronic structure of nano materials.

UNIT-III :
SYNTHESIS AND FABRICATION: Synthesis of bulk polycrystalline samples, growth of single crystals. Synthesis techniques for preparation of nano particle – Bottom Up Approach – sol gel synthesis, hydro thermal growth, thin film growth, PVD and CVD; Top Down Approach – Ball milling, micro fabrication, lithography. Requirements for realizing semiconductor nano structures, growth techniques for nano structures.

UNIT-IV :
CHARECTERIZATION TECHNIQUES:X-Ray diffraction and Scherrer method, scanning electron microscopy, transmission electron microscopy, scanning probe microscopy, atomic force microscopy, piezo response microscopy, X-ray photoelectron spectroscopy, XANES and XAFS, angle resolved photoemission spectroscopy, diffuse reflectance spectra, photoluminescence spectra, Raman spectroscopy.

UNIT-V :
CARBON NANO TECHNOLOGY: Characterization of carbon allotropes, synthesis of diamond – nucleation of diamond, growth and morphology. Applications of nanocrystalling diamond films, grapheme, applications of carbon nano tubes.

UNIT-VI :
APPLICATIONS OF NANO TECHNOLOGY: Applications in material science, biology and medicine, surface science, energy and environment. Applications of nano structured thin fins, applications of quantum dots.

TEXT BOOKS:

1. Nano science and nano technology by M.S Rama Chandra Rao, Shubra Singh, Wiley publishers.

REFERENCE BOOKS:

1. Introduction to Nano Technology by Charles P. Poole, Jr., Frank J.Owens, Wiley publishers.
2. Nanotechnology by Jermy J Ramsden, Elsevier publishers.
3. Nano Materials- A.K.Bandyopadhyay/ New Age Introdu.
4. Nano Essentials- T.Pradeep/TMH.
5. Nanotechnology the Science of Small by M.A Shah, K.A Shah, Wiley Publishers.
6. Principles of Nanotechnology by Phani Kumar, Scitech.

V18MET17	METAL CUTTING &MACHINE TOOLS	L	T	P	C
		3	0	0	3

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Examine the mechanism of chip formation in machining and explain different parameters involved in machining process	K3
CO2	Describe various types of lathe machines and their operations	K3
CO3	Explain the construction and working of shaper, slotter, planar, drilling and boring.	K2
CO4	Explain the construction and working of various milling and grinding machines	K2
CO5	Illustrate the basic principle and working of Ultrasonic machining, Abrasive jet machining and Electrochemical machining.	K3
CO6	Illustrate the basic principle and working of Electric discharge machining, electron beam machining, Laser beam machining.	K3

UNIT I:
FUNDAMENTALS OF MACHINING:
Elementary treatment of metal cutting theory – element of cutting process –geometry of single point tool angles, chip formation and types of chips – built up edge and its effects chip breakers, mechanics of orthogonal cutting –Merchant's force diagram, cutting forces, cutting speeds, feed, depth of cut, tool life, coolants, tool materials.

UNIT II:
LATHE MACHINES:
Engine lathe, principle of working, specification of lathe, types of lathe, work holders tool holders, taper turning, thread turning for lathes and attachments. Turret and capstan lathes, collet chucks, other work holding, tool holding devices.

UNIT III:
SHAPING, SLOTTING AND PLANNING MACHINES:
Principles of working – principal parts – specifications, operations performed, machining time calculations.

DRILLING & BORING MACHINES:
Principles of working, specifications, types, operations performed – tool holding devices – twist drill– Boring Machines – fine Boring Machines – jig boring machine, deep hole Drilling machine.

UNIT IV:
MILLING MACHINES:

Principles of working , specifications , classification of Milling Machines, Principle features of horizontal, vertical and universal Milling Machine, machining operations, types of cutters, methods of indexing.
FINISHING PROCESSES:
Theory of grinding, classification of grinding machines, cylindrical and surface grinding machines, tool and cutter grinding machines, different types of abrasives, bonds, specification and selection of a grinding wheel. Lapping, Honing & Broaching operations.

UNIT V:
Need for non-traditional machining methods-classification of modern machining processes.
Ultrasonic machining :
Basic principle, equipment, applications, advantages and limitations.
Abrasive jet machining :
Basic principle, equipment, advantages ,limitations. and applications
Electro-chemical machining:
Fundamentals of electro chemical machining, electrochemical grinding, electro chemical honing, advantages, limitations and applications.

UNIT VI:
Electric Discharge Machining:
Basic principle, equipment of Electric Discharge Machining, and wire EDM, advantages, limitations and applications.
Electron Beam Machining, Laser Beam Machining :
Basic principle and theory, advantages, limitations and applications.

TEXT BOOKS :
1. Production Technology by R.K. Jain and S.C. Gupta.
2. Workshop Technology – B.S. Raghuwanshi – Vol II/DhanpatRai& Co. (P) Ltd
3. Elements of Workshop Technology Vol 2- S K Hajra choudhury/Asia Publishing House
4. Advanced machining processes/ VK Jain/ Allied publishers.

REFERENCES:
1. Metal cutting Principles by M.C. Shaw
2. Metal cutting and machine tools by Boothroyd
3. Production Technology by H.M.T. (Hindustan Machine Tools).
4. Modern Machining Process / Pandey P.C. and Shah H.S./ TMH.
5. New Technology / Bhattacharya A/ The Institution of Engineers, India 1984.

V18MET15	THEORY OF MACHINES – II	L	T	P	C
		3	1	0	4

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Apply gyroscopic effect for stabilization of sea vehicles, aircrafts and automobile vehicles etc.,	K3
CO2	Compute friction for torque transmission of mechanical systems	K3
CO3	Interpret dynamic force analysis of slider crank mechanism in design of flywheel.	K3
CO4	Examine the performance of different types of Governors	K3
CO5	Illustrate balancing of reciprocating and rotary masses.	K3
CO6	Calculate the natural frequencies of Discrete systems starting from the general equation of displacement.	K3

UNIT – I
PRECESSION: Gyroscopes, effect of precession motion on the stability of moving vehicles such as motor car, motor cycle, aero planes and ships.

UNIT – II
FRICTION: Inclined plane, friction of screw and nuts, pivot and collar, uniform pressure, uniform wear, friction circle and friction axis.
CLUTCHES: Friction clutches- single disc or plate clutch, multiple disc clutch, cone clutch, centrifugal clutch.
BRAKES AND DYNAMOMETERS: Simple block brakes, internal expanding brake, band brake of vehicle, **Band and Block Brake.** General description and operation of dynamometers: Prony, Rope brake, Epicyclic, Bevis Gibson and belt transmission.

UNIT – III
TURNING MOMENT DIAGRAMS: Dynamic force analysis of slider crank mechanism, inertia torque, angular velocity and acceleration of connecting rod, crank effort and turning moment diagrams, fluctuation of energy, fly wheels and their design.

UNIT – IV
GOVERNERS: Watt, porter, proell and Hartnell governors, sensitiveness, isochronisms and hunting.

UNIT – V
BALANCING: Balancing of rotating masses single and multiple, single and different planes, use analytical and graphical methods. Primary and secondary balancing of reciprocating masses. analytical and

graphical methods, unbalanced forces and couples, examination of "V" multi cylinder in line and radial engines for primary and secondary balancing. Balancing machines for single plane and two plane balancing.

UNIT – VI

VIBRATIONS: Free Vibration of spring mass system, oscillation of pendulums, centers of oscillation and suspension. Transverse loads, Natural frequency, types of damping, damped free vibration. Vibrations of beams with concentrated and distributed loads. Dunkerly's methods, Raleigh's method, whirling of shafts, critical speeds, torsional vibrations, two and three rotor systems, Simple problems on forced damped vibration, vibration isolation and transmissibility.

TEXT BOOKS:

1. Theory of Machines / S.S Rattan/ Mc. Graw Hill Publ.
2. Mechanism and machine theory by Ashok G. Ambedkar, PHI Publications.

REFERENCE BOOKS:

1. Mechanical Vibrations / R.Venkatachalam/ PHI publishers
2. Theory of Machines / Shiegly / MGH
3. Theory of Machines / Thomas Bevan / CBS Publishers
4. Theory of machines / Khurmi / S.Chand.
5. Mechanism and Machine Theory / JS Rao and RV Dukkipati / New Age.

V18MET16	DESIGN OF MACHINE ELEMENTS- I	L	T	P	C
		3	0	0	3

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Calculate the stresses in the design of machine elements.	K3
CO2	Develop various criteria for designing the machine elements subjected to varying loads	K3
CO3	Examine the strength of bolted joints under different loads	K3
CO4	Examine the strength of welded and riveted joints under different loads	K3
CO5	Illustrate design of various types of Keys and different joints	K3
CO6	Apply different type of loads on shafts and different couplings	K3

UNIT – I

Design Methods: The art and science of machine design, types of design methods, stages in machine design, selection of materials, types of loads, factor of safety, Design for strength and rigidity, preferred numbers.

Theories of Failure: Maximum Principal stress theory, Maximum shear stress theory, Maximum principal strain theory, Maximum strain energy theory, Maximum distortion energy theory, impact loads, problems.

UNIT – II

Strength of Machine Elements : Stress Concentration, theoretical stress concentration factor, fatigue stress concentration factor, notch sensitivity, design for fluctuating stresses, endurance limit, Estimation of endurance strength, S-N curves, Goodman's line, soderberg's line, modified Goodman's line, Gerber parabola, related problems.

UNIT – III

Bolted Joints: Advantages , types of Bolted joints, stresses in bolts, bolts of uniforms strength bolted joints under eccentric loading, , locking devices.

UNIT – IV

Riveted Joints: Types of riveted joints, modes of failure, strength and efficiency of riveted joints, pitch of the rivets, design stresses, boiler joints, diamond joints, and riveted joints under eccentric loading.
Welded Joints: Types of welded joints, strength of welds, Design of simple welded joints &Design of welded joints subjected to eccentric loading.

UNIT – V
Keys, Cotters and Knuckle Joints: Types of Keys, stresses in Keys, design of rectangular, square and taper Keys, design of spigot and socket, sleeve and cotter, jib and cotter joints and knuckle joints.

UNIT – VI
SHAFTS: Design of solid and hollow shafts for strength and rigidity – design of shafts for combined bending and axial loads – shaft sizes – BIS code.

SHAFT COUPLING: Rigid couplings – muff, split muff and flange couplings, flexible couplings – flange coupling (modified).

Note: Design data book is NOT Permitted for examination

TEXT BOOKS :
1. Machine Design, R.K. Jain , Khanna Publishers, New Delhi.
2. Design of Machine Elements, V.B. Bhandari , TMH Publishers, New Delhi.

REFERENCE BOOKS :
1. Machine Design, Schaum'series , TMH Publishers, New Delhi.
2. Machine Design, Sadhu Singh, Khanna Publishers, New Delhi.
3. Mechanical Engineering Design, Joseph E. Shigely, TMH Publishers, New Delhi.
4. Design of Machine Elements, M.F. Spotts, PHI Publishers, New Delhi.
5. Machine Design, Pandya and Shah, Charotar Publishers, Anand.

Data Hand Book :1. Machine Design Data Hand Book, Mahadevan and Balaveera Reddy [1996], CBS Publishers, New Delhi.

V18MEL10	THERMAL ENGINEERING LAB	L	T	P	C
		0	0	3	1.5

Course Outcomes:

	After successful completion of the course, the student will be able to:	Knowledge Level
CO1	Demonstrate the valve timing diagram & port timing diagram of IC engines	K3
CO2	Test the performance of I.C. Engines.	K4
CO3	Test the performance of compressors.	K4

1. Draw the valve timing diagram of 4-stroke diesel engine
2. Draw the port timing diagram of 2-stroke petrol engine
3. Plot the performance characteristics of single cylinder diesel engine for different loads
4. Draw the heat balance sheet of multi cylinder petrol engine
5. Determine the efficiency of single cylinder petrol engine
6. Conduct economical speed test on si engine
7. Find the indicated power of individual cylinders of an engine by using morse test
8. Determine the volumetric efficiency of air compressor
9. Conduct performance test on variable compression ratio engine
10. Study on dismantling and assembly of engines
11. Study of boilers

		L	T	P	C
V18MEL16	**Metal Cutting & Machine Tools Lab**	**0**	**0**	**3**	**1.5**

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Examine the various mechanisms used in different machine tools	K3
CO2	Operate different machine tools to prepare different jobs	K3
CO3	Demonstration of simulation of metal cutting	K3

List of experiments:

1. Introduction of general purpose machines: lathe, drilling machine, milling machine, shaper, planing machine, slotting machine, cylindrical grinder, surface grinder and tool and cutter grinder.
2. Step turning and taper turning on lathe machine
3. Thread cutting and knurling on -lathe machine.
4. Drilling and tapping on drilling machine
5. Plane the surface using shaper
6. Preparation of key way using slotter
7. Gear blank preparation using milling machine
8. Ground the cylindrical pieces with cylindrical grinder
9. Finish the blocks with surface grinder
10. Preparation of tool angles using Tool and cutter grinder

Add-on experiments: Metal cutting simulation demonstration

V18MET46	INTELLECTUAL PROPERTY RIGHTS AND PATENTS	L	T	P	C
		2	0	0	MNC

Course Outcomes:

	After successful completion of the course, the student will be able to:	Knowledge Level
CO1	Understand the different types & basics of Intellectual Property Rights .	K2
CO2	Understand the principle and registration of copyrights.	K2
CO3	Understand the principle and registration of patents.	K2
CO4	Understand the principle and registration of trademark.	K2
CO5	Understand the principle and registration of trade secrets.	K2
CO6	Understand IT Act and Cyber Law.	K2

UNIT-I

Introduction to Intellectual Property Law, Intellectual Property Law Basics, Types of Intellectual Property, Innovations and Inventions of Trade related Intellectual Property Rights, Agencies Responsible for Intellectual Property Registration, Infringement, Over use or Misuse of Intellectual Property Rights.

UNIT-II

Introduction to Copyrights, Principles of Copyright, Rights Afforded by Copyright Law –Copyright Ownership, Transfer and Duration, Rights of Distribution, Rights of performers, Copyright Formalities and Registration, International Copyright Law.

UNIT-III

Introduction to Patent Law, Rights and Limitations, Patent Requirements, Ownership and Transfer , Patent Application Process and Granting of Patent, Patent Infringement and Litigation, International Patent Law Patent Cooperation Treaty.

UNIT-IV

Introduction to Trade Mark , Trade Mark Registration Process, Post registration procedures, Trade Mark maintenance, Transfer of rights, Dilution of Ownership of Trade Mark, Likelihood of confusion , Trade Marks Litigation , International Trade Mark Law.

UNIT-V

Introduction to Trade Secrets, Maintaining Trade Secret ,Employee Access Limitation, Employee Confidentiality Agreement , Trade Secret Law, Trade Secret Litigation, Breach of Contract .

UNIT-VI

Introduction to Cyber Law, Information Technology Act, Cyber Crime and E-commerce, Data Security, Confidentiality, Privacy, International aspects of Computer and Online Crime.

TEXT BOOKS:

1. Deborah E.Bouchoux: Intellectual Property. Cengage learning ,New Delhi.
2. PrabhuddhaGanguli: Intellectual Property Rights Tata Mc-GrawHill, New Delhi.
3. Cyber Law. Texts & Cases, South-Western's Special Topics Collections.

REFERENCE BOOKS:

1. Kompal Bansal & Parishit Bansal, Fundamentals of IPR for Engineers, BS Publications.
2. R. Radha Krishnan, S. Balasubramanian: Intellectual Property Rights, Excel Books. New Delhi.
3. M.Ashok Kumar and Mohd.Iqbal Ali: Intellectual Property Right, Serials Pub.

VI Semester

V18MET10	METROLOGY	L	T	P	C
		3	0	0	3

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Apply tolerances and fits for selected product quality.	K3
CO2	understand the standards of length, angles and various limit gauges	K2
CO3	Understand the optical measuring instruments and their applications	K2
CO4	Explain the measurement of surface finish with various comparators	K2
CO5	Use appropriate method and instruments for inspection of various gear elements and thread elements.	K3
CO6	Describe the flatness measurement and machine tool alignment tests	K2

UNIT-I
SYSTEMS OF LIMITS AND FITS: Introduction, nominal size, tolerance, limits, deviations, fits -Unilateral and bilateral tolerance system, hole and shaft basis systems- interchangeability, selective assembly. International standard system of tolerances, selection of limits and tolerances for correct functioning.

UNIT-II
LINEAR MEASUREMENT: Length standards, end standards, slip gauges- calibration of the slip gauges, dial indicators, micrometers.
MEASUREMENT OF ANGLES AND TAPERS: Different methods – bevel protractor, angle slip gauges- angle dekkor- spirit levels- sine bar- sine table, rollers and spheres used to measure angles and tapers.
LIMIT GAUGES: Taylor's principle – design of go and no go gauges; plug, ring, snap, gap, taper, profile and position gauges.

UNIT-III
OPTICAL MEASURING INSTRUMENTS: Tools maker's microscope and uses – autocollimators, optical projector, optical flats and their uses.

INTERFEROMETRY: Interference of light, Michaleson's interferometer, NPL flatness interferometer, and NPL gauge interferometer.

UNIT-IV

SURFACE ROUGHNESS MEASUREMENT: Differences between surface roughness and surface waviness – Numerical assessment of surface finish-CLA, Rt., R.M.S. Rz, R10 values, Method of measurement of surface finish – Profilograph, Talysurf, ISI symbols for indication of surface finish. COMPARATORS: Types – mechanical, optical , electrical and electronic, pneumatic comparators and their uses.

UNIT – V

GEAR MEASUREMENT: Nomenclature of gear tooth, tooth thickness measurement with gear tooth vernier, pitch measurement, total composite error and tooth to tooth composite errors, rolling gear tester, involute profile checking.

SCREW THREAD MEASUREMENT: Elements of measurement – errors in screw threads- concept of virtual effective diameter, measurement of effective diameter, angle of thread and thread pitch, and profile thread gauges.

UNIT – VI

FLATNESS MEASUREMENT: Measurement of flatness of surfaces- instruments used- straight edges- surface plates – auto collimator.

MACHINE TOOL ALIGNMENT TESTS: Principles of machine tool alignment testing on lathe, drilling and milling machines.

TEXT BOOKS:

1. Engineering Metrology by R.K.Jain / Khanna Publishers
2. Engineering Metrology by Mahajan / DhanpatRai Publishers

REFERENCE BOOKS:

1. Dimensional Metrology, Connie Dotson, Cengage Learning.
2. Engineering Metrology by I.C.Gupta / DhanpatRai Publishers.
3. Precision Engineering in Manufacturing by R.L.Murthy / New Age.
4. Engineering Metrology and Measurements by NV Raghavendra, L Krishna murthy, Oxford publishers.
5. Engineering Metrology by KL Narayana, Scitech publishers.

V18MET18	DESIGN OF MACHINE ELEMENTS- II	L	T	P	C
		3	1	0	4

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Apply the concepts of different types of Bearings for design	K3
CO2	Illustrate the design concept of IC Engine Parts	K3
CO3	Employ the design concepts to curved beams	K3
CO4	Examine different Transmissions Systems and power screws	K2
CO5	Analyze the design of Spur & Helical Gears	K4
CO6	Calculate various parameters of mechanical springs	K3

UNIT –I

Design Of Bearings: Applications and types of Journal bearings, Lubrication, Bearing Modulus, clearance ratio, bearing materials, journal bearing design, Ball and roller bearings, Static loading of ball & roller bearings, bearing life, Failure of bearings. Selection of Anti-friction bearings

UNIT- II

Design of Engine Parts: Design of piston, forces acting on piston. Design of Cylinder, Cylinder block. Design of Connecting Rod, stress due to whipping action on connecting rod
ends. Design of Cranks and Crank shafts-Centre and over hung cranks.

UNIT –III

Design of Curved Beams: Introduction, Stresses in curved beams, Expression for radius of neutral axis for rectangular, circular, trapezoidal and T-Section. Design of crane hooks, C –clamps, problems.

UNIT- IV

POWER TRANSMISSIONS SYSTEMS, PULLEYS: Transmission of power by belt and rope drives, transmission efficiencies, belts – flat and V types, ropes, pulleys for belt and rope drives, materials, chain drives, problems. Selection of V-Belts

DESIGN OF POWER SCREWS: Design of screws - square, ACME and buttress, design of nut, possible failures, problems.

UNIT – V

Spur & Helical Gear drives: Spur gears, Helical gears, Load concentration factor, Dynamic load factor, Surface compressive strength, Bending strength, Design analysis of spur and Helical gears, Estimation of centre distance, module and face width, Check for dynamic and wear considerations, problems.

UNIT- VI

Mechanical Springs: Stress and deflections of helical Springs, Compression springs, Springs for fatigue loading, Natural frequency of helical springs, Energy storage capacity. Shear stress multiplication Factor, Wahl correction factor and design of helical springs under static and dynamic loads. Design of leaf springs, co-axial springs, related problems.

Note: Design data book is permitted for examination

TEXT BOOKS:

1. Machine Design/V.Bandari/TMH Publishers
2. Machine Design/ NC Pandya& CS Shaw/ Charotar publishers
3. Design data book.

REFERENCES:

1. Machine Design: An integrated Approach / R.L. Norton / Pearson Education
2. Mech. Engg. Design / JE Shigley/Tata McGraw Hill education
3. Design of machine elements- spots/Pearson Publications
4. Machine Design-Norton/Pearson Publications

V18MET19	ROBOTICS	L	T	P	C
		3	0	0	3

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Describe various robot configuration and components	K2
CO2	Select appropriate actuators and sensors for a robot based on specific application	K3
CO3	Apply kinematic and dynamic analysis for simple serial kinematic chains	K3
CO4	Explain trajectory planning for a manipulator	K2
CO5	Understand the Robot Actuators And Feed Back Components	K2
CO6	Illustrate various applications of robots in manufacturing	K3

UNIT-I
INTRODUCTION: Automation principle in Robotics, CAD/CAM and Robotics – An over view of Robotics – present and future applications. classification by coordinate system.

UNIT – II
COMPONENTS OF THE INDUSTRIAL ROBOTICS: Function line diagram representation of simple Robot, Components. Degrees of freedom – Requirements and challenges of end effectors. Mechanical, Electrical and hydraulic grippers.

UNIT – III
MOTION ANALYSIS: Homogeneous transformations as applicable to rotation and translation – problems. MANIPULATOR KINEMATICS: Specifications of matrices, D-H notation joint coordinates and world coordinates Forward and inverse kinematics – problems. Differential transformation and manipulators, Jacobians – problems Dynamics

UNIT – IV
GENERAL CONSIDERATIONS IN PATH DESCRIPTION AND GENERATION: Trajectory planning and avoidance of obstacles, path planning, Skew motion, joint integrated motion –straight line motion – Robot programming, languages and software packages-description of paths with a robot programming language.

UNIT V
ROBOT ACTUATORS AND FEED BACK COMPONENTS: Actuators: Pneumatic, Hydraulic actuators, electric & stepper motors.
FEEDBACK COMPONENTS: Position sensors – potentiometers, resolvers, encoders and Velocity, proximity sensors.

UNIT VI

ROBOT APPLICATIONS IN MANUFACTURING: Material Transfer – Material handling, loading and unloading- Processing – spot and continuous arc welding & spray painting – Assembly and Inspection.

TEXT BOOKS:

1. Industrial Robotics / Groover M P /Pearson Edu.
2. Robotics and Control / Mittal R K &Nagrath I J / TMH.

REFERENCES:

1. Robotics / Fu K S/ McGraw Hill.
2. Robotic Engineering / Richard D. Klafter, Prentice Hall
3. Robot Analysis and Intelligence / Asada and Slow time / Wiley Inter-Science.

<table>
<tr><td rowspan="2">V18MEL06</td><td rowspan="2">METROLOGY AND INSTRUMENTATION & CONTROL SYSTEMS LAB</td><td>L</td><td>T</td><td>P</td><td>C</td></tr>
<tr><td>0</td><td>0</td><td>3</td><td>1.5</td></tr>
</table>

CO1	Experiment and examine errors in calibration of various instruments	K3
CO2	Explain the working principle of metrology and measuring equipments.	K2
CO3	Compute distance, angle and surface finish by using standard measuring equipments	K3

METROLOGY
List of experiments :

1. Measurement of length, height and diameter by vernier calipers, micrometer and height gauge
2. Surface roughness measurement using talysurf
3. Taper angle measurement
4. Tool makers microscope
5. Measurement of bores using dial bore indicator
6. Measurement of thickness of gear tooth by vernier tooth caliper

INSTRUMENTATION & CONTROL SYSTEMS LAB
List of experiments :

1. Study and calibration of LVDT transducer for displacement measurement
2. Calibration of pressure gauge
3. Angular Measurement using angular sensor
4. Measurement of speed using opto-coupler pickup
5. Calibration of strain gauge
6. Study & calibration of resistance temperature detector (RTD) transducer for temperature measurement
7. Study and calibration of a rotameter for water flow measurement
8. Vibration measurement trainer

V18MEL08	**THEORY OF MACHINES LAB**	**L**	**T**	**P**	**C**
		0	**0**	**3**	**1.5**

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Understand the concepts on various machine elements such as governors, springs, flywheel and cam & follower	K2
CO2	Examine the motion of gyroscope and static & dynamic balancing of masses	K3
CO3	Apply the principles of various power transmission systems such as shafts, gears and belt & pulley	K3

List of experiments :

1. To determine whirling speed of shaft theoretically and experimentally.
2. To determine the position of sleeve against controlling force and speed of a Hartnell governor and to plot the characteristic curve of radius of rotation.
3. To analyse the motion of a motorized gyroscope when the couple is applied along its spin axis
4. To determine the frequency of undamped free vibration of an equivalent spring mass system.
5. To determine the frequency of damped force vibration of a spring mass system
6. To study the static and dynamic balancing using rigid blocks.
7. To find the moment of inertia of a flywheel
8. To plot follower displacement vs cam rotation for various Cam Follower systems.
9. To find coefficient of friction between belt and pulley.
10. To study simple and compound screw jack and determine the mechanical advantage, velocity ratio and efficiency
11. To study various types of gears- Spur, Helical, Worm and Bevel Gears

V18MEL09	HEAT TRANSFER LAB	L	T	P	C
		0	0	3	1.5

Course Outcomes:

	After successful completion of the course, the student will be able to:	Knowledge Level
CO1	Evaluate the amount of heat exchange in various modes of heat transfer for several geometries.	K4
CO2	Evaluate the amount of heat exchange in condensation & boiling processes and for heat exchangers.	K4

List of experiments :

1. Determination of overall heat transfer co-efficient of a composite slab.
2. Determination of efficiency of a pin-fin.
3. Determination of heat transfer rate through a lagged pipe.
4. Determination of thermal conductivity of a metal rod.
5. Determination of Thermal conductivity of liquids and gases.
6. Determination of heat transfer rate through a concentric sphere.
7. Determination of heat transfer coefficient in natural and forced convection
8. Determination of emissivity of a given surface.
9. Determination of Stefan Boltzman constant.
10. Determination of effectiveness of parallel and counter flow heat exchangers.
11. Determination of heat transfer rate in drop and film wise condensation.
12. Determination of critical heat flux.

Add-on experiments: Heat transfer modeling of a simple component used in a heat exchanger using Ansys in the lab (Virtual lab)

Annexure-ME-III

List courses offered under Open Elective -I in VI semester under V18 Regulation for all other branches:

S.No.	Course Code	Name of the Course
1	V18MEOE1	Basic Mechanical Engineering
2	V18MEOE2	Green Engineering Systems
3	V18MEOE3	Introduction to Robotics

Syllabi for the Courses offering under Open Elective - I

V18MEOE1	BASIC MECHANICAL ENGINEERING (OPEN ELECTIVE-I)	L	T	P	C
		3	0	0	3

Course Outcomes:
After successful completion of the course, the student will be able to,

CO1	Understand classification and working of major components in thermal power plants.	K2
CO2	Discuss various metal joining processes	K2
CO3	Classify types of air compressors and refrigeration systems.	K2
CO4	Illustrate the working of internal combustion engines	K2
CO5	Understand basics of heat transfer	K2
CO6	Discuss about functions and operations of machine tools including milling, shaping, grinding and lathe machines	K2

UNIT-I
Steam boilers: Definition, Classification of boilers, essentialities of boilers, working of boilers, boiler mountings and accessories.

UNIT-II
Metal casting- Pattern design, types of sands, moulding tools and mould making.
Metal joining: Arc welding, gas welding, brazing and soldering.
Sheet metal operations: Rolling and extrusion principles.

UNIT-III
Reciprocating and rotary air compressors: uses of compressed air, types, working principle, work done, simple problems. Refrigeration: concepts, principle of refrigeration and types of refrigeration.

UNIT-IV
Internal combustion engines: Classification of IC engines, basic engine components and nomenclature, working principle of engines- Four stroke and two stroke petrol and diesel engines, comparison of CI and SI engines, comparison of four stroke and two stroke engines, problems on indicated power, brake power, friction power, specific fuel consumption, brake thermal efficiency, indicated thermal efficiency and mechanical efficiency.

UNIT-V
Heat Transfer: Modes and governing laws of heat transfer, Thermal Resistance Concept, Composite Walls, Cylinders, Overall Heat Transfer Co-efficient, simple Problems on Heat Transfer.

UNIT-VI
Machine Tools and Machining Processes: Lathe Machine, types, Lathe Operations, Milling Machine-Types, Milling Operations, Drilling Machine, types, Operations, Grinding Machine, types, Operations.

TEXT BOOKS:

1. Elements of Mechanical Engineering – M. L. Mathur, F. S. Mehta and R. P. Tiwari, Jain Brothers, New Delhi.
2. Engineering Heat Transfer - Gupta &Prakash, Nem Chand & Brothers, New Delhi.
3. Workshop Technology (Vol. 1 and 2) – B. S. Raghuvanshi, DhanpathRai and Sons, New Delhi.
4. Mechanical Engineering Science K R Gopala Krishna, Subhas publications

REFERENCE BOOKS:

1. Thermal Engineering, Ballaney,P.L., Khanna Publishers, 2003
2. Elements of Mechanical Engineering, A.R.Asrani, S.M.Bhatt and P.K.Shah, B.S. Publs.
3. Production Technology by P.N.Rao by I& II McGraw-Hill publications

V18MEOE2	GREEN ENGINEERING SYSTEMS (OPEN ELECTIVE-I)	L	T	P	C
		3	0	0	3

Course Outcomes:
After successful completion of the course, the student will be able to,

CO1	Understand about solar radiation and its collection	K2
CO2	Discuss about various solar energy storage systems and applications.	K2
CO3	Explain about bio-mass, geothermal energy and ocean energy	K2
CO4	Classify the energy efficient systems.	K2
CO5	Describe different energy efficient processes.	K2
CO6	Discuss about features of green buildings	K2

UNIT-I

INTRODUCTION: SOLAR RADIATION: Role and potential of new and renewable sources, Environmental impact of solar power, structure of the sun, the solar constant, instruments for measuring solar radiation. Photo voltaic energy conversion – types of PV cells.

SOLAR ENERGY COLLECTION: Flat plate and concentrating collectors, classification of concentrating collectors, advanced collectors.

UNIT – II

SOLAR ENERGY STORAGE AND APPLICATIONS: Sensible, latent heat, solar ponds, solar applications-solar heating/cooling technique, solar distillation and drying, solar cookers, central power tower concept and solar chimney.

WIND ENERGY: Sources, basic principle of wind energy conversion, basic components, horizontal and vertical axis windmills.

UNIT – III

BIO-MASS: Principles of bio-conversion, types of bio-gas plants, bio fuels.

GEOTHERMAL ENERGY: Resources, types of wells, methods of harnessing the energy.

OCEAN ENERGY: OTEC, Principles of utilization, OTEC plants.

Tidal and wave energy: Tidal power plants, hydel power plants.

UNIT–IV

ENERGY EFFICIENT SYSTEMS:

(A) ELECTRICAL SYSTEMS: Energy efficient motors, energy efficient lighting and control, selection of luminaire, controls for HVAC (heating, ventilation and air conditioning), demand site management.

(B) MECHANICAL SYSTEMS: Fuel cells- principle, selection of fuels & working of various types of fuel cells, Environmental friendly and Energy efficient compressors and pumps.

UNIT-V

ENERGY EFFICIENT PROCESSES: Environmental impact of the current manufacturing practices and systems, benefits of green manufacturing systems, selection of recyclable and environment friendly materials in manufacturing, vegetable based cutting fluids, zero waste manufacturing.

UNIT – VI

GREEN BUILDINGS: Definition, features and benefits. Sustainable site selection and planning of buildings for maximum comfort. Environmental friendly building materials like bamboo, timber, rammed earth, hollow blocks, lime & lime pozzolana cement, agro materials and industrial waste, Ferro cement and Ferro-concrete, alternate roofing systems, paints to reduce heat gain of the buildings. Energy management.

TEXT BOOKS:

1. Solar Energy – Principles of Thermal Collection and Storage, Sukhatme S.P. and J.K.Nayak, TMH.
2. Non-Conventional Energy Resources, Khan B.H., Tata McGraw Hill, New Delhi, 2006.
3. Green Manufacturing Processes and Systems, Edited by J. Paulo Davim, Springer 2013.

REFERENCES:

1. Alternative Building Materials and Technologies / K.S Jagadeesh, B.V Venkata Rama Reddy and K.S Nanjunda Ra.
2. Principles of Solar Energy / Frank Krieth & John F Kreider.
3. Non-Conventional Energy / Ashok V Desai / Wiley Eastern.
4. Renewable Energy Technologies / Ramesh & Kumar / Narosa
5. Renewable Energy Technologies / G.D Roy

V18MEOE3	INTRODUCTION TO ROBOTICS (OPEN ELECTIVE-I)	L	T	P	C
		3	0	0	3

Course Outcomes:
After successful completion of the course, the student will be able to,

CO1	Explain various automations and components.	K2
CO2	Discuss the anatomy of the robot with its components	K2
CO3	Illustrate robot configurations	K3
CO4	compute trajectory planning system	K3
CO5	Discuss various robot actuation and feedback sensors	K2
CO6	Explain different robot applications in industrial purpose	K2

UNIT-I

INTRODUCTION: Automation principle and objectives, Reasons for automation, steps in automation strategy, drawbacks of conventional Manufacturing, elements of automation system, input/output devices for discrete data, application of automation.

UNIT – II

ROBOTICS: Definition of Robot, History of robotics, Robotics market and the future prospects, Robot Anatomy, Robot motions, Joints, Work volume, work space, Robot drive systems.

UNIT – III

Robot configurations: Polar, Cartesian, cylindrical and Jointed-arm configuration. Precision of movement – Spatial resolution, Accuracy, Repeatability, End effectors – Tools and grippers, Degrees of freedom – Asimov's laws of robotics dynamic stabilization of robots.

UNIT IV

TRAJECTORY: Introduction to trajectory, path description and generation. Trajectory planning and avoidance of obstacles, path planning, Skew motion, joint integrated motion –straight line motion.

UNIT –V

Robot actuation and feedback components

Position sensors – Potentiometers, resolvers, encoders, velocity sensors. Proximity and tactile sensor in robotics. Actuators - Pneumatic and Hydraulic Actuators, Electric Motors, Stepper motors, Servomotors, Power Transmission systems.

UNIT –VI

Robots Technology of the future: Artificial Intelligence, Goals of AI research, Telepresence and related technologies, Mechanical design features, Mobility, locomotion and navigation, system integration and networking.

TEXT BOOKS:

1. Automation, Production systems, and computer integrated manufacturing-MikellP.Groover 3rd edition, Pearson 2009
2. Industrial Robotics-Groover, Weiss, Nagel, McGraw Hill International, 2nd edition, 2012

REFERENCES:

SRI VASAVI ENGINEERING COLLEGE (Autonomous)

(Sponsored by Sri Vasavi Educational Society; Regd. No: 898/2000)
(Approved by AICTE, New Delhi & Permanently affiliated to JNTUK,Kakinada)
(Accredited by NAAC with 'A' Grade, Recognized by UGC under section 2(f) & 12(B))
Pedatadepalli, TADEPALLIGUDEM – 534 101, W.G. Dist, (A.P.)
Department of Management Studies (MBA)

June 6, 2020.

Minutes of the third Board of Studies meeting in Management Studies held on 04-06-2020

The following members are present.

S.No	Name of the member	Designation	
1	Dr.G.V.Subba Raju	Professor & HOD Department of Management Studies Sri Vasavi Engineering College Tadepalligudem	Chairman BOS
2	Prof. B. Amarnath	Professor Department of Management Studies Sri Venkateswara University Tirupati	Council Nominee
3	Dr.J.N.V.Raghu Ram	Associate Professor Department of Technology Management VIT, Vellore	Council Nominee
4	Sri. P.S. Varma	D G M Coromandel International Limited Kakinada	Industry expert
5	Prof. D. Surya Chandra Rao	Professor Department of Management Studies Krishna University Machilipatnam	University Nominee
6	R.Satyanarayana	Associate Delivery Head Ericson India Ltd. Bengaluru	Alumni
Department of Management Studies, Sri Vasavi Engineering College members			
7	Dr. S. Krishna Murthy Naidu	Associate Professor	Member
8	Dr. RSRK Kiran Kumar	Associate Professor	Member
9	D.Satyanarayana	Sr. Asst.Professor	Member
10	D. Naveen Kumar	Asst. Professor	Member
11	R.V.Rajasekhar	Asst. Professor	Member

12	U.Bhargava	Asst. Professor	Member
13	Dr. K.Rambabu	Asst. Professor	Member
14	K.Vinaykumar	Asst. Professor	Member
15	T.Dileep	Asst. Professor	Member

Minutes of the third BOS meeting held on 04-06-2020.

The chairman of the BOS extended a formal welcome and introduced the members.

Item 1: Syllabi approval for Organizational Behaviour and Management Science Courses for the academic year 2020-21.

The Chairman of BOS proposed the syllabi for Organizational Behaviour and Management Science courses for the academic year 2020-21. After considering the suggestion made by all BOS members, the courses syllabi for Organizational Behaviour and Management Science courses has been approved. The approved syllabi copies are enclosed as Annexure-MBA-01.

Item 2: Review of MBA (Autonomous) results of 2018, 2019 Admitted batch results.

All BOS members are expressed their satisfaction on the pass percentage and performance of students in examinations.

Item 3: Summer internship (Project) guidelines for 2019 admitted batch in view of COVID-19.

In view of COVID-19 the external BOS members discussed the summer internship (Project) possibilities and suggested to look into the guidelines specified by AICTE and UGC in this connection.

Dr. G.V.Subba Raju
HOD & Chairman
BOS in Management Studies

Annexure-MBA-01

SRI VASAVI ENGINEERING COLLEGE
(Autonomous)

ORGNIZATIONAL BEHAVIOUR

With effect from the 2018-19 admitted batch

SNO	Programme	Course Code	Course Name	L	T	P	C
1	B.Tech	V18MBT53	Organizational Behaviour	3	0	0	3

After completion of this course, Student will be able to

CO 1	Identify the basic concepts of organizational behaviour	K1
CO 2	Enumerate the importance of individual personality and learning in the organizational context.	K2
CO 3	Develop decision making abilities and interpersonal communication skills	K3
CO 4	Identify the basic concepts of Group dynamics	K1
CO 5	Identify the foundations of organization development	K1
CO 6	Develop team building skills	K2

UNIT-I:

Introduction - Nature and scope: linkages with other social sciences – Individual roles and Organizational Goals - Perspectives of Human Behaviour, Approach to organizational behaviour - models of organizational behaviour.

UNIT-II:

Personality Development: Nature - Stages, Determinants of Personality, Johari Window - Transactional Analysis, Learning Processes – theories. Perception: nature -Process –Motivation – Concepts - Theories - Leadership Theories. Attitude and Values.

UNIT-III:

Decision Making Process: Decision making Process- Individual vs. Team decision Making- Interpersonal Communication. Types of decisions.

Unit IV:

Group Dynamics-Behavioural Dimensions, Groups and their formation-Informal Organizations, Group versus Individual Interaction. **Group conflict:** Listening, Feedback, Collaborative Processes in Work Groups, Conflict Resolution in Groups and Problem Solving Techniques.

UNIT-V:

Organizational Development: Goals, processes, change – resistance to change –Impact of technology on human behaviour- Nature of OD - interventions, OD techniques and OD applications.

UNIT- VI:

Team Building- Meaning and Significance of team building- stages of team building- benefits of team building-High performance teams.

REFERENCE BOOKS:

SRI VASAVI ENGINEERING COLLEGE

(Autonomous)

Management Science
With Effect From the 2018-19 Admitted Batch

S.NO	Programme	Course Code	Course Name	L	T	P	C
1	B.Tech	V18MBT52	Management Science	3	0	0	3

After completion of this course, Students Will be able to

CO 1	Understand various approaches to Management	K2
CO 2	Explain the principles and practices of operations management	K2
CO 3	Understand the Functions of Human Resource Management and Marketing Management	K2
CO 4	Sketch the networks for better project management	K3
CO 5	Understand the Concept of Strategic Management	K2
CO 6	Describe the knowledge of contemporary management practices	K1

UNIT I Introduction to Management: Concept –nature and importance of Management – Functions of Management – Scientific Management: F W Taylor contributions, Henry Fayal 14 Principles. Theories of Motivation: Abraham Maslow's Need Hierarchy, Theory-X and Theory Y. Herzberg Two Factor Theory.

UNIT II Operations Management: Plant Location, Plant layout types. – Work study- Statistical Quality Control- Control charts (X-chart, R-chart,) Simple problems, Material Management: Need for Inventory control- EOQ, ABC analysis (HML, SDE, VED, and FSN analysis).

UNIT III Functional Management: Concept of HRM, HRD - Functions of HR Manager-Job analysis, Job Evaluation and Merit Rating - Marketing Management- Functions of Marketing – Four P's , Product, Price, Place and Promotion- New product development-product life cycle, services marketing.

UNIT IV Project Management: (PERT/CPM): Development of Network – Difference between PERT and CPM-Identifying Critical Path- Project Crashing (Simple Problems).

UNIT V Strategic Management: Vision, Mission, Goals, Strategy- Strategic management process – Elements of Corporate Planning Process – Environmental Scanning – SWOT analysis..

UNIT VI Contemporary Management Practices: ERP, Total Quality Management (TQM), Six sigma, Supply Chain Management, Business Process outsourcing (BPO),Lean start ups and entrepreneurship.

ANNEXURE-VII

Minutes of the 3rd meeting of BOS in Dept., of Electronics& Communication Engineering (Held on 10.06.2020)

The ECE Department 3rd meeting of Board of Studies (BOS) was conducted through online mode on 10.6.2020 at 11.00 A.M using ZOOM Application with following given link address.

https://zoom.us/j/92863815387?pwd=MnBpRFVjMXpGVVFXTURabEdmeSt2Zz09 .

Following external members have attended the meeting along with internal faculty members. The ECE HOD, Dr E. KusumaKumari, BOS Chairman headed the meeting.

Details of members attended:

S.No	Name of the BOS Member	Nominee	Address
1.	Dr.E.KusumaKumari	Chair person	Professor & Head, ECE, SVEC
2.	Prof.I.SanthiPrabha	University Nominee	Prof.in ECE Dept., University College of Engg., JNTUK, Kakinada
3.	Prof. NVSN. Sarma	Subject Expert	Director, IIIT Trichy Tiruchirapalli, Tamilnadu.
4.	Prof. M. VenugopalaRao	Subject Expert	Prof., ECE Dept., K.L.University, Vijayawada.
5.	Sri. Sunkavalli Siva Kumar	Alumni Nominee	Sr.Engineer,Qualcomm, Bangalore.
6.	All Faculty Members in Dept.	Members	ECE Dept., SVEC

The following are the key points discussed in the meeting.

- **Item No.1 : Chairperson, BOS has welcomed all the members and given the Opening Remarks.**

- **Item No.2: Review & approval of the V& VI Sem of B. Tech ECE of V18 Reg.**

- The Chairman and the members reviewed the course structure of B. Tech ECE and suggested modifications in the structure.
- Members suggested to include topics, Multipath Propagation, Fading, Types of fading concepts in Antenna & Wave Propagation course in V semester.
- Members suggested to include the concept of Cavity Resonator, Impedance , and Dielectric Constant Measurement in Microwave Engineering Course in VI Semester.
- Members suggested to include Mini-project as Lab associated Component in each Lab

Course.

- Members suggested to include topics, Introduction of DTFT in the Course of Digital Signal Processing in VI semester.
- Members suggested to include separate column in the course structure to indicate the course category.
- The approved course structure & Syllabus for the V & VI semesters of B. Tech ECE in Academic Year 2020-21 were given in**Annexure-ECE-I & Annexure-ECE-II**

➢ **Item No.3: Review & Approval the List of Open Elective Courses offered by ECE Dept., in VI Semester B. Tech ECE of V18 Reg.**

BOS Members suggested to include the Course titled as "Principles of Communication Systems" as an Open elective course instead of Bio- Medical Engineering Course in VI semester. The approved Syllabus was given in **Annexure-ECE-III**

➢ **Item No. 04: Approval for offering Honors degree in DATA SCIENCE offered by Department of Computer Science and Engineering for B. Tech Electronics and Communication Engineering students under V18 Regulation**

BOS Members approved our students to opt for the Honors degree offered by the Department of Computer Science and Engineering with the rules and regulations which will be approved by Academic Council.

➢ **Item No. 5: Approval of List of Courses offered to EEE Department in the VI Semester.**

BOS Members Approved the List of Courses offered to EEE Department in the VI Semester and details of syllabus is given in **Annexure-ECE-IV**

S.No	Programme	Semester	Course Code	Course Name
1	EEE	VI	V18ECT23	Fundamentals of Microprocessor & Microcontrollers
2	EEE	VI	V18ECL10	Microprocessors & Microcontrollers Lab

➢ **Item No. 6: Review and approval of Proposed course structure & Syllabi for III & IV semesters of B. Tech ECT under V18 Regulations.**

BOS Members suggested and approved the III & IV SEM B.Tech(ECE) Course Structure and Syllabus for B.Tech (ECT) Programme also. The approved Course Structure is given in **Annexure-ECE-V**.

Finally, the chairperson thanked all the BOS members and faculty. The meeting was ended at 12.30 P.M

Dr. E. Kusuma Kumari,
Chairperson, BOS

Annexure-ECE-I

Annexure-ECE-II

Approved Syllabus for V & VI Semesters

V Sem.	Data Structures and Algorithms	Course Code: V18CST81	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Explain Sorting and searching techniques. **(K2)**

CO2: Demonstrate algorithm notations. **(K2)**

CO3: Develop Singly Linked Lists, Double Linked List. **(K3)**

CO4: Interpret the Basic Concepts in Data Structures, Stacks and Queues **(K3)**

CO5: Develop Binary trees and BST **(K3)**

CO6: Develop various graph algorithms. **(K3)**

Unit I: Sorting: bubble sort, insertion sort, selection sort, quick sort, merge sort, heap sort, radix sort.
Searching: linear search, binary search. Introduction to hashing, hash functions.

Unit II: Introduction to data structures – Basic terminology, classification of data structures, operation on data structures, ADT, time and space complexity, Big O, Omega and Theta notation.
Arrays: Representation of arrays - polynomial representation, addition of two polynomials, sparse representation, transpose of sparse matrix. (**Refer Reference Text book 1**)

Unit III: Linked list: Introduction, **single linked list** Representation of node, operations on single linked list, reverses the linked list. **Double linked list**: operations (insert delete and display). **Circular linked List** and its operations (create and display single circular linked list).

Unit IV: Stacks introduction, array representation, operations, linked list representation, operation on linked stacks, infix to postfix conversion, evolution of arithmetic expression. **Queues** Introduction, Array representation, operations linked list representation, linked queue operations, circular queues.

Unit V: Trees: Introduction, Terminology, Representation of Trees, types of trees, **Binary Trees:** Properties of Binary Tress, creating a binary tree from general tree, Tree Traversals. **Binary Search Tree:** introduction, creation, insertion, delete, display and search operations.

Unit – VI: Graphs: introduction, Terminology, directed graphs, Graph Representation, **Graph Traversal techniques**: Depth First Search, Breadth First Search. **Spanning Trees**: Krushkal's Algorithm, Prim's algorithm. Single source shortest Paths and all pair shortest path algorithm

TEXT BOOKS:

1. Data Structures using C by ReemaThareja, Second Edition, oxford publications.
2. Data Structures, algorithms and applications in C++, SartajSahni, Universities press, Second Edition.

REFERENCE BOOKS:

1. Fundamentals of Data Structures and algorithms by C V Sastry, RakeshNayak, Ch. Raja Ramesh, Distributed by Wiley publications, new Delhi.
2. Fundamentals of Data Structures in C++, Ellis Horowitz, SartajSahni and Dinesh Mehta, 2nd Edition, Universities Press (India) Pvt. Ltd.
3. An Introduction to Data Structures with Application, Jean-Paul Tremblay , Paul Sorenson, Second Edition.
4. Data structures using C and C++, Langsam, Augenstein and Tanenbaum, PHI.
5. Problem solving with C++, The OOP, Fourth edition, W.Savitch, Pearson education.

V Sem.	VLSI Design	Course Code: V18ECT11	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Understand different IC technologies and basic electrical properties of MOS, CMOS and Bi-CMOS Circuits. **(K2)**

CO-2: Develop layouts for MOS & Bi-CMOS circuits using design rules. **(K3)**

CO-3:Calculate the parameters of MOS circuits and assess the effects of scaling **(K3)**

CO-4: Analyze the concept of Combinational and arithmetic circuits. **(K4)**

CO-5: Describe the fundamentals of low power VLSI design. **(K2)**

UNIT-I

Review of Microelectronics and An Introduction to MOS technology: IntroductiontoICtechnology,BasicMOStransistors,EnhancementmodeMOS transistor Action, Depletion mode MOS transistor Action, NMOS, PMOS fabrication, CMOS fabrication and Bi-CMOS technology, Comparison between CMOS and Bi-CMOS technology.

UNIT-II

Basic Electrical Properties of MOS and BICMOS Circuits: I_{ds} versus V_{ds} relationships, Aspects of MOS transistor threshold voltage V_t, Trans conductance g_m, Output conductance g_{ds} and Figure of merit, NMOS inverter, Pull-up to pull- down ratio for NMOS inverter driven by another NMOS inverter and through one or more pass transistors, Alternative forms of pull-up, CMOS inverter, BICMOS inverters, Latch-up in CMOS circuits.

UNIT-III:

MOS and Bi-CMOS Circuit Design Processes: MOS Layers, Stick Diagrams, Design Rules and Layout, General observations on the Design rules, 2µm Double Metal, Double Poly, CMOS/Bi-CMOS rules, 1.2µm Double Metal, Double Poly CMOS rules, Layout Diagrams of NAND and NOR gates and CMOS inverter, Symbolic Diagrams- Translation to Mask Form.

UNIT-IV:

Basic Circuit Concepts: Sheet Resistance, Sheet Resistance concept applied to MOS transistors and Inverters, Area Capacitance of Layers, Standard unit of capacitance, Some area Capacitance Calculations, The Delay Unit, Inverter Delays, Driving large capacitive loads, Propagation Delays, Wiring Capacitances, Choice of layers.

Scaling of MOS Circuits: Scaling models and scaling factors, Scaling factors for device parameters, Limitations of scaling.

NIT-V:

Subsystem design and layout: Architectural issues, Switch logic, Gate Logic

Examples of Structured Design (Combinational Logic): A Parity Generator, Bus Arbitration Logic for n-line-Bus

An Illustration of Design Process: Multiplier, Design of an ALU Subsystem, Ripple Carry Adder, and Carry look ahead adder.

UNIT-VI:

Introduction to Low Power VLSI Design: Need for Low Power VLSI chips, Sources of Power dissipation, Short circuit power dissipation Switching power dissipation and Short channel Effects. Low Power design through Voltage Scaling: VTCMOS, MTCMOS.

Text Books:

1. Essentials of VLSI Circuits and Systems by Kamran Eshraghian, Douglas and A. Pucknell and SholehEshraghian, Prentice-Hall of India Private Limited, 2005Edition
.
2. CMOS Digital Integrated Circuits Analysis and Design by Sung-Mo Kang, Yusuf Leblebici, Tata McGraw- Hill Education, 2003.

Reference Books:

1. “Practical Low Power Digital VLSI Design” by Gary K. Yeap, , KAP, 2002
2. “Low Power CMOS VLSI Circuit Design” by Kaushik Roy, Sharat Prasad, Willey, 2000

V Sem.	Microprocessor & Microcontrollers	Course Code: V18ECT12	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Describe the basic architecture and Modes of 8086 microprocessor **(K2).**

CO-2: Construct assembly language programs for arithmetic and Logical Operations - **(K3).**

CO-3: Describe the Hardware and software requirements in interfacing **(K2)**

CO-4 Describe Architecture and features of Intel 8051 microcontroller**(K2)**

CO-5.Construct assembly language programs for 8051 microcontroller**(K3)**

CO-6.Identify latest technology in microcontroller environment**. (K2)**

UNIT-1: **Introduction to Microprocessors**: Evolution of Microprocessors, features, Intel Microprocessor families, Architecture of 8086 microprocessor, pin/signal description, Physical address formation, I/O Addressing capability. Minimum Mode Maximum mode of 8086, General bus operation, Description of Minimum mode pins, Timing diagrams.
Interrupts, Available interrupts, Interrupt Cycle, ISR (Interrupt service Routine), and subroutines, Interrupt programming.

UNIT-II: **Programming with 8086 Microprocessor**: Various addressing modes of 8086, Instruction set and Classification, Assembler Directives of 8086.Program development steps, assembly language program development tools, Machine level programming, and writing programs with an assembler, writing Assembly language program using procedures and assembler macros. Sample Programs using various types of instructions.

UNIT – III: **Interfacing with Basic Peripherals**: Semiconductor memories interfacing (RAM, ROM), Interfacing Microprocessor to keyboards, interfacing to ADC/DAC , Interfacing 8255(PPI-Parallel I/O port), 8254(programmable Interval Timer/counter), 8259(Programmable interrupt controller), 8251(serial communication UART), DMA -8237 data transfer, Stepper motor interfacing and programming.

UNIT – IV:**8051 Microcontroller**: Intel 8051 Microcontroller, Microprocessor vs. Microcontroller, 8051 Microcontroller Architecture, Microcontroller 8051 pin diagram, Internal and External Memory, Counters and Timers, Serial Communication in 8051, interrupts in 8051.
Addressing Modes, Data Transfer Instructions, Data and Bit-Manipulation Instructions, Arithmetic Instructions, simple programs using microcontroller 8051.

UNIT – V: PIC Microcontroller: Introduction, characteristics of PIC microcontroller, PIC microcontroller families, memory organization, parallel and serial input and output, timers, Interrupts, PIC 16F877 architecture, instruction set of the PIC 16F877.

UNIT – VI: **Atmega328 Microcontroller**: Architecture and PIN Description of Atmega328 Arduino microcontroller. Arduino Language reference program structure, data types, variables & constants, operators, control statements and loops.

TEXT BOOKS:

1. Advanced microprocessor and Peripherals by A.K.Ray and K.M.Bhurchandi, TMH, 2000.
2. Microprocessors and Interfacing by Programming and Hardware by Douglas V Hall, SSSP Rao, Tata McGrawHill Education Private Limited, 3rd Edition.

Reference Books:

1. The Intel Microprocessors-Architecture, Programming, and Interfacing by Barry B.Brey,Pearson, Eighth Edition-2012.
2. Beginning Arduino Programming by Brian Evans

Sem.	Antenna & Wave Propagation Professional Elective-1	Course Code: V18ECT13	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Understand the radiation mechanism and fundamental parameters of antenna **(K2)**
CO-2: Solve the field components of dipole, quarter monopole antenna and their characteristics. **(K3)**
CO-3: Solve array factor for N element linear array and directivity **(K3)**
CO-4: Design basic micro strip antennas such as rectangular and circular and explain the concepts of modern antennas **(K3)**
CO-5: Design Microwave antennas and explain the procedure for antenna gain and Radiation pattern measurement **(K3)**
CO-6: Explain concept of propagation methods and fading in wave propagation.**(K2)**

UNIT I
ANTENNA FUNDAMENTALS: Introduction, Radiation Mechanism – single wire, two wires, Current Distribution on a thin wire antenna. Antenna Parameters –Near and far field regions, Radiation Patterns, Patterns in Principal Planes, Main Lobe and Side Lobes, Beam width, Polarization, Beam Area, Radiation Intensity, Beam Efficiency, Directivity, Gain and Resolution, Antenna Apertures, Aperture Efficiency, Effective Height, Reciprocity Theorem applicable to antenna Simple Problems.

UNIT II
WIRE ANTENNAS: Retarded Potentials, Radiation from Small Electric Dipole, Quarter wave Monopole and Half wave Dipole – Current Distributions, Evaluation of Electric and magnetic Field Components, Radiation Resistance, Beam width, Directivity Loop Antennas: Small Loops - Concept of short magnetic dipole -Field Components, Comparison of far fields of small loop and short dipole, Helical Antennas – Significance, Geometry, basic properties; Design considerations for mono filer helical antennas in Axial Mode and Normal Modes

UNIT III
ANTENNA ARRAYS : Two element arrays – N element Uniform Linear Arrays – Broadside, End-fire Arrays, Array factor, EFA with Increased Directivity, Derivation of their characteristics and comparison, Principle of Pattern Multiplication, Non – Uniform arrays- Binomial arrays , Phased Arrays concept- Beam scanning-Applications –Antenna synthesis-Binomial method.

UNIT IV

MICROWAVE ANTENNAS AND ANTENNA MEASUREMENTS

Parabolic Reflectors – Geometry, characteristics, types of feeds, F/D Ratio, Spill Over, Back Lobes, Aperture Blocking, Off-set Feeds, Cassegrain Feeds. Horn Antennas – Types-Design Characteristics of Pyramidal Horns.

Antenna Measurements – Block diagram of radiation pattern measurement setup and measurement procedure, Distance Criterion, Indoor and outdoor measurement- Far field measurement – Anechoic chamber-Advantages-Block diagram of Gain Measurements and measurement procedure (Comparison, Absolute and 3-Antenna Methods).

UNIT V

MODERN ANTENNAS: Micro strip Antennas-Geometry, Features, Advantages and Limitations, Rectangular and Circular Patch Antennas –Radiation mechanism-Design –Simple design problems of MSA- Smart antennas- Block diagram- concept- switched beam and adaptive array concept –MIMO antenna-Wearable antenna.

- **UNIT VI**

WAVE PROPAGATION AND TRENDS IN WIRELESS COMMUNICATION: Concepts of Propagation – frequency ranges and types of propagations. Concept of Ground Wave Propagation - Sky Wave Propagation –Mechanism of Reflection and Refraction – Concept of Tropospheric propagation . Fading, Types of fading, Multipath propagation.

TEXT BOOKS

1. Antennas for All Applications by John D. Kraus and Ronald J. Marhefka, 3rd Edition, TMH, 2003.
2. Electromagnetic Waves and Radiating Systems by E.C. Jordan and K.G. Balmain, PHI, 2nd Edition, 2000.
3. Broadband Microstrip Antenna by Girish Kumar, Artech house Publishers

REFERENCES

1. Antenna Theory by C.A. Balanis, John Wiley and Sons, 2nd Edition, 2001.
2. Antennas and Wave Propagation by K.D. Prasad, Satya Prakashan, Tech India Publications, New Delhi, 2001.
3. Antennas and Wave Propagation by SisirK.Das and Annapurna Das – TataMcGraw Hill
4. Electronic and Radio Engineering by F.E. Terman, McGraw-Hill, 4th Edition, 1955.
5. Antennas – John D. Kraus, McGraw-Hill, 2nd Edition, 1988.

V- Sem.	Electronic Switching Systems Professional Elective-1	Course Code: V18ECT14	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Explain functioning of Manual and cross bar automatic switching systems **(K2)**

CO-2: Explain the stored program control concept involved in electronic switching systems. **(K2)**

CO-3: Describe the inherent facilities with time division switching, Combinational switching. **(K2)**

CO-4: Analyze the various CCITT signaling models, Various Plans. **(K4)**

CO-5: Investigate the methods of collecting& measuring traffic data. **(K3)**

CO-6: Explain the architecture and services of ISDN. **(K2)**

UNIT -I:

Introduction: Evolution of Telecommunications, Simple Telephone Communication, Basics of Switching System, Manual Switching System, Major Telecommunication Networks.

Crossbar Switching: Principles of Common Control, Touch Tone Dial Telephone, Principles of Crossbar Switching, Crossbar Switch Configurations, Cross point Technology, Crossbar Exchange Organization.

UNIT -II:

Electronic Space Division Switching: Stored Program Control, Centralized SPC: Standby mode, Synchronous duplex mode, Distributed SPC, Software Architecture, Application Software, Enhanced Services, Two-Stage Networks, Three-Stage Networks, n- Stage Networks.

UNIT -III

Time Division Switching: Basic Time Division Space Switching, Basic Time Division Time Switching, Generalized time division Space switch, Basic Time division time switching: modes of operation, simple problems, Time Multiplexed Space Switching, Time Multiplexed Time division space Switch, Time Multiplexed Time Switching, Combination Switching: Time Space (TS) Switching, Space-time (ST) Switching

UNIT IV

Telephone Networks: Subscriber Loop System, Switching Hierarchy and Routing, Transmission Plan, Transmission Systems, Numbering Plan, Charging Plan, Signaling Techniques, In-channel

Signaling, Common Channel Signaling, CCITT Signaling System no.6.**Packet Switching: C**oncepts of Packet switching, Local- Area and Wide- Area Networks, Large-scale Networks.

UNIT -V:

Switching Networks: Single- Stage Networks, Grading, Link Systems, and Grades of service of link systems, Application of Graph Theory to link Systems, Use of Expansion, and Call Packing.

Telecommunications Traffic: The Unit of Traffic, Congestion, Traffic Measurement, A Mathematical Model, Lost-call Systems, Queuing Systems.

UNIT -VI:

Integrated Services Digital Network: Motivation for ISDN, New Services, Network and Protocol Architecture, Transmission Channels, User- Network Interfaces, Service Characterization, Interworking, ISDN Standards, Expert Systems in ISDN, Broadband ISDN, and Voice Data Integration.

Text Books:

1. Telecommunication Switching Systems and Networks by Thiagarajan Viswanathan, 2000, PHI.
2. Telecommunications Switching, Traffic and Networks by J. E. Flood, 2006, Pearson Education.

References:

1. Digital Telephony by J. Bellamy, 2nd Edition, 2001, John Wiley.
2. Data Communications and Networks by Achyut S. Godbole, 2004, TMH.
3. Principles of Communication Systems by H. Taub& D. Schilling, 2nd Edition, 2003, TMH.
4. Data Communication & Networking by B. A. Forouzan, 3rd Edition, 2004, TMH.
5. Telecommunication System Engineering by Roger L. Freeman, 4th Ed., Wiley-Inter Science, John Wiley & Sons, 2004.

V-Sem.	Engineer and Society	Course Code: V18ECT15	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Comprehend different moral perspect ivesan done's own Ethical standards. **(K2)**

CO-2: Understand the concept of safety and risk. **(K2)**

CO-3: Explain different initiativest oprotectnature.**(K2)**

CO-4: Identify the role of Information Technology.**(K2)**

CO-5: Understand different types of infringement of Intellectual Property Rights.**(K2)**

CO-6: Understand the importance of Entrepreneurship. **(K2)**

UNIT–I: Human Values

What is engineering – who is an engineer - Morals, Values and Ethics – Integrity

– Work Ethics – Service Learning – Civic Virtue -Value time – Co-operation – Commitment – Empathy–Self-confidence –Character.

UNIT–II: Engineer's Responsibilities and Rights

Safety and risk –Types of risks – Voluntary vs. Involuntary risk –Short Term vs. LongTermConsequences–ExpectedProbability–ReversibleEffects–Threshold Levels for Risk – Delayed vs. Immediate Risk – Collegiality – Techniques for achievingCollegiality-TwosensesofLoyalty–Rights–ProfessionalResponsibilities

– Confidential and Proprietary information.

UNIT–III: Global climatic issues and mitigation strategies

Greenhouse effect –global warming – acid rain – ozone layer depletion – International efforts-key initiatives of Montreal protocol, Rio declaration, Kyoto protocol, Johannesburg summit.

UNIT–IV: Future challenges to society

Sustainable development – Measures for sustainable development – Water conservation practices–Rain water harvesting methods-Water shed management Resettlements and Rehabilitation of people-waste and reclamation–Role of informationtechnology-Roleofanengineerinmitigatingsocietalproblems.

UNIT –V: Patent law, Trade Marks and Copyrights

Introduction, Types of IPR – Patent requirements - Application process

– Ownership–Transfer–Infringement–Litigation.

Trade Mark and Copyrights: Introduction – Registration Process – Transfer – Infringement.

UNIT–VI: Entrepreneurship

Meaning, definition& concept of Entrepreneurship, characteristics &skills of entrepreneur, Role of an entrepreneur in economic development.

Text Books

1. Professional ethics and human values by Ddharani kota Suyodana, Maruti publications (unit1,2).
2. Environmental studies" by Deeksha Dave, P. Udaya Bhaskar, Cengage Learning.(unit3,4).

Reference Books

1. Professional Ethics and Human Values, by A. Alavudeen, R. Kalil Rahman and M. Jayakumaran- University Science Press.
2. Environmental Studies by R.Rajagopalan 2nd Edition 2011, Oxford University Press.
3. Intellectual Property Rights by R.Radha Krishnan, S.Balasubramanian Excel Books, NewDelhi.
4. Intellectual Property Rights by PrabhuddhaGanguli. Tata McGrawHill, New Delhi.
5. Fundamentals of Entrepreneurship by PH.Nandan, PHILearning, NewDelhi.

V Sem.	**Data Structures and Algorithms Lab**	**Course Code:V18CSL34**	**L**	**T**	**P**	**C**
			0	**0**	**2**	**1**

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Construct Sorting and searching methods. **(K3)**
CO2: Construct hash table **(K3)**
CO3: Implement programs using Singly Linked Lists, Double Linked List. **(K3)**
CO3: Construct Basic Data Structures, Stacks, Queues and Applications. **(K3)**
CO4: construct Binary search tree **(K3)**
CO5: Implement various graph operations and shortest path algorithm. **(K3)**

List of Experiments

1. Programs to implement the following sorting techniques Selection sort, Quick sort, Merge sort
2. Programs to implement the following searching methods
   (a)Linear search (b) Binary search.
3. A Program to Implement hash table and its operations.(Note: Use at least one collision resolution technique)
4. A Program to implement addition of two polynomials. (Using arrays).
5. A Program to implement single linked list and its operations. (create, insert, delete, display, reverse list)
6. A Program to implement double linked list and its operations.
7. A Program to implement stack operations using arrays.
8. A Program to implement queue operations using arrays.
9. A Program to convert infix expression to postfix expression.
10. A Program to implement Binary search Tree and its operations.
11. A Program to implement graph traversal algorithms (BFS & DFS).
12. A Program to implement minimum spanning tree algorithms (Prims & Krushkal)
13. A Program to implement single source shortest path algorithm.

TEXT BOOKS:

1. Data Structures, algorithms and applications in C++, SartajSahni, Universities press, Second Edition.
2. Fundamentals of Data Structures in C++, Ellis Horowitz, SartajSahni and Dinesh Mehta, 2nd Edition, Universities Press (India) Pvt. Ltd.

REFERENCE BOOKS:

1. An Introduction to Data Structures with Application, Jean-Paul Tremblay , Paul Sorenson, Second Edition.

2. Fundamentals of Data Structures and algorithms by C V Sastry, RakeshNayak, Ch. Raja Ramesh, IK Publications, new Delhi.
3. Data structures using C and C++, Langsam, Augenstein and Tanenbaum, PHI.
4. Problem solving with C++, The OOP, Fourth edition, W.Savitch, Pearson education.

V Sem.	Microprocessor &Microcontrollers Lab	Course Code:V18ECL07	L	T	P	C
			0	0	2	1

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Develop algorithm and logic for different operations using 8086 Instructions. **(K3)**
CO-2: Construct simple programs for 8086 using Assembler directives (MASM)/Machine control Instructions. . **(K3)**
CO-3: Develop ALP to perform arithmetic and logical operations using various instructions. **(K3)**
CO-4: Develop ALP to perform conversions, finding squares of a numbers by using Loop, Jump instructions. . **(K3)**
CO-5: Develop Assembly language programs for 8051 Micro controller . **(K3)**

CO-6: Perform some applications using ARDUINO BOARD **(K3)**

LIST OF EXPERIMENTS

PART- A:
8086 Assembly Language Programming using Assembler Directives
Introduction to MASM/TASM
1. Basic Arithmetical operations –Unsigned Addition, Subtraction, Multiplication and Division. (Machine programming and Assembler programs)
2. Multi byte addition/subtraction
3. Sorting of given array of elements (Ascending order /descending order)
4. Sum of squares/cubes of a given n-numbers
5. Shift and rotate operations for given number.

PART- B: 8051 Assembly Language Programming
6. Write an Assembly Language program to find average of n numbers by 8051 microcontroller.
7.Write an Assembly Language program to find the no of 1's and 0's in a given number by 8051 Microcontroller.
8. Write an Assembly Language program to interface stepper motor to 8051 microcontroller(Both directions)

PART C: ARDUINO programming:

9. Blinking a LED using ARDUINO board and provide some delay.
10. Interfacing different sensors to ARDUINO board and observe their operation. 11. 2 to 3 week Mini Project

Requirements:

PC installed with TASM/MASM, Keil Micro vision
Regulated power supplies (12v)
Interfacing modules (Study Cards),
FRC, USB (RS232) Cables.
ARDUINO Boards.

V Sem.	VLSI Design lab	Course Code:V18ECL08	L	T	P	C
			0	0	2	1

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Explain the VLSI Design Methodologies using Mentor Graphics Tools **(K2)**
CO-2: Demonstrate significance of various CMOS Analog and Digital circuits in Full-custom IC Design flow **(K2)**

CO-3: Explain the Physical Verification in Layout Design **(K2)**

CO-4: Design and analyze of Analog and mixed signal simulation **(K2)**
CO-5: Analyze the Significance of Pre-Layout Simulation and Post-Layout Simulation. **(K2)**

PART-A

List of Experiments:

Design the following experiments using 130nm CMOS technology and extract parasitics.

1. CMOS Inverter
2. Universal Logic gates
3. Full Adder
4. RS-Latch & D- latch
5. JK-Flip Flop
6. Ripple Carry Adder
7. Asynchronous Counter
8. Ring Oscillator
9. R-2R Ladder Type DAC
10. Differential Amplifier
11. 2-3 week Mini Project.

Lab Requirements:

Software:

Mentor Graphics – Pyxis Schematic, IC Station, Calibre, ELDO Simulator

VI- SemesterSyllabus

VI Sem.	Computer Networks	Course Code: V18CST11	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Discuss fundamentals of network concepts and Reference Models. **(K2)**

CO2: Discuss Communication media and switching techniques. **(K2)**

CO3: Demonstrate Error control and protocols. **(K3)**

CO4: Apply Routing algorithms and congestion control algorithms. **(K3)**

CO5: Discuss Transport layer services and protocols. **(K2)**

CO6: Describe Application layer protocols. **(K2)**

UNIT-I: Introduction: Reference models: The OSI Reference Model- the TCP/IP Reference Model, Examples of Networks: Novell Networks, Arpanet, Internet, Network Topologies WAN, LAN, MAN.

UNIT– II: Physical Layer: Transmission Media, Multiplexing: FDM, WDM and TDM- LAN Technologies, introduction to switching: Circuit Switched Networks, Datagram Networks, and Virtual Circuit Networks.

UNIT–III: Data link layer: Design issues, Framing, Flow control, error control, error detection and correction, CRC, Checksum: idea, one's complement internet checksum, MAC: ALOHA, CSMA. Elementary Data Link Layer protocols: simplex protocol, Simplex stop and wait, Simplex protocol for Noisy Channel. Sliding window protocol: One bit, go back N, Selective repeat-Stop and wait protocol, HDLC, point to point protocol (PPP).Piggybacking.

UNIT-IV : Network Layer : Network layer design issues- Algorithm shortest path routing, Flooding, Hierarchical routing, Broad cast, Multi cast Routing algorithms-Congestion control and algorithms, Internet Protocol (IP) Addresses, Subnet masking

UNIT–V :Transport Layer: Services, Primitives and sockets, Elements of transport protocols, Internet Transport protocols(TCP,UDP,RPC,RTTP/RTP,RTCP) Segment headers, Primitives, Control, Congestion control, Quality of Service, QoS improving techniques: Leaky Bucket and Token Bucket algorithm.

UNIT–VI: Application Layer: DNS, SMTP, POP, And FTP HTTP Presentation formatting. Network security: Introduction to Cryptography, Authentication, Basics of Public key and private key cryptography, digital signatures and certificates firewalls and wireless security.

TEXT BOOKS:

1. Computer Networks by Andrew S Tanenbaum, 4th Edition. Pearson Education/PHI
2. Data Communications and Networks by Behrouz A. Forouzan.Third Edition TMH

REFERENCES:

1. An Engineering Approach to Computer Networks by S.Keshav, 2nd Edition, Pearson Education
2. Understanding Communications and Networks, 3rd Edition by W.A. Shay, Thomson

VI Sem.	Digital Signal Processing	Course Code: V18ECT16	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Classify Discrete Time Signals, systems, estimate the response of various Systems **(K2)**

CO-2: Compute DFT for discrete time signals using FFT Algorithm **(K3)**

CO-3: Describe the various implementations of digital filter structures **(K2)**

CO-4: Analyze and design a Digital filter (FIR&IIR) from the given specifications **(K4)**

CO-5: Use the Multi-rate Processing concepts in various applications. **(K2)**

CO-6: Describe the concepts of DSP Processor. **(K3)**

UNIT I INTRODUCTION: Review of Signals and systems, Digital Signal Processing: Discrete time signals & sequences, Classification of Discrete time Systems, stability of LTI systems. Response of LTI systems to arbitrary inputs. Solution of Linear constant coefficient difference equations. Frequency domain representation of discrete time signals and systems.

UNIT II DISCRETE FOURIER TRANSFORMS: Introduction to DTFT**,** Discrete Fourier transforms, Properties of DFT, Introduction to Fast Fourier transforms (FFT) - Radix-2 decimation in time and decimation in frequency FFT Algorithms, Inverse FFT.

UNIT III REALIZATION OF DIGITAL FILTER: Review of Z-transform, digital filters, Block diagram representation of linear constant coefficient difference equations, Basic structures of IIR systems, Transposed forms. Basic structures of FIR systems.

UNIT IV DESIGN OF IIR and FIR DIGITAL FILTERS: Analog filter approximations – Butterworth and Chebyshev, Design of IIR Digital filters from Analog filters, Characteristics of FIR Digital Filters, frequency response. Design of FIR Digital Filters using Window Techniques and Frequency Sampling technique, Comparison of IIR & FIR filters.

UNIT V MULTIRATE DIGITAL SIGNAL PROCESSING: Introduction, Decimation, Interpolation Sampling rate conversion, Implementation of sampling rate converters**,** Applications – Sub-band Coding of Speech Signals.

UNIT VI INTRODUCTION TO DSP PROCESSORS: Introduction to programmable DSPs, Multiplier and Multiplier Accumulator, Modified bus structures and memory access schemes in P-DSPs, Multiple Access Memory, Multi ported memory, VLIW architecture, Pipelining, Special addressing modes, On-Chip Peripherals. Introduction to Software Defined Radio.

TEXT BOOKS:

1. Digital Signal Processing, Principles, Algorithms, and Applications by John G. Proakis, Dimitris G.Manolakis,Pearson Education / PHI, 2007.
2. Discrete Time Signal Processing by A.V.Oppenheim and R.W. Schaffer, PHI

Reference Books:

1. Digital Signal Processing by Andreas Antoniou, TATA McGraw Hill , 2006
2. Digital Signal Processing by MH Hayes, Schaum's Outlines, TATA Mc-Graw Hill, 2007.
3. Digital Signal Processing by Alan V. Oppenheim, Ronald W. Schafer, PHI Ed., 2006
4. Digital Signal Processing by Ramesh babu, Sci Tech publications
5. Digital Signal Processing by A.NagoorKani, RBA Publications.

VI Sem.	**Embedded Systems-1**	**Course Code: V18ECT17**	**L**	**T**	**P**	**C**
			3	**0**	**0**	**3**

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Describe the Basic Concepts of embedded systems- **(K2).**

CO-2: Describe the characteristics of Application & Domain-Specific Embedded Systems -**(K2)**.

CO-3: Discuss various hardware, software design approaches in embedded environment- **(K2)**

CO-4: Develop programming and interfacing of 8051 using development tools –**(K3)**

CO-5: Explain the fundamental concepts of ARM Architecture. **(K2)**

CO-6: Develop ALP programs using ARM/Thumb instruction set. **(K3)**

UNIT I - INTRODUCTION TO EMBEDDED SYSTEMS

Embedded system-Definition, history of embedded systems, classification of embedded systems, major application areas, purpose of embedded systems, typical embedded system-core of the embedded system, Memory, Sensors and Actuators, Communication Interface, embedded firmware.

UNIT II: APPLICATION AND DOMAIN-SPECIFIC EMBEDDED SYSTEMS

Characteristics of an embedded system, Quality attributes of embedded systems, Application-specific and Domain-Specific examples of an embedded system.

UNIT-III: EMBEDDED HARDWARE / FIRMWARE DESIGN:

Analog and digital electronic components, I/O types and examples, Serial communication devices, Wireless devices**,** Embedded Firmware design approaches, Embedded Firmware development languages, DMA, Concepts of C versus Embedded C and Compiler versus Cross-compiler.

UNIT IV- PROGRAMMING AND INTERFACING OF 8051

Interfacing: LEDs & switches interfacing, keypad is interfacing, Seven Segment Display interfacing, 16X2 LCD interfacing, stepper motor interfacing, serial port interfacing using Embedded C.

UNIT – V: ARM ARCHITECTURE

ARM Design Philosophy, ARM Core Data Flow Model, Registers, PSR, Pipeline, Interrupts and Vector Table, Architecture Revision, ARM Processor Families.

UNIT – VI: ARM PROGRAMMING MODEL

Instruction Set: Data Processing Instructions, Branch, Load, Store Instructions, PSR Instructions, Conditional Instructions.

Thumb Instruction Set: Register Usage, Other Branch Instructions, Data Processing Instructions, Single-Register and Multi Register Load-Store Instructions, Stack, Software Interrupt Instructions

Text Books:

1. "Embedded systems" by Shibu K.V Tata McGraw Hill Education Pvt. Ltd.2013
2. "Microcontrollers: Theory and Applications" by AJAY V Deshmukh TATA McGraw Hill publications2012
3. "ARM System Developer's Guide – Designing and Optimizing System Software" by Andrew Sloss, Dominic Symes, Chris Wright, , ELSEVIER

References:

1. "The8051Microcontroller:Architecture,Programming,andApplications" by Kenneth J.Ayala, West Publishing
2. "8051Microcontrollers&EmbeddedSystems" by Muhammad Ali Mazdi Pearson Education
3. "ARM System on chip Architecture" by Steve Furber 2nd Edition | Pearson

VI Sem.	Microwave Engineering Professional Elective- II	Course Code: V18ECT18	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO 1 : Derive TE/TM modes in Rectangular waveguide and characteristics.**(K4)**
CO 2 : Illustrate the construction, operation and, Derive Power output and efficiency of Two cavity Klystron and Reflex klystron**(K4)**
CO 3: Illustrate the construction and operation of Travelling wave tube, cylindrical cavity magnetron and derive Hull cut off condition **(K4)**
CO 4: Explain operation of various passive waveguide components and calculate Scattering matrix for them **(K3)**
CO 5; Explain the operation of Microwave Solid State Devices and Understand basics of Microwave Integrated circuits and Materials for MIC**(K2)**
CO 6: Explain the procedure for measuring various microwave parameters using a Microwave test bench **(K2)**

UNIT I
MICROWAVE TRANSMISSION LINES: Introduction, Microwave Spectrum and Bands, Applications of Microwaves. Rectangular Waveguides(RWG) – Solution of TE and TM wave equation in RWG- Characteristic Equation and Cut-off Frequencies, Filter Characteristics, Dominant and Degenerate Modes, Mode Characteristics – Phase and Group Velocities, Wavelengths and Impedance Relation & Characteristics - Cavity resonators – Rectangular cavity resonator – Dominant mode – Resonant frequency – related problems.

UNIT II
MICROWAVE TUBES (O type) : Limitations and Losses of conventional tubes at microwave frequencies. Re-entrant Cavities, Microwave tubes – O type and M type classifications. O-type tubes :2 Cavity Klystrons – Structure, Velocity Modulation Process and Applegate Diagram, Bunching Process and Small Signal Theory –Expressions for o/p Power and Efficiency, Applications, Reflex Klystrons – Structure, Applegate Diagram and Principle of working,
Bunching Process, Power Output, Efficiency, Applications, Related Problems.

UNIT III
HELIX TWTS: Significance, Types and Characteristics of Slow Wave Structures; Structure of TWT and Suppression of Oscillations, Nature of the four Propagation Constants(Qualitative treatment).**M-type Tubes** Introduction, Cross-field effects, Magnetrons – Different Types, 8-Cavity Cylindrical Travelling Wave Magnetron –Hull Cut-off Condition, Modes of Resonance and PI-Mode Operation, Separation of PI-Mode, o/p characteristics.

UNIT IV MICROWAVE PASSIVE COMPONENTS : Waveguide Attenuators- Waveguide phase shifters - Scattering Matrix-Significance, Formulation and Properties-Directional coupler –Magic Tee- operation and Scattering Matrix Calculation of E plane Tee, H plane Tee and Magic Tee and Directional coupler - Ferrite Components- Faraday rotation - Gyrator -Isolator and Circulator

UNIT V

MICROWAVE SOLID STATE DEVICES: TEDs – Introduction, Gunn Diode – Principle, RWH Theory, Characteristics, Basic Modes of Operation, Oscillation Modes - Avalanche Transit Time Devices – IMPATT Diodes – Principle of Operation and characteristics, Detector Diode, PIN Diode applications, Introduction to MMIC- Monolithic Microwave Integrated circuits – Materials - Related Problems.

UNIT VI

MICROWAVE MEASUREMENTS: Description of Microwave Bench – Different Blocks and their Features, Precautions; Microwave Power Measurement – Bolometer Method. Measurement of Attenuation, Frequency, VSWR, Impedance, Measurement of Dielectric constant

TEXT BOOKS:

1. Microwave Devices and Circuits by Samuel Y. Liao, PHI, 3rd Edition,1994.
2. Foundations for Microwave Engineering by R.E. Collin, IEEE Press, John Wiley, 2nd Edition, 2002.
3. “Microwave Engineering” by David M. Pozar , Fourth Edition, Wiley, India 2012.

REFERENCES:

1. Microwave Principles by Herbert J. Reich, J.G. Skalnik, P.F. Ordung and H.L. Krauss, CBS Publishers and Distributors, New Delhi, 2004
2. Microwave Engineering by Annapurna Das and Sisir K.Das, Mc Graw Hill Education, 3rd Edition.
3. Microwave and Radar Engineering by M. Kulkarni, Umesh Publications, 3rd Edition.
4. Microwave Engineering by G S N Raju , I K International
5. Microwave and Radar Engineering by G Sasibhushana Rao Pearson

VI Sem.	CMOS Digital IC Design Professional Elective- II	Course Code: V18ECT19	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO- 1: Understand the concepts of NMOS and Pseudo NMOS designs. **(K2)**

CO- 2: Describe the combinational MOS Logic Circuits, **(K2)**

CO- 3: Explain the Principle and Performance of dynamic CMOS Circuits **(K2)**

CO-4: Apply the concepts of Combinational MOS Logic Circuits in Designing the Transmission Gates **(K2)**

CO- 5: Demonstrate the behavior of Bi-stable Elements and Flip flops**(K2)**

CO- 6: Calculate Leakage Currents in various semiconductor memories. **(K2)**

UNIT-I: MOS Design

NMOS & Pseudo NMOS Logic – Inverter, Inverter threshold voltage, Output high voltage, Output Low Voltage, Gain at gate threshold voltage, Transient response, Rise time, Fall time; CMOS logic - Inverter, logic gates.

UNIT-II: Combinational MOS Logic Circuits:-**I**

MOS logic circuits with NMOS loads, Primitive CMOS logic gates – NOR & NAND gate, Complex Logic circuits design – Realizing Boolean expressions using NMOS gates and CMOS gates,

UNIT-III: Combinational MOS Logic Circuits-II:

AOI and OIA gates, CMOS full adder, CMOS transmission gates, Designing with Transmission gates.

UNIT-IV: Sequential MOS Logic Circuits

Behavior of bitable elements, Latch, Clocked latch and flip flop circuits, CMOS D latch and edge triggered flip-flop.

UNIT-V: Dynamic Logic Circuits

Basic principle, Voltage Bootstrapping, Synchronous dynamic pass transistor circuits, Dynamic CMOS transmission gate logic, High performance Dynamic CMOS circuits – Domino logic, NORA logic.

UNIT-VI: Semiconductor Memories

Types, RAM array organization, DRAM – Types, Operation, Leakage currents in DRAM cell and refresh operation, SRAM operation Leakage currents in SRAM cells, Flash Memory- NOR flash and NAND flash.

TEXT BOOKS:

1. Digital Integrated Circuit Design by Ken Martin, Oxford University Press, 2011.

2. CMOS Digital Integrated Circuits Analysis and Design by Sung-Mo Kang, Yusuf Leblebici, TMH, 3rd Ed., 2011.

REFERENCE BOOKS:

1. Introduction to VLSI Systems: A Logic, Circuit and System Perspective by Ming-BO Lin,CRC Press, 2011

2. Digital Integrated Circuits – A Design Perspective, by Jan M. Rabaey, Anantha Chandrakasan, BorivojeNikolic, 2nd Ed., PHI.

VI Sem.	Digital signal Processing Lab	Course Code: V18ECL09	L	T	P	C
			0	0	2	1

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Design and simulate Digital IIR and FIR filter **(K3)**

CO-2: Develop and simulate Interpolator and Decimator **(K3)**

CO-3: Apply DSP algorithms for audio applications **(K3)**

CO-4: Apply DSP algorithms on a DSP processor for real time applications **(K3)**

List of Experiments:

PART - A

1. Convolution

(a)To perform linear convolution of two signals

(b)To perform circular convolution of two signals

2.Discrete Fourier Transform and Fast Fourier Transform

(a)To obtain a N-point DFT of a signal using recursive algorithm.

(b)To determine the FFT of a 1-D signal.

3. Digital IIR Filter Design

To design and simulate Infinite Impulse Response (IIR) filters and analyze their Responses

4. Digital FIR Filter Design

To design and simulate Finite Impulse Response (FIR) filters and analyze their Responses

5. Interpolator and Decimator Design

To design and simulate an Interpolator and Decimator.

6. Audio application

(a)Read a .wav file and plot time domain waveform of a speech signal (b)Read a .wav file and Plot spectrograms with different window sizes and shapes

List of Experiments using CC Studio:

PART – B

TMS320C6713 Architecture

To study the architecture of TMS320C6713 DSP processor.

9. **Fast Fourier Transform**

To determine the FFT of a 1-D signal

10. **Digital IIR Filter Design**

To design Infinite Impulse Response (IIR) filters and analyze their responses in real time.

11. **Digital FIR Filter Design**

To design Finite Impulse Response (FIR) filters and analyze their responses in real time.

10.Power Spectral Density

To obtain the Power Spectral Density of a periodic signal in real time.

11 2 to3 week Mini Project.

VI Sem.	Computer Networks Lab	Course Code: V18CSL35	L	T	P	C
			0	0	3	1.5

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Implement Error detection techniques **[K3]**

CO2: Implement Routing Algorithms **[K3]**

CO3: Implement Congestion Algorithms **[K3]**

CO4:Implement Sliding Window Algorithms. **[K3]**

CO5: Implement socket programming **[K3]**

List of Experiments:

From 1-4 simulation and 5-11 implement using C/C++/Java/Python

1. Study of basic network commands and Network configuration commands.
2. Implementation of Bit Stuffing
3. Implementation of Character Stuffing
4. Implementation of Dijkstra's algorithm
5. Implementation Distance vector algorithm
6. Construct Detecting error using CRC-CCITT
7. Implementation of stop and wait protocol
8. Implementation of Congestion control using leaky bucket algorithms
9. Implementation using Socket TCP both client and server programs.
10. Implementation using Socket UDP both client and server programs

TEXT BOOKS:

1. Computer Networks — Andrew S Tanenbaum, 4th Edition. Pearson Education/PHI
2. Data Communications and Networks – Behrouz A. Forouzan.Third Edition TMH

REFERENCES:

1. An Engineering Approach to Computer Networks by S.Keshav, 2nd Edition, Pearson Education
2. Understanding communications and Networks by 3rd Edition, W.A. Shay, Thomson

Annexure-ECE-III

VI Sem.	Internet of Things Open Elective- I	Course Code: V18ECTOE1	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO- 1: Describe M2M and IOT Technologies. **(K2)**

CO- 2: Identify the layers and protocols in IOT. **(K2)**

CO- 3: Describe various communication technologies used in IOT. **(K2)**

CO- 4: Demonstrate various hardware components required for IOT applications. **(K2)**

CO- 5: Identify the cloud technologies. **(K2)**

CO- 6: Explain the applications of IoT. **(K2)**

UNIT I – INTRODUCTION

Introduction from M2M to IoT - An Architectural Overview, building architecture, Main design principles and needed capabilities, An IoT architecture outline, M2M and IoT Technology Fundamentals - Devices and gateways

UNIT II – IOT PROTOCOLS

Functionality of Layers in IoT –Study of protocols - Wireless HART, Z-Wave, 6LoWPAN, RPL, CoAP, MQTT.

UNIT III - COMMUNICATION TECHNOLOGIES IN IOT

IoT Connectivity – IEEE 802.15.4, Wi-Fi, Bluetooth, Zigbee, LPWAN, 5G Era.

UNIT IV - SYSTEM HARDWARE

Sensors, Actuators, Radio Frequency Identification, Introduction to Embedded Devices for IoT - RASPBERRY PI.

UNIT V – Cloud Computing

Data Collection, Storage and Computing Using a Cloud Platform for IoT Applications/Services.

UNIT VI - IOT APPLICATIONS

Real time applications of IoT - Smart and Connected Cities,Public Safety, Irrigation.

TEXTBOOKS:

1. "From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence", 1st Edition, by Jan Holler, VlasiosTsiatsis, Catherine Mulligan, Stefan Avesand, StamatisKarnouskos, DavidBoyle, Academic Press, 2014.

2. IoT Fundamentals: Networking Technologies, Protocols, and Use Cases for the Internet of Things by David Hanes, Gonzalo Salgueiro, Patrick Grossetete, Robert Barton, Jerome Henry, Cisco Press 800 East 96th Street Indianapolis, Indiana 46240 USA.

REFERENCE BOOKS:

1.From Internet of Things to Smart Cities: Enabling Technologies - edited by Hongjian Sun, Chao Wang, Bashar I. Ahmad, CRC Press -2018.

2. "Architecting the Internet of Things" by Bernd Scholz-Reiter, Florian Michahelles, , ISBN 978-3-642-19156-5 e-ISBN 978-3-642-19157-2, Springer.

3.IOT (Internet of Things) Programming: A Simple and Fast Way of Learning IOT by DavidEtter.

4. "Internet of Things (A Hands-on- Approach)" by Vijay Madisetti and ArshdeepBahga, 1 stEdition, VPT, 2014.

5. Internet of Things by Raj Kamal, McGraw-Hill Education. Copyright.

VI Sem.	Principles of Communication Systems (Open Elective- I)	Course Code: V18ECTOE2	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Demonstrate the fundamentals of communication systems **(K2)**

CO-2: Compare the various analog modulation and demodulation schemes **(K2)**

CO-3: Compare the various digital modulation and demodulation schemes **(K2)**

CO4: Explain the wireless communication system concepts**(K2)**

CO-5: outline the satellite communication system principles **(K2)**

CO-6: outline the Optical communication system principles **(K2)**

Unit-I

Fundamentals of Communication systems: Block diagram of communication system; types of communications-analog and digital; Noise–types of noise, sources of noise, and calculation of noise in linear systems, and noise figure.

Unit-II

Fundamentals of Analog Communication: Need for modulation; Types of modulation, generation and detection of AM, Angle modulation: frequency & phase modulations, comparison of AM, FM & PM. Sampling theorem, NY Quist criteria, introduction to PAM, PWM and PPM.

Unit-III

Fundamentals of Digital Communication: Advantages; Working principle of PCM; comparison of PCM, DM; introduction to digital modulation techniques-ASK, FSK, PSK.

UNIT-IV:

Fundamentals of Wireless Communication : Evolution of mobile communications, Mobile Radio System around the world, Types of Wireless communication System, Comparison of Common wireless system, Concepts of 2G, 3G, 4G. Wireless Local Loop(WLL),Wireless Local Area network(WLAN), Bluetooth and Personal Area Networks. Introduction to 5G.

Unit-V

Fundamentals of Satellite communication: Brief history of Satellite systems; Principles, architecture, advantages, disadvantages, applications and frequency bands used for satellite communication.

UNIT VI:

Fundamentals of Optical Communication: Evolution of fiber optic system- Element of an Optical Fiber Transmission link and Reception link- Total internal reflection-Acceptance angle – Numerical aperture Optical Fiber Modes and Configurations - Linearly Polarized Modes -Single Mode Fibers-Graded Index fiber structure.

Textbooks:

1. Principles of Communications by H. Taub and D. Schilling, TMH, 2003.
2. Wireless Networks: Applications and Protocols by T. S. Rappaport, Pearson Education
3. Satellite Communications by Timothy Pratt, Charles Bostian and Jeremy Allnutt, WSE, Wiley Publications, 2nd Edition, 2003.
4. Optical Fiber Communication by John M. Senior (Pearson)

References:

1. Electronic Communication Systems by Kennedy and Davis, TMH, 4th edition, 2004.
2. Wireless Communication and Networks: 3G and Beyond by I. Saha Misra, TMH Education.
3. Satellite Communications: Design Principles by M. Richharia, B S publications, 2nd Edition, 2003.
4. Optical Fibre Communication by Gerd Kaiser (TMH)

VI Sem.	**Introduction to VLSI Design (Open Elective- I)**	**Course Code: V18ECTOE3**	**L**	**T**	**P**	**C**
			3	**0**	**0**	**3**

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO1: Demonstrate the fundamentals of IC technology such as various MOS fabrication technologies**.** **(K2)**

CO2: Compute electrical properties of MOS circuits such as Ids – Vds relationship, And MOS circuit parameters **(K3)**

CO3: Develop stick diagrams, layouts using design rules of various MOS Technologies**. (K3)**

CO4: Compute the sheet resistance, area capacitance of various MOS layers And inverter delays.**(K3)**

CO5: Explain the various MOS circuit parameters scaling and assess the Effects ofscaling.**(K2)**

CO6: Demonstrate VHDL synthesis, simulation, design capture tools design Verification tools.**(K2)**

UNIT –I Introduction

Introduction to IC technology – The IC era – MOS and related VLSI technology – Basic MOS transistors – Enhancement and depletion modes of transistor action – IC production process – MOS and CMOS fabrication process – BiCMOS technology – Comparison between CMOS and bipolar technologies.

UNIT – II

Basic electrical properties of MOS and BiCMOS circuits I_{ds}–V_{ds} relationships – Aspects of MOS transistor threshold voltage – MOS Trans–conductance and output conductance – MOS Transistor – Figure of merit – The pMOS transistor – The nMOS inverter – Determination of pull– up to pull–down ratio for nMOS inverter driven by another nMOS inverter for an nMOS inverter driven through one or more pass Transistors – Alternative forms of pull up – The CMOS Inverter MOS transistor Circuit model – Bi–CMOS Inverters.

UNIT – III

MOS and BiCMOS circuit design process

MOS layers – Stick diagrams – Design rules and layout – General observation on the design rules, 2m double metal, double poly – CMOS/BiCMOS rules, 1.2m Double metal, Double poly CMOS rules – Layout diagrams of NAND and NOR gates and CMOS inverter – Symbolic Diagrams – Translation to MaskForm.

UNIT – IV

Basic circuit concepts

Sheet resistance – Sheet resistance concept applied to MOS transistor and inverters – Area capacitance of layers – Standard unit of capacitance – Some area capacitance calculations – The delay unit – Inverter delays – Driving large capacitive loads – Propagations Delays – Wiring Capacitance – Fan–in and Fan–out characteristics – Choice of layers – Transistor switches – Realization of gates using nMOS, pMOS and CMOS technologies.

UNIT – V

Scaling of MOS circuit

Scaling models and scaling factors – Scaling factors for device parameters – Limitations of scaling – Limits due to sub threshold currents – Limits on logic level and supply voltage due to noise – Limits due to current density.

UNIT – VI :VHDL MODELLING:

Simulation – Logic Synthesis – Inside a logic synthesizer – Constraints – Technology libraries – VHDL and logic synthesis – Functional gate – Level verification – Place and route – Post layout timing simulation – Static timing

– Major net list formats for design representation – VHDL synthesis – Programming approach.

Text Books:

1. Essentials of VLSI Circuits and Systems by Kamran Eshraghian, Douglas and A.Pucknell and SholehEshraghian, Prentice–Hall of India Private Limited, 2005Edition.
2. VLSI Design by K. LalKishor and V.S.V.Prabhakar, I.K. International Publishing House Private Limited, 2009 First Edition.
3. VLSI Design by A.Shanthi and A.Kavitha, New Age International Private Limited, 2006 FirstEdition.

References Books:

1. VLSI Design By Debaprasad Das, Oxford University Press, 2010.
2. VLSI Design By A.Albert Raj & T. Latha, PHI Learning Private Limited, 2010.

Annexure-ECE-IV

VI Sem.	Fundamentals of Microprocessors & Microcontrollers (Offered by ECE to EEE)	Course Code: V18ECT 23	L	T	P	C
			3	0	0	3

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Describe the basic architecture of 8086 microprocessor along with signal Descriptions modes of operation ,stack structure and interrupt responses**(K2).**

CO-2: Construct assembly language programs using the concepts of addressing Modes and instructions with a programming tool- **(K3).**

CO-3: Demonstrate interfacing of 8086 with memory and programmable peripheral Devices- **(K3).**

CO-4: Examine the Architecture and operation of 8051 Microcontrollers, timers and ports **(K2)**

CO-5: Explain about PIC Microcontrollers with their architecture - **(K2).**

CO-6: Describe the Data types, I/O programming, logical operations, data conversion **(K2)**

UNIT–I: Introduction to Microprocessor Architecture

Introduction and evolution of Microprocessors– Architecture of 8086–Register Organization of 8086–Memory organization of 8086– General bus operation of 8086–Introduction to 80286–80386 and 80486 and Pentium.

UNIT–II: Minimum and Maximum Mode Operations

Instruction set, Addressing modes– Minimum and Maximum mode operations of 8086–8086 Control signal interfacing–Read and write cycle timing diagrams.

UNIT–III:I/O Interface
8255 PPI– Architecture of 8255–Modes of operation– Interfacing I/O devices to 8086 using 8255–Interfacing A to D converters– Interfacing D to A converters– Stepper motor Interfacing – Static memory interfacing with 8086–DMA controller (8257)–Architecture–Interfacing 8257 DMA controller– Programmable Interrupt Controller (8259)–Command Words and operating modes of 8259.

UNIT–IV: Introduction to 8051 Micro Controller
Overview of 8051 Micro Controller– Architecture– Register set–I/O ports and Memory Organization– Interrupts–Timers and Counters–Serial Communication.

UNIT– V:PIC Architecture
Block diagram of basic PIC 18 micro controller, registers I/O ports.

UNIT– VI: Programming in C for PIC
Data types, I/O programming, logical operations, data conversion

Text Books:
1. "The 8051 Micro Controller Architecture, Programming and Applications", by Kenneth J Ayala, Thomson Publishers, 2nd Edition.
2. PIC Microcontroller and Embedded Systems using Assembly and C for PIC 18 by Muhammad Ali Mazidi, RolindD.Mckinay , Danny causey -Pearson Publisher 21st Impression.

Reference Books:
1. "A Text book of Microprocessors and Micro Controllers" by R.S. Kaler, I.K. International Publishing House Pvt. Ltd.
2. "Microcontrollers – Theory and Applications" by Ajay V. Deshmukh, Tata McGraw–Hill Companies –2005.
3. "Microcontrollers – Principles and Applications" by Ajit Pal, PHI Learning Pvt Ltd, 2011.
4. Microprocessors and Interfacing by Douglas V Hall, Mc–Graw Hill, 2nd Edition.
5. "Advanced Micro Processors and Interfacing" by Ray and Burchandi, , Tata McGraw–Hill.

VI Sem.	**Microprocessors & Microcontrollers Lab (Offered by ECE To EEE)**	**Course Code: V18ECL 10**	**L**	**T**	**P**	**C**
			0	**0**	**2**	**1**

Syllabus Details

Course Outcomes: After Successful completion of the Course, the student will be able to:

CO-1: Develop algorithm and logic for different operations using 8086 Instructions. **(K3)**
CO-2: Construct simple programs for 8086 using Assembler directives (MASM)/Machine control Instructions. . **(K3)**
CO-3: Develop ALP to perform arithmetic and logical operations using various instructions. . **(K3)**
CO-4: Develop ALP to perform conversions, finding squares of a numbers by using Loop, Jump instructions. . **(K3)**
CO-5: Develop the ALP to Interface the various peripherals to 8086 microprocessors. . **(K3)**
CO-6: Develop ALP to perform arithmetic and logical operations using 8051 Microcontroller Instruction set .**(K3)**

Any 10 of the following experiments are to be conducted:

I. Microprocessor 8086&Microcontroller 8051
Introduction to MASM/TASM.

1. Arithmetic operation – Multi byte addition and subtraction, multiplication and Division – Signed and unsigned arithmetic operation, ASCII – Arithmetic operation.
2. Logic operations – Shift and rotate – Converting packed BCD to unpacked BCD, BCD to ASCII conversion.
3. By using string operation and Instruction prefix: Move block, Reverse string sorting, Inserting, Deleting, Length of the string, String comparison.
4. Interfacing 8255–PPI
5. Interfacing 8259 – Interrupt Controller.
6. Interfacing 8279 – Keyboard Display.
7. Stepper motor control using 8253/8255.
8. Reading and Writing on a parallel port using 8051
9. Timer in different modes using 8051
10. Serial communication implementation using 8051
11. Understanding three memory areas of 00 – FF Using 8051 external interrupts.

12. Interface PIC 18 with an opt isolator
13. Interface PIC 18 with a DC motor

SRI VASAVI ENGINEERING COLLEGE (AUTONOMOUS)

(Sponsored by Sri Vasavi Educational Society)
Approved by AICTE, New Delhi and Permanently Affiliated to JNTUK, Kakinada
Pedatadepalli, **TADEPALLIGUDEM – 534 101,** W.G. Dist, (A.P.)

Department of Civil Engineering

Dt: 30.06.2020

The Civil Engineering Department 3rd meeting of Board of Studies (BOS) was conducted through online mode on 29.6.2020 at 11.30 A.M. Following members have attended the meeting.

SL.No.	Name	Position
1	Dr.G.RadhaKrishnan	Chairman
2	Dr. GVR Prasada Raju	Member
3	Dr. C. B. Kameswar Rao	Member
4	Dr. M. Kumar	Member
5	Er. DSR Sekhar	Member
6	Mr.T.Yeswanth Sai	Faculty of CE
7	Mr.VLD Prasad Reddy	Faculty of CE
8	Mr.T.Naga Seshu Babu	Faculty of CE
9	Mr.A. Sudheer	Faculty of CE

Minutes of the BOS Meeting:

- **Item No.1 : Chairman, BOS has welcomed all the members and given the Opening Remarks.**

- **Item No.2: Review & approval of the V& VI Sem Course Structure of B. Tech CE of V18 Reg.**
  The Chairman and the members reviewed the course structure of B. Tech CE and suggested modifications in the structure. Approved course structure given in **Annexure-CE-I**
- **Item No.2: Review & approval of the syllabus V& VI Sem Courses of B. Tech CE of V18 Reg.**

The Chairman and the members reviewed the syllabus of all courses of V and VI semester B. Tech CE and suggested modifications in the few courses. Approved syllabus given in **Annexure-CE-II**

- **Item No.3: Review & Approval the List of Open Elective Courses offered by Civil Engineering Dept to all other departments.**

  List of courses approved by BOS are mentioned below has to be offered under Open Elective-I for B.Tech VI semester, under V18 regulation for all other branches.

  a) Repair and Rehabilitation of Structures (V18CEOE1)
  b) Remote Sensing & Geographical Information Systems (V18CEOE2)
  Approved syllabus given in **Annexure-CE-III**

- **Item No. 04: Approval for offering Minor degree in DATA SCIENCE offered by Department of Computer Science and Engineering for B. Tech Civil Engineering students under V18 Regulation**

  BOS Members approved our students to opt for the Minor degree in data science offered by the Department of Computer Science and Engineering with the rules and regulations which will be approved by Academic Council.

Finally, the chairman thanked all the BOS members and faculty. The meeting was ended at 12.30 P.M

Dr. G. Radha Krishnan

CHAIRMAN, BOS

ANNEXURE-CE-II

SYLLABI OF V & VI SEMESTER OF B.TECH COURSES

V SEMESTER - SYLLABUS

Year/Sem	**V Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CET15
Name of the Course	**STRUCTURAL ANALYSIS – I**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Illustrate Shear Force, Bending Moment and Deflection of Propped Cantilevers for different fixity conditions (K3)
- Calculate Shear Force, Bending Moment and Deflections of fixed beams for different fixity conditions (K3)
- Calculate Shear Force, Bending Moment and Deflections of Continuous beams for different fixity conditions (K3)
- Apply Slope Deflection Equation to Continuous beams (K3)
- Understand the concepts of Energy Theorems (K2)
- Assess Maximum Shear Force, Bending Moment and Deflections at a given section when loads of varying spans are passing over truss (K3)

SYLLABUS

UNIT – I

Propped Cantilevers: Analysis of propped cantilevers-shear force and bending moment diagrams-Deflection of propped cantilevers.

UNIT – II

Fixed Beams: Introduction to statically indeterminate beams with U. D. load, central point load, eccentric point load, number of point loads, uniformly varying load, couple and combination of loads - shear force and Bending moment diagrams-Deflection of fixed beams including effect of sinking of support, effect of rotation of a support.

UNIT – III

Continuous Beams: Introduction-Clapeyron's theorem of three moments- Analysis of continuous beams with constant moment of inertia with one or both ends fixed continuous beams with overhang, continuous beams with different moment of inertia for different spans- Effects of sinking of supports-shear force and bending moment diagrams.

UNIT-IV

Slope-Deflection Method: Introduction, derivation of slope deflection equation, application to continuous beams with and without settlement of supports.

UNIT – V

Energy Theorems: Introduction-Strain energy in linear elastic system, expression of strain energy due to axial load, bending moment and shear forces - Castigliano's first theorem-Deflections of simple beams and pin jointed trusses.

UNIT – VI

Moving Loads And Influence Lines: Introduction, influence line diagrams, influence line diagrams for simply supported beams, cantilever beams, overhanging beams, double overhanging beams, balanced cantilever beams, girder supporting floor beams, use of influence line diagrams, maximum SF and BM values for moving loads, Train of concentrated loads

Text Books:

1. Basic Structural Analysis, C. S. Reddy Tata Mc.Graw-Hill, New Delhi.
2. Analysis of Structures by T.S. Thandavamoorthy, Oxford University Press, New Delhi.
3. Analysis of Structures- Vol. I and II, V. N. Vazirani and M. M. Ratwani, Khanna Publishers, New Delhi.
4. Structural Analysis - Vol. I and II,S.S.Bhavikatti,Vikas Publishing House,New Delhi.

References:

1. Theory of Structures, B. C Punmia, A. K Jain & Arun K. Jain, Lakshmi Publications.
2. Theory of Structures, R.S. Khurmi, S. Chand Publishers.
3. Structural analysis by R.C. Hibbeler, Pearson, New Delhi.
4. Structural Analysis-I, Hemanth Patel, Yogesh Patel, Synergy Knowledgeware, Mumbai
5. Structural Analysis I Analysis of Statically Determinate Structures, P. N. Chandramouli. Yesdee Publishing Pvt Limited, Chennai

Year/Sem	V Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CET16
Name of the Course	GEOTECHNICAL ENGINEERING –I					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Show the inter-relationships of various parameters related to soil mechanics (K1)
- Describe various index properties of soils and classify them (K2)
- Assess the permeability of different soils having different properties (K3)
- Employ different methods to know the stress distribution in soils (K3)
- Interpret different parameters related to consolidation of soil (K3)
- Examine the stress strain behavior of different soils under various drainage conditions (K3)

SYLLABUS

UNIT I

Introduction: Soil formation – soil structure and clay mineralogy – Adsorbed water – Mass- volume relationship –Relative density, Mechanism of compaction – factors affecting – effects of compaction on soil properties - compaction control.

UNIT II

Index Properties of Soils: Grain size analysis – Sieve and Hydrometer methods – consistency limits and indices – Various Types of soil Classifications – Unified soil classification and I.S. Soil classification.

UNIT III

Permeability: Soil water – capillary rise – One dimensioned flow of water through soils – Darcy's law- permeability – Factors affecting –laboratory determination of coefficient of permeability –Permeability of layered systems. Total, neutral and effective stresses – quick sand condition – 2-D flow and Laplace's equation - Seepage through soils – Flow nets: Characteristics and Uses.

UNIT IV

Stress Distribution in Soils: Stresses induced by applied loads - Boussinesq's and Westergaard's theories for point loads and areas of different shapes– Newmark'sinfluence chart – 2:1 stress distribution method.

UNIT V

Consolidation: Compressibility of soils – e-p and e-log p curves – Stress history – Concept of consolidation - Spring Analogy - Terzaghi's theory of one-dimensional Consolidation – Time rate of consolidation and degree of consolidation – Determination of coefficient of consolidation (c_v) - Over consolidated and normally consolidated clays.

UNIT VI

Shear Strength of Soils: Basic mechanism of shear strength - Mohr – Coulomb Failure theories – Stress-Strain behavior of Sands - Critical Void Ratio – Stress-Strain behavior of clays – Shear Strength determination- various drainage conditions.

TEXTBOOKS:

1. "Basic and Applied Soil Mechanics", Gopal Ranjan and A. S. R. Rao, New Age International Publishers.
2. "Soil Mechanics and Foundation Engineering", V. N. S. Murthy, CBS publishers.
3. "Soil Mechanics and Foundations", B.C. Punmia, Laxmi Publications.

REFERENCE BOOKS:

1. "Fundamentals of Soil Mechanics", D. W. Taylor, Wiley.
2. "An introduction to Geotechnical Engineering", Holtz and Kovacs; Prentice Hall.
3. "Fundamentals of Geotechnical Engineering", B M Das, Cengage Learning, New Delhi.

Year/Sem	V Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CET17
Name of the Course	**HYDROLOGY & WATER RESOURCES ENGINEERING**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Identify the physicalprocessesinhydrologyandcomponents ofthehydrologiccycle.(K2)
- Estimate the different components of the hydrologic cycle.(K2)
- Compute the runoff of a catchment using Hydrographs. (K3)
- Compute the flood frequency, design flood, flood routing. (K3)
- Discuss the concepts of groundwater movement and well hydraulics.(K2)
- Describe the advanced concepts of Runoff modeling .(K2)

SYLLABUS

UNIT I

Introduction: Engineering hydrology and its applications, Hydrologic cycle, hydrological data-sources of data. Precipitation: Types and forms, measurement, rain gauge network, presentation of rainfall data, average rainfall, continuity and consistency of rainfall data, frequency of rainfall, Intensity-Duration-Frequency (IDF) curves, Depth-Area-Duration (DAD) curves, Probable Maximum Precipitation (PMP), design storm.

UNIT II

Abstractions from Precipitation: Initial abstractions. Evaporation: factors affecting, measurement, reduction Evapotranspiration: factors affecting, measurement, control Infiltration: factors affecting, Infiltration capacity curve, measurement, infiltration indices.

UNIT III

Runoff: Catchment characteristics, Factors affecting runoff, components, computation-empirical formulae, tables and curves, stream gauging, rating curve, flow mass curve and flow duration curve. Hydrograph analysis: Components of hydrograph, separation of base flow, effective rainfall hyetograph and direct runoff hydrograph, unit hydrograph, assumptions, derivation of unit hydrograph, unit hydrographs of different durations, principle of superposition and S-hydrograph methods, limitations and applications of unit hydrograph, synthetic unit hydrograph.

UNIT IV

Floods: Causes and effects, frequency analysis- Gumbel's and Log-Pearson type III distribution methods, Standard Project Flood (SPF) and Probable Maximum Flood (MPF), flood control methods and management. Flood Routing: Hydrologic routing, channel and reservoir routing- Muskingum and Puls methods of routing.

UNIT V

Groundwater: Occurrence, types of aquifers, aquifer parameters, porosity, specific yield, permeability, transmissivity and storage coefficient, types of wells, Darcy's law, Dupuit's equation- steady radial flow to wells in confined and unconfined aquifers, yield of a open well-recuperation test.

UNIT VI

Advanced Topics in Hydrology: Rainfall-runoff Modelling, instantaneous unit hydrograph (IUH) – conceptual models – Clark and Nash models, general hydrological models- Chow – Kulandaiswamy model.

TEXTBOOKS:

1. "Engineering Hydrology", Subramanya K., Tata Mc Graw-Hill Education Pvt. Ltd, New Delhi, 2013.
2. "Engineering Hydrology", Jayarami Reddy P., Laxmi Publications Pvt. Ltd., New Delhi, (2013)
3. "Applied hydrology", Chow V.T., D.R Maidment and L.W. Mays, Tata McGraw Hill Education Pvt. Ltd., New Delhi, 2011.

REFERENCE BOOKS:

1. "Water Resources Engineering", Mays L.W, Wiley India Pvt. Ltd, 2013.
2. "Hydrology", Raghunath. H.M., New Age International Publishers, 2010.
3. "Engineering Hydrology - Principles and Practice" Ponce V.M., Prentice Hall International, 1994.
4. "Hydrology and Water Resources Engineering", Patra K.C., Narosa Publications, 2011.
5. "Engineering Hydrology", Ojha C.S., Berndtsson P.R and Bhunya. P., Oxford University Press, 2010.

ear/Sem	V Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CET18
Name of the Course	**DESIGN OF REINFORCED CONCRETE STRUCTURES**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Understand the concepts and methods for elements design (K2)
- Solve the elements of structure like flexural members (K3)
- Illustrate the design concepts structures subjected to shear, bond and torsion (K3)
- Apply design principles in the design of slabs (K3)
- Choose suitable design principle in the design of columns (K3)
- Apply suitable design procedure in the design of foundations (K3)

SYLLABUS

UNIT I

Introduction of Reinforced concrete: Structural elements- Loads on structures- Strength and serviceability - Methods of design - Working stress method- design constants - neutral axis - moment of resistance for different sections- Design of singly and doubly reinforced beams- Concepts of limit state design - Partial load and safety factors -stress-strain curves for cold worked deformed bars and mild steel bars. Assumptions in limit state design – stress - block parameters – limiting moment of Resistance. Codes of practice.

UNIT II

Design for Flexure: Limit state analysis and design of singly reinforced sections- effective depth- Moment of Resistance- Doubly reinforced and flanged (T and L) beam sections- Minimum depth for a given capacity- Limiting Percentage of Steel- Minimum Tension Reinforcement-Maximum Flexural Steel- Design of Flanged Sections (T&L)- Effective width of flange –Behavior- Analysis and Design.

UNIT III

Design for Shear, Torsion and Bond: Limit state analysis and design of section for shear and torsion – concept of bond, anchorage and development length, I.S. code provisions. Design examples in simply supported and continuous beams, detailing. Limit state design for serviceability: Deflection, cracking and code provision.

UNIT IV

Slabs: Classification of slabs, design of one - way slabs, one way continuous slab using IS Coefficients (Conventional) – Design of two - way slabs-simply supported and various edge conditions using IS Coefficients, Design of Stair Case.

UNIT V

Design of Compression members: Effective length of a column, Design of short and long columns – under axial loads, uniaxial bending and biaxial bending – IS Code provisions.

UNIT VI

Footings: Different types of footings – Design of isolated footings – pedestal, square, rectangular and circular footings subjected to axial loads, uni-axial and bi-axial bending moments.

NOTE:

All units i.e. from unit II to unit VI are to be taught in Limit State Design.

Following sheets should be prepared by the students.

Sheets-1	Reinforcement detailing of T-beams, L-beams and continuous beams.
Sheets-2	Reinforcement detailing of beam with all details.
Sheets-3	Detailing of one-way, two-way and continuous slabs.
Sheets-4	Reinforcement detailing of columns.
Sheets-5	Reinforcement detailing of isolated footings.

EXAMINATION PATTERN:

Internal Examination Pattern:

The total internal marks are distributed in three components as follows:

Descriptive (subjective type) examination	: 15 marks
Detailing sheets(For above)	: 10 marks
Assignment	: 05 marks

TEXTBOOKS:

1. "Limit State Design", A. K. Jain
2. "Design of Reinforced concrete Structures", N. Subrahmanyian.

3. "Reinforced concrete", Vol.1., H. J. Shah, Charotar publishing house Pvt. Ltd.

REFERENCE BOOKS:

1. "R C C Design", B.C Punmia, A. K. Jain and A. K Jain. Lakshmi Publications
2. "Reinforced Concrete Structures", N. Krishna Raju and R. N. Pranesh, New Age Publications.
3. "Reinforced Concrete Structures", S. Unnikrishna Pillai and Devdas Menon, Tata Mc.Graw Hill, New Delhi.
4. IS 456-2000, Code of practice for Reinforced Concrete Structures.
5. IS 875, Code of Practice for Design Loads.
6. SP-16, Design Aids for Reinforced Concrete.

ear/Sem	**V Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18 CET 19
Name of the Course	TRANSPORTATION ENGINEERING – I					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Identify engineering surveys and can decide the alignment(K2)
- Analyze and design highway geometric elements.(K3)
- Analyze and design of traffic infrastructure(K3)
- Analyze and design of flexible, rigid pavements (K3)
- Examine pavement construction activities and also conduct quality control at site(K3)
- Evaluate pavement condition and can identify and suggest remedial measures(K3)

SYLLABUS

UNIT I

Highway Planning and Alignment: Highway development in India; Classification of Roads; Necessity for Highway Planning; Different Road Development Plans

– First, second, third road development plans, road development vision 2021; Highway Alignment-Factors affecting Alignment- Engineering Surveys.

UNIT II

Highway Geometric Design: Importance of Geometric Design- Design controls

and Criteria- Highway Cross Section Elements- Sight Distance Elements- Design of Horizontal

Alignment- Design of Transition Curves-Design of Vertical alignment.

UNIT III

Traffic Engineering: Basic Parameters of Traffic-Volume, Speed and Density Traffic Volume Studies; Speed studies –spot speed and speed & delay studies; Parking

Studies; Road Accidents-Causes and Preventive measures - Condition Diagram and Collision

Diagrams; PCU Factors, Capacity of Highways – Factors Affecting; LOS Concepts; Road Traffic Signs; Road markings; Types of Intersections; At-Grade Intersections –Design of Traffic Signals – Webster Method .

UNIT IV

Design of Pavements: Types of pavements; Functions and requirements of different components of pavements; Design Factors

Flexible Pavements: Design factors – Flexible Pavement Design Methods Mechanistic method.

Rigid Pavements: Design Considerations – wheel load stresses – Temperature stresses –

Frictional stresses – Combination of stresses – Design of slabs – IRC method – Rigid pavements

UNIT V

Highway Construction

Types of Highway Construction, Earthwork, Construction of Embankments, subgrade stabilization, Construction of Bituminous Pavements and Construction of Cement Concrete Pavements

UNIT VI

Highway Maintenance: Pavement Failures, Pavement condition survey, Maintenance of Highways, Pavement evaluation, strengthening of existing pavements

TEXTBOOKS:

1. "Highway Engineering", Khanna S. K., Justo C. E. G and Veeraragavan A, Nem Chand Bros.,Roorkee.
2. "Traffic Engineering and Transportation Planning", Kadiyali L. R, Khanna Publishers, New Delhi.

REFERENCE BOOKS:

1. "Principles of Transportation Engineering", Partha Chakroborthy and Animesh Das, PHI Learning Private Limited, Delhi.
2. "Principles of Highway Engineering, Kadiyali L. R, Khanna Publishers, New Delhi
3. "Transportation Engineering - An Introduction", Jotin Khisty C, Prentice Hall, Englewood Cliffs, New Jersey.
4. "Transportation Engineering and Planning", Papacostas C.S. and Prevedouros, P.D., Prentice Hall of India Pvt.Ltd; New Delhi.
5. IRC37–2018: Guidelines for the Design of Flexible Pavements, Indian Road Congress Publications, New Delhi.
6. IRC58–2015: Guidelines for the Design of Plain Jointed Rigid Pavements for Highways, Indian Road Congress Publications, New Delhi.
7. MORTH - Specifications for Road and Bridge works, Indian Road Congress Publication, New Delhi, Latest Edition
8. IRC 67 – 2012: Code of Practice for Road Signs, Indian Road Congress Publication, New Delhi
9. IRC 35 – 2015: Code of Practice for Road Markings, Indian Road Congress Publication, New Delhi

Year/Sem	**V Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation / Year	V18 / 2020-2021	2	0	0	2	V18CET33
Name of the Course	**REMOTE SENSING AND GEOGRAPHICAL INFORMATION SYSTEM**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Define the basic principles of Remote Sensing and GIS, including ground, air and satellite based sensor platforms (K1)
- Interpret the aerial photographs and satellite imageries (K2)
- Relate the process of input spatial data entry and its types (K3)
- Examine the Spatial Data for a variety of applications (K3)
- Employ RS and GIS for diverse applications (K3)
- Apply RS and GIS concepts in water resources engineering (K3)

SYLLABUS

UNIT I

Introduction to Remote Sensing: Basic concepts of remote sensing, electromagnetic radiation, electromagnetic spectrum, interaction with atmosphere, energy interaction with the earth surfaces, Characteristics of remote sensing systems.

Sensors and platforms: Introduction, types of sensors, airborne remote sensing, space borne remote sensing, image data characteristics, digital image data formats-band interleaved by pixel, band interleaved by line, band sequential, IRS, LANDSAT, SPOT, MODIS, ASTER,RISAT and CARTOSAT.

UNIT II

Image analysis: Introduction, elements of visual interpretations, digital image processing-image preprocessing, image enhancement, image classification, supervised classification, unsupervised classification.

UNIT III

Geographic Information System: Introduction, key components, application areas of GIS, map projections.

Data entry and preparation: spatial data input, raster data models, vector data models.

UNIT IV

Spatial data analysis: Introduction, overlay function-vector overlay operations, raster overlay operations, arithmetic operators, comparison and logical operators, conditional expressions, overlay using a decision table, network analysis-optimal path finding, network allocation, network tracing and buffer analysis.

UNIT V

RS and GIS Applications: Land cover and land use, agriculture, forestry, geology, geomorphology, urban applications.

UNIT VI

Applications of Hydrology, Water Resources and Disaster Management: Food zoning and mapping, groundwater prospects and potential recharge zones, watershed management and disaster management with case studies.

TEXTBOOKS:

1. “Remote sensing and GIS”, Bhatta, B., Oxford University Press, 2008.
2. “Remote Sensing and Geographical Information Systems”, Anji Reddy, M., B S Publications, 2008.
3. “Basics of Remote Sensing and GIS” Kumar. S., Laxmi Publications,

REFERENCE BOOKS:

1. “Fundamentals of Remote Sensing”, George Joseph, Universities Press, 2013.
2. “Concepts and Techniques of Geographical Information System”, Chor Pang Lo and Yeung, A.K.W., Prentice Hall, India, 2006.
3. “Remote Sensing and its Applications”, Narayan L.R.A, Universities Press, 2012.
4. “Introduction to Geographic Information Systems”, Kand Tsung Chang, McGraw Hill Higher Education, 2009.
5. “Basics of Remote sensing & GIS”, Kumar, S., Laxmi Publications, New Delhi, 2005.
6. “Principals of Geographical Information Systems”, Burrough, P.A and McDonnell, R.A. Oxford University Press, 1998.
7. “Remote Sensing”, Schowenger, R. A., Elsevier publishers, 2006.

8. "Remote Sensing and Image Interpretation", Lillesand, T.M, Kiefer, R.W. and Chipman, J.W., Wiley India Pvt. Ltd., New Delhi, 2013.
9. "Fundamentals of Geographic Information Systems", Demers, M.N, Wiley India Pvt. Ltd, 2013.

Year/Sem	V Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	0	0	3	1.5	V18CEL07
Name of the Course	TRANSPORTATION ENGINEERING LAB					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the student will be able to

- Assess the suitability of different materials for the road construction(K3)
- Examine the given bitumen samples and judge their suitability for road construction(K3)
- Find the Optimum Bitumen content for the Bituminous mix (K3)
- Develop the gradation of Bituminous mix for stability and flow properties (K3)

LIST OF EXPERIMENTS

I. ROAD AGGREGATES:

1. Aggregate Crushing value
2. Aggregate Impact Test.
3. Specific Gravity and Water Absorption.
4. Abrasion Test.
5. Shape tests

II. BITUMINOUS MATERIALS:

6. Penetration Test.
7. Ductility Test.
8. Softening Point Test.
9. Flash and fire point tests.
10. Viscosity Test.

III. BITUMINOUS MIX:

11. Marshall Stability test.

LIST OF EQUIPMENT

1. Apparatus for aggregate crushing test.
2. Aggregate Impact testing machine
3. Pycnometers.
4. Los angles Abrasion test machine
5. Length and elongation gauges
6. Bitumen penetration test setup.
7. Bitumen Ductility test setup.
8. Ring and ball apparatus
9. Flash and Fire Apparatus
10. Viscometer.

11. Marshal Stability apparatus.

REFERENCES:

1. "Highway Material Testing Manual", S.K. Khanna, C.E.G Justo and A.Veeraraghavan, Neam Chan Brothers New Chand Publications, New Delhi.

Year/Sem	**V Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation / Year	V18 / 2020-2021	0	0	3	1.5	V18CEL08
Name of the Course	**GEOTECHNICAL ENGINEERING LAB**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Employ index properties required for classification of soils (K3)
- Find the permeability of different soils using different tests (K3)
- Predict the compaction, consolidation and swelling characteristics of the soils (K3)
- Compute the strength properties of soils (K3)

LIST OF EXPERIMENTS

1. Specific gravity, G
2. Atterberg's Limits.
3. Field density-Core cutter and Sand replacement methods
4. Grain size analysis by sieving
5. Hydrometer Analysis Test
6. Permeability of soil - Constant and Variable head tests
7. Compaction test
8. Consolidation test (to be demonstrated)
9. Direct Shear test
10. Triaxial Compression test (UU Test)
11. Unconfined Compression test
12. Vane Shear test
13. Differential free swell (DFS)
14. CBR Test

LIST OF EQUIPMENTS

. Casagrande's liquid limit apparatus.

2. Apparatus for plastic and shrinkage limits

3. Field density apparatus for

   a) Core cutter method

   b) Sand replacement method

4. Set of sieves: 4.75 mm, 2 mm, 1 mm, 0.6 mm, 0.42 mm, 0.3 mm, 0.15 mm, and 0.075 mm.

5. Hydrometer
6. Permeability apparatus for

   a) Constant head test

   b) Variable head test
7. Universal auto compactor for I.S light and heavy compaction tests.
8. Shaking table, funnel for sand raining technique.
9. Apparatus for CBR test
10. 10 tons loading frame with proving rings of 0.5 tons and 5 tons capacity
11. One dimensional consolation test apparatus with all accessories.
12. Triaxial cell with provision for accommodating 38 mm dia specimens.
13. Box shear test apparatus
14. Laboratory vane shear apparatus.
15. Hot air ovens (range of temperature 500 - 1500C

VI SEMESTER – SYLLABUS

Year/Sem	VI Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CET20
Name of the Course	STRUCTURAL ANALYSIS – II					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Illustrate the concepts of Arches (K3)
- Solve the structure for Lateral loads using approximate methods (K3)
- Illustrate the concepts Cables and Suspension bridges (K3)
- Employ Moment distribution method for analyzing beams/frames (K3)
- Employ Kanni's method for analyzing beams/frames (K3)
- Compute the moments/forces using matrix methods (K3)

SYLLABUS

UNIT I

Three Hinged Arches: Elastic theory of arches – Eddy's theorem – Determination of horizontal thrust, bending moment, normal thrust and radial shear – effect of temperature. Hinges with supports at different levels.

Two Hinged Arches: Determination of horizontal thrust, bending moment, normal thrust and radial shear – Rib shortening and temperature stresses, Tied arches – Fixed arches – (No analytical question).

UNIT-II

Lateral Load Analysis Using Approximate Methods: application to building frames.

(i) Portal Method (ii) Cantilever Method.

UNIT – III

Cable Structures and Suspension Bridges: Introduction, characteristics of cable, analysis of cables subjected to concentrated and uniformly distributed loads, anchor cable, temperature stresses, analysis of simple suspension bridge, three hinged and two hinged stiffening girder suspension bridges.

UNIT – IV

Moment Distribution Method: Stiffness and carry over factors – Distribution factors – Analysis of continuous beams with and without sinking of supports – Portal frames – including Sway-Substitute frame analysis by two cycle.

UNIT – V

Kani's Method: Analysis of continuous beams – including settlement of supports and single bay portal frames with and without side sway.

UNIT – VI

Introduction to Matrix Methods: Flexibility methods: Introduction, application to continuous beams (maximum of two unknowns) including support settlements. Stiffness method: Introduction, application to continuous beams (maximum of two unknowns) including support settlements.

5. Structural Analysis I, P.N. Chandramouli. Yesdee Publishing Pvt Limited
6. Structural Analysis, Aslam Kassimali, Cengage Learning
7. Matrix Methods of Structural Analysis, P.N. Godbole, R. S.. Sonaparote, PHI Learning Pvt Limited

Year/Sem	VI Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CET21
Name of the Course	GEOTECHNICAL ENGINEERING-II					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Use the field test data and arrive at the bearing capacity(K3)
- Examine the stability of slope and find earth pressures in layered soils(K3)
- Determine the bearing capacity of shallow foundations using analytical methods(K3)
- Compute the magnitude of foundation settlement and decide on the size of the foundation accordingly(K3)
- Apply the principles of bearing capacity of piles and design them accordingly(K3)
- Demonstration of the well foundations and their construction (K3)

SYLLABUS

UNIT I

Soil Exploration: Need, Methods of soil exploration – Boring and Sampling methods, Field tests, Penetration Tests, Pressure meter, planning of programme and preparation of soil investigation report.

UNIT II

Slope Stability: Infinite and finite earth slopes in sand and clay, types of failures, factor of safety of infinite slopes, stability analysis by Swedish arc method, standard method of slices ,Taylor's Stability Number, Stability of slopes of dams and embankments – different conditions.

Earth-Pressure theories: Rankine's & Coulomb's theory of earth pressure, Culmann's graphical method, earth pressures in layered soils.

UNIT III

Shallow Foundations – Bearing Capacity Criteria: Types of foundations and factors to be considered in their location , Bearing capacity – criteria for determination of bearing capacity – factors influencing bearing capacity, analytical methods to determine bearing capacity – Terzaghi's theory ,IS Methods.

UNIT IV

Shallow Foundations – Settlement Criteria: Safe bearing pressure based on N- value, allowable bearing pressure; safe bearing capacity and settlement from plate load test – Types of foundation settlements and their determination - allowable settlements of structures.

UNIT V

Pile Foundation: Types of piles, Load carrying capacity of piles based on static pile formulae , Dynamic pile formulae, Pile load tests , Load carrying capacity of pile groups in sands and clays.

UNIT VI

Well Foundations: Types, Different shapes of well, Components of well – functions, forces acting on well foundations, Design Criteria – Determination of staining thickness and plug - construction and Sinking of wells, Tilt and shift.

TEXTBOOKS:

1. Principles of Foundation Engineering, Das, B.M., (2011), 6th edition Cengage learning.

3. Soil Mechanics and Foundations, B.C.Punmia, Laxmi Publictions.

REFERENCE BOOKS:

1. Foundation Analysis and Design, Bowles, J.E., McGraw-Hill Publishing Company, Newyork.
2. Theory and Practice of Foundation Design, N.N.SOM & S.C.DAS PHI Learning Private limited.

Year/Sem	VI Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CET22
Name of the Course	DESIGN OF STEEL STRUCTURES					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Estimate the strength of the riveted and welded joints (K3)
- Select suitable flexural member by using concept of design (K3)
- Understand the design concepts of tension and compression members in roof trusses (K3)
- Apply design principles in the design of columns and built up columns (K3)
- Choose suitable design principle in the design of column bases (K3)
- Apply suitable design procedure in the design of plate and gantry girder (K3)

SYLLABUS

UNIT I

Connections: Introduction - Properties of structural steel - IS Rolled sections - I.S Specifications - Lap and Butt connections (Revited and Bolted connections) - Eccentric connections.

Welded connections: Introduction - Advantages and disadvantages of welding- Strength of welds - Butt and fillet welds - Permissible stresses - IS Code requirements - Design of Butt and fillet weld subjected to moment acting in the plane and at right angles to the plane of the joints.

UNIT II

Beams: Allowable stresses - Design requirements as per IS Code-Design of simple and compound beams - Curtailment of flange plates - Beam to beam connection - check for deflection, shear, buckling, and bearing - Design of laterally unsupported beams.

UNIT III

Tension Members: Introduction to different modes of failures - gross section yielding - Net Section rupture and block shear failure - Determine the design strength due to yielding of gross section - rupture of critical section and block shear - Design of tension members.

Compression Members: Effective length of columns - Slenderness ratio -permissible stresses - Design of compression members, Design of Struts.

Roof Trusses: Different types of trusses – Design loads – Load combinations as per IS Code recommendations, structural details –Design of simple roof trusses involving the design of purlins, members and joints.

UNIT IV

Built up compression members – Design of lacings and battens. Design Splicing of columns.

UNIT V

Design of Column Foundations: Introduction - Design of slab base - Design of gusset base- Column bases subjected to moment.

UNIT VI

Design of Plate Girder: Introduction - Design consideration - IS Code recommendations - Design of plate girder - Welded -curtailment of flange plates and stiffeners - splicing and connections.

Design of Gantry Girder: Introduction - Impact factors - longitudinal forces- Design of Gantry girders.

NOTE:

All units i.e. from unit II to unit-VI to be taught in Limit State method only.

Welding Connections should be used from Unit II – Unit V.

The students should prepare the following sheets.

Sheets-1 Detailing of steel members Connection.

Sheets-2 Detailing of beams including curtailment of flange plates.

Sheets-3 Detailing of Column including lacing and battens.

Sheets-4 Detailing of Column bases, slab base and gusseted base.

Sheets-5 Detailing of Plate girder including curtailment, splicing and stiffeners.

EXAMINATION PATTERN:

Internal Examination Pattern:

The total internal marks are distributed in three components as follows:

Descriptive (subjective type) examination	: 15 marks
Detailing sheets(For above)	: 10 marks
Assignment	: 05 marks

TEXT BOOKS:

1. Design of steel structures, S.K. Duggal, Tata McGraw Hill, and New Delhi.
2. Design of steel structures, S.S.Bavakatti, I.K.International Publishing House Pvt. Ltd.
3. Steel Structures Design and Practice, N.Subramanian, Oxford University Press.
4. Design of Steel Structures, Ramachandra, Scientific Publishers Journals Dept.

REFERENCE BOOKS:

1. Structural Design in Steel, Sarwar Alam Raz, New Age International Publishers, New Delhi.
2. Design of Steel Structures, P. Dayaratnam, S. Chand Publishers.
3. Design of Steel Structures, M.Raghupathi, Tata Mc. Graw-Hill.
4. Structural Design and Drawing, N. Krishna Raju, University Press.
5. IS: 800- 2007, General construction in steel-Code of practice.
6. IS: 875-1987, Code of Practice for Design Loads.
7. Steel Tables

Year/Sem	**VI Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18 CET 23
Name of the Course	TRANSPORTATION ENGINEERING – II					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Understand the Historical development of Railways in India (K2)
- Analyze and Design the Railway Track Geometric Elements (K3)
- Apply turnouts and controllers on Railway Track (K3)
- Analyze and design geometric elements of Airport Runway and Taxiway (K3)
- Analyze design of flexible and Rigid Highway pavements (K3)

- Classify the various components of Dock & Harbors (K2)

SYLLABUS

UNIT I

Components of Railway Engineering: Historical development of railways in India – Advantages of Railways – Classification of Indian Railways – Permanent way – Components and their functions – Rail joints – Welding of Rails – Creep of Rails – Rail fixtures & Fastenings.

UNIT II

Geometric Design of Railway Track: Track Geometric design – Points & Crossings –Track drainage – Layout of Railway stations and yards – Signals – Interlocking – Track circuiting–Track Maintenance.

UNIT III

Turnouts & Controllers: Track layouts – Switches – Crossings – Turnouts – Signal Objectives – Classification – Fixed signals – Stop signals – Signaling systems – Mechanical signaling system – Electrical signaling system.

UNIT IV

Airport Planning: Airport Master plan – Airport site selection – Air craft characteristics –Airport classification – Runway orientation – Wind rose diagram – Runway length – Taxiway – Terminal area.

UNIT V

Runway Design Methods: Various Design factors – Design methods for Flexible pavements – Design methods for Rigid pavements – LCN system of Pavement Design – Airfield Pavement Failures

UNIT – VI

Docks & Harbors: Layout of Port components – Functions –Classification of Ports – Site selection – Natural Phenomenon – Tides, Winds, Waves, Currents – Drift – Navigational aids.

TEXTBOOKS:

1. Railway Engineering, Satish Chandra and Agarwal M. M., Oxford University Press, New Delhi.
2. Airport Engineering, Khanna &Arora , Nemchand Bros, New Delhi.
3. Docks and Harbor Engineering, Bindra S.P., Dhanpathi Rai & Sons, New Delhi.

REFERENCE BOOKS:

1. Railway Engineering, Saxena & Arora, Dhanpat Rai, New Delhi.
2. Airport Engineering, Virendra Kumar, Dhanpat Rai Publishers, New Delhi.
3. Airport Engineering Planning & Design, Subhash C. Saxena, CB Publishers, New Delhi.
4. Transportation Engineering Planning Design, Wright P. H. & Ashfort N. J., John Wiley & Sons.
5. Transportation Engineering Volume II, Venkatramaiah, C., Universities Press, Hyderabad.
6. Transportation Engineering, Railways, Airports, Docks & Harbors, Srinivasa Kumar R, University Press, Hyderabad.
7. Highway, Railway, Airport and Harbor Engineering, Subramanian K. P, Scitech Publications (India) Pvt. Limited, Chennai.

Year/Sem	**VI Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CET24
Name of the Course	**ENVIRONMENTAL ENGINEERING-I**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Describe the importance of protected water supply (K1)
- Identify the water source and select proper intake structure (K2)
- Examine the Characteristics of water (K3)
- apply a suitable process to treat raw water collected from source (K3)
- Select suitable Disinfection methods to treat water from primary treatment units (K3)
- Demonstrate various appurtenances used in the water supply (K3)

UNIT I

Protected Water Supply systems: Importance and Necessity, Water borne diseases, Flow chart of public water supply system, Role of Environmental Engineer, Agency activities. Water Demand and Quantity Estimation: Estimation of water demand for a town or city, Per capita Demand and factors influencing it - Types of water demands and its variations- factors affecting water demand, Design Period, Factors affecting the Design period, Population Forecasting

UNIT II

Sources of Water: Lakes, Rivers, Impounding Reservoirs, comparison of sources with reference to quality, quantity and other considerations- Capacity of storage reservoirs, Mass curve analysis. Groundwater sources of water: Types of water bearing formations, springs, Wells and Infiltration galleries, Yields from infiltration galleries. Collection and Conveyance of Water: Factors governing the selection of the intake structure, Types of Intakes. Conveyance of Water: Gravity and Pressure conduits.

UNIT III

Quality and Analysis of Water: Characteristics of water–Physical, Chemical and Biological-Analysis of Water – Physical, Chemical and Biological characteristics. Comparison of sources with reference to quality-I.S. Drinking water quality standards and WHO guidelines for drinking water

UNIT IV

Primary Treatment of Water: Flowchart of water treatment plant, Treatment methods: Theory and Design of Sedimentation, Coagulation, Sedimentationwith Coagulation, Filtration.

UNIT V

Secondary Treatment (Disinfection): Theory of disinfection-Chlorination and other Disinfection methods, Softening of Water, Removal of color and odours - Iron and Manganese removal – Adsorption-fluoridation and deflouridation–aeration– Reverse Osmosis-Iron exchange–Ultra filtration.

UNIT VI

Distribution of Water: Requirements- Methods of Distribution system, Layouts of Distribution networks, Pressures in the distribution layouts, Analysis of Distribution networks: Hardy Cross and equivalent pipe methods -Components of Distribution system: valves such as sluice valves, air valves, scour valves and check valves, hydrants, water meters and Pipes –Laying andtesting of pipe lines- selection of pipe materials, pipe joints.

TEXTBOOKS:

1. Elements of Environmental Engineering by K.N. Duggal, S. Chand Company Ltd., New Delhi, 2012.
2. Water Supply Engineering by Dr. P.N. Modi, Standard book house, 4th edition (2015)
3. Water Supply Engineering by B.C. Punmia, Laxmi publications, volume-1
4. Water supply and sanitary engineering by S. C. Rangwala, Charotar publishing house, 29th edition (2016)

REFERENCE BOOKS:

1. Water supply engineering by S. K. Garg , Khanna publishers, ,33rd edition (2010)
2. Environmental Engineering by Howard S. Peavy, Donald R. Rowe (2017) Mc-Graw-Hill

   Book Company, New Delhi, 1985.
3. IS 10500:2012, Drinking water specification.
4. IS :3052 (Part-08), Methods of sampling and Test(physical and chemical) for water and waste

   Water.

Year/Sem	VI Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	0	0	3	1.5	V18CEL09
Name of the Course	**ENVIRONMENTAL ENGINEERING LAB**					
Branch	CIVIL ENGINEERING					

Course outcomes:

Upon successful completion of this course the student will be able to

- Find some important characteristics of water and waste water in the laboratory (K3)
- Prepare some conclusion and decide whether the water is potable or not (K3)
- Examine whether the water body is polluted or not with reference to the state parameters
  in the list of experiments (K3)
- Find the strength of the sewage in terms of BOD and COD (K3)

LIST OF EXPERIMENTS

1. Sampling of water for testing (Demonstration)
2. Determination of alkalinity or acidity
3. Determination of chlorides in water and soil
4. Determination and estimation of total solids, organic and inorganic solids, settle able solids
5. Determination of Iron
6. Determination of pH and Electrical Conductivity of water and soil
7. Determination of Optimum coagulant dose
8. Determination of Chlorine demand
9. Determination and estimation of total hardness – calcium and magnesium
10. Determination of N, P, K values in solid waste
11. Physical parameters – Temperature, colour, odour, turbidity, taste.
12. Presumptive Coliform test
13. Determination of Dissolved Oxygen and BOD
14. Determination of COD

LIST OF EQUIPMENTS

1. pH Meter
2. Turbidity Meter
3. Conductivity Meter
4. Hot Air Oven
5. Muffle Furnace
6. Dissolved Oxygen Meter
7. U-V Visible Spectrophotometer
8. COD Reflux Apparatus
9. Jar Test Apparatus
10. BOD Incubator
11. Autoclave

12. Hazens Apparatus

13. Imhoff Cone

Year/Sem	**VI Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation / Year	V18 / 2020-2021	0	0	3	1.5	V18CEL10
Name of the Course	**CAD & GIS LAB**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Employ structural analysis software to analyze and design 2D and 3D frames (K3)
- Prepare design and analyze retaining wall and simple towers using CADD software (K3)
- Demonstrate to digitize and create thematic map and extract important features (K3)
- Develop digital elevation models using GIS software (K3)

COMPUTER AIDED DESIGN AND DRAWING

SOFTWARE:

- STAAD PRO
- STRAAP
- STUDDS

LIST OF EXPERIMENTS

- 2-D Frame Analysis and Design
- Steel Tabular Truss Analysis and Design
- 3-D Frame Analysis and Design
- Retaining Wall Analysis and Design
- Simple Tower Analysis and Design.

GEOGRAPHICAL INFORMATION SYSTEM

SOFTWARE:

- Arc GIS 9.0
- ERDAS 8.7
- Mapinfo 6.5

LIST OF EXPERIMENTS

- Digitization of Map/Toposheet
- Creation of thematic maps.
- Estimation of features and interpretation
- Estimation of features and interpretation
- Simple applications of GIS in water Resources Engineering & Transportation Engineering.

ANNEXURE –CE-III

COURSES OFFERED UNDER OPEN ELECTIVE – I IN VI SEMESTER TO ALL OTHER BRANCHES

Sl.No.	Course Code	Name of the Course
1	V18CEOE1	Repair and Rehabilitation of Structures
2	V18CEOE2	Remote Sensing and GIS

Year/Sem	VI Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CETOE1
Name of the Course	REPAIR AND REHABILITATION OF STRUCTURES					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Describe the deterioration of concrete in structures (K1)
- Estimate the degree of deterioration using Non Destructive Test methods (K2)
- Assess the failures and causes of failures in structures (K3)
- Relate different materials used for repair and rehabilitation of structures (K3)
- Employ and suggest suitable retrofitting techniques (K3)
- Organize the case studies and report the condition of structures (K3)

UNIT I

Deterioration of concrete in structures: Physical processes of deterioration like Freezing and Thawing, Wetting and Drying, Abrasion, Erosion, Pitting.

Chemical processes of deterioration like Carbonation, Chloride ingress, Corrosion, Alkali aggregate reaction, Sulphate attack, Acid attack, temperature and their causes, Mechanism, Effect, preventive measures.

Cracks: Cracks in concrete, types, pattern, quantification, measurement and preventive measures.

UNIT II

Non Destructive Testing: Non destructive test methods for concrete like Rebound hammer, Ultrasonic pulse velocity, Rebar locator, Corrosion meter, Penetration resistance and Pull out tests. Methods for corrosion measurement and assessment, including half-cell potential and resistivity, mapping of data.

UNIT III

Failure of buildings: Definition of building failure, types of failures, Causes of Failures, Faulty Design, Accidental over Loading, Poor quality of material, Poor Construction practices and Fire damage. Investigation of failures, diagnostic testing methods and equipments required. Repair of cracks in concrete.

UNIT IV

Materials for repair and rehabilitation: Admixtures, types of admixtures, purposes of using admixtures, chemical composition, Natural admixtures, Fibres, wraps, Glass and Carbon fibre wraps, Steel Plates. Concrete behavior under corrosion, disintegrated mechanisms, moisture effects and thermal effects. Visual investigation, Acoustical emission methods, Corrosion activity measurement, chloride content, Depth of carbonation, Impact echo methods, Ultrasound pulse velocity methods, Pull out tests.

UNIT V

Repair Techniques: Grouting, Jacketing, Shotcreting, Externally bonded plates, Nailing, Underpinning and under water repair. Materials, Equipments, Precautions and Processes.

UNIT VI

Investigation of structures: Distress, observation and preliminary test methods. Case studies related to rehabilitation of bridge piers, dams, canals, heritage structures, corrosion and erosion damaged structures.

TEXT BOOKS:

Year/Sem	V Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2020-2021	3	0	0	3	V18CEOE2
Name of the Course	**REMOTE SENSING AND GEOGRAPHICAL INFORMATION SYSTEM**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Define the basic principles of Remote Sensing and GIS, including ground, air and satellite based sensor platforms (K1)
- Interpret the aerial photographs and satellite imageries (K2)
- Relate the process of input spatial data entry and its types (K3)
- Examine the Spatial Data for a variety of applications (K3)
- Employ RS and GIS for diverse applications (K3)
- Apply RS and GIS concepts in water resources engineering (K3)

SYLLABUS

UNIT I

Introduction to Remote Sensing: Basic concepts of remote sensing, electromagnetic radiation, electromagnetic spectrum, interaction with atmosphere, energy interaction with the earth surfaces, Characteristics of remote sensing systems.

Sensors and platforms: Introduction, types of sensors, airborne remote sensing, space borne remote sensing, image data characteristics, digital image data formats-band interleaved by pixel, band interleaved by line, band sequential, IRS, LANDSAT, SPOT, MODIS, ASTER,RISAT and CARTOSAT.

UNIT II

Image analysis: Introduction, elements of visual interpretations, digital image processing-image preprocessing, image enhancement, image classification, supervised classification, unsupervised classification.

UNIT III

Geographic Information System: Introduction, key components, application areas of GIS, map projections.

Data entry and preparation: spatial data input, raster data models, vector data models.

UNIT IV

Spatial data analysis: Introduction, overlay function-vector overlay operations, raster overlay operations, arithmetic operators, comparison and logical operators, conditional expressions, overlay using a decision table, network analysis-optimal path finding, network allocation, network tracing and buffer analysis.

UNIT V

RS and GIS Applications: Land cover and land use, agriculture, forestry, geology, geomorphology, urban applications.

UNIT VI

Applications of Hydrology, Water Resources and Disaster Management: Food zoning and mapping, groundwater prospects and potential recharge zones, watershed management and disaster management with case studies.

MINUTES OF THE III BOS OF ENGLISH AND MATHS 1.8.'20.

The III BOS Meeting of English and Maths combinedly was held online at 4pm of 1.8.'20 .using the Zoom link.

URL **:**https://zoom.us/j/93450632552, Password : 147257.

Agenda of the Meeting

- . Opening Remarks by BOS Chairperson.
- 2. To discuss and finalize the syllabus of Professional Communication Skills-III{**V18ENT05}** for V Semester of B.Tech .,for the Academic Year 2020-2021.
- **3.** To discuss and finalize the syllabus of Professional Communication Skills-IV{**V18ENT06}** for VI Semester of B.Tech .,for the Academic Year 2020-2021.

Minutes

- The syllabus of Professional Communication Skills-III{**V18ENT05}** for V Semester of B.Tech .,under V18 Regulations, was approved by the Members of BOS of English and Maths. Details are given in Annexure-EN-01
- The syllabus of Professional Communication Skills-IV{**V18ENT06}** for VI Semester of B.Tech .,under V18 Regulations, was approved in the meeting by the BOS members of English and Maths. Details are given in Annexure-EN-02
- The suggestion regarding the usage of ampersand was considered redundant , while referring to " Ratio & Proportion", " LCM & HCF "by the BOS members of Maths and the ampersand was replaced with " hyphen"..

Members Present

1. Dr.G.V.N.S.R.Ratnakara Rao
Principal,
Sri Vasavi Engineering College

English BOS Members

1. Chairman of BOS **:** Dr.T.Sujani, Associate Professor
& Training Head
Sri Vasavi Engineering College

2. Dr. D. Kesava Rao

(Council Nominee)
Professor of English, NIT Warangal

3. Prof. K. Sree Ramesh
   (Council Nominee)
   Professorof English and
   Principal, College ofArts & Commerce
   Adikavi Nannaya University
4. Dr.A.Purna Chandra Rao
   (University Nominee)
   Assoc.Professor, PVP Siddhartha Institute of Technology, Vijayawada

Faculty Present:

1. Mr.K.V.Rama Rao
2. Mrs. K.Radha Madhavi
3. Mrs.K.V.L.B.Devi
4. Mr.T.Suresh
5. Mr.K.Ramana Rao
6. Mr.G.Srinivasa Rao

Maths BOSMembers

1. Chairman of BOS : SriN.Raja Sekhar
   Head, BSH
   Sri Vasavi Engineering College
2. Dr.GVSR Dikshithulu
   Professor, JNTUK
3. Dr.Y.N.Reddy
   NIT Warangal
4. Dr.TSR Murthy
   Professor, Vishnu Engineering College

Faculty Present

1. Mr.Amjed Ali
2. .Mr.J.N.V.Somayajulu
3. Mr.P.Someshwara Rao

Dr.T.Sujani
Chairman of the BOS

		0	**4**	**0**	**MNC**

COURSE OUTCOMES

	After successful completion of the course, students will be able to	Knowledge Level
CO1	Distinguish the subtle meanings of various words in different contexts, recognize similar words as well as words with contrast meanings and use them appropriately.	K2
CO2	Interpret the passage using different strategies and answer the questions with ease.	K3
CO3	Compare different pairs of words and draw analogy between the words. Choose an appropriate word to make a sentence meaningful.	K4
CO4	Recognize the easiest and best possible way of solving problems in the area of NNumber and Letter Series, Analogy, Classification, Coding & Decoding Symbols, a Ranking and Analytical Reasoning.	K1
CO5	Investigate the different types of logics involved in Mirror and Water Images, Logical Reasoning & Arithmetical Reasoning.	K4
CO6	Find the common traps in the questions and errors likely to be made from the concepts of Blood Relations, Directions, Average, Clock and Calendar, Data Sufficiency, Permutations-Combinations and Probability.	K3

SYLLABUS

UNIT – 1

Vocabulary – 500 words – Meaning – contextual Usage - Prefix – Suffix – Root words

Synonyms - Antonyms- Para jumbles – Strategies – Directional words – central theme

UNIT – 2

Sentence completion

Strategies – Cause and effect signals – support signals – contrast signals

Writing skills –

Email writing– Types -- Dos and Don’ts- Paragraph writing- Essay writing

Fabrication of a story based on the context.

UNIT – 3

Analogies

Strategies - Create a general sentence - Use the correct part of speech - Beware of homonyms - Recognize common relationship types.

Reading Comprehension

Strategies– skimming – scanning – predicting – identifying the central idea – questioning – making inferences

UNIT - 4

Number And Letter Series, Coding & Decoding, Analogy,Classification& Ranking. (K1)

Problems of how to find the next number in the series, Finding the missing number and related sums, Sums related to Classification, Sums related to letter series, Relation between number series and letter series, Finding odd one out from groups, Identify the rank in different places.

UNIT-5

Problems On Ages& Numbers,Mirror And Water Images, Logical Reasoning &Arithmetical Reasoning.(K4)

Definition and concept of Venn Diagram – its applications. statements – Affirmations, Denials and Contradictions. Sums related to Ages & numbers. Problems on ages with different logics. Identifying the images of water and Mirror.

UNIT-6

Blood Relations, Directions, Average, Clock And Calendar, Data Sufficiency, Permutations-Combinations And Probability.(K3)

Deriving the formula to find the angle between hands for the given time, History of calendar-, Finding the day for the given date, Problems related to directions. Difference between words Permutation and Combinations – Various cases -Real Time Scenarios. Concept of Probability – - Conjunctions – Rules & Cases of Probability.

Reference Books

COURSE OUTCOMES

	After successful completion of the course, the students will be able to	Knowledge Level
CO1	Express writer's tone and relevant ideas using different types of writing skills and prepare resume to show case skills and accomplishments.	**K2**
CO2	Organize thoughts in the discussions and express views without reticence and face interviews with aplomb.	**K3**
CO3	Infer the meaning of the picture by thinking out of the box and speak without inhibitions.	**K4**
CO4	Demonstrate problem solving skills through the concepts of Percentages, Profit and loss, Simple Interest & Compound Interest and Allegation.	**K3**
CO5	Analyze appropriate methods of logical thinking on Ratio and Proportion, Partnership, LCM and HCF, Number System, Areas & Volumes.	**K4**
CO6	Calculate the end results of Cubes, Dice and Data Analysis, Time & Work, Time & Distance, Race & Games.	**K4**

SYLLABUS

UNIT – 1

Writing skills – Importance of writing skills – Types – Expository – Descriptive – Persuasive – Creative – Narrative Skills.

Resume – Basic rules for a good resume - Steps to make an effective resume format.

UNIT – 2

Group Discussion – Definition – methodology & guidelines – characteristics of a successful GD– vital role of GD in selection process- Etiquette- Types of GDs- Sentence starters for GD - Mock GDs.

Campus to corporate – Steps to a successful interview – Kinds of interviews – Screening – Face– to-Face – Panel & Skype interviews - Mock interviews

UNIT -3

Speaking skillsLevel -1 – JAM sessions – Brain storming – Picture interpretation

Speaking skillsLevel -2– Debate – Press conference – Business Skills

UNIT - 4

Percentages, Profit and Loss, Simple and Compound Interest, Allegation & Mixtures

Definition of Simple and Compound Interest. Formulas of Applications – Difference between Simple and Compound interest – Rate of Increase or Decrease Population – Expected values of Maturity. Calculate percentages on different situations, using in profit and loss. Identifying difference between Cost price, Selling Price and Marked Price, Finding Discounts, using the method of allegation.

UNIT – 5

Ratio - Proportion, Partnership, LCM - HCF, Areas & Volumes

Introducing the concept of ratio in three different methods, a method to compute and compare two ratios – The effect of increase or decrease of a quantity on the ratio – The meaning of proportion and Problems related to Ratio and Proportion. Improve problem solving skills through Lcm& Hcf.

Unit- 6

Time, Work and Distance, Cubes, Dice and Data Analysis

Men- Days -work –completion- Capability Ratio among Men, Women and Children – Application of time in Pipes and Cistern. Work Progress in positive and negative effects. Relation among Time, Speed and Distance – Concepts of Relative speed and Average Speed – Ideas about Boats and Streams and Races of Games. Calculate the end results of Cubes and Dice.

Annexure-X

Amendments to **UG V18** Academic Regulations

1. As per V18 regulations vide item no:7.3 :

A student shall be promoted from II year (IV Sem) to III year (V Semester) if he/she earns 50% of the total credits specified up to and including IV semester examinations.

This is amended as follows

No minimum credits required for promotion from IV semester to V Semester , for the academic year 2020-2021 only, as a special case, due to COVID-19.

2. Evaluation of Mini Project:

For the mini Project, out of total 100 marks, 40 marks shall be internal evaluation and 60 marks for end semester examination. The Internal Evaluation shall be on the basis of two seminars given by each student on the topic of project and evaluated by an internal committee consisting of supervisor and faculty nominated by the HOD. The Semester End Examination (Viva – Voce) shall be conducted by a committee consisting of an external examiner, Head of the Department and Supervisor of the Project.

Annexure-XI

Approval of Honor's / Minor degree in Data Science

1. Students, who are desirous of pursuing their special interest other than the choosen discipline, may opt for the minor/honors degree offered. We are proposing Honors degree in Data Science for CSE & CST and Minor degree in Data Science for CE, EEE, ME, ECE & ECT.

Academic Regulations for Minor degree in a discipline (Minor degree/programme):

Students, who are desirous of pursuing their special interest areas other than the chosen discipline of Engineering / Technology, may opt for additional courses in minor specialization groups offered by a department other than their parent department as per the Guidelines given by AICTE.

a. Students having a CGPA of 8.0 or above up to IV Semester and without any live backlog courses will be permitted to register for Minor discipline programme.

However CGPA of 8.0 or above up to III Semester without any live backlog courses will be permitted to register for minor degree programme for the academic year 2020-2021 only in view of pandemic Covid-19

b. In order to earn a Minor in a discipline, a student has to earn extra18 credits by studying prescribed courses. The list of courses to be studied either in MOOCs courses under SWAYAM Platform or conventional type will be decided by the College at the time of registration for Minor degree

c. The students are permitted to register for their minor specialization courses from the V semester onwards.

d. The Evaluation pattern of courses similar to the regular course evaluation / SWAYAM portal

e. Students are allowed to opt for only one Minor discipline programme in the order of preference given by them.

f. Minimum strength required for offering a Minor in a discipline is considered as 30% of the class size.

g. Minors degree should be completed along with regular B. Tech. program. That is, Minors degree should be completed by the end of final year B. Tech. program along with the major discipline. A student can continue to pursue the minor degree as long as he has no backlogs.

h. A student registered for Minor in a discipline shall pass in all courses that constitute the requirement for the Minor degree programme. No class/division (i.e., second class, fist class and distinction, etc.) shall be awarded for Minor degree programme.

i. The Minor in a discipline will be mentioned in the degree certificate as Bachelor of Technology in XXX with Minor in YYY. For example, Bachelor of Technology in Mechanical Engineering with Minor in Data Science. This fact will also be reflected in the transcripts, along with the list of courses taken for Minor programme with CGPA mentioned separately.

j. Curriculum and the syllabus of the courses shall be approved by the Board of studies and the Academic Council.

Academic Regulations for Honors degree in a discipline:

A new academic programme B.Tech. (Hons.) is introduced in order to facilitate the students to choose additionally the specialized courses and build their competence in a specialized area. Students should opt for additional courses in Honors degree offered by their parent department and as per the Guidelines given by AICTE.

a. Students having a CGPA of 8.0 or above up to IV Semester and without any live backlog courses will be permitted to register for Honors degree.

However CGPA of 8.0 or above up to III Semester without any live backlog courses will be permitted to register for Honors degree programme for the academic year 2020-2021 only in view of pandemic Covid-19

b. In order to earn a Honors degree, a student has to earn extra 18 credits by studying prescribed courses.The list of courses to be studied either in MOOCs courses under SWAYAM Platform or conventional type will be decided by the College at the time of registration for Honors degree.

c. The students are permitted to register for their honors degree courses from the V semester onwards.

d. The Evaluation pattern of courses similar to the regular course evaluation / SWAYAM portal

e. Students are allowed to opt for only one honors degree in the order of preference given by them.

f. Minimum strength required for offering a honors degree is considered as 30% of the class size.

g. Honors degree should be completed along with regular B. Tech. program. That is, Honors degree should be completed by the end of final year B. Tech. program along with the major discipline. A student can continue to pursue the Honors degree as long as he has no backlogs.

h. A student registered for honors degree shall pass in all courses that constitute the requirement for the Minor degree programme. No class/division (i.e., second class, fist class and distinction, etc.) shall be awarded for honors degree programme.

i. The Honors in a discipline will be mentioned in the degree certificate as Bachelor of Technology in XXX with honors in YYY. For example, Bachelor of Technology in Computer Science and Engineering with honors in Data Science. This fact will also be reflected in the transcripts, along with the list of courses taken for honors programme with CGPA mentioned separately.

j. Curriculum and the syllabus of the courses shall be approved by the Board of studies and the Academic Council.

Annexure-XII

Amendments to **MBA V18** Academic Regulations

1. Evaluation of MNC(Mandatory Non Credit Courses) Courses

The evaluation and minimum academic requirements of MNC courses are at par with other theory courses. These courses will not carry any credits. The performance will be graded as Pass / Fail. The grades obtained in these courses will not affect the Grade Point Average.

2. Internal evaluation for Mini Project

The evaluation of Mini project shall be made by a departmental committee. The committee adjudges the report either as satisfactory or not satisfactory. Satisfactory report deemed to be successful completion of the course

***

Fifth Meeting of Academic Council

Agenda Notes

Item No.1: Welcoming the members.

Item No.2: To approve the minutes of the previous meeting. The details are given in **Annexure-I, Page No: 03**

Item No.3: Approval of the minutes of the meeting of joint BOS held on 26/12/2020.

a. To approve V20 regulation for the award of B.Tech degree. (Details are given in **Annexure-II(a)**). **Page No: 04**
b. To approve course structure for different branches of B.Tech programme. (Details are given in **Annexure-II(b)**). **Page No: 35**

Item No.4: To approve the minutes of the meeting of BOS of various departments.

a. Minutes of 4th BOS meeting of Electrical & Electronics Engineering.(Details are given in **Annexure-III**) **Page No: 40**
b. Minutes of 4th BOS meeting of Mechanical Engineering.(Details are given in **Annexure-IV**) **Page No: 54**
c. Minutes of 4th BOS meeting of Electronics &Communication Engineering. (Details are given in **Annexure-V**) **Page No: 64**
d. Minutes of 4th BOS meeting Computer Science and Engineering. (Details are given in **Annexure-VI**) **Page No: 69**
e. Minutes of 4th BOS meeting of Mathematics. (Details are given in **Annexure-VII**) **Page No: 82**
f. Minutes of 4th BOS meeting of Physics. (Details are given in **Annexure-VIII**) **Page No: 88**
g. Minutes of 4th BOS meeting of Chemistry. (Details are given in **Annexure-IX**) **Page No: 95**

h. Minutes of 4th BOS meeting of English.
(Details are given in **Annexure-X**) **Page No: 104**

Item No.5: To approve M.Tech& MBA students results (2018 Admitted Batch)
(Details are given in **Annexure-XI**) **Page No: 114**

Item No.6: Replacement and Extension of BOS members to another term(Two Years).

(Details are given in **Annexure-XII**) **Page No: 118**

Item No.7: Any other item with the permission of the chair.

Annexure-I

Minutes of the Fourth Academic Council Meeting held on 30/08/2020.

Item No.1: Welcome address by Principal& Introduction of members.

Principal **Prof. Guduru VNSR RatnakaraRao** welcomed the members and chaired the meeting.

Item No.2: Review of institute progress for the Academic Year 2019-2020

The council reviewed the progress of the institute for the academic year 2019-2020 and appreciated.

Item No.3: Action taken report on the minutes of the previous meeting (held on02.06.2019).

The council approved the action taken report presented.

Item No.4: Approval of the minutes of the meeting of BOS of Various departments.

The council approved the minutes of the meeting of BOS of Various Departments.

Item No.5: Amendments to **UG V18** Academic Regulations

The proposed amendments are approved by the council.

Item No.6: Approval of Honor's/ Minor degree in Data Science

The proposed Academic regulations for Honor's/ Minor degree in Data Science are approved by the council.

Item No.7: Amendments to **MBA V18** Academic Regulations

The proposed amendments are approved by the council.

Item No.8: Any other item with the permission of the Chair

1) Reviewed result analysis
2) Approved the academic calendars for 2020-21 academic year and modifications in Internal Evaluation for A.Y 2019-2020

The meeting concluded with vote of thanks by the Member Secretary.

Annexure-II(a)

ACADEMIC RULES & REGULATIONS (V20)

Applicable for the batch of students admitted from the Academic Year **2020-2021**

1.0 INTRODUCTION:

Under-Graduate Degree Programme in Engineering & Technology in Sri Vasavi Engineering College offers a 4-year (8 semesters) Bachelor of Technology (B.Tech.) degree programme, under V20 Regulations with effect from the academic year 2020-21. All the rules and regulations specified here after shall be read as a whole for the purpose of interpretation and when any doubt arises, the decision of the Chairman Academic Council of Sri Vasavi Engineering College is final. As per the norms, the Principal of the college (Autonomous) shall be the Chairman of Academic Council.

The provisions of these regulations shall be applicable to any new discipline that may be introduced from time to time

2.0 DEFINITIONS:

"Commission" means University Grants Commission(UGC);

"Council" means All India Council for Technical Education(AICTE);

"University" means Jawaharlal Nehru Technological University Kakinada(JNTUK);

"College" means Sri Vasavi Engineering College, Tadepalligudem;

An **Academic Programme**means any combination of courses and/or requirements leading to award of a degree.

"Course" means a subject either theory or practical identified by its course title and code number and which is normally studied in a semester.

"Degree" means an academic degree conferred by the university upon those who complete the undergraduate curriculum.

"MOOC" means Massive Open Online Course

"Regular Students" means students enrolled into the four year programme in the first year.

"Lateral Entry Students" means students enrolled into the four year programme in the second year.

3.0 ADMISSION CRITERIA:

The eligibility criteria for admission into UG Engineering programmes are as per the norms approved by Government of Andhra Pradesh from time to time.

The sanctioned seats in each programme in the college are classified into CATEGORY-A, and CATEGORY-B at I year level and only CATEGORY-A at Lateral Entry II year level.

The percentages of Category–A, Category-B and Lateral Entry Seats are decided from time to time by the Government of Andhra Pradesh.

3.1 Category – A Seats

Category - A seats are filled as per the norms approved by the Government of Andhra Pradesh.

3.2 Category – B Seats

Category - B seats are filled by the College as per the norms approved by the Government of Andhra Pradesh.

3.3 Lateral Entry Seats

Lateral entry candidates shall be admitted into the III semester directly as per the norms approved by Government of Andhra Pradesh.

3.4 Admissions Under Special Cases:

These may arise in the following situations.

1. When a student gets detained due to academic regulations and re-joins the college to complete the programme. However, the academic regulations under which he/she was first admitted shall continue to be applicable to him/her.
2. When a student discontinues for some time and re-joins the college to complete the programme. However, the academic regulations under which he/she was first admitted shall continue to be applicable to him/her.

3. When a student seeks transfer from other colleges to SVEC and intends to pursue B.Techprogramme in the eligible branch of study.

These admissions may be permitted by the College Academic Council as per the norms stipulated by the statutory bodies and the Government of Andhra Pradesh from time-to-time.

4.0 B.TECH. PROGRAMME STRUCTURE:

4.1 Programs of Study in B.Tech:

The four year B.Techprogramme is offered in the following branches of study at present:

S.No	Title of the UG Programme	Programme Code
1.	Civil Engineering	CE
2.	Electrical and Electronics Engineering	EEE
3.	Mechanical Engineering	ME
4.	Electronics and Communication Engineering	ECE
5.	Computer Science & Engineering	CSE
6.	Computer Science & Technology	CST
7.	Electronics and Communication Technology	ECT

And any other course as approved by the authorities from time to time.

4.2 Medium of Instruction

The medium of instructions for the entire under graduate programme in Engineering & Technology will be English only.

4.3 UGC/ AICTE specified definitions:

The followingdescriptions are adopted appropriately for various termsand abbreviations used in these academic regulations/ norms.

4.3.1 Each under graduate programme is of 4 academic years (8 semesters) with the academic year divided into two semesters of 22 weeks (≥ 90 instructional days) each, each semester having - 'Continuous Internal Evaluation (CIE)' and 'Semester End Examination (SEE)' under V20 Regulations.

4.3.2 All courses are to be registered by the student in a semester to earn credits which shall be assigned to each course in an L: T: P: C (lecture periods: tutorial periods: practical periods: credits) structure based on the following general pattern.

1 Hr. Lecture (L) per week - 1 credit

1 Hr. Tutorial (T) per week - 1 credit

1 Hr. Practical (P) per week - 0.5 credits

Other than credit courses there will be Mandatory Non-credit Courses. These courses will not carry any credits.

4.4 Course Classification

Every course of B. Tech. Program shall be placed in one of the nine categories as listed in table below:

S.No.	**Category**	**Code**	**Suggested breakup of Credits (APSCHE)**	**Suggested breakup of Credits (AICTE)**
1.	Humanities and social science including Management courses	HSMC	10.5	12
2.	Basic Science courses	BSC	21	25
3.	Engineering Science Courses	ESC	24	24
4.	Professional core Courses	PCC	51	48
5.	Open Elective Courses	OEC	12	18
6.	Professional Elective Courses	PEC	15	18
7.	Internship, Seminar, Project work	Proj	16.5	15
8.	Mandatory courses	MNC	Non-Credit	Non-Credit

9.	Skill Oriented Courses	SC	10	-
Total Credits			**160**	**160**

4.5 Curriculum Structure

1. There shall be mandatory student induction program for fresher's, with a three-week duration before the commencement of first semester. Physical activity, Creative Arts, Universal Human Values, Literary, Proficiency Modules, Lectures by Eminent People, Visits to local Areas, Familiarization to Dept./Branch & Innovations etc., shall be included in the guidelines issued by AICTE
2. **All undergraduate students shall register for NCC/NSS/Club activities. A student will be required to participate in an activity for two hours in a week during second and third semesters. Grade shall be awarded as Satisfactory or Unsatisfactory in the mark sheet on the basis of participation, attendance, performance and behavior. If a student gets an unsatisfactory Grade, he/she shall repeat the above activity in the subsequent years, in order to complete the degree requirements.**
3. There shall be 05 Professional Elective courses and 04 Open Elective courses. All the Professional & Open Elective courses shall be offered for 03 credits, wherever lab component is involved it shall be (2-0-2-3) and without lab component it shall be (3-0-0-3). If a course comes with a lab component, that component has to be cleared separately.
4. All Open Electives are offered to students of all branches in general. However, a student shall choose an open Elective from the list in such a manner that he/she has not studied the same course in any form during the Programme
5. A student shall be permitted to pursue up to a maximum of two elective courses under MOOCs during the Programme. Each of the courses must be of minimum 12 weeks in duration. Attendance will not be monitored for MOOC courses. Student has to pursue and acquire a certificate for a MOOC course only from the organizations/agencies approved by the BOS in order to earn the 3

credits. The Head of the department shall notify the list of such courses at the beginning of the semester.

6. The college will invite registration forms from the students at the beginning of the semester for offering professional and open elective courses. There shall be a limit on the minimum and maximum number of registrations based on class/section strength. A course may be offered to the students, only if a minimum of 20 students (1/3 of the section strength) opt for it. The maximum strength of a section is limited to 80 (60 + 1/3 of the section strength).
7. Two summer internships each with a minimum of six weeks duration, done at the end of second and third years, respectively are mandatory. The internship can be done by the students at local industries, Govt. Organizations, construction agencies, Industries, Hydel and thermal power projects and also in software MNCs or at other agencies approved by BOS.
8. There shall also be mandatory full internship in the final semester of the Programme along with the project work.
9. There shall be 05 skill-oriented courses offered during III to VII semesters. Among the five skill courses, four courses shall focus on the basic and advanced skills related to the domain courses and the remaining one shall be a soft skills course.
10. A pool of interdisciplinary job-oriented skill courses shall be designed by a common Board of studies by the participating departments/disciplines and the syllabus along with the pre requisites shall be prepared for each of the laboratory infrastructure requirements. The list of such courses shall be included in the curriculum structure of each branch of Engineering, so as to enable the student to choose from the list.
11. The student shall be given an option to choose either the skill courses being offered by the college or to choose a certificate course being offered by industries/Professional bodies/APSSDC or any other accredited bodies as approved by the concerned BOS.

12. The Board of studies of the concerned discipline of Engineering shall review the skill advanced courses being offered by eligible external agencies and prepare a fresh list every year incorporating latest courses based on industrial demand.
13. Under graduate Degree with Honors/Minor shall be issued by the institute to the students who fulfill all the academic eligibility requirements for the B. Tech program and Honors/Minor program. The objective is to provide additional learning opportunities to academically motivated students.

5.0 ATTENDANCE REQUIREMENTS:

i. A student shall be eligible to appear for end semester examinations if he/she acquires a minimum of 75% of attendance in aggregate of all the courses in a semester.

ii. Shortage of attendance in aggregate up to 10% (65% and above, and below 75%) in each semester may be condoned by the college academic committee on genuine and valid grounds, based on the student's representation with supporting evidence.

iii. A stipulated fee shall be payable towards condonation of shortage of attendance to the college**. (a) A student is eligible to write the University examinations if he acquires a minimum of 50% in each subject and 75% of attendance in aggregate of all the subjects.** (b) Shortage of Attendance below 65% in aggregate shall in NO case be condoned.

iv. Students whose shortage of attendance is not condoned in any semester are not eligible to take their end examinations of that semester. They get detained and their registration for that semester shall stand cancelled. They will not be promoted to the next semester. They may seek re-registration for all those courses registered in that semester in which the student is detained, by seeking re-admission into that semester as and when offered; if there are any professional electives and/ or open electives, the same may also be re-registered if offered. However, if those electives are not offered in later semesters, then alternate electives may be chosen from the same set of elective courses offered under that category.

v. A student fulfilling the attendance requirement in the present semester shall not be eligible for repetition of same semester.

6.0 ACADEMIC REQUIREMENTS

6.1 Minimum Academic requirement

A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course, if student secures not less than 35% (24 marks out of 70 marks) in the semester end examination, and a minimum of 40% (40 marks out of 100 marks) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

6.2 Promotion Rules:

A. A student shall be promoted from II semester to III semester if he fulfills the minimum attendance requirements.

B. A student will be promoted from IV Semester to V Semester if he fulfills the academic requirement of 50% of credits up to either III Semester or IV Semester from all the examinations, whether or not the candidate takes the examinations and secures prescribed minimum attendance in IV semester.

C. A student shall be promoted from VI semester to VII semester if he fulfills the academic requirements of 50% of the credits up to either V semester or VI semester from all the examinations, whether or not the candidate takes the examinations and secures prescribed minimum attendance in VI semester.

6.2.1 For Lateral Entry Students:

A. A student shall be promoted from IV semester to V semester if he fulfills the minimum attendance requirements.

B. A student shall be promoted from VI semester to VII semester if he fulfills the academic requirements of 50% of the credits up to either V semester or VI semester from all the examinations, whether or not the candidate takes the examinations and secures prescribed minimum attendance in VI semester.

6.3 Gap - Year:

Gap Year – concept of Student Entrepreneur in Residence shall be introduced and outstanding students who wish to pursue entrepreneurship are allowed to take a break of one year at any time after I year/II year/III year to pursue entrepreneurship full time. This period shall be counted for the maximum time for graduation. An evaluation committee at Institute level shall be constituted to evaluate the proposal submitted by the student and the committee shall decide on permitting the student for availing the Gap Year.

7 AWARD OF DEGREE

A student will be declared eligible for the award of B. Tech. degree if he/she fulfills the following:

a. Eight academic years in sequence from the year of admission for a normal student admitted into the first year of the Programme.
b. Six academic years in sequence from the year of admission for a lateral entry student admitted into the second year of the Programme.
c. After maximum stipulated academic years from the year of their admission, he/she shall forfeit their seat in B. Tech programme and their admission stands cancelled.
d. Registers for 160 credits and must secure all the 160 credits for a normal student admitted into the first year of the Programme.
e. Registers for 121 credits and must secure all the 121 credits for a lateral entry student admitted into the second year of the Programme.
f. Has no dues to the Institute, hostels, Libraries, NCC/NSS etc., and
g. No disciplinary action is pending against him/her.

A student shall be eligible for the award of B.Tech degree with Honors or Minor if he/she earns 20 credits in addition to the 160/121 credits. A student shall be permitted to register either for Honors or for Minor and not for both simultaneously.

8 EVALUATION - DISTRIBUTION AND WEIGHTAGE OF MARKS

The performance of a student in every course will be evaluated for 100 marks each, with 30 marks allotted for CIE (Continuous Internal Evaluation) and 70 marks for SEE (Semester End-Examination).

8.1 Evaluation of Theory Courses:

Continuous Internal Evaluation(CIE): For theory Courses, during a semester, there shall be two mid-term examinations. Each mid-term examination consists of one objective paper, one descriptive paper and one assignment. The objective paper shall be for 10 marks and the descriptive paper shall be for 15 marks with duration of 20 minutes for objective and 90 minutes for descriptive paper.

The objective paper is set with 20 multiple choice, fill-in the blanks and matching type of questions for a total of 10 marks. The descriptive paper shall contain 3 full questions, the student has to answer all 3 questions, each carrying 5 marks.

While the first mid-term examination shall be conducted on 50% of the syllabus, the second mid-term examination shall be conducted on the remaining 50% of the syllabus.

Five marks are allocated for assignments (as specified by the course instructor concerned). The first assignment should be submitted before the conduct of the first mid-term examination, and the second assignment should be submitted before the conduct of the second mid-term examination.

The total marks secured by the student in each mid-term examination are evaluated for 30 marks, and the weighted average of the two mid-term examinations shall be taken as follows

CIE= (Best performance in MID exam x 0.8 + Next best Performance in MID exam x 0.2)

In case the student is unable to appear for any internal evaluation component owing to Pre-approved participation in

University/State/National/International co-curricular and extra-curricular activities, or due to Death of immediate family member, the Dean Academics can permit to conduct of reexamination for such students.

Semester End-Examination(SEE):

The semester end examinations (SEE) will be conducted for 70 marks consisting of two parts viz. i) Part- A for 10 marks, ii) Part - B for 60 marks.

Part-A is a compulsory question. It comprises six sub-questions for 10 marks. The four sub-questions of 2 marks each will be given from any of the 4 units and the remaining 2 questions will be of 1 mark each from the other 2 units from which the 2 marks questions are not given.

Part-B consists of six questions (numbered from 2 to 7) carrying 10 marks each. Each of these questions is from one unit and may contain sub-questions. For each question there will be an “either” “or” choice, which means that there will be two questions from each unit and the student should answer either of the two questions.

8.2 Evaluation of Laboratory Courses

For Laboratory courses, there shall be continuous evaluation during the semester for 30 marks and semester end evaluation for 70 marks.

Continuous Internal Evaluation(CIE):

The distribution of marks for continuous internal evaluation is given in the following Table:

Distribution of Marks (CIE)

S. No.	Criterion	Marks
1	Day to Day Evaluation	10
2	Record	10
3	Internal Examination	10

Semester End-Examination(SEE):

The Semester end examination for laboratory courses shall be conducted with three hour duration at the end of semester for 70 marks. The semester end examination shall be conducted with an external examiner and the laboratory Course Instructor. The distribution of marks is shown in the below table.

Distribution of Marks (SEE)

S. No.	Criterion	Marks
1	Procedure	15
2	Experiment/Programme Execution	25
3	Result	20
4	Viva-Voce	10

The distribution of marks maybe changed by the examiner in consultation with concerned HOD.

8.3 Design/Drawing Based Courses

Evaluation and examination pattern for other courses related to design/drawing is mentioned along with the syllabus.

8.4 Evaluation of Mandatory Noncredit Courses:

There shall be mandatory courses with zero credits. There shall be no external examination. However, attendance in these courses shall be considered while calculating aggregate attendance and student shall be declared to have passed the mandatory course only when he/she secures 40% or more in the mid semester examinations.

In case, the student fails, a re-examination shall be conducted for failed candidates every six months/semester at a mutually convenient date of college/student.

8.5 Evaluation of MOOCS Courses:

A student shall be permitted to pursue up to a maximum of two elective courses under MOOCs during the Programme. Each of the courses must be of minimum 12 weeks in duration. Attendance will not be monitored for MOOC courses. Student has to pursue and acquire a certificate for a MOOC course only from the organizations/agencies approved by the BoS in order to earn the 3 credits. The Head of the department shall notify the list of such courses at the beginning of the semester.

Students who have qualified in the examination conducted by the MOOCs providers are exempted from appearing in the continuous and semester end evaluations conducted by the institution.

In case, a student fails to complete the MOOCs course offered by MOOC's providers, he/she may be allowed to register again for the same with any of the providers from the list provided by the department or the student may be allowed to register for the course as and when offered by the college as supplementary candidate.

The Scheme of Evaluation for MOOCs courses shall be scaled to continuous internal evaluation as 30 marks and semester end examination as 70 marks.

8.6 Evaluation of the summer internships:

A student will be required to submit a summer internship report to the concerned department and appear for an oral presentation before the departmental committee. The report and the oral presentation shall carry 40% and 60% weightages respectively.

The student shall submit a diary and a technical report for evaluation before the due date notified by the COE then schedule shall be given for oral presentation. Summer internship done at the end of second year shall be evaluated in V semester for 100 marks and summer internship done at the end of third year shall be evaluated in VII semester for 100 marks.

These evaluations shall be done by a committee consisting of Head of the department/Faculty Coordinator along with two senior faculty members of the Department. A student shall acquire credits assigned, when he/she secures 40% or more marks.

In case, if a student fails, he/she shall reappear as andwhen the V/VII semester supplementary examinations are conducted. There shall be no external evaluation.

8.7 Evaluation of the internship/Project/Seminar:

In the final semester, the student should mandatorily undergo internship and parallelly he/she should work on a project with well-defined objectives. At the end of the semester the candidate shall submit an internship completion certificate and a project report. A student shall also be permitted to submit project report on the work carried out during the internship. The project report shall be evaluated in three phases as follows

Students should submit the intern reports along with the log book signed by the industry representative at the end of 3rd month and 5th month. Students shall submit the final project report after completion of 6 months Along with the internship completion certificate.

Distribution of Marks

Time frame	Student Activity	Evaluation	Max.Marks
At the end of 3rd month	Submit log book and report signed by the industry representative	By the committee consists of supervisor along with two senior faculty nominated by HOD in coordination with industry representative	50 marks
At the end of 5rd month			50 marks
After completion of 6 months	Submit log book, final project report and internship completion certificate	By the committee consists of HOD, supervisor, one senior faculty and external examiner.	100 marks
Total			200 marks

The College shall facilitate and monitor the student internship programs. Completion of internships is mandatory, if any student fails to complete internship, he/she will not be eligible for the award of degree. In such cases, the student shall repeat and complete the internship.

8.8 Evaluation of skill oriented courses

If a student chooses to take a Certificate Course offered by industries/Professional bodies/APSSDC or any other accredited bodies, in lieu of the skill advanced course offered by the Department, the credits shall be awarded to the student upon producing the Course Completion Certificate from the agency/professional bodies as approved by the Board of studies.

If a student prefers to take a certificate course offered by external agency, the department shall mark attendance of the student for the remaining courses in that semester excluding the skill course in all the calculations of mandatory attendance requirements upon producing a valid certificate as approved by the concerned Board of Studies, the student is deemed to have fulfilled the attendance requirement of the course and acquire the credits assigned to the course.

A college level committee will evaluate the grades/marks given for a course by external agencies and convert to the equivalent marks/grades. The recommended conversions and appropriate grades/marks are to be approved by the Academic Council.

9 GRADING:

After each course is evaluated for 100 marks, the marks obtained in each course will be converted to a corresponding letter grade as given below, depending on the range in which the marks obtained by the student fall.

Marks Range	Level	Letter Grade	Grade Point
≥ 90	Outstanding	A^+	10
80-89	Excellent	A	9
70-79	Very Good	B	8
60-69	Good	C	7
50-59	Fair	D	6
40-49	Satisfactory	E	5
<40	Fail	F	0
-	Absent	Ab	0
-	Malpractice	MP	0
-	Withheld	WH	0

Calculation of Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

The Semester Grade Point Average (SGPA) is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.

$$SGPA = \Sigma (C_i \times G_i) / \Sigma C_i$$

where, C_i is the number of credits of the i^{th} course and G_i is the grade point scored by the student in the i^{th} course

ii. The Cumulative Grade Point Average (CGPA) will be computed in the same manner taking into account all the courses undergone by a student over all the semesters of a program, i.e.

$$CGPA = \Sigma (C_i \times S_i) / \Sigma C_i$$

where 'S_i' is the SGPA of the i^{th} semester and C_i is the total number of credits in that semester

iii. Both SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

iv. While computing the SGPA/CGPA, the courses in which the student is awarded Zero grade points will also be included.

v. Grade Point: It is a numerical weight allotted to each letter grade on a 10-point scale.

vi. Letter Grade: It is an index of the performance of students in a said course. Grades are denoted by letters A+, A, B, C, D, E and F.

vii. As per AICTE regulations, conversion of CGPA into equivalent percentage as follows:

Equivalent Percentage = (CGPA – 0.50) x 10

Award of Class:

After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. degree, he/she shall be placed in one of the following:

Class Awarded	CGPA Secured
First Class with Distinction	≥ 7.50*
First Class	≥ 6.50 < 7.50
Second Class	≥ 5.50 < 6.50
Pass Class	≥ 4.00 < 5.50

*In addition to the required CGPA of 7.50, the student must have necessarily passed all the courses of every semesterin the minimum stipulated period for the programme.

10 REVALUATION

Semester End Examination

1. As per the notification issued by the Controller of Examinations, the students can submit the applications for revaluation, along with the requisite fee receipt for revaluation of his/her answer script(s) of theory course(s), if he/she is not satisfied with the marks obtained.
2. The Controller of Examinations shall arrange for re-evaluation of those answer script(s).
3. A new examiner, other than the first examiner, shall re-evaluate the answer script(s).
4. Better marks out of the two shall be taken into consideration.
5. If the difference of marks between the two valuations is more than 15%, the answer script will be referred to third valuation. The average of nearest two marks will be awarded.

11 IMPROVEMENT OF CLASS:

A candidate, after becoming eligible for the award of the degree, may reappear for the Final Examination in any two (maximum) of the theory courses as and when conducted, for the purpose of improving the aggregate and the class. But this reappearance shall be within a period of one academic year after becoming eligible for the award of the Degree.

However, this facility shall not be availed of by a candidate who has taken the Provisional Certificate. Candidates shall not be permitted to reappear either for CIE in any course or for Semester End Examination (SEE) in laboratory courses (including project Viva-voce) for the purpose of improvement.

12 SUPPLEMENTARY EXAMINATION:

In addition to the Regular End Examinations held at the end of each semester, Supplementary End Examinations will be conducted during the Semester break. A Student can appear for any number of supplementary examinations till he clears all courses which he could not clear in the first attempt. However the maximum stipulated period shall not be relaxed under any circumstances.

13 ADVANCED SUPPLEMENTARY EXAMINATIONS:

Candidates who fail in courses of VII semester can appear for Advanced Supplementary Examination conducted after declaration of the revaluation of the said exam.

14 WITHHOLDING OF RESULTS

If the student has not paid the fees to the college at any stage, or has dues pending due to any reason whatsoever, or if any case of indiscipline is pending, the result of the student may be withheld, and the student will not be allowed to go into the next higher semester. The award or issue of the degree may also be withheld in such cases.

15 MALPRACTICES:

The Principal shall refer the cases of malpractices in Examination to an Enquiry Committee constituted by him. The committee will submit a report on the malpractice allegedly committed by the student to the Principal. The Principal along with the members of the committee is authorized to award a suitable punishment, if the student is found guilty.

Disciplinary action for malpractices/improper conduct in examinations

	Nature of Malpractices/Improper conduct	Punishment
1 (a)	If the candidate possesses or keeps accessible, any paper, note book, programmable calculators, mobile phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in the examination hall but has not made use of (material shall include any marks on the student's body that can be used as an aid in the subject of the examination)	Expulsion from the examination hall and cancellation of the performance in that subject only.
(b)	If the candidate gives assistance or guidance or receives it from any other candidate orally or by any other body language methods or communicates through mobile phones with any candidate or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of the performance in that subject only of all the candidates involved. In case of an outsider, he will be handed over to the police and a case is registered against him.
2	If the candidate has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the subject of the examination (theory or practical) in which the candidate is appearing.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work. He shall not be permitted to appear for the remaining examinations of the subjects of that semester/year. The hall ticket of the candidate is to be cancelled.
3	If the candidate impersonates any other candidate in	The candidate who has impersonated shall be expelled from examination

	connection with the examination.	hall. The candidate is also debarred and forfeits the seat. The performance of the original candidate, who has been impersonated, shall be cancelled in all the subjects of the examination (including practicals and project work) already appeared and shall not be allowed to appear for examinations of the remaining subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the imposter is an outsider, he will be handed over to the police and a case is registered against him.
4	If the candidate smuggles in an answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all other examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
5	If the candidate uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.	Cancellation of the performance in that subject.
6	If the candidate refuses to obey	In case of students of the Institute,

	the orders of the Chief Superintendent/Assistant - Superintendent / any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the officer-in charge or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the officer-in-charge, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which results in damage to or destruction of property in the examination hall or any part of the Institute campus or engages in any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.	they shall be expelled from examination halls and cancellation of their performance in that subject and all other subjects the candidate(s) has (have) already appeared and shall not be permitted to appear for the remaining examinations of the subjects of that semester/year. The candidates also are debarred and forfeit their seats. In case of outsiders, they will be handed over to the police and a police case is registered against them.
7	If the candidate leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all other

		examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
8	If the candidate possesses any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat.
9	If student of the Institute, who is not a candidate for the particular examination or any person not connected with the Institute indulges in any malpractice or improper conduct mentioned in clause 6 to 8.	Student of the Institute: Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work. He shall not be permitted for the remaining examinations of the subjects of that semester/ year. The candidate is also debarred and forfeits the seat. Person(s) who do not belong to the Institute: Will be handed over to police and a police case will be registered against them.
10	If the candidate comes in a drunken condition to the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work. He shall not be permitted for the remaining examinations of the subjects of that semester/year.
11	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	Cancellation of the performance in that subject and all other subjects the candidate has appeared including practical examinations and project work of that semester/year

		examinations.
12	If any malpractice is detected which is not covered in the above clauses 1 to 11, shall be awarded suitable punishment.	

16 AMENDMENTS:

1. The Institute may change or amend the academic regulations, course structure or syllabi at any time, and the changes or amendments made shall be applicable to all students with effect from the dates notified by the College authorities.
2. The Principal shall deal with any academic problem, which is not covered under these rules and regulations, in consultation with the Heads of the Departments in an appropriate manner, and subsequently such actions shall be placed before the academic council for ratification. Any emergency modification of regulation, approved in the Heads of the Departments Meetings, shall be reported to the academic council for ratification.

17 GENERAL:

a) Where ever the words “he”, “him”, “his”, occur in the regulations, they include “she”, “her”, “hers”.

b) The Academic regulations should be read as a whole for the purpose of any interpretation.

c) In case of any doubt or ambiguity in the interpretation of the above rules the decision of the Chairman of the Academic Council is final.

d) The Academic Council reserves the right to revise, amend, change or nullify the Regulations, Schemes of Examinations and/or Syllabi or any other matter depending on the needs of the students, society and industry.

18 CURRICULAR FRAMEWORK FOR HONORS DEGREE PROGRAMME

i. B.Tech. (Hons.) is introduced in order to facilitate the students to choose additionally the specialized courses and build their competence in a specialized area.

ii. Students of a Department/Discipline are eligible to opt for Honors Programme offered by the same Department/Discipline.

iii. A student shall be permitted to register for Honors program at the beginning of V semester subject to a maximum of two additional courses per semester, provided that the student must have acquired 8 CGPA upto the end of IV semester without any history of backlogs. An CGPA of 8 has to be maintained in the subsequent semesters without any backlog in order to keep the Honors registration active.

iv. Students can select the additional and advanced courses from their respective branch in which they are pursuing the degree and get an honors degree in the same. e.g. If a Mechanical Engineering student completes the selected advanced courses from same branch under this scheme, he/she will be awarded B.Tech. (Honors) in Mechanical Engineering.

v. In addition to fulfilling all the requisites of a Regular B.TechProgramme, a student shall earn 20 additional credits to be eligible for the award of B. Tech (Honors) degree. This is in addition to the credits essential for obtaining the Under Graduate Degree in Major Discipline (i.e. 160/121 credits).

vi. Of the 20 additional Credits to be acquired, 16 credits shall be earned by undergoing specified courses listed as pools, with four courses, each carrying 4 credits. The remaining 4 credits must be acquired through two MOOCs, which shall be domain specific, each with 2 credits and with a minimum duration of 8/12 weeks as recommended by the Head of the department concerned.

vii. It is the responsibility of the student to acquire/complete prerequisite before taking the respective course. The courses offered in each pool shall be domain specific courses and advanced courses.

viii. Minimum enrollment required for offering a honors degree is considered as 30% of the class size. If minimum enrolments criteria are not met then the students shall be permitted to register for the equivalent MOOC courses as approved by the concerned Head of the department in consultation with BOS.

ix. Each pool can have theory as well as laboratory courses. If a course comes with a lab component, that component has to be cleared separately. The concerned BoSshall explore the possibility of introducing virtual labs for such courses with lab component.

x. MOOC courses must be of minimum 8 weeks in duration. Attendance will not be monitored for MOOC courses. Students have to acquire a certificate from the agencies approved by the BOS with grading or marks or pass/fail in order to earn 4 credits. If the MOOC course is a pass/fail course without any grades, the grade to be assigned will be as decided by the academic council.

xi. The concerned BOS shall also consider courses listed under professional electives of the respective B. Tech programs for the requirements of B. Tech (Honors). However, a student shall be permitted to choose only those courses that he/she has not studied in any form during the Programme.

xii. If a student drops or is terminated from the Honors program, the additional credits so far earned cannot be converted into free or core electives; they will remain extra. These additional courses will find mention in the transcript (but not in the degree certificate). In such cases, the student may choose between the actual grade or a “pass (P)” grade and also choose to omit the mention of the course as for the following: All the courses done under the dropped Minors will be shown in the transcript. None of the courses done under the dropped Minor will be shown in the transcript.

xiii. In case a student fails to meet the CGPA requirement for Degree with Honors at any point after registration, he/she will be dropped from the list of students eligible for Degree with Honors and they will receive regular B.Tech degree only. However, such students will receive a separate grade sheet mentioning the additional courses completed by them.

xiv. Switching from honors degree to minor degree is not permitted.

xv. Honors must be completed simultaneously with a major degree program. A student cannot earn Honors after he/she has already earned bachelor's degree.

19 CURRICULAR FRAMEWORK FOR MINOR DEGREE PROGRAMME:

i. a) Students who are desirous of pursuing their special interest areas other than the chosen discipline of Engineering may opt for additional courses in minor specialization groups offered by a department other than their parent department. For example, If Mechanical Engineering student selects courses from Civil Engineering under this scheme, he/she will get Major degree of Mechanical Engineering with minor degree of Civil Engineering

   b) Student can also opt for Industry relevant tracks of any branch to obtain the Minor Degree, for example, a B.Tech Mechanical student can opt for the industry relevant tracks like Data Mining track, IOT track, Machine learning track etc.

ii. The BOS concerned shall identify as many tracks as possible in the areas of emerging technologies and industrial relevance / demand. For example, the minor tracks can be the fundamental courses in CSE, ECE, EEE,CE,MEetc or industry tracks such as Artificial Intelligence (AI), Machine Learning (ML), Data Science (DS), Robotics, Electric vehicles, Robotics, VLSI etc.

iii. The list of disciplines/branches eligible to opt for a particular industry relevant minor specialization shall be clearly mentioned by the respective BoS.

iv. There shall be no limit on the number of programs offered under Minor. The Institute can offer minor programs in emerging technologies based on expertise in the respective departments or can explore the possibility of collaborating with the relevant industries/agencies in offering the program.

v. Minimum enrollment required for offering a honors degree is considered as 30% of the class size. If a minimum enrolments criterion is not met, then the students may be permitted to register for the equivalent MOOC courses as approved by the concerned Head of the department in consultation with BoS.

vi. A student shall be permitted to register for Minors program at the beginning of V semester subject to a maximum of two additional courses per semester, provided that the student must have acquired 8 CGPA upto the end of IV semester without any history of backlogs. An CGPA of 8 has to be maintained in the subsequent semesters without any backlog in order to keep the Minors registration active.

vii. A student shall earn additional 20 credits in the specified area to be eligible for the award of B. Tech degree with Minor. This is in addition to the credits essential for obtaining the Under Graduate Degree in Major Discipline (i.e. 160/121 credits).

viii. Out of the 20 Credits, 16 credits shall be earned by undergoing specified courses listed by the concerned BoS along with prerequisites. It is the responsibility of the student to acquire/complete prerequisite before taking the respective course. If a course comes with a lab component, that component has to be cleared separately. A student shall bepermitted to choose only those courses that he/she has not studied in any form during the Programme.

ix. In addition to the 16 credits, students must pursue at least 2 courses through MOOCs. The courses must be of minimum 8 weeks in duration. Attendance will not be monitored for MOOC courses. Student has to acquire a certificate from the agencies approved by the BOS with grading or marks or pass/fail in order to earn 4 credits. If the MOOC course is a pass/fail course without any grades, the grade to be assigned as decided by academic council.

x. Student can opt for the Industry relevant minor specialization as approved by the concerned departmental BoS. Student can opt the courses from Skill Development Corporation (APSSDC) or can opt the courses from an external agency recommended and approved by concerned BOS and should produce course completion certificate. The Board of studies of the concerned discipline of Engineering shall review such courses being offered by eligible external agencies and prepare a fresh list every year incorporating latest skills based on industrial demand.

xi. A committee shall be formed at the level of College/department to evaluate the grades/marks given by external agencies to a student which are approved by concerned BoS. Upon completion of courses the departmental committee should convert the obtained grades/marks to the maximum marks assigned to that course. The controller of examinations can take a decision on such conversions and may give appropriate grades.

xii. If a student drops (or terminated) from the Minor program, they cannot convert the earned credits into free or core electives; they will remain extra. These additional courses will find mention in the transcript (but not in the degree certificate). In such cases, the student may choose between the actual grade or a “pass (P)” grade and also choose to omit the mention of the course as for the following: All the courses done under the dropped Minors will be shown in the transcript. None of the courses done under the dropped Minor will be shown in the transcript.

xiii. In case a student fails to meet the CGPA requirement for B.Tech degree with Minor at any point after registration, he/she will be dropped from the list of students eligible for degree with Minors and they will receive B. Tech degree only. However, such students will receive a separate grade sheet mentioning the additional courses completed by them.

xiv. Switching from minor degree to honor degree is not permitted.

xv. Minor must be completed simultaneously with a major degree program. A student cannot earn the Minor after he/she has already earned bachelor's degree.

Annexure-III

SRI VASAVI ENGINEERING COLLEGE (AUTONOMOUS)

(Sponsored by Sri Vasavi Educational Society)
(Approved by AICTE, New Delhi & Permanently affiliated to JNTUK, Kakinada)
(Accredited by NAAC with 'A' Grade & NBA,)
Pedatadepalli, **TADEPALLIGUDEM–534 101.**W.G.Dist**. (A.P)**
Department of Electrical & Electronics Engineering

Date: 02-01-2021

The fourth meeting of Board of Studies in Department of Electrical and Electronics Engineering was held at 11.30 AM on 30-12-2020 though online mode using Zoom tool (Meeting ID: 84243075482).

The following members have attended the meeting.

S.No.	**Name**	**Designation**	**Role**
1.	Dr. Sudha Rani Donepudi	Associate Professor, Head, Dept. of EEE, SVEC, Pedatadepalli.	Chairperson
2.	Dr. R. SrinivasaRao	Professor, Dept. of EEE, UCEK, JNTUK, Kakinada	Subject Expert Nominated By V.C.
3.	Dr. M. Sydulu	Professor, Dept. of EE, NITW, Warangal	Subject Expert Nominated By A.C.
4.	Dr. Y.P. Obulesu	Professor, School of EE, VIT, Vellore	Subject Expert Nominated By A.C.
5.	Er. B.N.V.R.C. Suresh Kumar	Retired AGM, PGCI, Hyderabad	Industry Expert Nominated By A.C
6.	Er. Ch. Vinay Kumar	Assistant Engineer, EHT Lines, APTRANSCO, Eluru.	Alumni

7.	Dr. Ch. Rambabu	Professor	Member
8.	Mr. U. Chandra Rao	Sr. Asst. Professor	Member
9.	Mr. Ch. V.S.R. Gopala Krishna	Sr. Asst. Professor	Member
10.	Mr. N. Sri Harish	Asst. Professor	Member
11.	Mr. K. Ramesh Babu	Asst. Professor	Member
12.	Mr. P.S.V.N. Sudhakar	Asst. Professor	Member
13.	Mr. K. Suresh	Asst. Professor	Member
14.	Mr. V. Rama Narayana	Asst. Professor	Member
15.	Mr. G. Chandra Babu	Asst. Professor	Member
16.	Mr. G. MadhuSagarBabu	Asst. Professor	Member
17.	Mr. P.K.S. Sarvesh	Asst. Professor	Member
18.	Mr. K. Venkata Reddy	Asst. Professor	Member
19.	Mr. G. Saveen	Asst. Professor	Member
20.	Mr. N. Madhusudhan Reddy	Asst. Professor	Member
21.	Mr. K. Amarendra	Asst. Professor	Member
22.	Mr. V.S. Aditya	Asst. Professor	Member
23.	Mr. S. Krishna	Asst. Professor	Member
24.	Mr. A.V.V.N. Phanindra	Asst. Professor	Member
25.	Mr. Pradeep V	Asst. Professor	Member
26.	Mr. P. DattaSai	Asst. Professor	Member
27.	Mr. Ch. Srinivas	Asst. Professor	Member
28.	Ms. I. Meghana Krishna Durga	Asst. Professor	Member

<u>The following are the minutes of the meeting</u>

Item No. 1: Welcome note by the Chairperson BOS

The HOD extended a formal welcome and introduced the members.

Item No. 2: Review of course structure for I & II semesters of B. Tech under V20 Regulation.

Reviewed the course structure of I& II semesters for UG (B.Tech-EEE) Programme of V20 Regulation.

The details of the course structure for I & II semesters of UG (B.Tech- EEE) Programme under V20 Regulation are given in Annexure-III(a)

Item No. 3: Approval of syllabi for the courses offered by the department in I& II semesters of B. Tech under V20 Regulation.

Approved the syllabi for the courses offered by department in I& II B. Tech under V20 Regulation.

The syllabi for the courses offered by department in I & II B. Tech Programme of under V20 Regulation is attached in Annexure-III(b).

Dr. Sudha Rani Donepudi **(BOS Chairperson)**

Annexure-III(a)

Approved Course Structure for B.Tech-EEE Programme under V20 Regulation

Annexure-III(b)

Syllabi for the courses offered by EEE Dept. in I& II semesters of B. Tech under V20 Regulation.

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	**V20EET01**
Name of the Course	**Basic Electrical Engineering**					
Branches	**Common to ECE & ECT**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
C204.1	Understand and compute electrical quantities in DC excited circuits	K3
C204.2	Understand and compute electrical quantities in AC excited circuits	K3
C204.3	Study the working principles of DC machines	K2
C204.4	Study the working principles of transformers	K2
C204.5	Understand construction details and explain the working principles of AC machines	K2
C204.6	Understand the operation of electrical systems	K2

Unit 1 : DC Circuits

Electrical circuit elements (R, L and C), Kirchhoff's Laws, Mesh analysis of simple circuits with dc excitation.Superposition, Thevenin's, and Maximum Power Transfer Theorems, Simple problems.

Unit 2: AC Circuits

Basic Definitions, Peak and RMS values, Types of Powers, Power Factor.Analysis of Single-Phase AC series circuits consisting of RL, RC, RLC combinations, Simple problems.

Unit 3: DC Machines

Construction and operation of DC generator-EMF equation - Types of DC motors: shunt and series motors – applications – Speed control of DC shunt motor: field and armature controls, Simple Problems.

Unit 4: Transformers

Classification, Operation of ideal and practical transformers, EMF equation, losses in transformer, efficiency, OC and SC Test, Simple problems.

Unit 5: AC Machines

Construction and operation of a three-phase induction motor, Slip, torque equation, torque-slip characteristics. Construction and operation of Synchronous Generator, Simple problems.

Unit 6: Overview of Electrical System

Introduction-Single line representation of Electrical Power System–Layout and operation of Hydro, Solar and Wind Power Plants.

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	-	-	3	1.5	**V20EEL01**
Name of the Course	**Basic Electrical Engineering Lab**					
Branches	**Common to ECE & ECT**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
C208.1	Determine the load currents by applying various laws and theorems	K3
C208.2	Find the maximum power delivered to the load	K3
C208.3	Analyze the steady state performance of series circuits	K4
C208.4	Plot the speed control characteristics of DC shunt motor	K3
C208.5	Find the losses and efficiency of a transformer	K3
C208.6	Calculate the energy bill for Domestic loads	K3

Any 10 of the following experiments are to be conducted

1. Verification of Kirchhoff's Laws.
2. Verification of Superposition theorem.
3. Verification of Thevenin's theorem.
4. Verification of Maximum Power Transfer theorem.
5. Analysis of Series RL and RC circuits.
6. Analysis of Series RLC circuit.
7. Speed control of D.C. Shunt motor by Armature control method.
8. Speed control of D.C. Shunt motor by field flux control method.
9. Brake test on DC shunt motor. Determination of performance characteristics.
10. Load Test on Single-Phase transformer
11. OC and SC test on Single-phase transformer (Measurement of Losses)
12. Energy Bill calculation for Domestic loads.

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	**V20EET02**
Name of the Course	**Basic Electrical & Electronics Engineering**					
Branches	**Common to ME & CE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
C113.1	Understand and compute electrical quantities in DC excited circuits	K3
C113.2	Understand and compute electrical quantities in AC excited circuits	K3
C113.3	Study the working principles of DC machines	K2
C113.4	Study the working principles of transformers	K2
C113.5	Understand construction details and explain the working principles of AC machines	K2
C113.6	Understand the basic operation of uninterrupted power supplies	K2

Unit 1 : DC Circuits

Electrical circuit elements (R, L and C), Kirchhoff's Laws, Mesh analysis of simple circuits with dc excitation.Superposition, Thevenin's, and Maximum Power Transfer Theorems, Simple problems.

Unit 2: AC Circuits

Basic Definitions, Peak and RMS values, Types of Powers, Power Factor.Analysis of Single-Phase AC series circuits consisting of RL, RC, RLC combinations, Simple problems.

Unit 3: DC Machines

Construction and operation of DC generator -EMF equation - Types of DC motors: shunt and series motors – applications – Speed control of DC shunt motor: field and armature controls, Simple Problems.

Unit 4: Transformers

Classification, Operation of ideal and practical transformers, EMF equation, losses in transformer, efficiency, OC and SC Test, Simple problems.

Unit 5: AC Machines

Construction and operation of a three-phase induction motor, Slip, torque equation, torque-slip characteristics. Construction and operation of Synchronous Generator, Simple problems.

Unit 6: Uninterrupted Power Supplies

Introduction –Basic operation of Rectifier, Inverter and UPS -On-line UPS, Off- line UPS and Line interactive UPS, Comparison between UPS and Inverter, Basic operation of SMPS.

Text Books

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	-	-	3	1.5	**V20EEL02**
Name of the Course	**Basic Electrical & Electronics Engineering Lab**					
Branches	**Common to CE & ME**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
C115.1	Determine the load currents by applying various laws and theorems	K3
C115.2	Analyze the steady state performance of series circuits	K3
C115.3	Plot the speed control characteristics of DC shunt motor	K3
C115.4	Find the losses and efficiency of a transformer	K3
C115.5	Calculate the energy bill for Domestic loads	K3
C115.6	Plot characteristics of full wave rectifier	K3

Any 10 of the following experiments are to be conducted

1. Verification of Kirchhoff's Laws.
2. Verification of Superposition theorem.
3. Verification of Thevenin's theorem.
4. Verification of Maximum Power Transfer theorem.
5. Analysis of Series RL and RC circuits.
6. Analysis of Series RLC circuit.
7. Speed control of D.C. Shunt motor by Armature control method.
8. Speed control of D.C. Shunt motor by field flux control method.
9. Brake test on DC shunt motor. Determination of performance characteristics.
10. Load Test on Single-Phase transformer
11. OC and SC test on Single-phase transformer (Measurement of Losses)
12. Energy Bill calculation for Domestic loads.
13. Full wave rectifier with and without filters.

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	**V20EET03**
Name of the Course	**Electrical Circuit Analysis-I**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
C112.1	Apply various network reduction techniques for solving electrical DC circuits.	K3
C112.2	Calculate different parameters of single phase alternating quantities.	K3
C112.3	Understand the concepts of different powers and apply network reduction techniques for solving electrical AC circuits.	K3
C112.4	Determine various parameters in series and parallel resonant circuits.	K3
C112.5	Apply the network theorems for solving electrical DC and AC circuits.	K3
C112.6	Compute electrical parameters for 3-phase balanced systems	K3

Unit-I: Introduction to Electrical Circuits

Classification of network elements, Basic terminology, Kirchhoff's laws; RLC Parameters - series and parallel combinations; Energy Sources; Source transformation; Y-Δ and Δ-Y transformation; Mesh analysis and Nodal analysis – Numerical problems

Unit-II: Single Phase A.C Systems - I

Basic terminology associated with alternating quantity- RMS value, Average value, form factor and peak factor; phase angle and phase difference –lagging, leading networks; steady state analysis of series and parallel combinations of R, L and C circuits, numerical problems.

Unit- III: Single Phase A.C Systems - II

Types of Powers; Power Factor and its significance; Power triangle, Mesh analysis and Nodal analysis of AC networks; Numerical problems.

Unit-IV: Resonance

Concept of Resonance - Series and parallel resonance, Bandwidth, quasi factor, selectivity; Numerical problems; Introduction to locus diagrams; Concept of Duality and Dual networks.

Unit-V: Magnetic Circuits

Basic definitions of MMF, Flux and Reluctance; Analogy between electrical and magnetic circuits; Analysis of series, parallel and composite magnetic circuits; Faraday's laws of electromagnetic induction; Concepts of self-inductance, mutual inductance and coefficient of coupling; Concept of Dot Convention and coupled coils.

Unit-VI: Balanced Three phase circuits

Generation of three phase voltages; Advantages of three phase system; Inter connection of three phase windings: Star and delta connection, Phase sequence, Relation between line, phase voltages and currents in balanced - Star and delta connected load.

Semester	II SEM	L	T	P	C	COURSE CODE
Regulation	V20	-	-	3	1.5	**V20EEL03**
Name of the Course	**Electrical Engineering Workshop**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
C114.1	Design different wiring circuits	K4
C114.2	Use electrical parameter measuring instruments	K3
C114.3	Construct the circuits on PCB board	K4
C114.4	Test the domestic appliances	K4
C114.5	Identify the parts of the Machine	K3
C114.6	Analyze electrical circuits through simulation	K4

Any 12 of the following experiments are to be conducted

1. Wiring tools and Accessories
2. Electrical Wiring Joints
3. Lamp Circuits
4. Soldering Practice
5. AC and DC circuits
6. Resistance Measurement
7. Capacitance Measurement
8. Battery voltage measurement
9. Special Lamp Connections
10. Wiring Practice for Power Loads
11. Motor Connections
12. Practice on Motor winding
13. Earthing
14. Testing and repair of Domestic appliances
15. Verification of Kirchoff's Laws.
16. Measurement of Choke Coil Parameters.
17. Simulation of series RLC circuit.

SRI VASAVI ENGINEERING COLLEGE (AUTONOMOUS)

(Sponsored by Sri Vasavi Educational Society)
(Approved by AICTE, New Delhi & Permanently affiliated to JNTUK, Kakinada)
(Accredited by NAAC with 'A' Grade & NBA,)
Pedatadepalli, **TADEPALLIGUDEM–534 101.**W.G.Dist**. (A.P)**
Department of Mechanical Engineering

Date: 30-12-2020

Fourth meeting of BOS in Mechanical Engineering department was held on 30/12/2020 at 10.00 AM in online mode through Zoom platform.

The following members were present:

S. No	Name of the BOS Members
1.	Dr.N.MohanRao, Professor & Director (IIIPT & SDC) JNTUK, Kakinada
2.	Dr. R.V. Chalam, Professor, NIT,Warangal
3.	Dr. A. Krishnaiah, Professor, Osmania University, Hyderabad
4.	Sri S.S. SubramanyaSastry, Director - Projects, Renprotech Solutions Pvt. Ltd., Bangalore.
5.	Sri A.Sai Krishna, Alumni, Maruthi design and engg. Pvt.ltd ,Bangalore
6.	Dr. G.V.N.S.R. RatnakaraRao, Professor &Principal, SVEC
7.	Dr. M.V. Ramesh, Chairman & HOD, SVEC
8.	All the BOS internal members

Minutes of meeting of 4th BOS held on 30.12.2020

Chairman welcomed all the BOS members and introduced to all the BOS internal members.

Item No. 1: Review and approval of course structure of I & II semesters of B. Tech (ME) under V20 Regulations.

- The approved course structure is attached in **Annexure-IV(a)**

Item No. 2: Approval of syllabi for the Mechanical Engineering courses offered in I & II semesters B. Tech under V20 Regulation.

- The approved syllabi for the courses are attached in **Annexure-IV(b).**

Chairman (Head –ME)

Head of the Department
Mechanical Engineering
Sri Vasavi Engineering College
TADEPALLIGUDEM-53410

Annexure – IV(a)

Course Structure of Mechanical Engineering – V20 Regulation
(For 2020 – 2021 Admitted Batch)
I SEMESTER

S.No	Course Code	Course Title	Hours per week			Credits
			L	T	P	
1	V20MAT01	Linear Algebra and Differential Equations	3	0	0	3

Annexure – IV(b)

Syllabi for the Mechanical Engineering courses offered in I & II semesters B. Tech under V20 Regulation

Semester	**I/ II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	1	-	4	3	**V20MEL01**
Name of the Course	**ENGINEERING GRAPHICS**					
Branches	**Common to All Branches**					

Course Outcomes: After successful completion of the course, the student will be able to:

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Understand the basic commands in CAD Software and draw the conic sections	K3
CO2	Construct different types of scales and special curves	K3
CO3	Draw the projections of the points and lines	K3
CO4	Develop the projections of planes and surfaces of regular solids	K3
CO5	Draw the Isometric projections and conversion of views	K3

PART – A

UNIT1:

Introduction to CAD Software: CAD Software Mechanical Desktop, Draw, Modify, Dimension tool bars, Annotations, Layers, ISI conventions in drawing.

CONIC SECTIONS – Ellipse, Parabola and Hyperbola

UNIT 2: SPECIAL CURVES & SCALES: Special Curves – cycloid, epicycloids, hypocycloid; Scales – Plain, Diagonal and Vernier Scales.

UNIT 3: ORTHOGRAPHIC PROJECTIONS: Introduction to Orthographic Projections- Projections of Points, Projection of lines inclined to both the planes.

UNIT 4: PROJECTION OF PLANES: Inclined to both the Planes.

PROJECTION OF REGULAR SOLIDS: Prisms, Pyramids, Cones and Cylinders with the axis inclined to one of the planes, Development of Surfaces of regular solids.

PART – B

UNIT 5: ISOMETRIC PROJECTIONS: Principles of Isometric projection – Isometric Scale, Isometric Views, Conventions; Isometric Views of lines, Planes, Simple solids.

UNIT 6: Conversion of Isometric Views to Orthographic Views and Vice-versa.

Text Books:

1. Engineering Drawing by N.D. Bhat, Chariot Publications, 53rd Edition-2014
2. Engineering Drawing by Agarwal&Agarwal, Tata McGraw Hill Publishers, 2nd Edition-2016

Reference Books:

1. Engineering Drawing by K.L.Narayana& P. Kannaiah, Scitech Publishers, 2nd Edition-2014
2. Engineering Graphics for Degree by K.C. John, PHI Publishers-2014
3. Engineering Graphics by PI Varghese, McGrawHill Publishers-2013
4. Engineering Drawing AutoCad – K Venugopal, V. Prabhu Raja, New Age, 5th Edition-2015

Course Evaluation:
Continuous Internal Evaluation (30M):
1. Day to Day Evaluation (20M): CAD Practice (Minimum of 20 Exercises)
2. Mid Examination (10M):

MID-I (10M) - Answer all 3 questions, each question carries 10 Marks with a total of 30M and scaled down to 10M.

i. Question -1 ---CO1
ii. Question -2 ---CO2
iii. Question -3 ---CO3

MID-II (10M) - Answer all 3 questions, each question carries 10 Marks with a total of 30M and scaled down to 10M.

i. Question -1 ---CO4
ii. Question -2 ---CO5
iii. Question -3 ---CO5

10Marks will be allocated as, 80% of best and 20% of least of the mid examinations.

Semester External Examination (70M):
1. Part A (48M): Answer four questions (Each question carry 12 marks)
2. Part B (22M) : Answer any one question

Part-A:

i. Question-1 or Question-2 --- CO1 (12M)
ii. Question-3 or Question-4 --- CO2 (12M)
iii. Question-5 or Question-6 --- CO3 (12M)
iv. Question-7 or Question-8 --- CO4 (12M)

PART-B:

i. Question-9 or Question-10 --- CO5 (22M)

Semester	**I/II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	**V20MET01**
Name of the Course	**ENGINEERING MECHANICS**					
Branches	**Common to CE & ME**					

Course Outcomes: After successful completion of the course, the student will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Compute the resultant force of a given system of forces and understanding of concepts on friction.	K3
CO2	Calculate the forces in the different types of plane trusses	K3
CO3	Find the Centroid, Center of Gravity and Moment of Inertia for plane figures and bodies	K3
CO4	Illustrate the different types of plane motions of a particle to compute its velocity, acceleration and force.	K3
CO5	Illustrate the concept of Work and Energy	K3
CO6	Apply the principle of Virtual Work to stability of equilibrium of Ladder	K3

Unit I: Introduction to Engineering Mechanics – Basic Concepts.
Systems of Forces: Coplanar Concurrent Forces – Resultant – Moment of Force and its Application – Couples and Resultant of Force Systems.
Equilibrium of Systems of Forces: Free Body Diagrams, Equations of Equilibrium of Coplanar Systems for concurrent forces. Lami's Theorem, Graphical method for the equilibrium of coplanar forces, Converse of the law of Triangle of forces, converse of the law of polygon of forces condition of equilibrium.
Friction : Introduction, Limiting friction and impending friction, ladder and wedge friction.

Unit II: Analysis of Trusses by Method of Joints: Types of Trusses - Assumptions for forces in members of a perfect truss, Force table, Cantilever Trusses, Structures with one end hinged and the other freely supported on rollers carrying horizontal or inclined loads.

Unit III: Centroid: Centroid of simple figures (from basic principles) – Centroid of Composite Figures Centre of Gravity: Centre of gravity body (from basic principles), centre of gravity of composite bodies, Pappus theorems.
Moment of inertia of plane figures: I-section, T-section, Channel section, Z-section and L-section.

Unit IV: Kinematics: Rectilinear and Curvilinear motions – Velocity and Acceleration – Motion of Rigid Body – Types and their Analysis in Planar Motion.

Kinetics: Analysis as a Particle and Analysis as a Rigid Body in Translation – Central Force Motion – Equations of Plane Motion – Fixed Axis Rotation – Rolling Bodies.

Unit V: Work – Energy Method: Equations for Translation, Work-Energy Applications to Particle Motion, Connected System-Fixed Axis Rotation and Plane Motion. Impulse momentum method.

Unit VI: Principle of Virtual Work: Principle of virtual work, advantages of principle of virtual work, principle of virtual applied to stability of equilibrium. Application of principle of virtual work limited to ladder problems.

Text Books:

1. Engineering Mechanics by A.K.Tayal ,Umesh Publications.
2. Engineering Mechanics, Fedinand . L. Singer, Harper – Collins.
3. Engineering Mechanics, S.S Bhavikatti, K. G. Rajashekarappa. New Age International publication.

Reference Books:

1. Engg.Mechanics - S.Timoshenko&D.H.Young., 4th Edn - , McGraw Hill publications.
2. Theory & Problems of engineering mechanics, statics & dynamics – E.W.Nelson, C.L.Best& W.G. McLean, 5th Edn – Schaum’s outline series - McGraw Hill Publ.
3. Meriam J. L., Kraige L. G., “Engineering Mechanics – Dynamics”, Wiley Student Edition, (Sixth Edition) reprint 2011.
4. Beer F. P., Johnston E. R., “Vector Mechanics for Engineers Statics and Dynamics”, Tata, McGraw Hill Publishing company Ltd., New Delhi (Eighth Edition) reprint 2009
5. Shames Irving H., “Engineering Mechanics”, Prentice Hall, New Delhi (Fourth edition) reprint 2009.

Semester	**I/II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	1	-	4	3	**V20MEL02**
Name of the Course	**ENGINEERING WORKSHOP**					
Branches	**Common to All Branches**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Prepare different models in the carpentry trade and understand basic concepts of carpentry	K3
CO2	Develop various basic prototypes in the trade of Tin smithy and understand basic concepts of Tin smithy.	K3
CO3	Prepare various basic prototypes in the trade of fitting and understand basic concepts of fitting.	K3
CO4	Prepare different models in the Black smithy and understand basic concepts of Black smithy.	K3
CO5	Develop various basic House Wiring techniques, Electrical wiring circuits	K3
CO6	Develop various basic prototype models in Welding and Foundry shop.	K3

Module-I
General safety Considerations during operation of:
Bench Tools, Hammers, Screw Drivers, Punches, Chisels, Scrapers, Scribers, Files, Pliers and Cutters, Wrenches, Hacksaw, Bench Vise, Hand drill, Taps and Dies, Hand Shears, Rules, Tapes and Squares, Soldering Iron, Rivets.
Hand Working Operations:
Sawing, Filing, Threading, Scribing, Shearing, Soldering, Sharpening of hand tools.
Measuring and Gauging:
Calipers, depth Gauge, Feeler Gauge, Micrometers, Vernier Calipers, Vernier Height Gauge, Snap Gauge, Hole Gauge, Bevel Protractor, Dial Indicator, Gauge Blocks and Surface Plate

Module-II
Carpentry:
Introduction, Carpentry Tools, Marking and Layout, Operations.
Sheet Metal Works :
Introduction, Sheet Metal Tools, Marking and Layout, Operations – Bending, Cutting, Rolling.
Fitting :
Introduction, Fitting Tools, Marking and Layout, Operations.

Forging :
Introduction , Forging Tools ,Operations – Upsetting, Drawing, Cutting, Bending, Punching ,Forging Presses and Hammers.

House wiring:
Introduction, House wiring Tools and accessories, Connections, Circuit diagrams.

Metal Joining:
Safety Considerations, Introduction, Soldering, Brazing, Welding – Gas Welding, Arc Welding,

Foundry:
Introduction, Pattern Making, Foundry Tools, Core Making, Melting Furnace – Cupola, Sand Casting Process.

Module-III
Note: At least two exercises to be done from each.

Carpentry
1. T-Lap Joint
2. Cross Lap Joint
3. Dovetail Joint
4. Mortise and Tenon Joint

Tin Smithy
1. Taper Tray
2. Square Box without lid
3. Open Scoop
4. Funnel

Fitting shop
1. V- Fit
2. Square Fit
3. Half Round Fit
4. Dovetail Fit

Black smithy
1. Round rod to Square
2. S-Hook
3. Round Rod to Flat Ring
4. Round Rod to Square headed bolt

House wiring
1. Parallel / Series Connection of three bulbs
2. Stair Case wiring
3. Florescent Lamp Fitting
4. Measurement of Earth Resistance

Welding shop (Arc welding)

1. Butt Joint
2. Lap Joint

Foundry Practice

Preparation of sand mould using split piece pattern and cast the component.

Text Books:

1. A Course in Work shop Technology, Vol.1, Raghuwanshi,DhanpatRai&Co.
2. Elements of Workshop Technology, Vol.1, S.K.HajraChoudary, Asia Publishing House.
3. Production Technology, Vol.1, R.K.Jain and S.C Gupta, Khanna Publications.
4. Workshop Practice Manual,K.Venkata Reddy, B.S.Publications.
5. Workshop Manual, P.Kannaiah, KL.Narayana, Scitech Publications.

Dt: 28-12-2020

Fourth meeting of BOS in ECE department along with external members was held on 28/12/2020 at 2.00 PM in online mode through Zoom meeting app with the link https://us02web.zoom.us/j/83813811675.

The following members are present:

S. No	**Name of the BOS Members**
1.	Dr. I. ShanthiPrabha, Prof, JNTUK,Kakinada
2.	Prof. NVSN. Sarma, Director, IIIT, Trichy
3.	Dr. M. VenugopalaRao, Professor, KL University, Vijayawada
4.	Sri S.Siva Kumar, Senior Engineer, Qualcomm, Bangalore.
5.	Dr. GVNSR. RatnakarRao, Principal, Sri Vasavi Engineering College
6.	Dr. E. KusumaKumari, Chairman & HOD, SVEC
7.	All the Internal BOS members

The following members are absent:

1. Dr.J.V.R.Sagar, Director ANURAG, Hyderbad.

Minutes of 4th BOS Meeting

Item No 1: **Welcome Note by the Chairperson BOS**.

The Chairperson welcomed all the BOS members and introduced to all the BOS- internal members.

Item No.2: Review and approval of course structure of I & II semesters of B. Tech (ECE & ECT) under V20 Regulations.

Reviewed the Course structure of I & II Semesters for UG (B. Tech – ECE & ECT) Programme of V 20 Regulation and the approved course structure is attached in **Annexure-V(a).**

Item No.3: Approval of syllabi for the courses offered by the department in I& II semesters B. Tech under V20 Regulation.

Members Approved the syllabi for the courses by the department in I & II semesters B. Tech under V20 Regulation and details are attached in **Annexure-V(b).**

E. Kumari

CHAIRPERSON OF BOS

Vision

- To develop the department into a centre of excellence and produce high quality, technically competent and responsible Electronics and communication engineers

Mission

- To create a learner centric environment that promotes the intellectual growth of the students..
- To develop linkages with R & D organizations and educational institutions for excellence in teaching, learning and consultancy practices..
- To build the student community with high ethical standards.

ANNEXURE- V(b)

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	-	-	3	1.5	**V20ECT01**
Name of the Course	**Switching Theory and Logic Design**					
Branches	**Common to EEE, ECE, ECT, CSE & CST**					

Course Outcomes (CO's) (Along with Knowledge Level (K)):

After going through this course the student will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO-1	**Explain** the different types of number Systems, number conversions, codes and logic Gates.	K_2
CO-2	**Apply** the concepts of Boolean algebra and use the knowledge of K-maps and tabular method for minimization of Boolean expressions.	K_3
CO -3	**Construct** the higher order modules from their lower order structures of various combinational logic circuits.	K_3
CO-4	**Explain** the concept of various flip flops	K_2
CO-5	**Develop** various sequential circuits like registers, counters by using basic flip flops.	K_3
CO-6	**Develop** the various Finite State Machine Models	K_3

Unit – I: **Number Systems & Codes:**

i) Representation of numbers of different radix, conversation from one radix to another radix, r-1's compliments and r's compliments of signed members, problem solving. ii) 4 bit codes, BCD, Excess-3, 2421, 84-2-1 9's compliment code etc., iii) Logic operations and error detection & correction codes; Basic logic operations -NOT, OR, AND, Universal building blocks, EX-OR, EX-NOR - Gates, Gray code, error detection, error correction codes (parity checking, even parity, odd parity, Hamming code).

Unit – II :**Minimization Techniques**

Boolean theorems, principle of complementation & duality, De-morgan theorems, minimization of logic functions using Boolean theorems, Standard SOP and POS, Forms, NAND-NAND and NOR-NOR realizations, minimization of switching functions using K-Map up to 5 variables, tabular minimization, problem solving (code-converters using K-Map etc..).

Unit – III :**Combinational Logic Circuits Design**

Design of Half adder, full adder, half subtractor, full subtractor, applications of full adders, 4-bit binary subtractor, adder-subtractor circuit, BCD adder circuit, Excess 3 adder circuit, look-a-head adder circuit, Design of decoder, demultiplexer, 7 segment decoder, higher order demultiplexing, encoder, multiplexer, higher order multiplexing, realization of Boolean functions using decoders and multiplexers, priority encoder, 4-bit digital comparator.

Unit – IV :**Sequential Circuits –I**

Classification of sequential circuits (synchronous and asynchronous); basic flip-flops, truth tables and excitation tables (Nand RS latch, nor RS latch, RS flip-flop, JK flip-flop, T flip-flop, D flip-flop with reset and clear terminals). Asynchronous Inputs (Preset and Clear), Race around condition, Master Slave JK Flip flop, Conversion from one flip-flop to another flip-flop.

Unit – V :**Sequential Circuits -II**

Design of ripple counters, design of synchronous counters, Johnson counter, ring counter. Design of registers - Buffer register, control buffer register, shift register, bi-directional shift register, universal shift register.

Unit – VI :**Finite State Machines**

Finite State machine; Analysis of Clocked sequential circuits, state Diagrams, state Tables, Reduction of State Tables and State assignments, design Procedures. Realization of Circuits using various Flip Flops.Meelayto Moore Conversion and Vice-versa.

Text Books

1. Digital Design by M. Morris Mano, Michael D. Ciletti, PEA.
2. Switching & Finite Automata Theory, 2nd Edition, ZviKohavi, TMH,1978
3. Fundamentals of Logic Design, 5/e Roth, Cengage.

Reference Books

1. Modern Digital Electronics by RP Jain, TMH
2. An Engineering Approach to Digital Design, William I. Fletcher, Pearson edition.
3. Switching Theory and Logic Design by A. Anand Kumar

SRI VASAVI ENGINEERING COLLEGE (AUTONOMOUS)

(Sponsored by Sri Vasavi Educational Society)
(Approved by AICTE, New Delhi & Permanently affiliated to JNTUK, Kakinada)
(Accredited by NAAC with 'A' Grade & NBA,)
Pedatadepalli, **TADEPALLIGUDEM–534 101.**W.G.Dist**. (A.P)**
Department of Computer Science & Engineering

Dt: 29.12.2020

The fourth meeting of Board of Studies of the Department of Computer Science and Engineering was held at 11.30 AM on 31-05-2020 through online mode using,

https://us02web.zoom.us/j/86038326979

The following members attended the meeting:

S.No.	Name of the Member	Designation	Role
1.	Dr. D Jaya Kumari	Professor, HoD-CSE, SVEC	Chairperson
2.	Dr.Krishna Mohan Ankala	Professor, UCEK, Kakinada	University Nominee
3.	Dr. R.B.V. Subramanyam	Professor, Department of CSE, NIT Warangal	Academic Expert
4.	Sri. SrinivasaRajuVuppalapati	Senior Consultant, MSR IT Services LLP, Hitech City, Hyderabad.	Industry Expert
5.	Mr.EEdalaRambabu	microfocus, Bangalore	Alumni
6.	Dr. V. VenkateswaraRao	Professor	Member
7.	Dr. G Loshma	Associate Professor	Member
8.	Ch. Raja Ramesh	Associate Professor	Member
9.	Dr. V S Naresh	Associate Professor	Member
10.	Dr.K. ShirinBhanu	Associate Professor	Member
11.	A. Leelavathi	Assistant Professor	Member
12.	R. LeelaPhani Kumar	Assistant Professor	Member
13.	G. Nataraj	Assistant Professor	Member
14.	B.SriRamya	Assistant Professor	Member
15.	G.Sriram Ganesh	Assistant Professor	Member
16.	N.V.Murali Krishna Raja	Assistant Professor	Member
17.	N. Hiranmayee	Assistant Professor	Member
18.	Y.DivyaVani	Assistant Professor	Member
19.	M NageswaraRao	Assistant Professor	Member
20.	B Kiran Kumar	Assistant Professor	Member
21.	Y. Ravi Raju	Assistant Professor	Member

22.	D.S L Manikanteswari	Assistant Professor	Member
23.	M. Anantha Lakshmi	Assistant Professor	Member
24.	M. Satyanarayana Reddy	Assistant Professor	Member
25.	J.N. Chandra Sekhar	Assistant Professor	Member
26.	P. Bhavani Shankar	Assistant Professor	Member
27.	David Raju. K	Assistant Professor	Member
28.	P Rajesh	Assistant Professor	Member
29.	P Suneetha	Assistant Professor	Member
30.	P Laxmikanth	Assistant Professor	Member
31.	K Satyanarayana	Assistant Professor	Member
32.	M SreeRadhaMangamani	Assistant Professor	Member
33.	S K Shabuddin	Assistant Professor	Member
34.	G RamanjaneyaRaju	Assistant Professor	Member
35.	G V Lakshmi Narayana	Assistant Professor	Member
36.	A NageswaraRao	Assistant Professor	Member
37.	Mr. L Balaji	Lecturer	Member

The following members are absent:

1. Prof. S.PallamSetty, Prof. Computer Science and Systems Engineering, AU College of Engineering.

The following are the Minutes of the Meeting

Item No.1: Welcome note by the Chairman BOS.

The HOD extended a formal welcome and introduced the members.

Item No.2: Review & Approval of the Course Structure for I and II SEM -B.Tech (CSE) and B.Tech (CST) Programme under V20 Regulation.

Reviewed the Course Structure of I& II semesters for B.Tech (CSE) and B.Tech (CST) Programme of V20 Regulation**.** The approved Syllabus is given in **Annexure-VI(a).**

Item No.3: Approval of Syllabi for the proposed courses offered in B.Tech I and II SEM by the CSE Department under V20 Regulation.

Approved the syllabi for the courses offered in B.Tech I & II semesters by the CSE Department of V20 Regulation. The approved Syllabus is given in **Annexure-VI(b).**

Dr.D Jaya Kumari

Chairperson of BOS

Annexure-VI(a)

COURSE STRUCTURE OF FIRST YEAR B.TECH(CSE & CST)

I SEMESTER

S.No.	Course Code	Course Title	Hours per week			Credits
			L	T	P	
1	V20MAT01	Linear Algebra and Differential Equations	3	-	-	3
2	V20CHT01	Engineering Chemistry	3	-	-	3
3	V20ENT01	English for Professional Enhancement	3	-	-	3
4	V20MEL02	Engineering Workshop	**1**	-	4	**3**
5	V20CST01	Programming in 'C' for problem Solving	3	-	-	3
6	V20ENL01	Hone Your Communications Skills Lab-I	-	-	3	1.5
7	V20CHL01	Engineering Chemistry Lab	-	-	3	1.5
8	V20CSL01	Programming Lab in 'C' for problem Solving	-	-	3	1.5

Total Contact Hours: 26 Total Credits: 19.5

II SEMESTER

S.No.	Course Code	Course Title	Hours per week			Credits
			L	T	P	
1	V20MAT02	Numerical Methods and Vector Calculus	3	-	-	3
2	V20PHT01	Engineering Physics	3	-	-	3
3	V20ECT01	Switching Theory and Logic Design	3	-	-	3
4	V20CST02	Python Programming	3	-	-	3
5	V20MEL01	Engineering Graphics	**1**	-	4	**3**
6	V20PHL01	Engineering Physics Lab	-	-	3	1.5
7	V20CSL02	Python Programming Lab	-	-	3	1.5
8	V20ENL02	Hone Your Communications Skills Lab-II	-	-	3	1.5
9	V20CHT02	Environmental Studies	2	-	-	0

Total Contact Hours: 28 Total Credits: 19.5

Annexure-VI(b)

Semester	I /II SEM	L	T	P	C	COURSE CODE
Regulation	V20	-	-	3	1.5	V20CST01
Name of the Course	**Programming in 'C' for problem Solving**					
Branches	**Common to All**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Describe various problem solving strategies such as Algorithms and Flowcharts	K2
CO2	Develop various programming constructs using Control Structures	K3
CO3	Construct Programs using modular programming approach	K3
CO4	Illustrate the usage of Arrays, String and pointers	K3
CO5	Construct Programs using Structures and Unions	K3
CO6	Distinguish between Sequential files and Random access files	K4

UNIT-I: Problem solving concepts: Algorithms, Flow-charts, Types of Programming Languages, Compiler, Assembler and Linker, Testing and Debugging a program. **Introduction to C Programming:** Overview and importance of C, C Program Structure, Creation and Compilation of C Programs, Identifiers, Variables, Data types, Constants, Declarations, **Input and output statements:** Input and output functions..

UNIT-II: Operators: Arithmetic, relational and logical operators, increment and decrement operators, conditional operator, assignment operator, bitwise operators, special operators, expressions, Precedence, Associatively, Order of evaluation, Type conversion, Programming Examples. **Control Structures:** Conditional statements - If-else, Switch-case constructs, Loops - while, do-while, for.

UNIT-III: Functions: Top down approach of problem solving, standard library functions, user defined functions, parameter passing - call by value, call by reference, return statement, passing arrays as parameters to functions, recursion. **Storage Classes:** Scope and extent, Storage Classes - auto, extern, static and register.

Understanding pointers: Accessing the address of a variable, declaring pointer variables, initialization of pointer variables, accessing a variable through its pointer, pointer arithmetic.

UNIT-IV: Arrays: Single-Dimensional Arrays, multi-Dimensional Arrays, initialization and accessing individual elements. **Strings** in C- Concepts, string handling functions. Pointer and arrays, pointers and character strings, array of pointers. **Dynamic Memory Allocation**: calloc(), malloc() and free()

UNIT-V: Structures: Defining, declaring, initialization, accessing, comparing, operations on individual members, array of structures, structures within structures, structures and functions, bit fields, Programming Examples. **Unions:** Definition – difference between structures and unions – declaring and accessing unions.– pointers and structures – self-referential structures.

UNIT-VI: File Processing: Creating and Opening a file, file opening modes, closing a file, input/output operations on files, error handling during I/O operations, random access to files, Command line arguments. Programming Examples.

TEXT BOOKS:

1. Programming in ANSI C by E Balagursamy, McGraw Hill, 8th Edition.

REFERENCE BOOKS:

1. Let Us C, YashavantKanetkar, BPB Publications, 15th Edition
2. Programming in C, ReemaThareja, Oxford.
3. Programming with C, Second edition, Byron S Gottfried, Tata McGrawhill
4. Problem Solving and Programm design in C, Hanly J R &Koffman E.B, Pearson Education, 2009.
5. Programming in C, PradipDey, ManasGhosh, Oxford University Press, 2007.
6. Problem Solving Using C: Structured Programming Techniques, YukselUckan.
7. C Programming, A Problem Solving Approach, Forouzan, Gilberg, Prasad, CENGAGE.
8. Computer Programming in C – Kerninghan& Ritchie, PHI
9. C: The Complete Reference: Herbert Schildt, Osborne/Mcgraw Hill, Inc.

Semester	I/II SEM	L	T	P	C	COURSE CODE
Regulation	V20	-	-	3	1.5	V20CSL01
Name of the Course	**Programming Lab in ‘C’ for problem Solving**					
Branches	**Common to All**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Demonstrate problem solving techniques using Control Structures	K3
CO2	Construct Programmes using the concepts of Arrays, Strings and Pointers	K3
CO3	Apply the concepts of Functions, Structures and Unions	K3
CO4	Use various file processing operations to develop real-time applications	K4

LIST OF EXPERIMENTS

Tutorial 1: Problem solving using computers.

Lab1: Familiarization with programming environment.

Tutorial 2: Variable types and type conversions.

Lab 2: Simple computational problems using arithmetic expressions.

Tutorial 3: Branching and logical expressions.

Lab 3: Problems involving if-then-else structures switch – case.

Tutorial 4: Loops, while and for loops.

Lab 4: Iterative problems e.g. sum of series.

Tutorial 5: Functions call by value, call by reference

Lab 5: Simple functions.

Tutorial 6: Recursion, structure of recursive calls.

Lab 6: Recursive functions.

Tutorial 7: Pointers.

Lab 7: Programming with pointers.

Tutorial 8: 1D Arrays: searching, sorting.

Lab 8: 1D Array manipulation.

Tutorial 9: 2D arrays.

Lab 9: Matrix problems.

Tutorial 10: String handling.

Lab 10: String handling functions.

Tutorial 11: Structures, unions and dynamic memory allocation.

Lab 11: Structures & unions.

Tutorial 12: File handling, command line arguments.

Lab 12: File operations.

TEXT BOOKS:

1. Programming in Ansi C by E Balagursamy, McGraw Hill, Eight Edition.

Reference Books:

1. Mastering C, K.R. Venugopal and S.R. Prasad, TMH Publishers.
2. Computer Programming in C, V. Rajaraman, PHI.
3. Programming in C, Stephen G. Kochan, Fourth Edition, Pearson Education.
4. C- The Complete Reference, Herbert Schildt, Osborne/Mcgraw Hill, Inc.
5. Programming with C, Byron S Gottfried, Second edition, Tata McGrawhill.
6. Programming in C, ReemaThareja, Oxford.
7. Problem Solving and Program design in C, Hanly J R &Koffman E.B, Pearson Education, 2009
8. Programming and Problem Solving Using C, ISRD Group, Tata McGraw Hill,2008

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	V20CST02
Name of the Course	**PYTHON PROGRAMMING**					
Branches	**Common to CSE & CST**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Illustrate basic concepts of Python Programming	K2
CO2	Describe control structures in python	K2
CO3	Construct python programs using structured data types	K3
CO4	Demonstrate functions and packages	K3
CO5	Compare TextFiles and Binary Files	K4
CO6	Apply OOPs concepts to Develop Test cases	K3

Syllabus

UNIT-I: Introduction to Python, Data Types & Operators: Basics of python programming: Features of python – History of Python - Python installation and execution - Data types – Identifiers - variables – type conversions- Literals, Constants – Numbers – Strings. I/O statements.Operators and expressions, operator precedence – expression evaluation.

UNIT-II: Control Structures: Decision Control statements: conditional (if), alternative (if-else), chained conditional (if-elif-else); **Iteration:** while loop, for loop, nested for loop, range function, break, continue and pass statements.

UNIT-III: Structured Data Types: Lists: list operations, list slices, list methods, cloning lists, list parameters. **Tuples**: tuple assignment, tuple as return value. **Set:** Set Creation, Set Operations. **Dictionaries**: Creation, operations; comprehension, operations on strings.

UNIT-IV:Functions& modules: Introduction - Function Declaration &Definition - Function Call – Variable Scope and Lifetime - The return statement-More on Defining Functions - Lambda Functions or Anonymous Functions - Documentation Strings- Modules – Packages.

UNIT-V: Files & Exception Handling: Introduction - Types of files - Text files - reading and writing files; Errors and exceptions handling.

UNIT-VI:OOPS concepts Classes, Methods, Constructor, Inheritance, Overriding Methods, Data hiding, TKINTER.

Text Books:

1. "Python Programming using problem solving Approach" ReemaThareja, Oxford University Press – 2017.
2. Python with Machine Learning by "A.Krishna Mohan, Karunakar&T.Murali Mohan" by S. Chand Publisher-2018.

Reference Books:

1. Allen B. Downey, "Think Python: How to Think Like a Computer Scientist", 2nd edition, Updated for Python 3, Shroff /O'Reilly Publishers, 2016 (http://greenteapress.com/wp/think- python)
2. Guido van Rossum and Fred L. Drake Jr, ―An Introduction to Python – Revised and updated for Python 3.2, Network Theory Ltd., 2011.
3. John V Guttag, ―Introduction to Computation and Programming Using Python", Revised and expanded Edition, MIT Press , 2013

Semester	II SEM	L	T	P	C	COURSE CODE
Regulation	V20	-	-	3	1.5	V20CSL02
Name of the Course	PYTHON PROGRAMMING LAB					
Branches	Common to CSE & CST					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Demonstrate Basic Python Programs	K3
CO2	Construct control structures in python	K3
CO3	Demonstrate functions and packages	K3
CO4	Construct python programs using structured data types	K3
CO5	Demonstrate Text Files and exception handling	K3
CO6	Test Rock – paper – Scissors game	K4

Syllabus

Exercise 1 - Basics

a) A sample Python Script using command prompt, Python Command Line andIDLE

b) A program to purposefully raise an Indentation Error and correct it

Exercise 2 - Operations

a) A program to compute distance between two points taking input from the user (Pythagorean Theorem)

b) A program on add.py that takes 2 numbers as command line arguments and prints its sum.

Exercise - 3 Control Flow

a) A Program to implement for checking whether the given number is a even number or not.

b) A program to construct reverse the digits of a given number and add it to the original, If the sum is not a palindrome repeat this procedure.

c) A program using a while loop that asks the user for a number, and prints a countdown from that number to zero.

Exercise 4 - Control Flow – Continued

a) A program to construct the following pattern, using a nested for loop.

```
*
*                       *
*           *           *
*       *       *       *
*     *     *     *     *
*       *       *       *
*           *           *
*                       *
*
```

b) By considering the terms in the Fibonacci sequence whose values do not exceed four million,find the sum of the even-valued terms.

Exercise - 5 Structured Data types

a) A program to count the number of strings where the string length is 2 or more and the first and last
character are same from a given list of strings.
b) a program to develop unzip a list of tuples into individual lists and convert them into dictionary.

Exercise – 6Structured Data types Continued

a) A program to count the numbers of characters in the string and store them in a dictionary data structure
b) A program to use split and join methods in the string and trace a birthday with a dictionary data structure.

Exercise - 7 – Problem Solving using Functions

a) Find mean, median, mode for the given set of numbers passed as arguments to a function
b) Develop a function nearly_equal to test whether two strings are nearly equal. Two strings a and b are
nearly equal when a can be generated by a single mutation on b.
c) Develop a Recursive Function to find the Factorial of a given number.
d) Develop function to compute gcd, lcm of two numbers. Each function shouldn't exceed one line.

Exercise - 8– Modules

a) Install packages requests, flask and explore themusing (pip)
b) A program to implement a script that imports requests and fetch content from the page. Eg. (Wiki)
c) Develop a simple script that serves a simple HTTPResponse and a simple HTML Page

Exercise - 9 Files

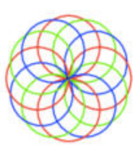
a) A program to count frequency of characters in a given file. Can you use character frequency to tell whether the given file is a Python program file, C program file or a text file?
b) A program to compute the number of characters, words and lines in a file.

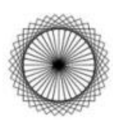
Exercise - 10 OOP

a) Class variables and instance variable and illustration of self variable
i) Robot
ii) ATM Machine

Exercise - 11 GUI, Graphics

1. Develop a GUI for an Expression
2. A program to implement the following figures using turtle





Text Books:

1. "Python Programming using problem solving Approach" ReemaThareja, Oxford University Press – 2017.
2. Python with Machine Learning by "A.Krishna Mohan, Karunakar&T.Murali Mohan" by S. Chand Publisher-2018.

Date: 31/12/2020

Minutes of the 4th Meeting of Board of Studies in Mathematics was held on 31-12-2020 at 10:30 AM through online zoom meeting in the SrinivasaRamanujan Hall of Learning (E-block) BS&H Department.

Members present:

The following items are discussed in the meeting:

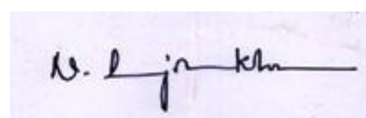
S.No	Name of the	Designation & Address	Designation on
1	Sri. N Raja Sekhar	Assoc. Professor & HOD	Chairman
2	Prof. G.V.S.R.Deekshitulu	Professor, Department of Mathematics,	University Nominee
3	Dr. K.K.M. Sarma	Professor, Department of Mathematics,	Council Nominee
4	Prof. Y.N.Reddy	Professor, Department of Mathematics,	Council Nominee
5	Dr. T.S.R Murthy	Professor of Mathematics, Sri Vishnu Engineering College for Women,	Academician
6	Smt.B.Adi Lakshmi	Assistant.Professor of Mathematics	Member
7	Smt.G S Prasanthi	Assistant.Professor of Mathematics	Member
8	Sri S K Dhana Prasad	Assistant.Professor of Mathematics	Member
9	Sri.AKiran Kumar	Assistant.Professor of Mathematics	Member
10	Sri.D.N.V.Rama	Assistant.Professor of Mathematics	Member
11	Smt.B.V.D. Santhi	Assistant.Professor of Mathematics	Member
12	Sri.V.SrinivasRao	Assistant.Professor of Mathematics	Member
13	Sri.T.D.Rama	Assistant.Professor of Mathematics	Member

Item No-1:Introducing the members of BOS by Chairman.

The chairman of BOS extended a formal welcome and introduced the members.

Item No.2: Syllabi for the courses offered in I and II semesters of B.TechProgramme.

The detailed syllabi for the courses “Linear Algebra and Differential Equations” and “Numerical Methods and Vector Calculus” along withprescribed text books have been presented. With minor changes, the syllabi for the courses mentioned above have been approved. The approved syllabi for the courses are given in Annexure-VII(a)



Chairman

Board of Studies,
Mathematics

ANNEXURE – VII(a)

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	V20MAT01
Name of the Course	**Linear Algebra and Differential Equations**					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Apply matrix technique to solve system of linear equations	K3
CO2	Find Eigenvalues and Eigen vectors	K3
CO3	Solve the ordinary differential equations of first order & first degree	K3
CO4	Solve the linear differential equations of higher order with constant coefficients	K3
CO5	Apply Laplace Transformation to given function	K3
CO6	Find maxima and minima of functions of two variables	K3

UNIT I: System of linear equations:

Rank-Echelon form-Normal form – Solution of linear systems – Gauss elimination – Gauss Jordon- Gauss Jacobi and Gauss Seidal methods.

UNIT II: Eigenvalues, Eigen vectors and Cayley-Hamilton theorem:

Eigenvalues - Eigen vectors– Properties – Cayley-Hamilton theorem (without proof) - Inverse and powers of a matrix by using Cayley-Hamilton theorem.

UNIT-III: Differential equations of first order and first degree:

Linear-Bernoulli-Exact-Reducible to exact differential equations -Newton’s Law of cooling-Law of natural growth and decay-Orthogonal Trajectories.

UNIT IV: Linear differential equations of higher order:

Linear non homogeneous differential equations of higher order with constant coefficients involving RHS term of the type e^{ax}, sinax, cosax, polynomials in x, $e^{ax}V(x)$, $xV(x)$- method of variation of parameters.

UNIT V: Laplace Transformation:

Laplace transforms of standard functions, properties(without proof), transforms of tf(t), f(t)/t, transforms of derivatives and integrals, transforms of unit step function, Dirac delta function, Inverse Laplace transforms, convolution theorem (without proof)

Application: Solving ordinary differential equations with initial conditions using Laplace transforms.

UNIT VI: Partial Differentiation:

Introduction to partial differentiation -Total derivative - Functional dependence - Jacobian.- maxima and minima of functions of two variables (without constraints) and Lagrange's method (with constraints).

Text Books:

1. B.S.Grewal, Higher Engineering Mathematics, 43rd Edition, Khanna Publishers.

2. N.P.Bali, Engineering Mathematics, Lakshmi Publications.

Reference Books:

1. Erwin Kreyszig, Advanced Engineering Mathematics, 10th Edition, Wiley-India

2. Dean G. Duffy, Advanced engineering mathematics with MATLAB, CRC Press

3. Srimanta Pal, SubodhC.Bhunia, Engineering Mathematics, Oxford University Press.

4. Dass H.K., RajnishVerma. Er., Higher Engineering Mathematics, S. Chand Co. Pvt. Ltd, Delhi.

Semester	II SEM	L	T	P	C	COURSE CODE
Regulation	V20	3	-	-	3	V20MAT02
Name of the Course	**Numerical Methods and Vector Calculus**					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Compute approximate roots of algebraic and transcendental equations and interpolating polynomial for the given data	K3
CO2	Solve ordinary differential equations with initial conditions using numerical methods	K3
CO3	Find multiple integrals and improper integrals	K3
CO4	Calculate gradient of a scalar function, divergence and curl of a vector function	K3
CO5	Apply the knowledge of vector integral concepts to find characteristics of vector fields	K3
CO6	Find Fourier series of a periodic functions	K3

UNIT I:Solutionof Algebraic and Transcendental Equations and Interpolation:

Introduction- Bisection method – Method of false position– Newton-Raphson method (One variable) - finite differences- forward differences, backward differences – simple relations on forward, backward, central, average and shifting operators - Newton's formulae for interpolation - Lagrange's interpolation formula.

UNIT II: Numerical Integration and solution of Ordinary Differential equations:

Trapezoidal rule- Simpson's 1/3rd and 3/8th rule-Solution of ordinary differential equations by Taylor's series- Picard's Method - Euler's method-Euler's modified Method – Runge-Kutta method (fourth order).

UNIT III: Multiple Integrals:

Definition of Improper integrals - Double and triple integrals – Change of variables – Change of order of integration.

UNIT IV: Vector Differentiation:

Vector differential operator - Gradient- Divergence- Curl - Laplacian and second order operators -Vector identities.

UNIT V: Vector Integration:

Line integral: Work done – Potential function – Surface and volume integrals - Vector integral theorems: Greens, Stokes and Gauss Divergence theorems (without proof) and related problems.

UNIT VI: Fourier series:

Fourier series **-**Introduction, Periodic functions, Fourier series of a periodic function, Dirichlet's conditions, Even and odd functions, Change of interval, Half-range sine and cosine series.

Text Books:

1. B.S.Grewal, Higher Engineering Mathematics, 43rd Edition, Khanna Publishers.
2. N.P.Bali, Engineering Mathematics, Lakshmi Publications.

Reference Books:

1. Erwin Kreyszig, Advanced Engineering Mathematics, 10th Edition, Wiley-
2. Dean G. Duffy, Advanced engineering mathematics with MATLAB, CRC Press
3. V.Ravindranath and P.Vijayalakshmi, Mathematical Methods, Himalaya Publishing House. India
4. Srimanta Pal, SubodhC.Bhunia, Engineering Mathematics, Oxford University Press.
5. Dass H.K., RajnishVerma. Er., Higher Engineering Mathematics, S. Chand Co. Pvt. Ltd, Delhi.

ANNEXURE-VIII(a)

Semester	**I/II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	V20PHT01
Name of the Course	ENGINEERING PHYSICS					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Grasp the basic principles of structure of materials, crystallography and X-ray diffraction.	K2
CO2	Expose the students to the basic concepts of Lasers and their applications in optical fiber communication link	K3
CO3	Classify the applications of sound waves in various fields.	K2
CO4	Interpret wavelike behavior of matter and motivates the need of fundamental physical laws for better understanding of materials.	K3
CO5	Describe the properties of semiconducting materials	K2
CO6	Illustrate the fundamental concepts of dielectrics and Superconductors.	K4

UNIT-I

CRYSTALLOGRAPHY : Introduction – Space lattice – Basis – Unit Cell – Lattice parameters –Crystal systems- Bravais lattices– Structures and packing fractions of SC,BCC and FCC

X-RAY DIFFRACTION: Directions and planes in crystals – Miller indices – Separation between successive [h k l] planes – Bragg's law-Bragg's x-ray spectrometer.

UNIT-II

LASERS: Introduction –Characteristics of lasers – Spontaneous and Stimulated emission of radiation – Einstein's coefficients –Pumping schemes– Population inversion– Ruby laser- Helium Neon laser- Applications of LASER.

FIBER OPTICS: Introduction –Structure of an optical fiber- Principle of Optical Fiber – Acceptance angle and acceptance cone – Numerical aperture- Basic optical communication system-Advantages of optical fibers over conventional transmission lines.

UNIT – III

ACOUSTICS: Introduction - Sound absorption- Absorption coefficient-Reverberation- Reverberation Time –Basic requirements for constructing an acoustically good hall - Sabine's formula-Factors affecting acoustics of buildings and their remedial measures.

ULTRASONICS: Introduction- Production of Ultrasonic Waves Using Piezoelectric Effect and Magnetostriction Method- Non-Destructive Testing - Pulse Echo Technique –Applications of ultrasonics.

UNIT – IV

QUANTUM MECHANICS: Introduction-de-Broglie's concept of matter waves – Schrodinger's Time Independent& time dependent wave equations –Physical significance of the wave function- Particle in a one dimensional potential box.

FREE ELECTRON THEORY: Classical free electron theory (qualitative) – Assumptions and failures-Quantum free electron theory – Equation for electrical conductivity based on quantum free electron theory-Density of states (3D) - Fermi energy-Fermi – Dirac distribution.

UNIT – V

BAND THEORY OF SOLIDS: Bloch's function (qualitative) – Kronig – Penney model (qualitative)–formation of energy bands in crystalline solids based on Kronig Penny model –E vs K diagram- v vs K diagram- effective mass of an electron-Classification of crystalline solids-concept of hole.

SEMICONDUCTOR PHYSICS: Introduction - Types of Semiconductors-Intrinsic Semiconductors- Carrier concentration– Expression for Conductivity-Extrinsic semiconductors-Carrier concentrations-Dependence of Fermi energy on carrier concentration and temperature-Drift and diffusion currents-Einstein's Equation-Hall Effect-Hall coefficient-Applications of Hall Effect.

UNIT-VI

SUPERCONDUCTIVITY: Introduction- General properties – Meissner effect - Type I and Type II Superconductors- BCS Theory – Josephson effects (AC and DC) -Applications of superconductors.

DIELECTRIC PROPERTIES: Introduction- Types of polarizations-Electronic, Ionic and Orientation polarizations (qualitative) – Internal electric field – Clausius- Mossoti Equation.

Text Books:

1. A Text book of Engineering Physics, M.N. Avadhanulu and P.G.Kshirasagar,S.Chand Publications.
2. Engineering Physics DK Bhattacharya, Poonam and Tandom Publications.

Reference books:

1. Solid state Physics, A.J. Dekker by McMillan India Ltd.
2. Introduction to Solid state Physics, Charles Kittle, Willey India Pvt. Ltd.
3. Solid state Physics, S.O. Pillai by New Academic Science.
4. Basic Engineering Physics,Dr.P. SreenivasaRao, Himalaya Publishers.
5. Engineering Physics, V. Rajendran, McGraw Hill.
6. Engineering Physics, Sanjay D Jain and Girish G Sahasrabudhe., University Press.
7. Engineering Physics, Gaur and Guptha, DhanpatRai Publications.
8. Engineering Physics, P.K. Palanisamy, Sci Tech Publishers.

Semester	**I/II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	-	-	3	1.5	V20PHL01
Name of the Course	ENGINEERING PHYSICS LAB					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Analyze the physical principle involved in the various instruments; also relate the principle to new application.	K4
CO2	Demonstrate the various experiments in the areas of optics, mechanics and Electronics in all branches of engineering.	K3
CO3	Think innovatively and also apply the creative skills that are essential for engineering.	K4

<u>List of Experiments:</u>

(Any eight of the following to be done)

1. Determination of Rigidity modulus of a material – Torsional Pendulum
2. Determination of acceleration due to gravity – Compound Pendulum
3. Verification of laws of vibrations in stretched strings – Sonometer
4. Determination of velocity of sound – Volume Resonator
5. Verification of Magnetic field Induction along the axis of current carrying coil – Stewart and Gee's apparatus.
6. Determination of Planck's constant using photocell.
7. Determination of wave length of laser source using diffraction grating.
8. Determination of frequency of electrically driven tuning fork - Melde's experiment – Transverse and longitudinal modes.
9. Study of V/I Characteristics of Zener diode.
10. Draw the frequency responsive curves of L-C-R Series Resonance Circuit.
11. Determination of Energy band gap of a Semiconductor p-n junction.

12. Characteristics of Thermistor – Negative Temperature Coefficient of resistivity.

Virtual labs:

(Any two of the following to be done)

1. Crystal Structure.
2. Numerical Aperture of an Optical Fiber.
3. Photo-Electric Effect.
4. Hall Effect.

Department of BS&H, Chemistry Section

Minutes of the Second meeting of Board of Studies, Chemistry was conducted on 28-12-2020 at 12.30 PM through online Zoom meeting.

Members present:

S. No.	Name of the member	Designation in BOS
1	Sri A. VamsiSubbarayan	Chairman
2	Dr. K. Anji Reddy	University Nominee
3	Dr. A. Ratnakar	Subject Expert
4	Dr. G. Rambabu	Subject Expert
5	Sri J. Chandra Rao	Member
6	Sri M. Durga Prasad	Member
7	Smt. P. Durga Devi	Member
8	Smt. SSV. Sumalatha	Member
9	Sri J. Suresh Kumar	Member

Members absent:

Dr.P.NageswaraRao	Prof., Dept of Chemistry, NIT Warangal.

The following are the conclusions of the meeting:

Item 1:

- The Chairman welcomed all the external members and introduced them to members of the college.

Item 2:

- Changes brought to the present course structure from previous regulation were shown. Members approved the course structure.
- Thorough discussion took place on syllabi, members appreciated Engineering Chemistry laboratory syllabus and proposed some changes to Engineering Chemistry and Environmental Studies. The prescribed textbooks and syllabus were approved with minor changes and it is given in Annexure-IX(a).
- External members suggested balance between online and offline mode of teaching if the need arises.

Chairman
Board of Studies, Chemistry

Annexure-IX(a)

Semester	**I/II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	V20CHT01
Name of the Course	ENGINEERING CHEMISTRY					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Solve boiler troubles originated due to poor water quality and suggest suitable water treatment methods.	K3
CO2	Choose plastics and rubbers for engineering applications	K3
CO3	Associate concepts of Electro Chemistry in designing electrochemical energy systems	K2
CO4	Assess the quality of fuels	K3
CO5	Apply corrosion principles for protection of metallic structures	K3
CO6	Interpret important applications of engineering materials	K2

UNIT I: WATER TECHNOLOGY

Sources of water; Impurities in water, Hardness of water, Types of Hardness, Units of hardness, Determination of hardness of water, Numerical problems on temporary and permanent hardness.

Boiler troubles: Priming and Foaming, Sludge and Scale formation, Boiler corrosion, Caustic embrittlement. Softening of hard water- Zeolite process and Ion exchange process; Water for drinking purpose, BSI standards of drinking water, Disinfection: Chlorination, Break point chlorination. Desalination - Reverse Osmosis and Electro dialysis.

UNIT II: POLYMER TECHNOLOGY

Introduction, Polymerization, Mechanism of Free radical addition polymerization; Plastics as engineering materials; Advantages and limitations, Thermoplastics and Thermosetting plastics, Fabricationof plastics (Compression, Injection, Transfer, and Extrusion Moulding) - Preparation,properties and applications of Polythene (HDPE and LDPE), PVC, Bakelite.

Elastomers: Disadvantages of natural rubber, Vulcanization of rubber, Advantages of vulcanized rubber, Preparation, properties and applications of Buna -S and Buna-N.

UNIT III: ELECTROCHEMISTRY

Galvanic cell, Electrode potential and EMF - Reference electrodes (Calomel and Glass electrodes), Determination of pH of a solution using glass electrode, Conductometric titration (Strong Acid– Strong Base).

Batteries: Types, Primary battery - Li-MnO_2 battery, Secondary batteries - Lead acid battery,Lithium ion battery.

Fuel cells: Definition, H_2 - O_2 fuel cell

UNIT IV: FUEL TECHNOLOGY

Fuels – Characteristics of a good fuel, Classification of fuels, Calorific value (HCV and LCV), Dulong's formula, Numerical problems on HCV and LCV.

Solid fuels: Coal – Proximate and ultimate analysis, Significance of the analyses.

Liquidfuels: Petroleum composition, Classification, Synthetic petrol (Fischer Tropsch and Bergius process), Knocking, Anti knocking agents, Octane and Cetane ratings.

Gaseous fuels – Natural gas, LPG and CNG

Biofuels - Biogas, Biodiesel.

UNIT V: CORROSION AND ITS PREVENTION

Definition, Theories of Corrosion (Chemical & Electrochemical), Pilling-Bedworth Rule, Types of electrochemical corrosion (Galvanic corrosion, Concentration cell corrosion, Stress corrosion and

Pitting corrosion), Galvanic series, Factors which influence the rate of corrosion. Protection from corrosion - Design & Selection of metals, Cathodic protection, Protective coatings – Metallic coatings (Anodic and cathodic coatings), Methods of application of coatings on metals (Galvanizing, Tinning, and Electroplating).

UNIT VI: CHEMISTRY OF ENGINEERING MATERIALS

Nano materials: Introduction, Carbon nanotubes - Types, preparation (Arc discharge, Laser ablation and CVD Method) - Properties and applications of carbon nanotubes.

Cement: Composition, Manufacture of cement (Wet process), Setting and hardening of cement.

Biodegradable polymers: PHBV, Poly Lactic Acid - Applications

Conducting polymers: Types, Conduction mechanism in Polyacetylene, Applications.

Text Books:

1. Engineering Chemistry by Jain and Jain; DhanpatRai Publications & Co.
2. A Text book of Engineering Chemistry by S. S. Dara; S. Chand &Co Ltd.

Reference Books:

1. Engineering Chemistry by Vajiram and others. Wiley India Pvt. Ltd.,
2. Engineering Chemistry by PrasanthRath, Cengage Learning.
3. Engineering Chemistry by ShikhaAgarwal; Cambridge University Press.
4. Engineering Chemistry, by B. Sivasankar, McGraw-Hill.

Semester	**I SEM & II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	2	-	-	0	V20CHT02
Name of the Course	ENVIRONMENTAL STUDIES					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Recognise the importance of environment and ecosystem services	K2
CO2	Identify the characteristic features, uses and impact of overutilization of natural resources	K2
CO3	Explain biodiversity, biodiversity services and conservation of biodiversity	K2
CO4	Report the causes and impacts of various pollutions	K2
CO5	Illustrate social and global environmental issues; sustainable development practices	K2
CO6	Describe environmental management and environmental legislations in India	K2

UNIT 1: MULTIDISCIPLINARY NATURE OF ENVIRONMENT & ECOSYSTEM

Definition, Scope and importance of environment, Typesof environment, Multidisciplinary nature of Environmental Studies, Components of environment.

Ecosystem - Concept of an Ecosystem, Structure and function of an Ecosystem, Food chain & food web, Ecological Pyramids, Structure and function of Forest, Desert, Pond and Marine ecosystem.

UNIT 2: NATURAL RESOURCES

Forest Resources: Uses, Overexploitation, Deforestation.

Water resources: Aquifers, Dams and benefits, Conflicts over water.

Mineral resources: Uses, Overexploitation, Environmental impact of extraction and use of mineral resources.

Land resources: Degradation, Soil erosion and desertification, Landslides.

Renewable Energy resources: Solar energy, Geo thermal energy, Tidal Energy.

UNIT 3: BIODIVERSITY AND ITS CONSERVATION

Definition,LevelsofBiodiversity,ValuesofBiodiversity,HotspotsofBiodiversity,ThreatstoBiodiversity, Endangered and Endemic species of India, In-situ and Ex-situConservation.

UNIT 4: ENVIRONMENTAL POLLUTION

Definition of pollution, Air pollution- Types of Air pollutants, Effects and control measures; Water pollution- Causes, Effects and control measures; Soil pollution;

Biomedical waste; Industrial waste- Process of waste management, Sanitary land fill, Incineration, 3R strategy; E- Waste and its management.

UNIT 5: SOCIAL AND GLOBAL ENVIRONMENTAL ISSUES

Family welfare - Women Education, Value education, Role of information technology on environment and human health, Acid rains, Global warming, Ozone layer depletion and Population growth.

UNIT 6: ENVIRONMENTAL MOVEMENTS, LEGISLATIONS AND MANAGEMENT

Chipko movement, Tehri dam conflict, and Silent Valley Project.

Importance of environmental legislation, Environmental Protection Act, Wildlife Protection Act, Air Act (Prevention and control of pollution), Water Act; Environmental management- EIA.

Text books:

1. Environmental Studies, Fourth Edition, ANubhaKaushik, C P Kaushik, New Age International Pubishers.
2. A Textbook of Environmental Studies, ShashiChawla, TMH, New Delhi.
3. Fundamentals of Environmental Studies, DD Mishra, S Chand & Co. Ltd.
4. Textbook of Environmental Science, DR M. Anjireddy, B.S Publications, Hyderabad.

Semester	**I / II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	-	-	3	1.5	V20CHL02
Name of the Course	ENGINEERING CHEMISTRY LABORATORY					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Analyze quantitatively a variety of samples using volumetric methods and instrumental methods	K4
CO2	Apply volumetric and instrumental methods for the determination of water quality parameters namely Alkalinity, Hardness and pH	K3
CO3	Prepare polymeric materials, nanoparticles and analyze the given coal samples	K3

List of Experiments:

1. Introduction to chemistry laboratory – Molarity, Normality, Primary, Secondary standard solutions,
   Volumetric titrations, Quantitative analysis, Qualitative analysis etc.,
2. Estimation of HCl using standard Na_2CO_3 solution.
3. Estimation of $KMnO_4$ using standard oxalic acid solution.
4. Determination of alkalinity of a sample of water.
5. Determination of total hardness of water using standard EDTA solution.
6. Estimation of copper using standard EDTA solution.
7. Estimation of ferrous iron using standard $K_2Cr_2O_7$ solution.
8. Estimation of pH of the given sample solution using pH meter.
9. Conductometric titration between strong acid and strong base.
10. Proximate analysis of coal.
11. Preparation of phenol – formaldehyde resin.
12. Preparation of ZnO_2 Nanoparticles by sol-gel method.

Text Book:

1. Lab manual prepared by Department of Chemistry, Sri Vasavi Engineering College.

Reference Books:

1. Practical Engineering Chemistry by K. Mukkanti, B.S. Publications.
2. Vogel's Quantitative Chemical Analysis – 5th Edition, Longman.
3. A Text Book on experiments and Calculations Engineering by S.S.Dara, S.Chand& Co Ltd.

MINUTES OF THE IV BOS OF ENGLISH ON 31-12-2020.

The IV BOS Meeting of English was held online at 11am on 31-12-2020 using the Zoom link : http://us02web.zoom.us/j/86829486188.

AGENDA OF THE MEETING

Item No.1: Opening Remarks by BOS Chairperson.

Item No.2: To discuss the syllabi of "English for professional Enhancement and Hone Your communication Skills Lab-I" for I Semester of B.Tech.,

Item No.3: To discuss and finalize the syllabus of "Hone Your Communication Skills Lab-II" for II semester of B.Tech.,

MINUTES of MEETING:

Item No 1:

The Chairman welcomed all the external members and introduced them to members of the college.

Item No 2:

The syllabi of "English for Professional Enhancement" (V20ENT01) and "Hone Your Communication Skills Lab-I" (V20ENL01) for Semester-I of B.Tech., have been approved by the members of BOS.

Item No 3:

The syllabus of "Hone Your Communication Skills Lab-II" (V20ENL02) for Semester-II of B.Tech., has been approved by the members of BOS of English.

The approved syllabus of English for Professional Enhancement, Hone Your Communication Skills Lab-I and Hone Your Communication Skills Lab-II given in Annexure-X(a)

Members Present

Dr.G.V.N.S.R.RatnakaraRao, Principal, Sri Vasavi Engineering College

English BOS Members Present:

1. Chairperson of BOS: Dr. T Sujani, Assoc. Professor of English Sri Vasavi Engineering College
2. Dr.D.KesavaRao (Council Nominee) Professor of English, NIT Warangal
3. Prof.K.Sree Ramesh (Council Nominee) Professor of English and Principal, College of Arts and Commerce AdikaviNannaya University Rajamahendravarm
4. Dr.Purna Chandra Rao (University Nominee) Assoc.Professor of English, PVP Siddhartha Institute of Technology,Vijayawada .

Faculty Present:

1. Dr.K. VenkataRao, Assistant Professor
2. B.AnandaRao, Assistant Professor
3. K.V.RamaRao, Assistant Professor
4. K.RadhaMadhavi, Assistant Professor
5. Tanuja .Ch, Assistant Professor
6. Aparanjani.U, Assistant Professor

Annexure-X(a)

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	-	-	3	V20ENT01
Name of the Course	English for Professional Enhancement					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Identify the central theme of the text, use cohesive items for coherence in a paragraph, recognize nouns and basic sentence structures.	K2
CO2	Restate the central idea of the letter by using appropriate vocabulary. Gain mastery over articles and prepositions	K2
CO3	Find the success formula after reading the text in detail to answer questions. Use appropriate tense and concord, find suitable vocabulary and format to draft letters and e-mails.	K3
CO4	Employ reading skills to comprehend the given biography. Interpret visual information .Use quantifiers appropriately and get acquainted with writing for media and statement of purpose	K3
CO5	Appraise the delivered lecture and text, recognize the contextual vocabulary, write error free academic proposals and prepare poster presentations.	K4
CO6	Infer the real meaning of the text, listen for global comprehension and identify foreign phrases, use active and passive voice, practise note making.	K4

Syllabus

UNIT-I

A DRAWER FULL OF HAPPINESS (From Infotech English, Maruthi Publications).

Vocabulary: Technical vocabulary, GRE Vocabulary , Antonyms and Synonyms, Word Applications, Verbal Reasoning and Sequencing of Words.

Grammar: Word forms and Function words; Nouns: singular and plural, Countable and uncountable, Basic Sentence Structure and Word Order, yes/no questions, Wh-questions.

Listening: Listening to short audio texts and identifying the topic, context and specific pieces of information to answer a series of questions both in speaking and writing.

Speaking: Self- Introduction and Introducing others. Asking and answering general questions on topics such as home, family, work, studies and interests.

Reading: Skimming text to get the main idea. Scanning to look for specific pieces of information.

Writing: Mechanics of Writing, Punctuation, Paragraph Writing

Non- Detailed : The Post Office by Rabindranath Tagore (Macmillan India)

UNIT-II

NEHRU'S LETTER TO HIS DAUGHTER INDIRA ON HER BIRTHDAY (From Infotech English, Maruthi Publications).

Vocabulary: Technical Vocabulary, GRE Vocabulary, Analogies, Antonyms and Synonyms, Word Applications.

Grammar: Articles, Prepositions

Listening: Answering a series of questions about main idea and supporting ideas after listening to audio texts both in speaking and writing.

Speaking: Discussion in pairs/ small groups on specific topics. Functional English: Greeting and Leave Taking.

Reading: Identifying sequence of ideas; Recognizing verbal techniques that help to link the ideas in a paragraph together.

Writing: Identifying the main ideas, Rephrasing and Summarizing them, Paraphrasing.

Non- Detailed : The Post Office by Rabindranath Tagore (Macmillan India)

UNIT-III
STEPHEN HAWKING - POSITIVITY 'BENCHMARK' (From Infotech English, Maruthi Publications).

Vocabulary: Technical Vocabulary, GRE Vocabulary, Verbal Reasoning, Using Equivalents.

Grammar: Verbs, Tenses, Concord: Subject - Verb Agreement.

Listening: Listening for global comprehension and summarizing what is listened to both in speaking and writing

Speaking: Discussing specific topics in pairs or small groups and reporting what is discussed. Functional English: Complaining and Apologizing.

Reading: Reading a text in detail by making basic inferences –recognizing, and interpreting specific context clues; strategies to use text clues for comprehension, critical reading.

Writing: Letter writing- types, format and principles of letter writing, E-mail Etiquette, Writing a Resume/CV and Covering Letter.

Non- Detailed : The Post Office by Rabindranath Tagore (Macmillan India)

UNIT-IV

LIKE A TREE, UNBOWED : WANGARI MAATHAI - BIOGRAPHY (From Infotech English, Maruthi Publications).

Vocabulary: Technical Vocabulary, GRE Vocabulary, Antonyms and Synonyms, Word Applications, Cloze Encounters, Phrasal Verbs, Verbal Reasoning.

Grammar: Quantifying Expressions - Adjectives and Adverbs: comparing and contrasting; Degrees of comparison

Listening: Making predictions while listening to conversations/ transactional dialogues without video (only audio), listening to audio-visual texts.

Speaking: Role plays for practice of conversational English in academic contexts (formal and informal) - Asking for and Giving Information/Directions. Functional English: Asking for Permissions, Requesting, Inviting.

Reading: Studying the use of graphic elements in text to convey information.

Writing: Interpreting Visual Information, Statement of Purpose, Writing for Media, Writing for Clarity.

Non- Detailed : The Post Office by Rabindranath Tagore (Macmillan India)

UNIT-V

STAY HUNGRY, STAY FOOLISH (From Infotech English, Maruthi Publications).

Vocabulary: Technical Vocabulary, GRE Vocabulary, Antonyms and Synonyms, Word Applications, Phrasal Verbs, Verbal Reasoning.

Grammar: Identifying and Correcting Common Errors in Grammar and Usage (articles, prepositions, tenses, subject-verb agreement), Reported Speech.

Listening: Identifying key Terms, Understanding Concepts and Interpreting the Concepts both in speaking and writing.

Speaking: Formal oral presentations on topics from academic contexts. Functional English: Suggesting/Opinion giving.

Writing: Writing Academic Proposals - Writing Research Articles, Poster Presentation.

Non- Detailed : The Post Office by Rabindranath Tagore (Macmillan India)

UNIT-VI
ON SAYING PLEASE – A.G.Gardiner

Vocabulary: Technical Vocabulary, GRE Vocabulary, Antonyms and Synonyms, Foreign phrases.

Grammar: Active and Passive Voice.

Listening: Understanding Concepts, Global Comprehension from a TED talk.

Speaking: Giving Commands/instructions.

Readin : Reading Comprehension Practice for IELTS.

Writing: Note making, Blog writing.

Non- Detailed : The Post Office by Rabindranath Tagore (Macmillan India)

Books Prescribed

"Infotech English", Maruthi Publications. (Detailed)

"The post Office" by Rabindranath Tagore, Macmillan India(Non - Detailed)

Reference books:

1. Bailey,Stephen. Academic writing: A handbook for international students. Routledge,2014.
2. Chase, Becky Tarver. Pathwasys: Listening,Speaking and Critical Thinking. Heinley ELT; 2nd Edition, 2018.
3. Skillful Level 2 Reading and Writing Student's Book Pack (B1) Macmillan Educational.
4. The Official Cambridge Guide to IELTS, for Academic and General Training.(2015)

Practical English Usuage, Michael Swan, OUP ,1995.

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	-	-	3	1.5	V20ENL01
Name of the Course	Hone your Communication Skills, Lab-I					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Identify suitable expressions to greet people, say good bye to them, introduce one another, listen to consonants	K2
CO2	Select suitable words to invite someone, accept or decline invitations, listen to…, identify and produce vowel sounds	K2
CO3	Choose suitable expressions to seek/refuse permissions, to apologize and listen to word accent	K3
CO4	Find apt expressions to give suggestions, express opinions and identify tone groups.	K3
CO5	Use appropriate words to give commands, requests and identify pauses and prominent syllables	K3
CO6	Practise listening to dialogues, role-plays using common vocabulary used in dialogues	K3

Syllabus

Unit-1 Hello, I'm

- Greeting people
- Saying goodbye to people
- Introducing yourself to someone/someone to someone else
- Listening and Identifying Consonants

Unit-2 I Would Love to…. but,

- Inviting someone
- Accepting or declining invitations
- Complaining about something
- Listening to, Identifying and Producing Vowel Sounds

Unit-3 With Your Permission I would like to.....

- Seeking Permission
- Granting/refusing permissions
- Apologising
- Listening to syllables and Word Accent and practise.

Unit-4 Why don't we....?

- Making Suggestions
- Agreeing/disagreeing with a suggestion
- Expressing Opinions
- Using Weak Forms
- Identifying Tone Groups

Unit-5 Could you Please....

- Giving Commands/instructions
- Requesting someone for something
- Identifying pauses and prominent syllables
- Identifying and using different tones

Unit-6 Dialogues

- The norms of dialogues
- Common vocabulary used in dialogues
- Carrying on a dialogue
- Listening to dialogue.

Book Prescribed

Strengthen Your Steps - A multimodal course in communication skills (Maruthi Publications)

Books for Further Reference

1. Better English Pronunciation (J.D.O'Connor), Cambridge University.

2. English Conversation Practice (A Practical Guide to improve Conversational Skills), Sterling Publishers.

3. Exercise in spoken English, Parts-I-III.CIFEL, Hyderabad, Oxford University Press.

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	-	-	3	1.5	V20ENL02
Name of the Course	Hone your Communication Skills, Lab-II					
Branches	**Common to All Branches**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Collect suitable expressions and vocabulary to participate in JAM.	K1
CO2	Prepare, face and perform well in interviews with required etiquette.	K3
CO3	Use appropriate telephone etiquette to succeed in telephonic interviews.	K3
CO4	Show team spirit and communicative skills in group discussion.	K3
CO5	Arrange ideas and prepare to give presentations in a professional manner.	K4
CO6	Debate rationally and cogently while putting forth the ideas.	K4

Syllabus

Unit-1 JAM Session

- Preparation for JAM Session
- Participation in JAM

Unit-2 Interviews

- Guidelines for facing interviews
- Three R's of interviews
- Practice Activity (Mock Interviews)

Unit-3 Effective Telephone Interviews

- Telephone Etiquette
- Preparing for telephonic interviews
- Acing interviews
- Practice Activity (Mock Interviews)

Unit-4 Group Discussions

- Tips to participate in Group Discussion
- Practice Activity

Unit-5 Presentation and Public Speaking

- Three P's of Presentation
- Do's and Don'ts in a Power-point Presentation
- Oral Presentations
- Introduction to Public Speaking
- Strategies for successful Public Speaking
- Practice Activity

Unit-6 Debate

- Introduction to Debate
- Parts of a Debate
- Guidelines to participate in a Debate
- Practice Activity

Book Prescribed

Strengthen Your Steps - A multimodal course in communication skills (Maruthi Publications)

Books for further reference

1. English Language Communication Skills, Lab Manual cum Workbook (with CD),Cengage Learning.

2. The Students Companion –Wilfred D. Best (New Edition) – Harper,CollinsPublishers,2012.

3. Hewings, Martin. Cambridge Academic English (B2).CUP, 2012.

Sixth Meeting of Academic Council

Agenda Notes

Item No.1: Welcoming the members.

Item No.2: To review the progress of the institute

Item No.3: To approve the minutes of the previous meeting. The details are given in **Annexure-I**

Item No.4:

a. To approve V21 regulations for the award of M.Tech degree.(Details are given in Annexure-II(a)).
b. To approve course structure for VariousSpecializations of M.Techprogramme under V21 Regulations. (Details are given in Annexure-II(b)).
c. To approve V21 regulations & course structure for the award of MBA degree.(Details are given in Annexure-II(c)).

Item No.5: To approve the minutes of the meeting of BOS of various departments.

a. Minutes of 4th BOS meeting of Civil Engineering Department.(Details are given in Annexure-III)
b. Minutes of 5th BOS meeting of Electrical & Electronics Engineering. (Details are given in Annexure-IV)
c. Minutes of 5th BOS meeting of Mechanical Engineering.(Details are given in Annexure-V)
d. Minutes of 5th BOS meeting of Electronics& Communiction Engineering.(Details are given in Annexure-VI)
e. Minutes of 5th BOS meeting Computer Science and Engineering.(Details are given in Annexure-VII)
f. Minutes of 5th BOS meeting of Mathematics.
(Details are given in Annexure-VIII)

g. Minutes of 5th BOS meeting of English.
   (Details are given in Annexure-IX)
h. Minutes of 4th BOS meeting of MBA.
   (Details are given in Annexure-X)

Item No.6: To approve the minutes Results committee.
(Details are given in Annexure-XI)

Item No.7: Amendments to UG V18 Academic Regulations

The proposed amendments are given in Annexure-XII

Item No.8: To nominate BOS members for AI&ML.

(Details are given in Annexure-XIII)

Item No.9: Any other item with the permission of the chair.

Annexure-I

Action taken report on the Minutes of the Fourth Academic Council Meeting held on 07/01/2021.

Item No.1: Welcoming the members.

Principal **Prof. Guduru VNSR Ratnakara Rao** welcomed the members and chaired the meeting.

Item No.2: The approve the minutes of the previous meeting.

The council approved the action taken report presented.

Item No.3: Approval of the minutes of the meeting of joint BOS held on 26/12/2020.

The council approved the minutes of joint BOS meeting held on 26/12/2020.

Item No.4: To approve the minutes of the meeting of BOS of various departments.

The council approved the minutes of the meeting of BOS of Various Departments.

Item No.5: To approve M.Tech & MBA students results (2018 Admitted Batch).

The council approved the results of M.Tech & MBA students(2018 Admitted Batch).

Item No.6: Replacement and Extension of BOS members to another term

(Two Years). The council approved to continue the existing council nominee BOS members for another term(two years)

Item No.7: Any other item with the permission of the chair.

The Council reviewed and approved the Results of IV Semester (2018 admitted batch) and II Semester (2019 admitted batch).

As per the directions of university authorities common academic regulations for all autonomous colleges of JNTUK is followed for the B.Tech programme is followed for the batches admitted from 2020-2021. The detail regulations are already communicated to all the council members on 5th of June 2021 through emails. The detailed regulations are as follows

AUTONOMOUS COLLEGES OF JNTUK

COMMON ACADEMIC REGULATIONS (R20) FOR B. TECH PROGRAMME

(Applicable for from the Academic Year 2020-21)

1. Award of B. Tech.Degree

(a) A student will be declared eligible for the award of B. Tech. Degree if he fulfils the following academic regulations:

(i) A student shall be declared eligible for the award of B. Tech Degree, if he pursues a course of study in not less than four and not more than eight academic years. After eight academic years from the year of their admission, he/she shall **forfeit** their seat in B. Tech course and their admission standscancelled.

(ii) The candidate shall register for 160 credits and secure all the 160credits.

(b) The medium of instruction for the entire under graduate programme in Engineering & Technology will be in **English**only.

2. ProgrammePattern:

a) Total duration of the of B. Tech (Regular) Programme is four academicyears
b) Each Academic year of study is divided into **TwoSemesters**.
c) Minimum number of instruction days in each semester is90.
d) Grade points, based on percentage of marks awarded for each course will form the basis for calculation of SGPA (Semester Grade Point Average) and CGPA (Cumulative Grade Point Average).
e) The total credits for the Programme is160.
f) Three week induction program is mandatory for all first year UG students and shall be conducted as per AICTE/UGC/APSCHE guidelines.
g) Student is introduced to “Choice Based Credit System(CBCS)”.
h) A pool of interdisciplinary and job-oriented mandatory skill courses which are relevant to the industry are integrated into the curriculum of concerned branch of engineering (total five skill courses: two basic level skill courses, one on soft skills and other two on advanced level skill courses)
i) A student has to register for all courses in asemester.
j) All the registered credits will be considered for the calculation of finalCGPA.
k) Each semester has - ‘Continuous Internal Evaluation (CIE)’ and ‘Semester End Examination (SEE)’. Choice Based Credit System (CBCS) and Credit Based Semester System (CBSS) as indicated by UGC and course structure as suggested by AICTE arefollowed.
l) A 10 months industry/field mandatory internship, both industry and social, during the summer vacation and also in the final semester to acquire the skills required for job and make engineering graduatestoconnectwiththeneedsoftheindustryandsocietyatlarge.
m) All the students shall be mandatorily registered for NCC, NSS activities and Community Service Project as per the Government and Universitynorms.
n) Each college shall assign a faculty advisor/mentor after admission to each student or group of students from same department to provide guidance in courses registration/career growth/placements/opportunities for higher studies/GATE/other competitive examsetc.

3. Registration forCourses:

a) In each semester a student shall mandatorily register courses which he/she wishes to pursue within a week from the starting of the class work with the advice of Head of the Department and mentor of the student of the concerned department of thecollege.

b) If any student wishes to withdraw the registration of the course, he/she shall submit a letter to the Principal of the college through the Head of the Department and mentor within fifteendays.

c) The concerned college shall thoroughly verify and upload the data/courses registered by each student in the university examination center within 20 days. The Principal of the concerned college shall ensure that there no wrong registration courses by the student. The university registration portal will be closed after 20days.

4. (a) Award of B. Tech. Degree: A student will be declared eligible for the award of B. Tech. Degree if he fulfills the following academicregulations:

i. A student shall be declared eligible for award of the B. Tech Degree, if he pursues a course of study in not less than four and not more than eight academic years. After eight academic years from the year of their admission, he/she shall **forfeit** their seat in B. Tech course and their admission stands cancelled.

ii. The student shall register for 160 credits and must secure all the 160credits.

iii. All students shall mandatorily register for the courses like Environmental Sciences, Universal Human Values, Ethics, Indian Constitution, Essence of Indian Traditional Knowledge etc., shall be included in the curriculum as non-credit mandatory courses. Environmental Sciences is to be offered compulsorily as mandatory course for all branches. A student has to secure at least 40% of the marks allotted in the internal evaluation for passing the course and shall maintain 75% of attendance in the course.

iv. All students shall mandatorily register for NCC/NSS activities and will be required to participate in an activity specified by NSS officer during second and third semesters. Grade shall be awarded as Satisfactory or Unsatisfactory in the mark sheet on the basis of participation, attendance, performance and behavior. If a student gets an unsatisfactory Grade, he/she shall repeat the above activity in the subsequent years, in order to complete the degreerequirements.

v. Credits are defined as per AICTEnorms.

(b) Award of B. Tech. (Honor)/B. Tech. (Minor)**:** B. Tech. with Honors or a B. Tech. with a Minor will be awarded if the student earns 20 additional credits are acquired as per the regulations/guidelines. The regulations/guidelines are separately provided. Registering for an Honors/Minor is optional.

5. AttendanceRequirements

a) A student is eligible to write the University examinations if he acquires a minimum of 40% in each subject and 75% of attendance in aggregate of all thesubjects.

b) Condonation of shortage of attendance in aggregate up to 10% (65% and above, and below 75%) may be granted by the College Academic Committee. However, this condonation concession is applicable only to any two semesters during the entireprogramme.

c) Shortage of Attendance below 65% in aggregate shall not becondoned.

d) A student who is short of attendance in a semester may seek re-admission into that semester when offered within 4 weeks from the date of commencement of classwork.

e) Students whose shortage of attendance is not condoned in any semester are not eligible to write their end semester examination of thatclass.

f) A stipulated fee of Rs. 500/- in the concerned semester shall be payable towards condonation of shortage of attendance. Students availing condonation on medical ground shall produce a medical certificate issued by the competitiveauthority.

g) A student will be promoted to the next semester if he satisfies the (i) attendance requirement of the present semester and (ii) minimum requiredcredits.

h) If any candidate fulfills the attendance requirement in the present semester, he shall not be eligible for readmission into the sameclass.

i) For induction programme attendance shall be maintained as per AICTEnorms.

j) For non-credit mandatory courses the students shall maintain the attendance similar to creditcourses

6. Evaluation-Distribution and Weightage ofmarks

(i) Paper setting and evaluation of the answer scripts shall be done as per the procedures laid down by the University Examination section from time totime.

(ii) To maintain the quality, external examiners and question paper setters shall be selected from reputed institutes like IISc, IITs, IIITs, IISERs, NITs andUniversities.

(iii) For non-credit mandatory courses, like Environmental Sciences, Universal Human Values, Ethics, IndianConstitution,EssenceofIndianTraditionalKnowledge,thestudenthastosecure40 %ofthemarks allotted in the internal evaluation for passing the course. No marks or letter grade shall be allotted for all mandatory non-credit courses.

(iv) A student is deemed to have satisfied the minimum academic requirements if he has earned the credits allotted to each theory/practical design/drawing subject/ project etc by securing not less than 35% of marks in the end semester exam and minimum 40% of marks in the sum total of the internal marks and end semester examination markstogether.

(v) Distribution and Weightage ofmarks:

The assessment of the student's performance in each course will be as per the details given:

S. No	Components	Internal	External	Total
1	Theory	30	70	100
2	Engineering Graphics/Design/Drawing	30	70	100
3	Practical	15	35	50
4	Mini Project/Internship/Industrial Training/ Skill Development programmes/Research Project	- -	50	50
5	Project Work	60	140	200

(vi) Continuous Internal Theory Evaluation:

a) For theory subjects, during a semester, there shall be two mid-term examinations. Each mid-term examination consists of (i) one online objective examination (20 multiple choice questions) for 10 marks for a duration of 20 minutes (ii) one descriptive examination (3 full questions for 5 marks each) for 15 marks for a duration of 90 minutes and (iii) one assignment for marks. All the internal exams shall be conducted as per university norms from first 50% of thesyllabi.

b) In the similar lines, the second online, descriptive examinations assignment shall be conducted on the rest of the 50%syllabus.

c) The total marks secured by the student in each mid-term examination are evaluated for 30 marks. The first mid marks (Mid-1) consisting of marks of online objective examination, descriptive examination and assignment shall be submitted to the University examination section within one week after completion of first midexamination.

d) The mid marks submitted to the University examination section shall be displayed in the concerned college notice boards for the benefit of thestudents.

e) If any discrepancy found in the submitted Mid-1 marks, it shall be brought to the notice of university examination section within one week from thesubmission.

f) Second mid marks (Mid-2) consisting of marks of online objective examination, descriptive examination and assignment shall also be submitted to University examination section within one week after completion of second mid examination and it shall be displayed in the notice boards. If any discrepancy found in the submitted mid-2 marks, it shall be brought to the notice of university examination section within one week from thesubmission.

g) Internal marks can be calculated with 80% weightage for better of the two mids and

20% Weightage for other midexam.

Example:

Mid-1 marks = Marks secured in (online examination-1+descriptive examination 1+one assignment-1)

Mid-2 marks = Marks secured in (online examination-2+descriptive examination-2+one assignment-2)

Final internal Marks = (Best of (Mid-1/Mid-2) marks x 0.8+ Least of (Mid-1/Mid-2) marks x 0.2)

h) With the above criteria, university examination section will send mid marks of all courses in consolidated form to all the concerned colleges and same shall be displayed in the concerned college notice boards. If any discrepancy found, it shall be brought to the notice of university examination section through proper channel within one week with all proofs. Discrepancies brought after the given deadline will not be entertained under anycircumstances.

(vii) Semester End Theory ExaminationsEvaluation:

a) The semester end examinations will be conducted university examination section for 70 marks consists of five questions carrying 14 marks each. Each of these questions is from one unit and may contain sub-questions. For each question there will be an "either" "or" choice, which means that there will be two questions from each unit and the student should answer either of the two questions.

b) For practical courses there shall be continuous evaluation during the semester for 15 internal marks and 35 end examination marks. The internal 15 marks shall be awarded as follows: day to day work - 5 marks, Record-5 marks and the remaining 5 marks to be awarded by conducting an internal laboratory test. The end examination shall be conducted by the teacher concerned and external examiner appointed.

c) For the courses having design and / or drawing, (such as Engineering Graphics, Engineering Drawing, Machine Drawing) and estimation, the distribution shall be 30 marks for internal evaluation (15 marks for continuous Assessment (day–to–day work) and 15 marks for internal tests) and 70 marks for end examination. There shall be two internal tests in a Semester for 15 marks each and final marks can be calculated with 80% weightage for better of the two tests and 20% weightage for other test and these are to be added to the marks obtained in day to daywork.

d) Evaluation of the summer internships: It shall be completed in collaboration with local industries, Govt. Organizations, construction agencies, Industries, Hydel and thermal power projects and also in software MNCs in the area of concerned specialization of the UG programme. Students shall pursue this course during summer vacation just before its offering as per course structure. The minimum duration of this course is at least 6 weeks. The student shall register for the course as per course structure after commencement of academic year. A supervisor/mentor/advisor has to be allotted to guide the students for taking up the summer internship. The supervisor shall monitor the attendance of the students while taking up the internship. Attendance requirements are as per the norms of the University. After successful completion, students shall submit a summer internship technical report to the concerned department and appear for an oral presentation before the departmental committee consists of an external examiner; Head of the Department; supervisor of the internship and a senior faculty member of the department. A certificate from industry/skill development center shall be included in the report. The report and the oral presentation shall carry 40% and 60% weightages respectively. It shall be evaluated for 50 external marks at the end of the semester. There shall be no internal marks for Summer Internship. A student shall secure minimum 40% of marks for successful completion. In case, if a student fails, he/she shall reappear as and when semester supplementary examinations are conducted by theUniversity.

e) The job oriented skill courses may be registered at the college or at any accredited external agency. A student shall submit a record/report on the on the list skills learned. If the student completes job oriented skill course at external agency, a certificate from the agency shall be included in the report. The course will be evaluated at the end of the semester for 50 marks (record: 15 marks and viva-voce: 35 marks) along with laboratory end examinations in the presence of external and internal examiner (course instructor or mentor). There are no internal marks for the job oriented skillcourses.

f) Mandatory Course (M.C): Environmental Sciences, Universal Human Values, Ethics, Indian Constitution, Essence of Indian Traditional Knowledge etc non-credit (zero credits) mandatory courses. Environmental Sciences shall be offered compulsorily as mandatory course for all branches. A minimum of 75% attendance is mandatory in these courses. There shall be an external examination for 70 marks and it shall be conducted by the college internally. Two internal examinations shall be conducted for 30 marks and a student has to secure at least 40% of the marks for passing the course. There is no online internal exam for mandatory courses. No marks or letter grade shall be printed in the transcripts for all mandatory non-credit courses, but only Completed (Y)/Not-completed (N) will bespecified.

g) **Procedure for Conduct and Evaluation of MOOC:** There shall be a Discipline Centric Elective Course through Massive Open Online Course (MOOC) as Program Elective course. The student shall register for the course (Minimum of 12 weeks) offered by SWAYAM/NPTEL through onlinewiththeapprovalofHeadoftheDepartment.TheHeadoftheDepartmentshallappointone mentor for each of the MOOC courses offered. The student needs to register the course in the SWAYAM/NPTEL portal. During the course, the mentor monitors the student's assignment submissions given by SWAYAM/NPTEL. The student needs to submit all the assignments given and needs to take final exam at the proctor center. The student needs to earn a certificate by passing the exam. The student will be awarded the credits given in curriculum only by submission of the certificate. In case if student does not pass courses registered through SWAYAM/NPTEL, the same or alternative equivalent course may be registered again through SWAYAM/NPTEL in the next semester with the recommendation of HOD and shall be pass.

h) *Major Project (*Project - Project work, seminar and internship inindustry):

In the final semester, the student should mandatorily register and undergo internship and in parallel he/she should work on a project with well-defined objectives. At the end of the semester the candidate shall submit an internship completion certificate and a project report. A student shall also be permitted to submit project report on the work carried out during the internship. The project report shall be evaluated with an external examiner.

Evaluation: The total marks for project work 200 marks and distribution shall be 60 marks for internal and 140 marks for external evaluation. The supervisor assesses the student for 30 marks (Report: 15 marks, Seminar: 15 marks). At the end of the semester, all projects shall be showcased at the department for the benefit of all students and staff and the same is to be evaluated by the departmental Project Review Committee consisting of supervisor, a senior faculty and HOD for 30 marks. The external evaluation of Project Work is a Viva-Voce Examination conducted in the presence of internal examiner and external examiner and is evaluated for 140marks.

7. ResultsDeclaration:

(i) Before results declaration, an academic council meeting shall be conducted and results shall be placed before the academic council for approval.
(ii) With the approval of academic council, the results shall be submitted to the University to get the approval from HonorableVice-Chancellor.
(iii) The University may normalize the result, if required, before declaration of the

result (Guidelines for normalization will be providedseparately)
(iv) A copy of approved results in a CD shall be submitted to the University examinationCenter.

8. Academic Audit: Academic audit in each semester will be conducted as pernorms.

9. Recounting or Re-evaluation of Marks in the End Semester Examination: A student can request for recounting of revaluation of his/her answer book on payment of a prescribed fee as per universitynorms.

10. Supplementary Examinations: A student who has failed to secure the required credits can appear for a supplementary examination, as per the schedule announced by theUniversity.

11. Malpractices in Examinations: Disciplinary action shall be taken in case of malpractices during Mid/End examinations as per the rules framed by theUniversity.

12. PromotionRules

The following academic requirements have to be satisfied in addition to the attendance requirements mentioned in item no.5 for promotion to higher classes

a) A student shall be promoted from first year to second year if he fulfills the minimum attendance requirement as per Universitynorm.
b) A student will be promoted from II year to III year if he fulfills the academic requirement of 40% of credits up to either II year I-Semester or II year II-Semester from all the examinations, whether or not the candidate takes the examinations and secures prescribed minimum attendance in II year II semester.
c) A student shall be promoted from III year to IV year if he fulfills the academic requirements of 40% of the credits up to either III year I semester or III year II semester from all the examinations, whether or not the candidate takes the examinations and secures prescribed minimum attendance in III year IIsemester.

13. CoursePattern

a) The entire course of study is for four academic years; all years are on semesterpattern.
b) A student eligible to appear for the end semester examination in a course, but absent from it or has failed in the end semester examination, may write the exam in that course when conductednext.
c) When a student is detained for lack of credits / shortage of attendance, he may be re-admitted into the same semester/year in which he has been detained. However, the academic regulations under which he was first admitted shall continue to be applicable tohim.

14. Earning ofCredit:

A student shall be considered to have completed a course successfully and earned the credits if he/she secures an acceptable letter grade in the range A+ to E as given below. Letter grade 'F' in any course implies failure of the student in that course and no credits earned. Absent is also treated as no credits earned. For project same % percentages will be followed for grading.

Marks Range Theory (Max – 100)	Marks Range Lab (Max – 50)	Level	Letter Grade	Grade Point
≥ 90	≥ 45	Outstanding	A+	10
≥80 to <89	≥40 to <44	Excellent	A	9
≥70 to <79	≥35 to <39	Very Good	B	8
≥60 to <69	≥30 to <34	Good	C	7
≥50 to <59	≥25 to <29	Fair	D	6
≥40 to <49	≥20 to <24	Satisfactory	E	5
<40	<20	Fail	F	0
-		Absent	AB	0

15. Award ofClass

After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. Degree, he shall be placed in one of the following fourclasses:

Class Awarded	CGPA to be secured	Remarks
First Class with Distinction	≥ 7.75 (Without any supplementary appearance)	From the CGPAsecured from160 Credits
First Class	≥ 6.75	
Second Class	≥ 5.75 to < 6.75	
Pass Class	≥ 5.00 to < 5.75	

16. Minimum InstructionDays

The minimum instruction days for each semester shall be 90 working days. There shall be no branch transfers after the completion of the admission process. There shall be no transfer from one college/stream to another within the Constituent Colleges and Units of Jawaharlal Nehru Technological University Kakinada.

17. Withholding ofResults

If the student is involved in indiscipline/malpractices/court cases, the result of the student will be withheld.

18. TransitoryRegulations

a) Discontinued or detained candidates are eligible for re-admission as and when nextoffered.
b) The re-admitted candidate will be governed by the rules & regulations under which the candidate has beenadmitted.
c) (i) In case of transferred students from other Universities, credits shall be transferred to JNTUK as per the academic regulations and course structure ofJNTUK.
d) The students seeking transfer to colleges affiliated to JNTUK from various other Universities / Institutions have to obtain the credits of any equivalent courses as prescribed by JNTUK. In addition, the transferred candidates have to pass the failed courses at the earlier Institute with already obtained internal/sessional marks to be conducted byJNTUK.

19. Gap –Year

Gap Year concept of Student Entrepreneur in Residence shall be introduced and outstanding students who wish to pursue entrepreneurship are allowed to take a break of one year at any time after I/II/III year to pursue entrepreneurship full time. This period shall be counted for the maximum time for graduation. An evaluation committee at universitylevel shall be constituted to evaluate the proposal submitted by the student and the committee shall decide on permitting the student for availing the GapYear.

20. General

a) Wherever the words “he”, “him”, “his”, occur in the regulations, they include “she”, “her”,“hers”.
b) The academic regulation should be read as a whole for the purpose of anyinterpretation.
c) In case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Vice- Chancellor isfinal.

d) The University may change or amend the academic regulations or syllabi at any time and the changes or amendments made shall be applicable to all the students with effect from the dates notified by theUniversity.

****

ACADEMIC REGULATIONS (R19) FOR B. TECH. (LATERAL ENTRY SCHEME)

Applicable for the students admitted into II year B. Tech. from the Academic Year 2020-21 onwards

1. **Award of B. Tech. Degree**

A student will be declared eligible for the award of B. Tech. Degree if he fulfills the following academic regulations:

a) A student shall be declared eligible for the award of the B. Tech Degree, if he pursues a course of study in not less than three academic years and not more than six academic years. Aftersixacademicyearsfromtheyearoftheiradmission,he/sheshall**forfeit**theirseat inB. Tech course and their admission stands cancelled.

b) The candidate shall register for 121 credits and secure all the 121credits.

2. The attendance regulations of B. Tech. (Regular) shall be applicable to B.Tech (lateral entry).

3. **PromotionRules**

A student shall be promoted from second year to third year if he fulfills the minimum attendance requirement.

A student shall be promoted from III year to IV year if he fulfills the academic requirements of 40% of the credits up to either III year I semester or III year II semester from all the examinations, whether or not the candidate takes the examinations and secures prescribed minimum attendance in III year II semester.

4. **Award ofClass**

After a student has satisfied the requirement prescribed for the completion of the program and is eligible for the award of B. Tech. Degree, he shall be placed in one of the following four classes:

Class Awarded	CGPA to be secured	Remarks
First Class with Distinction	≥ 7.75 (Without any supplementary appearance)	From the CGPA secured from 121 Credits from II Yearto IVYear
First Class	≥ 6.75	
Second Class	≥ 5.75 to < 6.75	
Pass Class	≥ 5.00 to < 5.75	

The Grades secured, Grade points and Credits obtained will be shown separately in the memorandum of marks.

5. All the other regulations as applicable to **B. Tech. 4-year degree course (Regular) will hold good for B. Tech. (Lateral EntryScheme)**

Annexure-II(a)

ACADEMIC RULES & REGULATIONS (V21) FOR M.Tech

Applicable for the batch of students admitted from the Academic Year **2021-2022**

ACADEMICREGULATIONSV21FORM.TechDEGREECOURSE

Applicable for the students of M. Tech (Regular) programme from the Academic Year 2020-21onwards. The M. Tech Degree from Sri Vasavi Engineering college, Tadepalligudem shall beconferred on candidates by the affiliaty university who are admitted to the program and who fulfill all the requirements for theawardof theDegree.

1.0ELIGIBILITYFORADMISSIONS

Admission to the above program shall be made subject to eligibility,qualification andspecialization as prescribed bytheUniversity/ State Government from timeto time.

Admissions shall be made on the basis of merit/rank obtained by the candidates at thequalifying Entrance Test conducted by the University or on the basis of any other order of meritas approved by the University/ State Government, subject to reservations as laid down by the Govt. from time totime.

2.0 AWARDOFM.Tech DEGREE

2.1 AstudentshallbedeclaredeligiblefortheawardoftheM.TechDegree,ifhepursuesprogramof studyin not less than twoand not morethan four academicyears.

2.2 The student shall register for all 68 credits and secure all the 68 credits.

2.3 Theminimuminstructiondaysineachsemesterare90.

3.0PROGRAMMEOFSTUDY

ThefollowingspecializationsareofferedatpresentfortheM.TechProgrammeofstudy.

Civil	M.Tech. – CIVIL(Structural Engineering)
EEE	M.Tech-PowerElectronicsandPowerSystems
ME	M.Tech-ThermalEngineering
ECE	M.Tech-EmbeddedSystem &VLSI
CSE	M.Tech-ComputerScience

and anyother courseas approved byAICTE/ Universityfrom timeto time.

4.0 **ATTENDANCE**

4.1 A student shall be eligible to appear for examinations if he acquires a minimum of75% of attendance in aggregate of all the courses, and with minimum 50% ineachand everycourseincludingpracticals.

4.2 Condonation of shortage of attendance in aggregate up to 10% (65% and above andbelow75%) ineach semestershall begrantedbytheCollegeAcademicCommittee.

4.3 Shortage of Attendance **below** 65% in aggregate shall not be condoned.

4.4 Studentswhose shortage of attendance is not condoned in any semester are not eligibleto write their end semester examination of that semester.

4.5 Aprescribedfeeshallbe payabletowardscondonationofshortageofattendance.

4.6 A student shall not be promoted to the next semester unless, he satisfies the attendancerequirement of the present semester, as applicable. They may seek re-admission into thatsemester when offered next. If any candidate fulfills the attendance requirement in thepresentsemester, heshallnot be eligiblefor re-admission intothe same class.

5.0 EVALUATION

The performance of the candidate in each semester shall be evaluated course-wise, with amaximumof100marksfortheoryandpractical,onthebasisofInternalEvaluationand End SemesterExamination.

5.1 For the theory courses 70 marks shall be awarded based on the performance in the EndSemester Examination and 30 marks shall be awarded based on the continuous Internal Evaluation.The internal evaluation shall be made based on the **average** of the marks secured in thetwo Mid Term-Examinations conducted-one in the middle of the Semester and the otherimmediately after the completion of instruction. Each mid term examination shall beconducted for a total duration of 120 minutes with 3 questions (without choice) eachfor 10 marks. End semester examination isconducted for 70 marks for all FIVE (5) questions (one question from one unit) to beanswered(either or).

5.2 For practical courses, 70 marks shall be awarded based on the performance in the EndSemesterExaminationsand30marksshallbeawardedbasedontheday-to-dayperformance as Internal Marks. The internal evaluation based on the day to day work-10marks, record- 10 marks and the remaining 10 marks to be awarded by conducting aninternal laboratory test. The end examination shall be conducted by the examiners, with abreakupmarks ofProcedure-20,Experimentation-20, Results-20, Viva-voce-10.

5.3 For Mini Project with Seminar, a student under the supervision of a faculty member, shallcollect the literature on a topic and critically review the literature and submit it to thedepartment in a report form and shall make an oral presentation before the Project ReviewCommittee consisting of Head of the Department, supervisor/mentor and two other seniorfacultymembersofthedepartment.ForMiniProjectwithSeminar,therewillbeonlyinternalevaluationfor50marks.Acandidatehastosecureaminimumof50%of markstobe declared successful.

5.4 A candidate shall be deemed to have secured the minimum academic requirement in acourse if he secures a minimum of 40% of marks in the End semester Examination and aminimum aggregate of 50% of the total marks in the End Semester Examination andInternalEvaluation takentogether.

5.5 In case the candidate does not secure the minimum academic requirement in any course (as specified in 5.4) he has to re-appear for the End semester Examination in that course.A candidate shall be given **one** chance to re-register for each course provided the internalmarks secured by a candidate **are less than 50% and has failed in the end examination.**In such a case, the candidate must re-register for the course(s) and secure the requiredminimum attendance. The candidate's attendance in the re-registered course(s) shall becalculated separately to decide upon his eligibility for writing the end examination in thosecourse(s). In the event of the student taking another chance, his internal marks and endexaminationmarksobtainedinthepreviousattemptshallstandscancelled. Forre-registration the candidates have to apply to the college by payingthe requisite fees and get approval before the start of the semester inwhichre-registration is required.

5.6 Incasethecandidatesecureslessthantherequiredattendanceinanyre-registeredcourse(s), he shall not be permitted to write the End Examination in that course.He shallagainre-register thecourse when next offered.

5.7 Laboratory examination for M. Tech. courses must be conducted with two Examiners, oneof them being the Laboratory Class Teacher and thesecondexaminershallbeappointedbytheprincipalfromthepanelofexaminerssubmitted bytherespectivedepartment.

6.0EVALUATION OF PROJECT/DISSERTATION WORK

Every candidate shall be required to submit a thesis or dissertation on a topic approved bytheProject ReviewCommittee.

6.1 The work on the project shall be initiated at the beginning of the II year and the durationof the project is two semesters. A candidate is permitted to submit Project Thesis onlyafter successful completion of theory and practical course with the approval of PRC notearlier than 40 weeks from the date of registration of the project work. The candidate hastopass all the theoryandpractical courses beforesubmissionof theThesis.

6.2 A Project Review Committee (PRC) shall be constituted with Head of the Departmentand two otherseniorfacultymembersin thedepartment.

6.3 Registration of Dissertation/Project Work: A candidate is permitted to register for theproject work after satisfying the attendance requirement of all the courses, both theoryandpractical upto 2nd semester

6.4

Aftersatisfying6.3,acandidatehastosubmit,inconsultationwithhisprojectsuper visor, the title, objective and plan of action of his project work for approval. Thestudent can initiate the Project work, only after obtaining the approval from the ProjectReviewCommittee(PRC).

6.5 If a candidate wishes to change his supervisor or topic of the project, he can do so withthe approval of the Project Review Committee (PRC).However, the PRC shall examinewhether or not the change of topic/supervisor leads to a major change of his initial plansof project proposal.If yes, his date of registration for the project work will be taken as the date on which thechangeof Supervisor ortopicas the casemaybe applied.

6.6 Continuous assessment of Dissertation-I and Dissertation-II during the Semester(s) willbemonitored bythePRC.

6.7 A candidate shall submit his status report in two stages to the PRC, at least with a gap of3months between them.

6.8 At the end of the III semester project phase-1 is evaluated for 50 marks by the committee casting of HOD,supervisor and external examiner appointed by principal.

6.9 Three copies of the Project Thesis certified by the supervisor shall be submitted to thedepartment.

6.10 The thesis shall be adjudicated by one examiner selected by the principal.For this, theHOD of the department shall submit a panel of 5 examiners, eminent in that field, withthehelp of theguide concerned.

6.11 The Head of the Department shall coordinate and make arrangements for the conduct ofViva-Voceexamination.

6.12 If thereport of theexaminer is favorable,Viva-Voce examination shall be conductedby a board consisting of the Supervisor, Head of the Department and the examiner whoadjudicatedtheThesis.TheBoardshalljointlyevaluate thecandidate'sworkforamaximumof 100 marks.

6.13 If the report of the examiner isnotfavourable, the candidate shallrevise and resubmitthe Thesis, in the time frame as decided by the PRC. If the report of the examiner isunfavorable again, the thesis shall be summarily rejected. The candidate has tore-registerfortheprojectandcompletetheprojectwithinthestipulatedtimeaftertakin gtheapproval from the principal.

6.14 If the report of the Viva-Voce is unsatisfactory (ie, < 50 marks), the candidate shallretaketheViva-Voceexaminationonlyafterthreemonths.Ifhefailstogetasatisfactory report at the second Viva-Voce examination, the candidate has to re-registerfor the projectandcomplete the projectwithinthe stipulatedtime after taking theapprovalfrom theUniversity.

7.0 Supplementary Examinations

Supplementary examinations will be conducted twice in a year at the end of odd and even semester.

8.0 Revaluation

Recounting of marks in the end semester examinations

8.1 As per the notification issued by the controller of examinations, the students can submit the application for revaluation, along with the requisite fee receipt for revaluation of his/her answer script(s) of the theory course(s), if he /she is not satisfied with the marks obtained.
8.2 The Controller of examinations shall arrange for re-evaluate the answer script(s).
8.3 A new Examiner, other than the first examiner, shall re-evaluate the answer script(s).
8.4 Better marks out of the two shall be taken into consideration.
8.5 If the difference of marks between the two valuations is more than 15%, the answer script will be referred to third valuation. The average of nearest two marks will be awarded.

9.0 CumulativeGradePointAverage(CGPA)

MarksRangeTheory/Laboratory (Max–100)	LetterGrade	Level	GradePoint
≥90%	O	Outstanding	10
≥80to<90%	S	Excellent	9
≥70to<80%	A	VeryGood	8
≥60to<70%	B	Good	7
≥50to<60%	C	Satisfactory	6
<50%	F	Fail	0
		Absent	0

ComputationofSGPA

- The following procedure will be adopted to compute the Semester GradePointAverage(SGPA)andCumulativeGradePointAverage(CGPA):

- The **SGPA** is the ratio of sum of the product of the number of creditswith the grade points scored by a student in all the courses taken by astudent and the sum of the number of credits of all the courses undergonebyastudent, i.eSGPA(Si)=∑(CiXGi) /∑Ci

- Where Ci is the number of credits of the ith course and Gi is the gradepointscored bythe student in the ithcourse.

ComputationofCGPA

- The**CGPA**isalsocalculatedinthesamemanner takingintoaccountallthe courses undergone by a student over all the semester of aProgramme,i.e.
- **CGPA=∑(CiX Si)/∑Ci**
- Where Si is the SGPA of the i^{th} semester and Ci is the total number ofcreditsin that semester.
- TheSGPAand CGPAshall berounded offto 2decimal pointsandreportedin thetranscripts.

- EquivalentPercentage=(CGPA–0.75)x10

10.0AWARDOFDEGREE ANDCLASS

Afterastudenthassatisfiedtherequirementsprescribedforthecompletionoftheprog ramand is eligible for the award of M. Tech. Degree he shall be placed in one of the followingfourclasses:

	CGPAtobesecured	
FirstClasswithDistinction	≥ 7.75	**From theCGPA securedfrom68Credits** .
FirstClass	≥ 6.75	
SecondClass	≥ 5.75 to < 6.75	
PassClass	≥ 4.75 to < 5.75	

TheGrades secured,GradepointsandCredits obtainedwill beshown separatelyinthememorandumof marks.

11.0WITHHOLDINGOF RESULTS

Ifthestudentisinvolvedinindiscipline/malpractices/courtcases,theresultofthe studentwill bewithheld.

12.0TRANSITORYREGULATIONS (forV21)

12.1 When a student gets detained due to academic regulations and rejoins the college to complete the programme. However, the academic regulations under which he/she was first admitted shall continue to be applicable to him/her.

12.2 When a student discontinues for some time and rejoins the college to complete the programme. However, the academic regulations under which he/she was first admitted shall continue to be applicable to him/her.

13.0GENERAL

13.1 Whereverthe words“he”, “him”,“his”,occurin theregulations,theyinclude“she”,“her”,“hers”.

13.2 Theacademicregulationshouldbereadasawholeforthepurposeofanyinterpr etation.

13.3 In the case of any doubt or ambiguity in the interpretation of the above rules, thedecisionofthe Vice-Chancelloris final.

13.4 The University may change or amend the academic regulations or syllabi at any timeand the changes oramendments made shall be applicable to all the students witheffectfrom thedates notified bytheUniversity.

MALPRACTICESRULES

DISCIPLINARYACTIONFOR/IMPROPER CONDUCTINEXAMINATIONS

	NatureofMalpractices/Improperconduct
	Ifthecandidate:

ACADEMICREGULATIONSV21FORMBADEGREE COURSE

Applicable for the students of MBA (Regular) Course from the Academic Year 2021-22onwards.TheMBADegreeofSriVasaviEngineeringCollege,Tadepalligudemshallbeconferred on candidates who are admitted to the program and who fulfil all the requirements for theawardoftheDegree.

1.0ELIGIBILITYFORADMISSIONS

Admission to the above program shall be made subject to eligibility,qualification andspecializationasprescribedbytheUniversity/StateGovernmentfromtimetotime.

Admissions shall be made on the basis of merit/rank obtained by the candidates at thequalifying Entrance Test conducted by the University or on the basis of any other order of meritas approved by the University/ State Government, subject to reservations as laid down by theGovt. fromtime to time.

2.0 AWARDOFMBADEGREE

2.1 Astudentshallbedeclaredeligiblefortheawardofthe MBADegree,ifhe pursues a courseofstudyin notless than twoandnot morethan fouracademicyears.

2.2 The student shall register for all 106 credits and secure all the 106 credits.

2.3 Theminimum instruction daysineachsemesterare90.

3.0 ATTENDANCE

3.0 Astudentshallbeeligibletowriteendexaminationsifheacquiresaminimum of75%of attendance in aggregate of all the courses, and with minimum 50% in each and everycourseincludingpracticals.

3.1 Condonation of shortage of attendance in aggregate up to 10% (65% and above andbelow75%)in eachsemestershallbegranted bytheCollegeAcademicCommittee.

3.2 ShortageofAttendance**below**65%inaggregateshallnotbecondonedandnoteligibletowritetheirend semester examination of thatclass.

3.3 Studentswhoseshortageofattendanceisnotcondonedinanysemesterare noteligibletowritetheirend semester examination of thatclass.

3.4 Aprescribedfeeshall bepayabletowardscondonationofshortageofattendance.

3.5 A student shall not be promoted to the next semester unless, he satisfies the attendancerequirement of the present semester, as applicable. They may seek re-admission into thatsemester when offered next. If any candidate fulfills the attendance requirement in thepresentsemester, heshallnot be eligibleforre-admission intothe same class.

4.0 Examination and Scheme of Evaluation

The distribution of marks for internal and external examinations shall be evaluated course-wise as follows:

Sl.No.	Component	Internal	External	Total
1	Theory	30	70	100
2	Laboratory	20	30	50
3	Project & viva-voce	40	60	100

4.1 Internal assessment

i) 30 marks for internal assessment, 10 marks are for seminar/presentation and 20 marks are based on **average** of two mid-term examinations.
ii) 10 marks for presentation (5 marks are for report content and 5 marks are for presentation)
iii) Each mid-term examination is conducted for 20 marks with two hours duration. Each mid-term examination consists of four questions, each for 5 marks. All questions need to be answered.
iv) The final marks are the sum of average of two mid-term examinations for 20 marks and 10 marks for presentation.

4.2External Assessment

The semester end examination shall be conducted for a duration of three hours with A,B&C sections (Section A consists of 5 questions out of which Three questions are to be answered. Each question carries 5 marks, Section B consists of 5 eassy questions with internal choice, each for 8 marks & Section C case study for 15 marks) All Sections are to be answered.

4.3 Laboratory Course

i) For practical courses distribution shall be 20 marks for internal evaluation and 30 marks for the end semester examinations. There shall be continuous evaluation by the internal course teacher during the semester for 20 internal marks. Out of 20 marks for internal , 10 marks shall be for day-to-day performance (5 marks for day-to-day evaluation and 5 marks for Record) and 10 marks shall be evaluated by conducting an internal test conducted at the end of semester.

ii) End semester laboratory examination shall be conducted for 30 marks with two examiners, one of them being the Laboratory Class Teacher and second examiner shall be appointed by the Principal. The total 30 marks are break-up as 5 marks for procedure, 15 marks for experimentation and 5 marks each for results and Viva-Voce.

5.0 EVALUATION OF PROJECT WORK:

5.1 **A Project Review Committee** (PRC) will be constituted with Head of the Department, and two other senior faculty members of the department.

5.2 **Registration of Project work**: A Candidate is permitted to register for theproject work after satisfying the attendance requirement up to II semester.

5.3 Every candidate shall work on projects approved by the PRC.

5.4 A student has to undergo practical training for a period of 5 weeks in a Corporate Enterprise (as a part of the project) after the Second Semester. In training period, the candidates should work on a specific problem related to the elective course.

At the end of practical training, the student should submit a certificate obtained from the organization.

The student should prepare a Project Report under the supervision of a guide from the faculty of management of the college. However, the students who prepare Project Report in the area of systems can also work under the guidance of a Faculty member from Computer Science Department.

5.5 The progress of the project work shall be periodically reviewed by PRC. The PRC shall authorize/approve change of guide/topic/title as deemed fit. A student shall submit status report in line with the recommended project calendar as approved by PRC. Three copies of Project dissertation certified by the Project Supervisor shall be submitted to the College.

5.6 The project is evaluated for 100 Marks at the end of IV Semester. A student shall engage a minimum of 2 hours per week in III and IV semester in consolidating the data, report writing, results & analysis, conclusions etc. Evaluation shall comprise of internal and external assessment.

Internal: 40 Marks

External: 60 Marks

Out of a total of 100 Marks for the Project and viva voce 40 Marks shall be for internal evaluation and 60 Marks for the end semester project and viva voce. The internal evaluation shall be made by the departmental committee on the basis of the two seminars given by the student on the topic of his/her dissertation. The end semester project and viva voce shall be adjudicated by one external examiner selected from a panel of 5 examiners outside the college. For this Head of the department shall submit a 5 member panel who are eminent in the field of study.

5.7 An internal departmental committee consisting of HOD, Supervisor and one senior faculty shall monitor the progress of the project work.

5.8 The project and viva voce examination shall be conducted by a board consisting of External examiner, HOD and Supervisor. A Candidate shall be allowed to take project and viva voce examination after fulfilling the attendance requirements.

5.9 The Candidate should secure minimum 40% marks in External assessment of project and viva voce. If the candidate fails to secure minimum 50% of marks in project internal and End semester project and viva voce together, the candidate should retake the project and viva voce examination after three months. If he fails to get minimum marks at the second project and viva voce examination, he will not be eligible for the award of the degree, unless the candidate is asked to revise and resubmit. If the candidate fails to secure minimum marks again, the project shall be summarily rejected.

6.0 <u>Course Pattern</u>

a) The entire course of study is for two academic years (four semesters); all the years are in semester pattern

b) A student eligible to appear for the end semester examination in a course, but absent from it or has failed in the end semester examination, may write the exam in that course as and when college conducted next.

c) When a student has shortage of attendance, he/she may be re-admitted into the same semester/year in which he has been detained. However, the academic regulations under which he was **first admitted** shall continue to be applicable to him.

7.0 Criteria for passing a course and award of grades

a) Criteria for passing a course

i) A Candidate shall be declared to have passed in individual theory/laboratory/project and viva voce if he secures a minimum of 50% aggregate marks (internal & semester end examination marks put together), course to a minimum of 40% marks in the semester end examination.

ii) In case the candidate does not secure the minimum academic requirement in any course (as specified in (i) above) he/she has to re-appear for the end semester examination in that course. A candidate shall be given **one** chance to re-register for each course provided the internal marks secured by a candidate **are less than 50% and has failed in the end examination**. In such a case, the candidate must re-register for the course (s) and secure the required minimum attendance. The attendance in the re-registered course (s) shall be calculated separately to decide upon his eligibility for writing the end examination in those course (s). In the event of the student taking another chance, his internal marks and end examination marks obtained in the previous attempt shall **stands cancelled**. For re-registration the candidates have to apply to the Dean Academics by paying the requisite fees and get approval from College before start of semester in which re-registration is sought.

iii) In case the candidate secures less than the required attendance in any re-registered course (s), he shall not be permitted to write the End Examination in that course. He shall again re-register the course when next offered.

b) Award of grades: Method of awarding grade point and grade in each course based on his performance is given below.

Marks Range Theory / Laboratory/ Project and viva -voce (Max-100)	Letter Grade	Level	Grade Point
≥ 90%	O	Out standing	10
≥80 to <90%	S	Excellent	9
≥70 to <80%	A	Very Good	8
≥60 to <70%	B	Good	7
≥50 to <60%	C	Satisfactory	6
<50	F	Fail	0
	AB	Absent	0

c) **Computation of Cumulative and Semester Grade Point Averages**

ComputationofSGPA

- ThefollowingprocedureistobeadoptedtocomputetheSemesterGrade PointAverage(SGPA)and Cumulative GradePointAverage(CGPA):

- The **SGPA** is the ratio of sum of the product of the number of credits with the grade pointsscored by a student in all the courses taken by a student and the sum of the number ofcreditsof all the coursesundergonebyastudent, i.e
  SGPA(Si)=∑(CiXGi)/ ∑Ci

- WhereCiisthenumberofcreditsoftheithcourseandGiisthegradepoint scoredbythestudentin the ithcourse.

ComputationofCGPA

- The**CGPA**isalsocalculatedinthesamemannertakingintoacco untall the coursesundergonebyastudent overall the semester ofaProgramme, i.e.CGPA=∑(CiX Si)/ ∑ Ci
- Where Si is the SGPA of the i^{th} semester and Ci is the total number of credits in thatsemester.
- TheSGPAandCGPAshall beroundedoffto2 decimalpoints and reportedinthetranscripts.
- EquivalentPercentage= (CGPA–0.75)x10

8.0 AWARDOFDEGREE AND CLASS

After a student has satisfied the requirements prescribed for the completion of the programand is eligible for the award of MBA Degree he shall be placed in one of the following threeclasses:

	CGPAtobesecured	
FirstClasswithDistinction	≥ 7.75	**From theCGPA securedfrom 106Credits.**
FirstClass	≥ 6.75	
SecondClass	≥ 5.75 to < 6.75	

TheGradessecured, GradepointsandCredits obtainedwillbe shown separatelyinthememorandumofmarks.

9.0 WITHHOLDINGOFRESULTS

Ifthestudentisinvolvedinindiscipline/malpractices/courtcases,theresultof thestudentwill bewithheld.

10.0SupplementaryExaminations

i) Supplementaryexaminationswillbeconductedtwiceinayearatthe endofodd and evensemesters.
ii) Semester end supplementary examinations shall be conducted till next regulation comes into force for that semester after the conduct of the last set of regular examinations under the present regulation.
iii) Thereafter, supplementary examinations will be conducted in the equivalent courses as decided by the Board of Studies concerned.

11.0Revaluation

Recountingofmarksin theendsemesterexaminations, Astudentcan requestforrevaluationofhis/her answer book onpayment ofaprescribed fee.

12.0TRANSITORYREGULATIONS (for V21)

Discontinuedordetainedcandidatesareeligibleforre-admissionintosameorequivalentcourses at atime as andwhen offered.

13.0 GENERAL

13.1 Wherever the words "he", "him", "his", occur in the regulations, they include "she", "her","hers".
13.2 Theacademicregulationshouldbereadasawholeforthepurposeofany interpretation.
13.3 In the case of any doubt or ambiguity in the interpretation of the above rules, thedecisionofthe Chairman of the Academic Council is final.
13.4 The College may change or amend the academic regulations or syllabi at any time and the changes or amendments made shall be applicable to all the students with effectfrom thedates notified bythe College.

9	Mr.J Pavan Kumar	Faculty of CE

Minutes of the BOS Meeting:

The following points have been suggested/discussed by the committee in BOS meeting and the same has been approved.

1. The proposed course structure and syllabus of VII & VIII semesters V18 Regulation is approved and the same have to be followed for the Academic year 2021-22 for the autonomous admitted batch 2018-19.
2. The list of courses mentioned below have to be offer under open elective in VII & VIII semesters of B.Tech under V18 Regulation for other branches

Open Elective - II	VII Sem	1. Environmental Pollution and Control 2. Disaster Management
Open Elective - III	VIII Sem	1. Solid Waste Management 2. Water Quality and Conservation

3. The proposed course structure and syllabus of III & IV semesters V20 Regulation is approved and the same have to be followed for the Academic year 2021-22 for the autonomous admitted batch 2020-21.
4. The comment made by Dr.C.B.Kameswara Rao in the course structure of III & IV semester under Skill Oriented Course which includes Parent Institution in addition to Industries/Professional bodies/APSSDC and other accredited bodies.
5. Few comments made by Dr.C.B.Kameswara Rao in the course structure and syllabus of I to IV semesters of V21 Regulation M.Tech Structural Engineering were acknowledged, approved and suitable modification have to be made.
6. **Comments**
   a) **Advanced Reinforced Concrete Design** course in I semester is elective it could be made mandatory.
   b) The course **Theory of Plates and Shells**&**Stability of Structures** could be interchanged from Elective to mandatory.
   c) **Computer Aided Design Laboratory**&**Structural Design Laboratory** courses are similar and both could be joined as one laboratory only.

   Modifications have to be made by making **Advanced Reinforced Concrete Design** as mandatory in II semester. New course **Structural Optimization** is included in I Semester II Elective.

   Theory of Plates and Shells have to be made elective and **Stability of Structures** have to be made as mandatory course. **Computer Aided Design Laboratory& Structural Design Laboratory** have to be joined as one Laboratory only.

CHAIRPERSON OF BOS

ANNEXURE - I

COURSE STRUCTURE APPROVED IN PREVIOURS BOS MEETINGS

(For 2018 – 2019 Admitted Batch) - V18 Regulation

I SEMESTER

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT01	English – I	2	-	-	MNC
2	V18MAT01	Engineering Mathematics – I	3	1	-	4
3	V18CHT01	Engineering Chemistry	3	1	-	4
4	V18CST01	Programming in C for problem solving	3	-	-	3
5	V18MET01	Engineering Graphics	1	-	3	2.5
6	V18ENL01	English Communication Skills Lab – I	-	-	2	MNC
7	V18CSL01	Programming lab in C for problem solving	-	-	3	1.5
8	V18CHL01	Engineering Chemistry Lab	-	-	3	1.5
Total			12	2	11	16.5

Total Contact Hours : 25

Total Credits : 16.5

II SEMESTER

S.No	Course Code	Course Name	L	T	P	C
1	V18ENT02	English – II	2	-	-	2
2	V18MAT02	Engineering Mathematics – II	3	1	-	4
3	V18PHT01	Optics and Waves	3	1	-	4
4	VI8MET03	Engineering Mechanics	3	1	-	4
5	V18ENL02	English Communication Skills Lab – II	-	-	2	1

ANNEXURE – II

SYLLABI OF VII & VIII SEMESTER OF B.TECH COURSES FOR THE

ACADEMIC YEAR 2021-2022

VII SEMESTER – SYLLABUS

Year/Sem	VII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET25
Name of the Course	ESTIMATION, SPECIFICATION & CONTRACTS					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Explain to student for understanding different construction works and can estimate approximate cost required for a building (K2)
- Develop the student to a position for finding the cost of various building components (K3)
- Illustrate the calculation of quantities for earthwork of roads and canals to students (K3)
- Discuss to students about contracts and their types ,value a property(K2)
- Describe the students in calculating the approximate costs of building using various techniques(K2)
- Demonstrate the students in determining the quantities of different components of buildings(K3)

SYLLABUS

UNIT I

Introduction: General items of work in Building – Standard Units Principles of working out quantities for detailed and abstract estimates.

UNIT II

Rate Analysis: Working out data for various items of work over head and contigent charges.

UNIT III

Earthwork: Introduction to earthwork, Lead and lift, Earthwork volume calculation by mid-sectional area method, Mean sectional area method, Trapezoidal rule, Prismoidal rule estimation of quantities for canals

UNIT IV

Contracts: Types of contracts – Contract Documents – Conditions of contract, Valuation of buildings- Standard specifications for different items of building construction.

UNIT V

Approximate estimation of building: Introduction to approximate estimation of building, Advantages of estimating building by approximate estimation- Types of approximate estimation –problems on approximate estimation

UNIT VI

Detailed Estimation of Buildings: Estimation of quantities for one roomed building, two roomed building.

Text Books:

1. Estimating and Costing' by B.N. Dutta, UBS publishers, 2000.

2. Civil Engineering Contracts and Estimates' by B. S. Patil, Universities Press (India) Pvt.Ltd. Hyd.

3.Construction Planning and Technology' by Rajiv Gupta, CBS Publishers &Distributors Pvt.Ltd. New Delhi.

4 Estimating and Costing' by G.S. Birdie.

References:

1. 1'Standard Schedule of rates and standard data book' by public works department.
2. IS 1200 (Parts I to XXV-1974/ Method of Measurement of Building & Civil Engg Works – B.I.S.)
3. 'Estimation, Costing and Specifications' by M. Chakraborthi; Laxmi publications.
4. National Building Code

Year/Sem	VII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET26
Name of the Course	**ENVIRONMENTAL ENGINEERING-II**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to:

- Estimate the sewage and storm water flow and design the sewerage system (K3)
- Relate the appropriate pumps in the sewerage systems (K3)
- Analyze sewage quality and design suitable primary treatment units (K3)
- Employ the secondary treatment units (K3)
- Employ miscellaneous treatment units (K3)
- Identify suitable disposable method with respect to effluent standards.(K2)

SYLLABUS

UNIT I

Introduction: Sanitation – Systems of sanitation – relative merits & demerits – collection and conveyance of waste water – sewerage – classification of sewerage systems- Estimation of sewage flow and storm water drainage – fluctuations – types of sewers - Hydraulics of sewers and storm drains– design of sewers – appurtenances in sewerage – cleaning and ventilation of sewers

UNIT II

Pumping of Wastewater: Pumping stations – location – components– types of pumps and their suitability with regard to wastewaters – Problems in sewage pumping.

House Plumbing: Systems of plumbing-sanitary fittings and other accessories–one pipe and two pipe systems – Design of building drainage

UNIT III

Characteristics and Treatment of sewage: Sampling and analysis of wastewater - Physical, Chemical and Biological Examination-Measurement of BOD and COD - BOD equations

Primary treatment of sewage - Screens-grit chambers-grease traps–floatation–sedimentation – design of preliminary and primary treatment units.

UNIT IV

Secondary Treatment: Aerobic and anaerobic treatment process-comparison. Suspended growth process: Activated Sludge Process, principles, designs, and operational problems, modifications of Activated Sludge Processes, Oxidation ponds, Aerated Lagoons, Fluidized bed reactors.

Attached Growth Process: Trickling Filters–mechanism of impurities removal- classification–design-operation and maintenance problems, Rotating Biological Contactors.

UNIT V

Miscellaneous Treatment Methods: Nitrification and Denitrification – Removal of Phosphates –UASB–Membrane reactors-Integrated fixed film reactors. Anaerobic Processes: Septic Tanks and Imhoff tanks- working Principles and Design–Reuse and disposal of septic tank effluent.

UNIT VI

Sludge Management: Characteristics-SVI, handling and treatment of sludge-thickening – anaerobic digestion of sludge, Sludge Drying Beds. Centrifuge.

Disposal of sewage: Methods of disposal – disposal into water bodies-Oxygen Sag Curve-Disposal into sea, disposal on land- sewage sickness.

Text Books:

1. Wastewater Engineering Treatment and Reuse, Metcalf & Eddy, Tata McGraw-Hill edition.
2. Industrial Water and Wastewater Management, K.V.S.G. Murali Krishna.
3. Elements of Environmental Engineering, K. N. Duggal, S. Chand & Company Ltd. New Delhi, 2012.

References:

1. Environmental Engineering, Howard S. Peavy, Donald R. Rowe, Teorge George Tchobanoglus – Mc-Graw-Hill Book Company, New Delhi, 1985
2. Wastewater Treatment for Pollution Control and Reuse, Soli. J Arceivala, Sham R Asolekar, Mc-GrawHill, NewDelhi; 3rd Edition
3. Environmental Engineering –II: Sewage disposal and Air Pollution Engineering, Garg, S. K., Khanna Publishers
4. Sewage treatment and disposal, P. N. Modi & Sethi.
5. Environmental Engineering, Ruth F. Weiner and Robin Matthews – 4th Edition Elsevier, 2003

6. Environmental Engineering, D. Srinivasan, PHI Learning Private Limited, New Delhi, 2011.

Year/Sem	**VII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V18	3	0	0	3	V18CET27
Name of the Course	**PAVEMENT ANALYSIS AND DESIGN**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Understand the factors influencing the design methodologies.(K2)
- Analyze stresses and strains in a flexible pavement using multi-layered elastic theory (K3)
- Analyze stresses and strains in a rigid pavement using Westergaard's theory (K3)
- Design a flexible pavement using IRC, Asphalt Institute, and AASHTO methods (K3)
- Design a rigid pavement using IRC, and AASHTO methods (K3)
- Design of joints, Dowel & tie bars.(K3)

SYLLABUS

UNIT I

Factors Affecting Flexible Pavement Design: Variables Considered in Pavement Design, Types of Pavements, Functions of Individual Layers, EAL and ESWL Concepts, Traffic Analysis: ADT, AADT, Truck Factor, Growth Factor, Lane Distributions & Vehicle Damage Factors, Effect of Transient & Moving Loads.

UNIT II

Factors Affecting Rigid Pavement Design : Rigid pavement layers**,** Classification of Axle Types of Rigid Chassis and Articulated Commercial Vehicles, Legal Axle and Gross Weights on Single and Multiple Units, Tire Pressure, Contact Pressure,

UNIT III

Stresses in Flexible Pavement: Vehicle-Pavement Interaction: Transient, Random & Damping Vibrations, Steady State of Vibration, Experiments on Vibration, Stress Inducing Factors in Flexible and Rigid pavements; Stress In Flexible Pavements: Visco-Elastic Theory and Assumptions, Layered Systems Concepts, Stress Solutions for One, Two and Three Layered Systems, Fundamental Design Concepts;.

UNIT IV

Stresses in Rigid Pavements: Westergaard's Theory and Assumptions, Stresses due to Curling, Stresses and Deflections due to Loading, Frictional Stresses, and Stresses in Dowel Bars & Tie Bars

UNIT V

Design of Flexible Pavements: Factors effecting Design. Deflection studies in Flexible Pavements. Present Serviceability Index.IRC guidelines for Flexible Pavements. Pavement Performance and methods- AASHTO and Asphalt Institute Method. Need for Overlays, Overlays design methods for Flexible and Rigid pavements.

UNIT VI

Design of Rigid Pavements: Factors effecting Design – Wheel load & its repetition, subgrade strength & proportion, strength of concrete- modulus of elasticity. Reinforcement in slab. Design of joints. Design of Dowel bars. Design of Tie bars. IRC and AASHTO methods of Rigid Pavement design.

Text Books:

1. Principles of Pavement Design, Yoder.J. &Witzorac Mathew, W. John Wiley & Sons Inc
2. Pavement Analysis & Design, Yang H. Huang, Prentice Hall Inc.
3. AASHTO Pavement Design Guide (1993)

References:

1. Design of Functional Pavements, Nai C. Yang, McGraw Hill Publications
2. Concrete Pavements, AF Stock, Elsevier, Applied Science Publishers.
3. Pavement and Surfacing for Highway & Airports, Micheal Sargious, Applied Science Publishers Limited.
4. IRC: 37 & 58 Codes for Flexible and Rigid Pavements Design.

Year/Sem	VII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET28
Name of the Course	**AIR POLLUTION AND CONTROL**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to:

- Understand the ambient air quality based on the analysis of air pollutants
- employ particulate and gaseous control measures for an industry
- Illustrate the plume behavior in a prevailing environmental condition
- Estimate carbon credits for various day to day activities
- operate air pollution gases methods(K3)
- Classify the air pollution controlling methods(K4)

SYLLABUS

UNITI

Air Pollution: Sampling and analysis of air pollutants, conversion of ppm into µg/m3. Definition of terms related to air pollution and control - secondary pollutants – Indoor air pollution – Ozone holes and Climate Change and its impact - Carbon Trade.

UNIT II

Thermodynamics and Kinetics of Air-pollution: Applications in the removal of gases like SOx, NOx, CO and HC - Air-fuel ratio- Computation and Control of products of combustion, Automobile pollution. Odour pollution control, Flares.

UNIT III

Meteorology and Air Pollution: Properties of atmosphere: Heat, Pressure, Wind forces, Moisture and relative Humidity, Lapse Rates - Influence of Terrain and Meteorological phenomena on plume behaviour and Air Quality - Wind rose diagrams and Isopleths Plume Rise Models

UNIT IV

Ambient Air Quality Management: Monitoring of SPM - RPM SO2; NOx and CO - Stack Monitoring for flue gases - Micro-meteorological monitoring –

Noise Monitoring - Weather Station. Emission Standards- Gaussian Model for Plume Dispersion

UNIT V

Air Pollution Control: Control of particulates – Control at Sources, Process Changes, Equipment modifications, Design and operation of control Equipments – Settling Chambers, Cyclone separators –Fabric filters– Scrubbers, Electrostatic precipitators

UNIT VI

Air Pollution Control Methods: Control of NOx and SOx emissions – Environmental friendly fuels - In-plant Control Measures, process changes, methods of removal and recycling. Environmental criteria for setting industries and green belts.

Text Books:

1. Air Pollution and Control, K.V.S.G. Murali Krishna, Laxmi Publications, New Delhi, 2015

2. Air Pollution, M. N. Rao and H. V. N. Rao, Tata McGraw Hill Company.

3. Environmental Science and Engineering by J.G. Henry and G.W. Heinke – Pearson Education.

References:

1. An Introduction to Air pollution, R. K. Trivedy and P.K. Goel, B.S. Publications.

2. Air Pollution by Wark and Warner - Harper & Row, New York.

Year/Sem	**VII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V18	3	0	0	3	V18CET29
Name of the Course	**IRRIGATION ENGINEERING**					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

Upon successful completion of the course, the student will be able to:

- Explain the importance, type and quality of Irrigation Water (K2)
- Estimate the Irrigation water requirements (K2)
- Asses different parameters needed for the design of irrigation canal networks (K3)
- Asses different irrigation canal structures (K3)
- Asses different diversion head works (K3)
- Assess the stability of gravity and earth dams (K3)

SYLLABUS

UNIT I

Introduction: Definition – Importance of Irrigation in India – Advantages and Dis advantages – Types of Irrigation – Quality of Irrigation water- Different types techniques used for water distribution in field.

UNIT II

Irrigation and Water Requirement of Crops: Different types of crops and crop seasons- Soil, water and plant relationship- Irrigation efficiencies-Consumptive use –Estimation of consumptive use-Crop water requirement-Duty and Delta-Factors affecting duty-Depth and Frequency of Irrigation-Water logging and Drainage-crop rotation.

UNIT III

Canals: Classification-Alluvial and Non Alluvial canals-Design of non-erodible canals-Different command areas-Methods of economic section and maximum permissible velocity-Design of erodible canals-Kennedy's silt theory and Lacey's regime theory.

UNIT IV

Canal structures: Falls-Types and location- Design principle of Sarda type wall and straight glacis wall

Regulators: Head and cross regulators –design principles

Cross Drainage works: Design principles of aqueduct- siphon aqueduct-super passage

Outlets: Types-proportionality-sensitivity and flexibility

UNIT V

Diversion Head Works: Types of diversion head works-Weirs and Barrages-Layout of diversion head works-components- causes and failures of weirs on permeable foundations-Bligh's creep theory-Khosla's theory-exit gradient.

UNIT VI

Reservoir planning: Site selection-zones of storage-yield and storage capacity of reservoir and reservoir sedimentation-Types of dams- selection of type of dam-selection of site for a dam.

Gravity Dams: Forces acting on gravity dam-causes of failure of gravity dam-elementary profile and practical profile of gravity dam-limiting height of dam-stability analysis-drainage galleries-grouting.

Earthen Dams: Types of earthen dams-causes of failure-criteria for safe design-seepage-measures of control of seepage filters.

Text Books:

1. Irrigation Engineering and Hydraulic structures, Santosh Kumar Garg, Khanna Publishers.
2. Irrigation and Water power Engineering, B.C. Punmia, Pande B.B. Lal, Ashok Kumar Jain, Arun Kumar Jain, Lakshmi Publications Ltd.
3. Water resources and Irrigation engineering by Sri Krishna publications.

References:

1. Irrigation and Water Resources Engineering, Asawa G L (2013), New Age International Publishers.
2. Irrigation Water Resources and Water Power Engineering, Modi P N (2011), Standard book House, New Delhi.
3. Irrigation and Drainage Engineering" by Peter Waller and Muluneh Yitayew

Year/Sem	VII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET30
Name of the Course	**BRIDGE ENGINEERING**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion the course the student will be able to

- Generalize different types of Bridges with diagrams and Loading standards (K2)
- Asses the moments in the girders (K3)
- Illustrate different sub structural works of bridges (K3)
- Illustrate different parameters of Well Foundations (K3)
- Report the effectiveness of different Bearings of a Bridge (K2)
- Generalize the suspension bridge and cable stayed bridge (K2)

SYLLABUS

UNIT I

Introduction: Bridges- Types- Slab bridges, T Beam, Arch bridges, Cable Stayed bridges, prestressed concrete bridges, Truss Bridges, Culverts, -Nomenclature- Selection of Bridge Site- Economical span- Abutments pier and end connections- types of foundations- Open, Pile, Well Foundations, Bearings – Types- Introduction to Loading standards- Railway and IRC Loading

UNIT II

T-Beam Bridge: Pigeaud's method for computation of slab moments; Courbon's method for computation of moments in girders; Design of simply supported T-beam bridge.

UNIT III

Sub Structure for Bridges: Pier and abutment caps; Materials for piers and abutments, Design of pier; Design of abutment; Backfill behind abutment; approach slab.

UNIT IV

Foundations For Bridges: scour at abutments and piers; Grip length; Types of foundations; Design of well foundation.

Box Culverts: Loading – Analysis and Design- Reinforcement detailing

UNIT V

Bearings for Bridges: Importance of bearings; bearings for slab bridge; bearings for girder bridges; Expansion bearings; Fixed bearings; Design of elastomeric pad bearing.

UNIT VI

Cable Supported Bridge: Different types of cable supported bridge, difference between suspension bridge and cable stayed bridge. Different components and factors considered for design of a) suspension bridge, b) cable stayed bridge.

Text Books:

1. Essentials of Bridge Engineering by Dr. Johnson Victor; Oxford & IBH publishing Co. Pvt.Ltd
2. Cable supported bridges, concepts and design by N J Gimsing. John Willey and Sons
3. Design of Bridges, N. Krishna Raju, Tata McGraw Hill

References:

1. Design of Bridge Structures by T. R Jagadeesh, M.A Jayaram, Prentice Hall of India Pvt. Ltd.
2. Design of Concrete Bridges, Aswini, Vazirani, Ratwani
3. Bridge Engineering by S.Ponnuswamy

Year/Sem	VII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET31
Name of the Course	ADVANCED FOUNDATION ENGINEERING					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the student will be able to

- Illustrate the safe bearing capacity of footings subjected to different types of loading on varied soil strata using different methods (K3)
- Compute the settlements of foundations using advanced methods (K3)
- Employ different techniques for proportioning of foundations laid on different soils strata (K3)
- Assess the forces acting on Earth Retaining Structures using different Earth Pressure Theories (K3)
- Predict the load carrying capacity, pull-out capacity, negative skin friction of piles and their settlements (K3)
- Interpret different foundation practices in expansive soils (K3)

SYLLABUS

UNIT I

Bearing capacity of Foundation susing general bearing capacity equation–Meyerhof's, Brinch Hansen's and Vesic's methods-Bearing capacity of Layered Soils:Strong layer over weak layer, Weak layer on strong layer – Bearing capacity of foundations on at opof slope– Bearing capacity of foundations at theedge of the slope.

UNIT II

Settlement analysis: Immediate settlement of footings resting on granular soils –Schmertmann& Hartman method – De Beer and Martens method - Immediate settlement inclays–Janbu'smethod–correctionforconsolidationsettlementusingSkemptonandBjerrum'smethod – Correction forconstruction period

UNIT III

Mat foundations – Purpose and types of isolated and combined footings – Mats/Rafts – Proportioning of footings – Ultimate bearing capacity of mat foundations – allowable bearing capacity of mats founded in clays and granular soils– compensated rafts.

UNIT IV
Earth-retaining structures – cantilever sheet piles – anchored bulkheads – fixed and free earth support methods – design of anchors – braced excavations – function of different components– forces in ties – stability against bottom heave.

UNIT V
Pile foundations – single pile versus group of piles – load-carrying capacity of pile groups – negative skin friction (NSF) -settlement of pile groups in sands and clays – laterally loaded piles in granular soils – Reese and Matlock method – laterally loaded piles in cohesive soils– Davisson and Gill method – Broms'analysis.

UNIT VI
Foundationsinexpansivesoils–definitionsofswellpotentialandswellingpressure – determination of free swell index – factors affecting swell potential and swelling pressure – foundation practices – sand cushion method – CNS layer - drilled piers and belled piers– under-reamed piles – moisture control methods.

Text Books:
1. Principles of Foundation Engineering, B M Das, CENTAG Learning
2. Soil Mechanics and Foundation Engineering, V N S Murthy, CBS Publishers
3. Basic and applied soil mechanics by Gopal Ranjan and ASR Rao, New Age Publishers

References:
1. Foundation Analysis and Design, J.E.Bowles, JohnWiley
2. Foundation Design, W.C.Teng, PrenticeHallPublishers
3. Analysis and Design of Foundations and Retaining Structures by Prakash S edited by Saritha Prakashan

Year/Sem	**VII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation / Year	V18 / 2021-2022	3	0	0	3	V18CET32
Name of the Course	**TRAFFIC ENGINEERING & MANAGEMENT**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of the course the student will be able to:

- Understand basics principles of Traffic Engineering(K2)
- Analyze parking data and model accidents(K3)
- Determine capacity and LOS(K3)
- Design of Signalized systems at congested intersections(K3)
- Design of interchanges and Rotary Intersections(K3)
- To provide engineering techniques to achieve Safe and efficient movement of people and goods on roadways(K2)

SYLLABUS

UNIT I

Traffic Studies (Part- I) : Basic principles of Traffic, Volume, Speed and Density; Definitions and their interrelationships; Traffic Volume studies - Objectives, Methods of Volume counts, Presentation of Volume Data; Speed studies- Types of Speeds, Objectives, Methods of speed studies, Statistical Methods for speed data Analysis, Presentation of speed data. Delay Studies; Head ways and Gap Studies - Headway and Gap acceptance, Origin and Destination Studies.

UNIT II

Traffic Studies (Part-II) : Parking Studies: parameters of parking, definitions, Parking inventory study, Parking survey by Patrolling method; Analysis of Parking Survey data;
Accident studies- Causative factors of Road accidents, Accident data collection: Accidentanalysis and modeling;, Road Safety Auditing, Measures to increase Road safety.

UNIT III

Capacity and LOS Analysis: Introduction to Traffic capacity, Analysis concepts, Level ofService, Basic definitions, Factors affecting Capacity and LOS, Capacity of Urban/RuralHighway, With or without access control, Basic freeway segments - Service flow rate ofLOS, Lane width or Lateral clearance adjustment; Heavy vehicle adjustment;Driverpopulation adjustment.

UNIT IV

Signal Designing: Fixed Time signals, Determination of Optimum Cycle length and Signalsetting for Fixed Time signals, Warrants for Signals, Time Plan Design for Pre-TimedControl- Lane group analysis, Saturation flow rate, and Adjustment factors, Uniform andIncremental Delay, Vehicle Actuated Signals, Signal Coordination.

UNIT V

Design of Intersections: **Rotary Design, Weaving angles, Entry width, Exit Radius, Capacity of Rotary, Types of interchanges, Implementation.**

UNIT VI

Transportation System Management: Measures for Improving vehicular flow – one wayStreets, Signal Improvement, Transit Stop Relocation, Parking Management, Reversiblelanes- Reducing Peak Period Traffic - Strategies for working hours, Congestion Pricing,Differential Toll Policies.

Text Books:

1. Traffic Engineering and Transportation Planning – L.R. Kadiyali, Khanna Publishers
2. Principles of Highways Engineering and Traffic Analysis - Fred Mannering & Walter Kilareski, John Wiley & Sons Publication.
3. Transportation Engineering - An Introduction - C. Jotin Khisty, Prentice Hall Publication.

References:

1. Fundamentals of Transportation Engineering - C. S. Papacostas, Prentice Hall India.
2. Traffic Engineering - Theory & Practice - Louis J. Pignataro, Prentice Hall Publication.
3. Traffic Engineering by Roger P. Roess, William R. Mc. Shane, Elena S. Prassas , Prentice Hall, 1977.
4. Relevant IRC Codes

Year/Sem	VII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET33
Name of the Course	CONSTRUCTION PROJECT PLANNING & SYSTEMS					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Identify the importance of Project Manager, Project Planning & scheduling and different charts (K3)
- Solve the networks by using different network analysis methods such as PERT & CPM (K2)
- Discuss the functioning of various Construction equipment & Earthwork equipment (K2)
- Discuss the functioning of various Hoisting equipment (K2)
- Discuss the methods of production of Aggregate products and concreting (K2)
- Describe the Quality control, Safety Engineering and construction techniques (K2)

SYLLABUS

UNIT I

Introduction: Construction project management and its relevance – qualities of a project manager – project planning – coordination –scheduling - monitoring – bar charts – milestone charts

UNIT II

PERT & CPM: Project Evaluation and Review Technique – Critical Path Method – Applications- cost analysis - updating – crashing for optimum cost – crashing for optimum resources – allocation of resources

UNIT III

Construction & Earthwork equipment: Economical considerations – earthwork equipment – Trucks and handling equipment – rear dump trucks – capacities of trucks and handling equipment – calculation of truck production – compaction equipment – types of compaction rollers.

UNIT IV

Hoisting Equipment: Hoists – cranes – tractors - bulldozers – graders – scrapers– draglines - clamshell buckets

UNIT V

Concreting Equipment: Crushers – jaw crushers – gyratory crushers – impact crushers – selection of crushing equipment - screening of aggregate – concrete mixers – mixing and placing of concrete – consolidating and finishing

UNIT VI

Construction methods: Earthwork – piling – placing of concrete – form work – fabrication and erection – quality control and safety engineering

Textbooks:

1. Basic and Applied Soil Mechanics, Gopal Ranjan and A. S. R. Rao, New Age International Publishers.
2. Soil Mechanics and Foundation Engineering, V. N. S. Murthy, CBS publishers.
3. Soil Mechanics and Foundations, Dr.B.C.Punmia, Laxmi Publications

References:

1. Fundamentals of Soil Mechanics, D. W. Taylor, Wiley.
2. An introduction to Geotechnical Engineering, Holtz and Kovacs; Prentice Hall.
3. Fundamentals of Geotechnical Engineering, B M Das, Cengage Learning, New Delhi.

Year/Sem	VII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET34
Name of the Course	SOLID WASTE MANAGEMENT					
Branch	CIVIL ENGINEERING					

Course Outcomes:
Upon successful completion of this course, the students will be able to

- Generalize Solid Waste and its management (K2)
- Assess different elements for managing Solid Waste (K3)
- Employ different methods for transfer and transport of solid waste (K3)
- Employ different methods for Separation and Transformation of Solid waste (K3)
- Organize different methods for processing and treatment of municipal solid waste (K3)
- Identify suitable disposal methods with respect to solid waste (K2)

SYLLABUS

UNIT I

Introduction to Solid Waste Management: Goals and objectives of solid waste management, Classification of Solid Waste – Factors Influencing generation of solid waste – sampling and characterization –Future changes in waste composition, major legislation, monitoring responsibilities.

UNIT II

Basic Elements In Solid Waste Management: Elements and their inter relationship – principles of solid waste management- onsite handling, storage and processing of solid waste Collection of Solid Waste: Types and methods of waste collection systems, analysis of collection system – optimization of collection routes.

UNIT III

Transfer and Transport: Need for transfer operation, compaction of solid waste – transport means and methods, transfer station types and design requirements.

UNIT IV

Separation and Transformation of Solid Waste: Unit operations used for separation and transformation: shredding – materials separation and recovery, source reduction and waste minimization.

UNIT V

Processing and Treatment: Processing of solid waste – Waste transformation through combustion and composting, anaerobic methods for materials recovery and treatment – Energy recovery – biogas generation and cleaning– Incinerators.

UNIT VI

Disposal of Solid Waste: Methods of Disposal, Landfills: Site selection, design and operation, drainage and leachate collection systems –designated waste landfill remediation.

Text Books:

1. George Techobanoglous "Integrated Solid Waste Management", McGraw Hill Publication, 1993
2. Gerard Kiely " Environmental Engineering", McGraw Hill Publication, 2007
3. J Glynn Henry,. Gary W.Heinke "Environmental Science and Engineering", Prentice-Hall of India Pvt Ltd, 1996

References:

1. Vesilind, P.A., Worrell, W., Reinhart, D. "Solid Waste Engineering", Cenage learning, New Delhi, 2004
2. Charles A. Wentz; "Hazardous Waste Management", McGraw Hill Publication, 1995.
3. Mackenzie L Davis, David A.Cornwell :Introduction to Environmental Engineering" McGraw Hill Publication, 2017

Year/Sem	**VII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V18	3	0	0	3	V18CET35
Name of the Course	**GROUND WATER DEVELOPMENT**					
Branch	CIVIL ENGINEERING					

Course Outcomes

At the end of the course the student will be able to

- Analyse radial flow towards wells in confined and unconfined aquifers (K3)
- Design wells and understand the construction practices (K5)
- Construct the wells and development of ground water (K2)
- Determine the process of artificial recharge for increasing groundwater potential (K4)
- Employ different geo physical methods to explore ground water (K3)
- Apply appropriate measures for groundwater management (K3)

SYLLABUS

UNIT I

Introduction: Groundwater in the hydrologic cycle, groundwater occurrence, aquifer parameters and their determination, general groundwater flow equation.

Well Hydraulics Steady radial flow and unsteady radial flow to a well in confined and unconfined aquifers, Theis solution, Jocob and Chow's methods, Leaky aquifers.

UNITII

Well Design: Water well design-well diameter, well depth, well screen-screen length, slot size, screen diameter and screen selection, design of collector wells, infiltration gallery.

UNIT III

Well Construction and Development: Water wells, drilling methods-rotary drilling, percussion drilling, well construction-installation of well screens-pull-back method, open- hole, bail- down and wash-down methods, well development-mechanical surging using compressed air, high velocity jetting of water, over pumping and back washing, well completion, well disinfection, well maintenance.

UNIT IV

Artificial Recharge: Concept of artificial recharge of groundwater, recharge methods-basin, stream-channel, ditch and furrow, flooding and recharge well methods, recharge mounds and induced recharge

Saline Water Intrusion: Occurrence of saline water intrusion, Ghyben-Herzberg relation, Shape of interface, control of saline water intrusion.

UNITV

Geophysics: Surface methods of exploration of groundwater – Electrical resistivity and Seismic refraction methods, Sub-surface methods – Geophysical logging and resistivity logging. Aerial Photogrammetry applications.

UNITVI

Groundwater Modeling and Management: Basic principles of groundwater modelling- Analog models-viscous fluid models and membrane models, digital models-Finite difference and finite element models, Concepts of groundwater management, basinmanagement by conjunctive use-case studies.

Text Books:

1. Groundwater, Raghunath H M, New Age International Publishers, 2005.
2. Groundwater Hydrology, Todd D. K., Wiley India Pvt Ltd., 2014.
3. Groundwater Hydrology, Todd D K and L W Mays, CBS Publications, 2005.

References:

1. Groundwater Assessment and Management, Karanth K R, Tata McGraw Hill Publishing Co., 1987.
2. Groundwater Hydrology, Bouwer H, McGraw Hill Book Company, 1978.
3. Groundwater Systems Planning and Management, Willis R and W.W.G. Yeh,Prentice Hall Inc., 1986.
4. Groundwater Resources Evaluation, Walton W C, McGraw Hill Book Company,1978.

Year/Sem	**VII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V18	3	0	0	3	V18CET36
Name of the Course	**EARTHQUAKE ENGINEERING**					
Branch	CIVIL ENGINEERING					

Course Outcomes

At the end of the course the student will be able to

- Differentiate types of lodes and it's characteristic(K2)
- Recognize foundations of many basic engineering concepts related earthquake engineering(K2)
- Examine the strong ground motion and seismic hazard(K3)
- Assess the frequency of wave propagation in different mediums(K3)
- Find the behavior of structures during earthquake and earthquake resistant Features of structure(K3)
- Relate the properties of liquefaction and soil improvement for remediation of seismic hazards(K3)

SYLLABUS

UNIT I

Introduction to Dynamic Loads: Static Load v/s Dynamic Load, Types of Dynamic forces, Force Control and Displacement Control.

UNIT II

Seismology and Earthquakes: Introduction, Seismic Hazards, seismic waves, internal structure of earth, Continental drift and plate tectonics, faults, elastics rebound theory, geometric notations, location of earthquakes, size of earthquakes.

UNIT III

Strong Ground Motion: Strong ground motion measurement, ground motion parameters, estimation of ground motion parameters.

Seismic Hazard Analysis: Identification and Evaluation of Earthquake Sources, deterministic seismic hazard analysis, probabilistic seismic hazard analysis.

UNIT IV

Wave Propagation: Waves in unbounded media, waves in a semi – infinite body, waves in a layered media, attenuation of stress waves.

Artificial Ground Motion Generation: Modification of actual ground motion records, time –domain generation, frequency domain generation.

UNIT V

Behavior of Structures: During Earthquake and Earthquake Resistant Features of Structure Inertia forces in structures, Behavior of Masonry Structures, Behavior of RC Structures

UNIT VI

Liquefaction: Flow liquefaction, cyclic mobility, evaluation of liquefaction hazards, liquefaction susceptibility, initiation of liquefaction, effects of liquefaction.

Soil Improvement for Remediation of Seismic Hazards: Densification techniques, Reinforcement Techniques, Grouting and Mixing techniques, Drainage techniques.

Text Books:

1. Earthquake Resistant Design of Structures By Pankaj Agarwal & Manish Shrikhande, PHI Publications
2. S. K. Duggal; Earthquake Resistance Design of Structures; Oxford University Press, New Delhi.
3. K. Chopra; Dynamics of Structures, Pearson, New Delhi
4. Park & Pauly; Behavior of R.C Structures
5. Geotechnical Earthquake Engineering by Steven L. Kramer, prentice Hall

Reference Books:

1. IS: 1893 (Part-I) 2002, Criteria for Earthquake Resistant Design General Provision to Building.
2. S: 13920 (1993), Code of Practice for Ductile Detailing of RC Structures
3. IS: 4326 (1993), Code of Practice for Earthquake Resistant Design and Construction of Buildings
4. IS: 13827 (1993), Improving Earthquake Resistance of Earthen Buildings
5. IS: 13828 (1993), Guide lines for Improving Earthquake Resistance of low Strength Masonry Buildings.
6. S S Rao; Mechanical Vibration; Pearson, New Delhi.

VIII SEMESTER – SYLLABUS

Year/Sem	VIII Sem	L	T	P	C	COURSE CODE
Regulation / Year	V18 / 2021-2022	3	0	0	3	V18CET37
Name of the Course	**HIGHWAY CONSTRUCTION & MANAGEMENT**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon the successful completion of course students will be able to

- Understand the concepts of PMS and evaluate strategies for pavement maintenance (K2)
- Evaluate the pavements based on the functional and structural characteristics(K3)
- Understand constructions of Construction methods of Base, Subbase, Shoulders and drains(K2)
- Understand constructions of bituminous pavements(K2)
- Understand the concepts of construction of cement concrete pavements(K2)
- Evaluate the concepts of maintenance of cement concrete pavements(K3)

SYLLABUS

UNIT I

Pavement management system: Components of PMS and their activities; Major steps in implementing PMS; Inputs; Design, Construction and Maintenance; Rehabilitation and Feedback systems; Examples of HDM and RTIM packages; Highway financing; Fund generation; Evaluating alternate strategies and Decision criteria ; Pavement Maintenance Management Components of Maintenance Management and Related Activities – Network and Project Level Analysis; Prioritization Techniques and Formulation of Maintenance Strategies.

UNIT II

Pavement Inventories, Quality Control and Evaluation: Serviceability Concepts; Visual Rating; Pavement Serviceability Index; Roughness Measurements; Distress Modes – Cracking Rutting Etc; Pavement Deflection –

Different Methods and BBD, Skid Resistance, Roughness, Safety – Aspects; Inventory System. Causes of Deterioration, Traffic and Environmental Factors, Pavement Performance Modeling Approaches and Methods of Maintaining WBM, Bitumen and Cement Concrete Roads, Quality Assurance; Quality Control – ISO 9000, Sampling Techniques – Tolerances and Controls related to Profile and Compaction.

UNIT III

Construction of Base, Subbase, Shoulders and Drain: Roadway and Drain Excavation, Excavation and Blasting, Embankment Construction, Construction of Gravel Base, Cement Stabilised Sub- Bases, WBM Bases, Wet Mix Construction; Crushed Cement Bases, Shoulder Construction; Drainage Surface, Turfing Sand Drains; Sand Wicks; Rope Drains, Geo- Textile Drainage; Preloading Techniques.

UNIT IV Bituminous Construction: Preparation and Laying of Tack Coat; Bituminous Macadam, Penetration Macadam, Built up Spray Grout, Open Graded Premix, Mix Seal, Semi-Dense Asphalt Concrete-Interface Treatments and Overlay Construction, IRC Specifications.

UNIT V Cement Concrete pavement Construction: Cement Concrete Pavement Analysis - Construction of Cement Roads, Manual, and Mechanical Methods, Joints in Concrete and Reinforced Concrete Pavement and Overlay Construction.

UNIT VI Bituminous and Cement Concrete pavement Maintenance: Repair of surface layer, Base layer, sub base layer, Sub grade. Maintenance of Concrete slab, Dry Lean concrete sub base layer and Subgrade in concrete pavement.

Text Books :

1. Highway Engineering, Khanna S. K., Justo C. E. G and Veeraragavan A, NemChand Bros., Roorkee.
2. Principles of Highway Engineering, Kadiyali L. R, Khanna Publishers, New Delhi.
3. MORTH - Specifications.

References:

1. Principles of Transportation Engineering, Partha Chakroborthy and AnimeshDas PHI Learning Private Limited, Delhi.
2. Transportation Engineering - An Introduction, JotinKhisty C, Prentice Hall,Englewood Cliffs, New Jersey.
3. Transportation Engineering and Planning, Papacostas C.S. and P.D. Prevedouros,Prentice Hall of India Pvt.Ltd; New Delhi.

Year/Sem	VIII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET38
Name of the Course	REPAIR AND REHABILITATION OF STRUCTURES					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon the successful completion of course students will be able to

- Develop various maintenance and repair strategies(K2)
- Evaluate the existing buildings through field investigations(K2)
- Understand and use the different techniques for structural rehabilitation(K2)
- To assess damage to structures and various repair techniques(K2)
- To understand the importance of maintenance of structures(K2)
- Understand the importance of advanced concretes mixes(K2)

SYLLABUS

UNIT I

Introduction: Deterioration of Structures – Distress in Structures – Causes and Prevention. Mechanism of Damage – Types of Damage.

UNIT II

Non Destructive Testing: Corrosion of Steel Reinforcement – Causes – Mechanism and Prevention. Damage of Structures due to Fire – Fire Rating of Structures – Inspection and Testing – Symptoms and Diagnosis of Distress – Damage assessment

UNIT III

Materials for repair and rehabilitation: Admixtures- types of admixtures- purposes of using admixtures- chemical composition- Natural admixtures- Fibres- wraps- Glass and Carbon fibre wraps- Steel Plates

UNIT IV

Strengthening and stabilization: Techniques- design considerations-Beam shear capacity strengthening- Shear Transfer strengthening-stress reduction techniques- Column strengthening-flexural strengthening- Connection stabilization and strengthening, Crack stabilization

UNIT V

Fibre reinforced concrete: Properties of constituent materials- Mix proportions, mixing and casting methods-Mechanical properties of fiber reinforced concrete- applications of fibre reinforced concretes-Light weight concrete- properties of light weight concrete- No fines concrete- design of light weight concrete- Flyash concrete-Introduction- classification of flyash-properties and reaction mechanism of flyash- Properties of flyash concrete in fresh state and hardened state-Durability of flyash concretes.

UNIT VI

High performance concretes: Introduction- Development of high performance concretes- Materials of high performance concretes- Properties of high performance concretes- Self Consolidating concrete-properties-qualifications.

Text Books:

1. Maintenance and Repair of Civil Structures, B.L. Gupta and Amit Gupta, Standard Publications.
2. Concrete Technology by A.R. Santa Kumar, Oxford University press
3. Concrete technology by Neville and J J Brooks, Pearson publications, 2nd edition

References:

1. Concrete technology by M S Shetty, S. Chand publications (2006).
2. Defects and Deterioration in Buildings, EF & N Spon, London
3. Non-Destructive Evaluation of Concrete Structures by Bungey – Surrey University Press
4. Concrete Repair and Maintenance Illustrated, RS Means Company Inc W.H.Ranso, (1981)
5. Building Failures: Diagnosis and Avoidance, EF & N Spon, London, B.A. Richardson, (1991)

Year/Sem	VIII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET39
Name of the Course	RURAL WATER SUPPLY AND ONSITE SANITATION SYSTEMS					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon the successful completion of course students will be able to

- Relate various approaches for planning the water supply systems in rural areas (K3)
- Apply suitable methods of water treatment for rural areas(K3)
- Develop distribution system in rural areas (K3)
- Apply the sanitary engineering concept and principals(K3)
- Apply the different public sanitation methods in rural areas(K3)
- Apply different solid waste methods in rural areas(K3)

SYLLABUS

UNIT I

Concept of environmental and scope of sanitation in rural areas: Magnitude of problem of water supply and sanitation – population to be covered and difficulties National policy. Various approaches for planning of water supply systems in rural areas. Selection and development of preferred sources of water, springs, wells and infiltration galleries, collection of raw water from surface source.

UNIT II

Specific problems: Specific problems in rural water supply and treatment e.g. iron, manganese, fluorides etc. Low cost treatment, appropriate technology for water supply and sanitation. Improvised method and compact system of treatment of surface and ground waters such as MB settlers, slow and sand filter, chlorine diffusion cartridge etc. Water supply through spot sources, hand pumps, open dug –well.

UNIT III

Planning of distribution system in rural areas: Water supply during fairs, festivals and emergencies. Treatment and disposal of wastewater/sewage. Various method of collection and disposal of night soil.

UNIT IV

On site sanitation system and community latrines: Simple wastewater treatment system for rural areas and small communities such as stabilization ponds, septic tanks, soakage pits etc.

UNIT V

Industrial Hygiene And Sanitation: Occupational Hazards- Schools- Public Buildings- Hospitals- Eating establishments- Swimming pools – leanliness and maintenance and comfort- Industrial plant sanitation

UNIT VI

Solids Waste: Collection, Transfer, Transport and deposit of solid waste management, composting, land filling.

Text Books:

1. Low cost on site sanitation option, Hoffman & Heijno Occasional Nov.1981 paper no.

2. 21, P.O. Box 5500 2280 HM Rijswijk, the Netherlands offices, J.C. Mokeniaan, 5

3. Rijswijk (the Haque). Wagner, E.G. and Lanoik, J.N. water supply for rural areas and Small Communities, Geneva: W.H.O.1959.

References:

1. Manual of water supply and treatment, 3rd edition, CPHEEO, GOI, New Delhi.
2. Vesilind, P.A., Worrell, W., Reinhart, D. “Solid Waste Engineering”, Cenage learning, New Delhi, 2004

Year/Sem	VIII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET40
Name of the Course	PRESTRESSED CONCRETE					
Branch	CIVIL ENGINEERING					

COURSE OUTCOMES:

Upon the successful completion of course students will be able to

- Generalize the basic concepts of prestressed concrete (K2)
- Compute prestress and bending stresses (K3)
- Estimate effective prestress including the short- and long-term losses (K2)
- Analyze and design prestressed concrete beams under flexure (K4)
- Analyze and design prestressed concrete beams under Shear and torsion (K4)
- Generalize the end zone of prestressed concrete members (K2)

SYLLABUS

UNIT I

Introduction: Basic concepts of prestressing; Need for High strength steel and High strength concrete. Terminology; Advantages and Applications of Prestressed Concretes. Materials For Prestressed Concrete: High strength concrete; High tensile steel.

UNIT II

Prestressing Systems: Prestressing Systems- Introduction, Tensioning devices, Pre-tensioning Systems, Post tensioning Systems

Analysis of Prestress and Bending Stresses: Basic assumptions; Analysis of prestress; Resultant stresses at a section; Pressure (Thrust) line and internal resisting couple; Concept of Load balancing.

UNIT III

Losses of Prestress: Nature of losses of prestress; Loss due to elastic deformation of concrete, shrinkage of concrete, creep of concrete, relaxation of stress in steel, friction and anchorage slip; Total losses allowed for in design.

UNIT IV

Deflections of Prestressed Concrete Members: Importance of control of deflections; Factors influencing deflections; Short term deflections of un-cracked members; Effect of tendon profile on deflections.

Limit State of Collapse: Flexural Strength of Prestressed Concrete Sections: Ultimate flexural strength of rectangular sections and T-sections using simplified IS code recommendations.

UNIT V

Limit State of Collapse:Shear Resistance of Prestressed Concrete Members: Shear and principal stresses; Shear- IS Code recommendations: Ultimate shear resistance of prestressed concrete members; Design of shear reinforcement.

Torsional Resistance of Prestressed Concrete Members: Design of reinforcements for torsion, shear and bending.

UNIT VI

Design of End Blocks: Transmission of prestress in pretensioned members; Transmission length; Anchorage stress in post tensioned members; Bearing stress and bursting tensile force stresses in end blocks-Methods. IS Code provision for the design of end block reinforcement.

Text Books: (supplemented with IS: 1343)

1. Prestressed Concrete by N. Krishna Raju; Tata Mc.Graw - Hill Publishing CompanyLimited, New Delhi.
2. Pre-stressed Concrete- P. Dayarathnam: Oxford and IBH Publishing Co.
3. Prestressed Concrete, S. Ramamrutham

References:

1. Prestressed concrete by N. Rajagopalan; Narosa Publishing House.
2. Design of pre-stressed concrete structures- T.Y. Lin and Ned H. Burns - John Wiley & Sons, New York.
3. Fundamental of pre-stressed concrete- N.C. Sinha & S.K. Roy
4. Prestressed Concrete, T. Y. Lin & Burns, Wiley Publications

Year/Sem	**VIII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V18	3	0	0	3	V18CET41
Name of the Course	**ENGINEERING WITH GEO-SYNTHETICS**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Relate the need and demand of geo-synthetic materials in the field of geotechnical construction works (K3)
- Employ various parameters related to the use and application of geotextiles, geogrids (K3)
- Examine the use and field testing of geo-synthetics in road construction (K3)
- Design reinforced earth retaining walls with strip, sheet and gird reinforcement (K5)
- Distinguish survivability requirements of geo-composites and could design geowebs, geocells, and moisture barriers and natural geotextiles etc. (K4)
- Employ other methods to use the natural geotextiles like jute fibres, coir, bamboo and their combination (K3)

SYLLABUS

UNIT I

Geosynthetics: Introduction to Geosynthetics – Basic description – Polymeric materials– Uses and Applications. Properties of Geotextiles – Geogrids – Geomembranes – Geocomposites.

UNIT-II

Geotextiles: Design criteria for Separation – Reinforcement – Stabilization – Filtration – Drainage and Moisture barriers.

Geogrids: Designing for Reinforcement – Stabilization – Designing Gabions – Construction methods.

UNIT-III

Use of Geosynthetics in Roads: Geosynthetics in road ways- applications role of subgrade conditions-design criteria-survivability-application in paved roads.

UNIT-IV

Reinforced Earth Retaining Walls: Components - External stability – Internal stability-Design of reinforced earth walls with strip, sheet and grid reinforcement.

UNIT-V

Geomembranes: Pond Liners – Covers for Reservoirs – Canal Liners – Landfill Liners– Caps and closures, moisture barriers.

Geocomposites: An added advantage – Geocomposites in Separation – Reinforcement – Filtration – Geocomposites as Geowebs and Geocells.

UNIT-VI

Natural Geotextiles: Natural fibres as geotextiles- factors governing the use jute fibres-coir geotextiles-bamboo/timber-combination of geotextiles.

Text Books:

1. Designing with Geosynthetics by Robert M. Koerner, Prantice Hall, Eaglewood Cliffs, NJ.

2. An Introduction to Soil Reinforcement and Geosynthetics' by G.L.Sivakumar Babu

(2009), Universities Press (India) Pvt. Ltd.

3. Engineering with Geosynthetics', by G. Venkatappa Rao and GVS Suryanarayana Raju –

Tata McGraw Hill Publishing Company Limited – New Delhi.

References:

1. 'Construction and Geotechnical Engineering using Synthetic Fabries' by Robert M.

Koerner and Josoph P. Welsh. John Willey and Sons, New York.

2. 'Foundation Analysis and Design' by J.E. Bowles McGraw Hill Publications.

Year/Sem	**VIII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V18	3	0	0	3	V18CET42
Name of the Course	**URBAN HYDROLOGY & HYDRAULICS**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Generalize the effect of urbanization on hydrological cycle (K2)
- Develop intensity duration frequency curves for urban drainage systems (K3)
- Calculate runoff parameters in urban drainage system (K3)
- Develop design storms to size the various components of drainage systems (K3)
- Apply best management practices to manage urban flooding (K3)
- Prepare master drainage plan for an urbanized area (K3)

SYLLABUS

UNIT I

Introduction: Urbanization and its effect on water cycle – urban hydrologic cycle – Trends in urbanization – Effect of urbanization on hydrology

UNIT II

Precipitation Analysis: Importance of short duration of rainfall and runoff data, methods of estimation of time of concentration for design of urban drainage systems, Intensity-Duration -Frequency (IDF) curves, design storms for urban drainage systems.

UNIT III

Approaches to urban drainage: Time of concentration, peak flow estimation approaches, rational method, NRCS curve number approach, runoff quantity and quality, wastewater and storm water reuse, major and minor systems.

UNIT IV

Elements of drainage systems: Open channel, underground drains, appurtenances, pumping, source control.

UNIT V

Analysis and Management: Storm water drainage structures, design of storm water network- Best Management Practices–detention and retention facilities, swales, constructed wetlands, models available for storm water management.

UNIT VI

Master drainage plans: Issues to be concentrated upon – typical urban drainage master plan, interrelation between water resources investigation and urban planning processes, planning objectives, comprehensive planning, use of models in planning.

Text Books:

1. Manual on Drainage in Urbanised area, Geiger W. F., J Marsalek, W. J. Rawls and F.C. Zuidema, (1987 - 2 volumes), UNESCO,

2. Urban Hydrology, Hall M J (1984), Elsevier Applied Science Publisher.

3. Hydrology – Quantity and Quality Analysis, Wanielista M P and Eaglin (1997), Wiley and Sons

4. Urban Hydrology, Hydraulics and Storm water Quality: Engineering Applications and Computer Modelling, Akan A.O and R.L. Houghtalen (2006), Wiley International.

References:

1. Storm water Detention for Drainage, Stahre P and Urbonas B (1990), Water Quality and CSO Management, Prentice Hall.

2. Urban water cycle processes and interactions, Marsalek et.al. (2006), Publication No. 78, UNESCO, Paris(http://www.bvsde.paho.org/bvsacd/cd63/149460E.pdf)

3. Frontiers in Urban Water Management – Deadlock or Hope, by Maksimovic C and J A Tejada-Guibert (2001), IWA Publishing

Year/Sem	VIII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET43
Name of the Course	ENVIRONMENTAL IMPACT ASSESSMENT AND MANAGEMENT					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of the course, the student will be able to

- Prepare EMP, EIS, and EIA report (K3)
- Select the an appropriate EIA methodologies (K2)
- Assess the Impact of development activities and land use (K3)
- Employ in procuring the natural resources for assessing the environment (K3)
- Assess the ecosystem (K3)
- Develop the EIA notifications and reports (K3)

SYLLABUS

UNIT I

Basic concept of EIA: Elements of EIA-factors affecting EIA-Initial environmental Examination-life cycle analysis preparation of Environmental Base map-Classification of environmental parameters role of stakeholders in the EIA preparation stages in EIA

UNIT II

E I A Methodologies: introduction, Criteria for the selection of EIA Methodology, E I A methods, Ad-hoc methods, matrix methods, Network method Environmental Media Quality Index method, overlay methods, cost/benefit Analysis – EIS and EMP

UNIT III

Impact of Developmental Activities and Land use: Introduction and Methodology for the assessment of soil and ground water, Delineation of study area, Identification of actives- application of remote sensing and GIS for EIA.

UNIT IV

Procurement of natural resources: Procurement of relevant soil quality, Impact prediction, Assessment of Impact significance, Identification and Incorporation of mitigation measures - E I A with reference to surface water, Air and Biological environment: Methodology for the assessment of Impacts on surface water environment, generalized approach for assessment of Air pollution Impact.

UNIT V

Assessment of ecosystem: Assessment of Impact of development Activities on Vegetation and wildlife, environmental Impact of Deforestation. Environmental Risk Assessment and Risk management in EIA: Risk assessment and treatment of uncertainty-key stages in performing an Environmental Risk Assessment advantages of Environmental Risk Assessment

UNIT VI

EIA notification: EIA notification by Ministry of Environment and Forest (Govt. of India): Provisions in the EIA notification, procedure for environmental clearance, and procedure for conducting environmental impact assessment report- evaluation of EIA report. Environmental legislation objectives, evaluation of Audit data and preparation of Audit report. Post Audit activities, Concept of ISO and ISO 14000. Case studies and preparation of Environmental Impact assessment statement for various Industries.

Text Books:

1. Environmental Impact Assessment, Canter Larry W., McGraw-Hill education Edi (1996)
2. Environmental Impact Assessment Methodologies, Y.Anjaneyulu, B. S. Publication, Sultan Bazar, Hyderabad.
3. Environmental Impact Assessment and Management, B B Hosetti, A.Kumar, Daya Publishing House (2014)

References:

1. Environmental Science and Engineering, J. Glynn and Gary W. Hein Ke PrenticeHall Publishers
2. Environmental Science and Engineering, Suresh K. Dhaneja, S. K. ,Katania& Sons Publication., New Delhi.
3. Environmental Pollution and Control, H. S. Bhatia, Galgotia Publication (P) Ltd, Delhi

Year/Sem	VIII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET44
Name of the Course	**ADVANCED CONCRETE TECHNOLOGY**					
Branch	CIVIL ENGINEERING					

Course Outcomes

Upon successful completion of course the students will be able to

- Relate material characteristics and their influence on microstructure of concrete(K3)
- Predict concrete behavior based on its durability properties(K3)
- Illustrate proportioning of different types of concrete mixes for required fresh and hardened properties using professional codes(K3)
- Select a suitable type of concrete based on specific application(K3)
- Employ suitable concreting methods to place the concrete based on requirement(K3)
- Illustrate different types of concrete tests for hardened properties(K3)

SYLLABUS

UNIT I

Ingredients of Concrete: Cement –chemical composition and their importance, hydration of cement, types of cement. Testing of cement.
Fine aggregate: Functions, requirement, Alternatives to River sand, M-sand introduction and manufacturing.
Coarse aggregate: Importance of size, shape and texture. Grading and blending of aggregate. Testing on aggregate, requirement. Recycled aggregates Water – qualities of water.
Chemical admixtures: Plasticizers, accelerators, retarders and air entraining agents. Mineral admixtures – Pozzolanic and cementitious materials, Fly ash, GGBS, silica fumes, Metakaolin and rice huskash.

UNIT II
Durability of Concrete: Durability, Transport mechanism of fluids and gases in concrete, cracking in concrete - corrosion and carbonation induced cracking, Alkali Aggregate Reaction, degradation by freeze and thaw, chloride attack, sulphate and sea water attack (marine conditions). Hot and cold weather concreting.

UNIT III

Concrete Mix Design: Design of concrete mixes by IS code method - ACI method Design of high strength concrete mixes, design of fly-ash cement concrete mixes, design of high density concrete mixes.

UNIT IV

Special Concrete: Lightweight concrete, autoclaved aerated concrete, no-fines concrete, lightweight aggregate concrete and foamed concrete, High strength concrete, refractory concrete, high density and radiation-shielding concrete, polymer concrete, fibre-reinforced concrete, mortars, renders, recycled concrete, Ferro Cement, Self Compacting Concrete.

UNIT V

Special processes and technology for particular types of structure: Sprayed concrete, underwater concrete, grouts, grouting and grouted concrete, mass concrete, slip form construction, pumped concrete, concrete for liquid retaining structures, vacuum process

UNIT VI

Testing of Concrete: Test methods: Analysis of fresh concrete, Accelerated testing methods, Tests on hardened concrete, Core cutting and testing, partially destructive testing, Non-destructive testing of concrete structure

Text Books:

1. Neville, A.M., Properties of Concrete, Pearson Education Asia (P) Ltd, England, 2000.
2. Concrete Technology, Gambhir M.L, Tata McGraw Hill
3. Concrete Technology, M.S.Shetty, S.Chand& Company New Delhi
4. Concrete microstructure, properties & materials, P.KumarMehata, Paulo & J.M. Monteiro,
5. Light Weight Concrete, Short &Kenniburg, Asia Publishing House, Bombay

References:

1. N. V. Nayak, A. K. Jain Handbook on Advanced Concrete Technology, ISBN: 978-81-8487-186-9
2. Job Thomas, “Concrete Technology”, CENGAGE Learning,2015.
3. IS 4926 (2003): Code of Practice Ready-Mixed Concrete [CED 2: Cement and Concrete] Criteria for RMC Production Control, Basic Level Certification for Production Control of Ready Mixed Concrete BMTPC.
4. Specification and Guidelines for Self-Compacting Concrete, EFNARC, Association House.

Year/Sem	**VIII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V18	3	0	0	3	V18CET45
Name of the Course	**FINITE ELEMENT METHOD**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of the course, the student will be able to

- Apprise the students about the basics of the Finite Element Technique(K2)
- Describe the finite element method, identify different types of finite elements and apply to respective engineering problems(K3)
- Analyze one dimensional solid elements of various engineering problems(K3)
- Illustrate frame structures of various engineering problems (K3).
- Analyze 2-D and 3-D engineering problems using finite element method(K3)
- Examine finite element for elastic stability, fluid mechanics and dynamic analysis (K3)

SYLLABUS

UNIT I

Introduction to Finite Element Analysis: Basic Concepts of Finite Element Analysis - Introduction to Elasticity -Steps in Finite Element Analysis

UNIT II

Finite Element Formulation Techniques: Virtual Work and Variational Principle -Galerkin Method- Finite Element Method: Displacement Approach - Stiffness Matrix and Boundary Conditions

UNIT III

Element Properties: Natural Coordinates -Triangular Elements - Rectangular Elements - Lagrange and Serendipity Elements -Solid Elements - Isoparametric Formulation -Stiffness Matrix of Isoparametric Elements - Numerical Integration: One Dimensional - Numerical Integration: Two and Three Dimensional- Worked out Examples

UNIT IV

Analysis of Frame Structures: Stiffness of Truss Members -Analysis of Truss -Stiffness of Beam Members - Finite Element Analysis of Continuous Beam - Plane Frame Analysis - Analysis of Grid and Space Frame

UNIT V

FEM for Two and Three Dimensional Solids: Constant Strain Triangle - Linear Strain Triangle - Rectangular Elements - Numerical Evaluation of Element Stiffness - Computation of Stresses, Geometric Nonlinearity and Static Condensation - Axisymmetric Element - Finite Element Formulation of Axisymmetric Element - Finite Element Formulation for 3 Dimensional-Elements Worked out Examples

UNIT VI

Additional Applications of FEM: Finite Elements for Elastic Stability - Finite Elements in Fluid Mechanics - Dynamic Analysis

Text Books:

1. Introduction to Finite Elements in Engineering, Tirupati R. Chandrupatla, Ashok D. Belgundu, PHI publications.

2. A first course in the Finite Element Method, Dary L. Logan, Thomson Publications.

3. The Finite Element Method- Zinkiewicz, O.C. and Taylor, R.L , Oxford .

4. Finite Element Analysis Theory and Programming- Krishnamoorthy, C.S, Tata McGraw-Hill Education.

References:

1. Concepts and applications of Finite Element Analysis, Robert D. Cook, Michael E Plesha, John Wiley & sons Publication.

2. Introduction to Finite Element Method, Desai & Abel CBS Publication.

3. Introduction to Finite Element Method- P.N. Godbole, I K International Publishing House Pvt. Ltd.

4. The Finite Element Method in Engineering- S.S. Rao, Butterworth-Heinemann;

5. An Introduction to Finite Element Method- Reddy, J. N., McGraw-Hill Education

Year/Sem	VIII	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CET46
Name of the Course	GROUND IMPROVEMENT TECHNIQUES					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course. the student will be able to

- To make the student appreciate the need for different ground improvement methods adopted for improving the properties of remoulded and in-situ soils (K2)
- The student should be in a position to understand the importance of dewatering and different dewatering techniques (K3)
- The student should be in a position to know the importance of stabilization of soils and types of stabilizations (K3)
- To make the student understand how the reinforced earth technology and soil nailing can obviate the problems posed by the conventional retaining walls (K3)
- To enable the students to know how geotextiles and geosynthetics can be used to improve the engineering performance of soils (K2)
- To make the student learn the concepts, purpose and effects of grouting (K2)

SYLLABUS

UNIT I

In situ densification methods: In situ densification of granular soils- vibration at ground surface and at depth, impact at ground and at depth – in situ densification of cohesive soils – pre loading – vertical drains – sand drains and geo drains – stone columns.

UNIT II

Dewatering: Sumps and interceptor ditches – single and multi stage well points – vacuum well points – horizontal wells– electro osmosis

UNIT III

Stabilization of soils: Methods of soil stabilization – mechanical – cement – lime – bitumen and polymer stabilization – use of industrial wastes like fly ash and granulated blast furnace slag.

UNIT IV

Reinforced earth: Principles – components of reinforced earth –stability checks – soil nailing

UNIT V

Geosynthetics: Geotextiles – types – functions, properties and applications – geogrids , geomembranes and gabions – properties and applications.

UNIT VI

Grouting: Objectives of grouting – grouts and their applications – methods of grouting – stage of grouting.

Text Books:

1. Ground Improvement Techniques, Purushotham Raj, Laxmi Publications, New Delhi.
2. Ground Improvement Techniques, Nihar Ranjan Patro, Vikas Publishing House (p) limited , New Delhi.
3. An introduction to Soil Reinforcement and Geosynthetics, G. L. Siva Kumar Babu, Universities Press.

References:

1. Ground Improvement, M.P.Moseley, Blackie Academic and Professional, USA
2. Designing with Geosynethetics, R. M Koerner, Prentice Hall
3. Engineering Principles of Ground Modification by Manfred R. Hausmann,McGraw-Hill Inc.,

ANNEXURE - III

COURSES OFFERED UNDER OPEN ELECTIVE IN VII & VIII SEMESTER TO OTHER BRANCHES

Open Elective 2	VII Sem	3. Environmental Pollution and Control 4. Disaster Management	V18CEOE03 V18CEOE04
Open Elective 3	VIII Sem	3. Solid Waste Management 4. Water Quality and Conservation	V18CEOE05 V18CEOE06

Year/Sem	VII	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CEOE03
Name of the Course	ENVIRONMENTAL POLLUTION AND CONTROL					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Describe about air pollution and its control methods to students(K2)
- Develop the student to understand about industrial wastewater and ways to control it (K3)
- Describe student to understand about solid waste and methods to control it(K2)
- Express to student about importance of Environmental sanitation(K2)
- Prepare student to understand about Hazardous waste and ways to control it(K3)
- Illustrate the importance of Sustainable development to student(K3)

SYLLABUS

UNIT I

Air Pollution: Air pollution Control Methods–Particulate control devices – Methods of Controlling Gaseous Emissions – Air quality standards.Noise Pollution: Noise standards, Measurement and control methods –Reducing residential and industrial noise – ISO14000.

UNIT II

Industrial wastewater Management: – Strategies for pollution control - Volume and Strength reduction – Neutralization – Equalization – Proportioning – Common Effluent Treatment Plants - Recirculation of industrial wastes – Effluent standards.

UNIT III

Solid Waste Management: solid waste characteristics – basics of on-site handling and collection – separation and processing – Incineration Composting-Solid waste disposal methods – fundamentals of Land filling.

UNIT IV

Environmental Sanitation: Environmental Sanitation Methods for Hostels and Hotels, Hospitals, Swimming pools and public bathing places, social gatherings (melas and fares), Schools and Institutions, Rural Sanitation-low cost waste disposal methods.

UNIT V

Hazardous Waste: Characterization - Nuclear waste – Biomedical wastes – Electronic wastes - Chemical wastes – Treatment and management of hazardous waste-Disposal and Control methods.

UNIT VI

Sustainable Development: Definition- elements of sustainable developments-Indicators of sustainable development- Sustainability Strategies- Barriers to Sustainability–Industrialization and sustainable development – Cleaner production in achieving sustainability- sustainable development.

Text Books:

1. Environmental Engineering, by Ruth F. Weiner and Robin Matthews – 4th Edition Elesevier, 2003.
2. Environmental Science and Engineering by J.G. Henry and G.W. Heinke – Pearson Education.
3. Environmental Engineering by Mackenzie L Davis & David A Cornwell. McGraw Hill Publishing.

References:

1. Air Pollution and Control by M.N. Rao & H.N. Rao
2. Solid Waste Management by K. Sasi Kumar, S.A. Gopi Krishna. PHI New Delhi.
3. Environmental Engineering by Gerard Kiley, Tata McGraw Hill.
4. Environmental Sanitation by KVSG Murali Krishna, Reem Publications, New Delhi.
5. Industrial Water Pollution Control by Nemerow Jr., McGraw Hill Publishing.
6. Unit Operations and Processes in Environmental Engineering by Reynolds. Richard – Cengage Learning.
7. Environmental Engineering by D. Srinivasan, PHI Learning Private Limited, NewDelhi, 2011.
8. Environmental Engineering – Howard S. Peavy, Donald R. Rowe,Teorge George Tchobanoglus – Mc-Graw-Hill Book Company,New Delhi, 1985.

Year/Sem	VII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CEOE04
Name of the Course	DISASTER MANAGEMENT					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Describe to student to have a idea on different natural hazards and disaster management (K2)
- Develop the student to understand manmade disaster and their management (K3)
- Prepare the student in such a way inorder to understand building codes and vulnerability of disaster (K3)
- Illustrate to student about role of technology in disaster management (K2)
- Assess the importance of education and community preparedness in disaster management to student (K3)
- Classify the multi-sectional issues caused by disaster to student (K2)

SYLLABUS

UNIT I

Natural Hazards and Disaster Management: Introduction of DM Disaster Management cycle – Five priorities for action- Case study methods of the following: floods, droughts – Earthquakes – global warming, cyclones & Tsunamis – Post Tsunami hazards along the Indian coast – landslides.

UNIT II

Man Made Disastar And Their Management Along With Case Study Methods Of The Following: Fire hazards – transport hazard dynamics – solid waste management – post disaster – bio terrotirism - rail and air craft's accidents-Management of these disasters

UNIT III

Risk And Vulnerability: – Building codes and land use planning – social vulnerability – environmental vulnerability-Financial management of disaster.

UNIT IV

Role Of Technology In Disaster Managements: Disaster management for infra structures, taxonomy of infra structure - mitigation programme for earth quakes –geospatial information in agriculture drought assessment-multimedia technology in disaster risk management and training-transformable indigenous knowledge in disaster reduction.

UNIT V

Education And Community Preparedness: Education in disaster risk reduction-Essentials of school disaster education-Community capacity and disaster resilience-Community based disaster recovery -Community based disaster management and social capital-Designing resilience- building.

UNIT VI

Multi-sectional Issues: Impact of disaster on poverty and deprivation-Climate change adaptation and human health -Exposure , health hazards and environmental risk-Forest management and disaster risk reduction - The Red cross and red crescent movement.

Text Books:

1. Disaster Management – Global Challenges and Local Solutions' by Rajib shah & R R Krishnamurthy(2009),Universities press.
2. Disaster Science & Management' by Tushar Bhattacharya, Tata McGraw Hill Education Pvt. Ltd., New Delhi.
3. Disaster Management – Future Challenges and Opportunities' by Jagbir Singh (2007), I K International Publishing House Pvt. Ltd.

Reference Books:

1. 'Disaster Management' edited by H K Gupta (2003), Universities press.
2. Natural Hazards and Disaster Management, Vulnerability and Mitigation by RB Singh
3. Disaster Management by Harish K.Gupta

Year/Sem	VIII Sem	L	T	P	C	COURSE CODE
Regulation	V18	3	0	0	3	V18CEOE05
Name of the Course	SOLID WASTE MANAGEMENT					
Branch	CIVIL ENGINEERING					

Course Outcomes:
Upon successful completion of this course, the students will be able to

- Generalize Solid Waste and its management(K2)
- Assess different elements for managing Solid Waste(K3)
- Employ different methods for transfer and transport of solid waste(K3)
- Employ different methods for Separation and Transformation of Solid waste(K3)
- Organize different methods for processing and treatment of municipal solid waste(K3)
- Identify suitable disposal methods with respect to solid waste(K2)

SYLLABUS

UNIT I

Introduction to Solid Waste Management: Goals and objectives of solid waste management, Classification of Solid Waste – Factors Influencing generation of solid waste – sampling and characterization –Future changes in waste composition, major legislation, monitoring responsibilities.

UNIT II

Basic Elements In Solid Waste Management: Elements and their inter relationship – principles of solid waste management- onsite handling, storage and processing of solid waste Collection of Solid Waste: Types and methods of waste collection systems, analysis of collection system – optimization of collection routes.

UNIT III

Transfer and Transport: Need for transfer operation, compaction of solid waste – transport means and methods, transfer station types and design requirements.

UNIT IV

Separation and Transformation of Solid Waste: Unit operations used for separation and transformation: shredding – materials separation and recovery, source reduction and waste minimization.

UNIT V

Processing and Treatment: Processing of solid waste – Waste transformation through combustion and composting, anaerobic methods for materials recovery and treatment – Energy recovery – biogas generation and cleaning– Incinerators.

UNIT VI

Disposal of Solid Waste: Methods of Disposal, Landfills: Site selection, design and operation, drainage and leachate collection systems –designated waste landfill remediation.

Text Books:

1. George Techobanoglous "Integrated Solid Waste Management", McGraw Hill Publication, 1993
2. Gerard Kiely " Environmental Engineering", McGraw Hill Publication, 2007
3. J Glynn Henry,. Gary W.Heinke "Environmental Science and Engineering", Prentice-Hall of India Pvt Ltd, 1996

References:

1. Vesilind, P.A., Worrell, W., Reinhart, D. "Solid Waste Engineering", Cenage learning, New Delhi, 2004
2. Charles A. Wentz; "Hazardous Waste Management", McGraw Hill Publication, 1995.
3. Mackenzie L Davis, David A.Cornwell :Introduction to Environmental Engineering" McGraw Hill Publication, 2017

Year/Sem	**VIII Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation Year	V18 / 2021-2022	3	0	0	3	V18CEOE06
Name of the Course	**WATER QUALITY AND CONSERVATION SYSTEMS**					
Branch	CIVIL ENGINEERING					

Course Outcomes:
Upon successful completion of the course, the student will be able to

- Describe the Engineering Hydrology and application (K2)
- Assess the importance and necessity of water supply systems (K3)
- Relate different sources of surface and ground water (K3)
- Predict the quality of water in reference to IS and WHO standards (K3)
- Design of plumbing and sanitary fittings (K3)
- Employ different conservation techniques (K3)

SYLLABUS

UNIT I
Introduction to Hydrology: Engineering hydrology, applications, Hydrologic cycle, evaporation, evapotranspiration, precipitation, run off, infiltration, hydrological data-sources

UNIT II

Sources of Water: Surface water, Lakes, Rivers, Reservoirs, comparison of sources with reference to quality, quantity and other considerations.

Groundwater, types of water bearing formations, springs, Wells and Infiltration galleries, Yields from infiltration galleries.

UNIT III

Importance and Necessity: Protected Water Supply systems, Flow chart of public water supply system, Water borne diseases. Estimation of water usages in different purpose.

UNIT IV

Quality and Analysis of Water: Characteristics of water–Physical, Chemical and Biological-Analysis of Water – Physical, Chemical and Biological characteristics. Comparison of sources with reference to quality- I.S. Drinking water quality standards and WHO guidelines for drinking water.

UNIT V

Plumbing Systems: Systems of plumbing-types of pipes and sanitary fittings and other accessories–one pipe andtwo pipe systems – Design parameters and factors.

UNIT VI

Water conservation: importance and necessity, objectives, systems-rainwater harvesting, recharge pits, watershed.

Text Books:

1. Environmental Engineering – Howard S. Peavy, Donald R. Rowe, Teorge George Tchobanoglus – Mc-Graw-Hill Book Company, New Delhi, 1985
2. Elements of Environmental Engineering, K. N. Duggal, S. Chand & Company Ltd. New Delhi, 2012.
3. Water Supply and Sanitary Engineering – G. S. Birdie and J. S. Birdie

ANNEXURE – V

SYLLABI OF III & IV SEMESTERS OF B.TECH V20 REGULATION

ACADEMIC YEAR 2021-2022

III SEMESTER – SYLLABUS

Year/Sem	**III Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	0	0	3	V20CET01
Name of the Course	**STRENGTH OF MATERIALS**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon completion of the course, the student will be able to

- Understand the basic materials behavior under the influence of different external loading conditions and the support conditions (K2)
- Draw the diagrams indicating the variation of the key performance features like bending moment and shear forces (K3)
- Understand bending concepts and calculation of section modulus and for determination of stresses developed in the beams and torsion (K3)
- Understand the basic concepts of Principal stresses developed in a member when it is subjected to stresses along different axes and design the sections (K2)
- Asses stresses in different engineering applications like columns and struts subjected to different loading conditions (K3)

SYLLABUS

UNIT I

Simple Stresses ,Strains and Strain Energy: Elasticity and plasticity –Types of stresses and strains – Hooke‘s law – stress – strain diagram for mild steel – Workingstress – Factor of safety – Lateral strain, Poisson‘s ratio and volumetric strain – Elasticmoduli and the relationship between them – Bars of varying section – composite bars –Temperature stresses. Strain Energy – Resilience – Gradual, sudden, impact and shock loadings – simple applications.

UNIT II

Shear Force and Bending Moment: Definition of beam – Types of beams – Concept of shear force and bending moment – S.F and B.M diagrams for cantilever, simply supported and overhanging beams subjected to point loads, uniformly distributed loads, uniformly varying loads and combination of these loads – Point of contra flexure – Relation between S.F., B.M and rate of loading at a section of a beam

Deflection of Beams: Bending into a circular arc – slope, deflection and radius of curvature – Differential equation for the elastic line of a beam – Double integration and Macaulay‘s methods – Determination of slope and deflection for cantilever and simply supported beams subjected to point loads, - U.D.L. Uniformly varying load. Mohr‘s theorems – Moment area method – application to simple cases.

UNIT III

Flexural Stresses: Theory of simple bending – Assumptions – Derivation of bending equation: M/I = f/y = E/R, Neutral axis – Determination bending stresses – section modulus of rectangular and circular sections (Solid and Hollow), I, T, Angle and Channel sections – Design of simple beam sections.

Shear Stresses: Derivation of formula – Shear stress distribution across various beam sections like rectangular, circular, triangular, I, T angle sections, built up beams, shear centreTorsion- Derivation of torsion equation and its assumptions.

UNIT-IV

Principal Stresses and Strains: Introduction – Stresses on an inclined section of a bar under axial loading – compound stresses – Normal and tangential stresses on an inclined plane for biaxial stresses – Two perpendicular normal stresses accompanied by a state of simple shear – Mohr’s circle of stresses – Principal stresses and strains – Analytical and graphical solutions. Theories of failures: Various Theories of failures such as Maximum Principal stress theory –Maximum Principal Strain Theory – Maximum shear stress theory – Maximum strain energy theory –Maximum shear strain energy theory.

UNIT-V

Columns and Struts: Introduction – Types of columns – Short, medium and long columns –Axially loaded compression members – Crushing load – Euler’s theorem for long columns –assumptions – derivation of Euler's critical load formulae for various end conditions – Equivalent length of a column – Slenderness ratio –Euler' critical stress – Limitations of Euler' theory – Rankine– Gordon formula – Long columns subjected to eccentric loading – Secant formula –Empirical formulae – Straight line formula – Prof. Perry' formula.

Text Books:

1. Mechanics of Materials- R. C. Hibbler, Pearson; 10 edition (January 15, 2016)
2. Strength of materials -S. S. Bhavakatti, Vikas Publishing House; Fourth edition (2013)
3. Strength of Materials -R. K. Rajput, S. Chand Publishing (6th Edition) (2015)
4. Strength of Materials - R.K Bansal,Laxmi Publications; Sixth edition (2018)

References:

1. Fundamentals of Solid Mechanics M.L. Gambhir, PHI Learning Pvt. Ltd., New Delhi. (1 December 2009)
2. Introduction to Strength of Material by U.C. Jindal, Pearson Education; Second edition (28 September 2017)
3. Strength of materials by R. Subramanian, Oxford university press, New Delhi, third edition (15 June 2016)

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation	V20	3	0	0	3	V20CET02
Name of the Course	FLUID MECHANICS & HYDRAULICS					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon completion of the course, the student will be able to

- Understand the physical properties of fluids and their influences on fluid motion (K2)
- Calculate the forces acting on plane and curved surfaces and solve fluid flow problems in kinematics and dynamics (K3)
- Solve various laminar and turbulent flow problems (K2)
- Solve uniform and non uniform open channel flow problems (K2)
- Estimate the impact of jet on plane and curved surfaces using momentum Principle (K2)

SYLLABUS

UNIT I

Introduction and Hydrostatics: Dimensions and units – Physical properties of fluid specific gravity, viscosity, surface tension, vapor pressure and their influences on fluid motion - pressure at a point, Pascal‘s law, hydrostatic law, atmospheric, gauge and vacuum pressure, measurement of pressure - pressure gauges, Manometers: Differential Manometers- Hydrostatic forces on submerged plane - Horizontal, Vertical, Center of pressure, derivations and problems.

UNIT II

Fluid Kinematics and Dynamics: Description of fluid flow - Stream line, path line and streak lines and stream tube - Classification of flows: Steady, unsteady, uniform, non-uniform, laminar, turbulent, rotational and irrotational flows - Surface and body forces - Euler and Bernoulli’s equations for flow

UNIT III

Closed Conduit and Measurement of Flow: Laws of Fluid friction-Darcy’s equation-Minor losses-pipes in series, pipes in parallel, Pipe network problem- variation friction factor with Reynolds’s number- Pitottube,Venturi meter and Orifice meter - flow over rectangular, triangular and trapezoidal notches.

UNIT IV

Uniform Flow and Non Uniform Flow: Types of flows - Type of channels - Chezy's, manning's and Bazin formulae for uniform flow - Most Economical sections - Critical flow: Specific energy-critical depth computation of critical depth critical, sub-critical and super critical flows - Dynamic equation for G.V.F., Mild, Critical, Steep, horizontal and adverse slopes, surface profiles - direct step method - Rapidly varied flow, hydraulic jump, energy dissipation.

UNIT V

Hydraulic Similitude and Momentum Principles: Dimensional analysis-Buckingham's-Pi theorem - study of hydraulic models-Geometric, Kinematic and Dynamic similarities-dimension less numbers, model laws-Hydrodynamic force of jets on stationary and moving flat-inclined and curved vanes-jet striking centrally and at tip- velocity triangles at inlet and outlet-expressions for work done and efficiency

Textbooks:

1. Hydraulics and Fluid Mechanics including Hydraulic Machines by Dr. P.N.Modiand Dr.S.N.Seth, Standard Book house, Rajsons Pvt.Ltd.,21stEdition.
2. A text book of Fluid Mechanics and Hydraulic Machines by Dr.R.K.Bansal,Laxmi Publications(P)Ltd.,NewDelhi,10thEdition,2018.
3. A text book of Fluid mechanics and Hydraulic machines by Er. R.K.Rajput, S.Chand&company,6thEdition,2016

References:

2. Fluid Mechanics by A.K.Mohanty, Prentice Hall of India Pvt. Ltd., NewDelhi,2nd Edition,1994.
3. Fluid Mechanics and Hydraulic Machines by K.Subramanya, McGraw Hill Education,1st Edition,2010.

Year/Sem	**III Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	0	0	3	V20CET03
Name of the Course	**SURVEYING AND GEOMATICS**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Demonstrate the basic surveying skills (K2)
- Computation of bearings by various surveying instruments (K3)
- Perform different methods of leveling (K3)
- Compute various data required for various methods of surveying (K3)
- Compute area and volume quantities by different methods (K3)

SYLLABUS

UNIT I

Introduction: Definition-Uses of surveying- overview of plane surveying (chain, Compass and plane table), Objectives, Principles and classifications – Errors in survey Measurements

UNIT II

Compass survey and traversing: Electronic distance measurements (EDM)-principles of electro optical EDM-Errors and corrections to linear measurements- Compass survey-Meridians, Azimuths and Bearings, declination, computation of angle. Traversing-Purpose-types of traverse-traverse computation-traverse adjustments-Introduction omitted measurements

UNIT III

Leveling, contouring and Curves: Concept and Terminology, Leveling Instrument and their Temporary and permanent adjustments- method of leveling. Characteristics and Uses of contours- methods of conducting contour surveys.Types of curves, design and setting out – simple and compound curves

UNIT IV

Theodolite Surveying: principles-uses and adjustments – temporary and permanent, measurement of horizontal and vertical angles. Principles of Electronic Theodolite – Introduction to Trigonometrically leveling,. Tachometric Surveying: Stadia and tangential methods of Tacheometry. Distance and-Elevation formulae for Staff vertical position

UNIT V

Computation of Areas and Volumes: Area from field notes, computation ofareas along irregular boundaries and area consisting of regular boundaries. Embankments and cutting for a level section and two level sections with and without transverse slopes, determination of the capacity of reservoir, volume of barrow pits.

Geomatics: Introduction, Total Station and Global positioning system, Electromagnetic spectrum, Visual image interpretation, Digital image processing

Text Books:

1. Surveying, Vol No.1, 2 &3, B. C. Punmia, Ashok Kumar Jain and Arun Kumar Jain –
2. Laxmi Publications Ltd, New Delhi,seventeenth edition (2016)
3. 2 Text book of Surveying, S.K. Duggal (Vol No. 1&2), Tata McGraw Hill Publishing
4. Co. Ltd. New Delhi.Fourth edition (1 July 2017)
5. Text book of Surveying, Arora (Vol No. 1&2), STANDARD BOOK HOUSE SINCE 1960; Edition: Year-2015 edition (2015)
6. Anji Reddy, M., Remote sensing and geographical information system,BS Publications/BSP Books (2012)

References:

1. Text book of Surveying, C. Venkataramaiah, universities Press (India) Pvt. Ltd. (12 January 2011)
2. Surveying and levelling, R. Subramanian, Oxford University Press; 2 edition (30 June 2012)

Year/Sem	**III Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	0	0	3	V20CET04
Name of the Course	**BUILDING MATERIALS & CONCRETE TECHNOLOGY**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon completion of the course, the student will be able to

- Discuss the basic concepts of building materials (K2)
- Distinguish the basic ingredients of concrete and their role in the production of concrete and its behavior in the field (K2)
- Apply fundamental knowledge in the fresh concrete (K3)
- Apply fundamental knowledge in the hardened properties of concrete and factors (K3)
- Find test on hardened concrete and properties, evaluate the ingredients of concrete through lab test results and design the concrete mix by BIS method (K3)

SYLLABUS

Unit I(Stones, Bricks, Tiles, Wood and Paints)

Stones: Classification of Stones – Properties of stones in structural requirements

Bricks: Composition of good brick earth, Various methods of manufacturing of bricks

Tiles: Characteristics of good tile – Manufacturing methods, Types of tiles

Wood: Structure – Properties – Seasoning of timber – Classification of various types of woods used in buildings – Defects in timber

Paints: White washing and distempering, Constituents of paint – Types of paints – Painting of new and old wood – Varnish

Unit II (Aggregates, Cement and Admixtures)

Aggregates: Classification of aggregate, Bond, Strength and other mechanical properties of aggregate, Physical properties of aggregate, bulking of sand, Deleterious substance in aggregate, Soundness of aggregate, Alkali-Aggregate reaction – Thermal properties, Sieve analysis – Fineness modulus – Grading curves – Grading of fine and coarse aggregates as per relevant IS code, Maximum aggregate size

Portland Cement: Chemical composition, Hydration, Structure of hydrated cement – Setting of cement, Fineness of cement, Tests for physical properties – Different grades of cements **Supplementary cementitious materials:** Fly ash, GGBS, Silica fume, Rice husk ash, Calcinated ash (Basic properties and their contribution to concrete strength)

Admixtures: Mineral and Chemical admixtures

Unit III (Fresh Concrete)

Manufacture of concrete: Mixing and vibration of concrete, Workability – Segregation and bleeding – Factors affecting workability, Measurement of workability by different tests, Effect of time and temperature on workability – Quality of mixing water, Ready mix concrete, Shotcrete

Unit IV (Hardened Concrete)

Water / Cement ratio: Abram's law, Gel space ratio, Nature of strength of concrete – Maturity concept, Strength in tension and compression – Properties of Hardened Concrete (Elasticity, Creep, Shrinkage, Poisson's ratio, Water absorption, Permeability, etc.), Relating between compression and tensile strength, Curing

Unit V (Testing of Hardened Concrete, Mix Design)

Testing of Hardened Concrete: Factors affecting properties of Hardened concrete, Compression tests, Tension tests, Flexure tests, Non-destructive testing methods – Codal provisions for NDT – Rebound hammer and UPV method.

MixDesign: Factorsinthechoiceofmixproportions– Quality Controlofconcrete-Acceptancecriteria–Concepts Proportioningof concretemixes byvarious methods – BISmethod ofmix design.

Text Books:

1. "Concrete Technology" by M. S. Shetty - S. Chand & Co., 2004
2. "Engineering Materials" by Rangwala S C, (36th edition), Anand Charotar Publishing House
3. "Concrete Technology" by Shantha Kumar – Oxford Publications

Reference Books:

1. "Building Materials" by S. K. Duggal, New Age International Publications
2. "Building Materials" by P. C. Verghese, PHI learning (P) Ltd., 2009
3. "Properties of Concrete" by A. M. Neville – Pearson – 4th edition

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation	V20	0	0	3	1.5	V20CEL01
Name of the Course	STRENGTH OF MATERIALS LAB					
Branch	CIVIL ENGINEERING					

Course outcomes:

Upon completion of the course, the student will be able to

- Identify the engineering properties of materials in the laboratory
- Assess torsion test to determine elastic constants
- Assess spring test to determine elastic constants
- Assess flexural test to determine elastic constants
- Determine hardness of metals
- Determine Impact strength of metals

List of Experiments

1. Tension test on Steel bar
2. Bending test on (Steel / Wood) Cantilever beam.
3. Bending test on simple support beam.
4. Torsion test
5. Hardness test
6. Spring test
7. Compression test on wood or concrete
8. Impact test
9. Shear test
10. Verification of Maxwell‘s Reciprocal theorem on beams.
11. Continuous beam – deflection test.

List of Major Equipment:

1. UTM for conducting tension test on rods
2. Steel beam for flexure test
3. Wooden beam for flexure test
4. Torsion testing machine
5. Brinnell‘s / Rock well‘s hardness testing machine
6. Setup for spring tests
7. Compression testing machine
8. Izod Impact machine
9. Shear testing machine
10. Beam setup for Maxwell‘s theorem verification.
11. Continuous beam setup

Year/Sem	**III Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	0	0	3	1.5	V20CEL02
Name of the Course	**SURVEYING LAB**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon completion of the course, the student will be able to

- Use different Survey instruments to collect filed data
- Calculate distances, levels and angles from collected data
- Transfer points on ground to drawing sheet
- Interpret survey data to compute areas and volumes by using different methods
- Prepare profile of land from the collected survey data

List of experiments:

1. Survey by chain survey of road profile with offsets in case of road widening.
2. Finding the area of the given boundary using compass (Closed Traverse)
3. Plane table survey; finding the area of a given boundary by the method of Radiation
4. Plane table survey; finding the area of a given boundary by the method of intersection.
5. Fly leveling : Height of the instrument method (differential leveling)
6. Fly leveling: Rise and Fall method.
7. Theodolite Survey: Determining the Horizontal and Vertical Angles by the method of repetition method.
8. Theodolite Survey: Finding the distance between two inaccessible points.
9. One Exercise on Curve setting.
10. One Exercise on contours.
11. Determination of area using total station
12. Determination distance between two inaccessible points.
13. Introduction to GPS.

2. Text book of Surveying by S.K. Duggal (Vol No. 1&2), McGraw Hill Education; Fourth edition (1 July 2017), New Delhi.
3. Text book of Surveying,Dr.K.R.Arora (Vol No. 1&2), STANDARD BOOK HOUSE SINCE 1960; Edition: Year-2015 edition (2015), Delhi.

Year/Sem	**III Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	0	0	3	1.5	V20CEL03
Name of the Course	**CONCRETE TECHNOLOGY LAB**					
Branch	CIVIL ENGINEERING					

Course outcomes:

Upon completion of the course, the student will be able to

- Find some properties of cement by consistency, fineness, setting times, specific gravity, soundness and compressive strength.
- Determine the workability of cement concrete by compaction factor, slump and Vee – Bee tests.
- Determine properties of self-compacting concrete by Slump cone, V funnel, L Box
- Determine the specific gravity of coarse aggregate and fine aggregate by Sieve analysis.
- Determine the flakiness and elongation index of coarse aggregates.
- Determine the bulking of sand.
- Understand the non-destructive testing procedures on concrete

I. Tests on Cement

1. Normal Consistency and fineness of cement.
2. Initial setting time and final setting time of cement.
3. Specific gravity of cement
4. Soundness of cement.
5. Compressive strength of cement.

II. Tests on Aggregate

1. Sieve Analysis and gradation chairs
2. Bulking of sand.
3. Bulk and compact densities of fine and coarse aggregates

III. Tests on Fresh Concrete

1. Slump test
2. Compact factor test
3. Vee-bee Test
4. Flow Table Test

Tests on Self Compacting Concrete

1. Slump cone
2. V funnel
3. L Box

IV. Tests on hardened concrete

1. Compression test on cubes & Cylinders
2. Flexure test
3. Splitting Tensile Test
4. Modulus of Elasticity

V. Non Destructive tests of concrete

1. Rebound hammer
2. Ultrasound pulse Velocity (UPV)

Text Books:

3. IS 383:1970- Specification for coarse & fine aggregate
4. IS 2386 (Part III) 1963- Methods of test for aggregate for specific gravity, density, voids, absorption & bulking
5. IS 516:1959- Specification for compressive strength, Flexural strength
6. IS 5816:1999-Method of test for splitting tensile strength of concrete.
7. IS 13311(Part 1):1992 Methods of non-destructive testing of concrete: Part 1 Ultrasonic pulse velocity.
8. IS 13311(Part 2):1992 Methods of non-destructive testing of concrete: Part 2 Rebound hammer.
9. IS 6461(Part 7):1973 Glossary of terms relating to cement concrete: Part 7 Mixing, laying, compaction, curing and other construction aspects.

IV SEMESTER – SYLLABUS

Year/Sem	IV Sem	L	T	P	C	COURSE CODE
Regulation	V20	3	0	0	3	V20CET05
Name of the Course	**ENGINEERING GEOLOGY**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Relate the features of geological agents (K3)
- Employ different techniques to identify different types of minerals and rocks (K3)
- Interpret hazard zonaation with reference to secondary structures (K3)
- Review earthquakes and landslides and their resulting subsidence (K3)
- Examine the engineering geological conditions of the strata and its suitability to major projects like Dams, Tunnels and Reservoirs etc. (K3)

SYLLABUS

UNIT I

Introduction: Branches of geology, Importance of geology in Civil engineering with case studies. Physical Geology: Geological processes, Weathering, Erosion and Civil engineering importance of weathering and Erosion

UNIT II

Mineralogy: Definition of mineral, Importance of study of minerals, Significance of different physical properties in mineral identification, Study of physical properties, Structure and chemical composition of common rock forming and economic minerals viz. Feldspar, Quartz, Olivine, Augite, Hornblende, Muscovite, Biotite, Asbestos, Apatite , Kyanite, Garnet, Beryl, Talc, Calcite, Dolomite, Pyrite, Hematite, Magnetite, Galena, Graphite, Magnesite, Bauxite and Clay minerals Petrology: Introduction, Civil Engineering importance of petrology, Definition of Rock, Rock cycle, Geological Classification of rocks Igneous Rocks: Forms, Structures and textures of igneous rocks, Megascopic description and civil engineering uses of Granite, Basalt, Dolerite, Pegmatite and Charnockite Sedimentary Rocks: Formation, Structures and textures of sedimentary rocks, Megascopic description and civil engineering uses of Laterite, Conglomerate, Sand stone, Lime stone and Shale Metamorphic Rocks: Types of metamorphism, Structures and textures of metamorphic rocks, Megascopic Description and Civil engineering uses of Gneiss, Schist, Quartzite, Marble and Slate

UNIT III

Structural Geology: Introduction, Out crop, Strike and dip, Causes for development of secondary structures, Classification of Structures associated with Folds, Faults, Joints, Unconformities and their Civil engineering importance

UNIT IV

Earthquakes: Classification and causes, Intensity and magnitude and their measuring scales, Effects of earthquakes, Seismic belts, Civil Engineering considerations in seismic areas, Seismic zones of India Land Slides: Classification, Causes and effects, Preventive measures of landslides Ground water: Introduction, Classification of rocks based on porosity and permeability, Types of aquifers, Effects of groundwater over draft

Geophysics: Importance of Geophysical methods, Classification, Principles of Geophysical study by Gravity method, Magnetic method, Electrical methods, Seismic methods, Radiometric method and Electrical resistivity, Seismic refraction methods

UNIT V

Dams & Reservoirs: Types of Dams, Geological considerations for the selection of dam sites, Stages of investigation, Case histories of few dam failures, Geology of few Indian dam sites

Tunnels: Purpose of Tunneling, Geological considerations for tunneling, Effects of tunneling, Over break, Geology of some tunnel sites

Textbooks:

1. A text Book of Engineering Geology by N. Chenna Kesavulu, Macmillan India Ltd., Delhi, second edition, 2009.
2. Principles of Engineering Geology by K M Bangar, Standard Publishers and Distributers, 2009.
3. Principles of Engineering Geology- K Gokhale, B. S. Publication, Revised Edition, 2010.

Reference Books:

1. Fundamentals of Engineering Geology, F.G.Bell, published by Butterworth-Heinemann, 1983.
2. Principles of Engineering Geology and Geotechnics by D P Krynine and W R Judd, CBS Publishers & Distribution, first edition, 2005.
3. Engineering Geology for Civil Engineers by D. Venkata Reddy, Oxford & IBM Publishing Company Pvt. Ltd., New Delhi, second edition, 2017.
4. Engineering and General Geology by Parbin Singh, Published by S. K. Kataria & Sons, New Delhi, 2013.
5. Engineering Geology and Rock Mechanics by Dr B.P.Varma, Khanna Publishers, Delhi, 1998.

Year/Sem	**IV Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	0	0	3	V20CET06
Name of the Course	**STRUCTURAL ANALYSIS-I**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon completion of the course, the student will be able to

- Illustrate Shear Force, Bending Moment and Deflection of Propped Cantilevers for different fixity conditions (K3)
- Calculate Shear Force, Bending Moment and Deflections of fixed beams for different fixity conditions (K3)
- Calculate Shear Force, Bending Moment and Deflections of Continuous beams fordifferent fixity conditions (K3)
- Understand the concepts of Energy Theorems (K2)
- Assess Maximum Shear Force, Bending Moment and Deflections at a given section when loads of varying spans are passing over truss (K3)

SYLLABUS

UNIT I

Propped Cantilevers: Analysis of propped cantilevers-shear force and bending moment diagrams-Deflection of propped cantilevers..

UNIT II

Fixed Beams: Introduction to statically indeterminate beams with U. D. load, central point load, eccentric point load, number of point loads, uniformly varying load, couple and combination of loads - shear force and Bending moment diagrams-Deflection of fixed beams including effect of sinking of support, effect of rotation of a support.

UNIT III

Continuous Beams: Introduction-Clapeyron's theorem of three moments-Analysis of continuous beams with constant moment of inertia with one or both ends fixed continuous beams with overhang, continuous beams with different moment of inertia for different spans Effects of sinking of supports-shear force and bending moment diagrams.

UNIT IV

Energy Theorems: Introduction-Strain energy in linear elastic system, expression of strain energy due to axial load, bending moment and shear forces - Castigliano's first theorem Deflections of simple beams and pin jointed trusses.

UNIT V

Moving Loads And Influence Lines: Introduction, influence line diagrams, influence line diagrams for simply supported beams, cantilever beams, overhanging beams, double overhanging beams, balanced cantilever beams, girder supporting floor beams, use of influence line diagrams, maximum SF and BM values for moving loads, Train of concentrated loads

Text Books:

1. Basic Structural Analysis, C. S. Reddy Tata Mc.Graw-Hill, New Delhi.
2. Analysis of Structures by T.S. Thandavamoorthy, Oxford University Press, New Delhi.
3. Analysis of Structures- Vol. I and II, V. N. Vazirani and M. M. Ratwani, Khanna Publishers, New Delhi.
4. Structural Analysis - Vol. I and II,S.S.Bhavikatti,Vikas Publishing House,New Delhi.

References:

1. Theory of Structures, B. C Punmia, A. K Jain & Arun K. Jain, Lakshmi Publications.
2. Theory of Structures, R.S. Khurmi, S. Chand Publishers.
3. Structural analysis by R.C. Hibbeler, Pearson, New Delhi.
4. Structural Analysis-I, Hemanth Patel, Yogesh Patel, Synergy Knowledgeware, Mumbai 5. Structural Analysis I Analysis of Statically Determinate Structures, P. N. Chandramouli. Yesdee Publishing Pvt Limited, Chennai

Year/Sem	**IV Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	0	0	3	V20CET07
Name of the Course	**WATER RESOURCES ENGINEERING**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Calculate average rainfall and check consistency, continuity of rainfall (K3)
- Estimate the different components of the hydrologic cycle (K2)
- Compute the runoff of a catchment using Hydrographs (K3)
- Compute the flood frequency, design flood, flood routing (K3)
- Discuss the concepts of groundwater movement and well hydraulics (K2)

SYLLABUS

UNIT I

Introduction: Engineering hydrology and its applications, Hydrologic cycle, hydrological

Data - sources of data. Precipitation: Types and forms, measurement, rain gauge network, presentation of rainfall data, average rainfall, continuity and consistency of rainfall data, frequency of rainfall, Intensity-Duration-Frequency (IDF) curves, Depth-Area-Duration (DAD) curves, Probable Maximum Precipitation (PMP), design storm.

UNIT II

Abstractions from Precipitation: Initial abstractions. Evaporation: factors affecting, measurement, reduction Evapotranspiration: factors affecting, measurement, control Infiltration: factors affecting, Infiltration capacity curve, measurement, infiltration indices.

UNIT III

Runoff: Catchment characteristics, Factors affecting runoff, components, computation empirical formulae, tables and curves, stream gauging, rating curve, flow mass curve and flow duration curve. Hydrograph analysis:

Components of hydrograph, separation of base flow, effective rainfall hyetograph and direct runoff hydrograph, unit hydrograph, assumptions, derivation of unit hydrograph, unit hydrographs of different durations, principle of superposition and S-hydrograph methods, limitations and applications of unit hydrograph, synthetic unit hydrograph.

UNIT IV

Floods: Causes and effects, frequency analysis- Gumbel's and Log-Pearson type III distribution methods, Standard Project Flood (SPF) and Probable Maximum Flood (MPF), flood control methods and management. Flood Routing: Hydrologic routing, channel and reservoir routing- Muskingum and Puls methods of routing.

UNIT V

Groundwater: Occurrence, types of aquifers, aquifer parameters, porosity, specific yield,permeability, transmissivity and storage coefficient, types of wells, Darcy's law, Dupuit'sequation- steady radial flow to wells in confined and unconfined aquifers, yield of a openwell-recuperation test.

Textbooks:

5. "Engineering Hydrology", Ojha C.S., Berndtsson P.R and Bhunya. P., Oxford University Press,

Year/Sem	**IV Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	3	0	0	3	V20CET08
Name of the Course	TRANSPORTATION ENGINEERING					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Design highway geometric elements for the decided alignment through engineering surveys (K3)
- Analyze and design of flexible, rigid pavements and examine pavement construction activities and also conduct quality control at site (K3)
- Analyze and design of traffic infrastructure facilities and evaluate pavement condition to suggest remedial measures (K3)
- Analyze the Railway Track Geometric Elements (K3)
- Analyze and design geometric elements of Airport Runway and Taxiway and classify the various components of Dock & Harbors (K3)

SYLLABUS

UNIT I

Highway Alignment and Geometric Design: Historical development of roads–Highway development in India –Different Road Development Plan–Highway Alignment–Factors affecting Alignment– Engineering Surveys. Highway Geometric Design: Importance of Geometric Design– Factors–Highway Cross Section Elements–Sight Distance Elements–Design of Horizontal Alignment–Design of Vertical alignment.

UNIT II

Design of Pavements and Highway Construction: Types of pavement–Components of pavement–Flexible Pavements – Design factors – Flexible Pavement Design Methods– Mechanistic method, Rigid Pavements– Design Considerations– wheel load stresses– Temperature stresses–Design of slabs–IRC method of rigid pavements–Highway Construction–Types of Highway Construction – Earthwork – Stabilization of soils–Construction of Bituminous Pavements –Construction of Cement Concrete Pavements

UNIT III

Highway Maintenance and Traffic Infrastructure Design: Pavement Failures – Pavement Condition Survey–Maintenance of Highways– Pavement evaluation– Strengthening of existing pavements– Traffic Engineering – Basic Parameters of Traffic– Volume,– Speed– Density- Volume Studies Speed Studies– spot speed– speed & delay studies, Parking Studies, Condition Diagram and Collision Diagrams-–PCU Factors –Capacity and LOS of Highways – Road Traffic Signs –Road markings – Types of Intersections– At-Grade Intersections–Design of Traffic Signals– Webster Method .

UNIT IV

Railway Engineering : Permanent way – Components and their functions – Rail joints – Welding of Rails – Creep of Rails – Rail fixtures & Fastenings – Geometric Design of Railway Track:Gradients- Grade Compensation- Cant and Negative Super elevation- Cant Deficiency –Degree of Curve , Layout of Railway stations and yards – Signals – Interlocking –Track layouts –Turnouts – Layout of Turnout – Crossings –Diamond crossing – Scissors crossing. Signal Objectives – Classification – Fixed signals – Stop signals – Signalingsystems

UNIT V

Airport Planning and Docks Harbors: Airport Master plan – Airport site selection – Air craft characteristics –Airport classification – Runway orientation – Wind rose diagram – Runway length – Taxiway – Terminal area. Docks Harbors: Layout of Port components – Functions –Classification of Ports – Site selection – Natural Phenomenon – Tides, Winds, Waves, Currents – Drift – Navigational aids.

Textbooks

IRC CODES

- IRC 37–2018: Guidelines for the Design of Flexible Pavements, Indian Road Congress Publications, New Delhi.
- IRC58–2015: Guidelines for the Design of Plain Jointed Rigid Pavements for Highways, Indian Road Congress Publications, New Delhi.

- MORTH - Specifications for Road and Bridge works, Indian Road Congress Publication, New Delhi, Latest Edition.

Year/Sem	**IV Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	0	0	3	1.5	V20CEL04
Name of the Course	**ENGINEERING GEOLOGY LAB**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon completion of the course, the student will be able to

- Understand the importance of geology in civil engineering
- Identify the geological process of any region to carry civil engineering works
- Evaluate the formation and properties of minerals, rocks and soil
- Develop the ability to prepare geological maps and sections to interpret site conditions

List of Experiments

1. Physical properties of minerals and their megascopic identification
2. Rock forming minerals: Quartz group, Feldspar group, Garnet group, Mica group, Talc, Chlorite, Olivine, Kyanite, Asbestos, Tourmelene, Calcite, Gypsum etc.
3. Ore forming minerals: Magnetite, Hematite, Pyrite, Pyralusite, Graphite, Chromite etc.
4. Megascopic description and identification of rocks
5. Igneous rocks: Granite, Pegmatite, Gabbro, Dolerite, Syenite, Granite Poryphery, Basalt, etc.
6. Sedimentary rocks: Sand stone, Ferrugineous sand stone, Lime stone, Shale, Laterite, Conglamorate, etc.
7. Metamorphic rocks: Biotite, Granite Gneiss, Slate, Muscovite & Biotiteschist, Marble, Khondalite, etc.
8. Interpretation and drawing of sections for geological maps showing tilted beds, faults, unconformities etc.
9. Simple Structural Geology problems
10. Bore hole data
11. Strength of the rock using laboratory tests
12. Field work to identify Minerals and Rocks, Geomorphology and Structural Geology

Year/Sem	**IV Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V20	0	0	3	1.5	V20CEL05
Name of the Course	**FLUID MECHANICS & HYDRAULIC MACHINERY LAB**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon completion of the course, the student will be able to

- Employ the basic principles of Fluid mechanics to assess discharge with different devices and different losses in a pipe line (K3)
- Calculate the performance parameters of Reciprocating and Centrifugal pumps (K3)
- Calculate the performance parameters of different types of turbines (K3)

List of Experiments

1. Determination of friction factor for the given pipe line.
2. Determination of loss of head due to sudden contraction.
3. Determination of force exerted by a jet on a vane.
4. Calibration of Venturimeter.
5. Calibration of Orificemeter.
6. Calibration of Turbine flow meter.
7. Determination of performance parameters of Reciprocating pump.
8. Determination of performance parameters of Single stage Centrifugal pump.
9. Determination of performance parameters of Multi stage Centrifugal pump.
10. Determination of performance parameters of Pelton wheel.
11. Determination of performance parameters of Francis Turbine.
12. Determination of performance parameters of Kaplan Turbine.

Add On Experiments:

1. Determination of loss of head due to sudden expansion.
2. Verification of Bernoulli's theorem.

Regulation	V20	0	0	3	1.5	V20CEL06
Name of the Course	TRANSPORTATION ENGINEERING LAB					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the student will be able to

- Assess the suitability of different materials for the road construction (K3)
- Examine the given bitumen samples and judge their suitability for road construction (K3)
- Find the Optimum Bitumen content for the Bituminous mix (K3)
- Develop the gradation of Bituminous mix for stability and flow properties (K3)

List of Experiments

I. Road Aggregates:

1. Aggregate Crushing value
2. Aggregate Impact Test.
3. Specific Gravity and Water Absorption.
4. Abrasion Test.
5. Shape tests

II. Bituminous Materials:

6. Penetration Test.
7. Ductility Test.
8. Softening Point Test.
9. Flash and fire point tests.
10. Viscosity Test.

III. Bituminous Mix:

11. Marshall Stability test.

List of Equipment

1. Apparatus for aggregate crushing test.
2. Aggregate Impact testing machine

3. Pycnometers.
4. Los angles Abrasion test machine
5. Length and elongation gauges
6. Bitumen penetration test setup.
7. Bitumen Ductility test setup.
8. Ring and ball apparatus
9. Flash and Fire Apparatus
10. Viscometer.
11. Marshal Stability apparatus.

ANNEXURE – VII
SYLLABI PROPOSED FOR M.Tech (Structural Engineering)

I SEMESTER – SYLLABUS

Year/Sem	I Sem	L	T	P	C	COURSE CODE
Regulation / Year	V21 / 2021-2022	3	0	0	3	V21STET01
Name of the Course	THEORY OF ELASTICITY					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Relate the stress and deformation and how to determine the components of the stress and strain tensors (K3)
- Apply the conditions of compatibility and equations of equilibrium (K3)
- Employ the mechanical characteristics of materials, constitutive equations and generalized Hook law (K3)
- Use the equilibrium equations stated by the displacements and compatibility conditions stated by stresses (K3)
- Develop index notation of equations, tensor and matrix notation and define state of plane stress, state of plane strain (K3)

SYLLABUS

UNIT I

Elasticity – Notation for forces and stresses – components of stresses and strains – Hooke's Law - Plane Stress – Plane strain – Differential Equations of equilibrium – Boundary conditions – Compatibility equations Stress function – Boundary Conditions.

UNIT II

Two dimensional problems in rectangular co-ordinates – Solution by polynomials – Saint Venant's principle – Determination of displacements –

Bending of simple beams – Application of Fourier series for two dimensional problems for gravity loading.

UNIT III

Two dimensional problems in polar coordinates - General equations in polar coordinates – Stress distribution for problems having symmetrical about an axis - Strain components in polar co-ordinates– Displacements for symmetrical stress distributions - Stresses for plates with circular holes subjected to far field tension – stress concentration factor.

UNIT IV

Analysis of stress and strain in three dimension - Principal stresses – Stress ellipsoid and stress director surface – Determination of principal stresses - Maximum shear stress – Homogeneous Deformation – General Theorems - Differential equations of equilibrium – Conditions of compatibility– Equations of equilibrium in terms of displacements – Principle of superposition – Uniqueness of solution –Reciprocal theorem.

UNIT V

Torsion of Prismatic bars – Bars with elliptical cross section – Other elementary solution – Membrane analogy – Torsion of rectangular bars – Solution of Torsional problems by energy method.

Text Books:

1. 1.Theory of Elasticity- Stephen Timoshenko & J. N. Goodier, Mc.Grawhill Publishers
2. Advanced Mechanics of Solids L.S. Srinath, McGraw Hill Publishers
3. Theory of Elasticity By A.I. Lurie

References:

1. Elasticity: Theory, Applications and Numeric Martin H. Sadd, Wiley Publishers
2. Theory of Elasticity -Sadhu Singh 3rd Edition, Khanna Publishers.
3. An Introduction to the Theory of Elasticity
4. By R. J. Atkin, N. Fox · 2005, Dover Publications

Year/Sem	I Sem	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21STET02
Name of the Course	STRUCTURAL DYNAMICS					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Asses the behavior of structures subjected to dynamic loads Harmonic excitation and earthquake load(K3)
- Demonstrate thebehavior andresponseofSDOFstructureswithvariousdynamic loading. (K3)
- Illustratetheresponseofstructuralsystemstodynamicloads and Realizethebehavior andresponseoflinear andnonlinearSDOFandMDOF structures with various dynamic loading. (K3)
- Develop the ability to find out suitable solution for continuous system of various beams with different end conditions. (K3)
- Interpret the analysis of building subject to earthquake by various methods. (K3)

SYLLABUS

UNIT I

Theory of vibrations: Introduction - Elements of vibratory system - Degrees of Freedom - Continuous System - Lumped mass idealization - Oscillatory motion - Simple Harmonic motion - Victorian representation of S.H.M. - Free vibrations of single degree of freedom system - undamped and damped vibrations - critical damping - Logarithmic decrement - Forced vibration of SDOF systems - Harmonic excitation - Vibration Isolation -Dynamic magnification factor – Phase angle.

UNIT II

Introduction to Structural Dynamics: Fundamental objectives of dynamic analysis -Types of prescribed loading - Methods of discretization - Formulation of equations of motion by different methods – Direct equilibration using Newton’s law of motion / D’Alembert’s Principle, Principle of virtual work and Hamilton principle.

Single Degree of Freedom Systems : Formulation and solution of the equation of motion – Free vibration response - Response to Harmonic, Periodic, Impulsive and general dynamic loadings - Duhamel integral.

UNIT III

Multi Degree of Freedom Systems: Selection of the degrees of Freedom - Evaluation of structural property matrices - Formulation of the MDOF equations of motion -Undamped free vibrations - Solutions of Eigen value problem for natural frequencies and mode shapes - Analysis of Dynamic response – Normal co-ordinates - Uncoupled equations of motion - Orthogonal properties of normal modes - Mode superposition procedure.

UNIT IV

Practical Vibration Analysis: Introduction - Stodola method - Fundamental mode analysis - Analysis of second and higher modes - Holzer method - Basic procedure.

Continuous Systems: Introduction - Flexural vibrations of beams - Elementary case – Derivation of governing differential equation of motion - Analysis of undamped free vibrations of beams in flexure - Natural frequencies and mode-shapes of simple beams with different end conditions - Principles of application to continuous beams.

UNIT V

Introduction to Earthquake Analysis: Deterministic Earthquake Response: Systems on Rigid Foundations -Types of Earthquake Excitations – Lumped SDOF Elastic Systems, Translational Excitations -Generalized coordinate - SDOF Elastic Systems, Translational Excitations, Linear Static Method – Analysis for obtaining response of multi storied RC Building.

Text Books:

1. Structural Dynamics Anil K Chopra, 4edition, Prentice Hall Publishers
2. Structural Dynamics Theory & Computation – Mario Paz, CBS Publishes and Distributors
3. Elementary Structural Dynamics- V.K. Manika Selvam, Dhanpat Rai Publishers

References:

1. Dynamics of Structures by Clough & Penzien 3e, Computers & Structures Inc.
2. Theory of Vibration -William T Thomson, Springer Science.
3. Mechanical Vibrations- S. S. Rao, 5e, Pearson Publications.
4. Structural Dynamics of Earthquake Engineering - Theory and Application using Mathematica and Matlab- S. Rajasekharan.

Year/Sem	I Sem	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21STET03
Name of the Course	MATRIX ANALYSIS OF STRUCTURES					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Assess the structural analysis of determinate and indeterminate structures using classical compatibility methods, such as method of consistent displacements, force and equilibrium Methods (K3)
- Solve multiple degree of freedom two- and three-dimensional problems involving trusses, beams, frames and plane stress (K3)
- Asses the analysis of grid element by stiffness method (K3)
- Discuss the band width, loads at joints and their support displacement (K2)
- Complete analysis of plane frames with and without side sway by various approaches. (K3)

SYLLABUS

UNIT I

Introduction of matrix methods of analysis – Static and kinematic indeterminacy – Degree of freedom– Structure idealization-stiffness and flexibility methods – Suitability: Element stiffness matrix for truss element, beam element and Torsional element- Element force -displacement equations.

UNIT II

Stiffness method – Element and global stiffness equation – coordinate transformation and global assembly – structure stiffness matrix equation – analysis of simple pin jointed trusses – continuous beams – rigid jointed plane frames

UNIT III

Stiffness method for Grid elements – development of stiffness matrix – coordinate transformation. Examples of grid problems – tapered and curved beams

UNIT IV

Additional topics in stiffness methods – discussion of band width – semi band width – static condensation – sub structuring –Loads between joints- Support displacements- inertial and thermal stresses-Beams on elastic foundation by stiffness method.

UNIT V

Analysis of plane frame - continuous beams with and without settlement - plane frame including side sway single storey, single – bay and gable frame by flexibility method using system approach.

Text Books:

1. Matrix analysis of structures, Robert E Sennet- Prentice Hall- Englewood cliffs,New Jercy.
2. Advanced structural analysis, P. Dayaratnam, Tata McGraw hill publishing company limited.
3. Structural Analysis Matrix Approach - Pandit and Gupta, Mc Graw Hill Education

References:

4. MatrixAnalysisofFramedStructures-WilliamWeaver,Jr.JamesM.Gere, VanNostrand Reinhold,Newyork.
5. MatrixMethodsofStructuralAnalysis MadhuB.Kanchi,WileyPublications.
6. IndeterminateStructuralAnalysis byK. U.Muthu, IKInternationalPublishinghouse.

Year/Sem	**I Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21MAT01
Name of the Course	**ANALYTICAL& NUMERICAL METHODS FORSTRUCTURAL ENGINEERING**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Calculate of Laplace transform methods on heat conduction problems (K3)
- Apply the principles and techniques of Elliptic Equations-Laplace equation (K3)
- Develop the principles and techniques of Integral Equations (K3)
- Adopt the principles and techniques of Finite Difference and their Applications (K3)
- Apply the principles and techniques of Numerical Integration (K3)

SYLLABUS

UNIT I

Transform Methods- Laplace transform methods for one-dimensional wave equation - Displacements in a long string - Longitudinal vibration of an elastic bar - Fourier transforms methods for one-dimensional heat conduction problems in infinite and semi-infinite rod

UNIT II

Elliptic Equations-Laplace equation - Properties of harmonic functions - Fourier transform methods for Laplace equation-Calculus Of Variations-Variation and its properties - Euler's equation - Functionals dependent on first and higher order derivatives - Functionals dependent on functions of several independent variables - Some applications - Direct methods - Ritz and Kantorovich methods

UNIT III

Integral Equations- Fredholm and Volterra integral equations - Relation between differential and integral equations - Green's function -Fredholm equation with separable kernel - Iterative method for solving equations of second kind

UNIT IV

Finite Difference and their Applications: Introduction- Differentiation formulas by Interpolating parabolas – Backward and forward and central differences- Derivation of Differentiation formulas using Taylor series- Boundary conditions- Beam deflection – Solution of characteristic value problems - Richardson's extrapolation - Use of unevenly spaced pivotal points- Integration formulae by interpolating parabolas- Numerical solution to spatial differential equations – Application to Simply Supported Beams, Columns & rectangular Plates.

UNIT V

Numerical Differentiation: Difference methods based on undetermined coefficients- optimum choice of step length– Partial differentiation.

Numerical Integration: Method based on interpolation-method based on undetermined coefficient – Gauss – Lagrange interpolation method- Radaua integration method- composite integration method – Double integration using Trapezoidal and Simpson's method – New Marks Method and Application to Beams – Calculations of Slopes & Deflections.

Textbooks:

1. Introduction to Partial Differential Equations, Sankar Rao. K, PHI, New Delhi, 1995
2. Numerical Methods For Scientific and Engineering Computations. M. K. Jain- S. R. K. Iyengar – R. K. Jain, New Age International (p) Ltd., Publishers.
3. Numerical Methods for Engineering Problems N. Krishna Raju, K.U. Muthu Macmillan Publishers

References:

1. Differential Equations and Calculus of Variations Elsgolts. L, Mir Publishers, Moscow, 1966
2. Fundamentals of Mathematical Statistics Gupta. S.C, & Kapoor. V.K, Sultan Chand & Sons, Reprint 1999.
3. Higher Engineering Maths for Engg. And Sciences Venkataraman. M. K, National Publishing Company, Chennai
4. Elements of Partial Differential Equations, Sneddon. I.N, Mc Graw Hill, 1986
5. Computer based numerical analysis by Dr. M. Shanta Kumar, Khanna Book publishers New Delhi

Year/Sem	**I Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21STET04
Name of the Course	**DESIGN OF RCC FOUNDATIONS (Elective-I)**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Attain the perception of site investigation to select suitable type of foundation based on soil category (K3)
- Capable of ensuring design concepts of shallow foundation (K3)
- Can be efficient in selecting suitable type of pile for different soil stratum and in evaluation of group capacity by formulation (K3)
- Design different types of well foundation (K3)
- Explain the properties of soil and mechanism of suitable foundation (K3)

SYLLABUS

UNIT I

Foundation Structures & Design of Centrally Loaded Isolated Footings and Column Pedestals – Introduction, Rigid and Flexible Foundations, Loads and their Effects, Design Requirements, Geotechnical Design, Empirical and Exact Methods of Analysis of foundations, Design Loads for Foundations, Recommended Approach to Structural Design of Foundations**.**

Introduction, General Procedure for Design, Design of Square Footing of Uniform Depth (Pad Footing), Design of sloped Rectangular Footings, Design Procedure, Detailing of Steel, Design of Rectangular Pad Footings, Design of Plain Concrete Footings, Design of Pedestals, Design Calculation for Pedestals.

UNIT II

Wall Footings – Introduction Simple Plain Concrete Wall Footings, Reinforced Concrete Continuous Strip Wall Footings, Design of continuous Strip Wall Footings, Design for Longitudinal Steel, R.C. T Beam Footings in Shrinkable Soils, Foundations of Partition Wall in Ground Floors, Summary.

Strip Footings Under Several Columns – Introduction, Design Procedure for Equally loaded and Equally Spaced Columns, Analysis of Continuous Strip

Footing for Unsymmetrical Loading, Analysis of Strip Footing with Unsymmetrical Loads, Detailing of Members.

UNIT III

Raft Foundations – Introduction, Rigid and Flexible Foundations, common Types of Rafts, Deflection Requirements of Beams and Slabs in Rafts, General considerations in Design of Rigid Rafts, Types of Loadings and Choice of Rafts, Record of Contact Pressures Measured Under Rafts, Modern Theoretical Analysis.

Design of Flat Slab Rafts-Mat Foundations – Introduction, Components of Flat Slabs, Preliminary Planning of Flat Slab Rafts, Analysis of Flat Slab by Direct Design Method, Method of Analysis, Values for Longitudinal Distribution and Transverse, Redistribution, Shear in Flat Slabs, Bending of Columns in flat Slabs, Limitations of Direct Design Method for Mats, Detailing of Steel, Design of Edge Beam in Flat Slabs.

Beam and Slab Rafts – Introduction, Planning of the Raft, Action of the Raft, Approximate Dimensioning of the Raft, Design of the Beam and Slab Raft under Uniform Pressure, Structural Analysis for the Main Slab, Design of Secondary and Main Beams, Analysis by Winkler Model, Detailing of Steel.

UNIT IV

Combined Piled Raft Foundations (CPRF) – Introduction, Types and uses of Piled Rafts, , Interaction of Pile and Raft, Ultimate Capacity and Settlement of Piles, Estimation of Settlement of Raft in Soils, Allowable Maximum and Differential Settlement in Buildings, Design of CPRF System, conceptual Method of Design, Conceptual Method of Analysis, Distribution of Piles in the Rafts, Theoretical Methods of Analysis.

Circular and Annular Rafts – Introduction, Positioning of chimney Load on Annular Raft, Forces Acting on Annular Rafts, Pressures Under Dead Load and Moment, Methods of Analysis, Conventional Analysis of Annular Rafts, Analysis of Ring Beams Under circular Layout of Columns, Analysis of Ring Beam Transmitting Column Load to Annular Rafts, Detailing of Annular Raft Under Columns of a Circular Water Tank.

UNIT V

Under-reamed Pile Foundations – Introduction, Safe Loads on Under-reamed Piles, Design of Under-reamed Pile Foundation for Load Bearing Walls of Buildings, Design of Grade Beams, Design of Under-reamed Piles Under Columns of Buildings, Use of Under-reamed Piles for Expansive Soils.

Design of cantilever and Basement Retaining Walls – Introduction, Earth Pressure and Rigid Walls, Calculation of Earth Pressure on Retaining Walls, Design of Rigid Walls, Design of Ordinary R.C. cantilever Walls, Design of cantilever Walls without Toe, Design of Basement Walls, Calculation of Earth Pressures in Clays, Design of Free Standing Basement Walls.

Text Books:

1. Design of Reinforced Concrete Foundations by P. C Varghese, PHI Learning Private Limited., New Delhi.
2. Krishnaraju.N " Design of Reinforced Concrete Structurres", CBS Publishers & Distributors Pvt. Ltd., New Delhi.
3. Design of Reinforced Concrete Structures by N. Subramaniam- Oxford University.

References:

1. Reinforced Concrete Design by Unnikrishna Pillai and Devdas Menon, Tata Mc Graw Hill.
2. Ramachandra, "Limit state Design of Concrete Structures" Standard Book House, New Delhi.
3. IS 456 (2000): Plain and Reinforced Concrete - Code of Practice.

Year/Sem	**I Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21STET05
Name of the Course	**BRIDGE ENGINEERING**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Illustrate the different types of loads and stresses acting on various bridges (K3)
- Asses the various methodologies to analyses the bridges and also interpret the specifications of bridge super structure (K3)
- Demonstrate the box culverts and its design (K3)
- Develop the knowledge on design of plate girder bridges (K3)
- Illustrate the different types of bearings, abutments, piers and various types of foundations for Bridges (K3)

SYLLABUS

UNIT I

Concrete Bridges: Introduction-Types of Bridges-Economic span length-Types of loading-Dead load-live load-Impact Effect-Centrifugal force-wind loads-Lateral loads-Longitudinal forces- Seismic loads- Frictional resistance of expansion bearings-Secondary Stresses-Temperature Effect-Erection Forces and effects-Width of roadway and footway-General Design Requirements.

UNIT II

Design of Girders & Slabs: Pigeaud's MethodDesign of longitudinal girders-Guyon-Messonet method- Hendry Jaegar method- Courbon's theory. (Ref: IRC-21), voided slabs.

Super Structure: Slab bridge- Wheel load on slab- effective width method-slabs supported ontwo edges- cantilever slabs- dispersion length- Design of interior panel of slab- T-Beam bridges.

UNIT III

Box Culverts: Single Cell Box Culvert – Design Loads, Design Moments, Shears and Thrusts. Design of Critical sections.

UNIT IV

Plate Girder Bridges: Elements of plate girder and their design-web-flange-intermediate stiffener- vertical stiffeners- bearing stiffener-design problem

UNIT V

Sub structure: Abutments- Stability analysis of abutments- piers- loads on piers – Analysis of piers- Design problem(Ref: IRC-13, IRC-21, IRC-78)- Pipe culvert- Flow pattern in pipe culvers- culvert alignment-culvert entrance structure- Hydraulic design and structural design of pipe culverts-reinforcements in pipes .(Ref: IRC: SP-13)

Text Books:

1. 1.Design of Bridges by N. Krishna Raju CBS Publishers and Distributors
2. Bridge Engineering by S. Ponnuswamy, Mc Grawhill Publications
3. 3.Essentials of Bridge Engineering- Jhonson Victor D, 7e, Oxford IBH Publications

References:

1. Bridge Deck Behavior- E.C. Hambly 2e- CRC Press
2. Concrete Bridge Design and Practice- V.K. Raina, Tata McGraw- Hill Publishing Company Limited
3. IRC 6- 2016 Standard Specifications and Code of Practice for Road bridges
4. IRC 112-2011 Code of Practice for Concrete Road Bridges.

Year/Sem	I Sem	L	T	P	C	COURSE CODE
Regulation / Year	V21 / 2021-2022	3	0	0	3	V21STET06
Name of the Course	REPAIR AND REHABILITATION OF STRUCTURES					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Recognize the mechanisms of degradation of concrete structures and to design durable concrete structures. (K2)
- Describe and suggest repair strategies for deteriorated concrete structures including repairing with composites. (K2)
- Develop the methods of strengthening methods for concrete structures. (K3)
- Demonstrate the fiber reinforced concrete and its properties. (K3)
- Examine the structural member's strength by high performance concrete. (K3)

SYLLABUS

UNIT I

Materials for repair and rehabilitation: Admixtures- types of admixtures- purposes of using admixtures- chemical composition- Natural admixtures- Fibres- wraps- Glass and Carbon fibre wraps- Steel Plates-Non destructive evaluation: Importance- Concrete behavior under corrosion, disintegrated mechanisms- moisture effects and thermal effects – Visual investigation- Acoustical emission methods- Corrosion activity measurement- chloride content – Depth of carbonation- Impact echo methods- Ultrasound pulse velocity methods- Pull out tests.

UNIT II

Strengthening and stabilization: Techniques- design considerations-Beam shear capacity strengthening- Shear Transfer strengthening-stress reduction techniques- Column strengthening- flexural strengthening- Connection stabilization and strengthening, Crack stabilization.

UNIT III

Bonded installation techniques: Externally bonded FRP- Wet layup sheet, bolted plate, near surface mounted FRP, fundamental debonding mechanisms-intermediate crack debonding- CDC debonding- plate end debonding- strengthening of floor of structures

UNIT IV

Fibre reinforced concrete: Properties of constituent materials- Mix proportions, mixing and casting methods-Mechanical properties of fiber reinforced concrete- applications of fibre reinforced concretes-Lightweight concrete- properties of light weight concrete- No fines concrete- design of light weight concrete- Fly ash concrete-Introduction- classification of Fly ash-properties and reaction mechanism of fly ash- Properties of fly ash concrete in fresh state and hardened state- Durability of fly ash concretes

UNIT V

High performance concretes: Introduction- Development of high-performance concretes- Materials of high-performance concretes- Properties of high-performance concretes- Self Consolidating concrete- properties-qualifications.

Textbooks:

1. Maintenance Repair Rehabilitation & Minor works of Buildings- P.C. Varghese, PHI Publications
2. Repair and Rehabilitation of Concrete Structures – P.I. Modi, C.N. Patel, PHI Publications
3. Rehabilitation of Concrete Structures- B. Vidivelli, Standard Publishers Distributors
4. Concrete Bridge Practice Construction Maintenance & Rehabilitation- V.K. Raina, Shroff Publishers and Distributors.

References:

1. **Concrete Technology Theory and Practice- M.S. Shetty, S Chand and Company**
2. **Concrete Repair and Maintenance illustrated- Peter H Emmons**
3. **Concrete Chemical Theory and Applications- Santa Kumar A.R. Indian Society for Construction Engineering and Technology, Madras**
4. **Handbook on Repair and Rehabilitation of RC Buildings published by CPWD, Delhi**

Year/Sem	**I Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21STET07
Name of the Course	**STRUCTURAL OPTIMIZATION**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Study the optimization methodologies applied to structural engineering
- Solve some continuous structural optimization problems using calculus of variations.
- Have sufficient knowledge on various optimization techniques like, non-linear programming, geometric and dynamic
- Describe numerical algorithms and linear programming suitable for structural optimization problems.
- Use and describe quadratic and dynamic programming .

SYLLABUS

UNIT I
Introduction: Need and scope for optimization – statements of optimization problems Objective function and its surface design variables- constraints and constraint surface Classification of optimization problems (various functions continuous, discontinuous and discrete) and function behavior (monotonic and unimodal)

UNIT II
Classical optimization techniques: Differential calculus method, multi variable optimization by method of constrained variation and Lagrange multipliers (generalized problem) Khun-Tucker conditions of optimality -Fully stressed design and optimality criterion based algorithms introduction, characteristics of fully stressed design theoretical basis-examples

UNIT III
Non-Liner programming: Unconstrained minimization- Fibonacci, golden search, Quadratic and cubic interpolation methods for a one dimensional minimization and univariate method, Powel's method, Newton's method and Davidon Fletcher Powell's method for multivariable optimization- Constrained minimization- Cutting plane method- Zoutendjik's method- penalty function methods

UNIT IV
Linear programming: Definitions and theorems- Simplex method-Duality in Linear programming- Plastic analysis and Minimum weight design and rigid frame

UNIT V
Introduction to quadratic programming: Geometric programming- and dynamic programming Design of beams and frames using dynamic programming technique

Text books:

Year/Sem	I Sem	L	T	P	C	COURSE CODE
Regulation	V21	2	0	0	2	V21STET08
Name of the Course	ADVANCED CONCRETE TECHNOLOGY					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Explain the materials of concrete and its chemical proportions (K2)
- Describe the fresh and hardened properties of concrete (K2)
- Explain high strength and high-performance concrete manufacturing process and its properties (K2)
- Develop the special concrete and enhance the durability properties (K3)
- Describe the formwork considerations used in designs (K2)

SYLLABUS

UNIT I

Concrete Making Materials: Cement – Bogus Compounds – Hydration Process – Types of Cement – Aggregates – Gradation Charts – Combined Aggregate – Alkali Silica Reaction – Admixtures – Chemical and Mineral Admixtures - Bureau of Indian Standards (BIS) Provisions.

UNIT II

Fresh And Hardened Concrete: Fresh Concrete – workability tests on Concrete – Setting Times of Fresh Concrete – Segregation and bleeding.

Hardened Concrete: Abrams Law, Gel space ratios, Maturity concept – Stress strain Behaviour– Creep and Shrinkage – Durability Tests on Concrete – Non-Destructive Testing of Concrete. BIS Provisions.

UNIT III

High Strength Concrete – Microstructure – Manufacturing and Properties – Design of HSC Using Erintroy Shaklok method – Ultra High Strength Concrete.

High Performance Concrete – Requirements and Properties of High-Performance Concrete – Design Considerations. BIS Provisions.

UNIT IV

Special Concretes: Self Compacting concrete, Polymer Concrete, Fibre Reinforced Concrete – Reactive Powder Concrete – Requirements and Guidelines – Advantages and Applications.

Concrete Mix Design: Quality Control – Quality Assurance – Quality Audit - Mix Design Method – BIS Method – IS.10262 – 2019 Concrete Mix proportion guidelines. DOE Method– Light Weight Concrete, Self-Compacting Concrete.

UNIT V

Form work – materials – structural requests – form work systems – connections – specifications – design of form work – shores – removal for forms - shores – reshoring – failure of form work**.**

Text Books:

1. Properties of Concrete by A. M. Neville, ELBS publications Oct 1996.
2. Concrete Technology by A. R. Santhakumar, 2nd Edition, Oxford University Press.
3. Concrete Technology by M.S. Shetty, S.Chand & Co 2009.

Year/Sem	I Sem	L	T	P	C	COURSE CODE
Regulation	V21	0	0	4	2	V21SEL01
Name of the Course	ADVANCED CONCRETE TECHNOLOGY LABORATORY					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Develop relation between Water / Cement Ratios Vs Workability, Water / Cement Ratios Vs Strength in concrete.
- Develop strength and workability relation between fine aggregate, coarse aggregates.
- Calculate Strain measurement in concrete.
- Assess concrete properties by using Non destructive testing methods.
- Find properties of Self compaction concrete by using L Box , J Box , U box and Slump tests

SYLLABUS

List of Experiments:

1. Study on Water / Cement Ratios Vs Workability of different concretes
2. Study on Water / Cement Ratios Vs Strength of different concretes
3. Study of variation of Coarse Aggregate to Fine Aggregates on Workability
4. Study of variation of Coarse Aggregate to Fine Aggregates on Strength
5. Strain measurement - Electrical resistance strain gauges
6. Non destructive testing- Impact Hammer test, UPV test
7. Qualifications tests on Self compaction concrete- L Box , J Box , U box and Slump tests

NOTE: **A minimum of five experiments from the above set have to be conducted.**

Year/Sem	**I Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	0	0	4	2	V21SEL02
Name of the Course	**ADVANCED STRUCTURAL ENGINEERING LABORATORY**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Conduct various laboratory tests on Cement, Aggregates
- Know strain measurement
- Non destructive testing
- Chemical analysis on concrete and Aggregate and Sand

List of Experiments:

1. StudyonDeflectionand CracksonaUnder Reinforced OverReinforcedand BalancedSections
2. StudyonPerformanceofRCCBeamsdesignedfor BendingandfailinginShear
3. StudyonPerformanceofRCCBeamsdesignedforShearandfailinginBending
4. StudyonPerformanceofRCC Onewayslabs
5. StudyonPerformanceofRCCTwowayslabs withsimplysupportededge conditions
6. StudyonPerformance ofRCCTwo wayslabswithfixededge conditions
7. CalculationofYoung's ModulusofElasticityofConcrete
8. ExtractionandStudyofConcrete Coresamplesfrompavements

NOTE : **A minimum of five experiments from the above set have to be conducted as demonstration to entire class..**

II SEMESTER – SYLLABUS

Year/Sem	II Sem	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21STET09
Name of the Course	**FINITE ELEMENT METHODS IN STRUCTURAL ENGINEERING**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Compute principle of potential energy of an elastic body (K3)
- Calculate the stiffness matrices of truss element (K3)
- Calculate the stiffness matrices of beam elements (K3)
- Interpret displacements, strains and stress resultants (K3)
- Formulate the shape functions for element (K3)

SYLLABUS

UNIT I

Introduction: Review of stiffness method- Principle of Stationary potential energy- Potential energy of an elastic body- Rayleigh-Ritz method of functional approximation - variational approaches -weighted residual methods

UNIT II

Finite Element formulation of truss element: Stiffness matrix- properties of stiffness matrix – Selection of approximate displacement functions- solution of a plane truss- transformation matrix and stiffness matrix for a 3-D truss- Inclined and skewed supports-Galerkin's method for 1-D truss – Computation of stress in a truss element.

UNIT III

Finite element formulation of Beam elements: Beam stiffness- assemblage of beam stiffness matrix- Examples of beam analysis for concentrated and distributed loading-Galerkin's method - 2-D Arbitrarily oriented beam element – inclined and skewed supports –rigid plane frame examples.

UNIT IV

Finite element formulation: Plane stress, plane strain and axi-symmetric problems- Derivation of CST and LST stiffness matrix and equations- treatment of body and surface forces-Finite Element solution for plane stress and axi-symmetric problems- comparison of CST and LST elements – convergence of solution- interpretation of stresses.

UNIT V

Iso-parametric Formulation: Iso-parametric bar element- plane bilinear Iso-parametric element – quadratic plane element - shape functions, evaluation of stiffness matrix, consistent nodal load vector - Gauss quadrature- appropriate order of quadrature – element and mesh instabilities – spurious zero energy modes, stress computation- patch test.

Text Books:

1. A first course in the Finite Element Method – Daryl L. Logan, Thomson Publications.
2. Concepts and applications of Finite Element Analysis – Robert D. Cook, Michael E Plesha, John Wiley & Sons Publications
3. Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations, Bhatti, M.A. Wiley Publications
4. A first course in the Finite Element Method, Dary L. Logan, Thomson Publications.

References:

1. Introduction to Finite Elements in Engineering- Tirupati R. Chandrupatla, Ashok D.Belgunda, PHI publications.
2. Finite Element Methods (For Structural Engineers) Wail N Rifaie, Ashok K Govil, New Age International (P) Limited.
3. Introduction to Finite Element Method, Desai & Abel CBS Publication.
4. An Introduction to Finite Element Method- Reddy, J. N., McGraw-Hill Education.

Year/Sem	**II Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21STET10
Name of the Course	**STABILITY OF STRUCTURES**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Develop differential equation based on loading and end conditions of beam column (K3)
- Illustrate and work out the elastic buckling using various methodologies (K3)
- Illustrate and work out the in-elastic buckling using various methodologies (K3)
- Assess the torsional buckling behaviour of pure and non uniform torsion of thin walled bars (K3)
- Illustrate and work out the lateral buckling of various cross sections (K3)

SYLLABUS

UNIT I

Beam columns: Differential equation for beam columns – Beams column with concentrated loads – continuous lateral load – couples – Beam column with built in ends – continuous beams with axial load – application of Trigonometric series – Determination of allowable stresses

UNIT II

Elasticbuckling of bars: Elastic buckling of straight columns – Effect of shear stress on buckling – Eccentrically and laterally loaded columns –Sway & Non Sway mode - Energy methods – Buckling of a bar on elastic foundation – Buckling of bar with intermediate compressive forces and distributed axial loads – Buckling of bars with change in cross section – Effect of shear force on critical load – Built up columns – Effect of Initial curvature on bars – Buckling of frames – Sway & Non Sway mode

UNIT III

In-elastic buckling: Buckling of straight bars – Double modulus theory Tangent modulus theory. Experiments and design formulae: Experiments on columns – Critical stress diagram – Empirical formulae of design – various end conditions – Design of columns based on buckling. Mathematical

Treatment of stability problems: Buckling problem orthogonality relation – Ritz method –Stiffness method and formulation of Geometric stiffness matrix- Applications to simple frames

UNIT IV

Torsional Buckling: Pure torsion of thin walled bars of open cross section – Non uniform torsion of thin walled bars of open cross section - Torsional buckling – Buckling of Torsion and Flexure

UNIT V

Lateral Buckling of simply supported Beams: Beams of rectangular cross section subjected for pure bending, Buckling of I Section subjected to pure bending

Text Books:

1. Theory of Stability of Structures by Alexander ChaJes.
2. Theory of Elastic Stability by S. P. Timshenko & J.M. Gere-Mc Graw Hill Publications
3. Theory of Elastic Stability by Manikaselvam

References:

1. Fundamentals of Structural Stability by George J Smith & Dewey H. Hodges, Elsevier Publications
2. Elastic Stability of Structural Elements, N.G.R. Iyengar Macmillan Publications
3. Structural stability of Steel, Theodore v. Galambos & andrea e. Surovek

Year/Sem	II Sem	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21STET11
Name of the Course	**THEORY OF PLATES AND SHELLS**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Analyze Navier's solution, Levy's solution and solve for the rectangular and square plates (K3)
- Analyze circular plates with various boundary conditions (K3)
- Practice on the finite difference method of solving plate problems(K3)
- Develop the potential energy principle and find the solution of rectangular plates for various loadings(K3)
- Identify the behavior of folded plates and shells.(K3)

SYLLABUS

UNIT I

Rectangular Plates: Derivation of governing differential equation for plate– in plane bending and transverse bending effects - Plates under various loading conditions like concentrated, uniformly distributed load and hydrostatic pressure. Navier and Levy's type of solutions for various boundary condition.

UNIT II

Circular plates: Symmetrically loaded, circular plates under various loading conditions, annular plates.

UNIT III

Shells: Introduction to Shells- Single and double curvature- Equations of Equilibrium of shells. Derivation of stress resultants, Principles of membrane theory and bending theory

UNIT IV

Cylindrical Shells: Derivation of the governing DKJ equation for bending theory, details of Schorer's theory. Application to the analysis and design of short and long shells. Use of ASCE Manual coefficients for the design.

UNIT V

Beam theory of cylindrical shells: Beam and arch action. Design of diaphragms - Geometry analysis and design of elliptic Paraboloid, Conoidal and Hyperbolic Paraboloid shapes by membrane theory.

Text Books:

1. Theory of Plates and Shells 2e –S. Timoshenko and S. Woinowsky Krieger, McGraw-Hill book company, INC, New York.
2. Reinforced Concrete Shells and Folded Plates by P.C. Varghese, Prentice Hall India Publications
3. Analysis of Thin Concrete Shells by K. Chandrasekhara, New Age International (P) Ltd

References:

1. Theory and Analysis of Elastic Plates and Shells by J. N. Reddy, CRS Press
2. A Text Book of Shell Analysis – Bairagi, K, Khanna Publisher, New Delhi.
3. Design and Construction of Concrete Shell Roofs – Ramaswamy, G.S, Mc Graw Hill, New York

Year/Sem	**II Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21STET12
Name of the Course	**ADVANCED STEEL DESIGN**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Examine the simple connection used in various joints and design of connection (K3)
- Assess the plastic analysis to different beams based on their considerations (K3)
- Illustrate the eccentric and moment connection on various structural members (K3)
- Develop and analyse the industrial buildings subjected to transverse and lateral loading (K3)
- Complete the design of steel truss girder bridges and strengthening measures to girders (K3)

SYLLABUS

UNIT I

Simple Connections – Riveted, Bolted Pinned And Welded Connections: Riveted Connections – Bolted Connections –Load Transfer Mechanism – Failure of Bolted Joints – Specifications for Bolted Joints – Bearing – Type Connections – Tensile Strength of Plate – Strength and Efficiency of the Joint – Combined Shear and Tension – Slip-Critical connections – Prying Action – Combined Shear and Tension for Slip-Critical Connections. Design of Groove Welds - Design of Fillet Welds – Design of Intermittent Fillet Welds – Failure of Welds.

UNIT II

Plastic Analysis: Introduction – Plastic Theory – Plastic neutral Axis plastic moment, Elastic & Plastic Section moduli - shape factors plastic Hinge – Fundamental condition conditions in plastic analysis, methods of plastic analysis – collapse load – simply supported, propped cantilever beam, fixed beams continuous beams, portal frame single bay single storey portal frame at different level subjected to vertical and horizontal loads.

UNIT III

Eccentric and Moment Connections: Introduction – Beams – Column Connections – Connections Subjected to Eccentric Shear – Bolted Framed Connections –Bolted Seat Connections – Bolted Bracket Connections. Bolted Moment Connections – Welded Framed Connections- Welded Bracket Connections – Moment Resistant Connections.

UNIT IV

Analysis and Design of Industrial Buildings: Dead loads, live loads and wind loads on roofs. Design wind speed and pressure, wind pressure on roofs; wind effect on cladding and louvers; Design of angular roof truss, tubular truss, truss for a railway platform. Design of purlins for roofs, design of built up purlins, design of knee braced trusses and stanchions. Design of bracings.

UNIT V

Design af Steel Truss Girder Bridges: Types of truss bridges, component parts of a truss bridge, economic Proportions of trusses, self weight of truss girders, design of bridge Compression members, tension members; wind load on truss girder Bridges; wind effect on top lateral bracing; bottom lateral bracing; portal Bracing; sway bracing Design of Lacing.

Text Books:

1. Limit State Design of Steel Structures S.K. Duggal Mc Graw Hill Education Private Ltd. New Delhi.
2. Design of steel structures by N. Subramanian, Oxford University Press
3. Design Steel Structures Volume-II, Ramachandra & Vivendra Gehlot, Scientific Publishes Journals Department.

Year/Sem	II Sem	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21STET13
Name of the Course	ANALYSIS OF OFFSHORE STRUCTURES					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Illustrate different types of offshore structures. (K3)
- Calculation of Conservation mass and momentum. (K3)
- Assess the Wave force estimation on small bodies. (K3)
- Assess the Wave force estimation on long bodies. (K3)
- Compute Static and dynamic analysis of fixed offshore structures. (K3)

SYLLABUS

UNIT I

Introduction: Types of offshore structures, Concept of fixed, compliant and floating structures, Law of floatation, fluid pressure and centre of pressure, estimation of centre of gravity, hydrostatic particulars, stability criteria of floating bodies, and motions of a floating body.

UNIT II

Dynamics and Kinematics : Conservation mass and momentum, Euler equation, Bernoullis Equation, Potential flow, Classification of waves, small amplitude or Linear Airy's theory, dispersion relationship, water particle kinematics, wave energy.

UNIT III

Wave force on small bodies: Estimation - Morison equation, Estimation of wave force on a vertical cylinder, Force due to current, Effect of marine growth on vertical cylinders.

UNIT IV

Wave force on large bodies: Froude-krylov theory, Diffraction theory.

UNIT V

Static and dynamic analysis of fixed offshore structures.

Text Books:

1. Graff, W. J., Introduction to Offshore Structures, Gulf Publ. Co.1981.
2. Dawson, T. H., Offshore Structural Engineering, Prentice Hall, 1983.
3. McClelland, B & Reifel, M. D., Planning & Design of fixed Offshore Platforms, Van Nostrand, 1986.

Year/Sem	**II Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21STET14
Name of the Course	**EARTHQUAKE RESISTANT DESIGN OF BUILDINGS**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Demonstrate the fundamentals of seismology and basic earthquake mechanisms, tectonics types of ground motion, magnitude and propagation of ground motion. (K3)
- Assess the seismic design concepts of various moment resisting frames and their ductility behaviour (K3)
- Compute the earthquake load on various building frames and study on ductile behavior of building frames (K3)
- Assess the Cyclic loading behavior of RC, steel and pre- stressed concrete elements (K3)
- Illustrate the methods of Retrofitting and restoration of buildings subjected to damage due to earthquakes (K3)

SYLLABUS

UNIT I

Engineering seismology: Rebound theory – plate tectonics – seismic waves - earthquake size and various scales – local site effects – Indian seismicity – seismic zones of India – theory of vibrations – near ground and far ground rotation and their effects

UNIT II

Seismic design concepts: EQ load on simple building – load path – floor and roof diaphragms – seismic resistant building architecture – plan configuration – vertical configuration – pounding effects – mass and stiffness irregularities – torsion in structural system- Provision of seismic code (IS 1893 & 13920) – Building system – frames – shear wall – braced frames – layout design of Moment Resisting Frames(MRF) – ductility of MRF – Infill wall – Non-structural elements

UNIT III

Calculation of EQ load: 3D modeling of building systems and analysis (theory only) Design and ductile detailing of Beams and columns of frames Concept of strong column weak beams, Design and ductile detailing of shear walls.

UNIT IV

Cyclic loading behavior of RC, steel and pre- stressed concrete elements: modern concepts- Base isolation – Adaptive systems – case studies

UNIT V

Retrofitting and restoration of buildings subjected to damage due to earthquakes- effects of earthquakes – factors related to building damages due to earthquake- methods of seismic retrofitting- restoration of buildings

Text Books:

1. Earthquake Resistant Design of Structures Pankaj Agarwal and Manish ShriKhande, Prentice Hall of India, 2007, New Delhi.
2. Earthquake Resistant Design of Structures- S.K. Duggal, Oxford Publications.
3. Seismic design of reinforced concrete and masonry buildings by Paulay and Priestley .

Year/Sem	II Sem	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21STET15
Name of the Course	PRECAST AND PREFABRICATED STRUCTURES					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes

Upon successful completion of this course, the students will be able to

- Explain impotence of prefabrication and Principles of Prefabrication. (K3)
- Find Prefabricated Load Carrying Members. (K3)
- Assess Joints for different structural connections. (K3)
- Analyze the production technology of prefabrication. (K3)
- Design and detailing of precast UNIT for factories. (K3)

SYLLABUS
UNIT I

Introduction to prefabrication: General Principles of Prefabrication - Comparison with monolithic construction, types of prefabrication, site and plant prefabrication, economy of prefabrication, modular coordination, standardization – Materials – Modular coordination – Systems – Production – Transportation – Erection.

UNIT II

Prefabricated Members: Load Carrying Capacity - Planning for components of prefabricated structures, disuniting of structures, design of simple rectangular beams and I-beams, handling and erection stresses, elimination of erection stresses, beams, columns, symmetric frames. Behaviour of structural components – Large panel constructions – Construction of roof and floor slabs – Wall panels – Columns – Shear walls..

UNIT III

Joints: Joints for different structural connections, effective sealing of joints for water proofing, provisions for non-structural fastenings, expansion joints in precast construction.

UNIT IV

Production Technology: Choice of production setup, manufacturing methods, stationary and mobile production, planning of production setup, storage of precast elements, dimensional tolerances, acceleration of concrete hardening. Hoisting Technology - Equipment for hoisting and erection, techniques for erection of different types of members like beams, slabs, wall panels and columns, vacuum lifting pads.

UNIT V

Designing and detailing of precast: For factory structures, purlins, principal rafters, roof trusses, lattice girders, gable frames, singe span single storied simple frames, single storied buildings, slabs, beams and columns. Progressive collapse – Code provisions – Equivalent design loads for considering abnormal effects such as earthquakes, cyclones, etc., - Importance of avoidance of progressive collapse.

Text Books:

Year/Sem	II Sem	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21STET16
Name of the Course	EARTH RETAINING STRUCTURES					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Compute thelateralearthpressuresassociatedwithdifferentearthsystems (K3)
- Assess the failure criterion and stability requirements in selecting the most technically appropriate type of retaining wall (K3)
- Employ different techniques to design a sheet pile structure considering both external and internal stability (K3)
- Apply the knowledge of reinforced earth in the designing the earth retaining systems (K3)
- Relate different methods in analyzing the stability of braced cuts and cofferdams (K3)

SYLLABUS

UNIT I

Earth pressures: Different types and their coefficients; Classical Theories of Earth pressure – Rankine's and Coulomb's Theories for Active and Passive earth pressure; Computation of Lateral Earth Pressure in Homogeneous and Layered soils; Graphical solutions for Coulomb's Theory in active and passive conditions.

UNIT II

Retaining walls: Types, Type of Failures of Retaining Walls – Stability requirements –Drainage behind Retaining walls – Provision of Joints – Relief Shells.

UNIT III

Sheet Pile Structures: Types of Sheet piles – Cantilever sheet piles in sands and clays – Anchored sheet piles – Free earth and Fixed earth support methods – Rowe's moment reduction method – Location of anchors and Design of Anchorage system.

UNIT IV

Soil reinforcement: Reinforced earth - Different components – their functions – Design principles of reinforced earth retaining walls.

UNIT V

Braced cuts and Cofferdams: Lateral Pressure in Braced cuts – Design of Various Components of a Braced cut – Stability of Braced cuts – Bottom Heave in cuts. – Types of cofferdam, suitability, merits and demerits – Design of single – wall cofferdams and their stability aspects – TVA method and Cummins' methods.

Text Books:

Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Develop Computer Programs for Analysis and Design of various Structural Elements
- Use different Structural Engineering software's to solve various civil Engineering programs

SYLLABUS

1. Analysis and Design of reinforced concrete multistoried building
2. Analysis of plane and space truss
3. Analysis of plane and space frame
4. Wind analysis on tall structure
5. Analysis of Cylindrical shell
6. Dynamic Analysis of Multistory structure Analysis and Design using STADD, STADD FOUNDATION, ETABS, ANSYS

NOTE: A minimum of four from the above set have to be conducted.

References:

III SEMESTER – SYLLABUS

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation / Year	V21 / 2021-2022	3	0	0	3	V21STET18
Name of the Course	**DESIGN OF PRESTRESSED CONCRETE STRUCTURES**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Compute the Analysis of prestress , losses in prestress and Anchorage slip (K3)
- Deflections of prestressed concrete members (K3)
- Employ types and advantages and analysis of composite sections (K3)
- Apply the knowledge of prestressed concrete slabs (K3)
- Analyze continuity beams in prestressed concrete structures (K3)

SYLLABUS

UNIT I

Introduction – Prestressing Systems – Pretensioning Systems – Postensioning Systems – High Strength Steel and Concrete - Analysis of Prestress - Resultant Stresses at a Section – Pressure Line or Thrust Line – Concept of Load Balancing - Losses of Prestress – Loss Due to Elastic Deformation of Concrete – Shrinkage of Concrete – Creep – Relaxation of Stress in Steel – Friction – Anchorage Slip.

UNIT II

Deflections Of Prestressed Concrete Members: Importance of Control of Deflections – Factors Influencing Deflection – Short-term Deflections of Uncracked Members – Prediction of Long-time Deflections – Deflections of Cracked Members – Requirements of IS 1343-2012. Ultimate Flexural Strength of Beams: Introduction, Flexural theory using first principles – Simplified Methods – Ultimate Moment of Resistance of untensioned Steel.

UNIT III

Composite Constructions: Introduction, Advantages, Types of Composite Construction, Analysis of Composite beams- Differential shrinkage- Ultimate Flexural and shear strength of composite sections- Deflection of Composite Beams. Design of Composite sections.

UNIT IV

Prestressed Concrete Slabs: Types Of Prestressed Concrete Floor Slabs-Design of Prestressed Concrete One Way and Two Way Slabs. Prestressed Concrete Pipes and Poles : Circular prestressing- Types of Prestressed Concrete Pipes- Design of Prestressed Concrete Pipes - Prestressed Concrete Poles.

UNIT V

Continuous Beams: Advantage of Continuous Members – Effect of Prestressing Indeterminate Structures – Methods of Achieving Continuity – Methods of Analysis of Secondary Moments – Concordant Cable Profile – Guyon’s Theorem. Redistribution of moments in a continuous beam. Anchorage Zone Stresses in Beams : Introduction, Stress distribution in End Block – Anchorage zone stresses –Magnel’s method- Guyon’s Method - Anchorage zone Reinforcement.

Text Books:

1. Prestressed Concrete, by N. Krishna Raju, Mc Graw Hill Publishers – fourth edition
2. Prestressed Concrete by K. U.Muthu, PHI Learning Pvt Limited - 18 January 2016
3. Design of Prestressed Concrete by S.S.Bhavikatti **–** 1 January 2019

References:

1. 1 Prestressed Concrete Analysis and Design, Antone E. Naaman, Techno Press 3000
2. Design of Prestressed Concrete- T. Y. Lin, Ned H. Burns
3. 3 Wiley Publications 3. Design of prestressed Concrete by E.G. Nawy

Year/Sem	III Sem	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21STET19
Name of the Course	STRUCTURAL HEALTH MONITORING					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Assess the structural health by investigation and regular maintenance (K3)
- Employ various measures for monitoring structural health (K3)
- Employ various Investigations for monitoring structural audit (K3)
- Discover the dynamic field testing (K3)
- Apply the knowledge of Repairing and rehabilitation of structures (K3)

SYLLABUS

UNIT I

Structural Health: Factors affecting Health of Structures, Causes of Distress, Regular Maintenance Structural Audit: Assessment of Health of Structure, Collapse and Investigation, Investigation Management, SHM Procedures.

UNIT II

Structural Health Monitoring: Concept, Various Measures, Structural Safety in Alteration.

UNIT III

Structural Audit: Assessment of Health of Structure, Collapse and Investigation, Investigation Management, SHM Procedures.

UNIT IV

Dynamic Field Testing: Types of Dynamic Field Test, Stress History Data, Dynamic Response Methods, Hardware for Remote Data Acquisition Systems, Remote Structural Health Monitoring.

UNIT V

Introduction to Repairs and Rehabilitations of Structures: Case Studies (Site Visits), Piezo– electric materials and other smart materials, electro–mechanical impedance (EMI) technique, adaptations of EMI technique.

Text Books:

1. Structural Health Monitoring, Daniel Balageas, Claus Peter Fritzen, Alfredo Güemes, John Wiley and Sons, 2006.
2. Health Monitoring of Structural Materials and Components Methods with Applications, Douglas E Adams, John Wiley and Sons, 2007.
3. Structural Health Monitoring by Daniel Balageas, Claus-peter fritzen and Alfredo Guemes

References:

1. Structural Health Monitoring and Intelligent Infrastructure, Vol1, J. P. Ou, H. Li and Z. D. Duan, Taylor and Francis Group, London, UK, 2006.
2. Structural Health Monitoring with Wafer Active Sensors, Victor Giurglutiu, Academic Press Inc, 2007.
3. Advances in Condition Monitoring and Structural Health Monitoring: WCCM by Len Gelman .et.al.

Year/Sem	**III Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21STET20
Name of the Course	**INDUSTRIAL STRUCTURES**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- functional requirements of structural systems for various industries (K3)
- Get an idea about the materials used and design of industrial structural elements (K3)
- Pre Engineered Buildings (K3)
- Realize the basic concepts and design of power plant structures (K3)
- Design power transmission structures (K3)

SYLLABUS

UNIT I

Planning and functional requirements- classification of industries and industrial structures- planning for layout- requirements regarding lighting ventilation and fire safety- protection against noise and vibrations.

UNIT II

Industrial buildings- roofs for industrial buildings (Steel) - design of gantry girder- design of corbels and nibs- machine foundations

UNIT III

Design of Pre Engineered Buildings

UNIT IV

Power plant structures- Bunkers and silos- chimney and cooling towers- Nuclear containment structures

UNIT V

Power transmission structures- transmission line towers- tower foundations- testing towers

Text books:

1. Machine Foundations by P. Srinivasulu and C. V. Vaidyanathan, Structural Engineering Research Center - 1 July 2017
2. Tall Chimneys- Design and Construction by S. N. Manohar Tata Mc Grawhill Publishing Company -
3. The Design & Construction of Industrial Buildings by Moritz Kahn

References:

1. Transmission Line Structures by S. S. Murthy and A. R. Santakumar McGraw Hill
2. SP 32: 1986, Handbook on functional requirements of Industrial buildings 3. Design of steel structures by N. Subramanian
3. The Architect's Studio Companion: Rules of Thumb for Preliminary Design by Edward Allen

Year/Sem	**III Sem**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21MBT56
Name of the Course	**COSTMANAGEMENTOFENGINEERINGPROJECTS**					
Branch	STRUCTURAL ENGINEERING					

Course Outcomes:

Upon successful completion of this course, the students will be able to

- Understand the cost management process and various costs involved in a project (K2)
- Understand various aspects of a project and related processes. (K2)
- Analyze the concepts of Break even and CVP analysis. (K3)
- Demonstrate quality management techniques besides budgeting strategies (K2)
- Apply quantitative techniques for cost management (K4)

SYLLABUS

UNIT I

IntroductionandOverviewoftheStrategicCostManagementProcess: Costconceptsindecision-making;relevantcost,Differentialcost, Marginal cost, IncrementalcostandOpportunity cost.ObjectivesofCosting System;Creationofa Database foroperational control;Provision of datafor Decision-Making.

UNIT II

Project Management: Meaning, Different types of projects.

Various stages of projectexecution:conceptiontocommissioning,Projectexecutionas aconglomerationoftechnicalandnontechnicalactivities, DetailedEngineeringactivities,Preprojectexecution,mainclearancesanddocuments.

Project team: Role of each member, Importance of Project site. Project contracts: Types and its contents. CPM & PERT Techniques.

UNIT III

Cost Behavior and Profit Planning: Marginal Costing, Distinction between Marginal Costing andAbsorptionCosting;Break-evenAnalysis,Cost-Volume-ProfitAnalysis, Standard Costing and Variance Analysis.

UNIT IV

Quality management and Budgeting strategies: Pareto Analysis, Target costing,Life Cycle Costing, Just-in-time approach, Material Requirement Planning,Enterprise Resource Planning, Total Quality Management and Theory of constraints. Activity-Based CostManagement,BenchMarking;BalancedScoreCardandValue-ChainAnalysis.
BudgetaryControl;FlexibleBudgets;Performancebudgets;Zero-basedbudgets. MeasurementofDivisionalprofitabilitypricing &decisionsincludingtransferpricing.

UNIT V

Quantitative techniques for cost management, Linear Programming, Transportationproblems,Assignmentproblems, Simulation,LearningCurve Theory

ANNEXURE - VIII

AUDIT COURSES OFFERED IN I & II SEMESTER

Audit course	I & II Sem	Disaster Management	V21STEAC1

Year/Sem		**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation Year	V21 / 2021-2022	3	0	0	3	V21STEAC1
Name of the Course	**DISASTER MANAGEMENT**					
Branch	CIVIL ENGINEERING					

Course Outcomes:

Upon successful completion of this course the student will be able to

- Describe to student to have a idea on different natural hazards and disaster management (K2)
- Develop the student to understand manmade disaster and their management (K3)
- Prepare the student in such a way inorder to understand building codes and vulnerability of disaster (K3)
- Illustrate to student about role of technology in disaster management (K2)
- Assess the importance of education and community preparedness in disaster management to student (K3)

SYLLABUS

UNIT I

Natural Hazards and Disaster Management: Introduction of DM Disaster Management cycle – Five priorities for action- Case study methods of the following: floods, droughts – Earthquakes – global warming, cyclones & Tsunamis – Post Tsunami hazards along the Indian coast – landslides.

UNIT II

Man Made Disastar And Their Management Along With Case Study Methods Of The Following: Fire hazards – transport hazard dynamics – solid waste management – post disaster – bio terrotirism - rail and air craft's accidents-Management of these disasters

UNIT III

Risk And Vulnerability: – Building codes and land use planning – social vulnerability – environmental vulnerability-Financial management of disaster.

UNIT IV

Role Of Technology In Disaster Managements: Disaster management for infra structures, taxonomy of infra structure - mitigation programme for earth quakes –geospatial information in agriculture drought assessment-multimedia technology in disaster risk management and training-transformable indigenous knowledge in disaster reduction.

UNIT V

Education And Community Preparedness: Education in disaster risk reduction-Essentials of school disaster education-Community capacity and disaster resilience-Community based disaster recovery -Community based disaster management and social capital-Designing resilience- building.

Text Books:

1. Disaster Management – Global Challenges and Local Solutions' by Rajib shah & R R Krishnamurthy(2009),Universities press.
2. Disaster Science & Management' by Tushar Bhattacharya, Tata McGraw Hill Education Pvt. Ltd., New Delhi.
3. Disaster Management – Future Challenges and Opportunities' by Jagbir Singh (2007), I K International Publishing House Pvt. Ltd.

Reference Books:

1. 'Disaster Management' edited by H K Gupta (2003), Universities press.
2. Natural Hazards and Disaster Management, Vulnerability and Mitigation by RB Singh
3. Disaster Management by Harish K.Gupta

Annexure-IV

SRI VASAVI ENGINEERING COLLEGE

(AUTONOMOUS)

(Sponsored by Sri Vasavi Educational Society)
(Approved by AICTE, New Delhi &Recognized by UGC under section 2(f) & 12(B))
(Permanently affiliated to JNTUK, Kakinada, Accredited by NBA and NAAC with 'A' Grade)
Pedatadepalli, **TADEPALLIGUDEM–534 101.**W.G.Dist**. (A.P)**

Department of Electrical & Electronics Engineering

Date: 07-09-2021

The fifth meeting of Board of Studies in Department of Electrical and Electronics Engineering is held at 11.00 AM on 03-09-2021 though online mode using gotomeeting tool (Meeting ID: 954129285).

The following members are attended the meeting.

S.No.	Name	Designation	Role
1.	Dr. Sudha Rani Donepudi	Professor, Head, Dept. of EEE, SVEC, Pedatadepalli.	Chairperson
2.	Dr. R. SrinivasaRao	Professor, Dept. of EEE, UCEK, JNTUK, Kakinada	Subject Expert Nominated By V.C.
3.	Dr. M. Sydulu	Professor, Dept. of EE, NITW, Warangal	Subject Expert Nominated By A.C.
4.	Dr. Y.P. Obulesu	Professor, School of EE, VIT, Vellore	Subject Expert Nominated By A.C.
5.	Er. B.N.V.R.C. Suresh Kumar	Retired AGM, PGCI, Hyderabad	Industry Expert Nominated By A.C
6.	Er. Ch. Vinay Kumar	Assistant Engineer, EHT Lines, APTRANSCO, Eluru.	Alumni
7.	Dr. Ch. Rambabu	Professor	Member
8.	U. Chandra Rao	Sr. Asst. Professor	Member
9.	N. Sri Harish	Asst. Professor	Member
10.	K Ramesh Babu	Asst. Professor	Member
11.	M.T.V. L Ravi Kumar	Asst. Professor	Member
12.	V. Rama Narayana	Asst. Professor	Member
13.	G Madhu Sagar Babu	Asst. Professor	Member
14.	A Uma Siva Naga Prasad	Asst. Professor	Member

15.	K. Venkata Reddy	Asst. Professor	Member
16.	K Amarendra	Asst. Professor	Member
17.	Mr. V.S. Aditya	Asst. Professor	Member
18.	Pradeep Vejju	Asst. Professor	Member
19.	Ch Srinivas	Asst. Professor	Member

The following are the minutes of the meeting

Item No. 1: Welcome note by the Chairperson BOS

The HOD extended a formal welcome and introduced the members.

Item No. 2: Progress Report of the Department

Chairperson BOS had given the Brief on Progress Report of the Department.

Item No. 3: Review of course structure for VII & VIII semesters of B. Tech EEE under V18 Regulation.

Reviewed and approved the course structure of VII & VIII semesters of B.Tech-EEE Programme under V18 Regulation.

The details of the approved course structure for VII & VIII semesters of UG (B.Tech) Programme (EEE) under V18 Regulation are given in Annexure-I

Item No. 4: Approval of syllabi for the courses offered in VII & VIII semesters B. Tech EEE under V18 Regulation.

Approved the syllabi for the courses offered in VII & VIII semesters B. Tech EEE under V18 Regulation.

The approved syllabi for the courses offered in VII and VIII semesters of B.Tech EEE of under V18 Regulation is attached in Annexure-II.

Item No. 5: Approval of list of courses offering under Open Elective- II & III in VII & VIII semester B. Tech respectively under V18 Regulation for all other branches and the approval of their detailed syllabi.

Approved the list of courses and syllabi for the courses offered as Open Electives in VII and VIII semesters B. Tech for all other branches under V18 Regulation and the details are given in Annexure III.

Item No. 6: Approval of course structure for III & IV semesters of B. Tech EEE under V20 Regulation.

Approved the course structure of III & IV semesters of B.Tech-EEE Programme under V20 Regulation with the following modifications.

SEM	Suggestions	Inclusions / Modifications
III & IV Skill Oriented Courses (SOC)	Suggested to add Raspberry-pi, Arduino, and E-CAD	Included Arduino Board and E-CAD into pool of SOC at second year level and Raspberry-pi will be included at third year level

The details of the approved course structure for III & IV semesters of UG (B.Tech) Programme (EEE) under V20 Regulation are given in Annexure-IV

Item No. 7: Approval of syllabi for the courses offered in III & IV semesters of B. Tech EEE under V20 Regulation.

Approved the syllabi for the courses offered in III & IV semesters B. Tech EEE under V20 Regulation with the following suggestions/modifications.

SEM	Course Code	Course Title	Suggestions	Inclusions / Modifications
III	V20EET04	Electrical Circuit Analysis-II	Replace Network Synthesis Unit with Filters	Replaced Network Synthesis Unit with Filters
IV	V20EET10	Electrical Power Generation & Transmission	Add introduction level of Renewable Sources in Unit-I	Included Introduction to Renewable Energy Sources, Solar and wind Power plant Layouts.
IV	V20EEL06	Electrical Measurements Laboratory	Add demonstration of new electronic meters available for field electrical engineers	Included demonstration of electronic meters as an experiment

The approved syllabi for the courses offered in III and IV semesters of B. Tech EEE of under V20 Regulation is attached in Annexure-V.

Item No. 8: Approval of syllabi for the courses offered in III & IV semesters for other branches of B. Tech under V20 Regulation.

Approved the syllabus for the course offered in IV semesters B. Tech ECE under V20 Regulation and is given in Annexure – VI.

Item No. 9: Approval of course structure for I to IV semesters of M. Tech Power Electronics and Power Systems (PE&PS) under V21 Regulation.

Approved the proposed course structure from I to IV semesters M. Tech Power Electronics and Power Systems (PE&PS) under V21 Regulation with following suggestions/modifications.

SEM	Suggestions	Inclusions / Modifications
I	Advanced Digital Signal Processing Course (Course Code: V21PET04) in Elective –I can be replaced with Smart Grid	Advanced Digital Signal Processing Course (Course Code: V21PET04) is replaced with Smart Grid (Course Code: V21PET04)
II	DSP Controlled Drives course (Course code: V21PET12) in Elective-III can be changed as Control of Electric Drives	DSP Controlled Drives course (Course code: V21PET12) in Elective-III is modified as Control of Electric Drives (Course code: V21PET12)
III	In Elective-III, Optimization Techniques (Course code: V21PET18) and Artificial Intelligent Techniques (Course code: V21PET19) can combine together as a Soft Computing Techniques	Optimization Techniques (Course code: V21PET18) is merged with Artificial Intelligent Techniques (Course code: V21PET19) and renamed as Soft Computing Techniques in Electrical Engineering (Course code: V21PET18)

The approved course structure from I to IV semesters M. Tech Power Electronics and Power Systems (PE&PS) under V21 Regulation is given in Annexure VII.

Item No. 10: Approval of syllabi for the courses offered form I to IV semesters of M. Tech Power Electronics and Power Systems (PE&PS) under V21 Regulation.

Approved the syllabi for various courses offered from I to IV semesters of M. Tech Power Electronics and Power Systems (PE&PS) under V21 Regulation with the following modifications.

SEM	Course Code	Course Title	Suggestions	Inclusions / Modifications
I	V21PET02	Power System Operation & Control	Included Load Flow Analysis	Load Flow Analysis is added in the syllabus

The approved syllabi for various courses offered from I to IV semesters of M. Tech Power Electronics and Power Systems (PE&PS) under V21 Regulation is given in Annexure VIII.

Dr. Sudha Rani Donepudi

(BOS Chairperson)

Annexure II

Syllabi for the Courses offered in VII & VIII Semesters B. Tech EEE Under V18 Regulation

Semester	VII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET26
Name of the Course	Power System Operation and Control					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Analyze the optimal scheduling of power generating thermal units	K4
CO2	Compute optimal hydro and thermal scheduling.	K3
CO3	Predict the optimal unit commitment problem	K3
CO4	Calculate the transfer function of single area and two area load frequency control.	K4
CO5	Evaluate the steady state response of single area load control with PI controller.	K5
CO6	Assess the reactive power control and compensation of transmission lines.	K3

UNIT–I: ECONOMIC OPERATION OF POWER SYSTEMS

Optimal operation of Generators in Thermal power stations, Heat rate curve, Cost Curve, Incremental fuel and Production costs, Input–output characteristics, Optimum generation allocation with line losses neglected, Optimum generation allocation including the effect of transmission line losses, Loss Coefficients, General transmission line loss formula.

UNIT–II: HYDROTHERMAL SCHEDULING

Optimal scheduling of Hydrothermal System: Hydroelectric power plant models, Scheduling problems, Short term hydrothermal scheduling problem.

UNIT–III: UNIT COMMITMENT

Optimal unit commitment problem, Need for unit commitment, Constraints in unit commitment, Cost function formulation, Solution methods, Priority ordering, Dynamic programming.

UNIT–IV: LOAD FREQUENCY CONTROL-I

Modeling of steam turbine, Generator, Mathematical modeling of speed governing system– Transfer function – Modeling of Hydro turbine –Necessity of keeping frequency constant–Definitions of Control area – Single area control system – Block diagram representation of an isolated power system – Steady state analysis – Dynamic response – Uncontrolled case. Proportional plus Integral control of single area and its block diagram representation – Steady state response.

UNIT–V: LOAD FREQUENCY CONTROL-II

Block diagram development of Load Frequency Control of two area system uncontrolled
case and controlled case. Tie-line bias control. Load Frequency Control and Economic
dispatch control.

UNIT–VI: REACTIVE POWER CONTROL

Overview of Reactive Power control – Reactive Power compensation in transmission systems– Advantages and disadvantages of different types of compensating equipment for transmission systems – Load compensation – Specifications of load compensator –
Uncompensated and compensated transmission lines: Shunt and series compensation – Need for FACTS controllers.

TEXT BOOKS:

1. Electric Energy Systems Theory – by O. I. Elgerd, Tata Mc Graw–hill Publishing Company Ltd., Second edition. 2017
2. Power System stability & control, Prabha Kundur, TMH ,First Edition 2006.
3. Modern Power System Analysis – by I. J. Nagrath & D. P. Kothari Tata Mc Graw – Hill Publishing Company Ltd, 2nd edition Energy management by Paul o' Callaghan, Mc–Graw Hill Bookcompany–1st edition, 1998.

REFERENCE BOOKS:

1. Power System Analysis and Design by J. Duncan Glover and M.S. Sarma, THOMPSON, 6rd Edition2019.
2. Power System Analysis by Grainger and Stevenson, Tata McGraw Hill2017.

Semester	VII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET27
Name of the Course	AI Techniques for Power Systems					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand fundamentals concepts of artificial neural networks.	K2
CO2	Understand concepts of different algorithms ANN paradigms.	K2
CO3	Understand fundamentals of fuzzy set properties and membership functions.	K2
CO4	Understand the concept of evolutionary techniques operation.	K2
CO5	Understand fundamentals of optimization techniques.	K2
CO6	Apply optimization techniques to power system applications.	K4

UNIT-I: ARTIFICIAL INTELLIGENCE

Artificial Neural Networks (ANN) – definition and fundamental concepts – Biological neural networks – Artificial neuron – activation functions – setting of weights – typical architectures – biases and thresholds – learning/training laws and algorithms.

UNIT-II: ANN PARADIGMS

ADALINE – feed forward networks – Back Propagation algorithm-Radial Basis Function (RBF) network- Hopfield Neural Network.

UNIT- III: CLASSICAL AND FUZZY SETS

Introduction to classical sets- properties, Operations and relations; Fuzzy sets, Membership, Operations, Properties, Fuzzy relations, Membership functions.

UNIT-IV: EVOLUTIONARY TECHNIQUES

Introduction-concepts of genetic algorithms: Initialization-Selection-Genetic operators, Mutation- Evolutionary programming-Evolutionary techniques.

UNIT-V: FUNDMENTALS OF OPTIMIZATION

Classification of optimization problems-Unconstrained and Constrained optimization- Particle swarm optimization.

UNIT-VI: APPLICATIONS OF AI

PSO based Economic load dispatch without losses, Load flow, and Load frequency control: Single area system using ANN.

TEXT BOOKS:

1. Neural Networks, Fuzzy logic, Genetic algorithms: synthesis and applications by Rajasekharan and pai – PHI Publication, 2011.

Semester	VII SEM	L	T	P	C	Course Code
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EET28**
Name of the Course	**Power Quality (Professional Elective – III)**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Explain different types of power quality phenomena	**K2**
CO2	Illustrate sources for voltage sag, voltage swell, interruption, transients, long duration over voltages & harmonics in a power system	**K3**
CO3	Describe power quality terms & study power quality standards	**K2**
CO4	Discuss principle of voltage regulation & power factor improvement methods	**K2**
CO5	Assess the relationship between distributed generation & power quality	**K3**
CO6	Discuss the power quality monitoring concepts & the usage of measuring instruments	**K2**

UNIT–I: INTRODUCTION

Overview of power quality – Concern about the power quality – General classes of power quality and voltage quality problems – Transients – Long–duration voltage variations – Short–duration voltage variations – Voltage unbalance – Waveform distortion – Voltage fluctuation – Power frequency variations.

UNIT–II: VOLTAGE IMPERFECTIONS IN POWER SYSTEMS

Power quality terms – Voltage sags – Voltage swells and interruptions – Sources of voltage sag, swell and interruptions – Nonlinear loads – IEEE and IEC standards. Source of transient over voltages – Principles of over voltage protection – Devices for over voltage protection – Utility capacitor switching transients.

UNIT–III: VOLTAGE REGULATION AND POWER FACTOR IMPROVEMENT

Principles of regulating the voltage – Device for voltage regulation – Utility voltage
regulator application – Capacitor for voltage regulation – End–user capacitor application – Regulating utility voltage with distributed resources – Flicker – Power factor penalty – Static VAR compensations for power factor improvement.

UNIT– IV: HARMONIC DISTORTION AND SOLUTIONS

Voltage distortion vs. Current distortion – Harmonics vs. Transients – Harmonic indices – Sources of harmonics – Effect of harmonic distortion – Impact of capacitors, transformers, motors and meters – Point of common coupling – Passive and active filtering – Numerical problems.

UNIT–V: DISTRIBUTED GENERATION AND POWER QUALITY

Resurgence of distributed generation – DG technologies – Interface to the utility system – Power quality issues and operating conflicts – DG on low voltage distribution networks.

UNIT–VI: MONITORING AND INSTRUMENTATION

Power quality monitoring and considerations – Historical perspective of PQ measuring instruments – PQ measurement equipment – Assessment of PQ measuring data – Application of intelligent systems – PQ monitoring standards.

Semester	VII SEM	L	T	P	C	Course Code
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EET29**
Name of the Course	**High Voltage Engineering (Professional Elective – III)**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Describe the electric field stress on different configuration of electrodes.	K2
CO2	Understand the breakdown phenomena in various dielectric materials.	K2
CO3	Illustrate the generation of high DC, AC and Impulse voltages and Currents.	K2
CO4	Explain various methods available for measurement of high DC, AC and Impulse voltages and currents.	K2
CO5	Describe different methods for measuring DC Resistivity, Dielectric Constant, Loss Factor & explain the phenomena of Partial Discharge.	K2
CO6	Illustrate the testing techniques for various equipment's used in High Voltage Engineering.	K2

UNIT–I: INTRODUCTION TO HIGH VOLTAGE TECHNOLOGY

Electric Field Stresses – Uniform and non–uniform field configuration of electrodes – Estimation and control of electric Stress – Numerical methods for electric field computation.

UNIT–II: BREAK DOWN PHENOMENON IN GASEOUS, LIQUID AND SOLID INSULATION

Gases as insulating media – Collision process – Ionization process – Townsend's criteria of breakdown in gases – Paschen's law – Liquid as Insulator – Pure and commercial liquids – Breakdown in pure and commercial liquid – Intrinsic breakdown – Electromechanical breakdown – Thermal breakdown –Breakdown of solid dielectrics, composite dielectrics used in practice.

UNIT–III: GENERATION OF HIGH VOLTAGES AND HIGH CURRENTS

Generation of High DC voltages – Generation of High Alternating Voltages – Generation of Impulse Voltages and Currents – Tripping and Control of Impulse Generators.

UNIT–IV: MEASUREMENT OF HIGH VOLTAGES AND HIGH CURRENTS

Measurement of High - Direct Current Voltages, AC and Impulse Voltages; Measurement of High – DC, AC and Impulse Currents.

UNIT–V: NON–DESTRUCTIVE TESTING OF MATERIAL AND ELECTRICAL APPARATUS

Measurement of DC Resistivity – Measurement of Dielectric Constant and Loss Factor – Partial Discharge Measurements.

UNIT–VI: High Voltage Testing of Electrical Apparatus

Testing of Insulators and Bushings – Testing of Isolators and Circuit Breakers – Testing of Cables – Testing of Transformers – Testing of Surge Diverters – Radio Interference Measurements.

TEXT BOOKS:

1. High Voltage Engineering: Fundamentals by E.Kuffel, W.S.Zaengl, J.Kuffel by Elsevier, 2nd Edition,2000.
2. High Voltage Engineering and Technology by Ryan, IET Publishers.3rd Edition,2013.

REFERENCE BOOKS:

1. High Voltage Engineering by M.S.Naidu and V. Kamaraju – TMH Publications, 4th Edition2009
2. High Voltage Engineering by C.L.Wadhwa, New Age Internationals (P) Limited, 1997.
3. High Voltage Insulation Engineering by Ravindra Arora, Wolfgang Mosch, New Age International (P)Limited, 1995.

Semester	VIISEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET30
Name of the Course	Modelling and Simulation of Power Electronics (Professional Elective – III)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand the background activities i.e. numerical solution used in the simulation software.	K3
CO2	Describe the transient analysis in circuit simulation	K2
CO3	Explain the concepts of simulation of power electronic converters	K2
CO4	Compute properties of switching functions in single and parallel switch	K3
CO5	Express mathematical modelling of different converters	K2
CO6	Develop state space averaging technique and Hybrid Modelling for DC-DC converter	K3

UNIT-I: INTRODUCTION

Challenges in computer simulation – Simulation process–mechanics of simulation, Solution techniques for time domain analysis-Equation solvers, circuit-oriented simulators.

UNIT-II: SIMULATION OF POWER ELECTRONIC CONVERTERS-1

MNA and ST Approaches- Nodal Analysis, Modified Nodal Analysis, The Spare Tableau Approach, Nonlinear Circuits - The Newton Raphson Method, Computation Time, Convergence Issues, Nonlinear Circuit Equations, Introduction to Transient Simulation-Introduction, Discretization of Time, Transient Analysis, Accuracy and Stability, Explicit and Implicit Schemes, Methods for Transient Simulation - FE, BE and TRZ, Transient Analysis in Circuit Simulation, Equivalent Circuit Approach: RC Circuit,

UNIT- III: SIMULATION OF POWER ELECTRONIC CONVERTERS– II

Buck Converter; Some Practical Aspects: Undamped Oscillations, Ringing, Global Error in Switching Circuits, Round-off Error, Assessment of Accuracy,SingularMatrixProblem,Trapezoidalintegration,M&Nmethodforsim ulatingpowerelectronicconverters(with buck converter as are presentative example).

UNIT-IV: SWITCHINGFUNCTION

Introduction, Application of the switching function technique, Properties of the switching function, Voltage-Current relations in switched circuits - Single Switch, Parallel Switch, Pulse Width Modulation- Unipolar, PWM Signal of a composite function, bipolar square wave modulation.

UNIT-V: MATHEMATICAL MODELING OF CONVERTERS

Mathematical Modeling of Buck Converter, Modeling using switching function-buck converter, Rectifier,3-phase VSI inverter, matrix converter, m-phase rectifier. PWM rectifier topologies, modeling of power electronic converters-PWM rectifier in different frames-abc, alpha-beta and d-q.

UNIT-VI: MODELING, SIMULATION OF SWITCHING CONVERTERS WITH STATE SPACE AVERAGING, HYBRID MODEL

State space approach, averaging method, State Space Averaging Technique–Modeling AND linearization of converter transfer function-Hybrid Modeling for DC-DC converter.

TEXT BOOKS:

1. M. B. Patil, V. Ramnarayanan, V. T. Ranganathan: *Simulation of Power Electronic Converters*, 1st ed., Narosa Publishers, 2010

REFERENCE BOOKS:

1. Ned Mohan, Undeland and Robbins, “Power Electronics: Converters, Design and control”-3rd ed., John Wiley 2009.

Semester	VII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET31
Name of the Course	Flexible AC Transmission Systems (Professional Elective – III)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Determine power flow control in transmission lines by using FACTS controllers.	**K3**
CO2	Explain operation and control of voltage source converter.	**K2**
CO3	Discuss compensation methods to improve stability and reduce power oscillations in the transmission lines.	**K2**
CO4	Explain the method of shunt compensation by using static VAR compensators.	**K2**
CO5	Appreciate the methods of compensations by using series compensators..	**K3**
CO6	Explain the operation of two modern power electronic controllers (Unified Power Quality Conditioner and Interline Power Flow Controller)	**K2**

UNIT-I: FACTS CONCEPTS

Introduction to FACTS: Transmission interconnections power flow in an AC system, loading capability limits, Dynamic stability considerations, importance of controllable parameters basic types of FACTS controllers, benefits from FACTS controllers.

UNIT-II: VOLTAGE SOURCE CONVERTERS

Single & three phase full wave bridge converters, Three level voltage source converter, pulse width modulation, basic concept of current source converters, and comparison of current source converters with voltage source converters

UNIT- III: STATIC SHUNT COMPENSATION

Objectives of shunt compensation: mid-point voltage regulation, voltage instability prevention, improvement of transient stability, Power oscillation damping, Methods of controllable VAR generation, variable impedance type static VAR generators switching converter type VAR generators, hybrid VAR generators.

UNIT-IV: STATICSHUNT COMPENSATION-2

Thyristor Switched Capacitor (TSC)– Thyristor Switched Capacitor – Thyristor Switched Reactor (TSC–TCR). Static VAR compensator (SVC) and Static Compensator (STATCOM): The regulation and slope transfer function and dynamic performance – Transient stability enhancement and power oscillation damping– Operating point control and summary of compensation control.

UNIT-V: SERIESCOMPENSATORS

Static series compensators: Concept of series capacitive compensation Improvement of transient stability – Power oscillation damping – Functional requirements. GTO thyristor controlled Series Capacitor (GSC) – Thyristor Switched Series Capacitor (TSSC) and Thyristor Controlled Series Capacitor (TCSC).

UNIT-VI: COMBINED CONTROLLERS

Schematic and basic operating principles of unified power flow controller (UPFC) and Interline power flow controller (IPFC) – Application of these controllers on transmission lines.

TEXT BOOKS:

1. Understanding FACTS" N. G. Hingorani and L. Guygi, IEEE Press. Indian Edition is available:—Standard Publications, 2001.
2. Thyristor-based FACTS Controllers for Electrical Transmission Systems, by R. Mohan Mathur and Rajiv K. Varma, Wiley, 2002.

REFERENCE BOOKS:

1. Zhang, Xiao-Ping, Rehtanz, Christian, Pal, Bikash "Flexible AC Transmission Systems: Modeling and Control", Springer, 2012.
2. Yong-Hua Song, Allan Johns, "Flexible AC Transmission Systems", IET, 1999.
3. https://nptel.ac.in/courses/108/107/108107114/

Semester	**VII SEM**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EET32**
Name of the Course	**Modern Control Theory (Professional Elective – IV)**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Describe and analyse systems in state space model	K2
CO2	Model a system in various canonical forms	K3
CO3	Design a controller and observer using state feedback	K4
CO4	Analyse non-linear system using describing functions	K3
CO5	Analyse non-linear system using Phase plane analysis	K3
CO6	Analyse non-linear system using Lypanov method	K3

UNIT – I: STATE VARIABLE DESCRIPTION
Concept of State – State Equations for Linear Continuous time Models-Non uniqueness of state model – State diagrams for continuous time state models – Solution of state equations – State transmission matrix.

UNIT – II: CONTROLLABILITY AND OBSERVABILITY
Tests for controllability and observability for continuous time systems – Time varying case, minimum energy control, time invariant case, Principle of Duality, Controllability and observability of state models in Jordan canonical form and other canonical forms.

UNIT – III: MODAL CONTROL
Effect of state feedback on controllability and observability, Design of State Feedback Control through Pole placement. Full order observer and reduced order observer.

UNIT – IV: DESCRIBING FUNCTION ANALYSIS
Introduction to nonlinear systems, Types of nonlinearities, Concepts of describing functions, Derivation of describing functions for Dead zone, Saturation, backlash, relay with dead zone and Hysteresis – Jump Resonance.

UNIT-V: PHASE-PLANE ANALYSIS
Introduction to phase-plane analysis, Method of Isoclines for Constructing Trajectories, Singular points, Phase-plane analysis of nonlinear control systems.

UNIT-VI: STABILITY ANALYSIS
Stability in the sense of Lyapunov. Lyapunov's stability and Lypanov's instability theorems. Direct method of Lypanov for the Linear and Nonlinear continuous time autonomous systems.

TEXT BOOKS:

1. Modern Control System Theory – by M. Gopal, New Age International Publishers, 2nd edition, 1996.
2. Systems and Control by Stainslaw H. Zak, Oxford Press, 2003.

REFERENCE BOOKS:

1. Modern Control Engineering – by K. Ogata, Prentice Hall of India, 3rd edition, 1998.
2. Control Systems Engineering by I.J. Nagrath and M.Gopal, New Age International (P) Ltd. 2007.
3. Digital Control and State Variable Methods – by M. Gopal, Tata Mc Graw-Hill companies, 1997.

Semester	VII SEM	L	T	P	C	Course Code
Regulation	V18	4	-	-	3	V18EET33
Name of the Course	Smart Grid (Professional Elective – IV)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand concept of smart grid and its advantages over conventional grid.	K2
CO2	Explain the architecture of smart Grid	K2
CO3	Illustrate the concept of Micro Grid and its integration	K3
CO4	Understand smart metering techniques and measuring techniques	K2
CO5	Examine different communication technologies that can be used for smart grid	K3
CO6	Identify the power quality problems associated with smart grid	K2

UNIT –I: INTRODUCTION TO SMART GRID

Introduction to Smart Grid - Need of Smart Grid, Working definitions of Smart Grid and Associated Concepts – Smart Grid Functions – Traditional Power Grid and Smart Grid – New Technologies for Smart Grid – Advantages — Key Challenges for Smart Grid.

UNIT—II: SMART GRID ARCHITECTURE

Components and Architecture of Smart Grid Design – Review of the proposed architectures for Smart Grid-Geographic Information System(GIS)-The fundamental components of Smart Grid designs – Transmission Automation – Sub-Station Automation -Distribution Automation – Feeder Automation, Renewable Integration

UNIT-III: DISTRIBUTION GENERATION

Introduction-necessity of DG– Concept of micro grid-Issues of interconnection-protection & control of micro grid – Storage Technologies – Smart Storages, Battery, SMES– Economic Issues.

UNIT-IV: SMART METERS

Introduction to smart Meters-Phasor Measurement Unit (PMU)-Wide Area Measurement Systems (WAMS). Intelligent Electronic Devices (IED) & their application for monitoring & protection

UNIT-V: INFORMATION AND COMMUNICATION TECHNOLOGY FOR SMART GRID

Advanced Metering infrastructure (AMI) drivers and benefits-AMI protocols-Standards and initiatives-AMI needs in the smart grid, Home Area Network (HAN), Wide Area Network (WAN)

UNIT – VI: POWER QUALITY MANAGEMENT IN SMART GRID

Introduction, Power Quality, Power Quality Issues of Grid Connected Renewable Energy Sources, Load Frequency Control (LFC) and Voltage Control in Micro Grid System – Reactive Power Control in Smart Grid- Web based Power Quality Monitoring- Permanent Power Quality Monitoring Equipment-Power Quality Audit.

TEXT BOOKS:

1. James Momoh, "Smart Grid :Fundamentals of Design and Analysis"-Wiley, IEEE Press,2012
2. Ali Keyhani, Mohammad N. Marwali, Min Dai ―Integration of Green and Renewable Energy in Electric Power Systems‖, Wiley2010.
3. JanakaEkanayake, KithsiriLiyanage, Jianzhong.Wu, AkihikoYokoyama, Nick Jenkins,"Smart Grid: Technology and Applications"- Wiley, 2012.
4. A.G. Phadke and J.S. Thorp, "Synchronized Phasor Measurements and their Applications", Springer Edition, 2010

REFERENCE BOOKS:

1. Yang Xiao, "Communication and Networking in Smart Grids", CRC Press 2012.
2. Wiley Blackwell 3.Peter S. Fox Penner, "Smart Power: Climate Changes, the Smart Grid, and the Future of Electric Utilities", Island Press; 1 edition 8 Jun 2010.
3. Stuart Borlase, "Smart Grids (Power Engineering)", CRC Press2015.

Semester	**VII SEM**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EET34**
Name of the Course	**Electrical Machine Modelling & Analysis (Professional Elective – IV)**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Analyze Kroon's Primitive Machine	K2
CO2	Develop modeling of dc machine	K3
CO3	Explain linear Transformation	K4
CO4	Apply mathematical modeling concepts to 3-phase Induction machines	K3
CO5	Design control strategies based on dynamic modeling of 3-ph Induction machines and3-phase Synchronous machine	K4
CO6	Analyze BLDC Machine and switched reluctance machine based on Mathematical modeling of BLDCM and SRM	K4

UNIT – I: BASIC CONCEPTS OF MODELING

Basic Two-pole Machine representation of Commutator machines, 3-phase synchronous machine with and without damper bars and 3-phase induction machine, Kron's primitive Machine-voltage, current and Torque equations.

UNIT – II: DC MACHINE MODELING

Mathematical model of separately excited D.C motor – Steady State analysis-Transient State analysis- Sudden application of Inertia Load-Transfer function of separately excited D.C Motor- Mathematical model of D.C Series motor, Shunt motor

UNIT- III: REFERENCE FRAME THEORY & MODELING OF SINGLE PHASE INDUCTION MACHINES

Linear transformation-Phase transformation - three phase to two phase transformation (abc to dq0) and two phase to three phase transformation dq0 to abc -Power equivalence- Mathematical modeling of single phase induction machines.

UNIT – IV: MODELING OF THREE PHASE INDUCTION MACHINE

Generalized model in arbitrary reference frame-Electromagnetic torque-Derivation of commonly used Induction machine models- Stator reference frame model-Rotor reference frame model-Synchronously rotating reference frame model-state space model with flux linkages as variables.

UNIT –V: MODELING OF SYNCHRONOUS MACHINE

Synchronous machine inductances–voltage equations in the rotor's dq0 reference frame electromagnetic torque- current in terms of flux linkages-three synchronous machine model.

UNIT –VI: MODELING OF SPECIAL MACHINES

Modeling of PM Synchronous motor, modeling of BLDC motor, modeling of Switched Reluctance motor.

TEXT BOOKS:

1. Generalized theory of Electrical Machinery–P. S. Bimbra - Khanna Publishers.- 6th Edition 2017.
2. Electric Motor Drives-Modeling, Analysis &control- R. Krishnan-Pearson Publications-1st edition- 2002.

REFERENCE BOOKS:

1. Analysis of Electrical Machinery and Drive systems– P. C. Krause, Oleg Wasynczuk, Scott D. Sudhoff – Second Edition-IEEE Press2002.
2. Dynamic simulation of Electric machinery using Matlab / Simulink – Chee Mun Ong - PHI.1997.
3. Modern Power Electronics and AC Drives-B. K. Bose –PHI2001.
4. https://nptel.ac.in/courses/108/106/108106023/

Semester	VII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET35
Name of the Course	Control of Grid Connected Converters for PV and Wind Energy Systems (Professional Elective – IV)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand the basic requirements of grid for connecting PV and WT converters.	K2
CO2	Describe various grid synchronization techniques for single phase power converters.	K2
CO3	Describe various grid synchronization techniques for three phase power converters.	K2
CO4	Illustrate various filter topologies and control techniques for grid connected converters.	K2
CO5	Explain different MPPT Control Methods and limitations of standard MPPT.	K2
CO6	Illustrate the control of grid converter for renewable energy interface	K2

UNIT–I: GRID REQUIREMENT FOR PV AND WT SYSTEM

Introduction, International Regulations, Response to Abnormal Grid Conditions, Power Quality. Grid Code Evolution for WT system, Frequency and Voltage Deviation under Normal Operation, Active Power Control in Normal Operation, Reactive Power Control in Normal Operation.

UNIT–II: GRID SYNCHRONIZATION FOR SINGLE-PHASE POWER CONVERTERS

Grid Synchronization Techniques for Single-Phase Systems, Phase Detection Based on In-Quadrature Signals, Some PLLs Based on In-Quadrature Signal Generation.

UNIT–III: GRID SYNCHRONIZATION FOR THREE-PHASE POWER CONVERTERS

The Three-Phase Voltage Vector under Grid Faults, Synchronous Reference Frame PLL under Unbalanced and Distorted Grid Conditions, Decoupled Double Synchronous Reference Frame PLL (DDSRF-PLL), Double Second-Order Generalized Integrator FLL (DSOGI-FLL).

UNIT–IV: INTRODUCTION TO CONTROL STRATEGY OF CONVERTERS WITH DIFFERENT FILTER CONFIGURATIONS

Filter Topologies, Design Considerations, Practical Examples of LCL Filters and Grid Interactions, Resonance Problem and Damping Solutions, Nonlinear Behavior of the Filter. Converter configurations, Different current Control techniques– PI control, PR control, HCC, Model Predictive control.

UNIT–V: MPPT CONTROL FOR PV AND WT SYSTEM

The Dynamic Optimization Problem, Fractional Open-Circuit Voltage and Short-Circuit Current, MPPT Control Methods, The Perturb and Observe Approach, Improvements of the P&O Algorithm, The Incremental Conductance Method, MPPT Efficiency, Limitation of standard MPPT. Charge controller for off grid PV system.

UNIT–VI: GRID CONVERTER CONTROL FOR RENEWABLE ENERGY INTERFACE

Model of the Converter-Mathematical Model of the L-Filter Inverter; AC Voltage and DC Voltage Control-Management of the DC Link Voltage, Cascaded Control of the DC Voltage through the AC Current, Tuning Procedure of the PI Controller, PI-Based Voltage Control; Voltage Oriented Control (VOC) and Direct Power Control (DPC): Synchronous Frame VOC: PQ Open-Loop Control, PQ Closed-Loop Control, Direct Power Control, Stand-alone.

Semester	VII SEM	L	T	P	C	COURSE CODE
Regulation	V18	3	-	-	3	V18EEL10
Name of the Course	Power Systems Lab					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Calculate the sequence impedances of 3 phase Transformer	K4
CO2	Determine the power Angle Characteristics of 3-phase Alternator with infinite bus bars	K4
CO3	Calculate the dielectric strength of Transformer oil	K4
CO4	Explain load flow studies using N-R method	K5
CO5	Assess load frequency control with &without controller	K5
CO6	Evaluate economic load dispatch with & without losses	K5

Any 10 of the Following experiments are to be conducted:

1. Sequence impedances of 3 phase Transformer.
2. Sequence impedances of 3 phase Alternator by Fault Analysis.
3. Sequence impedances of 3 phase Alternator by Direct method.
4. ABCD parameters of Transmission line.
5. Power Angle Characteristics of 3phase Alternator with infinite bus bars.
6. Dielectric strength of Transformer oil.
7. Calibration of Tong Tester.
8. Load flow studies using Gauss-Seidel method
9. Load flow studies using N-R method
10. Transient Stability Analysis
11. Load frequency control with & without control
12. Load frequency control with control
13. Economic load dispatch with & without losses
14. Economic load dispatch with losses.

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EET36**
Name of the Course	**Electrical Distribution Systems (Professional Elective – V)**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand various factors of distribution system	**K2**
CO2	Construct the distribution substation and feeders	**K3**
CO3	Calculate the voltage drop and power loss calculations on Distribution System	**K3**
CO4	Understand the distribution system protection and its coordination.	**K2**
CO5	Understand the effect of compensation for power factor improvement.	**K2**
CO6	Understand the effect of voltage control on distribution system.	**K2**

UNIT I: GENERAL CONCEPTS

Introduction to distribution systems, Load modeling and characteristics, Coincidence factor, Contribution factor loss factor, Relationship between the load factor and loss factor, Classification of loads (Residential, commercial, Agricultural and Industrial).

UNIT II: SUBSTATIONS & DISTRIBUTION FEEDERS

Location of substations: Rating of distribution substation, Service area with 'n' primary feeders, Benefits and methods of optimal location of substations.

Design Considerations of distribution feeders: Radial and loop types of primary feeders, Voltage levels, Feeder loading, Basic design practice of the secondary distribution system.

UNIT III: SYSTEM ANALYSIS

Voltage drops and power–loss calculations: Derivation for voltage drop and power loss in lines, uniformly distributed loads and non-uniformly distributed loads, Numerical problems, three phase balanced primary lines.

UNIT IV: PROTECTION & CO-ORDINATION

Objectives of distribution system protection, Types of common faults and procedure for fault calculations for distribution system, Protective devices: Principle of operation of fuses, Circuit reclosures, Line sectionalizes and circuit breakers.

Co-ordination of protective devices: General coordination procedure, Various types of coordinated operation of protective devices, Residual Current Circuit Breaker.

UNIT V: COMPENSATION FOR POWER FACTOR IMPROVEMENT

Capacitive compensation for power factor control, Different types of power capacitors,
shunt and series capacitors, Effect of shunt capacitors (Fixed and switched), Power factor correction, Capacitor allocation, Economic justification, Procedure to determine the best capacitor location, Numerical problems.

UNIT VI: VOLTAGE CONTROL

Equipment for voltage control, Effect of series capacitors, Effect of AVB/AVR, Line drop compensation

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET37
Name of the Course	Digital Signal Processing (Professional Elective – V)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Classify Discrete Time Signals, systems, estimate the response of various Systems	K2
CO2	Compute DFT for discrete time signals using FFT Algorithm.	K3
CO3	Describe the various implementations of digital filter structures.	K2
CO4	Analyze and design a Digital filter (FIR&IIR) from the given specifications.	K4
CO5	Use the Multi-rate Processing concepts in various applications.	K2
CO6	Describe the concepts of DSP Processor.	K3

UNIT I: INTRODUCTION

Review of Signals and systems, Digital Signal Processing: Discrete time signals & sequences, Classification of Discrete time Systems, stability of LTI systems. Response of LTI systems to arbitrary inputs. Solution of Linear constant coefficient difference equations. Frequency domain representation of discrete time signals and systems.

UNIT II: DISCRETE FOURIER TRANSFORMS

Introduction to DTFT, Discrete Fourier transforms, Properties of DFT, Introduction to Fast Fourier transforms (FFT) - Radix-2 decimation in time and decimation in frequency FFT Algorithms, Inverse FFT.

UNIT III: REALIZATION OF DIGITAL FILTER

Review of Z-transform, digital filters, Block diagram representation of linear constant coefficient difference equations, Basic structures of IIR systems, Transposed forms. Basic structures of FIR systems.

UNIT IV: DESIGN OF IIR and FIR DIGITAL FILTERS

Analog filter approximations – Butterworth and Chebyshev, Design of IIR Digital filters from Analog filters, Characteristics of FIR Digital Filters, frequency response. Design of FIR Digital Filters using Window Techniques and Frequency Sampling technique, Comparison of IIR & FIR filters.

UNIT V: MULTIRATE DIGITAL SIGNAL PROCESSING

Introduction, Decimation, Interpolation, Sampling rate conversion, Implementation of sampling rate converters, Applications – Sub-band Coding of Speech Signals.

UNIT VI: INTRODUCTION TO DSP PROCESSORS

Introduction to programmable DSPs, Multiplier and Multiplier Accumulator, Modified bus structures and memory access schemes in P-DSPs, Multiple Access Memory, Multiported memory, VLIW architecture, Pipelining, Special addressing modes, On-Chip Peripherals.

TEXT BOOKS:

1. Digital Signal Processing, Principles, Algorithms, and Applications by John G. Proakis, Dimitris G. Manolakis, Pearson Education / PHI, 4th edition, 2007.
2. Discrete Time Signal Processing by A. V. Oppenheim and R.W. Schaffer, 3rd edition, 2010, PHI.

REFERENCE BOOKS:

1. Digital Signal Processing by Andreas Antoniou, TATA McGraw Hill, 2nd edition, 2006
2. Digital Signal Processing by MH Hayes, Schaum's Outlines, TATA Mc-Graw Hill, 2nd edition, 2007.
3. Digital Signal Processing by Alan V. Oppenheim, Ronald W. Schafer, PHI Ed., 2nd edition, 2006
4. Digital Signal Processing by Ramesh babu, Sci Tech publications, 6th edition, 2011.
5. Digital Signal Processing by A. Nagoor Kani, RBA Publications, 2nd edition, 2017.
6. https://nptel.ac.in/courses/117/102/117102060/

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET38
Name of the Course	Digital Control Systems (Professional Elective – V)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand the concepts of digital signal processing	K2
CO2	Solve difference equations and determine pulse transfer functions	K3
CO3	Analyze a discrete time system using state space model	K3
CO4	Determine the stability of a discrete time system	K4
CO5	Design a controller for discrete time system using conventional methods	K4
CO6	Design a controller for discrete time system using state feedback	K4

UNIT – I: INTRODUCTION AND SIGNAL PROCESSING

Introduction to analog and digital control systems – Advantages of digital systems – Typical examples – Signals and processing – Sample and hold devices – Sampling theorem and data reconstruction – Digital to Analog conversion and Analog to Digital conversion Frequency domain characteristics of zero order hold.

UNIT–II: Z-TRANSFORMS

Z-Transform and theorems, finding inverse and method for solving difference equations; Pulse transforms function, block diagram analysis of sampled – data systems.

UNIT–III: STATE SPACE ANALYSIS

State Space Representation of discrete time systems, Pulse Transfer Function Matrix solving discrete time state space equations, State transition matrix and it's Properties, Methods for Computation of State Transition Matrix, Discretization of continuous time state – space equations- Concepts of controllability and observability – Tests(without proof).

UNIT–IV: STABILITY ANALYSIS

Mapping between the S-Plane and the Z-Plane – Primary strips and Complementary Strips – Constant frequency loci, Constant damping ratio loci, Stability Analysis of closed loop systems in the Z-Plane. Jury stability test – Stability Analysis by use of the Bilinear Transformation and Routh Stability criterion.

UNIT – V: DESIGN OF DISCRETE TIME CONTROL SYSTEM BY CONVENTIONAL METHODS

Transient and steady – State response Analysis – Design based on the frequency response method –Bilinear Transformation and Design using frequency response in the w–plane for lag and led compensators and digital PID controllers.

UNIT – VI: STATE FEEDBACK CONTROLLERS AND OBSERVERS

Design of state feedback controller through pole placement – Necessary and sufficient conditions, Ackerman's formula.

TEXT BOOKS:

1. K. Ogata, "Discrete–Time Control systems", Pearson Education/PHI, 2nd Edition.
2. M. Gopal, "Digital Control and State Variable Methods", TMH, 4th Edition.

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET39
Name of the Course	Electrical and Hybrid Vehicles (Professional Elective – V)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Differentiate between Electric vehicles and Hybrid Electric Vehicles	K2
CO2	Discriminate between various Drive-Train Topologies	K2
CO3	Identify different motors used for hybrid electric vehicles.	K2
CO4	Explain the Sizing of Drive Train	K2
CO5	Illustrate different batteries and other energy storage systems.	K3
CO6	Discuss Various issues of energy management strategies	K2

UNIT-I: INTRODUCTION TO ELECTRIC VEHICLES

Conventional Vehicles: Basics of vehicle performance, vehicle power source characterization, transmission characteristics-Social and environmental importance of hybrid and electric vehicles, impact of modern drive-trains on energy supplies.

UNIT-II: DRIVE TRAINS

Hybrid Electric Drive-trains: Basic concept of hybrid traction, introduction to various hybrid drive-train topologies, power flow control in hybrid drive-train.

Electric Drive-trains: Basic concept of electric traction, introduction to various electric drive-train topologies, power flow control in electric drive-train.

UNIT-III: ELECTRIC PROPULSION UNIT

Introduction to electric components used in hybrid and electric vehicles, control of DC Motor drives, Control of Permanent Magnet Motor drives, control of Switch Reluctance Motor drives, drive system efficiency.

UNIT-IV: ENERGY STORAGE

Introduction to Energy Storage Requirements in Hybrid and Electric Vehicles, Battery based energy storage, Fuel Cell based energy storage - Super Capacitor based energy storage - Flywheel based energy storage

UNIT-V: SIZING THE DRIVE SYSTEM

Matching the electric machine and the internal combustion engine (ICE), Sizing the propulsion motor, sizing the power electronics, selecting the energy storage technology, Communications, supporting subsystems

UNIT-VI: ENERGY MANAGEMENT STRATEGIES

Introduction to energy management strategies used in hybrid and electric vehicles, classification of different energy management strategies, implementation issues of energy management strategies.

TEXT BOOKS:

1. Ali Emadi, Advanced Electric Drive Vehicles, CRC Press, 1st edition, 2014.
2. Iqbal Hussein, Electric and Hybrid Vehicles: Design Fundamentals, CRC Press, 1st edition, 2003.

REFERENCE BOOKS:

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	V18	4	-	-	3	V18EET40
Name of the Course	Power System Reforms (Professional Elective – VI)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand fundamentals of power system deregulation and restructuring.	K2
CO2	Compute Available Transfer Capability (ATC)	K3
CO3	Apply methods to reduce congestion	K3
CO4	Compute electricity pricing in deregulated environment	K3
CO5	Understand the power system operation in deregulated environment	K2
CO6	Understand importance of ancillary services	K2

UNIT-I: BASIC ISSUES IN ELECTRIC UTILITIES

Introduction – Restructuring models – Independent system operator (ISO) – Power Exchange – Market operations – Market Power – Stranded cost – Transmission Pricing – Congestion Pricing

UNIT-II: OVERVIEW OF OASIS

Structure of OASIS – Posting of Information – Transfer capability on OASIS –Definitions of Transfer capability – Transfer Capability Issues – ATC calculations – TTC calculations – TRM calculations – CBM calculations – Methods to calculate ATC.

UNIT-III: CONGESTION MANAGEMENT

Introduction to congestion management –Effects of congestion – Methods to relieve congestion – Non market methods –Market Based methods –Management of Inter zonal/Intra zonal Congestion

UNIT-IV: PRICING OF ELECTRICITY

Introduction – Electricity price volatility – Factors effecting volatility – Measuring Volatility – electricity price indexes– Construction of forward price curves – Short–time price forecasting – Factors impacting electricity prices – Forecasting Methods – Analysing forecasting errors – Impact of data pre-processing – Impact of training vectors.

UNIT-V: POWER SYSTEM OPERATION IN DEREGULATED ENVIRONMENT

Introduction – Operational planning activities of ISO – The ISO in pool markets – The ISO in bilateral markets – Operational planning activities of a GENCO– the GENCO in pool markets – The GENCO in bilateral markets.

UNIT-VI: ANCILLARY SERVICES

Introduction – Types of ancillary services – Reactive power as an ancillary service – Synchronous generators as ancillary service providers.

TEXT BOOKS

1. Mohammad Shahidehpour, and Muwaffaqalomoush, – “Restructured electrical Power systems” Marcel Dekker, Inc. 1st edition, 2001
2. Kankar Bhattacharya, Math H.J. Boller, Jaap E. Daalder, ‘Operation of Restructured Power System’ Kluver Academic Publisher, 2nd edition, 2001

REFERENCE BOOKS

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET41
Name of the Course	Energy Storage and Battery Management (Professional Elective – VI)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand need of energy storage systems	K3
CO2	Determine various types of energy storage and various devices used for the purpose	K3
CO3	Examine various real time applications	K3
CO4	Interpret the role of battery management system	K3
CO5	Illustrate the requirements of Battery Management System	K3
CO6	Interpret the concept associated with battery charging / discharging process	K3

UNIT-I: INTRODUCTION TO ENERGY STORAGE

Necessity of energy storage, different types of energy storage, mechanical, chemical, electrical, electrochemical, biological, magnetic, electromagnetic, thermal, comparison of energy storage technologies.

UNIT-II: NEEDSFOR ELECTRICAL ENERGY STORAGE

Emerging needs for EES, More renewable energy, less fossil fuel, Smart Grid uses, the roles of electrical energy storage technologies, the roles from the viewpoint of a utility, the roles from the viewpoint of consumers, the roles from the viewpoint of generators of renewable energy.

UNIT- III: FEATURES OF ENERGY STORAGE SYSTEMS

Classification of EES systems , Mechanical storage systems, Pumped hydro storage (PHS), Compressed air energy storage (CAES), Flywheel energy storage

(FES),Electrochemical storage systems, Secondary batteries, Flow batteries, Chemical energy storage, Hydrogen (H2),Synthetic natural gas (SNG).

UNIT- IV: INTRODUCTION TO BATTERY MANAGEMENT SYSTEM

Introduction to Battery Management System, Cells & Batteries, Nominal voltage and capacity, C rate, Energy and power, Cells connected in series, Cells connected in parallel, Electrochemical and lithium-ion cells, Rechargeable cell, Charging and Discharging Process, Overcharge and Undercharge, Modes of Charging.

UNIT- V: BATTERY MANAGEMENT SYSTEM REQUIREMENT

Introduction and BMS functionality, Battery pack topology, BMS Functionality, Voltage Sensing, Temperature Sensing, Current Sensing, BMS Functionality, High-voltage contactor control, Isolation sensing, Thermal control, Protection, Communication Interface, Range estimation, State-of charge estimation, Cell total energy and cell total power.

UNIT- VI: BATTERY STATE OF CHARGE AND STATE OF HEALTH ESTIMATION, CELL BALANCING

Battery state of charge estimation (SOC), voltage-based methods to estimate SOC, Model-based state estimation, Battery Health Estimation, Lithium-ion aging: Negative electrode, Lithium ion aging: Positive electrode, Cell Balancing, Causes of imbalance, Circuits for balancing

TEXT BOOKS:

1. "James M. Eyer, Joseph J. Iannucci and Garth P. Corey ", "Energy Storage Benefits and Market Analysis", Sandia National Laboratories, 1st edition, 2004.
2. The Electrical Energy Storage by IEC Market Strategy Board.

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EET42
Name of the Course	Switched Mode Power Converters (Professional Elective – VI)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Compute the operation and control of non-isolated switch mode converters	K3
CO2	Explain the operation and control of isolated switch mode converters	K2
CO3	Describe the concepts of resonant converters	K2
CO4	Compute control strategies of switching converters	K3
CO5	Develop modeling of DC-DC converters	K3
CO6	Illustrate controller design based on linearization	K3

UNIT-I: NON-ISOLATEDSWITCHMODECONVERTERS

Control of DC-DC converters: Buck converters, Boost converters, Buck-Boost converter, CUK Converter, continuous and discontinuous operation, Converter realization with non-ideal components.

UNIT-II: ISOLATED SWITCHED MODE CONVERTERS

Forwarded converter, fly back converter, push-pull converter, half-bridge converter, full bridge converter

UNIT- III: RESONANT CONVERTERS

Basic resonant circuit concepts, series resonant circuits, parallel resonant circuits, zero current switching quasi-resonant buck converter, zero current switching quasi-resonant boost converter, zero voltage switching quasi-resonant buck converter, zero voltage switching quasi-resonant boost converter.

UNIT-IV: CONTROL SCHEMES OF SWITCHING CONVERTERS

Voltage control, Current mode control, control scheme for resonant converters. Magnetic design consideration: Transformer design, inductor and capacitor design

UNIT-V: MODELING OF DC-DC CONVERTERS

Formulation of averaged models for buck and boost converters: state space analysis, average circuit models, linearization and small– signal analysis, small-signal models.

UNIT-VI: CONTROLLER DESIGN BASED ON LINEARIZATION

Control design based on linearization: Transfer function of converters, control design, large signal issues in voltage-mode and current-mode control.

TEXT BOOKS:

Semester	**VIII SEM**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EET43**
Name of the Course	**Electrical Machine Design (Professional Elective – VI)**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Study mmf calculation and thermal rating of various types of electrical machines.	**K2**
CO2	To design armature and field systems for D.C. machines.	**K3**
CO3	To design core, yoke, windings and cooling systems of transformers.	**K3**
CO4	To design stator and rotor of induction machines.	**K3**
CO5	To design stator and rotor of synchronous machines and study their thermal behavior	**K3**
CO6	The importance of computer aided design method.	**K3**

UNIT I:DESIGN OF FIELD SYSTEM AND ARMATURE
Major considerations in Electrical Machine Design – Electrical Engineering Materials – Space factor – Choice of Specific Electrical and Magnetic loadings – Thermal considerations – Heat flow – Temperature rise and Insulating Materials – Rating of machines – Standard specifications.

UNIT II: DESIGN OF DC MACHINES
Construction - Output Equations – Main Dimensions – Choice of specific loadings – Selection of number of poles – Design of Armature – Design of commutator and brushes – design of field Computer program: Design of Armature main dimensions.

UNIT III: DESIGN OF TRANSFORMERS
Construction - KVA output for single and three phase transformers – Overall dimensions – design of yoke, core and winding for core and shell type transformers – Estimation of No load current – Temperature rise in Transformers – Design of

Tank and cooling tubes of Transformers. Computer program: Complete Design of single phase core transformer.

UNIT IV: DESIGN OF INDUCTION MOTORS
Construction - Output equation of Induction motor – Main dimensions – choice of specific loadings – Design of squirrel cage rotor and wound rotor –Magnetic leakage calculations – Operating characteristics : Magnetizing current - Short circuit current – Circle diagram - Computer program: Design of slip-ring rotor .

UNIT V: DESIGN OF SYNCHRONOUS MACHINES

Output equations – choice of specific loadings – Design of salient pole machines – Short circuit ratio – Armature design – Estimation of air gap length – Design of rotor –Design of damper winding – Determination of full load field MMF – Design of field winding – Design of turbo alternators.

UNIT VI: DESIGN OF BLDC MACHINES
Computer program: Design of Stator main dimensions-Brushless DC Machines.

TEXT BOOKS:

Annexure III

List courses offered under Open Elective –II & III in VII & VII semesters respectively under V18 Regulation for all other branches:

Open Electives(Offered to the other Departments)						
S. No.	**Course Code**	**Name of the Course**	**L**	**T**	**P**	**Credits**
Open Elective-I: (Approved by BOS)						
1.	V18EEOE1	Energy Audit & Conservation	3	-	-	3
2.	V18EEOE2	Electrical Measuring Instruments	3	-	-	3
3.	V18EEOE3	Industrial Safety	3	-	-	3
Open Elective-II: (For the Approval from BOS)						
1.	V18EEOE4	Non-Conventional Energy Sources	3	-	-	3
2.	V18EEOE5	Electrical Engineering Materials	3	-	-	3
3.	V18EEOE6	Servicing of Electrical Appliances	3	-	-	3
Open Elective-III: (For the Approval from BOS)						
1.	V18EEOE7	Energy Storage Systems	3	-	-	3
2.	V18EEOE8	Basics of Electrical Power Generation	3	-	-	3
3.	V18EEOE9	Industrial Automation	3	-	-	3

Semester	**No. of Credits**
I	16.5
II	19.5
III	22
IV	21
V	24
VI	20
VII	19
VII	18
Total	160

Syllabi for the Courses offering under Open Elective – II & III

Semester	VII SEM	L	T	P	C	Course Code
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EETOE4**
Name of the Course	**Non Conventional Energy Sources (Open Elective-II)**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand the solar radiation and calculate geometric angle	**K3**
CO2	Understand the working of solar thermal collectors	**K2**
CO3	Understand the working of solar photo voltaic systems and develop the maximum power point techniques	**K3**
CO4	Understand the wind energy conversion systems, Betz coefficient and tip speed ratio.	**K2**
CO5	Understand the basic principle and working of hydro and tidal systems.	**K2**
CO6	Understand the basic principle and working of, biomass, fuel cell and geothermal systems.	**K2**

UNIT–I: FUNDAMENTALS OF SOLAR ENERGY AND ENERGY CONSERVATION PRINCIPLE

Energy scenario (world and India) – various forms of renewable energy - Solar radiation: Outside earth's atmosphere –Earth surface– Analysis of solar radiation data –Geometry–Radiation on tilted surfaces– Numerical problems.

UNIT–II: SOLAR THERMAL SYSTEMS

Liquid flat plate collectors: Performance analysis –Transmissivity– Absorptivity product collector efficiency factor –Collector heat removal factor – Numerical problems. Introduction to solar air heaters – Concentrating collectors, solar pond and solar still– solar thermal plants.

UNIT–III: SOLAR PHOTOVOLTAIC SYSTEMS

Solar photovoltaic cell, module, array – construction – Efficiency of solar cells – Developing technologies – Cell I-V characteristics – Equivalent circuit of solar cell –

Series resistance – Shunt resistance – Applications and systems –Balance of system components - System design: storage sizing – PV system sizing – Maximum power point techniques: Perturb and observe(P&O)technique–Hill climbing technique.

UNIT–IV: WIND ENERGY

Sources of wind energy - Wind patterns – Types of turbines –Horizontal axis and vertical axis machines - Kinetic energyofwind–Betzcoefficient–Tip–speedratio–Efficiency–Poweroutputofwindturbine–Selection of generator(synchronous,induction) – Maximum power point tracking –wind farms–Power generation for utility grids.

UNIT–V: HYDRO AND TIDAL POWER SYSTEMS

Basic working principle – Classification of hydro systems: Large, small, micro–measurement of head and flow–Energy equation – Types of turbines – Numerical problems. Tidal power – Basics – Kinetic energy equation – Turbines for tidal power - Numerical problems – Wave power – Basics – Kinetic energy equation – Wave power devices – Linear generators.

UNIT–VI: BIOMASS AND GEOTHERMALSYSTEMS

Fuel classification – Pyrolysis – Direct combustion of heat– Different digesters and sizing. Geothermal: Classification – Dry rock and hot aquifer–Energy analysis–Geothermal based electric power generation

TEXT BOOKS:

1. Solar Energy: Principles of Thermal Collection and Storage, S.P. Sukhatme and J.K. Nayak, TMH, New Delhi, 3rdedition , 2013.
2. Renewable Energy Resources, John Twidell and Tony Weir, Taylor and Francis-2ndedition,2013.

REFERENCE BOOKS:

1. Energy Science: Principles, Technologies and Impacts, John Andrews and Nick Jelly, Oxford University Press, 2ndedition, 2013.
2. Renewable Energy-Edited by Godfrey Boyle- oxford University. Press, 3rd edition, 2013.
3. Hand book of renewable technology Ahmed and Zobaa, Ramesh C Bansal, World scientific, Singapore, 1st edition, 2011.
4. Renewable Energy Technologies, Ramesh & Kumar, Narosa, 1st edition, 1997.
5. Renewable energy technologies– A practical guide for beginners –Chetong Singh Solanki, PHI, 1st edition, 2008.
6. Non-conventionalenergysource–B.H.khan-TMH-2nd edition, 2017.

7. https://nptel.ac.in/courses/121/106/121106014/.

Semester	**VII SEM**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EEOE5**
Name of the course	**Electrical Engineering Materials (Open Elective-II)**					
Branches	**EEE**					

Course Outcomes:
After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Familiarise the properties of different conducting materials and their applications	**K2**
CO2	Analyse the properties of Insulating materials	**K2**
CO3	Understand semi conducting and dielectric materials and their properties	**K2**
CO4	Understand Magnetic materials and their properties	**K2**
CO5	Comprehend the working function of Special purpose materials	**K2**
CO6	Understand and analyse the working of Various Batteries	**K3**

UNIT-I: CONDUCTING MATERIALS

Conducting Materials – Properties -Hardening, Annealing – Its effects- Low Resistive Materials –Requirements – Properties and applications of Copper and Aluminum - Comparison between Copper and Aluminum - ACSR Conductors, AAAC, - High Resistive Materials – Requirements-Properties and applications of Manganin, Eureka, Constantan, Nichrome, Tungsten, Mercury and Carbon-colour coding of resistor.

UNIT-II: INSULATING MATERIALS

Properties -Insulation resistance - Factors effecting Insulation resistance - Classification of Insulating materials - Properties & Applications i) Impregnated paper ii) Wood iii) Cardboard iv) Asbestos v)Mica vi)Ceramics and vii) Glass- Thermo Plastics, Thermo Setting resins – PVC- Effects on PVC- Properties and Applications of Insulating Gases(Air, Nitrogen, Hydrogen and Sulphur Hexa Fluoride).

UNIT- III: SEMICONDUCTING & DIELECTRIC MATERIALS

Semiconductors - Intrinsic and Extrinsic semiconductors- `P’ and `N’ type materials- Distinguish between P-type and N- type Semi-Conductors. Permittivity of different Di-electric materials-Polarization-Dielectric Loss– Applications of Dielectrics- Colour coding of capacitors.

UNIT-IV: MAGNETIC MATERIALS

Classification of magnetic materials - Soft & Hard magnetic materials- B-H Curves – Hysteresis loop - Hysteresis loss - Steinmetz constant - Eddy Current Loss -- Curie Point – Magneto striction.

UNIT-V: SPECIAL PURPOSE MATERIALS

Need of Protective materials – List of Special Purpose Materials (Lead, Paints, Steel Tapes) - Thermocouple - Bi-metals- Fabrication -Soldering- Fuses -Galvanizing and Impregnating-Importance of Nano Materials.

UNIT-VI: BATTERIES

Primary cell and Secondary cells-Lead-Acid, Nickel iron and Nickel - cadmium - Chemical reactions during charging and discharging– Charging of Batteries-Constant Current method and Constant Voltage method-Trickle charging- Capacity of Battery - Ampere-Hour efficiency and Watt-Hour efficiency-Numerical problems on Ampere-Hour efficiency and Watt-Hour efficiency - Maintenance free batteries

TEXT BOOKS:

1. Electrical Engineering Materials – N.I.T.T.T.R Publications, 1st edition, 1959.
2. Introduction to Engineering materials – B. K. Agarwal, 1st edition, 2006.
3. Electrical Engineering Materials by PL Kapoor, Khanna Publishers, New Delhi, 1st edition, 1988.
4. Electrical & Electronics Engineering Materials BR Sharma and Others, Satya Parkashan, New Delhi, 1st edition, 2013.

REFERENCE BOOKS

1. Electronic Components -Dr. K. Padmanabham, laxmi publications (p) Ltd, 1st edition, 2016.
2. Electronic Components -D. V. Prasad
3. Material science for Electrical and Electronic Engineers – Ian P. Jones, Oxford Publications, 1st edition, 2000.
4. Electrical and Electronic Engineering Materials by SK Bhattacharya, Khanna Publishers, New Delhi Electronic Components and Materials by Grover and Jamwal, Dhanpat Rai and Co., New Delhi, 1st edition, 1996.
5. Electrical Engineering Materials by Sahdev, Unique International Publications
6. Electronic Components and Materials by SM Dhir, Tata McGraw Hill, New Delhi, 1st edition, 2006.
7. Electronic Engineering Materials by ML Gupta, Dhanpat Rai & Sons, New Delhi

Semester	VII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EEOE6
Name of the Course	Servicing of Electrical Appliances (Open Elective-II)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand Testing of Electrical Domestic Appliances	**K2**
CO2	Understand maintenance of U.P.S and SMPS	**K2**
CO3	Understand Maintenance of Electrical Power devices	**K2**
CO4	Understand Safety procedure	**K2**
CO5	Understand Departmental Tests	**K2**
CO6	Understand Rural electrification and Indian Electricity Act	**K2**

UNIT-I: TESTING OF ELECTRICAL DOMESTIC APPLIANCES

Tools & meters required for testing and repair of Domestic appliances-Principle, construction & working with fault finding, dismantling, assembling and testing after repair of the Domestic appliances.

Note: Suitable tests to be conducted on the above Electrical Domestic appliances are Open circuit, Short circuit, Earth fault and Leakage tests.

UNIT-II: U.P.S AND SMPS

Commercial power supply-Disturbances and Spikes in voltages-UPS-SMPS

UNIT- III: MAINTENANCE OF ELECTRICAL POWER DEVICES

Preventive and periodical maintenance schedule of the following electrical power devices. i.e Batteries (Dry / Wet), UPS / Inverters, DC & AC Motors, Motor starters (AC & DC), Air conditioners, Power transformers, Pole mounted & Plinth mounted transformer yards, Circuit breakers.

UNIT-IV: SAFETY

Need of safety - Equipment used in Electrical and general safety - Different types of Electrical hazards / accidents - Causes of different Electrical hazards / accidents - Methods to avoid Electrical hazards / accidents - First-Aid methods followed to rescue a person met with Electric shock - Do's & Don't's of Electrical supervisor at Electrical substations - Different fire extinguishers- operation and application of different fire extinguishers.

UNIT-V: DEPARTMENTAL TESTS

Electrical installation testing - departmental procedure for testing before giving service connection – departmental procedure for obtaining service connection - desirable insulation resistance for domestic and power circuits – Tests for measuring insulation resistance - procedure for conducting insulation resistance test and continuity tests, earth continuity test

UNIT-VI: RURAL ELECTRIFICATION AND INDIAN ELECTRICITY ACTS.

Design of rural electrification scheme - Load survey-determination of capacity of transformer - estimation of quantity of materials required for the erection of distribution lines and 11 kV feeder from a nearby 11 kV feeder - determining the economic feasibility of the scheme as per the procedure laid out in NEC, - Indian Electricity Act-2003 rules related to domestic and Industrial lighting- power, agricultural and earthing installations, erection of 11 kV, 400 Volt

TEXT BOOKS:

1. Operation & Maintenance of Electrical Machines Vol – I by B.V.S. Rao - Media Promoters & Publisher, 1963.
2. Operation & Maintenance of Electrical Machines Vol – II by B.V.S. Rao - Media Promoters & Publisher, 1967.
3. Study of Electrical Appliances and devices by K. B. Bhatia, Khanna Publishers, New Delhi, 1st edition, 1988.

REFERENCE BOOKS:

1. Preventive Maintenance by C.J. Hubert, zs
2. Testing, Commissioning Operation & Maintenance of Electrical equipment by S. Rao
3. Indian Electricity Act-2003
4. APERC regulation Act (www.aperc.gov.in)
5. Electrical Installation design and drawing by CR Dargar -New Asian publishers

Semester	**VIII SEM**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**-**	**-**	**3**	**V18EEOE7**
Name of the Course	**Energy Storage Systems (Open Elective-III)**					
Branches	**EEE**					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Identify the Factors for the Need of Energy Storage	**K2**
CO2	Classify various types of energy Storages	**K2**
CO3	Describe the performance factors of Energy Storage Systems.	**K2**
CO4	Describe charging patterns in Battery Storage Systems	**K2**
CO5	Identify Various Types of Fuel Cells	**K2**
CO6	Identify various applications of Electrical Storage	**K2**

UNIT – I: NEED FOR ENERGY STORAGE

Electricity and the roles of EES, High generation cost during peak-demand periods, Long distance between generation and consumption-Variations in Energy Demand Variations in Energy Supply - Interruptions in Energy Supply - Transmission Congestion - Demand for Portable Energy

UNIT-II: TYPES OF ENERGY STORAGE SYSTEMS

Potential energy -pumped hydro, compressed air, springs - Kinetic energy - mechanical flywheels - Thermal energy with phase change-ice, molten salts, steam - Chemical energy-hydrogen, methane, gasoline, coal, oil - Electrochemical energy-batteries, fuel cells, Electrostatic energy -capacitors, Electromagnetic energy-superconducting magnets.

UNIT-III: PERFORMANCE FACTORS OF ENERGY STORAGE SYSTEMS

Energy capture rate and efficiency - Discharge rate and efficiency - Dispatch ability and load flowing characteristics, scale flexibility, durability – Cycle lifetime, mass and safety – Risks of fire, explosion, toxicity - Ease of materials, recycling and recovery -Environmental consideration and recycling

UNIT-IV: BATTERY STORAGE SYSTEM

Introduction with focus on Lead Acid and Lithium - Chemistry of Battery Operation, Power storage calculations, Reversible reactions, Charging patterns, Battery Management system.

UNIT-V: FUEL CELL

Fuel Cell-Construction-Working Principle-Types of Fuel Cells-Polymer electrolyte membrane Fuel Cell-Alkaline Fuel Cell-Solid oxide Fuel Cell-Merits and Demerits

UNIT – VI: APPLICATIONS OF ELECTRICAL ENERGY STORAGE

Waste heat recovery-Solar energy storage- Power plant applications-Energy storage in automotive applications

TEXT BOOKS:

1. Doughty Liaw, Narayan and Srinivasan, “Batteries for Renewable Energy Storage".
2. The Electroc Jiujun Zhang, Lei Zhang, Hansan Liu, Andy Sun, Ru-Shi Liu, “Electrochemical Technologies for Energy Storage and Conversion", John Wiley and Sons, 2012.hemical Society, New Jersy, 2010.
3. Detlef Stolten, "Hydrogen and Fuel Cells: Fundamentals, Technologies and Applications ", Wiley, 2010.

REFERENCE BOOKS:

1. The Electrical Energy Storage by IEC Market Strategy Board.

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EETOE8
Name of the Course	Basics of Electrical Power Generation (Open Elective-III)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand the various energy sources, substations and switchgear devices.	K2
CO2	Understand the principle of operation of different components of thermal power stations.	K2
CO3	Understand the principle of different components of a Nuclear power stations.	K2
CO4	Understand the principle of operation of different components of hydro power stations.	K2
CO5	Understand the working of solar photo voltaic systems and applications.	K3
CO6	Understand the wind energy conversion systems, efficiency and power generation.	K2

UNIT–I: FUNDAMENTALS OF ELECTRICAL POWER SYSTEM

Energy scenario (world and India) – various Conventional and non-conventional energy sources–structure of electric power system: generation, transmission, distribution- classification of substations-switchgear devices: switches, fuses, relay, MCB.

UNIT–II: THERMAL POWER STATIONS

Schematic arrangement- Selection of site- general layout of a thermal power plant showing paths of coal, steam, water, air, ash handling system: generation, transmission, distribution and flue gasses, ash handling system- Brief description of components: Boilers, Super heaters, Economizers, electrostatic precipitators Condensers, feed water circuit, Cooling towers and Chimney.

UNIT–III: NUCLEAR POWER STATIONS

Location of nuclear power plant, Working principle, Nuclear fission, Nuclear fuels, Nuclear chain reaction, nuclear reactor Components: Moderators, Control rods, Reflectors and Coolants. Types of Nuclear reactors, Radiation: Radiation hazards and Shielding, nuclear waste disposal.

UNIT–IV: HYDRO POWER STATIONS

Schematic arrangement, advantages and disadvantages, choice of site constituents of hydro power plant, Hydro turbine. Environmental aspects for selecting the sites and locations of hydro power stations.

UNIT–V: SOLAR POWER PLANT

Solar photovoltaic cell, module, array – construction of power plant– Efficiency of solar cells – Cell I-V characteristics – Equivalent circuit of solar cell – Series resistance – Shunt resistance – Applications and systems - System design: storage sizing – PV system sizing.

UNIT–VI: WIND POWER PLANT

Sources of wind energy - Wind patterns – Types of turbines –Horizontal axis and vertical axis machines - construction of power plant –Efficiency– Poweroutputofwindturbine–Selectionofgenerator(synchronous,induction) –Power generation for utility grids.

Semester	VIII SEM	L	T	P	C	Course Code
Regulation	V18	3	-	-	3	V18EEOE 9
Name of the Course	Industrial Automation (Open Elective-III)					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand the basic concepts of control systems.	K3
CO2	Understand the concepts of industrial automation and components of control system.	K3
CO3	Illustrate the concepts of electrical actuators and controllers.	K3
CO4	Analyse the Control Procedures in Control systems	K4
CO5	Analyse the Process control	K4
CO6	Understand the concept of PLC and its application	K3

UNIT-I: BASIC CONCEPTS OF CONTROL SYSTEMS

Basic concepts-Definition of open loop and closed loop system, examples with block diagrams. Terms used in the control systems-Types of feedback-Transfer function Definition &derivation control systems- Equivalence of physical system components

UNIT-II: INTRODUCTION TO INDUSTRIAL AUTOMATION

Need of Automation and its requirements, Structure & components Industrial Automation systems, Architectural levels of Industrial controls. Components of control systems-Contact types-Normally open & Normally closed, Solenoids-AC/DC, Input devices Push button, Selector switch, Photo electric, Level Control, Pressure sensing device, Output devices- contactors, valves, Pilot lamps, Relays-Electromagnetic and Reed Relay

UNIT- III: ELECTRICAL ACTUATORS AND CONTROLLERS

Potentiometers –working principle, AC & DC Servomotors-working principle, working of Synchro's - transmitter, control transformer, concept and purpose of a Tacho –generator

UNIT-IV: CONTROL PROCEDURES IN CONTROL SYSTEMS

Types of control systems-Time Variant/ Invariant systems, Continuous data and sampled data system, Linear and Non-Linear control system, Digital Control system Concept of controllers- P Controller, I Controller, PI Controller, PD Controller, PID Controller

UNIT-V: PROCESS CONTROL

Introduction to process control, PID control, controller tuning, implementation of PID controllers, speed control structures- feed forward and ratio control, predictive control, cascade, override and split range control.

UNIT-VI: PLC AND ITS APPLICATIONS

PLC Definition-advantages-Block diagram-Ladder diagrams for AND, OR, NOT, NAND, NOR-Instruction set-Ladder diagram for DOL starter, Star-Delta Starter, Stair case lighting, Traffic light control, Temperature controller-Special control systems DCS, SCADA.

6.	V20EES06	Industrial Automation with PLC

Annexure- V

Syllabi for the course offered in III & IV Semesters of B. Tech by Department of EEE under V20 Regulation

Semester	III SEM	L	T	P	C	Course Code
Regulation	V20	3	-	-	3	V20EET04
Name of the Course	Electrical Circuit Analysis –II					
Branches	EEE					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Determine electrical parameters for 3-phase unbalanced systems	K3
CO2	Apply the network theorems for solving electrical circuits.	K3
CO3	Analyze circuit parameters under transient conditions	K3
CO4	Calculate two-port network parameters for any type of electrical networks	K3
CO5	Understand the concept of filters	K2

Unit-I: Unbalanced Three phase circuits

Unbalanced star connected load supplied from: Balanced 3-ϕ, 4-wire system and balanced 3-ϕ, 3-wire system using Millman's, Mesh/Loop and Star-Delta transformation methods; Unbalanced delta connected load supplied from: Balanced 3-ϕ, 3-wire system; Measurement of 3-ϕ active power using two wattmeter method; Measurement of 3-ϕ reactive power using one wattmeter method; Numerical Problems.

Unit-II: Network Theorems (DC & AC Excitations)

Superposition, Thevenin's, Norton's, Milliman's, Reciprocity, Compensation, Maximum Power Transfer, Tellegen's theorems; Problem solving for the network consisting of independent and dependent sources; Concept of Duality and Dual networks.

Unit-III: Transient analysis in DC and AC Circuits

Initial Conditions; Analysis of R-L, R-C and R-L-C circuits with DC and AC excitations using differential equations and Laplace transforms; Numerical Problems.

Unit-IV: Two-Port Networks

Basic Definitions; Z-parameters; Y-parameters; Transmission line (ABCD) parameters; h-parameters; Relationship between parameter sets; Series, Parallel and Cascade connections of two port networks; Problem solving for the network consisting of independent and dependent sources.

Unit-V: Passive Filters

Classification of filters; Analysis and Design of low pass, high pass, band pass and band stop filters (Constant-k & m-derived); Low Pass and High Pass Filters with RC and RL Circuits; Band Pass and Band Stop Filters with RLC Circuit.

Text Books:

1. Engineering Circuit Analysis by William Hayt and Jack E. Kemmerley, McGraw Hill Company,6th edition,Jan 2005
2. Network Analysis by Van Valkenburg, Prentice-Hall of India Private Ltd, revised 3rd edition, 15 April 2019
3. Circuit Theory (Analysis and Synthesis) by A.Chakrabarthi, DhanpatRai& Co.,7th revised edition,1 Jan 2018
4. Network Analysis and Synthesis by Ravish R Singh, Mc Graw Hill Education (I) Pvt. Ltd., 2nd edition, 1 may 2019

Reference Books:

1. Network Theory-Analysis and Synthesis by Smarajit Ghosh, PHI Publishers, 9th edition, Aug 2015
2. Network Theory by N.C. Jagan, C. Lakshminarayana, Anshan Publications, 2nd edition September 30, 2005
3. Fundamentals of Electrical Circuits by Charles K. Alexander and Mathew N.O. Sadiku, McGraw Hill Education (India), 5th edition, 1st july 2013
4. Network Analysis by C.L.Wadhwa, New Age International Publishers., 3rd edition, 1 Aug 2018
5. Electrical Circuit Analysis by Sudhakar A. & Shyammohan S. Palli, McGraw Hill Publication, 5th edition 1 july 2017
6. Introductory Circuit Analysis by Robert L Boylestad, Pearson Publications,12th edition,1st Jan 2013
7. https://nptel.ac.in/courses/108/105/108105159/

Semester	III SEM	L	T	P	C	Course Code
Regulation	V20	3	-	-	3	V20EET05
Name of the Course	Electro Magnetic Fields					
Branches	EEE					

Course Outcomes:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
CO1	Compute the electric field and potential due to different configurations of static charges and electric dipole.	K3
CO2	Calculate the capacitance of various configurations and understand the concept of conduction and convection current densities.	K3
CO3	Apply the Biot-Savart‘s law and Amperes Circuital Law for finding MFI for different cables and develop the Maxwell equations.	K3
CO4	Determine the magnetic forces, torque produced by currents in magnetic fields, self-inductance of solenoid and toroid.	K3
CO5	Calculate the induced E.M.F‘s and understand the concept of fields varying with time.	K3

Unit-I: Electrostatics

Electrostatic Fields; Coulomb‘s Law; Electric Field Intensity (EFI) - EFI due to a line and a surface charges; Work done in moving a point charge in an electrostatic field; Electric Potential - Properties of potential function, Potential gradient; Guass‘s law; Maxwell‘s first law, div(D)=ρv; Laplace‘s and Poison‘s equations; Electric dipole - Potential and EFI due to an electric dipole, Torque on an Electric dipole placed in an electric field.

Unit-II: Conductors, Dielectrics and Capacitance Conductors & Dielectrics

Conductors - Behavior of conductors in an electric field; Dielectrics - Polarization; Electric boundary conditions.

Capacitance: Capacitance of parallel plates, spherical and coaxial cables with composite dielectrics; Energy density in a static electric field; Current density - Conduction and Convection current densities; Ohm‘s law in point form, Equation of continuity.

Unit-II: Magneto Statics

Introduction; Biot-Savart‘s law; Magnetic Field Intensity (MFI) - MFI due to a straight current carrying filament, circular, square and solenoidal current carrying wires; Maxwell‘s second Equation i.e, div(B)=0.

Ampere‘s circuital law - MFI due to an infinite sheet of current, long filament current carrying conductor, Pointform of Ampere‘s circuital law; Maxwell‘s third equation i.e, Curl (H)=J.

Unit-IV: Forces in Magnetic fields and Inductance

Magnetic force; Behavior of charges moving in magnetic field; Lorentz force equation; Force on a current carrying element placed in a magnetic field; Force on a straight and a long current carrying conductor placed in a magnetic field; Force between two straight long and parallel current carrying conductors; Magnetic dipole - a differential current loop as a magnetic dipole, Torque on a current loop placed in a magnetic field; Inductance: Basic expressions for self and mutual inductances, self-inductance of a solenoid and toroid.

Unit-V: Time Varying Fields

Introduction; Integral and point forms of faraday‘s laws of electromagnetic induction; statically and dynamically induced EMFs; Maxwell‘s fourth equation, Curl (E) = $-\partial B/\partial t$; Modification of Maxwell‘s equations for time varying fields; Simple problems.

Text Books:

1. Engineering Electromagnetics by William H. Hayt& John. A. Buck Mc. Graw-Hill Companies, 7th Editon.2006.
2. Electromagnetic Fields by R MeenaKumari, R Subhasri, New Age International, 2nd edition, Jan 2007.
3. Elements of Electromagnetics by Matthew N.O. Sadiku, Oxford University Press, 4th edition, 1 Jan 2006

Reference Books:

1. Introduction to Electro Dynamics by D J Griffiths, Prentice-Hall of India Pvt. Ltd, 4th edition, 1st Jan 2015
2. Electromagnetic Field Theory by Yaduvir Singh, Pearson., 1st edition 23 April 2011
3. Fundamentals of Engineering Electromagnetics by Sunil Bhooshan, Oxford higher education., 1st edition 30 june 2012

4. https://nptel.ac.in/courses/108/106/108106073/

Semester	III SEM	L	T	P	C	Course Code
Regulation	V20	3	-	-	3	V20EET06
Name of the Course	Electrical Machines – I					
Branches	EEE					

Course Outcomes:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
CO1	Asses the performance of a DC Machines	K3
CO2	Understand the torque production mechanism and control the speed of DC Machines	K2
CO3	Asses the performance of single phase transformers	K3
CO4	Calculate the regulation, losses and efficiency of single phase transformers	K3
CO5	Understand the parallel transforms, control voltages with tap changing methods and achieve three phase to two phase transformation	K2

Unit-I: Introduction and Performance of DC machines

Construction and principle of operation of DC machine; EMF equation of DC generator; Classification of DC machines based on excitation; Magnetization Characteristics of DC shunt generator, DC machine acts as a motor - back-emf and Torque, Armature Reaction and Commutation; Characteristics of separately-excited, shunt, series and compound motors; losses and efficiency of a DC machine; Applications of DC motors

Unit-II: Starting, Speed Control and Testing of D.C. Machines

Necessity of Starter - Working of 3-Point and 4-Point Starters; Speed Control of DC shunt motor by armature voltage and field flux control; Testing of DC machines - Brake Test, Swinburne‘s method, Hopkinson‘s Test, Retardation Test; Simple Numerical Problems.

Unit-III: Single-phase Transformers

Types, Constructional details, Principle of operation, EMF Equation of a 1-Φ Transformer; Transformer operation on No-Load and On-Load for lagging, leading and unity power factors loads and their phasor diagrams; Transformer equivalent circuit; Transformer Regulation, Losses and efficiency; effect of variation of supply frequency and voltage on losses; All day efficiency.

Unit-IV: Testing of Single-phase Transformers

O.C. and S.C. tests; Sumpner‘s test; Separation of losses of a 1-Φ transformer; Parallel operation with equal voltage ratios; Auto Transformer - equivalent circuit, comparison with two winding transformers.

Unit-V:-3-Phase Transformers

Poly-phase connections, Y/Y, Y/Δ, Δ/Y, Δ/Δ and open-Δ; Scott Connection; Three winding Transformer: Determination of Zp, Zs and Zt; Off-load and On-load tap changers.

Text Books:

1. Electrical Machines by P.S. Bhimbra, Khanna Publishers.7th edition 1st Jan 1977

2. Theory & Performance of Electrical Machines by J. B. Guptha. S. K. Kataria& Sons. 15th edition 2015

Reference Books:

1. Electrical Machines by D. P.Kothari, I .J .Nagarth, Mc Graw Hill Publications, 5thedition 23 june 2017

2. Electrical Machines by R. K. Rajput, Lakshmi publications, 5th edition, 1st Jan 2016

3. Electrical Machinery by Abijith Chakrabarthi and Sudhipta Debnath, McGraw Hill

Education 1st edition 9th Feb 2015

4. Electrical Machinery Fundamentals by Stephen J Chapman, McGraw Hill education

4th edition 1st july 2017

5. Electric Machines by Mulukutla S. Sarma & Mukeshk. Pathak, CENGAGE Learning., 1st edition 1st November 2009

6. Electric Machinery by A. E. Fitzgerald, Charles kingsley, Stephen D. Umans, TMH 6th edition 16th Aug 2002

7.https://nptel.ac.in/courses/108/105/108105155/

Semester	III SEM	L	T	P	C	Course Code
Regulation	V20	0	0	3	1.5	V20EEL04
Name of the Course	Electrical Circuits Laboratory					
Branches	EEE					

Course Outcomes:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
CO1	Compute response in the electrical circuits using various Network theorems	K3
CO2	Sketch Locus Diagrams of RL and RC Series Circuits	K2
CO3	Find parameters of the circuit under resonance conditions	K3
CO4	Determine two port network parameters	K3
CO5	Calculate 3phase power and choke coil parameters	K3

Any 10 experiments are to be conducted

1. Verification of KVL and KCL
2. Verification of Thevenin‘s and Norton‘s Theorems
3. Verification of Superposition and Reciprocity Theorem
4. Verification of Compensation and Millmann‘s Theorems.
5. Verification of Maximum Power Transfer Theorem.
6. Locus Diagrams of RL and RC Series Circuits.
7. Time Response of first order RC and second order RLC Networks.
8. Series and Parallel Resonance
9. Determination of Z and Y parameters.
10. Determination of Transmission and hybrid parameters.
11. Determine the Parameters of a choke coil
12. Measurement of 3-phase Power by two Wattmeter Method for unbalanced loads

Semester	IV SEM	L	T	P	C	Course Code
Regulation	V20	3	-	-	3	V20EET07
Name of the Course	Signals and Systems					
Branches	EEE					

Course Outcomes
After Successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand and estimate various types of signals and systems.	(K2)
CO2	Understand the basic principles of Sampling Theorem.	(K2)
CO3	Understand the characteristics of LTI Systems	(K2)
CO4	Understand the concepts of Cross-Correlation and Auto-Correlation of Functions	(K2)
CO5	Apply the concept of ROC for Laplace Transform and Z transform, Inverse Z transforms.	(K3)

Unit-I:Introduction

Definition of Signals and Systems, Classification of Signals, Classification of Systems, Operations on signals: time-shifting, time-scaling, amplitude-shifting, amplitude-scaling. Problems on classification and characteristics of Signals and Systems. Complex exponential and sinusoidal signals, Singularity functions and related functions: impulse function, step function signum function and ramp function. Analogy between vectors and signals, orthogonal signal space, Signal approximation using orthogonal functions, mean square error, closed or complete set of orthogonal functions, Orthogonality in complex functions.

Unit–II: Sampling theorem

Graphical and analytical proof for Band Limited Signals, impulse sampling, Natural and Flat top Sampling, Reconstruction of signal from its samples, effect of under sampling – Aliasing, Introduction to Band Pass sampling.

Unit-III: Linear Time Invariant (LTI) System

Linear- nonlinear, Time variant-invariant, casual - non-casual, static-dynamic, stable-unstable, invertible. Convolution sum and convolution integral using graphical methods for different signals (Time domain).

Unit-IV: Cross-Correlation And Auto-Correlation of Functions

Properties of correlation function, Energy density spectrum, Parseval's theorem, Power density spectrum, Relation between auto correlation function and energy/power spectral density function. Relation between convolution and correlation, Detection of periodic signals in the presence of noise by correlation, Extraction of signal from noise by filtering.

Unit –V: Transforms

Concept of region of convergence (ROC) for Laplace transforms, constraints on ROC for various classes of signals, Distinction between Laplace, Fourier and Z transforms. Region of convergence in Z-Transform, constraints on ROC for various classes of signals, Inverse Z-transform, properties of Z-transforms.

Text Books:

1. Signals, Systems & Communications - B.P. Lathi, BS Publications, 2008.
2. Signals and Systems - A.V. Oppenheim, A.S. Willsky and S.H. Nawab, PHI, 2nd Edn, 1996.
3. Signals & Systems- Narayan Iyer and K Satya Prasad, Cenage Publications, 1st Edition 2011.

Reference Books:

1. Signals & Systems - Simon Haykin and Van Veen, Wiley, 2nd Edition, 2017.
2. Principles of Linear Systems and Signals – BP Lathi, Oxford University Press, 2015
3. Signals and Systems – K Raja Rajeswari, B Visweswara Rao, PHI, 2nd Edition 2014
4. Fundamentals of Signals and Systems- Michel J. Robert, MGH International Edition,2008.
5. Signals and Systems – T K Rawat , Oxford University press, 2011

NPTEL Link : https://nptel.ac.in/courses/117/101/117101055/

Semester	IV SEM	L	T	P	C	Course Code
Regulation	V20	3	-	-	3	V20EET08
Name of the Course	Electrical Machines – II					
Branches	EEE					

Course Outcomes:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
CO1	Explain the operation and performance of three phase induction motor	**K2**
CO2	Assess the torque-speed relation, performance of induction motor and induction generator	**K3**
CO3	Explain the torque production mechanism and starting of single phase induction motors	**K2**
CO4	Asses the performance of synchronous generators by determining its voltage regulation	**K3**
CO5	Explain the operation and performance of Synchronous Motors	**K2**

Unit-I: 3-Phase Induction Motors

Construction details of cage and wound rotor machines; Production of rotating magnetic field; Principle of operation; Rotor EMF, Rotor frequency, Rotor Current and p.f. at standstill and during running conditions; Rotor power input; rotor copper losses; Mechanical power developed and their interrelationship; Equivalent circuit; Phasor diagram.

Unit-II: Characteristics, starting and testing methods of Induction Motors

Torque equation; expressions for maximum torque and starting torque; torque-slip characteristics; double cage and deep bar rotors construction; crawling and cogging; speed control of induction motor with V/f method; no-load and blocked rotor tests (construction of circle diagram for predetermination of performance parameters); methods of starting, soft starters; induction generator operation (Qualitative treatment only).

Unit-III: Single Phase Motors

Constructional features and its equivalent circuit; Problem of starting – Double revolving field theory; Starting methods; shaded pole motors; AC Series motor.

Unit-IV: Alternators

Constructional features of non–salient and salient pole type alternator; Armature windings – Distributed and concentrated windings; Distribution, Pitch and Winding factors; E.M.F equation; Improvements of waveform and armature reaction; Voltage regulation by synchronous impedance method, MMF method and Potier triangle method; Phasor diagrams; Two reaction analysis of salient pole machine and phasor diagram; Parallel operation of alternators, Numerical problems.

Unit-VI: Synchronous Motors

Principle and theory of operation of Synchronous Motor; Phasor diagram; Starting torque; Variation of current and power factor with excitation; Synchronous condenser; Mathematical Analysis for power developed; Hunting and its suppression; Methods of starting.

Text Books:

1. Electrical Machines by P.S. Bhimbra, Khanna Publishers , Edition-2,2021
2. Theory & Performance of Electrical Machines by J. B. Guptha. S. K. Kataria & Sons , Edition-2,2013
3. Electrical Machinery Fundamentals by Stephen J Chapman McGraw Hill education 5th edition 2011

Reference Books:

1. Electrical Machines by D. P. Kothari, I .J .Nagarth, McGrawHill Publications, 5th edition,2017
2. Electrical Machines by R. K .Rajput, Lakshmi publications, 5th edition, 2016
3. Electrical Machinery by Abijith Chakrabarthi and Sudhipta Debnath, McGraw Hill education 2015
4. Electric Machines by Mulukutla S. Sarma & Mukeshk .Pathak, CENGAGE Learning.
5. Electric Machinery by A.E.Fitzgerald, Charles kingsley, Stephen D.Umans, TMH

NPTEL Link : https://nptel.ac.in/courses/108/105/108105131/

Semester	IV SEM	L	T	P	C	Course Code
Regulation	V20	3	-	-	3	V20EET09
Name of the Course	Electrical and Electronic Measurements					
Branches	EEE					

Course Outcomes:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
CO1	Identify the proper instrument for measurement of AC or DC voltages and currents	K2
CO2	Choose the suitable instrument for the measurement of power and energy.	K3
CO3	Compute the electrical parameters by using appropriate bridge.	K3
CO4	Calculate different magnetic parameters by using magnetic instruments and Understand the operation of potentiometer.	K3
CO5	Understand the operation of various digital instruments.	K2

Unit-I: Electromechanical Indicating Instruments

Classification of measuring instruments; Construction and principle of operation of PMMC, MI instruments; Extension of instrument ranges using shunts, multipliers; Numerical Problems.

Instrument Transformers: Ratio and Phase angle errors (Derivation & Phasor Diagram) and their applications in the extension of instrument ranges, Numerical Problems.

Unit-II: Power and Energy Measurement

Single phase dynamometer wattmeter (LPF and UPF), expression for deflecting and control torques; Type of P.F. Meters; Single phase induction type energy meter, Driving and braking torques, errors and compensations, testing by phantom loading using R.S.S. meter; Numerical Problems.

Unit-III: Measurement of Parameters

Measurement of Resistance: wheat stone‘s bridge and its Sensitivity; Ohm meter; Kelvin‘s double bridge; Loss of charge method; Earth resistance measurement by fall of potential method and megger.

Measurement of inductance & Q-Factor: Maxwell‘s bridge; Hay‘s bridge; Anderson‘s bridge.

Measurement of capacitance and loss angle: Desauty‘s Bridge; Schering Bridge.

Unit-IV: Magnetic Measurements & Potentiometers

Magnetic Measurements: Constructional details of Flux meter; Determination of B–H Loop: Methods of reversals and Step-by-Step method; Core loss measurements by Maxwell‘s and Campbell‘s Bridges, D.C. & A.C. Crompton‘s potentiometer and their applications.

Unit-V: Electronic Instruments

Introduction; Digital Voltmeters (DVM); Ramp type DVM; Integrating type DVM; Successive-approximation DVM; Q- Meter, Digital frequency meter, Digital Tachometer; Measurement of phase difference & Frequency by using lissajous patterns in CRO; Electronic Multi meter.

Text Books:

1. A course in Electrical& Electronic Measurement and Instrumentation by A. K. Sawhney, Dhapat Rai& Co. 2015
2. Electronic Instruments by H.S. Kalsi, Tata Mc-Graw hill. 7th edition 2017

Reference Books:

1. Electrical and Electronic Measurements and instrumentation by R. K. Rajput, S.Chand. 2016
2. Digital Instrumentation by A.J. Bouwens, Tata Mc-Graw hill.
3. Modern Electronic instrumentation & Measuring instruments by A.D. Heltric & W.C. Copper, Wheeler Publication. 2015
4. Instrument transducers by H.K.P. Neubert, Oxford University press.
5. Electrical Measurements by Forest K. Harris, John Wiley and Sons.
6. **NPTEL Link** : https://nptel.ac.in/courses/108/105/108105153/

Semester	IV SEM	L	T	P	C	Course Code
Regulation	V20	3	-	-	3	V20EET10
Name of the Course	Electrical Power Generation & Transmission					
Branches	EEE					

Course Outcomes:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
CO1	Understand the working of conventional power generating stations	K2
CO2	Calculate various factors of load, insulation resistance and power factor of the cables.	K3
CO3	Compute the resistance, inductance and capacitance of transmission lines	K3
CO4	Determine the various transmission line parameters	K3
CO5	Calculate the corona loss, sag and tension in transmission lines	K3

Unit-I: Power Generating Stations

Introduction to renewable and non-renewable energy sources - general layout of a thermal power plant and its Components-General layout of Nuclear power plant - Nuclear fission and Chain Reaction –General Layout of Hydel power plant and Description of its main components- General Layout of Solar and wind Power plants.

Unit-II: Economic Aspects of Power Generation, Tariffs and Cables

Load curve- load duration and integrated load duration curves- discussion on economic aspects: connected load, maximum demand, and demand factor. Different Tariff methods. Construction of cables, Types of Cables, Calculation of insulation resistance and power factor of the cable.

Unit-III: Transmission Line Parameters

Conductor materials: Types of conductors – Calculation of resistance for solid conductors – Calculation of inductance for single phase– Single and double circuit lines–Concept of GMR and GMD–Symmetrical and asymmetrical conductor configuration with and without transposition–Bundled conductors-Numerical

Problems–Calculation of capacitance for 2 wire– Effect of ground on capacitance – Capacitance calculations for symmetrical and asymmetrical for single phase– Numerical Problems.

Unit-IV: Modeling of Transmission Lines

Classification of Transmission Lines: Short, medium and their model representations –Nominal-T–Nominal-Pie and A, B, C, D Constants for symmetrical and Asymmetrical Networks— Evaluation of A,B,C,D Constants– regulation and efficiency-Numerical problems-Surge Impedance –Surge Impedance loading-Wavelengths and Velocity of Propagation.

Unit-V: Sag and Tension Calculations and Overhead Line Insulators

Skin and Proximity effects – Ferranti effect – Charging Current –Shunt Compensation –Corona – Description of the phenomenon–Factors affecting corona- Sag and Tension calculations with equal and unequal heights of towers–Effect of Wind and Ice on weight of Conductor–Numerical Problems

Semester	IV SEM	L	T	P	C	Course Code
Regulation	V20	0	0	3	1.5	V20EEL05
Name of the Course	Electrical Machines-I Lab					
Branches	EEE					

Course Outcomes:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
CO1	Sketch the magnetizing characteristics of DC shunt generator	K3
CO2	Determine and predetermine the performance of DC machines	K3
CO3	Apply different methods to control the speed of the DC motors	K3
CO4	Assess the performance of transformers	K3
CO5	Convert three phase supply to two phase	K2

Any 10 of the following experiments are to be conducted

1. Magnetization characteristics of DC shunt generator: Determination of critical field resistance and critical speed.
2. Brake test on DC shunt motor. Determination of performance curves.
3. Hopkinson‘s test on DC shunt machines. Predetermination of efficiency.
4. Swinburne‘s test and Predetermination of efficiencies as Generator and Motor.
5. Speed control of DC shunt motor by Field and armature Control.
6. Retardation test on DC shunt motor. Determination of losses at rated speed.
7. Separation of losses in DC shunts motor.
8. OC & SC test on single phase transformer.
9. Sumner‘s test on single phase transformers.
10. Scott connection of transformers.
11. Parallel operation of Single phase Transformers.
12. Separation of core losses of a single phase transformer.
13. Heat run test on a bank of 3 Nos. of single phase Delta connected transformers.

Semester	IV SEM	L	T	P	C	Course Code
Regulation	V20	0	0	3	1.5	V20EEL06
Name of the Course	Electrical Measurements Laboratory					
Branches	EEE					

Course Outcomes:

After successful completion of the course, the student will be able to:

CO No.	Course Outcome	Knowledge Level
CO1	Calibrate voltmeters, ammeters, single phase energy meter	K3
CO2	Measure the electrical parameters using Anderson, Schering& Kelvin's double Bridges.	K5
CO3	Apply various methods to calculate powers and choke coil parameters	K3
CO4	Calibrate dynamometer and LPF Wattmeters	K3
CO5	Measure the Dielectric Strength of transformer oil	K3

Any 10 experiments are to be conducted

1. Calibration and Testing of single phase energy Meter
2. Calibration of PMMC ammeter and voltmeter using Crompton D.C. Potentiometer
3. Calibration of AC voltmeter and measurement of choke parameters using AC Potentiometer in polar form.
4. Calibration of dynamometer wattmeter by using phantom loading.
5. Calibration of LPF wattmeter by using direct loading.
6. Capacitance Measurement using Schering Bridge
7. Inductance Measurement using Anderson Bridge.
8. Measurement of 3 phase power with single wattmeter and using two C.Ts

9. Measurement of single phase Power by using 3 Voltmeter and 3 Ammeter method.
10. Measurement of resistance using Kelvin's double Bridge.
11. Dielectric oil testing using H.T test Kit.
12. Measurement of 3 phase reactive power with single wattmeter for balanced loading.
13. Demonstration of Electronic Meters used by electrical field engineers

Annexure VI

Semester	IV SEM (ECE & ECT); V SEM (EEE)	L	T	P	C	Course Code
Regulation	**V20**	**3**	**-**	**-**	**3**	**V20EET11**
Name of the Course	**Control Systems**					
Branches	**EEE, ECE & ECT**					

Course Outcomes

After successful completion of this course, students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Determine the mathematical modelling of physical systems	(K3)
CO2	Calculation of Time Domain Specification of first and second order systems and understand the effect of Controllers	(K3)
CO3	Investigate the stability of closed loop systems using Routh's stability criterion and root locus method.	(K3)
CO4	Find the stability of control systems using frequency response approaches.	(K3)
CO5	Analyze physical systems using state space approach.	(K4)

Unit – I: Mathematical Modeling of Control Systems

Classification of control systems, Open Loop and closed loop control systems and their differences, Feed-Back Characteristics, transfer function of linear system, Differential equations of electrical networks, Translational and Rotational mechanical systems, Transfer Function of DC Servo motor - AC Servo motor- Synchro, transmitter and receiver - Block diagram algebra – Representation by Signal flow graph - Reduction using Mason's gain formula.

Unit-II: Time Response Analysis

Standard test signals - Time response of first and second order systems - Time domain specifications - Steady state errors and error constants – Effects of various controllers

Unit –III: Stability And Root Locus Technique

The concept of stability – Routh's stability criterion –limitations of Routh's stability – Root locus concept - construction of root loci

Unit–IV: Frequency Response Analysis

Introduction to Frequency domain specifications-Bode diagrams- transfer function from the Bode Diagram-Phase margin and Gain margin-Stability Analysis from Bode Plots, Polar Plots, Nyquist Stability criterion. Effects of various controllers.

Unit–V: State Space Analysis of LTI Systems

Concepts of state, state variables and state model, state space representation of transfer function, Diagonalization- Solving the time invariant state equations- State Transition Matrix and it's Properties – Concepts of Controllability and Observability.

Annexure VIII

Syllabi for the Courses offered in I to IV semesters of M. Tech EEE for Power Electronics & Power Systems (PE&PS) under V21 Regulation

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21PET01
Name of the Course	Analysis of Power Electronic Converters					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Explain the Static and Dynamic Characteristics of power switching devices.	K2
CO2	Analyze the parameters of AC-DC converters	K4
CO3	Explain the operation of power factor correction converters	K2
CO4	Analyze the operation of three phase inverters with PWM control.	K4
CO5	Understand the principles of operation of multi- level inverters and their applications	K2

UNIT– I : Overview of Switching Devices:

Power MOSFET, IGBT, GTO, GaN devices-static and dynamic characteristics, gate drive circuits for switching devices.

UNIT– II: AC-DC converters:

Single phase fully controlled converters with RL load–Evaluation of input power factor and harmonic factor- Continuous and Discontinuous load current, Power factor improvements, Extinction angle control, symmetrical angle control, PWM control.

Three Phase AC-DC Converters, fully controlled converters feeding RL load with continuous and discontinuous load current, Evaluation of input power factor and harmonic factor-three phase dual converters

UNIT– III: Power Factor Correction Converters:

Single-phase single stage boost power factor corrected rectifier, power circuit principle of operation and steady state- analysis, three phase boost PFC converter.

UNIT– IV : PWM Inverters:

Principle of operation - Voltage control of single phase inverters - sinusoidal PWM– modified PWM – phase displacement Control – Trapezoidal, staircase, stepped, harmonic injection and delta modulation. Voltage Control of Three-Phase Inverters- Sinusoidal PWM- 60^0 PWM- Third Harmonic PWM- Space Vector Modulation- Comparison of PWM Techniques- Three phase current source inverters-Variable dc link inverter.

UNIT– V : Multi level inverters:

Introduction, Multilevel Concept, Types of Multilevel Inverters- Diode-Clamped Multilevel Inverter, Principle of Operation, Features of Diode-Clamped Inverter, Improved Diode-Clamped Inverter- Flying-Capacitors Multilevel Inverter- Principle of Operation, Features of Flying-Capacitors Inverter- Cascaded Multilevel Inverter- Principle of Operation- Features of Cascaded Inverter-Switching Device Currents-DC-Link Capacitor Voltage Balancing- Features of Multilevel Inverters-Comparisons of Multilevel Converters.

Semester	I SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET02
Name of the Course	Power System Operation & Control					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Apply various load flow methods to analyse the system	K3
CO2	Apply various methods to solve unit commitment problem and understand Optimal power flow	K3
CO3	Determine the transfer function of single area load frequency control	K3
CO4	Calculate the frequency deviation for two area load frequency control	K3
CO5	Explain the effect of generation with limited energy supply.	K2

UNIT– I: Load Flow Analysis

Newton Raphson method, Fast Decoupled method, AC-DC load flow – Single and three phase methods

UNIT– II: Unit commitment & Optimal power flow

Unit commitment problem and optimal power flow solution: Unit commitment: Constraints in UCP, UC solution methods. Priority list method, introduction to Dynamic programming Approach.

Optimal power flow: OPF without inequality constraints, inequality constraints on control variables and dependent variables.

UNIT– III: Single area Load Frequency Control:

Necessity of keeping frequency constant. Definition of control area, single area control, Block diagram representation of an isolated Power System, Steady State analysis, Dynamic response-Uncontrolled case. Proportional plus Integral control of single area and its block diagram representation, steady state response.

UNIT– IV : Two area Load Frequency Control:

Load frequency control of two-area system, uncontrolled case and controlled case, tie-line bias control, steady state representation. Optimal two-area LF control-performance Index and optimal parameter adjustment. Load frequency control and Economic dispatch control.

UNIT– V: Generation with limited Energy supply:

Take-of-pay fuel supply contract, composite generation production cost function. Solution by gradient search techniques, hard limits and slack variables, Fuel scheduling by linear programming.

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21PET03
Name of the Course	Control & Integration of Renewable Energy Systems (Elective -I)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Understand the fundamental requirements of Grid Integration	K2
CO2	Explain different conventional & non-conventional dynamic energy conversion technologies	K2
CO3	Describe different renewable energy sources and storage devices	K2
CO4	Understand the real & reactive power control techniques with renewable generators	K2
CO5	Develop a model of complete system for standalone/grid connected system	K4

UNIT– I: Introduction:

Electric grid introduction, Supply guarantee and power quality, Stability, Effects of renewable energy penetration into the grid, Boundaries of the actual grid configuration, Consumption models and patterns, static and dynamic energy conversion technologies, interfacing requirements .

UNIT– II: Dynamic Energy Conversion Technologies:

Introduction to different conventional and non-conventional dynamic generation technologies, principle of operation and analysis of reciprocating engines, gas and micro turbines, hydro and wind based generation technologies, control and integrated operation of different dynamic energy conversion devices.

UNIT– III: Static Energy Conversion Technologies:

Introduction to different conventional and non conventional static generation technologies, principle of operation and analysis of fuel cell, photovoltaic based generators, and wind based generation technologies, different storage technologies such as batteries, fly wheels and ultra-capacitors, plug-in-hybrid vehicles, control and integrated operation of different static energy conversion devices.

UNIT– IV: Real and reactive power control:

Control issues and challenges in Diesel, PV, wind and fuel cell based generators, PLL, Modulation Techniques, Dimensioning of filters, Linear and nonlinear controllers, predictive controllers and adaptive controllers, Fault-ride through Capabilities, Load frequency and Voltage Control.

UNIT– V: Integration of different Energy Conversion Technologies:

Resources evaluation and needs, Dimensioning integration systems, Optimized integrated systems, Interfacing requirements, integrated Control of different resources, Distributed versus Centralized Control, Synchro Converters, Grid connected and Islanding Operations, stability and protection issues, load sharing, Cases studies.

Semester	I SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET04
Name of the Course	Smart Grid (Elective-I)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand concept of smart grid and its advantages over conventional grid.	K2
CO2	Understand smart metering techniques and measuring techniques	K2
CO3	Understand monitoring, protection techniques and storage systems for smart grids	K2
CO4	Illustrate the concept of Micro Grid and its integration	K2
CO5	Examine different communication technologies that can be used for smart grid	K2

UNIT-I: Introduction to Smart Grid

Evolution of Electric Grid, Concept of Smart Grid, Definitions, Need of Smart Grid, Functions of Smart Grid, Opportunities & Barriers of Smart Grid, Difference between conventional & smart grid. Case study of Smart Grid.

UNIT-II : Smart Grid Technologies: Part 1

Introduction to Smart Meters, Real Time Prizing, Smart Appliances, Automatic Meter Reading (AMR), Outage Management System (OMS), Plug in Hybrid Electric Vehicles (PHEV), Vehicle to Grid, Smart Sensors, Home & Building Automation.

UNIT-III :Smart Grid Technologies: Part 2

Smart Substations, Substation Automation, Feeder Automation. Geographic Information System (GIS), Intelligent Electronic Devices (IED) & their application for monitoring & protection, Smart storage like Battery, SMES, Pumped Hydro, Compressed Air Energy Storage, Wide Area Measurement System (WAMS), Phasor Measurement Unit (PMU).

UNIT-IV : Microgrids and Distributed Energy Resources

Concept of micro grid, need & applications of micro grid, formation of microgrid, Issues of interconnection, protection & control of microgrid. Plastic & Organic solar cells, Thin film solar cells, Variable speed wind generators, fuelcells, microturbines, Captive power plants, Integration of renewable energy sources.

UNIT-V: Information and Communication Technology for Smart Grid

Advanced Metering Infrastructure (AMI), Home Area Network (HAN), Neighborhood Area Network (NAN), Wide Area Network (WAN).

Semester	I SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET05
Name of the Course	Power Quality (Elective-I)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Identify the issues related to power quality in power systems	K2
CO2	Describe the problems of transient and long duration voltage variations in power systems	K2
CO3	Analyze the effects of harmonics and understand different mitigation techniques.	K4
CO4	Identify the importance of custom power devices and their applications	K2
CO5	Choose suitable custom power device to mitigate power quality problem	K2

UNIT– I: Introduction to power quality:

Overview of Power Quality, Concern about the Power Quality, General Classes of Power Quality Problems, Voltage Unbalance, Waveform Distortion, Voltage fluctuation, Power Frequency Variations, Power Quality Terms, Voltage Sags, swells, flicker and Interruptions - Sources of voltage and current interruptions, Nonlinear loads.

UNIT– II: Transient and Long Duration Voltage Variations:

Source of Transient Over Voltages - Principles of Over Voltage Protection, Devices for Over Voltage Protection, Utility Capacitor Switching Transients, Utility Lightning Protection, Load Switching Transient Problems.

Principles of Regulating the Voltage, Device for Voltage Regulation, Utility Voltage Regulator Application, Capacitor for Voltage Regulation, End-user Capacitor Application, Regulating Utility Voltage with Distributed generation

UNIT– III : Harmonic Distortion and solutions:

Voltage vs. Current Distortion, Harmonics vs. Transients – Power System Quantities under Non-sinusoidal Conditions, Harmonic Indices, Sources of harmonics, Locating Sources of Harmonics, System Response Characteristics, Effects of Harmonic Distortion, Inter harmonics, Harmonic Solutions - Harmonic Distortion Evaluation, Devices for Controlling Harmonic Distortion, Harmonic Filter Design, Standards on Harmonics

UNIT– IV: Custom Power Devices:

Custom power and custom power devices, voltage source inverters, reactive power and harmonic compensation devices, compensation of voltage interruptions and current interruptions, static series and shunt compensators, compensation in distribution systems, interaction with distribution equipment, installation considerations.

UNIT– V: Application of custom power devices in power systems:

Static and hybrid Source Transfer Switches, Solid state current limiter - Solid state breaker. P-Q theory – Control of P and Q, Dynamic Voltage Restorer (DVR): Operation and control – Interline Power Flow Controller (IPFC): Operation and control of Unified Power Quality Conditioner (UPQC); Generalized power quality conditioner

Semester	I SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET06
Name of the Course	Electrical Distribution Automation (Elective-II)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand various factors of distribution system	**K2**
CO2	Construct the distribution substation and feeders	**K3**
CO3	Understand the distribution system protection and its coordination.	**K2**
CO4	Understand the effect of compensation for power factor improvement.	**K2**
CO5	Explain the distribution automation functions	**K2**

UNIT– I: Introduction to Distribution systems:

Introduction, an overview of the role of computers in distribution system planning-Load modeling and characteristics - definition of basic terms like demand factor, utilization factor, load factor, plant factor, diversity factor, coincidence factor, contribution factor and loss factor-Relationship between the load factor and loss factor - Classification of loads (Residential, Commercial, Agricultural and Industrial) and their characteristics.

UNIT– II:Distribution Feeders and Substations:

Design consideration of Distribution feeders: Radial and loop types of primary feeders, voltage levels, and feeder-loading. Design practice of the secondary distribution system. Location of Substations: Rating of a Distribution Substation, service area with ”n" primary feeders. Benefits derived through optimal location of substations.

UNIT– III: **Protective devices and coordination:**

Objectives of distribution system protection, types of common faults and procedure for fault calculation. Protective Devices: Principle of operation of fuses, circuit reclosers, line sectionalizer and circuit breakers. Coordination of protective devices: General coordination procedure; types of coordination.

UNIT– IV: Capacitive compensation for power factor control:

Different types of power capacitors, shunt and series capacitors, effect of shunt capacitors (Fixed and switched), power factor correction, capacitor location. Economic justification. Procedure to determine the best capacitor location. Voltage control: Equipment for voltage control, effect of series capacitors, effect of AVB/AVR, line drop compensation.

UNIT– V: Distribution automation functions:

Electrical system automation, EMS functional scope, DMS functional scope functionality of DMS- Steady state and dynamic performance improvement; Geographic information systems-AM/FM functions and Database management; communication options, supervisory control and data acquisition: SCADA functions and system architecture; Synchro phasors and its application in power systems.

Text Books:

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21PET07
Name of the Course	HVDC Transmission (Elective-II)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Understand the various schemes of HVDC transmission	K2
CO2	Explain the operation of static power converters for HVDC transmission	K2
CO3	Describe various control techniques of power converters	K2
CO4	Understand the interaction between HVAC and HVDC system.	K2
CO5	Understand the various protection schemes of HVDC transmission	K2

UNIT– I: Limitation of EHV AC Transmission, Advantages of HVDC:

Technical economical and reliability aspects. HVDC Transmission: General considerations, Power Handling Capabilities of HVDC Lines, Basic Conversion principles, static converter configuration. Types of HVDC links-Apparatus and its purpose

UNIT– II: Static Power Converters:

6-pulse bridge circuit and 12-pulse converters, converter station and Terminal equipment, commutation process, Rectifier and inverter operation, equivalent circuit for converter – special features of converter transformers. Comparison of the performance of diametrical connection with 6-pulse bridge circuit

UNIT– III: Control of HVDC Converters and systems:

Constant current, constant extinction angle and constant Ignition angle control. Individual phase control and equidistant firing angle control, DC power flow control.

Factors responsible for generation of Harmonics voltage and current, harmonics effect of variation of α and μ. Filters, Harmonic elimination.

UNIT– IV: Interaction between HV AC and DC systems:

Voltage interaction, Harmonic instability problems and DC power modulation. Development of DC circuit Breakers, Multi-terminal DC links and systems; series, parallel and series parallel systems, their operation and control.

UNIT– V: Transient over voltages in HV DC systems:

Over voltages due to disturbances on DC side, over voltages due to DC and AC side line faults. Converter faults and protection in HVDC Systems: Converter faults, over current protection - valve group, and DC line protection, circuit breakers. Over voltage protection of converters, surge arresters.

Text Books:

Semester	I SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET08
Name of the Course	Advanced Power Systems Protection (Elective-II)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Classify different types of static relays and tools.	K2
CO2	Explain various Amplitude and Phase Comparators	K2
CO3	Describe different types of static over current relays.	K2
CO4	Understand the PILOT Relaying schemes	K2
CO5	Identify suitable Microprocessor based and Numerical relays for power system protection	K2

UNIT– I: Static Relays classification and Tools :

Comparison of Static with Electromagnetic Relays, Basic classification, Level detectors and Amplitude and phase Comparators – Duality – Basic Tools – Schmitt Trigger Circuit, Multi-vibrators, Square wave Generation – Polarity detector – Zero crossing detector – Thyristor and UJT Triggering Circuits. Phase sequence Filters – Speed and reliability of static relays.

UNIT– II: Amplitude and Phase Comparators (2 Input) :

Generalized equations for Amplitude and Phase comparison – Derivation of different characteristics of relays – Rectifier Bridge circulating and opposed voltage type amplitude comparators – Averaging & phase splitting type amplitude comparators – Principle of sampling comparators.

Phase Comparison : Block Spike and phase Splitting Techniques – Transistor Integrating type, phase comparison, Rectifier Bridge Type Comparison – Vector product devices.

UNIT– III: Static over current (OC) relays:

Instantaneous, Definite time, Inverse time OC Relays, static distance relays, static directional relays, static differential relays, measurement of sequence impedances in distance relays, multi input comparators, elliptic & hyperbolic characteristics, switched distance schemes, Impedance characteristics during Faults and Power wings,

UNIT– IV: PILOT Relaying schemes:

Wire pilot protection: circulating current scheme – balanced voltage scheme – translay scheme – half wave comparison scheme - carrier current protection: phase comparison type – carrier aided distance protection – operational comparison of transfer trip and blocking schemes – optical fibre channels.

UNIT– V: Microprocessor based relays and Numerical Protection:

Introduction – over current relays – impedance relay – directional relay – reactance relay.

Numerical Protection: Introduction - numerical relay - numerical relaying algorithms - mann-morrison technique - Differential equation technique and discrete fourier transform technique - numerical over current protection - numerical distance protection.

Text Books:

1. TS MadhavaRao, “Power System Protection with Static Relays”, TMH, 2nd edition, 2017.
2. Badri Ram & D N vishwakarma, “Power system protection & switchgear”, TMH, 22nd reprint, 2007.

Reference Books:

Semester	I SEM	L	T	P	C	COURSE CODE
Regulation	V21	0	0	4	2	V21PEL01
Name of the Course	Power Electronics Simulation Laboratory					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Analyze the DC-DC converters using small signal model	K4
CO2	Analyze the operation of Multi-level inverters	K4
CO3	Analyze the different PWM techniques for inverters	K4
CO4	Analyze the operation of AC Voltage regulators	K4
CO5	Analyze the operation of AC-DC converters	K4

List of Experiments:

1. Simulation of Buck converter using small signal model.
2. Simulation of Boost converter using small signal model.
3. Simulation of single phase half bridge inverter.
4. Simulation of full bridge inverter using Uni-polar & Bi-polar PWM techniques.
5. Simulation of three phase inverter using sine-triangle PWM.
6. Simulation of three phase inverter using space vector PWM.
7. Simulation of three level three phase NPC inverter.
8. Study of neutral point voltage floating in NPC three level inverter
9. Simulation of 3-level flying capacitor inverter & evaluation of capacitor voltage balanced methods.
10. Simulation of single phase AC voltage regulator.
11. Simulation of three phase AC voltage regulator.
12. Comparison of harmonic profile of two level& three level inverter (FFT analysis).
13. Simulation of 5-level inverter using carrier based PWM methods.
14. Simulation of three phase full converter with RL & RLE loads.
15. Simulation of three-phase dual converter.

Semester	**I SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	0	0	4	2	V21PEL02
Name of the Course	Power Systems Laboratory					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Calculate the sequence impedances of 3 phase Transformer and Alternator	K3
CO2	Determine the power Angle Characteristics of 3-phase Alternator with infinite bus bars	K4
CO3	Estimate the performance of long transmission lines	K4
CO4	Determine the ABCD parameters of a transmission line model	K4
CO5	Analyse the Ferranti effect in long transmission line	K4

List of Experiments:

1. Determination of Sequence Impendence of an Alternator by direct method.
2. Determination of Sequence impedance of an Alternator by fault Analysis.
3. Measurement of sequence impedance of a three phase transformer
   (a) application of sequence voltage. (b). using fault analysis.
4. Power angle characteristics of a salient pole Synchronous Machine.
5. Poly-phase connection on three single phase transformers and measurement of phase displacement.
   a. Determination of equivalent circuit of 3-winding Transformer.
6. Measurement of ABCD parameters on transmission line model.
7. Performance of long transmission line without compensation.
8. Study of Ferranti effect in long transmission line.
9. Performance of long transmission line with shunt compensation.

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21PET09
Name of the Course	Switched Mode Power Conversion					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Explain operation and control of non-isolated switch mode converters.	K2
CO2	Describe operation and control of isolated switch mode converters.	K2
CO3	Understand the operation and control of resonant converters	K2
CO4	Compute control strategies of switching converters	K3
CO5	Explain the operation of switch mode converters based on linearization and small-signal analysis.	K3

UNIT– I: Non-isolated switch mode converters:

Control of DC-DC converters: Buck converters, Boost converters, Buck-Boost converter, CUK Converter, continuous and discontinuous operation, Converter realization with non-ideal components.

UNIT– II: Isolated switched mode converters:

Forwarded converter, flyback converter, push-pull converter, half-bridge converter, full bridge converter.

UNIT– III: Resonant converters:

Basic resonant circuit concepts, series resonant circuits, parallel resonant circuits, zero current switching quasi-resonant buck converter, zero current switching quasi-resonant boost converter, zero voltage switching quasi-resonant buck converter, zero voltage switching quasi-resonant boost converter.

UNIT– IV: Control schemes of switching converters:

Voltage control, Current mode control, control scheme for resonant converters.

Magnetic design consideration: Transformer design, inductor and capacitor design.

UNIT– V: Modeling and Controller design based on linearization:

Formulation of averaged models for buck and boost converters: state space analysis, average circuit models, linearization and small – signal analysis, small-signal models.

Control design based on linearization: Transfer function of converters, control design, large signal issues in voltage-mode and current-mode control.

Text Books:

1. Fundamentals of Power Electronics Third Edition-Erickson, Robert W., Maksimovic, Dragan, Springer, 2011.
2. Power switching converters Third Edition-Simon Ang, Alejandro Oliva, CRC Press, 2010.
3. Elements of Power Electronics Second Edition– Philip T. Krein, Oxford University press, 2014.
4. Design of Magnetic Components for Switched Mode Power Converters First Edition- Umanand, S.P. Bhat, John Wiley & Sons Australia, 1992.

Reference Books:

1. Switching Power Supply Design Third Edition-Abraham I. Pressman, McGraw-Hill Ryerson, Limited, 1991.
2. Power Electronics Second Edition– Issa Batareseh, Jhon Wiley publications, 2004.
3. Power Electronics: converters Applications & Design Third Edition- – Mohan, Undeland, Robbins-Wiley publications,2002.
4. https://nptel.ac.in/courses/108/108/108108036/

Semester	II SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET10
Name of the Course	Real Time Control of Power Systems					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Classify the state estimation methods and understand the concepts of bad data observability, detection, identification and elimination	K2
CO2	Identify and Recognize the security, contingency and line outages in power system	K2
CO3	Illustrate the need of computer control and SCADA in real time power system	K2
CO4	Understand the concept of voltage stability in real time power systems	K2
CO5	Understand the basic concepts of Synchrophasor Measurement units	K2

UNIT– I: State Estimation:

Different types of State Estimations, Theory of WLS state estimation, sequential and non-sequential methods to process measurements. Bad data Observability, Bad data detection, identification and elimination.

UNIT– II: Security and Contingency Evaluation:

Security concept, Security Analysis and monitoring, Contingency Analysis for Generator and line outages by iterative linear power flow method, Fast Decoupled model, and network sensitivity methods.

UNIT– III: Computer Control of Power Systems:

Need for real time and computer control of power systems, operating states of a power system, SCADA - Supervisory control and Data Acquisition systems implementation considerations, energy control centers, software requirements for implementing the above functions.

UNIT– IV: Voltage Stability:

Voltage collapse, and voltage security, relation of voltage stability to rotor angle stability. Voltage stability analysis Introduction to voltage stability analysis `P-V‟curves and `Q-V‟ curves, voltage stability in mature power systems, long-term voltage stability, power flow analysis for voltage stability, voltage stability static indices.

UNIT– V: Synchrophasor Measurement units:

Introduction, Phasor representation of sinusoids, a generic PMU, GPS, Phasor measurement systems, Communication options for PMUs, Functional requirements of PMUs and PDCs, Phasors for nominal frequency signals, types of frequency excursions in power systems, DFT estimation at off nominal frequency with a nominal frequency clock.

Text Books:

1. John J.Grainger and William D.Stevenson, Jr. First Edition: Power System Analysis, McGraw-Hill, 1994, International Edition
2. Allen J.Wood and Bruce F.Wollenberg Third Edition: Power Generation operation and control, John Wiley & Sons, 2013.
3. A.G.PhadkaandJ.S.Thorp,“SynchronizedPhasorMeasurementsand Their Applications” First Edition,Springer,2008

Reference Books:

2. L.P.Singh : Advanced Power System Analysis and Dynamics Fourth Edition, Wiley Eastern Ltd. 2008
3. PrabhaKundur : Power System Stability and Control First Edition, McGraw Hill, 2006
4. P.D.Wasserman : `Neural Computing:Theory and Practice‟Van Nostrand First Edition -Feinhold, New York.

Semester	II SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET11
Name of the Course	Electrical Machine Modeling and Analysis (Elective –III)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Analyze Kroon's Primitive Machine	K2
CO2	Develop modeling of dc machine	K3
CO3	Explain linear Transformation	K4
CO4	Apply mathematical modeling concepts to 3-phase Induction machines	K3
CO5	Design control strategies based on dynamic modeling of 3-ph Induction machines and3-phase Synchronous machine	K4

UNIT– I: Basic concepts of Modeling:

Basic two-pole machine representation of Commutator machines, representations of 3-phase synchronous machine with and without damper bars and 3-phase induction machine, Kron"s primitive Machine voltage, current and torque equations.

UNIT– II: DC Machine Modeling:

Mathematical model of separately excited D.C motor – Steady state analysis-transient State analysis-sudden application of inertia load-transfer function of separately excited D.C motor- Mathematical model of D.C Series motor, Shunt motor-Linearization techniques for small perturbations

UNIT– III: Reference frame theory & Modeling of single phase Induction Machines:

Linear transformation-Phase transformation - three phase to two phase transformation (abc to αβ0) and vice-versa, transformation to rotating reference frame, (αβ0 to dqo) and vice versa -Power equivalence-Mathematical modeling of single phase induction machines.

UNIT– IV: Modeling of three phase Induction Machine:

Generalized model in arbitrary reference frame-Derivation of commonly used induction machine models-Synchronously rotating reference frame model, Stator reference frame model-Rotor reference frame model--power equation, electromagnetic torque equation, state space model in induction motor with flux linkages as variables

UNIT– V: Modeling of Synchronous Machine:

Synchronous machine inductances –derivation of voltage equations in the rotor"s dq0 reference frame electromagnetic torque-current in terms of flux linkages-three phase synchronous motor. State space models with flux linkages as variables.

Text Books

1. Analysis of Electric Machinery and Drive Systems, 3rd Edition-Wiley-IEEE Press-Paul Krause, Oleg Wasynczuk, Scott D. Sudhoff, Steven Pekarek, Junr 2013.
2. Electric Motor Drives First Edition- Modeling, Analysis & control -R. Krishnan-Pearson Publications.

Reference Books:

1. Generalized theory of Electrical Machines First edition- Khanna Publishers P. S. Bimbhra, 1985.
2. Dynamic simulation of Electric machinery using MATLAB / Simulink Second Edition–CheeMunOng- Prentice Hall, 2003.
3. Magneto electric devices transducers, transformers and machines-G. R. Slemon First Edition - Wiley in New York, London, 1966

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21PET12
Name of the Course	Control of Electric Drives (Elective –III)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Understand fundamentals of electric drives	K2
CO2	Understand various DC motor drives and control	K2
CO3	Analyze control techniques of synchronous motor drives	K4
CO4	Analyze control techniques for Switched Reluctance Motor	K4
CO5	Understand operation and various control schemes of BLDC motor	K2

Unit I: Fundamentals of Electric Drive:

Electric Drives and its parts, advantages of electric drives Classification of electric drives Speed-torque conventions and multi-quadrant operations, Constant torque and constant power operation, Types of load torque: components, nature and classification

Unit II: DC Motor Drives:

Starting, Braking and Speed Control, Transient analysis of separately excited motor with armature and field control, Energy losses during transient operation, Phase controlled converter fed DC drives, Chopper Control DC drives.

Unit III: Control of Synchronous Motor Drives:

Synchronous motor and its characteristics- Control strategies-Constant torque angle control- power factor control, constant flux control, flux weakening operation, load commutated inverter fed synchronous motor drive, motoring and regeneration, phasor diagrams.

Unit IV: Control of Switched Reluctance Motor Drives:

SRM Structure-Stator Excitation-techniques of sensor less operation-convertor topologies-RM Waveforms-SRM drive design factors-Torque controlled SRM-Torque Ripple-Instantaneous Torque control -using current controllers-flux controllers.

Unit V: Control of BLDC Motor Drives:

Principle of operation of BLDC Machine, Sensing and logic switching scheme, BLDM as Variable Speed Synchronous motor-methods of reducing Torque pulsations -Three-phase full wave Brushless dc motor -Sinusoidal type of Brushless dc motor -current controlled Brushless dc motor Servo drive.

Text Books:

1. Fundamentals of Electrical Drives – G.K. Dubey – Narosa Publications - 1995
2. Power Electronics control of AC motors – MD Murphy & FG Turn Bull Pergman Press -1st edition-1998.
3. Electric Motor Drives Modeling, Analysis & control -R. Krishnan- Pearson Education-4th edition – 2015
4. Brushless permanent magnet and reluctance motor drives- T J E Miller- Oxford university press- 1989

1. Ned Mohan, T.M. Undeland and William P. Robbins: Power Electronics: Converters, Applications, 3rd Edition, John Wiley & Sons, 2009
2. Modelling, Simulation and control of Electric Drives- M.F Rahman, Sanjeet K. Dwivedi- IET Publiers-1st edition-Oct 2019
3. Power Semiconductor drives- G.K. Dubey-Prentice hall-1989

Semester	II SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET13
Name of the Course	Applications of Power Converters (Elective –III)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	understand the inverters for induction heating applications	K2
CO2	understand the power converters for different industrial applications	K2
CO3	understand modeling of high voltage power supplies using the power converters for radar and space applications	K2
CO4	understand modeling of low voltage and high current power supplies using the power converters for microprocessors and computer loads	K2
CO5	understand the applications of DC-DC converters	K2

UNIT– I: Inverters for Induction Heating:

For induction cooking, induction hardening, melting, and welding applications.

UNIT– II: Power Converters for Lighting, pumping and refrigeration Systems:

Electronic ballast, LED power drivers for indoor and outdoor applications. PFC based grid fed LED drivers, PV / battery fed LED drivers. PV fed power supplies for pumping/refrigeration applications.

UNIT– III: **High Voltage Power Supplies:**

Power supplies for X-ray applications - power supplies for radar applications - power supplies for space applications.

UNIT– IV: Low voltage high current power supplies:

Power converters for modern microprocessor and computer loads

UNIT– V: Bi-directional DC-DC (BDC) converters:

Electric traction, automotive Electronics and charge/discharge applications, Line Conditioners and Solar Charge Controllers

Text Books:

1. Ali Emadi, A. Nasiri, and S. B. Bekiarov: Uninterruptible Power Supplies and Active Filters First Edition, CRC Press, 2004.
2. M. Ehsani, Y. Gao, E. G. Sebastien and A. Emadi: Modern Electric, Hybrid Electric and Fuel Cell Vehicles, 1st Edition,CRC Press, 2004.

Semester	II SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET14
Name of the Course	EHVAC Transmission (Elective –IV)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Determine the transmission line parameters	K3
CO2	Calculate the field effects on EHV and UHV AC lines.	K3
CO3	Determine the corona, RI and audible noise in EHV and UHV lines	K3
CO4	Analyze voltage control and compensation problems in EHV and UHV transmission systems	K4
CO5	Understand reactive power compensation using SVC and TCR	K2

UNIT– I: E.H.V. A.C. Transmission, line trends and preliminary aspects, standard transmission voltages – power handling capacities and line losses – mechanical aspects. Calculation of line resistance and inductance: resistance of conductors, temperature rise of conductor and current carrying capacity. Properties of bundled conductors and geometric mean radius of bundle, inductance of two conductor lines and multi conductor lines, Maxwell‟s coefficient matrix. Line capacitance calculation. Capacitance of two conductor line, and capacitance of multi conductor lines, potential coefficients for bundled conductor lines, sequence inductances and capacitances and diagonalization.

UNIT– II: Calculation of electro static field of AC lines:

Effect of high electrostatic field on biological organisms and human beings. Surface voltage Gradient on conductors, surface gradient on two conductor bundle and cosine law, maximum surface voltage gradient of bundle with more than 3 sub conductors, Mangolt formula.

UNIT– III: Corona:

Corona in EHV lines – corona loss formulae – attenuation of traveling waves due to corona – Audio noise due to corona, its generation, characteristics and limits, measurement of audio noise.

UNIT– IV: Power Frequency voltage control:

Problems at power frequency, generalized constants, No load voltage conditions and charging currents, voltage control using synchronous condenser, cascade connection of components : Shunt and series compensation, sub synchronous resonance in series – capacitor compensated lines

UNIT– V: Reactive power compensating systems:

Introduction, SVC schemes, Harmonics injected into network by TCR, design of filters for suppressing harmonics injected into the system.

Text Books :

1. Extra High Voltage AC Transmission Engineering Fourth Edition– Rakesh Das Begamudre, Wiley Eastern ltd., New Delhi – 2011.
2. EHV Transmission line reference book – Edison Electric Institute (GEC) 1986.
3. https://nptel.ac.in/courses/108/108/108108099/

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21PET15
Name of the Course	Flexible AC Transmission System (Elective –IV)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Explain the improvements of transmission system with FACTS	K2
CO2	Illustrate different Types of Static VAr generation systems	K3
CO3	Estimate the effect of static shunt compensation.	K2
CO4	Estimate the effect of static series compensation.	K2
CO5	Explain the principle of operation and various controls of UPFC	K2

UNIT– I: Introduction

FACTS concepts, Transmission interconnections, power flow in an AC System, loading capability limits, Dynamic stability considerations, importance of controllable parameters, basic types of FACTS controllers, benefits from FACTS controllers.

UNIT– II: Static shunt compensation

Basic concept of voltage and current source converters, comparison of current source converters with voltage source converters.

Static shunt compensation : Objectives of shunt compensation, midpoint voltage regulation, voltage instability prevention, improvement of transient stability, Power oscillation damping, methods of controllable VAr generation, variable impedance type static VAr generation, switching converter type VAr generation, hybrid VAr generation.

UNIT– III: SVC and STATCOM

The regulation slope, transfer function and dynamic performance, transient stability enhancement and power oscillation damping, operating point control and summary of compensation control.

UNIT– IV: Static Series compensators

Concept of series capacitive compensation, improvement of transient stability, power oscillation damping, functional requirements. GTO Thyristor controlled series capacitor (GSC), Thyristor switched series capacitor (TSSC), and Thyristor controlled series capacitor (TCSC), control schemes for GSC, TSSC and TCSC.

UNIT– V: Unified Power Flow Controller

Basic operating principle, conventional transmission control capabilities, independent real and reactive power flow control, comparison of the UPFC to series compensators and phase angle regulators. Introduction to Inter line Power Flow Controller (IPFC)

Text Books:

1. Understanding FACTS Devices by N. G. Hingorani and L. Guygi, IEEE Press, 2001

Reference Books:

1. Flexible AC Transmission systems bySang. Y. Hand John. A.T, IEEE Press, 2006

Semester	II SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET16
Name of the Course	Power System Dynamics and Stability (Elective –IV)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Develop the State space Model of Synchronous Machine	K3
CO2	Analyse the Steady State Stability and Dynamic Stability of Synchronous machine	K4
CO3	Solve the Swing Equation using different methods to obtain the Transient Stability	K3
CO4	Illustrate the Effect of Governing and Excitation systems on Stability	K3
CO5	Discuss Different types of Excitation Systems	K2

UNIT– I: System Dynamics

Synchronous machine model in state space from computer representation for excitation and governor system –modeling of loads and induction machines.

UNIT– II: Steady state stability

steady state stability - steady state stability limit – Dynamics Stability limit – Dynamic stability analysis – State space representation of synchronous machine connected to infinite bus-time response – Stability by eigen value approach.

UNIT– III:Digital Simulation of Transient Stability

Swing equation machine equations – Representation of loads – Alternate cycle solution method – Direct method of solution – Solution Techniques : Modified Euler method – Runge Kutta method – Concept of multi machine stability.

UNIT– IV

Effect of governor action and excite on power system stability effect of saturation, saliency & automatic voltage regulators on stability.

UNIT– V: Excitation Systems

Rotating Self-excited Exciter with direct acting Rheostatic type voltage regulator – Rotating main and Pilot Exciters with Indirect Acting Rheostatic Type Voltage Regulator – Rotating Main Exciter, Rotating Amplifier and Static Voltage Regulator – Static excitation scheme – Brushless excitation system.

CO1	Find the duty ratio of DC-DC Converters	K3
CO2	Analyze the performance of 1- ϕ AC-DC Controlled rectifiers	K4
CO3	Sketch the characteristics of power semiconductor devices	K3
CO4	Find the modulation index of square wave &SPWM inverters	K3
CO5	Calculate input power factor of 3-ϕ full converter	K3

Any 10 of the following experiments are to be conducted.

List of experiments

1. Study of DC-DC non-isolated converters such as Buck & Boost converter.
2. Study of DC-DC Buck - Boost and Cuk converters.
3. Study of 1-ϕ dual converter.
4. Determination of input p.f. and harmonic factor for 1-ϕ semi- converter and 1- ϕ full-converter (Inductive load)
5. Study of p.f. improvement in 1-ϕ full-converter with symmetric and extinction angle control.
6. Study of 1-ϕ square wave and sinusoidal PWM inverter.
7. Study of 3-ϕ inverter with 120^{o} and 180^{o} mode of operation.
8. Study of 3-ϕ sinusoidal PWM inverter.
9. Study of 3-level NPC inverter.
10. Study of 5-level cascaded H-bridge inverter.
11. Determination of input p.f. and harmonic factor for 3-ϕ full converter (Inductive load).
12. Determination of input p.f. and harmonic factor for 3-ϕ semi converter (Inductive load).
13. Study the characteristics of IGBT, MOSFET& GTO"s.
14. Design of gate drive circuits for IGBT&MOSFET"s.

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	0	0	4	2	V21PEL04
Name of the Course	Power Systems Simulation Laboratory					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Analyze the performance of the various transmission lines at different loading conditions	K4
CO2	Examine the load flow study on distribution systems	K4
CO3	Inspect the Z- and Y-bus matrices for the given power transmission system	K4
CO4	Determine the load flow solution obtained using GS and NR methods	K4
CO5	Analyze the transient stability & load frequency control problem of a power system	K4

Any 10 of the following experiments are to be conducted.

Listof Experiments:

1. Performance analysis of short, medium and long transmission lines
2. Distribution load flow analysis
3. Economic Load Dispatch with & without transmission losses
4. Formation of Y-bus by direct inspection method
5. Formations of Z-bus by building algorithm
6. Load Flow Solution Using Gauss Siedel Method
7. Load Flow Solution Using Newton Raphson Method
8. Symmetrical and Unsymmetrical Fault analysis using Z-bus
9. Transient Stability Analysis using modified Euler"s method.
10. Transient Stability Analysis using modified R-K method
11. Transient Stability Analysis Using Point By Point Method
12. Load Frequency Control of Single Area Control & Two Area Control system with and without controllers.

Semester	**II SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	0	0	4	2	V21PEP01
Name of the Course	Mini Project with Seminar					
Specialization	Power Electronics & Power systems					

Syllabus content:

A Student has to select one paper published in any of the IEEE Transactions and simulate the same. The student has to present the progress of the work at the middle of the semester. At the end of the semester, the student has to present the results by explaining the idea of the topic, methodology, finding of the simulations. A Student should also submit a report of the entire work carried out under this course. The end semester presentation must be video recorded and preserved.

Semester	III SEM	L	T	P	C	COURSE CODE
Regulation	V21	3	0	0	3	V21PET17
Name of the Course	Hybrid Electric Vehicles (Elective–V)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	Course Outcome	Knowledge Level
CO1	Explain various configurations and basics of HEVs	K2
CO2	Distinguish the concepts and components of various hybrid technologies	K2
CO3	Review the architectures, range extension mechanisms and grid support of PHEVs	K2
CO4	Discuss the PE converters for battery charging and speed control of HEVs	K2
CO5	Illustrate various Energy Storage Technologies	K2

UNIT– I: Introduction

History of hybrid vehicles, architectures of HEVs, series and parallel HEVs, complex HEVs.

UNIT– II: Hybridization of Automobile

Fundamentals of vehicle, components of conventional vehicle and propulsion load; Drive cycles and drive terrain; Concept of electric vehicle and hybrid electric vehicle; Plug-in hybrid vehicle, constituents of PHEV, comparison of HEV and PHEV; Fuel Cell vehicles and its constituents.

UNIT– III: Plug-in Hybrid Electric Vehicle

PHEVs and EREVs blended PHEVs, PHEV Architectures, equivalent electric range of blended PHEVs; Fuel economy of PHEVs, power management of PHEVs, end-of-life battery for electric power grid support, vehicle to grid technology, PHEV battery charging.

UNIT– IV: Power Electronics in HEVs

Rectifiers used in HEVs, voltage ripples; Buck converter used in HEVs, non-isolated bidirectional DC-DC converter, regenerative braking, voltage source inverter, current source inverter, isolated bidirectional DC-DC converter, PWM rectifier in HEVs, EV and PHEV battery chargers.

UNIT– V: Battery and Storage Systems

Energy Storage Parameters; Lead–Acid Batteries; Ultra capacitors; Flywheels - Superconducting Magnetic Storage System; Pumped Hydroelectric Energy Storage; Compressed Air Energy Storage - Storage Heat; Energy Storage as an Economic Resource

Text Books

Semester	**III SEM**	**L**	**T**	**P**	**C**	**COURSE CODE**
Regulation	V21	3	0	0	3	V21PET18
Name of the Course	Soft Computing Techniques in Electrical Engineering (Elective–V)					
Specialization	Power Electronics & Power systems					

Course Outcomes:

After successful completion of this course, the students will be able to

CO No.	**Course Outcome**	**Knowledge Level**
CO1	Understand the basic of Soft Computing Techniques.	K2
CO2	Recognize an appropriate soft computing methodology for an engineering problem.	K3
CO3	Apply fuzzy logic and reasoning to handle uncertainty while solving engineering problems.	K3
CO4	Analysis of neural network and genetic algorithms to combinatorial optimization problems.	K4
CO5	Design of different problems of optimization in power systems	K5

UNIT– I: Introduction to Soft Computing

Introduction, Definition of Soft Computing Techniques, Importance of Soft Computing, Main Components of Soft Computing: Fuzzy Logic, Artificial Neural Networks, Introduction to Evolutionary Algorithms, Hybrid Intelligent Systems, Single and multi-objective optimization.

UNIT– II: Artificial Neural Network and Applications

Introduction, Artificial Neuron Structure, ANN Learning; Back-Propagation Learning, Properties of Neural Networks, Unsupervised learnings, Hopfield networks, Application of GN Models to Electrical Machine Modeling, Short Term Electrical Load Forecasting Using Generalized Neuron Model, Aircraft Landing Control System Using GN Model.

UNIT– III: Introduction to Fuzzy Logic and Genetic Algorithm

Introduction, Uncertainty and Information, Types of Uncertainty, Introduction of Fuzzy Logic, Fuzzy Set, Operations on Fuzzy Sets, Fuzzy Intersection, Fuzzy Union, Fuzzy Complement, Fuzzy Concentration, Fuzzy Dilation, Fuzzy Intensification, α-Cuts, Characteristics of Fuzzy Sets, Demorgan‟s Law, Fuzzy Cartesian Product, Various Shapes of Fuzzy Membership Functions, Methods of Defining of Membership Functions, Fuzzy Relation, Defuzzification Methods. Introduction to Genetic Algorithm, Crossover, Mutation, Survival of Fittest, Population Size, Evaluation of Fitness Function.

UNIT– IV: Applications of Fuzzy Rule Based System

Introduction, System‟s Modeling and Simulation Using Fuzzy Logic Approach, Selection of Variables, Normalization Range and Number of Linguistic Values, Selection of Shape of Membership Functions for Each Linguistic Value, Selection of Fuzzy Union and intersection Operators, Selection of Defuzzification Method, Power System Stabilizer Using Fuzzy Logic.

UNIT– V: Applications of Soft Computing Techniques to Electrical Engineering

Applications of Artificial Neural Network, Genetic Algorithms, Fuzzy and Hybrid Systems for Power System Applications: voltage stability, Economic load dispatch, Unit commitment, Condition monitoring.

Text Books:

1. Neural Networks: A Comprehensive Foundation – Siman Haykin, IEEE, Press, MacMillan, N.Y. 1994.

Department of Mechanical Engineering

Date: 28-08-2021

Fifth meeting of BOS in Mechanical Engineering Department along with external members is held on 28/08/2021 at 02.00 PM in online mode through ZOOM meeting app in view of COVID-19 pandemic.

The following members are present.

S. No	Name of the BOS Members
1.	Dr.N. Mohan Rao, Professor &CE, JNTUK,Kakinada
2.	Dr. R.V. Chalam, Professor,NIT,Warangal
3.	Dr. A. Krishnaiah, Professor, Osmania University, Hyderabad
4.	Sri S.S. SubramanyaSastry, Head of Practice QMS Veave Technologies, Banglore, India.
5.	Sri A.Sai Krishna, Alumni, Maruthi Design and Engg. Pvt. Ltd ,Bangalore
6.	Dr. Ch.Rambabu, Professor & I/C Principal, SVEC
7.	Dr. M.V. Ramesh, Chairman & HOD, SVEC
8.	All the BOS internal members

Minutes of meeting

Chairman welcomed all the BOS members and introduced to all the BOS internal members.

Item No. 1: Approval of course structure and syllabi for VII & VIII semesters of B.Tech under V18 Regulations.

- Lab course named Production Drawing Lab (course code. **V18MEL13**), MNC course was changed to credit course and 1.5 credits were given in VII semester.
- The approved course structure and their syllabi is attached in **Annexure-I.**

Item No.2: Approval of list of courses offering under Open Electives - II & III in VII & VIII semesters of B.Tech respectively and their syllabi under V18 Regulations for all other branches.

- The approved courses offering under Open Electives are attached in **Annexure-II.**

Item No. 3: Approval of course structure & syllabi for the courses offered in III & IV semesters B.Tech under V20 Regulation.

- The approved course structure & their syllabi is attached in **Annexure-III.**

Item No. 4: Approval of Course Structure & syllabi of M.Tech-Thermal Engineering programme under V21 regulations.

- Approved by the BOS members **Annexure-IV**.

Detailed syllabi of VII & VIII sem B.Tech., for approval in 5th BOS
Syllabi for the courses offered in VII semester B. Tech under V18 Regulation
for the Academic Year 2021-2022
VII Semester

Semester	VII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MET20
Name of the Course	Automation in Manufacturing					
Branch	Mechanical Engineering					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Understand the basic types, levels, strategies of automation.	K2
CO2	Identify the basic components and their functions of automated production line system.	K2
CO3	Differentiate various automated assembly systems.	K4
CO4	Compute various storage system and transportation requirements of automated systems.	K3
CO5	Apply appropriate process control strategy to an automated system.	K3
CO6	Illustrate the concepts of CIM..	K3

UNIT – I
INTRODUCTION : Facilities — Manual work systems, worker-machine systems and automated systems. Manufacturing support systems, Automation in Production systems — Automated Manufacturing systems, Computerized manufacturing support systems, Manual labour in Production systems, Automation principles and strategies.
UNIT – II
AUTOMATED PRODUCTION LINES : Fundamentals- System configurations, work part transfer mechanisms, Storage buffers, and Control of the production line. Applications — Machining systems and System Design Considerations. Analysis of Transfer lines — Transfer lines with No internal parts storage, Transfer lines with internal storage buffers.
UNIT – III
AUTOMATED ASSEMBLY SYSTEMS : System configurations, Parts delivery at workstations, and applications, quantitative analysis of assembly systems-Parts Delivery System at Workstations, Multi-Station Assembly Machines, Single Station Assembly Machines, Partial Automation.
UNIT – IV
AUTOMATED MATERIAL TRANSPORT & STORAGE SYSTEMS : Automated Material Transport & Storage systems: Automated Guided Vehicle (AGV) Systems, Types and applications, Vehicle Guidance Technology, Vehicle Management and Vehicle safety. Automated Storage/Retrieval Systems (ASRS) and Carousel Storage Systems.

UNIT – V

AUTOMATED INSPECTION SYSTEMS : Quality in Design and manufacturing, inspection principles and strategies, automated inspection, contact Vison-contact, CMM. Manufacturing support systems. Quality function deployment, computer aided process planning, concurrent engineering, shop floor control, just in time and lean production.

UNIT – VI

COMPUTER INTEGRATED MANUFACTURING : The Scope of CAD/CAM and CIM, Computerized elements of a CIM System, Components of CIM, Database for CIM, Planning , Scheduling and Analysis of CIM Systems.

Semester	VII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MET21
Name of the Course	Operation Research					
Branch	Mechanical Engineering					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Understand the formulating of LPP and solve LPP by Simplex methods, artificial variables techniques.	K2
CO2	Solve Transportation and assignment problems.	K3
CO3	Explain the concept of Sequencing and replacement of item.	K2
CO4	Understand the concept of queues with single server, solution of games with and without saddle points.	K2
CO5	Apply the concept of inventory models in solving EOQ problems.	K3
CO6	Solve the issues of dynamic programming and simulation.	K3

UNIT – I
HISTORICAL OVERVIEW– Definition and scope– types of operation research models – applications.
LINEAR PROGRAMMING: Problem formulation – graphical solution – simplex method – artificial variables techniques - big-M method, two–phase method.
UNIT – II
TRANSPORTATION PROBLEM: Formulation – optimal solution, unbalanced transportation problem – degeneracy
ASSIGNMENT PROBLEM: Introduction, optimal solution, Traveling Salesman problem.
UNIT – III
SEQUENCING – Introduction – flow **–**shop sequencing – n jobs through two machines – n jobs through three machines
REPLACEMENT: Introduction – replacement of items that deteriorate with time – when money value is not counted and counted – replacement of items that fail completely, group replacement.
UNIT – IV
THEORY OF GAMES: Introduction – mini. max (max. mini) – criterion and optimal strategy – solution of games with saddle points – rectangular games without saddle points – 2 x 2 games – dominance principle – m x 2 & 2 x n games -graphical method.
WAITING LINES: Introduction – single channel – poison arrivals – exponential service times – with infinite population and finite population models
UNIT – V
INVENTORY : Introduction – single item – deterministic models – purchase inventory models with one price break– shortages are not allowed – stochastic models – demand may be discrete variable or continuous variable – instantaneous production. Instantaneous demand and continuous demand and no set up cost.
UNIT – VI
DYNAMIC PROGRAMMING: Introduction – Bellman’s principle of optimality – applications of dynamic programming- capital budgeting problem – shortest path problem .

SIMULATION: Definition – types of simulation models – phases of simulation– applications of simulation – inventory and queuing problems – advantages and disadvantages – simulation languages.

TEXT BOOKS:

1. Operations Research / S.D.Sharma-Kedarnath
2. Operations Research by R. Pannerselvam; Publisher: Prentice Hall International.

REFERENCES:

1. Introduction to O.R/Hiller & Libermann (TMH).
2. Operations Research / A.M.Natarajan, P. Balasubramani, A. Tamilarasi / Pearson Education.
3. Operations Research: Methods & Problems / Maurice Saseini, Arhur Yaspan & Lawrence Friedman.

Semester	**VII**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET22**
Name of the Course	**Industrial Engineering and Management** Professional Elective –II					
Branch	**Mechanical Engineering**					

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Design and conduct experiments, analyze, interpret data and synthesize valid conclusions	K4
CO2	Design a system, component, or process, and synthesize solutions to achieve desired needs	K4
CO3	Use the techniques, skills, and modern engineering tools necessary for engineering practice with appropriate considerations for public health and safety, cultural, societal, and environmental constraints	K3
CO4	Examine effectively within multi-disciplinary teams and understand the fundamental precepts of effective project management	K3
CO5	Understand quality and quality management	K2
CO6	Understand concepts on recourse management	K2

UNIT – I

INTRODUCTION: Definition of industrial engineering (I.E), development, applications, role of an industrial engineer, differences between production management and industrial engineering, quantitative tools of IE and productivity measurement. concepts of management, importance, functions of management, scientific management, Taylor’s principles, theory X and theory Y, Fayol’s principles of management.

UNIT – II

PLANT LAYOUT: Factors governing plant location, types of production layouts, advantages and disadvantages of process layout and product layout, applications, quantitative techniques for optimal design of layouts, plant maintenance, preventive and breakdown maintenance.

UNIT – III

WORK STUDY: Importance, types of production, applications, work study, method study and time study, work sampling, PMTS, micro-motion study, rating techniques, MTM, work factor system, principles of Ergonomics, flow process charts, string diagrams and Therbligs

UNIT – IV

STATISTICAL QUALITY CONTROL: Quality control, Queuing assurance and its importance, SQC, attribute sampling inspection with single and double sampling, Control charts – and R – charts and *S* charts and their applications, numerical examples.

UNIT – V

TOTAL QUALITY MANAGEMENT: zero defect concept, quality circles, implementation, applications, ISO quality systems. six sigma – definition, basic concepts

VALUE ANALYSIS: Value engineering, implementation procedure, enterprise resource planning and supply chain management.

UNIT – VI

RESOURCE MANAGEMENT: Concept of human resource management, personnel management and industrial relations, functions of personnel management, Job-evaluation, its importance and types, merit rating, quantitative methods, wage incentive plans, types.

PROJECT MANAGEMENT (PERT/CPM): Network Analysis, Programme Evaluation and Review Technique (PERT), Critical Path Method (CPM), Identifying critical path, Probability of Completing the project within given time, Project Cost Analysis, Project Crashing. (simple problems).

5. Statistical Quality Control /Gupta/Khanna Publishers
6. Industrial Engineering and Management /NVS Raju/Cengage Publishers

Semester	VII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MET23
Name of the Course	**Composite Materials** Professional Elective –II					
Branch	**Mechanical Engineering**					

Course Outcomes:
After Successful completion of this course the student will be able to

CO1	Explain the required properties, reinforcements and uses of various composites.	K2
CO2	Explain how common fibers are produced and how the properties of the fibers are related to the internal structure and the interfaces obtained.	K2
CO3	Illustrate the processing techniques for polymer matrix, ceramic matrix and metal matrix composites and list out their properties and applications	K3
CO4	Analyze different ceramic composite materials	K4
CO5	Examine the processing of ceramic matrix composites	K3
CO6	Evaluate mechanical properties of composite materials	K5

UNIT-I

Introduction, Classification of Composite materials based on structure and matrix and reinforcements, Advantages and applications of composites, Functional requirements of reinforcement and matrix materials. Difference between composites and metals &alloys, Properties of composites in comparison with standard materials

UNIT-II

TYPES OF REINFORCEMENTS AND THEIR PROPERTIES: Glass, Carbon, Boron, Aramid, Al_2O_3 and SiC fibers. Nature and manufacture of glass, carbon and aramid fibers, Comparison of fibers. Role of interfaces: Wettability and Bonding, the interface in Composites, Interactions and Types of bonding at the Interface.

UNIT-III

Fabrication of Polymeric Matrix Composites, Structure and properties of Polymeric Matrix Composites, Interface in Polymeric Matrix Composites, Applications,Recycling of PMCs

UNIT-IV

FABRICATION OF METAL MATRIX COMPOSITES (MMC): Solid state fabrication, Liquid state fabrication and In-situ fabrication techniques. Interface in Metal Matrix Composites. Mechanical bonding, Chemical bonding and Interfaces in In-situ Composites. MMC: Properties and Applications.

UNIT -V

FABRICATION OF CERAMIC MATRIX COMPOSITES (CMC): Processing of CMCs: Cold Pressing and Sintering, Hot Pressing, Reaction Bonding Processes, Infiltration, Sol–Gel process. Interface in CMCs. Properties of CMCs, Applications of CMCs.

UNIT -VI

MECHANICAL TESTING OF COMPOSITES AND THEIR CONSTITUENTS: Measurement of Constituent Material Properties Fiber Tests, Neat Resin Matrix Tests, Constituent Volume Fraction Measurement. Measurement of Basic Composite Properties: Tensile Tests, Compressive Tests, Shear Tests, Flexure Tests, Fiber/Matrix Interface Tests.

TEXT BOOKS:

1. Composite Materials – Science & Engineering, K.K. Chawla, Springer-Verlag, New York, 1987.
2. Principles of Composite Material Mechanics, Ronald F. Gibson
3. An Introduction to Composite Materials, Hull, Cambridge, 2nd Edt.1997.

REFERENCE BOOKS:

1. Composites, Engineered Materials Handbook, Vol.1, ASM International, Ohio, 1988.
2. Structure and Properties of Composites, Materials Science and Technology, Vol. 13, VCH, Weinheim, Germany, 1993
3. Composite Materials: Engineering and Science, F.L. Matthews and R.D. Rawlings, Chapman & Hall,London, 1994.

Semester	**VII**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET24**
Name of the Course	**Refrigeration & Air Conditioning** Professional Elective –II					
Branch	**Mechanical Engineering**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Apply the concept of refrigeration to various systems.	K3
CO2	Employ the methods to improve performance of vapor compression systems.	K3
CO3	Identify eco-friendly refrigerants and understanding various VCR System Components.	K2
CO4	Describe vapour absorption systems.	K2
CO5	Analyze cooling and heating loads in an air conditioning system.	K4
CO6	Explain various air conditioning systems.	K2

UNIT – I
INTRODUCTION TO REFRIGERATION: Necessity and applications – Unit of refrigeration and C.O.P. –Mechanical refrigeration – Types of ideal cycles of refrigeration.
Air refrigeration: Bell Coleman cycle - Open and Dense air systems – Refrigeration needs of Air crafts-Refrigeration systems used in air crafts and Problems.
UNIT – II
VAPOUR COMPRESSION REFRIGERATION: Working principle and essential components of the plant –simple vapour compression refrigeration cycle – COP – Representation of cycle on T-S and p-h charts – Effect of sub cooling and super heating – Cycle analysis – Actual cycle influence of various parameters on system performance – Use of p-h charts – Problems.
UNIT – III
Refrigerants – Classification – Desirable properties of an ideal refrigerant – Common refrigerants used – Nomenclature of refrigerants.
VCR System Components: Compressors – General classification – comparison – Advantages and Disadvantages. Condensers – Classification – Working Principles. Evaporators – Classification – Working Principles. Expansion devices – Types – Working Principles.
UNIT – IV
VAPOR ABSORPTION SYSTEM: Calculation of maximum COP – description and working of Water-Ammonia Systems, Water-Lithium Bromide System. Principle of operation three fluid absorption system, salient features.
UNIT – V
INTRODUCTION TO AIR CONDITIONING: Psychometric properties & Processes – Characterization of sensible and latent heat loads — Need for ventilation, Consideration of infiltration – Load concepts of RSHF, GSHF- Problems, concept of ESHF and ADP temperature.
Requirements of industrial air conditioning, Air conditioning load calculations.

UNIT – VI

AIR CONDITIONING SYSTEMS: Classification of equipment, Components related to Air-Conditioning Systems- filters, grills and registers, fans and blowers.

TEXT BOOKS:

1. A Course in Refrigeration and Air conditioning, SC Arora & Domkundwar, Dhanpatrai
2. Refrigeration and Air Conditioning, CP Arora, TMH.
3. Refrigeration and Air Conditioning / Manohar Prasad / New Age

REFERENCE BOOKS:

1. Principles of Refrigeration /Dossat / Pearson Education.
2. Basic Refrigeration and Air-Conditioning / Ananthanarayanan / TMH
3. Stoecker, W. F., and Jones, J. W., Refrigeration and Air-Conditioning, McGraw - Hill, New Delhi.
4. Data Book: Refrigerant and Psychrometric Properties - Tables and Charts [SI Units], MathurM. L., and Mehta F. S., Jain Brothers.

Semester	VII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MET25
Name of the Course	**Total Quality Management** Professional Elective –III					
Branch	**Mechanical Engineering**					

Course Outcomes:
After the completion of this course, the students will be able to

CO1	Understand the importance of significance of quality & to understand the concept of Quality.	K2
CO2	Develop quality improvement teams & to implement Quality Implementation Programs.	K3
CO3	Identify requirements of quality improvement programs & bench marketing	K2
CO4	Apply the tools and techniques of quality management to manufacturing and services processes.	K3
CO5	Apply the concepts of comprehensive quality management and the challenges of putting them into practice.	K3
CO6	Apply the quality management methods for analysing and solving problems of organization.	K3

UNIT – I
INTRODUCTION: The concept of TQM, Quality and Business performance, attitude and involvement of top management, communication, culture and management systems. Management of Process Quality: Definition of quality, Quality Control, a brief history, Product Inspection vs, Process Control, Statistical Quality Control, Control Charts and Acceptance Sampling.

UNIT – II
CUSTOMER FOCUS AND SATISFACTION: The importance of customer satisfaction and loyalty- Crating satisfied customers, Understanding the customer needs, Process Vs. Customer, internal customer conflict, quality focus, Customer Satisfaction, role of Marketing and Sales, Buyer – Supplier relationships. .

UNIT – III
BENCH MARKETING: Evolution of Bench Marketing, meaning of Bench marketing, benefits of bench marketing, the bench marketing process, pitfalls of bench marketing.

UNIT – IV
ORGANIZING FOR TQM: The systems approach, Organizing for quality implementation, making the transition from a traditional to a TQM organizing, Quality Circles. Productivity, Quality and Reengineering:

UNIT – V

THE COST OF QUALITY: Definition of the Cost of Quality, Quality Costs, Measuring Quality Costs, use of Quality Cost Information, Accounting Systems and Quality Management.

UNIT – VI

QUALITY MANAGEMENT SYSTEM (QMS): Introduction to QMS. Universal Standards of Quality: ISO around the world, The ISO9001 ANSI/ASQCQ-Series Standards, benefits of ISO9001 certification, the third party audit, Documentation ISO9001 and services, the cost of certification implementing the system.

TEXT BOOKS:

1. Total Quality Management / Joel E.Ross/Taylor and Franscis Limited
2. Total Quality Management/P.N.Mukherjee/PHI
3. Total Quality Management Paperback / R Kesavan, C Elanchezhian, B Vijaya Ramnath / I K International Publishing House

REFERENCE BOOKS:

1. Beyond TQM / Robert L.Flood
2. Statistical Quality Control / E.L. Grant / McGraw Hill.
3. Total Quality Management- A Practical Approach/H. Lal
4. Quality Management/Kanishka Bedi/Oxford University Press/2011
5. Total Engineering Quality Management/Sunil Sharma/Macmillan

Semester	VII	L	T	P	C	Course Code
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET26**
Name of the Course	**Finite Element Methods** Professional Elective – III					
Branch	**Mechanical Engineering**					

Course Outcomes:
After the completion of this course, the students will be able to

CO1	Use the concepts of variational methods and weighted residual methods in FEM.	K3
CO2	Use Finite Element Formulation for solving the problems.	K3
CO3	Solve the problems of Truss elements by FEM.	K3
CO4	Solve the problems of Beam s elements by FEM.	K3
CO5	Use FEM to solve 2D CST problems.	K3
CO6	Analyze finite element method for problems involving dynamics and heat transfer.	K4

UNIT-I
INTRODUCTION TO FINITE ELEMENT METHOD: stress and equilibrium, strain – displacement relations, stress-strain relations, plane stress and plane strain conditions, variational and weighted residual methods, the concept of potential energy, one-dimensional problems.

UNIT – II
FINITE ELEMENT FORMULATION: Discretization of the domain, element shapes, discretization procedures, assembly of stiffness matrix, bandwidth, node numbering, mesh generation, interpolation functions, convergence requirements, Treatment of Boundary conditions, Derivation of element stiffness matrix for Bar elements and problems

UNIT – III
ANALYSIS OF TRUSSES: Finite element modelling, coordinates and shape functions, assembly of global stiffness matrix and load vector, finite element equations, treatment of boundary conditions, stress, strain and support reaction calculations.

UNIT – IV
ANALYSIS OF BEAMS: Derivation of Element stiffness matrix for beam element, derivation of load vector for concentrated and UDL, Problems on Cantilever, simply supported beams with point and uniformly distributed loads.

UNIT-V
CST AND AXISYMMETRIC ELEMENTS: Finite element modelling of two-dimensional stress analysis with constant strain triangles and treatment of boundary conditions, formulation of axisymmetric problems,

HIGHER ORDER AND ISOPARAMETRIC ELEMENTS: One dimensional quadratic and cubic elements in natural coordinates, two dimensional four noded isoparametric elements, numerical integration.

UNIT – VI

STEADY STATE HEAT TRANSFER ANALYSIS: one dimensional analysis of a fin and two dimensional analysis of thin plate, analysis of a uniform shaft subjected to torsion.

DYNAMIC ANALYSIS: Formulation of finite element model, element consistent and lumped mass matrices, evaluation of eigen values and eigen vectors, free vibration analysis.

TEXT BOOKS:

1. The Finite Element Methods in Engineering / S. S Rao / Pergamon.

REFERENCE BOOKS:

1. Finite Element Method with applications in Engineering / YM Desai, Eldho& Shah /Pearson publishers
2. An introduction to Finite Element Method / JN Reddy / McGraw Hill
3. The Finite Element Method for Engineers – Kenneth H. Huebner, Donald L. Dewhirst, Douglas E. Smithand Ted G. Byrom / John Wiley &Sons (ASIA) Pte Ltd.
4. Finite Element Analysis/ P.Seshu
5. Finite Element Methods: Basic Concepts and Applications ByChennakesava R. Alavala
6. Finite Element Analysis: for students & Practicing Engineers / G.LakshmiNarasaiah / BSP Books Pvt.Ltd.

Semester	**VII**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET27**
Name of the Course	**Micro Electro Mechanical Systems (MEMS)** Professional Elective – III					
Branch	**Mechanical Engineering**					

Course Outcomes:

After successful completion of the course, the student will be able to

CO1	Understand about the basics of MEMS, Methods of Micro machining.	K2
CO2	Interpret various Mechanical sensors & Actuators	K3
CO3	Illustrate the working principles of various Thermal sensors and Actuators& its applications.	K3
CO4	Differentiate between different types of MOEMS devices	K4
CO5	Illustrate and explain various Magnetic sensors and Actuators & its applications	K3
CO6	Illustrate and explain various micro-fluidic devices & its applications	K3

UNIT – I
INTRODUCTION: Definition of MEMS, MEMS history and development, micro machining, lithography principles & methods, structural and sacrificial materials, thin film deposition, impurity doping, etching, surface micro machining, wafer bonding, LIGA.

UNIT – II
MECHANICAL SENSORS AND ACTUATORS: Principles of sensing and actuation: beam and cantilever, capacitive, piezo electric, strain, pressure, flow, pressure measurement by micro phone, MEMS gyroscopes, shear mode piezo actuator, gripping piezo actuator, Inchworm technology.

UNIT – III
THERMAL SENSORS AND ACTUATORS: Thermal energy basics and heat transfer processes, thermisters, thermo devices, thermo couple, micro machined thermo couple probe, micro hot plate gas sensors, MEMS thermo vessels, pyro electricity, shape memory alloys (SMA).

UNIT – IV
MICRO-OPTO-ELECTRO MECHANICAL SYSTEMS: Principle of MOEMS technology, properties of light, light modulators, beam splitter, micro lens, micro mirrors, digital micro mirror device (DMD), light detectors, grating light valve (GLV), optical switch.

UNIT – V
MAGNETIC SENSORS AND ACTUATORS: Magnetic materials for MEMS and properties, magnetic sensing and detection, magneto resistive sensor, more on hall effect, magneto

diodes, magneto transistor, MEMS magnetic sensor, pressure sensor utilizing MOKE, mag MEMS actuators, by directional micro actuator.

UNIT – VI

MICRO FLUIDIC SYSTEMS: Applications, considerations on micro scale fluid, fluid actuation methods, dielectro phoresis (DEP), electro wetting, electro thermal flow, thermo capillary effect, electro osmosis flow, opto electro wetting (OEW), micro fluid dispenser, micro needle, micro pumps.

TEXT BOOKS:

1. MEMS, Nitaigour Premchand Mahalik, TMH Publishing co.

REFERENCE BOOKS:

1. Foundation of MEMS, Chang Liu, Prentice Hall Ltd.
2. MEMS and NEMS, Sergey Edwrd Lyshevski, CRC Press, Indian Edition.
3. MEMS and Micro Systems: Design and Manufacture, Tai-Ran Hsu, TMH Publishers.
4. Introductory MEMS, Thomas M Adams, Richard A Layton, Springer International Publishers.

Semester	VII	L	T	P	C	Course Code
Regulation	**V18**	**0**	**0**	**3**	**1.5**	**V18MEL12**
Name of the Course	**Simulation Lab**					
Branch	**Mechanical Engineering**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Apply the tools like ANSYS or FLUENT in solving real time problems and day to day problems.	K3
CO2	Develop drawings for various components.	K3
CO3	Practice programming on CNC Machines.	K3

List of experiments:

1. **DRAFTING:** Development of part drawings for various components in the form of orthographic andisometric representation of dimensioning and tolerances scanning and plotting. Study of script, DXE and IGES files.

2. **PART MODELING:** Generation of various 3D models through protrusion, revolve, shell sweep. Creation of various features. Study of parent child relation. Feature based and Boolean based modelling surface and assembly modelling. Study of various standard translators. Design simple components.

3. a) Determinationofdeflectionandstressesin2Dand3Dtrussesandbeams.
   b) Determination of deflections component and principal and Von-mises stresses in plane stress, plane strain and axisymmetric components.
   c) Determination of stresses in 3D and shell structures (at least one example in each case)
   d) Estimation of natural frequencies and mode shapes, Harmonic response of 2D beam.
   e) Steady state heat transfer Analysis of plane and Axisymmetriccomponents.

4. a) Study of various post processors used in NC Machines.
   b) Machining of simple components on NC lathe and Mill by transferring NC Code / from a CAM package. Through RS 232.
   c) Practice on CNC Sinutrain Turning
   d) Practice on CNC Sinutrain Milling
   e) CNC programming forturned components using FANUC Controller
   f) CNC programming for milled components using FANUC Controller
   g) Automated CNC Tool path & G-Code generation using

   Pro/E/MasterCAM**Packages to be provided to cater to drafting, modeling & analysis from the following:**CATIA, Pro-E, I-DEAS, ANSYS, NISA, CAEFEM, Gibbs CAM, Master CAM etc.

Semester	VII	L	T	P	C	Course Code
Regulation	**V18**	**0**	**0**	**3**	**1.5**	**V18MEL13**
Name of the Course	**Production Drawing Lab**					
Branch	**Mechanical Engineering**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Recognise the need of limits, fits and tolerances, and apply the same on part drawings for manufacturing.	K2
CO2	Illusttrate the Geometric Dimensioning and tolerancing, able to apply GD&T to a part drawing.	K3
CO3	Indicate various surface roughness symbols on part drawings for manufacturing.	K2
CO4	Assess the raw material requirements, final cost of the component and heat treatment process.	K3
CO5	Develop skill to produce detailed drawings from assembly drawings.	K3
CO6	Construct press tools, die-casting dies and jigs and fixtures using computer aided design software.	K3

PART-A
LIMITS, FITS AND TOLERANCES: Types of fits, exercises involving selection and interpretation of fits and estimation of limits from tables.
GEOMETRIC DIMENSIONING AND TOLERANCING: Introduction to GD&T ,terminology & basic rules, features and material conditions, maximum material condition, least material condition, regardless of feature's size, datums, datum reference frame, **form tolerances, orientation tolerances, profile tolerances, runout tolerances.**
ADDING GD&T TO A DRAWING/DESIGN – size, location, orientation & form, choosing datums, indication of form and position tolerances on drawings, preparation of bill of material
SURFACE ROUGHNESS AND ITS INDICATIONS: Definition, types of surface roughness indication-Surface roughness obtained from various manufacturing process, recommended surface roughness on mechanical components, heat treatment and surface treatment symbols used on drawings.

PART-B
Drawing of parts from assembly of stuffing box, piercing and blanking die, Die casting die, Box jig, machining fixture with indication of size, tolerance, roughness, form and position tolerances using Computer aided design software.

TEXT BOOKS:
1. Production and Drawing – K.L. Narayana& P. Kannaiah/New Age Publication

Syllabi for the courses offered in VIII semester B. Tech under V18 Regulation for the Academic Year 2021-2022

VIII Semester

Semester	VIII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MET28
Name of the Course	Automobile Engineering					
Branch	Mechanical Engineering					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Understand various components in four wheel automobile.	K2
CO2	Differentiate between different types of transmission systems used in automobile.	K4
CO3	Examine steering geometry and steering systems used in automobile.	K3
CO4	Interpret suspension, breaking and electrical systems in automobile.	K3
CO5	Understand various safety systems used in automobile.	K2
CO6	Practice engine service for different components in automobile.	K3

UNIT – I
INTRODUCTION: Components of four wheeler automobile – chassis and body – power unit – power transmission – rear wheel drive, front wheel drive, 4 wheel drive – types of automobile engines, engine construction, turbo charging and super charging – engine lubrication, splash and pressure lubrication systems, oil filters, oil pumps – crank case ventilation – engine service, reboring, decarbonisation, Nitriding of crank shaft.

UNIT – II
TRANSMISSION SYSTEM: Clutches, principle, types, cone clutch, single plate clutch, multi plate clutch, magnetic and centrifugal clutches, fluid fly wheel – gear boxes, types, sliding mesh, construct mesh, synchromesh gear boxes, epicyclic gear box, over drive torque converter. Propeller shaft – Hotch – Kiss drive, Torquetube drive, universal joint, differential rear axles – types – wheels and tyres.

UNIT – III
STEERING SYSTEM: Steering geometry – camber, castor, king pin rake, combined angle toein, center point steering. Types of steering mechanism – Ackerman steering mechanism, Davis steering mechanism, steering gears– types, steering linkages.

UNIT – IV
SUSPENSION SYSTEM: Objects of suspension systems – rigid axle suspension system, torsion bar, shock absorber, Independent suspension system.

BRAKING SYSTEM: Mechanical brake system, hydraulic brake system, master cylinder, wheel cylinder tandem master cylinder requirement of brake fluid, pneumatic and vacuum brakes.
ELECTRICAL SYSTEM: Charging circuit, generator, current – voltage regulator – starting system, bendix drive mechanism solenoid switch, lighting systems, horn, wiper, fuel gauge – oil pressure gauge, engine temperature indicator etc.

UNIT – V
ENGINE SPECIFICATION AND SAFETY SYSTEMS: Introduction- engine specifications with regard to power, speed, torque, no. of cylinders and arrangement, lubrication and cooling etc.
Safety: Introduction, safety systems - seat belt, air bags, bumper, anti lock brake system (ABS), wind shield, suspension sensors, traction control, mirrors, central locking and electric windows, speed control.

UNIT – VI
ENGINE SERVICE: Introduction, service details of engine cylinder head, valves and valve mechanism, piston connecting rod assembly, cylinder block, crank shaft and main bearings, engine reassembly-precautions.

TEXT BOOKS:
1. Automotive Mechanics – Vol. 1 & Vol. 2 / Kirpal Singh/standard publishers
2. Automobile Engineering / William Crouse/TMH Distributors
3. Automobile Engineering/P.S Gill/S.K. Kataria & Sons/New Delhi.

REFERENCE BOOKS:
1. Automotive Engines Theory and Servicing/James D. Halderman and Chase D. Mitchell Jr.,/ Pearson education inc.
2. Automotive Engineering / K Newton, W.Steeds & TK Garrett/SAE
3. Automotive Mechanics: Principles and Practices/ Joseph Heitner/Van Nostrand Reinhold
4. Automobile Engineering / C Srinivasan / Mc Graw Hill

Semester	**VIII**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET31**
Name of the Course	**Process Planning & Cost Estimation** Professional Elective – IV					
Branch	**Mechanical Engineering**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Understand the basic concepts of production, steps involved in types of process planning.	K2
CO2	Calculate the process parameters for various production processes.	K3
CO3	Prepare the types of estimates.	K3
CO4	Calculate depreciation cost and explain about different costs.	K3
CO5	Estimate production cost in forging, welding and foundry.	K2
CO6	Determine the machining time of different machining operations.	K4

UNIT – I
INTRODUCTION: Types of production, standardization, simplification, product design and selection-process planning-methods, selection and analysis-steps involved in manual and computer aided process planning-Break even analysis.

UNIT – II

PROCESS PLANNING ACTIVITIES: Calculation of process parameters for various production processes-Selection of jigs & fixtures-Selection quality assurance methods-Set of documents for process planning.

UNIT – III

ESTIMATION AND COSTING: Aim and objective of cost estimation – Functions of estimation – Costing – Importance and aims of costing – Difference between costing and estimation. Types of estimates – Estimation procedure.

UNIT – IV

COST ELEMENTS: Material cost – Determination of material cost, labour cost, Expenses – – Analysis of overhead expenses – Factory expenses, Administrative expenses – Selling and Distributing expenses – Allocation of over head expenses. Cost of product – Illustrative examples Depreciation: Depreciation – Causes of Depreciation – Methods of Depreciation calculation.

UNIT – V
ESTIMATION OF PRODUCTION COST : Estimation in forging shop – Losses in forging – forging cost – Illustrative examples. Estimation in welding shop – Gas cutting – Electric

welding - Illustrative examples. Estimation in foundry shop – Estimation of pattern cost and casting cost - Illustrative examples.

UNIT – VI

MACHINING TIME ESTIMATION: Estimation of Machining Time for Lathe operations – Estimation of Machining Time for Drilling, Boring, Shaping, Planning, Milling and Grinding operations - Illustrative examples.

TEXT BOOKS:

1. M.Adithian and B.S. Pabla, Estimation and Costing, Konark publishers Pvt. Ltd., 1989.
2. A.K.Chitale and R.C.Gupta, Product Design and Manufacturing, Prentice Hall Pvt. Ltd.., 2005

REFERENCE BOOKS :

1. Namua Singh, System Approach to computer integrated Design and Manufacturing, John Wiley & Sons,Inc.,1996.
2. Joseph G Monks, Operation Management, Theory & Problems, McGraw Hill Book Company, 1987.
3. T.R.Banga and S.C.Sharma, Estimations and Costing, Khanna Publishers,1988.
4. G.B.S.Narang and V.Kumar, Production and Costing, Khanna Publishers, 1995.
5. Sinha B.P – Mechanical estimating & costing – Tata McGrawhill publishing co.,1995

Semester	VIII	L	T	P	C	Course Code
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET32**
Name of the Course	**Non Destructive Evaluation** Professional Elective – IV					
Branch	**Mechanical Engineering**					

Course Outcomes:
After Successful completion of this course the student will be able to

CO1	Examine the Radiograpic test method	K3
CO2	Examine the Radiograpic test method	K3
CO3	Understand the Radiograpic test method	K2
CO4	Understand the Radiograpic test method	K2
CO5	Examine the Radiograpic test method	K3
CO6	Apply knowledge of non destructive testing methods for the products of railways, automobiles, aircrafts, chemical industries etc.	K3

UNIT – I
Introduction to non-destructive testing, Radiographic test, Sources of X and Gamma Rays and their interaction with Matter, Radiographic equipment, Radiographic Techniques, Safety Aspects of Industrial Radiography.

UNIT – II
ULTRASONIC TEST: Principle of Wave Propagation, Reflection, Refraction, Diffraction, Mode Conversion and Attenuation, Sound Field, Piezo-electric Effect, Ultrasonic Transducers and their Characteristics, Ultrasonic Equipment and Variables Affecting Ultrasonic Test, Ultrasonic Testing, Interpretations and Guidelines for Acceptance, Rejection, Effectiveness and Limitations of Ultrasonic Testing.

UNIT – III
LIQUID PENETRANT TEST: Liquid Penetrant Test, Basic Concepts, Liquid Penetrant System, Test Procedure, Effectiveness and Limitations of Liquid Penetrant Testing.
EDDY CURRENT TEST: Principle of Eddy Current, Eddy Current Test System, Applications of Eddy Current Testing Effectiveness of Eddy Current Testing.

UNIT – IV
MAGNETIC PARTICLE TEST: Magnetic Materials, Magnetization of Materials, Demagnetization of Materials,Principle of Magnetic Particle Test, Magnetic Particle Test Equipment, Magnetic Particle Test Procedure, Standardization and Calibration, Interpretation and Evaluation, Effective Applications and Limitations of the Magnetic Particle Test.

UNIT – V
INFRARED AND THERMAL TESTING: Introduction and fundamentals to infrared and thermal testing, Heat transfer –Active and passive techniques, Lock in and pulse thermography, Contact and non contact thermal inspection methods, Heat sensitive paints and papers, thermally quenched phosphors liquid crystals, techniques for applying liquid crystals, other temperature sensitive coatings, Inspection methods, Infrared radiation and

infrared detectors, thermo mechanical behavior of materials, IR imaging in aerospace applications,electronic components, Honey comb and sandwich structures–Case studies.

UNIT – VI

INDUSTRIAL APPLICATIONS OF NDE: Span of NDE Activities Railways, Nuclear, Non-nuclear and Chemical Industries, Aircraft and Aerospace Industries, Automotive Industries, Offshore Gas and Petroleum Projects, Coal Mining Industry, NDE of pressure vessels, castings, welded constructions.

TEXT BOOKS:

1. Non destructive test and evaluation of Materials/J Prasad, GCK Nair/TMH Publishers
2. Ultrasonic testing of materials/ H Krautkramer/Springer
3. Non destructive testing/Warren, J Mc Gonnagle / Godan and Breach Science publishers
4. Nondestructive evaluation of materials by infrared thermography / X. P. V. Maldague, Springer-Verlag, 1st edition, (1993)

REFERENCE BOOKS:

1. Ultrasonic inspection training for NDT/ E. A. Gingel/Prometheus Press,
2. ASTM Standards, Vol 3.01, Metals and alloys
3. Non-destructive, Hand Book – R. Hamchand

Semester	VIII	L	T	P	C	Course Code
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET33**
Name of the Course	**Industrial Hydraulics and Pneumatics** Professional Elective – IV					
Branch	**Mechanical Engineering**					

Course Outcomes:
After Successful completion of this course the student will be able to

CO1	UnderstandthefundamentalsofFluidPowerSystems	K2
CO2	Develop generalconceptsassociatedwithHydraulicactuators and cylinders.	K3
CO3	Identify Hydraulic elements in the design of circuits	K2
CO4	Illustrate various accumulators&intensifiers	K3
CO5	Developtheoperationofpnuematicscircuitsandcomponentstypicallyusedini ndustry.	K3
CO6	Examine the applications of Industrial Hydraulics and Pneumatics.	K3

UNIT–I
FUNDAMENTALSOFFLUIDPOWERSYSTEMS-INTRODUCTION – typesadvantages,disadvantages & applications-fluid characteristics-terminologies used in fluidpower-hydraulicsymbols-hydraulicsystemsandcomponents-sources-pumpingtheory-gear,vane&pistonpumps.

UNIT-II
FLUIDPOWERACTUATORS: Introduction-hydraulicactuators-hydrauliccylinders-types,construction,specificationsandspecialtypes.Hydraulicmotors-workingprinciple-selectioncriteriaforvarioustypes-hydraulicmotorsincircuits-formulae-numericalproblems

UNIT-III
HYDRAULIC ELEMENTS IN THE DESIGN OF CIRCUITS- Introduction-control elements-directioncontrolvalve-checkvalve-pressurecontrolvalve-reliefvalve-throttle valve-temperature & pressure compensation-locations of flow controlvalve

UNIT-IV
ACCUMULATORS&INTENSIFIERS-types,size&functionofaccumulators-application&circuitsofaccumulators-intensifiers-circuit&applications.

UNIT-V
PNEUMATICSYSTEMS-INTRODUCTION-symbolsused-concepts&components-comparison-types&specificationsofcompressors-arrangementofa completepneumaticsystem-compressedairbehaviour-understandingpneumaticcircuits-directioncontrol valves

UNIT-VI

APPLICATIONS- Servo systems-introduction-closed loop, hydro-mechanical andelectro hydraulic – conventional and proportional valves-characteristics ofproportional and servo valves- PLC applications in fluid power – selectedpneumatic / electro pneumatic circuit problems – failure and trouble shootinginfluidpowersystems.

TEXTBOOKS:

1. IntroductiontoHydraulicsandPneumaticsbyS.IlangoandV.Soundararajan,PHI , NewDelhi
2. Appliedhydraulicsandpneumatics-T.SunderSelwyn&R.Jayendiran,Anuradha Publications.

REFERENCEBOOKS:

1. OilHydraulicSystems,S.R.Majumdar,McGrawHillCompanies

Semester	**VIII**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET34**
Name of the Course	**Computational Fluid Dynamics** Professional Elective – V					
Branch	**Mechanical Engineering**					

Course Outcomes:
After Successful completion of this course the student will be able to

CO1	Apply techniques in the numerical solution of fluid equations	K3
CO2	Apply numerical modeling and its role in the field of heat transfer and fluid flow.	K3
CO3	Develop methodologies used in CFD	K3
CO4	Comapre various discretization methods and solving methodologies.	K4
CO5	Apply skills in the actual implementation of CFD methods (e.g. boundary conditions, different numerical schemes etc.	K3
CO6	Apply the finite element methods in the application of CFD analysis to real life engineering designs.	K3

UNIT – I

ELEMENTARY DETAILS IN NUMERICAL TECHNIQUES: Number system and errors, representation of integers, fractions, floating point arithmetic, loss of significance and error propagation, condition and instability, computational methods for error estimation, convergence of sequences.

UNIT – II

APPLIED NUMERICAL METHODS: Solution of a system of simultaneous linear algebraic equations, iterative schemes of matrix inversion, direct methods for matrix inversion, direct methods for banded matrices.

EQUATIONS GOVERNING FLUID FLOW AND HEAT TRANSFER: Introduction, conservation of mass, Newton's second law of motion, expanded forms of navier-stokes equations, conservation of energy principle, special forms of the navier-stokes equations.

UNIT – III

Steady flow, dimensionless form of momentum and energy equations, stokes equation, conservative body force fields, stream function - vorticity formulation. Finite difference applications in heat conduction and convention – heat conduction, steady heat conduction in a rectangular geometry, transient heat conduction, finite difference application in convective heat transfer, closure.

UNIT – IV

Finite differences, discretization, consistency, stability, and fundamentals of fluid flow modeling: introduction, elementary finite difference quotients, implementation aspects of finite-difference equations, consistency, explicit and implicit methods.

UNIT – V

Introduction to first order wave equation, stability of hyperbolic and elliptic equations, fundamentals of fluid flow modeling, conservative property, the upwind scheme

UNIT – VI

FINITE VOLUME METHOD: Approximation of surface integrals, volume integrals, interpolation and differentiation practices, upwind interpolation, linear interpolation and quadratic interpolation.

TEXT BOOKS:

1. Numerical heat transfer and fluid flow / Suhas V. Patankar- Butter-worth Publishers.
2. Computational fluid dynamics - Basics with applications - John. D. Anderson / McGraw Hill.

REFERENCE BOOKS:

1. Computational Fluid Flow and Heat Transfer/ Niyogi, Pearson Publications.
2. Fundamentals of Computational Fluid Dynamics – Tapan K. Sengupta / Universities Press.
3. Computational fluid dynamics, 3rd edition/Wendt/Springer publishers

Semester	VIII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MET35
Name of the Course	**Production Planning and Control** Professional Elective – V					
Branch	**Mechanical Engineering**					

Course Outcomes:
After Successful completion of this course the student will be able to

CO1	Generalise structure, elements and functions of Production planning and Control.	K2
CO2	Apply the principles of different forecasting methods.	K3
CO3	Analyze principles of different inventory control systems.	K4
CO4	Generalise Routing, its procedure, factors affecting Routing procedure.	K2
CO5	Explain Scheduling methods, Planning and controlling aspects.	K2
CO6	Understand Dispatching procedure, types of follow up, applications of computers in production planning and control.	K2

UNIT – I
Introduction: Definition – objectives and functions of production planning and control – elements of production control – types of production – organization of production planning and control department – internal organization of department.

UNIT – II
Forecasting– importance of forecasting – types of forecasting, their uses – general principles of forecasting – forecasting techniques – qualitative methods and quantitive methods.

UNIT – III
Inventory management– functions of inventories – relevant inventory costs – ABC analysis – VED analysis – EOQ model – Inventory control systems – P–Systems and Q-Systems. Introduction to MRP I, MRP II, ERP, JIT systems.

UNIT – IV
Routing– definition – routing procedure –route sheets – bill of material – factors affecting routing procedure, schedule –definition – difference with loading.

UNIT – V
Scheduling policies– techniques, standard scheduling methods. Line Balancing, aggregate planning, chase planning, expediting.

UNIT – VI
Dispatching– activities of dispatcher – dispatching procedure – follow up – definition – reasons for existence of functions – applications of computers in production planning and control.

TEXT BOOKS:
1. Elements of Production Planning and Control / Samuel Eilon.
2. Manufacturing, Planning and Control, Partik Jonsson Stig-Arne Mattsson, Tata Mc Graw Hill

Semester	VIII	L	T	P	C	Course Code
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MET36**
Name of the Course	**Energy Conservation and Management** Professional Elective – V					
Branch	**Mechanical Engineering**					

Course Outcomes:
After Successful completion of this course the student will be able to

CO1	Understand the principles of Energy.	K2
CO2	Evaluate thermal Performance.	K5
CO3	Illustrate Energy Conservation Program.	K3
CO4	Predict the Energy Conservation Options	K2
CO5	Recognise the Strategies for Electricity and Management	K2
CO6	Express the Importance and Role of Energy Management	K2

UNIT-I
Energy scenario, Principles of energy conservation, Energy consumption pattern, Resource availability.

UNIT-II
Calculation of thermal performance, calculation of heat loss – heat gain, estimation of annual heating & cooling load factors that influence thermal performance, analysis of existing buildings.

UNIT-III
Organizing for energy conservation program, the energy audit and energy information system, technology for energy conservation, co-generation of process, steam & electricity, computer controlled energy.

UNIT-IV
Commercial options in waste heat recovery equipment, cases of energy studies, energy conservation opportunity, Energy conservation in I. C. Engine.

UNIT-V
Strategies for electricity and management, setting up an energy management programme, electricity saving technique by category of end use, Electrical end use in industries, energy & power management in industry, energy management strategies for industry, demand management.

UNIT-VI
Importance and role of energy management, Energy economics, Payback period, Internal rate of return, life cycle costing.

TEXT BOOKS:

1. Hamies, Energy Auditing and Conservation, Methods, Measurements, Management and Case Study, Hemisphere,Washington, 1980
2. W.F.Kenny, Energy Conservation in Process Industry.
3. Trivedi, P.R, Jolka K.R., Energy Management, Commonwealth Publication, New Delhi, 1997.
4. C.B.Smith, Energy Management Principles, Pergamon Press, New York, 1981.

Annexure II

Course offered in OPEN ELECTIVE - II & III in VII & VIII sem B.Tech., under V18 Regulations
VII SEMESTER

Semester	VII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MEOE4
Name of the Course	**Computer Aided Design** Open Elective – II					
Branch	**Mechanical Engineering**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Explain the basic fundamentals of CAD tools	K2
CO2	Find the characteristics of curves, Representation and continuity requirements	K3
CO3	Illustrate the Geometric Transformations.	K3
CO4	Demonstrate various types of surfaces and Representation.	K3
CO5	Differentiate between the methods of representing Solid Modelling.	K4
CO6	Apply the local and global properties for product development	K3

UNIT – I
CAD Introduction: Need of machine design, use of computer, computer fundamentals, computer aided design process, CAD configuration, and CAD tools, positive and negative points of CAD, CAD and CAM integration.

UNIT – II
DESIGN OF CURVES: Fundamental of Curve Design, Parametric Space of a Curve, Representation, Parametric cubic curve, Blending functions, Truncation, extension, and subdivision, composite curve: continuity requirements .

UNIT – III
GEOMETRIC TRANSFORMATIONS: Translation, Rotation, Scaling Symmetry and Reflection, Homogeneous Transformations. Orthographic Projections, Axonometric Projections, Oblique Projections, Perspective Transformation.

UNIT – IV
DESIGN OF SURFACES: Fundamental of Surface Design, Parametric Space of a Surface, Representation of a Surface patch, sixteen point form, Four Curve Form, Plane.

UNIT – V
SOLID MODELLING: Solid Modelling fundamentals, topology and geometry. Geometric Modelling Method, Constructive Solid Geometry (CSG), Boundary Representation (Brep), Introduction to Wireframe, surface and solid modelling techniques. Introduction CAD data exchange format IGES, STEP

UNIT – VI

GEOMETRIC PROPERTIES: Local and global properties of a curve, Local and global properties of a surface, Global properties of complex solids, Relational properties, intersections. Applications in Product Development and other areas.

REFERENCE BOOKS:

1. Geometric Modeling: Michael E. Mortenson, Third Edition, Industrial Press Inc.2006.
2. Mathematical Elements of Computer Graphics, Rogers and Adams, McGraw Hill. 1994
3. CAD CAM Theory and Prectice: I. Zeid, Tata-McGraw Hill, 2006
4. Computer-Aided Engineering Design, B Sahay and ASaxena, Springer, 2005.
5. Differential Geometry of Curves and Surfaces, Thomas F. Banchoff and Stephen T. Lovett, Thomas Banchoff-Stephen Lovett, 2010.
6. Computational Geometry for Design and Manufacture, I.D. Faux and M.J. Pratt, John Wiley, 1980.
7. Lectures on Classical Differential Geometry, Dirk J. Struick, Addison Wesley, 1980.

Semester	**VII**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V18**	**3**	**0**	**0**	**3**	**V18MEOE5**
Name of the Course	**Condition Monitoring and Machine Learning** Open Elective – II					
Branch	**Mechanical Engineering**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Understand various condition monitoring techniques	K2
CO2	Demonstrate the construction and principle of working of sensors for condition monitoring.	K3
CO3	Interpret the concepts of signal processing analysis	K3
CO4	Assess various failure analysis and maintenance.	K3
CO5	Examine the elements of Machine condition monitoring	K3
CO6	Examine the concepts of machine learning systems for signal analysis and fault detection systems	K3

UNIT – I
CONDITION MONITORING TECHNIQUES: Introduction, Condition Monitoring in manufacturing industries; Noise monitoring, Wear and debris Analysis, Thermography, Cracks monitoring, Ultrasonic techniques - Case studies.

UNIT – II
SENSORS FOR CONDITION MONITORING: Accelerometers, strain gauges, eddy current probes, LVDT for measurement of displacement, velocity and acceleration; Temperature transducers, radiation pyrometers and thermal imaging devices.

UNIT – III
SIGNAL PROCESSING: Study of periodic and random signals, probability distribution, statistical properties, auto and cross correlation and power spectral density functions.
SIGNAL ANALYSIS: Time domain and Frequency domain and Time-frequency domain analysis

UNIT – IV
FAILURE ANALYSIS AND MAINTENANCE: Maintenance Principles, Failure mode analysis - Equipment down time analysis – Breakdown analysis - condition based maintenance.

UNIT – V
MACHINE CONDITION MONITORING: Vibration, Acoustic emission and vibro-acoustics signal analysis; intelligent fault detection system, Case studies.

UNIT – VI
MACHINE LEARNING: Vibration, Acoustic emission and vibro-acoustics signal analysis; intelligent fault detection system, Case studies.

TEXT BOOKS:

1. EthemAlpaydin, Introduction to Machine Learning (2010), The MIT Press, Cambridge, London.

REFERENCE BOOKS:

2. Amiya RanjanMohanty, Machinery Condition Monitoring: Principles and Practices (2015), CRC Press
3. Mishra, R.C., Pathak, K., Maintenance Engineering and Management (2012), Prentice Hall of India.
4. Clarence W. De Silva, Sensors and Actuators: Control System Instrumentation (2007), CRC Press – Taylor and Francis Group.
5. Boualem Boashash, Time Frequency Signal Analysis and Processing: A Comprehensive Reference (2015), Elsevier.

VIII SEMESTER

Semester	VIII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MEOE6
Name of the Course	**Power Plant Engineering** Open Elective – III					
Branch	**Mechanical Engineering**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Explain the working and layout of steam power plant and the different systems comprising the plant.	K2
CO2	Outline the working principle of diesel power plant and its layout.	K2
CO3	Illustrate the working and layout of gas turbine power plant and various auxiliaries comprising the plant.	K3
CO4	Construct the working principle and basic components of the hydro electric plants.	K3
CO5	Describe the and basic components and working principle of different reactors of nuclear power plant.	K2
CO6	Outline the power plant economics .	K4

UNIT – I
Introduction to the Sources of Energy.
Steam Power Plant: Plant layout, working of different circuits, coal handling equipment, ash handling systems, overfeed and underfeed fuel beds, types of stokers, dust collectors, cooling towers and feed water treatment.

UNIT – II
Diesel power Plant: IC Engines, types, Plant layout with auxiliaries – fuel supply system, air starting equipment, lubrication and cooling system, super charging.

UNIT – III
Gas Turbine Plant: Introduction, classification, construction, Layout with auxiliaries, Principles ofworking of closed and open cycle gas turbines, combined cycle power plants and comparison.

UNIT – IV
Hydro Electric Power Plant: Water power , hydrological cycle, hydrographs, classification of dams and spill ways.
Hydro Projects and Plant: Classification – typical layouts – plant auxiliaries – plant operation pumped storage plants.

UNIT – V

Nuclear Power Station: Nuclear fuel – breeding and fertile materials, nuclear reactor – reactor operation. Types of reactors and their operation - Pressurized water reactor, boiling water reactor, sodium-graphite reactor, fast breeder reactor. Radiation hazards and shielding, radioactive waste disposal.

UNIT – VI

Power Plant Economics: Capital cost, investment of fixed charges, operating costs, general arrangement of power distribution, load curves, load duration curve, definitions of connected load, maximum demand, demand factor, average load, load factor, diversity factor – related exercises.

TEXT BOOKS:

1. A course in Power Plant Engineering /Arora and Domkundwar/Dhanpatrai& Co.
2. Power Plant Engineering /P.C.Sharma / S.K.Kataria Pub

REFERENCE BOOKS:

1. Power Plant Engineering: P.K.Nag/ TMH.
2. Power station Engineering – M.M.Ei-Wakil / McGrawHill.

Semester	VIII	L	T	P	C	Course Code
Regulation	V18	3	0	0	3	V18MEOE7
Name of the Course	**Mechatronics** Open Elective – III					
Branch	**Mechanical Engineering**					

Course Outcomes:
After successful completion of the course, the student will be able to

CO1	Understand the elements of Mechatronics & levels and explain various types of sensors , transducers and Mechatronics design process	K2
CO2	Sketch and explain various types of solid state devices like Diode, BJT, MOSFET, etc.,	K3
CO3	Illustrate and explain basic principles of Hydraulic, pneumatic, electro hydraulic, electro hydraulic servo actuating systems.	K3
CO4	Illustrate and explain microprocessors, microcontrollers and PLC	K3
CO5	Sketch and explain System interfacing and data acquisition systems.	K3
CO6	Sketch and explain Digital Controllers and Design of mechatronics systems.	K3

UNIT – I
MECHATRONICS SYSTEMS – elements & levels of mechatronics system, Mechatronics design process, system, measurement systems, control systems, advantages and disadvantages of mechatronics systems. Sensors and transducers, types, displacement, velocity, force, acceleration, liquid flow, liquid level, temperature and light sensors.

UNIT– II
SOLID STATE ELECTRONIC DEVICES - PN junction diode, BJT, FET, Analog signal conditioning, operational amplifiers, filters.

UNIT– III
HYDRAULIC AND PNEUMATIC ACTUATING SYSTEMS - Fluid systems, Hydraulic systems, and pneumatic systems, components, control valves, electro-pneumatic, hydro-pneumatic, electro-hydraulic servo systems.

UNIT– IV
DIGITAL ELECTRONICS AND SYSTEMS - Digital logic control, micro processors and micro controllers, programming, programmable logic controllers, PLCs versus computers, application of PLCs for control.

UNIT– V
SYSTEM AND INTERFACING AND DATA ACQUISITION – Data Acquisition Systems, Analog to Digital and Digital to Analog conversions; Digital Signal Processing.

UNIT– VI

DYNAMIC MODELS AND ANALOGIES - System response. Process Controllers – Digital Controllers, Programmable Logic Controllers, Design of mechatronics systems & future trends.

TEXT BOOKS:

1. MECHATRONICS Integrated Mechanical Electronics Systems/KP Ramachandran, GK Vijaya Raghavan & MS Balasundaram/WILEY India Edition

REFERENCE BOOKS:

1. Mechatronics /Smaili A, Mrad F/ Oxford Higher Education, Oxford University Press
2. Mechatronics Source Book / Newton C Braga/Thomson Publications,Chennai.
3. Mechatronics – N. Shanmugam / Anuradha Agencies Publishers.
4. Mechatronics System Design / Devdas shetty/Richard/Thomson.
5. Mechatronics/M.D.Singh/J.G.Joshi/PHI.
6. Mechatronics – Electronic Control Systems in Mechanical and Electrical Engg. 4th Edition / W. Bolton/ Pearson, 2012
7. Mechatronics – Principles and Application / Godfrey C. Onwubolu/Elsevier, Indian print

Annexure – III

Course structure & Syllabi for the courses offered in III & IV semesters B. Tech under V20 Regulations

Course Structure of Mechanical Engineering – V20 Regulation
(For 2020 – 2021 Admitted Batch)

Syllabi for the courses offered in III & IV semester B. Tech under V20 Regulation for the Academic Year 2021-2022 III Semester

Semester	III	L	T	P	C	Course Code
Regulation	V20	3	0	0	3	V20MET03
Name of the Course	Metallurgy and Material Science					
Branch	Mechanical Engineering					

Course Outcomes:

	After successful completion of the course, the student willbe able to:	Knowledge Level
CO1	Explain the types of bonds in solids and crystallization of Metals.	K2
CO2	Construct phase diagrams for the study of alloys and phase Transformation reactions.	K2
CO3	Use different ferrous and nonferrous metals based on properties for various applications	K3
CO4	Apply suitable heat treatment process to achieve desired properties of metals andalloys.	K3
CO5	Illustrate the properties and applications of compositesand Ceramic materials and understand the concepts of powder metallurgy.	K2

UNIT – I

INTRODUCTION TO METALLURGY AND MATERIAL SCIENCE: Structure of Metals, Properties of metals,TypesofBondsinSolids,Crystalgeometry–SpaceLattices,Unitcells,Crystal Structure, Miller indices. Imperfections in crystals- Line defects, Point defects, Surface defects. Crystallization of metals, grain, grain boundaries and their properties. Constitution of alloys: Necessity of alloying, types of solid solutions, Hume Rotherys rules.

UNIT – II

EQUILIBRIUM DIAGRAMS: Experimental methods of construction of equilibrium diagrams, phase rule, Isomorphous alloy systems, Lever rule, eutectic systems, peritectic reaction. Transformations in the solid state – allotropy, eutectoid, peritectoid reactions, Study of important binary phase diagrams of Cu-Ni, Al- Si, and Fe-Fe3C.

UNIT – III

FERROUS, NONFERROUS METALS AND THEIR ALLOYS: Production of Iron and steel: Blast furnace, Cupola, Electric furnace and Induction furnace, Types of Cast irons- White, Grey, Malleable and Nodular Cast Irons, Properties and applicationofcastirons,Effectofalloyingelementsonstructureandproperties of steels, Properties and uses of Silicon and Hadfield Manganese steels, High speed steels and Stainless steel. Properties and uses of important non-ferrous metals like Cu, Al, Pb, Sn, Zn. Study of important non-ferrous alloys: Brass & Bronzes, Bearing alloys,Al alloys & Ti alloys.

UNIT – IV

HEAT TREATMENT OF FERROUS AND NON-FERROUS ALLOYS: Types of heat treatment processes, Annealing, normalizing, hardening, tempering, hardenability, surface - hardening methods, TTT diagrams, Age hardening treatment

UNIT – V

ADVANCED MATERIALS: Composites and its classification, methods of manufacturing of composites – stir casting method, hand layup process, filament winding process. Properties and applications of crystalline ceramics, shape memory alloys, Bio materials and nano-materials

POWDER METALLURGY: Introduction, Steps in Powder metallurgy, Powder characterizations, powder compact methods.

TEXT BOOKS:

1. Introduction to Physical Metallurgy/ Sidney H.Avner/ 2nd edition, McGraw Hill Education(India) Private Limited/2016.
2. Materials Science andEngineering/William D Callister (Adapted by R. Bala subramaniam) /Wiley Inida (P) Ltd/ 2007
3. Material Science and Metallurgy/ Dr.V.D.Kodgire/40th edition, Everest Publishing House/2017

REFERENCE BOOKS

1. Materials Science and Engineering/ V. Raghavan /5th Edition) Prentice-Hallof India Pvt. Ltd/2004.
2. Essential of Materials science and engineering /Donald Askeland/2ndedition Thomson/2014
3. Engineering mechanics of Composite Materials/Isaac M.Daniel,Ori Ishai/ 5th edition/Oxford Publications/2015.

Semester	**III**	**L**	**T**	**P**	**C**	**Course Code**
Regulation	**V20**	**3**	**0**	**0**	**3**	**V20MET04**
Name of the Course	**Mechanics of Solids**					
Branch	**Mechanical Engineering**					

Course Outcomes:

	After successful completion of the course, the student will be able to	Knowledge Levels
CO1	Illustrate concept of stress and strain of composite bars.	K3
CO2	Solve shear force and bending moment in beams.	K3
CO3	Calculate flexural and shear stresses in a beam and understand thetorsional rigidity of shaft.	K3
CO4	Analyze the principal stresses in structural members.	K4
CO5	Solve the buckling load capacity of columns, and longitudinal stress and strains in thin cylinders.	K3

UNIT – I
SIMPLE STRESSES & STRAINS: Definitions of stress and strain – types of stresses and strains – Elasticity –Hooke's law–Stress–Strain diagram for Mild steel – working stress- factor of safety-Lateral strain–Poisson's ratio and volumetric strain – Elastic Moduli and the relationship between elastic constants– Bars of varying section – composite bars – temperature stresses.
STRAIN ENERGY: Definition – Resilience – Strain Energy due to gradually applied; suddenly applied and impact loads–simple applications.

UNIT – II
SHEAR FORCE & BENDING MOMENT DIAGRAMS: Definition of beam –Types of beams – concept of SF and BM – SF & BM diagrams for cantilever, Simple support and over hanging beams subject end point loads, Uniform distributed load (UDL), uniformly varying loads– point of contra flexure –Relationship between S.F, BM and rate of loading.

UNIT – III
FLEXURAL STRESSES: Theory of simple Bending – Assumptions–Derivation of Bending equation – Neutral axis – Determination of bending stresses – section modulus of rectangular, Circular sections (Solid and Hollow), I and T channel sections.
DEFLECTION OF BEAMS: Relation between curvature, slope and deflection; Slope and deflection of cantilever, simply supported with point and U.D.L– Macaulay's method.

UNIT – IV
PRINCIPAL STRESSES AND STRAINS: Introduction – stresses on an inclined section of a bar under axial loading - compound stresses - Normal and tangential stresses on an inclined plane for biaxial stresses-Two perpendicular normal stresses–representation of stress on Mohr's circle diagram, Introduction to theories of Failure.

UNIT – V
COLUMNS: Buckling and Stability, Columns with Pinned ends, Columns with other support Conditions, Limitations of Euler's Formula, Rankine's Formula.
THIN CYLINDERS: Thin seamless cylindrical shells– Derivation of formula for longitudinal and circumferential stresses – hoop, longitudinal and volumetric strains – changes in diameter, and volume of thin cylinders.

TEXT BOOKS:

1. Strength of materials/R.K.Bansal/LaxmiPublications5th edition/2017
2. Mechanics of Materials/Gere and Timoshenko,/TMH4thedition/2010
3. Strength of materials/ S.Ramamrutham/Dhanpatrai publishers 1stedition /2016

REFERENCE BOOKS:

1. Solid Mechanics, by Popov/PHIpublications2nd edition/2017.
2. Introduction to Solid Mechanics / Irving H Shames/ 4thedition PEARSON /2014.
3. Strengthofmaterials/Young,D.H.Timoshenko,Stephen/CBSpublishers/2002

Semester	III	L	T	P	C	Course Code
Regulation	V20	3	0	0	3	V20MET05
Name of the Course	Fluid Mechanics with Machine Learning					
Branch	Mechanical Engineering					

Course Outcomes:

	After successful completion of the course, the student will be able to	Knowledge Levels
CO1	Explain the concepts of fluid properties and measurement of pressure.	K2
CO2	Describe the types of flows, lines & apply equations of fluid mechanics and its applications.	K3
CO3	Calculate losses and force on different types of vanes.	K3
CO4	Calculate the performance of turbines.	K3
CO5	Calculate the performance of pumps & understand hydraulic systems.	K3

UNIT – I
FLUID STATICS: Dimensions and units-Physical properties of fluids-Density, Specific gravity, Viscosity, Surface tension, Vapour pressure, Capillarity, Bulk modulus. Pressure types-Atmospheric, absolute, gauge and vacuum pressure and measurement of pressure-Piezometer, different types of manometers.

UNIT – II
FLUID KINEMATICS: stream line, path line and steak line and stream line, classification of flows steady &un steady, uniform & non uniform, laminar & turbulent, rotational & irrotational flows-equation of continuity for one dimensional flow and three dimensional flow. Equation of continuity in differential form.
FLUID DYNAMICS: Surface and body forces, Bernouli's equation along a stream line, Momentum equation, application of momentum equation on pipe bend. Measurement of flow: Pitot tube, Venturimeter, Orifice meter.

UNIT – III
CLOSED CONDUIT FLOW: Reynolds experiments, Darcy-Weisbach equation, Major and minor losses, Hydraulic gradient line, Total energy line, Pipes in series and parallel.
BASICS OF TURBO-MACHINERY: Determination of hydrodynamic force of jet on stationary and moving flat, inclined, curved vanes (jet striking at tip and centre), velocity diagrams, work done and efficiency, flow over radial vanes, series of vanes.

UNIT – IV
TURBINES AND PUMPS: Classification of turbines, Pelton wheel, Francis turbine, Kaplan turbine- working proportions, work done, efficiencies. Draft tube-types, functions and efficiency.
CENTRIFUGAL PUMPS: Working, work done, heads, efficiencies, losses.
RECIPROCATING PUMPS: Working, work done, slip, indicator diagrams.

UNIT – V

FUNDAMENTALS OF MACHINE LEARNING: Supervised, semi-supervised and supervised learning.

MACHINE LEARNING FOR FLUID MECHANICS: Introduction, historical developments, challenges and opportunities; concepts of flow modelling and flow optimization & control.

TEXT BOOKS:

1. Hydraulics, Fluid mechanics and Hydraulic machinery – Modi & Seth.
2. Fluid mechanics and Hydraulic machines – R.K. Bansal.
3. Introduction to Fluid mechanics and fluid machines – S.K. Som & G. Biswas. (Tata –Mcgrawhill)
4. Ethem Alpaydin, Introduction to Machine Learning , MIT Press, Prentice Hall of India, Third Edition 2014.

REFERENCE BOOKS:

1. Fluid mechanics and machinery – G. Ramadurgaih (New age international publishers)
2. Fluid mechanics and fluid power engineering – D.S.Kumar (S.K. Kataria and sons)

Semester	III	L	T	P	C	Course Code
Regulation	V20	3	0	0	3	V20MET06
Name of the Course	Thermodynamics					
Branch	Mechanical Engineering					

Course Outcomes:

	After successful completion of the course, the student will be able to	Knowledge Levels
CO1	Discuss the basic terms related to work and heat.	K2
CO2	Explain first law of thermodynamics and internal energy.K2	K2
CO3	Apply the second law of thermodynamics to basic thermal systems.	K3
CO4	Analyze various thermodynamic cycles.	K4
CO5	Discuss about pure substance.	K2

UNIT – I

Thermodynamic System, boundary, Surrounding, control volume, Universe, Types of Systems, Macroscopic and Microscopic viewpoints, Concept of Continuum, Thermodynamic Equilibrium, State, Property, Process, Cycle – Reversibility – Quasi – static Process, Irreversible Process, Causes of Irreversibility – Energy in State Work and Heat, Point and Path function. Zeroth law of thermodynamics.

UNIT – II

Joule's Experiments – First law of Thermodynamics –First law applied to a Process – First law applied to a flow system –Energy balance for closed systems-Specific heats at constant volume and pressure - Internal energy and Enthalpy, Some steady flow energy equation applied to Nozzle, Turbine, Compressor and heat exchanger devices, PMM-I, Limitations of the First Law – Thermal Reservoir, Heat Engine, Heat pump, Parameters of performance.

UNIT – III

Second Law of Thermodynamics, Kelvin-Planck and Clausius Statements and their Equivalence / Corollaries, PMM of Second kind, Carnot's principle, Carnot cycle and its specialties, Clasius theorem Clausius Inequality, Entropy, Principle of Entropy Increase, availability and irreversibility(Basic definitions), T-ds relations, Helmholtz and Gibbs functions, Gibbs relations, Maxwell relations, Elementary Treatment of the Third Law of Thermodynamics.

UNIT – IV

THERMODYNAMIC CYCLES: Carnot vapor cycle, ideal Rankine cycle, Rankine reheat cycle, air-standard Otto cycle, air-standard Diesel cycle, air-standard Brayton cycle, vapor-compression refrigeration cycle.

UNIT – V

PURE SUBSTANCES: P-V-T- surfaces, T-S and h-s diagrams, Mollier Charts, Phase Transformations, Triple point and critical point, properties during change of phase, Dryness Fraction, Clausius – Clapeyron Equation.

TEXT BOOKS:

1. Engineering Thermodynamics, PK Nag 5th Edn, TMH,2014.
2. Thermodynamics, An engineering Approach, Y.A. Cengel& M.A. Boles, 7th Edn- McGraw Hill, 2014.
3. Internal Combustion Engine –V Ganeshan.4th edition, TMH, 2016

REFERENCE BOOKS:

1. Engineering Thermodynamics by Y.V.C. Rao, 1st edition, Universities, 2005.
2. A text book of Engineering thermodynamics, R.K Rajput, 4th edition, Lakshmi Publishers, 2010.

Semester	III	L	T	P	C	Course Code
Regulation	V20	0	0	3	1.5	V20MEL02
Name of the Course	Fluid Mechanics & Hydraulic Machines Lab					
Branch	Mechanical Engineering					

Course Outcomes:

	After successful completion of the course, the student will be able to	Knowledge Levels
C01	Determine the force exerted by jet, friction factor, loss of head due to sudden contraction.	K3
C02	Examine and Analyze the performance of pumps and turbines.	K3
C03	Calibrate different flow measuring devices.	K3

1. Determination of force exerted by jet on a flat vane.
2. Determination of loss of head due to sudden contraction.
3. Determination of friction factor.
4. Calibration of Venturimeter.
5. Calibration of Orifice meter.
6. Calibration of Turbine flow meter.
7. Analyze the performance of single stage centrifugal pump.
8. Analyze the performance of multi stage centrifugal pump.
9. Analyze the performance of reciprocating pump.
10. Analyze the performance of Pelton wheel.
11. Analyze the performance of Francis turbine.

Semester	III	L	T	P	C	Course Code
Regulation	V20	0	0	3	1.5	V20MEL03
Name of the Course	Mechanics of Solids & Materials Engineering Lab					
Branch	Mechanical Engineering					

Course Outcomes:

	After successful completion of the course, the student will be able to	Knowledge Levels
CO1	Assess the Mechanical properties of different metals.	K3
CO2	Examine the micro structures of different Ferrous and non Ferrous metals.	K3
CO3	Identify the effect of heat treatment and cooling rates on the Properties of steels.	K4

NOTE: Any 6 experiments from each section A and B.

A) MECHNICS OF SOLIDS LAB:

1. Direct tension test
2. Bending test
a) Simply supported beam
b) Can til ever beam
3. Torsion test
4. Hardness test
a) Brinell hardness test
b) Rockwell hardness test
5. Test on springs
6. Compression test on cube
7. Impact test
8. Punch shear test

B) METALLURGY LAB:

1. Preparation and study of the Micro Structure of pure metals like Iron, Cu and Al.
2. Preparation and study of the Micro structure of Mild steels, Medium carbon steels, and \high–Csteels.
3. Study of the Micro Structures of Cast Irons.
4. Study of the Micro Structures of Non-Ferrous alloys–Brass and Bronze.
5. Study of the Micro structures of Heat treated steels.
6. Hard enability of steels by Jominy End Quench Test.
7. To find out the hardness of various treated and untreated steels.

REFERENCE BOOKS:

1. Strength of materials, S.S.Bhavikatti Vikas Publications, 4th edition, 2013.
Material Science and Metallurgy, Dr.V.D.Kodagire, Everest Publishing House, 40th Edition, 2017

Semester	III	L	T	P	C	Course Code
Regulation	V20	0	0	3	1.5	V20MEL04
Name of the Course	Machine Drawing					
Branch	Mechanical Engineering					

Course Outcomes:

	After successful completion of the course, the student will be able to	Knowledge Levels
CO1	Identify the national and international standards pertaining to machine drawing.	K2
