### ***3.3.1 Institution has created an ecosystem for innovations, Indian Knowledge System (IKS), including awareness about IPR, establishment of IPR cell, Incubation centre and other initiatives for the creation and transfer of knowledge/technology and the outcomes of the same are evident***

The institution has established an ecosystem to foster innovation, knowledge creation, and knowledge transfer, with dedicated centers for research, entrepreneurship, community engagement, and incubation. One of these centers is the Entrepreneurship Development Cell (EDC), which aims to harness the untapped creativity of students and help them become technology-based entrepreneurs. The EDC organizes four Entrepreneurship Awareness Camps (EACs) sponsored by DST-NIMAT and provides support and training to students interested in transforming their ideas into startups. Additionally, the institution has received a financial grant of over one crore from DST for community-oriented projects under the SEED program.

The institution also boasts a recognized Institute of Innovation Council (IIC) cell, which encourages students to participate in hackathons and submit their ideas to the YUKTI Innovation Challenge. The Intellectual Property Rights (IPR) Cell of the institution conducts awareness programs on patents, trademarks, copyrights, and other aspects of intellectual property for both faculty and students. Thanks to this initiative, several faculty members have published patents, received grants, and obtained copyrights.

To further promote innovation and nurture young students, the institution has established the MoE's Innovation Cell (MIC) - Institution's Innovation Council (IIC). This council encourages, inspires, and supports students in creating prototypes based on their new ideas. As part of this initiative, four faculty members have successfully completed the certification course in Design Thinking offered by EPICS. Moreover, various departments within the institution actively organize hackathons under the supervision of different cells.
